

INFLUENZA CASES ON THE WANE

DISCHARGES EXCEED NEW ARRIVALS—NO CO-EDS HAVE DISEASE

The cases of influenza are being cared for in the regular hospitals, of which there are two, and six other temporary hospitals in private homes. All the more serious cases are kept in the Inland Hospital. Those not so serious are in the A. K. E. Hospital. These are the military hospitals. The Gritman Hospital is taking care of the civilian cases, and the more severe cases from the A. K. E. Hospital are taken there.

Arrangements were made by the health officers for another building to take care of the overflow, in case there should be any.

Convalescent Ward

The Elks' Temple has been converted into a convalescent ward for the S. A. T. C. and vocational men. The Guild Hall is used for the same purpose for the convalescents.

Several private houses are being used to house influenza patients. Mrs. Frank Moore's home and the house next door are in use. Only civilian cases are taken here, and seven have been cared for so far. At Mrs. Robert's house there are three civilian cases.

No Cases Among Co-Eds

The health officers are trying to arrange places for girls, if any should contract the influenza. There are no cases as yet among the Co-Eds, but the watchword is preparedness. It is hoped that Professor Storer's house from which he is moving, can be secured, and held in readiness in case of an emergency. No convalescent ward has been arranged for to take care of the girls, since there are no cases.

The nursing is done by trained nurses from the city and from out of town, by some who have volunteered, and by vocational men detailed as orderlies.

Three of the trained nurses have contracted the influenza and are sick in bed. They are Mrs. Livingstone, Mrs. Baker, and perhaps Mrs. Ward Miller.

Flu Situation is Improving.
 The hospital reports that the "flu situation" is much better than it has been. Influenza is on the decline at last. Only six new cases were reported Monday. Most of these are mild. Nine men were discharged as cured and will be able to resume their work. Very few of the cases now in the hospital are serious.

Some hope of soon lifting the quarantine is held, but no promises can be made. Even an official guess is withheld as to when the ban will be raised.

In Mrs. Miller's case it is not yet known whether it is influenza or the effects of the vaccine which she took yesterday.

It is especially to be hoped that there will be no rapid increase in the number of cases, for with these nurses unable to work a sudden influx would create a very serious situation.

Conditions Are Improving.

The outlook is much brighter the last two days, however. Both Monday and Tuesday the number of men discharged exceeded the arrivals, and it is believed that the disease has reached its height and is on the wane. There are still some very serious cases, but most of them are doing very well.

Late Tuesday evening Professor Lewis stated that the situation was encouraging, more so than ever before since the influenza broke out.

Men in the vocational training section hospitals, at the Inland Empire Hospital, and Gritman's Hospital, and men in the Alpha Kappa Epsilon hospital for Section A are as follows: Harry Tingliff, John Hudspeth, Fred Rugg, Hassel Clark, Clarence Jenkins, Lester Cobb, John Allen, E. B. Smith, Carl Schulze, Heber Payne, Eugene Shipman, Howard Larsen, Audry Northrup, Joseph Ruffing, Herman Greaser, Glenn Bump, Orin Wilson, Clark Vliet, Burrill Brough, Albert Dickson, Oscar Elfston, Clarence Berquist, Harold A. Dart, Victor Christensen, Wade Lowell, Jay C. McDonald, George Irving, John Logan, A. L. Strong, L. M. Madsen, Riley Heath, Ted Hege, William Peterson, Frank Thiel, Dewey Howe, William Heinemann, Ralph Davis, Ralph Jacobson, Wilson Archibald, Oscar O. Doung, Glenn W. Browning, Clarence Wicks, Carl O. Swanstrom, Leslie A. Belle, Emery L. Briscoe, Cecil P. Pollard, David B. Camp, Charles E. Salisbury, Eric H. Larson, J. W. Nickel, William Helmer, Rex R. Bailey, Philip W. Buck, Miles J. Davis, Rudolph Peterson, Jos. Whitecomb, Howard McCuaig, Ernest F. Olson, David V. Horton, Ralph E. Skinner, Joseph Middleton, Ralph Gouchmour, Albert H. Lawrence, Chas.
