Going, going, but not yet gone

-Lemhi Penstemon

Of numerous endemic and rare plants inhabiting the rugged mountainous terrain of east central Idaho, Lemhi Penstemon (Penstemon lemhiensis) is without doubt one of the more attractive. In a fashion typical for the figwort family (Scrophulariaceae), flowers of this species have united petals that are strongly flared into a 2-lipped shape much the same as the common monkey flower. Rather than yellow however, as in many monkey flowers, Lemhi penstemon's flowers are an incredibly attractive clear blue to blue-violet, each nearly 2" long and numerous in the upper part of plants that can reach nearly 3' in height.

This unusual plant inhabits dry slopes with sagebrush and bunchgrasses on fringes of Ponderosa pine and Douglas fir forests in Lemhi County near Salmon ID, although a few populations are also known in adjacent Montana.

Although one might be tempted to try this as a rock garden subject, its equally attractive and far more common close relatives and neighbors, <u>Penstemon cyaneus</u> and <u>Penstemon payettensis</u> appear to be far easier to cultivate.

Lemhi penstemon is on both state and federal lists of plants to be considered for endangered or threatened status, and has had some problems in the past mainly due to range improvement programs or weed control by the use of herbicides. Federal land managers are now aware of its presence and are modifying land use plans where necessary to ensure its survival. The future appears bright for one of Idaho's most interesting wildflowers.

Contributed by Douglass Henderson

(Line drawing of <u>Penstemon lemhiensis</u> from VASCULAR PLANTS OF THE PACIFIC NORTHWEST, by Hitchcock et al used with permission of University of Washington Press.)

Plans are underway for two spring workshops. "Residential Landscaping," to be conducted by Glenda Hodge, landscape designer with Hodge and Associates of Moscow, will deal with landscaping problem areas around the home. She suggests that anyone with a landscaping problem and interest in participating bring a sketch of the property drawn to scale as well as photographs of the problem area. If you would like to improve the landscaping around your home, plan to attend! The date is to be arranged.

"Wildflowers of the Pacific Northwest," will be presented at 7 pm, Thursday, April 5, in Room 456 of the Life Sciences Bldg., South by Dr. Douglass M. Henderson, Curator of the University of Idaho Herbarium and Associate Professor of Botany. This is a repeat of a workshop offered five years ago and one of the most popular ever given. Doug Henderson's excellent photographs and narrative will illustrate the wide variety of wildflowers found in this part of the country.

Published by UI Arboretum Associates **February 1990**

Heigh ho, heigh ho, it's to workshops we go!

The Arboretum Associates sponsored several workshops for people in the Moscow area last year. The first, "Aromatic Herbs and Potpourri," was conducted by Shirley Cowin, a Moscow teacher whose avocation is history. Her informal talk outlined the importance of aromatic plants in the past. In medieval times when homes were cold and baths were infrequent, aromatic herb oils were used to cover a multitude of odors. In Victorian times herbs were used in gardens on paths and benches to tease the senses of those who walked by. Shirley shared current techniques for preserving and using aromatic herbs in the home. A number of potpourris were sniffed and handouts of recipes were distributed.

"All About Irises" was presented by Marlene Johnston in her garden June 10, 1989. Her talk covered bloom evaluation, cultural requirements, fertilizing, propagation and diseases and fungal problems. She stressed the importance of labeling and documenting varieties in home gardens. A demonstration of planting, dividing, treatment of soft rot, and pollination methods followed. All attending practiced hybridizing on a sample bloom and received a handout covering everything presented.

The third workshop, "Preserving Garden Produce by Drying," was presented by Dr. Marilyn Swanson, UI Extension Nutrition Specialist. Advantages and disadvantages of drying processes were compared with other methods of preserving foods. Several commercial dryers were evaluated and samples of foods that had been dehydrated were sampled. Of particular interest to many was the variety of foods that could be successfully stored by the dehydration process.

"Designing Grapevine Wreaths," Nov. 20, the enjoyable hands-on workshop conducted by landscape designer Glenda Hodge, was our final presentation of 1989. The \$15 registration fee covered the cost of materials and allowed the participants to create and keep wreaths of their own design. Giving additional help on arrangement of material was Mary Luther, the 1989 Idaho State Garden Club Flower Arranger of the Year.

Thanks to all who presented or attended workshops in the 1989 series.

Questions, suggestions, or comments?

The members of the Arboretum Associates Executive Board are dedicated to continuing the progress made in advancing the arboretum project. We, as many of you, plant gardens, appreciate the outdoors, enjoy nature, and are concerned about the environment. Our commitment is to create interest, generate enthusiasm and publicize and encourage financial support for the arboretum. Our goal is a fine arboretum for both the University of Idaho and the State of Idaho.

We would enjoy getting some feedback from you, our readers. If you have any questions, workshop suggestions or comments about the arboretum project, please write and let us know your feelings. We'll try to give a timely response. Send to: Arboretum Associates, PO Box 3391, University Station, Moscow ID 83843. We look forward to hearing from you. When an ill wind blows . . .

Reports of damage to UI trees by the pre-dawn windstorm of January 8, (gusting up to 90 mph!) indicate that about 180 mature specimens were uprooted or broken and unsalvageable. Dr. Terry Maurer, **Director of University** Communications, indicated that 24 trees planted by Dr. Charles Shattuck and his forestry students between 1910 and 1917 were downed. Maurer said that, had not selective removal of diseased and damaged trees been done there in the past year, the original arboretum would have sustained much greater damage.

He stated that among the prize trees damaged or destroyed on the campus were the Amur cork tree (near Memorial Gym), a California incense cedar (in the old arboretum) and approximately 7 conifers located at the East end of Hello Walk. Also uprooted was the Daughters of the American Revolution's spruce tree to honor **Mary Forney**, planted in 1929 near the Continuing Education Building (Forney Hall). Other areas hard hit were the East side of the Kibbie Dome, the golf course and the tree farm.

About 30 other trees which suffered minor damage may be saved. Many of the lost specimens can be replaced, but planting is not scheduled to begin until fall.

ARBOR DAY 1990 will be celebrated both nationally and in Idaho Friday, April 27. **Dr. Jim Fazio**, UI FWR faculty member, Arboretum Associate and writer for the National Arbor Day Foundation newsletter, informs us that a recent survey indicates that there are spaces for 60 to 100 million trees to be planted along streets and avenues of America. He also noted that another survey found that, for every street tree, there are 10 trees on private land. Celebrate Arbor Day this year and plant a tree.

EARTH DAY 1990, scheduled for Sunday, April 22, will be international in scope and will reflect global cooperation to remedy our planet's ecological difficulties (global warming, ozone problems, waste hazards and tropical rain forest destruction). One of Earth Day goals will be the planting and care of a billion trees by year 2000

New to the Arboretum

Dozens of Narcissus bulbs (mainly varieties of garden origin) were planted on the terraces of the European section of the new arboretum last fall. These include:

> 'King Alfred', Division 1: Trumpet Daffodils of Garden Origin

'Flower Record', Division 2: Longcupped Daffodils of Garden Origin

'Thalia', Division 5: Triandrus Daffodils of Garden Origin

'Geranium' and 'Grand Soleil d'Or', Division 8: Tazetta Daffodils of Garden Origin

'Actaea', Division 9: Poeticus Daffodils of Garden Origin

'Cassata' and 'Parisienne', Division 11: Split-Corona Daffodils of Garden Origin

<u>Narcissus canaliculatus</u>, Division 10: Species and wild forms and wild hybrids

'Gold Ducat' and 'Texas', both double-flowered Daffodils of Garden Origin

Executive Commitee Report -

The Arboretum Associates' executive committee has attained several of its recent goals. They are:

1. Reprinting and distribution of additional copies of the Master Plan Report is finished. A number of copies have been placed in various locations on campus and in Moscow. The Moscow City Library and the University Library each have a copy on reserve where they can be reviewed. Other copies are at the Alumni Office, Moscow City Hall and the Moscow Chamber of Commerce Office at 411 S. Main Street.

2. A mini version of the Master Plan Report in the form of an **INFORMATION SHEET** is complete and included with this newsletter. Please take the time to read it. (You'll be quizzed on it in the next newsletter.) It has extracts from the Master Plan and also serves as an update on progress in the Arboretum/Botanical Garden since 1980.

3. The Board prepared a free-standing display promoting the Shattuck Arboretum for initial exhibit at the 1989 Latah County Fair. The display consists of two 4'x8' panels showing various aspects of the arboretum including a topographical map of the site. Any group wishing to borrow it may do so by contacting Richard J. Naskali at the Arboretum Office, Room 205 of the Continuing Education Building. (Phone: 885-6250)

Other goals include preparing membership renewal reminders, updating the Constitution and Bylaws, printing a self-directed walking tour map of woody plants on campus, and the on-going challenges of arranging workshops and generating enthusiasm and publicity for the arboretum project.

The budget approved for the year is as follows:

Reprinting 24 copies of the 1980 Master Plan\$ 264
Fair-booth display materials
FWR 75th Bronze plaque
Newsletter & postage800
University of Idaho Register, one insert
Fact/information sheet about new arboretum500
Advertising in IDAHO THE UNIVERSITY
Campus walking tour map of woody species
Named Narcissus for European section
Incidentals, mailing, postage

GRAND TOTAL\$5064

1989 Annual Meeting

Dean Vettrus presided over the 11th annual meeting of the Arboretum Associates on May 17, 1989. **Robert Steele**, treasurer, gave a report on the various budgets (more on this in the next newsletter) and emphasized the need for increased membership. **Richard Naskali** summarized changes in the new arboretum during the prior year and noted that these were reported in past newsletters.

There were lively discussions about raising awareness of the arboretum project, increasing membership, fund-raising, workshops, projects, bylaw changes and designing a new brochure.

Officers elected to serve for two years are President, Marlene (Mrs. Richard) Johnston; Vice-president, Walter Kochan; Secretary, Carol Lynn (Mrs. Henry) Johnson; Treasurer, Robert Steele. Elected for a three-year term to the Board of Directors was Glenda (Mrs. Larry) Hodge. The continuing board members are Henry Johnson (to 1991) and Barbara (Mrs. Dennis) Peterson (to 1990). The membership expressed appreciation for the fine and dedicated job Dean Vettrus did during his tenure as President of the organization. Well done, Dean!

The Arboretum Associates Plan to Grow

The Arboretum Associates are dedicated to two tasks for which it was founded; namely, making friends and raising money for the UI arboretum. To this end, your new board is eager to raise awareness of the arboretum project. Our communications and progress reports to you have been too infrequent and we plan to change that with more frequent newsletters.

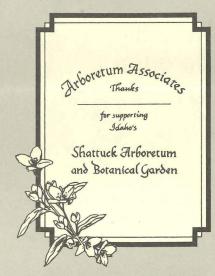

We hope to effect greater awareness in several other areas as well. The university's alumni, faculty, staff and students have never been urged to contribute to the project on an annual basis. Nor have businesses and other interested groups and individuals been asked to do so. We will have membership invitations/forms available in the next two IDAHO THE UNIVERSITY alumni magazines. We will begin contacting many area businesses and organizations for support and have designed a framed document of appreciation to award to those participating with business or group level memberships. Our **INFORMATION SHEETS** are available at various locations on campus and to alumni who attend Alumni Association-sponsored functions outside the Moscow area.

Individual members can do their part to help raise awareness of the project by informing friends or fellow alumni of the Shattuck Arboretum/Botanical Garden. Begin by urging them to visit the arboretum when in Moscow and encouraging their support of the project through membership in the Arboretum Associates.

Bulletin Board

The Idaho-Montana section of The American Society of Landscape Architects, in recognition of outstanding professional achievement, presented its Merit Award to Richard Carothers Associates for the Shattuck Arboretum/Botanical Garden Master Plan.

The Moscow Garden Club acquired some divisions of prized, older peonies from the Lewiston home of Vada McKinley (UI Biological Sciences retiree). The club sold these at a Fall plant sale and donated proceeds from them, over \$170, to the Arboretum. Thanks to the MOSCOW GARDEN CLUB for that donation and special effort.

Special thanks to **Phyllis Le Tourneau, Dr. Douglass Henderson** and **Glenda Hodge** for calligraphy, line-drawing and graphic design of our new thank-you document for business and organization memberships.

It is with saddness we report the death of Asssociate **Tom Pethtel** of Kamiah, Idaho, August 29, 1989. Tom's wife Lillian is a past president of the Arboretum Associates and Tom frequently accompanied her to our meetings.

Shattuck Arboretum and Botanical Garden INFORMATION SHEET					
SHATTUCK ARBORETUM	Shattuck Arboretum, located on the University of Idaho campus in Moscow, Idaho, is one of the oldest university arboreta west of the Mississippi River.				
&	The orginal arboretum covers 25 acres and includes:				
BOTANICAL GARDEN	* A mature forested area which includes outstanding specimens of Giant Sequoia, Eastern Beech, Canadian Hemlock, and California Incense Cedar.				
	* The C.L. Price recreation area	, comprised of picnic sites, ampitheater and pic	nic shelter.		
	The original arboretum was initiated by Dr. Charles Houston Shattuck, (the University's first professor of forestry and first appointed Dean of Letters and Science) in 1910. Much of the care and planting was done by C.L. Price, a staff nurseryman, between 1910 and 1925.				
	The "new" arboretum and botanical garden is being developed in the 63 acre valley east of the UI golf course.				
PURPOSES	Over time, the Shattuck Arboretum and Botanical Garden will become a living museum of labeled trees, shrubs and plants for present and future generations to study, observe and enjoy; a place where plants will be cared for and displayed; a place of beauty, relaxation, inspiration.				
HISTORICAL	1910 - Charles Houston Shattuck in	itiated the first plantings on "Arboretum Hill."			
HIGHLIGHTS		dore Roosevelt planted blue spruce on the Adm	inistration Building lawn.		
	 1917 - Shattuck left the U.I. but planting and care of arboretum continued through 1925 by C.L. Price, forestry nurseryman. 1920's - Arboretum gained popularity through the 1960's for ceremonies, entertainment and picnics with the addition of the ampitheater, picnic sites and picnic shelter in the C.L. Price recreation area. 				
		e site for arboretum expansion.			
	1977 - Public meetings held with landscape architects for Master Plan goal-setting, plan development and draft reviews.				
	1978 - UI Arboretum Associates formed to raise funds, organize volunteers for work and publicize the arboretum expansion project.				
	1980 - Master Plan presented to an				
	1982 - Planting began at new arbor				
	1986 - Service roads, ponds and irrigation systems are developed by volunteers.				
	1987 - Idaho State Federation of Garden Clubs' Lilac grove dedicated April 22.				
	1988 - Bird watchers report sighting several species new to the arboretum.				
	1989 - University of Idaho Centennial Oak Grove, honoring the University's first thirteen presidents, dedicated May 12.				
ARBORETUM ASSOCIATES	The organization of friends, boosters, donors and volunteers joined in the common purpose of furthering the Shattuck Arboretum and Botanical Garden with contributions of money, talents or time.				
	The group formed to publicize and raise funds for the arboretum expansion project.				
WORKSHOPS	Arboretum Associates has sponsored	workehoos covering such topics as:			
WORKONOIO	Improving garden soils	Pruning trees and shrubs	Landscaping with native plants		
	Vegetable gardening	Lawn planting and care	Holiday wreaths & arrangements		
	Grafting	Gardening with spring bulbs	Houseplant care & propogation		
	Wildflowers Aromatic herbs	Garden pests and diseases Planting for color through the seasons	Irises		
	Atomatic neros	Fidming for color through the seasons			
LONG- Develop five major planting blocks which will have native woody plants from north temperate regions.					
RANGE	Develop five major planting blocks which will have native woody plants from north temperate regions.				
PLANS					
	Western North American (16 acres) Remodel barn with classrooms, meeting rooms, library, gift shop and restrooms.				
	Display garden (11 acres) Fund conservatory complex.				
	Eastern North American (9 acres)				
COMING SOON	Campus walking-tour map of labeled	trees and shrubs scheduled to be printed by sur	nmer 1990.		

THE FOUNDATION	The University of Idaho Foundation undertook the initial funding of a master plan to guide future development of the Shattuck Arboretum and Botanical Garden.				
	The Foundation continues to aid the Associates with the	investment of contributed funds.			
COST	COST Development of the arboretum and botanical garden is a long term project and will be done in phases as funding permits. In the "magnitude of cost" estimate given in the Master Plan was as follows:				
	Wetland development				
	(Well, water distribution, irrigation, electrical, gas.)				
	Pedestrian and vehicular system				
	\$4,000.000				
	(Parking area, roads, pains, broges, marsh warks.) Buildings (Includes public and administrative, maintenance and research facilities. This figure could				
	vary significantly depending on extent of building development.) Planting				
	(Functional plantings and garden collections.)				
	Miscellaneous site improvements\$500,000 (Fenced boundaries, benches, walls, observation plantforms.)				
	TOTAL COST ESTIMATE (1979 DOLLARS)		\$7,450,000		
FUNDING	The following are sources of funds for the development of University of Idaho	of the new arboretum and botanical ga Annual Fund contributions	arden.		
	Arboretum endowment earnings	Named grove donors			
	Contributions to the U.I. Arboretum Associates	Fund raising events of the Arbo	pretum Associates		
	Contributions by Matching Gift companies

Expressing Our Gratitude

The Arboretum Associates have been organized since the summer of 1978. Over the years many friends have supported the project with financial help. As we begin our twelfth year, the executive board would like to express and acknowledge all who have, over the years, been donors. Our thanks to you, those on our **ARBORETUM HONOR ROLL OF DONORS**.

*Denotes Matching Gift

We urge those of you who have not yet contributed within the past year to do so today. You may mail your donation directly to the **Arboretum Associates at P.O. Box 3391, University Station, Moscow, Idaho 83843**, contribute through the UI's Annual Fund or, for UI employees, by the university's Payroll Deduction program. (We regret, but are responsible for, any omissions in the above list.)

Watch for our next issue of **ARBORNOTES** when we tell all about "those funny-looking trees in front of the Home Ec. Building." We'll also include advice from a Master Gardener on culture of prize-winning begonias, give information about the annual meeting in May, a progress report on the arboretum plantings, announce new workshops and much more. If you have suggestions for future newsletter articles, or would like to volunteer in any manner, PLEASE contact us at the Arboretum Associates address. We'd appreciate your help. **DEADLINE** for material for next issue of **ARBORNOTES** is March 5, 1990.
