UNIVERSITY OF IDAHO, MOSCOW, IDAHO, NOVEMBER 7, 1911

NUMBER 8

VICTOR PRICE DEB. MEET

Senator Borah Commends Work Parker V. Lucas Is Made President.

The first meeting of the Victor Price Debating Society was held in the Y. M. C. A. room Friday afternoon. The meeting was called for a re-election of officers. The officers elected for the year are Parker V. Lucas, president; B. E. Davis, secretary; Chas. E. Hornung, treasurer; Ralph E. Foster, sergeant-at-arms.

Heretofore it has been customary according to the constitution of the society to elect two critics from the student members, but as there are no seniors in the society this year it was that best to elect two members of the faculty as critics. Since there were no members of the faculty present at Friday's meeting, the election of critics was postponed until the next meeting of the society.

Under the leadership of Mr. Lucas the Victor Price debating team looking forward to a very successful year. Mr. Lucas, to whom the Eidenbaugh debate prize was awarded in the try-out last Wednesday, is a splendid booster and will no doubt bring the interest in intra-collegiate debating out of the hole into which it fell last year. About a dozen new men were voted into membership in the society at Friday's meeting and many more are expected to join at the next meeting. The program committee is preparing for a debate on some live issue of the day and promises a very interesting program. Everyone who is at all interested in debate or public speaking should attend the meetings of the society.

While in town last Thursday, Senator Borah expressed his regrets that debate work at the University had fallen into such a lamentable condition, and that the student body is taking so little interest in this kind of work.

Senator Borah said, however, that he felt sure that the next legislature would allow the University sufficient funds for the employment of a debate coach and instructor in public speaking. The Senator remarked further that it is not training in oratory that is needed at the colleges of this country so much as it is training in "give and take" debate. Mr. Borah said, "The United States

Course for Forest Rangers.

Beginning January 31st, 1912, the Department of Forestry will offer a ten week course in forestry for rangers and those desiring to prepare for a wider range of usefulness in forestry work.

Lectures, laboratory and field work will be given in such subjects as surveying and mapping, cruising and general reconnaissance work, mensuration, dendrology, silviculture and timbering. Also courses of lectures on forest management and forest law. This course is in charge of Professor C. H. Shastock of the Forestry Department.

K-S Informal For Pledges.

Saturday evening at the Kappa Sigma House was pulled off a series of stunts consisting of boxing, songs, stunts, etc., in honor of the new men pledged to Kappa Sigma. House rules for the evening were laid aside and a big informal time followed. Only the new men and Kappa Sigmas were present.

A "Dorm" Charivari.

On Tuesday evening the girls of the "Dorm" charivari Mrs. Bowles, joined Ellen Givens. After the party returned from an evening out, she was ushered into the dining room where she was overwhelmed with rice and old shoes. When the din had subsided to some extent, the night was asked to make a speech. After this the girls presented her with a set of fruit forks. Mrs. Bowles, being in Vancouver, B. C., escaped the event.

Surprise Party for Delta G's.

Wednesday night the Delta Gammas were pleasantly surprised when their Pi Alpha members gave them a little party. Various "stunts" were passed off by the pledges. After their hilarious time, they settled down to enjoy the dainties the Pi Alpha's had prepared for them.

Senate is full of orators, but it has only four or five debaters. It is surprising to find so few men in the Senate who can stand on their feet and engage in a hot give and take debate.

Speaking in this connection, Senator Borah expressed his opinion upon the present custom in the Senate of reading speeches instead of delivering them. He said, "If the question should ever come up, I would vote unhesitatingly for the abolition of 'essay reading' in the United States Senate. It is to be lamented that such a practice ever became customary."

Competitive Shoot of I. N. G.

Two teams representing nearly every company of the National Guard in Idaho met in Boise on October 9th and 10th for their annual shoot.

The University was represented by Allen R. Anderson and H. Gray.

The Company "M" team of Payette, of which Anderson was captain, won the team prize of thirty-five dollars.

In the eight-hundred and skirmish meet, Anderson took first place, winning two medals and a cash prize.

Gray took sick and was unable to take part in the shooting.

The Adjutant General stated that he would like to see as many men as possible join rifle teams, as next year Idaho, Washington and Oregon will hold a competitive shoot on the Coast.

Gymnasium Classes Busy.

One of the busiest men in the whole University is Physical Director Van der Veer. His strength testing machine is becoming so extremely popular that he is kept busy from 8 o'clock in the morning until six o'clock at night testing the big huskies who are in line for his Freshman Strength Cup. Last year the cup was given for the highest test in the whole University, but this year it will be offered only to men in the Freshman class. A cup will again be given to the girl making the largest test. This cup also will be given to a Freshman. Thus far Buck Phillips, with a test of 6760 lbs., leads the Freshmen for the men's cup and Miss Ellen McCrossin leads the Freshmen girls with a 4065 lbs. test.

Thometz leads the Short Course Ag. men with a test of 6455 lbs. Mr. Thometz is a brother of Lawrence Thometz who led the Short Course men last year with the remarkable test of 7350 lbs. Mr. Van der Veer says that all of the Short Course men are doing remarkable work in the gymnasium. He expects some records among these men this year.

In the apparatus that has just been installed in the gymnasium are a horizontal and peak ladder, and a hydraulic rowing machine.

Zeta Delta Gives Dance.

Zeta Delta gave its first big social function Friday night when it entertained the Delta Iota Chapter of Sigma Nu from Washington State College and about forty Idaho girls, at a dance in Eggan's Hall. The hall was elaborately decorated with evergreens and the Sigma Nu colors, black, gold, and white, and the stage was set for a refreshment room. Carey's Orchestra of six pieces furnished the music. Miss French, Mrs. Hodgins, Miss Wold, Mr. Wilber, and Mr. Tull were in the receiving line.

W. S. C. VS. IDAHO HD, SCORE 15-0

Second Teams of the Two Institutions Met Saturday on Roger's Field.

Saturday morning the Idaho scrubs, otherwise known as the second team, played their first annual game with W. S. C. A new custom has been established which will probably run on through the years.

The game itself was not a bad one although there was more or less comedy about it. It was much closer than the fifteen-to-nothing score indicates. Three times Idaho had the ball on W. S. C.'s five-yard line, and three times the W. S. C. line was impregnable. Washington made two of their touchdowns on forward passes to Ritter; the State College end, who was too fleet for the Idaho men.

Both coaches were much amused at the playing of their men. At times they stood on the side lines and roared. Dippel and Fields got off good for Idaho. Fields' punting was especially good, and he once got off a fifty-five yard punt when he was badly scared. Another time he made a punt and Parrish, the big man of whom much is expected next year, ran down and caught it. Parrish was uncertain as to whether to signal for a fair catch or not, but did not take any chances.

Idaho was not forced to substitute any of her men, but Wicher had his knee badly wrenched and has been unable to attend classes so far this week.

The last game on Idaho Field will take place this coming Saturday when Whitman meets Idaho. Two years ago Whitman beat Idaho by a thirty-to-nothing score, but it is a certainty that nothing like that will happen this year. Whitman managed to hold Oregon to an eight-to-five score, but that really does not show much, as last year Whitman played Washington the closest game in the Conference and yet finished last. The two teams should be very evenly matched though.

The University of Utah seems to have a fair team this year. She has beaten Colorado A. C. and Colorado School of Mines so far this year and has not lost any games.

REPORTERS
 Max Anderson 15 Stephen A. Hogan 15
 Margit Wozniak 15

Last spring saw the formation of two sectional clubs whose avowed purpose was the advertisement of the University. So far this year there has not been a meeting of either. The work undertaken by these organizations was of such nature that time and forethought were demanded. Naturally, these clubs cannot do their work in one short month or even. In other words, the great wave of host-levy that hit us in the spring would be much better distributed over the whole year, in which there is time and energy to spare at it. In the few weeks preceding the interscholastic events in the spring there are only busy consultations and half-thought-out, also some never carried-out plans.

The impress of high schools in the University is allowed by students and to the out-look of a very little consistent attention. A little planned-in-advance work costing nothing, asking but little time and energy, combined with a logical, feasible plan of direct live communication with the high schools, could easily and quickly be formed. For instance, all high schools hold regular assemblies. What about the results following from a weekly or monthly communication to these schools—one to be read in these assemblies—a live communication bearing the stamp and signature of a sectional club here?

It is unnecessary to make mention of the social pleasures derived in connection with such a club, or of the goodness of the work of interesting young minds in the University. Besides, those students doing the committee work derive very valuable experience through this work. They learn to know Idaho better, and the high schools more—they do good—and, in so far, do not live in vain. Attendance at the University carries with it duties; and if not those in this connection only be properly fulfilled, an Idaho student has obeyed no mean share of them.

This is a matter worthy of careful consideration, and we hope that shortly there may be a move made to use the advantages in this connection that demand attention.

Miss Mary Wilson, ex-12, of Boise, was a guest at the Omega Pi house Saturday and Sunday.

Miss Francis has been unable to attend her classes for the last few days on account of a severe attack of influenza.

The Theta Xi's were dining and entertained by the Gamma Phi's Sunday afternoon.

L. A. Fennell was in town the last of the week for a few days' visit.

Harold Engstrom '14 left for Pocatello Monday morning, where he was called by the severe illness of his mother.

Professor and Mrs. E. M. Halme entertained George H. Curtis, Charles Herring and Martin Kennedy at dinner Wednesday evening.

Miss Margaret Egan, ex-11, returned Sunday to the Lewiston State Normal after spending two weeks at her home in Moscow.

Fred Likens '05, principal of the Portlans school, was in Moscow Sunday, returning home from the teachers' institute at Lewiston.

Miss Wolf's dancing class started last Sunday with an enrollment of fifteen.

The Greeks will meet at the usual place at 7:30 p. m. tomorrow to elect officers and arrange a program for the year's work.

November 3, Month Hall, 7:30 p. m. Agricultural Club meet. Program will consist of addresses in Horticulture, Dairying, Seed Selection and similar topics. Important business to come up. All Ag. students are invited to join the club.

Capt. Geo. Steunenberg has recently been transferred from San Antonio, Texas, to Fort McPherson, Georgia.

L. A. Fennell, '11, who has been visiting with friends at the University for the past few days, returned to Orofino last Monday to take up his work as assistant ranger on the Clearwater Forest Reserve.

Mr. and Mrs. E. E. Cornwall and daughter were guests at the Phi Delta Theta house Sunday.

Professor Livingston will address the miners in a meeting at the Zeta Delta house tomorrow evening at 7:30. All are requested to be present.

A third company of cadets was organized in the drill hall last Thursday. The new company is composed of the Sacred three Ag. students.

Professor Sacor returned Sunday evening from Spokane where he has been investigating the chances of high-grade scenery and occasions for his comic opera, "Piafore." He reports the best of success.

NEW BUILDING FOR UNIVERSITY

Live Stock Pavilion Is Artistic And Of Practical Value.

There has recently been completed on the University campus what is destined to be one of the most popular class room buildings. Although Idaho's live stock interests had a greater percentage increase in the past ten years than any other state in the union, yet the live stock men of the state have not shown that interest in this feature of the educational work of the University that its importance as an industry demands. This has been due very largely to the fact that no adequate provision had been made for this most important division of the University work. The University now has, though small, one of the best live stock pavilions, or class-rooms, in the country. It is built in mission style and a single story with roof as well as abundant side lights. It will accommodate a class of one hundred and fifty students besides office room and temporary stall room for the animals used in class work. The time is safely past when live stock instruction in the University of Idaho will be limited to very inadequate abstract lectures and still more inadequate text books on live stock subjects. Hereafter the text book will be the living animal and the instruction will be imparted through the medium of the student's eye and hand. The live side of a barn yard in zero weather has in the past not been found the most favorable class room for live stock work with students. In the future the boys who wish to study live stock will have as comfortable a class-room as well their brothers who may wish to study mathematics, medicine or mining.

A Luxury for the toilet

Zora Toilet Cream

Refreshing and beneficial to the most delicate skin. It is pure, wholesome, and is not a whitewash, but a true healing cream.

LUCAS WINS DEBATE PRIZE

The Oldest Debate Prize in the University is Won by a Freshman.

The annual Ridenbaugh debate prize was awarded in the tryout last Wednesday to Parker V. Lucas, of Roseberry. Mr. Lucas is the second Southern Idaho man who has been the winner of the Ridenbaugh prize. He has never been in even a high school debate, but nevertheless was the choice of two of the judges for first place in the tryout Wednesday.

The Ridenbaugh is the oldest debate prize offered at the University. It is a cash award of twenty-five dollars and was established in 1903 by Mrs. W. H. Ridenbaugh of Boise. Mrs. Ridenbaugh has served the University in the capacity of both Vice-president and Secretary of the Board of Regents. The University Debate Council takes this opportunity of publicly thanking Mrs. Ridenbaugh for the prize.

The previous winners of the Ridenbaugh prize are as follows:

1903—Reuben W. Overman, class of '04; 1904—Victor Emmanuel Price, class of '06; 1905—Charles Armand Montandon, class of '06; 1906—Guy Holman, class of '08; 1907—Robert Oscar Jones, class of '09; 1908—Ralph Williams, class of '11; 1909—Paul McTeer Clemens, class of '11; 1910—Ralph Baxter Foster class of '13.

Fair Management Sends Thanks
"University of Idaho,
Moscow, Idaho.

Gentlemen:—

At a meeting of the Trustees of the Spokane Interstate Fair held on October 24th, the first regular meeting held since the close of the recent fair, a formal resolution of thanks was unanimously voted to the University of Idaho for the very good exhibit which they brought up, and the several departments which they had at the fair, and also for closing the college on Friday and making this day so successful.

The Trustees and Officers of our Association personally appreciate very highly the cordial support you have given us, and trust that the results of the fair pleased you and helped repay, in a measure, for the effort you have expended.

Yours truly,

Spokane Interstate Fair,
(Signed) Robert Cosgrove,
Secretary-Manager."

Miss French and the girls of Ridenbaugh Hall gave their annual At Home to the young women of the college, and the ladies of Moscow, on Saturday afternoon.

EXCHANGES

The men students at the University of Washington are up in arms because the co-eds insist on displaying their millinery in the class rooms.

The University of Utah is about to adopt to set of rules for under classmen similar to the ones in force here.

The University of Washington gives a \$25 trophy cup to the football star who is a genuine sportsman with a high scholastic standing, who is popular with the professors, is an all-around good fellow and combines the virtues of the husky athlete and the intelligent varsity debater. The cup was won last year by W. Grimm.—Ex.

High room rent at Madison has lead the Board of Regents of the University of Wisconsin to consider the erection of a men's dormitory.

Sayings of Famous Men.

Damocles: "It isn't a hatpin, anyhow."

Romulus: "Remus, you and I will root for the Cubs."

Elisha: "Go it, bear."

Shylock: "Aw, out it out."—Ex

Law men, take notice. A sophomore law student at Drake went insane recently from overstudy.

This little verse, started by Oliver Herford, the humorist, ran through the papers with the following results:

My sense of sight is very keen,

My sense of hearing very weak.

One time I saw a mountain pass,

But could not hear its peak.

—Oliver Herford.

Why, Ollie, that you failed in this
Is not so very queer.
To hear its peak you should, you
know

Have had a mountaineer.

—Boston Transcript.

But if I saw a mountain pass,
My eye I'd never drop;
I'd keep it turned upon the height,
And see the mountain's top.
—Philadelphia Public Ledger.

I didn't see the mountain pass,
Nor hear its peak, by George;
But when it came to storing stuff,
I saw the mountain gorge.
—Exchange.

The mountain, peaked at this,
Frowned dark while Ollie gazed;
A cloud o'erspread its lofty brow,
And then the mountain side.
—Transcript.

If Ollie could not hear its peak,
Or song of any bird
Or lambs or cows upon its slope,
Be sure the mountain herd.

The Gamma Phi Betas, in Halloween attire, paid an impromptu call on the "Dorm" girls the evening of the 30th.

A LETTER FROM FRANK STEWART

The Editor of the University Bulletin
 and the University Bulletin

Dear Sir,
 I have just received your letter of the 12th inst. regarding the Bulletin and I am glad to hear that you are interested in the Bulletin and that you are willing to help in its improvement.

Mr. Stewart's letter about the Bulletin is a very interesting one. It is a letter that every student of the University should read. It is a letter that is full of suggestions and ideas that will help to make the Bulletin a better one. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

the very first was interesting. We have received many letters of interest and we are glad to hear that you are interested in the Bulletin and that you are willing to help in its improvement.

After the work on the Bulletin is completed, it is only a matter of time before we will have a new Bulletin. We have received many letters of interest and we are glad to hear that you are interested in the Bulletin and that you are willing to help in its improvement.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice. I am sure that you will find it very interesting and that you will be able to put many of the suggestions into practice.

ABOUT THE CAMPUS.

Jewell Bothwell '12 who has been ill for the past week, is reported much better.

Lulu Curtis '15 who has been sick with tonsillitis, is attending classes again.

The annual Senior-Faculty reception was given by Miss French and the young ladies of the Dormitory on Saturday evening at Ridenbaugh Hall. The large number present spent quite a pleasant evening in conversation and dancing.

At a class meeting last week the Sophomores decided to give a class play about the first of March. A committee consisting of S. A. Regan, Howard Thompson, Cartee Wood, Mary Petoina and Harriet Bolger was appointed to present a list of plays from which the class can select one.

At a meeting of the Executive Board of the A. S. U. I. last Friday, Mary Petoina was elected secretary of the Associated Students to act during the absence of Ruth Annett. Miss Annett left last Saturday for Boston where she will attend the annual convention of the Gamma Phi Beta sorority. She will also visit several chapters of the sorority between here and Boston. Miss Annett will probably be away about a month.

Miss Katherine Keane, who was recently very ill, is again resuming her college work.

Fay Robinson, ex-'14, has been visiting at the Zeta Delta house for the past week. Mr. Robinson will probably re-register next fall.

A. P. Beckner spent a few days in Moscow on his way to Potlatch, where he is engaged in teaching. Mr. Beckner was in attendance at the teachers' institute at Lewiston last week.

The shaves and haircuts Russell the barber keeps are unsurpassable.

"Life" is offering a novel money making plan to men and women who are working their way thru colleges and professional schools. You can find out all about it by sending your name and address on a postal to Life's College Student's League, 17 West 31st St., New York City.

DON'T be led astray or influenced by others. It is the Hotel Moscow Barbers for workmanship.

AT ASSEMBLY

Dean Carlyle of the Agricultural college addressed the students at Assembly Wednesday on the "Extension Work of Scientific Agriculture in Idaho." This subject is a very vital one in this state and should be of great interest to every student of the University. The future development of the farms in Idaho depends in a large part upon the experiment and extension work done by the Agricultural college. So much expense is attached to agricultural experimentation that it is impossible to carry it on to reach each individual farmer in the state. "As a result," said Dean Carlyle, "the science of agriculture is fifteen years ahead of practical agriculture. The farmers have not been keeping pace with agricultural science." Mr. Carlyle continued, "The great work of the Idaho Agricultural college is the extension of this scientific work to the farmers of the state, who are in great need of help in the development of their farms."

This extension work is being carried on by the University by means of four experiment stations in different sections of the state. The experiment station in Bonner county, known as the Clagstone Junction, is doing great work in the line of land clearing and fertilization. The project at the Clagstone Junction was to demonstrate how timber land could be cleared with the least expense. During the last two years twenty-six acres have been cleared at a very low cost. Almost as great a problem, however, as clearing the land is the fertilization of it after the timber is removed. Land that has been shaded by timber is almost sterile when cleared. It will produce scarcely anything. Such land requires three or four years' fertilization before it will bring returns. To accomplish this cheaply and quickly is the work that the Clagstone Station is doing for the farmers in the timbered sections of the state.

The oldest experiment station is located at Caldwell. It is the poorest paying station in the state, and offers but meagre prospects for the future. It was selected in the winter time when there was a foot of snow on the ground. The soil at this station will not bear irrigation, as it is so fine that when

moistened it with water like the
ment. It is important to a hard
work-like substance, a hard part of
a field of from four to ten feet.
The Chevrolet tractor is being used
merely as a regular tractor, with no
attempts toward experimentation.

The best experiment station in
Iowa is at Ames. The work
of this station is to demonstrate
the results of irrigation, the
amount of water required by dif-
ferent grains, the effect of too
much water, and other phases of
the irrigation problem. The ex-
periment station is out of it plus
some of which are irrigated while
others are farmed without irri-
gation. It has been found that from
eighteen to twenty-five inches of
water produces the largest crops
of wheat and corn. The plots in
which fifty inches of water are
used produce smaller crops than
the plots in which no water is
used. This is true in the best
best Jean Land. Many experi-
ment station farmers are using from
three to five or six inches of water
and are in consequence getting
very poor results from their land.
The Ames station has the name
of being the nation's experiment
station in the whole United States.
No other station compares with
it in accuracy and results.

The most recently established
station is at Ames. This station
is carrying on experiments in both
irrigation and dry farming. The
work is conducted in connection
with the United States Department
of Agriculture at Washington. Ar-
chives said that the farmers in the
country of a western world suffer
very much from the fact that they
are given information of the
methods of dry farming. In a
two and one-half acre dry farming
experiment station are being carried out. The people
living about Ames feel that so
much light on the experiment sta-
tion there that they have raised by
private subscription enough money
for the construction of several new
buildings on the station, among
which is a modern barn house,
costing about two thousand dollars.
The United States Department of
Agriculture, leases the Agricul-
tural college to establish a high-alti-
tude station in the Bear Lake sec-
tion of the state, but it will prob-
ably be some time before such a
station can be established.

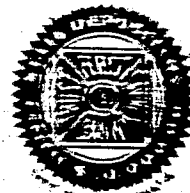

These College work very highly of
the work that is being done by
Iowa. The work has recently been
appointed as director of Agricultural
Experiment Station in the United
States," said Mr. Clary. "It is more
difficult than Professor C. V. V.
Under the direction of Mr. C. V. V.
irrigation work in agriculture is
being conducted from Ames. The
work includes not only a work
which is done in every year and
carried in the year. This is the first
work of its kind ever conducted in
Iowa and promises to be a great suc-
cess.

The Agricultural College is again
preparing to send out a representative
team under the leadership of Mr. C. V. V.
to the West. The team will
start in December. There are in the
west several states of irrigation
and the work in which will be in
Iowa. The work will be in
Iowa. "It is impossible to say
anything of the work of the representa-
tion team which is to be sent to the
west in the fall. A large number
of students of a summer in
the West among people interested
in the irrigation and the representa-
tion team are very.

In connection with the
The Agricultural Department of the
University of Iowa, a long time of
work was in progress to do more
with a view toward the United
States.

A team led by Professor Stone,
which was recently sent to follow
the progress of the work.
