

The University Argonaut

VOLUME 15

UNIVERSITY OF IDAHO, MOSCOW, IDAHO, OCTOBER 8, 1912

NUMBER 2

149 NEW STUDENTS HAVE ENROLLED

New Students Come from Fourteen States—One from a Foreign Country.

Professor Soulen, chairman of the admissions committee, reports that the total admission of new college students from September 16th to October 7th was 149, of which eighty-nine were men and sixty women.

Classified according to degrees under which registration occurred, there were thirty enrolled for B.A. work, thirty-one for B.S., twenty-six for engineering, eighteen for home economy, fifteen for agriculture, seven for forestry, nine for law and twelve for special work. One registered for work leading toward an A.M. degree.

Latah county sent the most new students, having twenty-eight to its credit. Kootenia was second with fifteen and Ada third with fourteen. Of the twenty-seven counties in the state, the following six have sent no new students this year: Adams, Bear Lake, Cassia, Custer, Elmore and Fremont.

Of the forty-two four-year high schools that graduated classes last June, fourteen have failed to send any new representatives this year. Boise sent eleven, Moscow ten, Twin Falls eight, Rathdrum six, Wallace and Coeur d'Alene five each. The Prep school furnished thirteen; Spokane high nine and Palouse four.

Among the scattering numbers, representatives are found from the following states: Missouri, South Dakota, Minnesota, Wisconsin, Texas, Michigan, Utah, Oregon, Washington, Kansas, Montana, Ohio, Illinois and Japan.

Classified according to the ratio the new students bear to the total graduates from their respective schools the following order is shown:

Mace, first with two sent to Idaho out of two graduates; Cottonwood, two out of three; Wallace, five out of nine; Moscow, ten out of twenty-one. Boise, only sent eleven students out of a graduation class of ninety-four.

Paul Cunningham Durrie, '11, principal of the Rathdrum high school, spent the week end in Moscow. Mr. Durrie was an Idaho debater for three years, cross country runner, tennis shark, and is a candidate for the Rhodes scholarship, having passed the examination in 1910.

NO PRACTICE GAMES TO BE PLAYED THIS YEAR

With the end of the first three week's of practice, Idaho and W. S. C. will face each other without either having played a practice game. "Pink" Griffith has his squad in fine shape for the opening of the season, two weeks off. The practice this year has been a little varied from that of previous years, in that the elementary

VIRGIL SAMs, End.

work and team work have gone on together, instead of the elementary work so largely preceding the team work.

With only a few holes in last year's lineup to be filled, and with considerable material at hand, the students are not without reason for thinking that Idaho will finish somewhere near the top this year. The players remaining from last year are Procter Perkins, center and captain. Favre, guard; Phillips and Buffington, tackles, Samms, end. Burns and E. Perkins, halves, and Knutsen, full. The most likely contenders for the vacancies are, McCormick and Elliot for guard; Leuschel and Johnson, end, and Lockhart and Gowan, quarter. In the backfield Brown is also showing up strong and will, no doubt, be used before the season is over.

"Pink" has shifted Knutsen to full, in the back field, Knutsen's style of "hit 'em low and hard" will make him a most valuable

man in that position, although he will probably be the lightest man on the team. E. Perkins has been shifted from quarter to half. His three year's experience behind the line will make him one of the best men in the backfield this year. At present, Lockhart is occupying the position of quarter on the first team. Gowan is

ALBERT KNUtSEN, Halfback.

giving the signals for the second line up.

The matter of a practice game seems as yet unsettled. No game has been scheduled for next Saturday. It looks as though the two teams will face each other a week from next Friday with no previous severe workouts, other than with their own second teams.

The Idaho second team is the strongest it has been in years. Beside the men mentioned above who are trying for first team honors, "Pink" has working in the second squad, Jardeen, Robinson, Dowart, Gerlough brothers, Dingle and several other promising men. The men are turning out better for the second team this year than in previous years and are making an excellent showing. Students should avail themselves of the opportunity to watch the team practice this week. It is not only an encouragement to the boys in the red jerseys to see a

RHODES EXAM NEXT WEEK

Five Idaho Students to Take Scholarship Examination.

The seventh Rhodes Scholarship Examination will be held at the University October 15th and 16th. Candidates will be examined in Latin prose composition, Latin and Greek translation, Latin and Greek grammar, arithmetic and algebra or geometry. The examination is not competitive but a qualifying test which students must pass before they become eligible for appointment.

The questions are prepared and the papers corrected by the authorities at Oxford. From the list of those who satisfy the examiners, the faculty selects the man best qualified in respect to scholarship, athletics, leadership and moral qualities. Candidates must be unmarried, between the ages of nineteen and twenty-five, and must have had at least two years of college work before going into residence at Oxford.

The Rhodes scholar spends three years at Oxford enjoying an annual income of fifteen hundred dollars. This amount allows him to live in comfort and leaves a margin for travel during vacation.

Scholars are appointed two years out of every three by each state in the United States, from Germany and from the British colonies.

Frank Osborne, Baxter Mow and Ralph Foster of the senior class; Marvin Monroe and Alvin Beckman of the sophomore class intend to take the examination.

It may be interesting to know that only five men appeared to take the last examination in Massachusetts and in Illinois. The average number, according to letters received by Dr. Axtell, from representative states in various parts of the union, is also five.

Five students took the last examination held at Idaho, two of whom successfully passed the examination. Mr. Ludwig Gerlough '09 was the successful candidate. Idaho has one other scholar at Oxford beside Mr. Gerlough, Mr. Tony T Crooks, '09, who was editor of the Argonaut during his senior year.

crowd of students at the side of the field, but it is also a good opportunity to see the new men and note the improvement in the old players. The field will probably be closed for secret practice next week.

REPORT OF THE GRADUATE MANAGER

Mr. Larson's Report Shows Old Debt Reduced to \$1165.05

Moscow, Idaho, Sept. 23, 1912.
To The Faculty Athletic Committee
And To The Athletic Board Of
The University Of Idaho.

Gentlemen:

As graduate manager I herewith hand you my report on 1912 Spring athletics, and also a general financial statement on athletics for the entire school year of 1911-12. A statement showing the expenditures made by the Athletic Board upon the old debt and showing the present financial condition of the Athletic Board is also appended.

The report consists of the total list of receipts and an itemized list of expenditures, each expenditure having a number that refers to a voucher that is attached hereto and made a part of this report. There is also, wherever it was possible to get one, an itemized account of the articles for which the voucher was spent. These itemized accounts are also attached and made a part of this report.

From a study of the report it will be seen that the two branches, football and basket ball, were a financial success, while track athletics ended with a deficit of \$277.95. However, the surplus of the two former branches more than made up for the deficit of the latter and the entire season ended with a surplus of \$354.28.

It will also be seen that the Athletic Board succeeded in reducing the old debt from \$2068.84 to \$1165.05.

Respectfully submitted,
G. L. LARSON,
Graduate Manager.

Summary

Receipts:	
From foot ball.....	\$4272.88

SPORTS

FOOT BALL NOTES.

The team appeared on the field Saturday with new suits.

Samms, Perkins, Lockhart and Kinnison look especially well in their work with the tackling dummy.

Kinnison turned out for practice for the first time Saturday. The knee which he had injured last fall is now practically as good as ever.

Idaho lost less football men last year than probably any other team in the conference.

In looking over the scholarship of the men on the football team this year, it will be noticed that the scholarship is probably the best of any team Idaho has had for a good many years.

Coach Griffith is not having the trouble in getting out men for the second team this year, as he did last. Surely material is not lacking this year.

In the sprints which the coach has been conducting two or three times a week, Lockhart usually finishes first with Perkins and Samms close contenders.

No announcement has yet been made as to when the Athletic ball will occur. The custom is to hold it on the night of the Pullman game, which would make it on the 18th.

Graduate Manager Larson says that the Gonzaga game is apt to be called off on account of their not wishing to meet some of the agreements of the contract as signed up. The Gonzaga-W.S.C. game has been called off.

Idaho Men in Politics.

W. H. Mason, '12, law, varsity debater, is a candidate for state representative from Latah county on the republican ticket.

Robert O. Jones, '09, Idaho's greatest orator and editor of the Argonaut, is a candidate for the position of state representative from Shoshone county on the republican ticket.

Jas. Harris, '12, law, president of last year's athletic board and end on the football team, is a candidate for county attorney of Washington county on the democratic ticket.

IN THE GYMNASIUM

A cross country run will be held Friday afternoon. The winners of first and second places will receive prizes. There will be about a dozen men in the run who have been working out since school opened.

Miss Faye Thomas of Coeur d'Alene leads the freshmen girls in the dynamometer tests. Her test was 4,275 pounds.

Julius Nordby of Genesee, who attended Minnesota Agricultural college is leading in the men's strength tests. In the full extensor test, Nordby went 1,150 pounds which is the best test ever made by Physical Director Van der Veer. His total test was 7,310 pounds.

There are over one hundred and fifty girls enrolled in Miss Stephens' physical classes. There are only a few upper classmen among all the girls who are not taking some physical work.

The Walking club will journey to Genesee Ridge this coming Saturday.

Miss Stephens is planning to start a dancing class soon, similar to the one held by Miss Wold last year. The class is primarily for men who do not dance, but girls who would like to learn are cordially invited to attend. The first class will probably be held Saturday morning, October 19th from eight to nine o'clock in the morning at the gymnasium. There will be no admission fee.

There will probably be a credit course in aesthetic dancing for girls, beginning next semester.

A meeting of last year's Gem of the Mountain staff was held last night at the Kappa Sigma House.

All kinds of
Tonsorial Work
correctly done.

The office of The Argonaut is in the publicity office, next door to the bursar's office. A member of the staff may be found in the office any afternoon except Tuesday. All contributions gladly received up until Monday noon of each week. Paper goes to press Tuesday.

The freshman's first duty is to continually tell how things were done in high school. Of course the University can't compare with your high school, but perhaps if it heeds your advice it can rise to that standard. The first development in your own cosmos is to learn to think and speak slightly of the old folks at home. They are old fozies, perhaps a trifle dull, and you want to show how sharp you are—"sharper than a serpent's tooth." Don't write home except when you need money. Buy a "mere-chump" piece and color it in record time: be a pool shark; never quit a game of pinocle to study math. Regard the faculty as unreasonable task-masters, as your natural enemies, and when you dunk sell everybody that the profs. have a grudge against you.

If you have joined a frat or society show the barbs, success on them their unfitness to be among the elect—in a word be a snob. If you remain barb, be a rabid one, and criticize the mass on every occasion—or will hurt their feelings dreadfully.

To get the most satisfaction and benefit out of college life, just follow the above rules.

Idaho should play some kind of interscholastic baseball next spring, and if so, now is the time to begin working toward this end. It is hardly possible for Idaho to play conference ball, but it is possible for a triangular league to be formed between W. S. C., Whitman and Idaho, and a similar one among the western colleges, and then the winners of the two sections could clash for the championship.

In the past Idaho has lost money on every baseball season, averaging about five hundred dollars a year. Even with the scientific management which the guidance manager has inaugurated, it would be impossible to make baseball pay. If a triangular league is formed, twenty-five cents baseball could probably be played. It is unreasonable to pay fifty cents for a college game when a league game can be seen for twenty-five cents.

Idaho has prospects for a good

baseball team. In fact the outlook is much better for baseball than for track. Baseball, too, should be more popular than ever on account of having no baseball here last spring. The inter-class and the inter-fraternity leagues were a sort of a farce.

The canning department at the University of Missouri put up over 25,000 cans of tomatoes this year.—University Missourian.

The Dean's office is the canning department of the University of Idaho, but tomatoes are not included in the list of what is canned here.

For the Freshmen

For the benefit of the members of the class of 1916 it might be well to publish a copy of the rules and regulations governing the student body which were adopted by a vote of the entire student body last year on about October 15th.

1. Every man student of the university shall salute the president of the university by lifting his hat; or, if in uniform, by rendering the prescribed military salute.

2. All students shall stand with uncovered heads during the singing of Alma Mater Idaho.

3. All freshmen when on the campus shall wear an olive green cap with a pearl button upon it.

4. The painting of class numerals is limited to the freshmen year of each class.

5. No underclassman shall wear a derby hat while on the campus.

6. No one shall enter the assembly five minutes after the assembly has begun.

7. No Idaho student shall be allowed to smoke upon the campus.

8. Among the men students, the privilege of going bare-headed shall be limited to upper classmen.

9. High school caps, sweaters, numerals or tags shall not be worn on the campus.

10. The regular seating order to be observed by all students at assemblies shall be as follows: No student shall use the front two rows of seats; these are reserved for the faculty. The next seats on the left, immediately behind those of the faculty, shall be reserved for the use of the seniors; those similarly situated on the right shall be occupied by the juniors. The seats next those reserved for the seniors shall be occupied by the sophomores, while those behind the juniors shall be occupied by the freshmen. Various seats may be used by any one needing them, but if the propriety of any barred seat is sought needlessly and the spirit of this ruling is broken, the guide jury shall be liable to the penalty of its violation.

11. No college student shall

STUDENT AFFAIRS

AT ASSEMBLY.

The student assembly last week, being practically the first of the year, was not lacking in interest or in business matters. After a piano solo by Miss Fallis, the reports of committees were taken up.

The committee appointed last year to look into the advisability of a student's cooperative book store gave a report of their proceedings up to this time. It appears that the book store plan received the approval of a majority of the faculty men when submitted to them last spring, and that further consideration of it's adoption was postponed until this fall. Meanwhile the student committee was to and did get all possible information as to the working of similar plans in other institutions. It appears that a faculty committee, appointed last spring to look into the matter, reported unfavorable to the plan before time agreed upon and before they had received any information obtained by student committee. At present the matter is in a somewhat confused condition; nevertheless resolutions were proposed and adopted accepting the report of the committee and instructing them to continue persistently in their efforts to get a favorable report from faculty and to get more definite knowledge of the plans and practical working of similar stores elsewhere.

The committee, appointed at the special assembly, to look into the present indefinite agreement with the Fair association as regards the Athletic park gave a partial report for the benefit of the students who knew very little about the matter. The report showed that the Athletic park is owned by the students and held by the board of regents as trustees, but that capacity would not authorize them to enter into any contract with the Fair association or in any way dispose of the property. There was supposed to have been some sort of contract entered into with the Fair association but no one seems to know much about it. It is the consensus of opinion among the students that the improvements upon the grounds are of little value at all, while the damages to the base ball field and track have been very serious.

The report of the committee was adopted and they were instructed further to arrange a lease or contract with the Fair association by which the students shall get interest on money invested for a term of years.

At this point during the assembly a vocal solo was given by Miss Motier.

On taking up, business again, a resolution was introduced and

carried directing the president to appoint a committee to wait upon and invite Senator Borah to speak to the student body, before the Administration building some convenient period of his visit in Moscow. The committee appointed was Enoch Perkins, Parker Luois and Harry McAdams.

Another resolution was proposed and carried authorizing the president to appoint a committee to draw up articles of incorporation for the A.S.U.I. and submit them to the next student assembly. The committee appointed was, R. D. Leeper, H. W. Whitten and L. G. Peterson.

An amendment to the by-laws of the constitution of the A.S.U.I. was introduced, whereby the captains of all athletic teams would be elected by the "I" men only. This amendment will be voted on at next student assembly.

Another resolution was introduced and passed, providing for the appointment of a committee to consult with the faculty on the proposition of levying a registration fee of a least \$4.00 per school year on all six month short course students.

The election of yell leader was taken up and C.E. Watts was unanimously chosen. This concluded the business and the meeting adjourned.

FOR THE FRESHMEN

(Continued from Page 4)

out across the campus where a walk nearly parallels his course.

Freshmen should bear these rules in mind at all times, and it might not be amiss to call attention to some of the old students to rules regarding lifting of the hat to "Prexy," smoking on the campus, going bare-headed on the campus, and the seating order at assemblies.

It is nearing the time when the freshmen should be conspicuous with a green cap.

Freshmen Meeting.

The freshmen held a class meeting last week, the the main feature of which was the attendance, there scarcely being a freshman absent. From the frequency of their meetings and the number present, one would be led to suppose that they were anticipating lively times. The party formerly set for Saturday night of last week was postponed until Friday evening of this week, perhaps the senior informal being the cause of the postponement. A committee was appointed to make arrangements for the Pullman bonfire and to keep an eye on all stray wood and boxes.

Charlie A. Rice, '13 law, registered Tuesday.

ON THE CAMPUS

William P. Fursten, '13, returned to school last Wednesday to continue his course in agriculture.

George Bohannon, '11 of Whitman college, has registered for a course leading to the degree of M. A.

Roy Johnson, '12, law, is spending a few days in Moscow preparing to pass the state bar examination.

Ernest A. Daus, ex-'14, has registered at Rush Medical college, Chicago.

H. C. Badger, representing the New York Life Insurance company, formerly professor in high schools at Wallace and Pocatello returned to his headquarters at Wallace, Friday.

Harry O. Bond, '13 law, has entered Yale, where he will do post graduate work in the law school.

C. H. Buffington left Saturday morning for Coeur d'Alene on a mission of business.

Professor Ben H. Lehman went to Spokane Friday to take in the closing days of the Interstate fair.

Professor J. M. Aldrich of the biology department went to Lewiston last Friday.

For up-to-date tonsorial work visit Hegge's Baths, South Main street.

President Jas. A. MacLean returned from his trip through the east, Friday. His family is in quarantine for scarlet fever, one of the children having the disease. "Prexy" went into quarantine with his family Friday evening.

There are still a number of constitutions and by-laws of the Associated Students of the University of Idaho in the publicity office for free distribution. Every student should possess a copy.

Edward C. Vesser, ex-'14, was married to Miss Irene Harper of Spokane, at Coeur d'Alene on the 14th of September. Mr. Vesser will be remembered as guard on the football team in the fall of 1910, and was a member of the Kappa Sigma fraternity.

The freshman president was treated to his annual ride to the country districts by the sophomores last night from all reports. President Owens was hauled out of town about a total distance of ten miles. Some of the faithful freshmen attempted to follow up in an automobile and bring back the kidnaped one, but their machine suffered a breakdown and all were forced to walk back to town.

The old temporary bulletin board in the Administration building has been removed and a tasty case put in. The clock was moved directly over the center of the board.

Merton Kennedy, '14, returned to school yesterday.

SENIOR INFORMAL A SUCCESS

Many Students Attend First College Dance of the Year.

The first dance of the present college year was held in the gymnasium last Friday night in the shape of the senior informal which was given in order to raise funds to help pay off the deficit of the 1913 Gem of the Mountains.

The dance was fairly well attended, more than half a hundred couples being present and was a financial success. An air of informality was present all during the evening. The music was excellent, being furnished by the University orchestra under the direction of Professor E. Bellier-Collens.

The floor was in as good a condition as it was possible to put it in, but it is far from being a floor suitable for dancing. The canvass was not used as it was found last year that the covering was far from a success. Unless some improvements are made on the floor, it will be nearly necessary for all college dances to be held downtown. The dance was in charge of a committee composed of Harold Foester, chairman; Clyde Cornwall, Cartee Wood and Ruth Annett.

Here is truly a SCHOLAR'S BARBER SHOP

A clean, quiet and respectable place of business. A thoroughly up-to-date, efficient and courteous proprietor. All work done in the most tasteful and distinguished manner. Modern antiseptic methods used throughout. Don't fail to visit Waldorf when you want a clean, quick, smooth, comfortable shave, and for any other work where skill and a complete knowledge of the personal art is required.

The home of

CONKLIN'S SELF-FILLING FOUNTAIN PEN

The pen with the crescent filler. While the other fellow prepares to load his fountain pen with a bothersome dropper, the Conklin helps itself to ink at the nearest ink-well and goes writing merrily on. A pressure of thumb on crescent filler is all that's required.

The name Conklin on a pen insures what Sterling does on silver.

SHORT "HORN" AGS MONDAY

Third Year of School of Practical Agriculture Opens October 14th.

The school of practical agriculture and home science, one of the youngest and yet one of the most successful departments of the University, will open next Monday, Oct. 14. It was organized to provide practical industrial and agricultural training for those unable to take regular college courses. The instruction is given by the regular faculty of the college of agriculture. The students use the University's equipment and come in touch with its broadening helpful influences.

The efficiency of the instruction given in the school of practical agriculture is shown by the success of its student stock judging team at the Northwest Livestock show in Portland last spring. This team, composed of G. C. Leth of Buhl, E. R. Greenslet of Nampa, M. V. Miller of Lacrosse, Wash. G. R. Adams of Eugene, Oregon, and H. R. Abel of Moscow, won first place in competition with regular college students from the agricultural colleges of Oregon, Washington, and Idaho.

The school does not open until after harvest and is in session only during the winter months when farm work is not pressing. Three winters are required to complete the course. The only entrance requirement is an eighth grade education.

The most important parts of modern scientific methods in agriculture are taught. Practical instruction and practice are provided in the study of farm machinery, farm buildings, irrigation, drainage, soils, grain judging, field and forage crops, breeds of livestock, stock judging, feeds and feeding, livestock management, dairying, farm book-keeping, forge and bench work, fruit growing, vegetable gardening, poultry raising and veterinary science.

For women students a three year winter course in home science is offered which provides practical instruction in methods of household management. It also includes some work in natural sciences and such agricultural subjects as appeal most to women.

Sophomore Meeting.

The sophomores held their first class meeting last Friday and the following officers were elected: John McEvers, president; A. L. Johnson, vice president; Gladys McFarland, secretary and treasurer, and Hugo Donart, class football manager.

A committee was appointed to present to the freshmen the bill for the "Sweet Sixteeners," published and posted for their benefit. The same committee was to notify them concerning the wearing of the green caps.

LOUIE JESSUP TO BE MAJOR

Commandant Franklin Announces Portion of Appointments.

The following is a copy of Special Order No. 1 of the Military department of the University of Idaho:

1. The following appointments of commissioned officers in the Battalion of Cadets is hereby announced.

To be Major, Louie J. Jessup,
To be captains, S. L. Denning and Fred Carlson

To be First Lieutenant and Adjutant, Harold J. Adams.

2. Captain Denning is assigned to Company "A" and Captain Carlson to Company "B".

The appointment of the remainder of the commissioned officers will take place in a few weeks. Lieutenant Franklin is anxious to get a line on all of the men before the appointments are finally made.

Major Jessup was captain of Company "A" last year. Captain Denning was Second Lieutenant of Company "A" and Captain Carlson, Second Lieutenant of Company "B", and Lieutenant Adams was Sergeant-Major.

Building to Have Clock.

The students of the departments under Professors Hall and Larsen are now at work on a clock, which when finished will be placed in the tower of the administration building. It might be interesting to note the process by which the clock is being made. The designs are formed by the students of the mechanical department under the direction of Prof. Larsen, then taken to the drafting class under Prof. Hall, where drawings are made; from there they are taken to the pattern making class where the patterns are made from which the different parts of the clock will be moulded.

The castings are to be made at the harvester works and the clock will be machined by machine shop classes, who will also assemble the different parts of the clock and put them together. The clock is to be of an entirely new model and sized expressly for the place it is to fill. The success of the clock will certainly be a great credit to the department under which it is constructed as well as to the University.

EXCHANGES

A recent fire at Coraell destroyed the \$10,000 athletic club house and the supplies of the football squad. The loss was partly covered by insurance.

Freshmen at Colorado University may discard the prescribed "postage stamp" caps if they succeed in holding the sophomores in the class rush.

Syracuse University lost \$5,000 in damaged property when a cyclone wrecked the university boat house and destroyed its shells.

The Pocatello High School Alumni association, desiring to become a live factor and come in closer touch with the various activities of the High school, as well as help to create an interest in the various studies, at a recent meeting decided to offer awards at the conclusion of each school year, as a means to attain this end.

Three awards, consisting of ten dollars each will be presented to each of the following:

To the high school boy achieving the highest average for the year's work in manual arts.

To the high school girl achieving the highest average for the year's work in domestic science.

To the member of the senior class who attains the highest general average for the year's work in all subjects.

Scrivings at Augustana college have been abolished. Girl students were notified that they could not enroll this term until their organization was broken up.

At the University of Colorado, the freshmen are forced to live in a very humble way, for at least the first semester. Here are some of the rules governing their conduct: A freshman must wear a "dinky" postage stamp, blue cap; he cannot wear any kind of a high school insignia after October, must refrain from the use of tobacco, must salute professors; a freshman cannot remain seated in the presence of an instructor or undergraduate; the freshmen must build all bon fires and ring the college bell for thirty minutes after every victory.

The U. S. Bureau of Education recently put out some figures showing the money value of an education. The report shows that after the technically trained man, for instance, draws \$18.25 more a week, after he has been out of the university for seven years than does the mechanic who began working in a shop four years before the technically trained man began practical work. It shows that each day spent in getting an education is worth from \$10 to \$20.

The U. of O. has adopted the season ticket plan provided 400

tickets can be sold. So far the 400 tickets have not been disposed of and they are now for sale on the installment plan. Eleven dollars and ninety cents worth is offered for five dollars.

The University of Wisconsin expects an enrollment of 6000 students at the opening of the sixtieth year of that institution.

William Rand, a freshman in the University of North Carolina, was killed last week while being hazed by the sophomores. Rand was forced to mount a barrel and while singing for the upper classmen, the barrel was kicked from under him. When he struck the ground, he fell in some broken glass which pierced his jugular vein causing him to bleed to death in ten minutes. As a result 4 sophomores are held for his murder—their bail being fixed at \$5000 each.

The annual freshman-sophomore flagrush of the University of Utah resulted in a victory for the former. There were 170 freshmen and 50 sophomores.

Higher Mathematics.

The shades of night were falling fast

When thru a college town there passed

A youth who wandered all alone

And spoke in muffled monotone:

"6-18-5-26-6-4."

"Oh, stay awhile," a stranger said,

"And rest your worn and weary head."

He only gazed with vacant eye

And muttered as he wandered by:

"7-11-3-14-2-6."

He strode away in falling night,

And as he disappeared from sight

We heard his distant voice: "I'll

bet

I learn them goldarn signals yet—

4-13-1-22-5-5."

—Boston American.

Some cynic said that every laugh

in the world was offset by a tear.

If all people were fat we might

believe it. But never have we

seen a slender person laugh hard

enough to cry.

It may be impractical to expect

an ordinary hen to lay two eggs

a day, but wait till some clever

nature/fakir perfects a scheme to

cross the hen and the common

housedy.

Varsity milk is produced from tuber-

culin tested cows and under absolutely

sanitary conditions. Phone your or-

ders to the U. of I. creamery and get

the best there is.

Better try some of that varsity sher-

bet for your Sunday dinner. Phone

your orders to the U. of I. creamery

before Saturday noon.

If you shave yourself it's a safe

bet you don't enjoy it. Try Rus-

sel & Rowland's Barber shop for a

good shave.

See Russell & Rowland for first

class shaves and haircuts.
