

## CAMPUS DAY PLANS INCLUDE MANY IMPROVEMENTS ON ATHLETIC FIELD

### Cinders to be Spread on Quarter Mile Track; Bleachers Need Paint and Steps to be Constructed

### COURTS TO GET ATTENTION

### Stony Hearted Football Stars, Aching For Trouble, Will See That Everyone Does Share

The morning of Campus day will be devoted to general clean-up and improvement work on the athletic field and adjacent grounds. The "back side" of the campus has long been sadly in need of improvements and repairs that were impossible because of limited finances, but now is the chance for the men of the university to show their appreciation to the athletic department for the loyal work with the teams the past year. No real Idaho man will grudge a half day's work on the fields, and it is expected that every man will turn out on time to work to the call of time at 11:45, when there will be towels and lots of hot water in the Gym for a general washup.

One item which needs attention is the cinderling of the quarter track. Only the 220 yard straight-away has a surface of cinders at present, and it is always in shape for use long before the rest of the track. Cinders will be obtained at the heating plant where they will be screened and then hauled to the track where another squad will spread and roll them. Slim Almqvist will be in charge of the activities at the heating plant while Zack Cassidy will supervise the spreading of the cinders upon their arrival at the track. There is also a big hole in the embankment south of the bleachers that must be filled soon, and Cassidy will also have charge of a squad which will haul dirt to fill the washed out hole.

The bleachers have lost all vestige of paint and in order to have them in shape for this fall, Harry Einhouse will direct a gang of about 15 painters who will daub the grandstand with a fresh coat of paint.

Dutch Adelmann will direct the "strong arm" squad who are to build the approach from the athletic field to the rear of the Gym. When the old Ad. building was torn down a lot of large stones were hauled to the rear of the Gym to be used as steps, and it is the purpose to place these on the embankment leading to the Gym so that the athletes will have a better way to climb up the bank when it is muddy.

A road will be built along the south side of the athletic field below the Arboretum under the direction of Cy Garber. The road is needed in the fall to permit automobiles to enter the field south of the gridiron to park during the games, and will run from near the bleachers to the main road directly west. The tennis courts will receive their modicum of attention under the direction of Sam Bloom who will put the courts in front of Ridenbaugh hall in the pink of condition.

A committee with Z. B. Parsons as straw boss has been appointed to look after the gathering of equipment, but every man is expected to bring what implements he may have available. Each man should see his straw boss at once and find out what will be needed and make every endeavor to have it on hand promptly on time.

In order to make sure that all persons are on the job with the rising sun, a police force and submarine committee has been appointed with Ralph Largent as chief of police. The names of the force are such as to make the most confirmed loafer doubt the propriety of loafing on this day. In order to transport the police force rapidly and effectively, Howard Hatfield and Moore have been designated as patrol wagon drivers and will be on hand with their cars to carry any tardy ones to the hose and thence to the place where they are supposed to be working.

Helm On Spokesman—MacKinley Helm, a senior in the university has accepted a position on the Spokesman-Review at Spokane where he will take up his work immediately after the close of school.

### COMMITTEES IN CHARGE OF CAMPUS DAY.

Executive Committee  
Gertrude Hays, Chairman.  
Ethel Richmond, Gertrude Denecke

Program Committee  
Nona Farris, Chairman.

### HINDERMAN WILL NOT BE IN NORTHWEST NEXT YEAR

### Popular Referee Not to Be Available to Supervise Games at Idaho This Fall.

Emil A. Hinderman, for the last four years football coach at the Lewis and Clark high school, now resigned, will leave for Arizona directly after the close of school at Spokane in June, and announces that in all probability he will not return.

Hinderman went to Spokane from the Pullman high school, where he met with remarkable success as a football coach. He turned out a championship team for Lewis and Clark his first year, and since that time has had teams which finished well up in the running. Besides coaching football he also coached basket ball for two years.

Hindermann is well known to Idaho fans, as being one of the best and squarest referees that has ever been on Idaho's athletic field. A game refereed by Hinderman is sure to be fast but just as sure to be absolutely clean and fair. He always rendered his decisions as he saw them, and the beauty of it was that he always saw things just as they happened.

## REAL TRIBUTE TO PRESIDENT

### Speakers From Each Class Pay Homage to Departing Head of University in Sincere Talks

### JUNIORS SING PRIZE SONG

### Dr. Brannon Reviews Cause Leading to Acceptance, Tenure and Leaving Presidency of Idaho

Preliminary to Dr. Brannon's farewell address to the assembled students Dean Eldridge announced that the members of the Junior class would sing their song, "Idaho, We Dearly Love Thee," which won for them the award of the judges in the recent song contest. Also that a representative from each class of the faculty would give short talks.

Charles Darling, respondent for the Freshman class said in part, "We of the class of 1920 because of our short time here have less to recall of the Administration, and more to regret because of the short time we could spend with Dr. Brannon. We deeply regret his going, but we cannot but feel that no matter what our loss may be, the gain to those who receive his services will be as great in proportion."

Richard B. Ott speaking for the Sophomores, said: "We have always looked upon Dr. Brannon as a man having qualities every man should follow. He has portrayed for us our duties towards University, State, and Nation. He has given us ideas of Democracy above any other students in any other institution. He has bound the universities of the northwest into social union for human advancement. We feel that you have been a friend to every single one of us, and have truly helped us in time of need. We regret that you are departing at your very beginning."

Percy Messinger, of the Junior class said: "Upon entering the university three years ago I found many people in doubt as to whether this was a progressive institution or not. No doubt there was a justification for that opinion at that time. But under the administration of Dr. Brannon,

(Continued on last page)

## TENNIS TOURNAMENT FOR MEN BEGINS NEXT WEEK.

### Entries for Men's Singles Being Made-up By Coach—All Men in U. Are Eligible

A men's tennis tournament has been announced by the Department of Physical Education and the first matches will be played next week. Any man student in the university is eligible for entry in these matches and all players are urged to place their names with Coach Bleamaster at once. A sheet of paper has been posted in the Gym for the purpose of recording entries, and all that is necessary is to write the name of the entry on this slip. The matches will be singles, but a series of doubles will probably be played at a later time if sufficient players are interested.

## JOBS ALL SET FOR EVERY MAN

### Straw Bosses to Oversee Work and All Men to Report at Roll Call Or May Take Dive

### POLICE AND SUBMARINE CORPS.

Largent, Chief.  
Jackson, Gerlough, Cunningham, Groninger, Bistline Barger.

### TENNIS COURTS.

Bud Blossom Bloom, Straw Boss.  
McDonald, H. Weber, Chrissman, Samms, H. Peterson, Cone, Wm. Hamilton, Cooper, Johannesen, Ficke, Eagleson, Wehr, McDonald, C. Ruckweed, Moore.

## COLLEGE EDUCATION HAS VALUE OF OVER \$20,000

### Pennsylvania Professor Sets Value Based on Earnings of Both Classes of Men.

According to the Pennsylvania State College, News, Dr. Arthur Holmes of that college fixes the monetary value of a college education at from \$18,000 to \$20,000. His estimate was based upon a comparison of the salaries of college-trained men with those not having the same advantages. According to Dean Holmes, the average salary of the college man is \$1187, while \$518 is the average income of the non-college man, a difference of more than \$650 in favor of the man with higher training. Thirty years' work will make this advantage worth \$19,500, according to Dean Holmes' calculation.

## DR. LINDLEY TOO LATE TO SPEAK

### President Brannon Makes Impromptu Talk on Plans for Development of University Plant

The assembly period Tuesday morning was occupied by Dr. Brannon in the absence of Dr. Lindley who was scheduled to deliver a talk on Psychology, but was obtained on the road from Pullman.

Dr. Brannon spoke of the proposed new buildings and improvements that are to be made at the university in the near future. "The new West wing," he said, "will give the library a more spacious and a better lighted room than it now has. It will also provide comfortable lecture rooms and laboratories for the departments of Botany, Geology, Physics, Business Administration, Philosophy and Experimental Psychology."

"A new dairy building is to be erected for the manufacture of butter, cheese and ice cream. It will be up to date in every detail. The old dairy department will be moved from Morrill hall and the Department of Forestry will be given a home. A green house is also to be constructed.

Considerable repairing is to be done on the Administration, Mining, and Engineering buildings besides some grading and paving on the east side of the campus."

Dr. Brannon also spoke of the deplorable condition that Ridenbaugh hall was found in three years ago, and the repairs that had been made to make it a comfortable dwelling. He spoke of the steps and walk that were so badly needed and were put in within the last three years.

Dr. Brannon urged those who have not been called by the army or the farm to join the Third Great Corps of the American Army, viz. that of students and continue to train themselves that they may meet the demands that will be made of them and help solve the problems that are before us.

## AMERICAN WORKS OF ART ON EXHIBITION HERE NOW.

### Photographs Illustrate Development of American Art From Early Days to Present.

The Faculty Women's club is presenting an art exhibit this week in the third floor hall of the Administration building. The exhibit was loaned to the club and the university by the American Federation of Arts and consists of 158 large size photographs and two bronzes which represent the development of American painting and sculpture. The collection includes many of the works of such artists as Gilbert Stuart, Winslow Homer, James Abbott McNeil Whistler, John Singer Sargent, Gari Melchers, William Merritt Chase, John W. Alexander, Wilton Lockwood, Willard L. Metcalf, William Lamb Picknell and Douglas Volk. A bronze by Alexander Stirling Calder and one by Hiram Powers are also in the collection. The collection will remain at Idaho for the next two weeks, and is well worth seeing.

Corbett Goes To Spokane—Professor Laurence J. Corbett will leave for Spokane Friday morning to attend the annual meeting of the Northwest branch of the American Institute of Electrical Engineers. Professor Corbett is a member of the committee in charge of the program.

## DEAN SHATTUCK AND DEAN AYERS RELEASED BY BOARD OF EDUCATION

### A. S. U. I. ELECTION.

The polls for the student body elections will be open in the Administration building Friday from 10 a. m. to 2 p. m. All votes must be cast during this time.

### IDAHO BOYS MUST WORK HARD IN RESERVE CORPS.

### Kitchen Police, Tight Uniforms and Other Trials Add to Joy of Life in Camps.

Idaho men at the Presidio army reserve officers' training camp, as well as the rest of the 2500 applicants for commissions, are soldiers now, amenable to all the discipline undergone by the veriest rookie.

Not only must they wear the olive drab service uniform at all times, but while on duty they must keep it buttoned—which is not always pleasant on spring days under the California sun.

In addition to doing their own work in the barracks, the applicants for commissions must be their own dining room attendants and kitchen assistants. Peeling potatoes, washing dishes and waiting on tables probably will be a new experience for many of the students, as will sweeping, scrubbing and making beds.

As soon as they are registered, the prospective officers are vaccinated and inoculated, and then draw their uniforms and equipment. Uniforms are furnished at the Presidio camps without charge, and without a deposit being required of the students.

No regular army officer may have as assistant a reserve officer of a grade higher than himself, the regulation provides. In such a circumstance the reservist could voluntarily take rank lower than that of the regular army officer.

## GOOD PROGRAM FOR AFTERNOON

### Interclass Tennis Tournament at 1:00 Will Start Festivities—To Be Followed By Tableau

### DANCE AT GYM IN EVENING

### Faculty-Student Picnic at 5:30 To Be Followed By College Songs In University Gardens

An interclass tennis tournament of mixed doubles will begin Friday afternoon at 1 o'clock on the university courts for the class championship. There has been some earnest practicing the last few days and a good contest should result.

As soon as the tournament is finished, there will be a patriotic program in the auditorium. The program is to consist of a series of patriotic tableaux—"Songs in Living Pictures." There will be eight pictures while a mixed chorus will sing the songs pictured.

The songs to be portrayed are:  
1. "Tenting Tonight on the Old Camp Ground."  
2. "On the College Steps Tonight."  
3. "Are We Prepared."  
4. "Idaho We Dearly Love Thee." (Junior prize song.)  
5. "America, I Love You."  
6. "The Girl of 1917, or I Didn't Raise My Girl to Be a Farmer."  
7. "A Little Man Bought a Big Bass Drum."  
8. (a) "Your Grand Old Flag."  
(b) "Star Spangled Banner."

The annual Faculty-Student picnic supper will be held on the campus at 5:30, providing the weather is not too cold. If conditions will not permit eating outside, the supper will be held in the Ad building. The girls of the University will furnish the "cats" for the picnic supper and from present indications, it will be some feed. All the rest of us need to do is to bring

(Continued on page two)

### No Explanation for Unexpected Act Given By Board When Popular Deans Are Removed From U.

### MISS REDFIELD TO NORMAL

### Dr. E. A. Bryan of W. S. C. to Take Place of Dr. Sisson as Commissioner of Education

Unofficial word has just come from Boise to the effect that Dean Shattuck of the College of Letters and Sciences and Dean Ayers of the College of Law have not been retained for next year. It is understood that all other members of the faculty have been retained. No official notification of this act has reached Moscow other than the press report received from Boise, Wednesday. The resignation of Dr. E. O. Sisson was also presented to the board and accepted to take effect as soon as his successor could be appointed. The vote on the question of dropping Dean Ayers and Dean Shattuck and accepting the resignation of Dr. Sisson was four to two, with Walter S. Bruce and Miss Ethel Redfield, state superintendent of public instruction voting in favor of retaining all three men. Dr. Sisson gave as his reasons for resigning "the impossibility of further harmonious and profitable relations with the board and embarrassments abounding in connection with his work."

Miss Bernice McCoy, former state superintendent of public instruction was elected dean of women of Lewiston State Normal school.

There has been rumor in the public press of the past few days that the state board of examiners has decided to defer action in regard to the construction of the new wing of the Administration building to a later time. This together with the postponement of work on the new buildings at the Tech. institute lends color to the hint given by President Brannon in assembly Wednesday that the university might possibly be removed from Moscow within a few years.

The members of the Bench and Bar association of the University Law school sent a vigorous telegram to the State Board of Education Thursday morning protesting the removal of Dean Ayers, and demanding to know the reasons for his removal or a reinstatement. The feeling in regard to the two deans is running very high and concerted action on the part of the students is expected.

A later telegram from Evan Evans, chairman of the state board of education, states that Dr. E. A. Bryan has been selected commissioner of education to succeed Dr. Sisson, resigned. Dr. Bryan is the former president of Washington State college and is a most capable educator. He achieved great results for Washington State college during his connection with that institution, and it is to be expected that the university, as well as all educational institutions of the state, will profit by his sponsorship. The matter of the presidency of the university has been under consideration by the Board of Education during their present session but no action has been taken. It is not known whether or not a selection will be made at this meeting.

## SOPHOMORE PLAY CONTEST WON BY ELEANOR BRANNON.

### Dr. Marshall and Dean French Award Prize on Play Submitted Under Name of "Raffles."

Announcement of the winners of the Sophomore Prize Play contest was made at the assembly Wednesday morning. The contest was on the dramatization of the novel "Ethan Frome" and the Sophomores were required to hand in their dramatizations under a pen name, while they also enclosed their real name in another envelope inscribed with their pen name on the outside. Several very good plays were prepared, and it was a difficult task for the judges, Dr. Marshall and Dean French to decide upon the winner. The play by "Raffles" was finally decided upon as the best and the envelope containing the name of the writer was opened at assembly, disclosing the name of the daughter of President Brannon,

# Hobo College TO BE OPENED

"Millionaire Hobo" Is Providing Angel of Novel Institution To Be Opened at Chicago

## PANHANDLING TO GET DEGREE

Students Have Gym, College Paper, Dances, Athletics, Debates and Other Paraphernalia

"The paralyzing influence of higher education" is about to lay its blighting hands upon the hobo. Don't jump, gentle reader. This does not mean that there will be a sudden influx of Weary Willies to Idaho and other institutions, not by a long sea mile. The hobs have merely set up a college of their own. The founder of this, which is known to the world as "The International Hobo College," is James Eads How, of St. Louis, the "millionaire hobo."

The main plant is located in Chicago, mecca of the hobo, and is at present occupying a three-story brick building. The faculty members number a dozen or so, and a varied curriculum, including courses in law, English, journalism, street speaking and mathematics, are offered, other courses, particularly in vocational training, such as pan-handling, practical domestic science, and approved methods of rod-riding, will be added in the near future.

A memorable row is said to have occurred in the first faculty meeting, when debating whether the proposed course in pan-handling should lead to a B. A. or a B. S. degree. Part of the faculty held that it was an art, while the rest were equally vociferous in claiming it to be a science. When the police had stopped the discussion, it was decided to arbitrate the matter. The board on investigation found that the "Arts" had cracked two more heads than the "Sciences." They consequently adjudged them to have the stronger arguments, so B. A. it will be. Instruction in the course will begin as soon as the instructors are able to be around.

The student body is entirely democratic and also co-educational. Frosh, however, are requested not to keep company. The instruction, which is held both day and evening, will be given only during the winter months, but the more studious of the hobs, who desire to keep up the good work, may avail themselves of the extension courses. The registration has been large even this first year, and opening week bids fair to become a nightmare to Chicago cops, with "students" arriving daily, "on top", on the "blinds", on "the rods"—but always arriving.

Besides the studies, the students will enjoy all the other activities of a well organized college. A paper, "The Hobo News", with a circulation running well into the thousands, has already been established. To take care of their athletic proclivities, a gym has been secured and teams in wrestling, boxing and basketball are accomplished facts. They will hook up with teams from neighboring institutions.

A debating team and a glee club are to follow in due course of time, to do extension work in the vicinity. The business managers of these organizations are quite complacent over their jobs, for with expenses for traveling, meals and bunks reduced to nil the place will be a sinecure. Of course there would be inconvenience resulting from members being kicked off enroute, or taking another train by mistake, but these can be avoided in a measure by carrying a few extra men.

Social instinct has found its expressions as well, in a series of receptions and dances, all of which were voted to be unqualified successes. Its latest expression has been the formation of a fraternity, with all the paraphernalia of lodges, coats of arms and pins. These latter are said to be quite novel in effect. The coeds are planning to initiate a similar organization as soon as a sufficient number are enrolled.

The esthetic side has not been neglected. Mary Garden has already appeared at the college in concert as have the Little Theatre players and other artists of national and international repute have also signified their willingness to appear.

So friends, the next time you see a hobo proceeding down the tracks, bundle in hand and bundle stick over his shoulder, don't turn up your nose in scorn. He may be going to college. E. B. S., '19.

## SPORT BEAMS

Jack Richmond's game leg got another wrench Saturday that will probably slow him down greatly this year.

Zack Cassidy showed some real form in Saturday's traces, taking the bar at eleven feet without difficulty.

The two mile run was something of a farce. Tom Jackson was alone after the second lap and just strolled in at his leisure.

Idaho lost a possible point winner with the big pill Sunday when Oakley Wiley left college.

Charley Gray surprised himself in the broad jump when he cleared the sand for 20 feet, 9 inches.

Bill Bonneville has an original method of running the high hurdles. The top of the bar hits him just under the chin, so that he has to take each as if it were a high jump.

It appears that the Idaho-Washington State College track meet that is scheduled for Saturday will be a rather lopsided affair with the lop leaning toward the Washingtonians in some events while Idaho will have the edge in others. Where Idaho has lost stars Pullman has been able to retain many of their last years brilliants, but they have also lost many good men where Idaho, on the other hand has kept her best.

W. S. C. has Captain Miller in the sprint and with Jack Richmond out of the game or very much slowed down by his strained leg, it is a very good bet that Pullman will hook a few points at least, in the short dashes. Captain Miller has lost his running mate and the place will have to be filled by a substitute.

In the middle distances, the quarter, Schachtler, the veteran, is going good for W. S. C., and he has two freshmen who are pushing him. Massey and Gerlough will have to dust if they beat the 50 second time of this trio.

The half mile seems to be a weak point in the line up of the Pullman aggregation. None of the old men are back and the only freshman prospect has been out of school for some time, and may not return in time for the meet. In the two mile Smith, Rowlee and Horn are working out, but show no great stuff. The hurdle squad is somewhat disorganized, and rough on form.

In the weights, but few of the old veterans are out this year, most of the work being done by recruits, whose showing seems to be only partly satisfactory to the coach. McClure and Moss are both out for the high jump show their old time form.

The current issue of the agricultural News Letter of the University is devoted to a continuance of the propaganda for agricultural preparedness and conservation of resources. Much stress is laid on the production of staple crops in Idaho this year, such as beans, peas, and other legumes. There is an article on the inoculation of ground seeded to legumes in order to get a good stand at once. Several other articles of timely interest make this issue of the News Letter one of the best that has been issued.

## DR. REED'S BOOK JUST OFF PRESS

(Continued from first page)

more numerous in the case of railroads, and other public utilities, than on any other class of cases. Dr. Reed thinks the same process is going on in the realm of trade and manufacture, but development has been less rapid. Morals lag behind industrial development but are already on the move. Evidences of this are found in "anti-trust" laws, and legislation prohibiting unfair competition. Private competitive morals are giving way to the morals of public corporations. It is a change from charging "all the traffic will bear" to charging only what is needed to conduct the business efficiently.

This is the main argument of the book, altho the subsidiary propositions are discussed with equal skill. Dr. Reed is clear and logical in his treatment of the subject. The data given shows untiring investigations. Some of this, on the methods used by Standard Oil to eliminate competition, is quite "illuminating." On the whole it is an admirable piece of scientific work, and the writer of this review has used portions of it in his class in Modern Social Problems.

There seems to be more or less difficulty among the classes over at Oregon State Ag college this spring. A freshman was guilty of unbecoming conduct and some members of the junior class gave him a close hair cut as a lesson. Next came a bunch of frosh who clip the hair of some of the aforesaid juniors in revenge. Now the student body takes a hand and orders the recalcitrant frosh ducked in the horse pond. All of which will be good for the constitution of said frosh.

## POETRY AND WAR TOPIC OF TALK

(Continued from first page)

Wordsworth pictures them. "Shelley was the main figure of the younger spiritual revolutionists. In 'Prometheus Unbound' Shelley took the old myth and changed it to suit his ends. Prometheus represents humanity. Jupiter brings before his mind the pain and agony of the world, man's ingratitude toward mankind, the oppression, sin, violence and filth, both moral and spiritual of the world. Asia in the poem represents love. She liberates Prometheus, and Prometheus free, deposes Jupiter and retires with Asia to a cave. In short, Prometheus, with the revolution accomplished, retires to nature. The end of the poem is often criticized because of the fact that mere physical comfort seems to be the desired end.

"Liberty involves such an adjustment of life's forces that we may live fully. Sometimes liberty is brought about by pressure, that is, by forcing the individual to bring himself to live fully. We are still working to bring liberty to humanity. In the present war we are endeavoring to free Prometheus, yet does it lead only to physical comfort?"

## SOPHS AND SENIORS GET WET

Oregon U. Has New Method of Settling Differences Between Classes

In a contest between the classes at the University of Oregon last week, the Sophomores and the Seniors were pulled through the mill race by the Freshmen and Juniors, respectively. The affair is staged every year in the nature of a bury-the-hatchet fracas and chosen teams from each class partake in the tug of war. The remaining members of the losing class follow their team through the cold water of the mill race at the end of the rope.

## Why Go To "Idaho"

The choice of a university or college to be attended by a student should be based upon four principal requirements: 1st, a high purpose and broad field of work; 2nd, a competent faculty; 3rd, a sufficient equipment; 4th, a student body of high ideals. The University of Idaho fully satisfies these requirements.

### 1. Purpose and Field—

Its purpose is to serve the people of Idaho in developing and training students; in advancing the entire State educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Forestry, Home Economic, and Educational matters not only to students in residence but also to all who desire it throughout the State.

### 2. Faculty—

The faculty is made up of eighty-three teachers of thorough training and efficiency attained by years of study and experience. They are deeply interested in the progress of each and all under their instruction. They know the State and its conditions and give their best efforts to its development. In addition there are fifteen workers in the agricultural extension division and six agricultural county agents.

### 3. Equipment—

Its equipment is ample. It has a library of over 39,000 volumes, excellent facilities for teaching Literature, Philosophy, and the Social Sciences, and well provided laboratories for the natural and applied sciences.

### 4. Students—

Its students number one thousand and one in the school year of 1916-1917, and are earnest, wide-awake, and democratic. A large number of them earned their own way. Its alumni now occupy high positions and will be the future leaders of Idaho in professions, the industrial vocations, and in the building and maintenance of homes.

The four colleges and the central agricultural experiment station are located at Moscow; the main agricultural extension office is located at Boise, and the agricultural sub-stations and demonstration farms at Sandpoint, Clagstone, Moscow, Gooding, and Aberdeen.

# THE UNIVERSITY ARGONAUT

Entries For Men's Tennis Tournament Must be Made at Once.

VOLUME XIX

UNIVERSITY OF IDAHO, MOSCOW, THURSDAY, MAY 17, 1917.

Number 29

## CAMPUS DAY PLANS INCLUDE MANY IMPROVEMENTS ON ATHLETIC FIELD

### Cinders to Be Spread on Quarter Mile Track; Bleachers Need Paint and Steps to Be Constructed

### COURTS TO GET ATTENTION

### Stony Hearted Football Stars, Aching For Trouble, Will See That Everyone Does Share

The morning of Campus day will be devoted to general clean-up and improvement work on the athletic field and adjacent grounds. The "back side" of the campus has long been sadly in need of improvements and repairs that were impossible because of limited finances, but now is the chance for the men of the university to show their appreciation to the athletic department for the loyal work with the teams the past year. No real Idaho man will grudge a half day's work on the fields, and it is expected that every man will turn out on time to work to the call of time at 11:45, when there will be towels and lots of hot water in the Gym for a general washup.

One item which needs attention is the cinder of the quarter track. Only the 220 yard straight-away has a surface of cinders at present, and it is always in shape for use long before the rest of the track. Cinders will be obtained at the heating plant where they will be screened and then hauled to the track where another squad will spread and roll them. Slim Almqvist will be in charge of the activities at the heating plant while Zack Cassidy will supervise the spreading of the cinders upon their arrival at the track. There is also a big hole in the embankment south of the bleachers that must be filled soon, and Cassidy will also have charge of a squad which will haul dirt to fill the washed out hole.

The bleachers have lost all vestige of paint and in order to have them in shape for this fall, Harry Einhouse will direct a gang of about 15 painters who will daub the grandstand with a fresh coat of paint.

Dutch Adelmenn will direct the "strong arm" squad who are to build the approach from the athletic field to the rear of the Gym. When the old Ad. building was torn down a lot of large stones were hauled to the rear of the Gym to be used as steps, and it is the purpose to place these on the embankment leading to the Gym so that the athletes will have a better way to climb up the bank when it is muddy.

A road will be built along the south side of the athletic field below the Arboretum under the direction of Cy Garber. The road is needed in the fall to permit automobiles to enter the field south of the gridiron to park during the games, and will run from near the bleachers to the main road directly west. The tennis courts will receive their modicum of attention under the direction of Sam Bloom who will put the courts in front of Ridenbaugh hall in the pink of condition.

A committee with Z. B. Parsons as straw boss has been appointed to look after the gathering of equipment, but every man is expected to bring what implements he may have available. Each man should see his straw boss at once and find out what will be needed and make every endeavor to have it on hand promptly on time.

In order to make sure that all persons are on the job with the rising sun, a police force and submarine committee has been appointed with Ralph Largent as chief of police. The names of the force are such as to make the most confirmed loafer doubt the propriety of loafing on this day. In order to transport the police force rapidly and effectively, Howard Hatfield and Moore have been designated as patrol wagon drivers and will be on hand with their cars to carry any tardy ones to the hose and thence to the place where they are supposed to be working.

Helm On Spokesman—MacKinley Helm, a senior in the university has accepted a position on the Spokesman-Review at Spokane where he will take up his work immediately after the close of school.

### COMMITTEES IN CHARGE OF CAMPUS DAY.

Executive Committee  
Gertrude Hays, Chairman.  
Ethel Richmond, Gertrude Denecke

Program Committee  
Nona Faris, Chairman.

### HINDERMAN WILL NOT BE IN NORTHWEST NEXT YEAR

### Popular Referee Not to Be Available to Supervise Games at Idaho This Fall.

Emil A. Hinderman, for the last four years football coach at the Lewis and Clark high school, now resigned, will leave for Arizona directly after the close of school at Spokane in June, and announces that in all probability he will not return.

Hinderman went to Spokane from the Pullman high school, where he met with remarkable success as a football coach. He turned out a championship team for Lewis and Clark his first year, and since that time has had teams which finished well up in the running. Besides coaching football he also coached basket ball for two years.

Hindermann is well known to Idaho fans, as being one of the best and squarest referees that has ever been on Idaho's athletic field. A game refereed by Hinderman is sure to be fast but just as sure to be absolutely clean and fair. He always rendered his decisions as he saw them, and the beauty of it was that he always saw things just as they happened.

## REAL TRIBUTE TO PRESIDENT

### Speakers From Each Class Pay Homage to Departing Head of University in Sincere Talks

### JUNIORS SING PRIZE SONG

### Dr. Brannon Reviews Cause Leading to Acceptance, Tenure and Leaving Presidency of Idaho

Preliminary to Dr. Brannon's farewell address to the assembled students Dean Eldridge announced that the members of the Junior class would sing their song, "Idaho, We Dearly Love Thee," which won for them the award of the judges in the recent song contest. Also that a representative from each class of the faculty would give short talks.

Charles Darling, respondent for the Freshman class said in part, "We of the class of 1920 because of our short time here have less recall of the Administration, and more to regret because of the short time we could spend with Dr. Brannon. We deeply regret his going, but we cannot but feel that no matter what our loss may be, the gain to those who receive his services will be as great in proportion."

Richard B. Ott speaking for the Sophomores, said: "We have always looked upon Dr. Brannon as a man having qualities every man should follow. He has portrayed for us our duties towards University, State, and Nation. He has given us ideas of Democracy above any other students in any other institution. He has bound the universities of the north-west into social union for human advancement. We feel that you have been a friend to every single one of us, and have truly helped us in time of need. We regret that you are departing at your very beginning."

Percy Messinger, of the Junior class said: "Upon entering the university three years ago I found many people in doubt as to whether this was a progressive institution or not. No doubt there was a justification for that opinion at that time. But under the administration of Dr. Brannon,

(Continued on last page)

## TENNIS TOURNAMENT FOR MEN BEGINS NEXT WEEK.

### Entries for Men's Singles Being Made-up By Coach—All Men In U. Are Eligible

A men's tennis tournament has been announced by the Department of Physical Education and the first matches will be played next week. Any man student in the university is eligible for entry in these matches and all players are urged to place their names with Coach Bleamaster at once. A sheet of paper has been posted in the Gym for the purpose of recording entries, and all that is necessary is to write the name of the entry on this slip. The matches will be singles, but a series of doubles will probably be played at a later time if sufficient players are interested.

## JOBS ALL SET FOR EVERY MAN

### Straw Bosses to Oversee Work and All Men to Report at Roll Call Or May Take Dive

**POLICE AND SUBMARINE CORPS.**  
Largent, Chief.  
Jackson, Gerlough, Cunningham, Groninger, Bistline Barger.

**PATROL WAGON DRIVERS**  
H. Hatfield L. Moore

**EQUIPMENT.**  
Z. B. Parsons, Straw Boss.  
Warren, Chas. Horning, W. K. Largent, I. Christ, Wood.

**SCREENING DETAIL.**  
Slim Almqvist, Straw Boss.  
Denecke, Perrine, Davidson  
Schuldt, Eichelberger, Lamb, Gowan, Freese, Stenger, Duff, Samms, P. Kreisher, Herr, Smith, R. Newman, Bill Malmsten, Hammond, Broxon, Lyons.

**LOADING CINDERS.**  
Slim Almqvist, Straw Boss.  
McGree, Morse, Duthie, English, Roscoe Jones, C. Gerlough, Jabborra, Gelbach, J. Davis, Moss, C. Parsons, Carlson, Eddy, Rush, Pechanec, Mason.

**WORK ON TRACK.**  
Zack Cassidy, Straw Boss  
Greene, Helm, Burkland, Richmond, Frederickson, Illingworth, Carpenter, Graf, Chapman, Collins, M. Davis, A. L. Newman, M. Davis, A. McDonald, L. Patten.

**FILL IN BANK.**  
Zack Cassidy, Straw Boss.  
Johnson, O. J. Koch, Angel, Cox, Felton, Lloyd, Harper, Lynch, Smith, E. B. Inman, Westover.

**PAINTING BLEACHERS.**  
J. Harry Einhouse, Straw Boss.  
Jensen, Renshaw, Ben Williams, Wade, Jess Larsen, Ritchey, A. W. Anderson, Fox, Jas. Ragsdale, Beck, Clarke, Colburn, Horning, Arthur.

**BUILDING STEPS FROM FIELD TO GYM.**  
Dutch Adelmenn, Straw Boss.  
Sutherland, Earl Hall, Messenger, Nankervis, Funke, Ole Robinson, Carey, J. Schick, Rettig, Ralph Jones, R. R. Hall.

**BUILDING ROAD.**  
C. Y. Garber, Straw Boss.  
Pearson, King, H. Nettleton, L. Nettleton, E. Thomas, F. Waterman, Fry, Staples, Reed-er, Almqvist, A. Mullarky, Helland, McDevitt, King, Thompson, Smith, Roy, Simpson.

**TENNIS COURTS.**  
Bud Blossom Bloom, Straw Boss.  
McDonald, H. Weber, Chrissman, Samms, H. Peterson, Cone, Wm. Hamilton, Cooper, Johannesen, Ficke, Eagleson, Wehr, McDonald, C. Ruckwee, Moore.

## COLLEGE EDUCATION HAS VALUE OF OVER \$20,000

### Pennsylvania Professor Sets Value Based on Earnings of Both Classes of Men.

According to the Pennsylvania State College News, Dr. Arthur Holmes of that college fixes the monetary value of a college education at from \$18,000 to \$20,000. His estimate was based upon a comparison of the salaries of college-trained men with those not having the same advantages. According to Dean Holmes, the average salary of the college man is \$1187, while \$518 is the average income of the non-college man, a difference of more than \$650 in favor of the man with higher training. Thirty years' work will make this advantage worth \$19,500, according to Dean Holmes' calculation.

## DR. LINDLEY TOO LATE TO SPEAK

### President Brannon Makes Impromptu Talk on Plans for Development of University Plant

The assembly period Tuesday morning was occupied by Dr. Brannon in the absence of Dr. Lindley who was scheduled to deliver a talk on Psychology, but was obtained on the road from Pullman.

Dr. Brannon spoke of the proposed new buildings and improvements that are to be made at the university in the near future. "The new West wing," he said, "will give the library a more spacious and a better lighted room than it now has. It will also provide comfortable lecture rooms and laboratories for the departments of Botany, Geology, Physics, Business Administration, Philosophy and Experimental Psychology.

"A new dairy building is to be erected for the manufacture of butter, cheese and ice cream. It will be up to date in every detail. The old dairy department will be moved from Morrill hall and the Department of Forestry will be given a home. A green house is also to be constructed.

Considerable repairing is to be done on the Administration, Mining, and Engineering buildings besides some grading and paving on the east side of the campus."

Dr. Brannon also spoke of the deplorable condition that Ridenbaugh hall was found in three years ago, and the repairs that had been made to make it a comfortable dwelling. He spoke of the steps and walk that were so badly needed and were put in within the last three years.

Dr. Brannon urged those who have not been called by the army or the farm to join the Third Great Corps of the American Army, viz. that of students and continue to train themselves that they may meet the demands that will be made of them and help solve the problems that are before us.

## AMERICAN WORKS OF ART ON EXHIBITION HERE NOW.

### Photographs Illustrate Development of American Art From Early Days to Present.

The Faculty Women's club is presenting an art exhibit this week in the third floor hall of the Administration building. The exhibit was loaned to the club and the university by the American Federation of Arts and consists of 158 large size photographs and two bronzes which represent the development of American painting and sculpture. The collection includes many of the works of such artists as Gilbert Stuart, Winslow Homer, James Abbott McNeil Whistler, John Singer Sargent, Gari Melchers, William Merritt Chase, John W. Alexander, Wilton Lockwood, Willard L. Metcalf, William Lamb Picknell and Douglas Volk. A bronze by Alexander Stirling Calder and one by Hiram Powers are also in the collection. The collection will remain at Idaho for the next two weeks, and is well worth seeing.

Corbett Goes To Spokane—Professor Laurence J. Corbett will leave for Spokane Friday morning to attend the annual meeting of the Northwest branch of the American Institute of Electrical Engineers. Professor Corbett is a member of the committee in charge of the program.

## DEAN SHATTUCK AND DEAN AYERS RELEASED BY BOARD OF EDUCATION

### A. S. U. L. ELECTION.

The polls for the student body elections will be open in the Administration building Friday from 10 a. m. to 2 p. m. All votes must be cast during this time.

### IDAHO BOYS MUST WORK HARD IN RESERVE CORPS.

### Kitchen Police, Tight Uniforms and Other Trials Add to Joy of Life in Camps.

Idaho men at the Presidio army reserve officers' training camp, as well as the rest of the 2500 applicants for commissions, are soldiers now, amenable to all the discipline undergone by the veriest rookie.

Not only must they wear the olive drab service uniform at all times, but while on duty they must keep it buttoned—which is not always pleasant on spring days under the California sun.

In addition to doing their own work in the barracks, the applicants for commissions must be their own dining room attendants and kitchen assistants. Peeling potatoes, washing dishes and waiting on tables probably will be a new experience for many of the students, as will sweeping, scrubbing and making beds.

As soon as they are registered, the prospective officers are vaccinated and inoculated, and then draw their uniforms and equipment. Uniforms are furnished at the Presidio camps without charge, and without a deposit being required of the students.

No regular army officer may be as assistant a reserve officer of a grade higher than himself, the regulation provides. In such a circumstance the reservist could voluntarily take rank lower than that of the regular army officer.

## GOOD PROGRAM FOR AFTERNOON

### Interclass Tennis Tournament at 1:00 Will Start Festivities—To Be Followed By Tableau

### DANCE AT GYM IN EVENING

### Faculty-Student Picnic at 5:30 to Be Followed By College Songs In University Gardens

An interclass tennis tournament of mixed doubles will begin Friday afternoon at 1 o'clock on the university courts for the class championship. There has been some earnest practicing the last few days and a good contest should result.

As soon as the tournament is finished, there will be a patriotic program in the auditorium. The program is to consist of a series of patriotic tableaux—"Songs in Living Pictures." There will be eight pictures while a mixed chorus will sing the songs pictured.

The songs to be portrayed are:  
1. "Tenting Tonight on the Old Camp Ground."  
2. "On the College Steps Tonight."  
3. "Are We Prepared."  
4. "Idaho We Dearly Love Thee." (Junior prize song)  
5. "America, I Love You."  
6. "The Girl of 1917, or I Didn't Raise My Girl to Be a Farmer."  
7. "A Little Man Bought a Big Bass Drum."  
8. (a) "Your Grand Old Flag."  
(b) "Star Spangled Banner."

The annual Faculty-Student picnic supper will be held on the campus at 5:30, providing the weather is not too cold. If conditions will not permit eating outside, the supper will be held in the Ad building. The girls of the University will furnish the "eats" for the picnic supper and from present indications, it will be some feed. All the rest of us need to do is to bring

(Continued on page two)

### No Explanation for Unexpected Act Given By Board When Popular Deans Are Removed From U.

### MISS REDFIELD TO NORMAL

### Dr. E. A. Bryan of W. S. C. to Take Place of Dr. Sisson as Commissioner of Education

Unofficial word has just come from Boise to the effect that Dean Shattuck of the College of Letters and Sciences and Dean Ayers of the College of Law have not been retained for next year. It is understood that all other members of the faculty have been retained. No official notification of this act has reached Moscow other than the press report received from Boise Wednesday. The resignation of Dr. E. O. Sisson was also presented to the board and accepted to take effect as soon as his successor could be appointed. The vote on the question of dropping Dean Ayers and Dean Shattuck and accepting the resignation of Dr. Sisson was four to two, with Walter S. Bruce and Miss Ethel Redfield, state superintendent of public instruction voting in favor of retaining all three men. Dr. Sisson gave as his reasons for resigning "the impossibility of further harmonious and profitable relations with the board and embarrassments abounding in connection with his work."

Miss Bernice McCoy, former state superintendent of public instruction was elected dean of women of Lewiston State Normal school.

There has been rumor in the public press of the past few days that the state board of examiners has decided to defer action in regard to the construction of the new wing of the Administration building to a later time. This together with the postponement of work on the new buildings at the Tech. institute lends color to the hint given by President Brannon in assembly Wednesday that the university might possibly be removed from Moscow within a few years.

The members of the Bench and Bar association of the University Law school sent a vigorous telegram to the State Board of Education Thursday morning protesting the removal of Dean Ayers, and demanding to know the reasons for his removal or a reinstatement. The feeling in regard to the two deans is running very high and concerted action on the part of the students is expected.

A later telegram from Evan Evans, chairman of the state board of education, states that Dr. E. A. Bryan has been selected commissioner of education to succeed Dr. Sisson, resigned. Dr. Bryan is the former president of Washington State college and is a most capable educator. He achieved great results for Washington State college during his connection with that institution, and it is to be expected that the university, as well as all educational institutions of the state, will profit by his sponsorship.

The matter of the presidency of the university has been under consideration by the Board of Education during their present session but no action has been taken. It is not known whether or not a selection will be made at this meeting.

### SOPHOMORE PLAY CONTEST WON BY ELEANOR BRANNON.

### Dr. Marshall and Dean French Award Prize on Play Submitted Under Name of "Raffles."

Announcement of the winners of the Sophomore Prize Play contest was made at the assembly Wednesday morning. The contest was on the dramatization of the novel "Ethan Frome" and the Sophomores were required to hand in their dramatizations under a pen name, while they also enclosed their real name in another envelope inscribed with their pen name on the outside. Several very good plays were prepared, and it was a difficult task for the judges, Dr. Marshall and Dean French to decide upon the winner. The play by "Raffles" was finally decided upon as the best and the envelope containing the name of the writer was opened at assembly, disclosing the name of the daughter of President Brannon.

**OUR FRIEND.**

Nothing can express more forcibly the regret of the student body at the loss of Dr. Brannon, than the ovation he received at Assembly Wednesday. As Dean Ayers said, it was no funeral, but only the sending of a dear one out to a greater work in greater fields. The reasons which Dr. Brannon expressed as the cause of his coming to Idaho, his stay here and the final cause for his departure are reasons which we all must respect. No red blooded man could longer have stood the petty antagonism to which he was subjected.

The service which our president has so cheerfully given to us, the good he has done, and the good which he might have done, unhindered, are too well known to Idaho men and women to need repetition. It must suffice to say that our very best wishes go with the man who has given so much and asked so little.

**"FOR SERVICES RENDERED."**

It scarcely seems possible that the powers that be would go to the extent of taking from the university two of her most capable men in the persons of Dean Ayers and Dean Shattuck, but it has been reported that they have not been retained for next year.

Of all the faculty none are more loved and respected than these two men. They have labored long in the work of love to build up the university and this is their reward!

Dean Shattuck came to the University of Idaho eight years ago when Idaho was little more than a preparatory school. He came as professor of forestry, the position which he now holds. In 1914 he was made dean of the College of Letters and Sciences. The work he has done in organizing the faculty and work of the College has had no small part in the development of the University, and his work in the Forestry department has made the University of Idaho Forestry School one of the foremost in the United States, and one that is known all over the country. The work of Dean Shattuck has not ended with the university, but he has done much valuable work among the lumber regions of the state and the loss of his advice will be keenly felt.

When Dean Ayers came to the university in 1913 the Law School was in its infancy. Students were few, and the school had no real standing among the law schools of the nation. But during the four years of his work at Idaho he has given the Idaho law school a name that is known over the whole country. Students from all over the northwest come to Idaho to study law in a school that is accredited by the American Association of Law Schools.

It is with deep regret that the student body of the university sees the departure of these two able and straightforward men.

**REQUIESCET IN PACE.**

With this issue, the University Argonaut closes the 18th year of its

existence. A stormy year for the University in many ways, the Argonaut did not fail to receive its share of the disturbance. The editor, chosen by the student body to carry the policies of the paper through the present year, Orin Phillips, was forced to resign the position soon after the opening of school as his studies made too great a demand upon his time to permit conducting the Argonaut. A. J. Priest, the erstwhile associate editor then took the helm and carried paper through many delicate situations with a master hand. On his departure last month, the present editor was promoted to the helm. In the business office the year has seen a success in spite of the greatly increased price of all materials entering into the paper. To Charles Owens, the business manager, is due the credit of conducting the financial department successfully through a most difficult period in view of the general demoralization of the staff and the fact that semester examinations make a heavy demand upon those who still remain, it is thought best to discontinue the publication of the college paper with this issue.

It is the desire of the editor to thank all the staff for the co-operation shown and especially Miss Carol Ryrle, Frank Illingworth and Frank Sutherland for the steady support they have given.

**MANY DEGREES TO BE GRANTED**

College of Liberal Arts Leads List, While College of Agriculture Runs Close Second

**TWO ADVANCED DEGREES.**

Total of Seventy-Three Degrees and Three School Certificates To Be Conferred

A total of 73 degrees will be granted by the university on June 8. This is a considerable increase over any previous year, last year's graduating class containing 64 members. Of the graduates, 20 are in the College of Liberal Arts, 13 in the College of Agriculture, 10 in the College of Law, 9 in the College of Sciences, while the remainder are distributed among the other departments of the university. There are two advanced degrees conferred this spring, one of Master of Science upon Robert Ellison and that of Master of Science in Agriculture upon Richard Canan.

The entire list of degrees to be conferred follows.

**Bachelor of Arts.**

- Will Albert Boeckel, Rathdrum.
- Ola Mae Bonham, Wardner.
- Harry Axel Burke, Star.
- Beulah Kathleen Carey, Nezperce.
- Grace Darling, Boise.
- Ralph Edward Greene, Palouse.
- Esther Alice Hartley, Spokane.
- MacKinley Helm, Lewiston.
- Vernon Lowell Henry, Moscow.
- Oscar Julius Johnson, Boring, Ore.
- Teresa Isabella Keane, Moscow.
- Frank Arthur Koch, Filer.
- Norma Virginia Martin, Davenport.
- Mary Mellison, Everett, Wash.
- Margaret Elizabeth Rawlings, Athol.
- Florence L. Richardson, Moscow.
- Ethel Blanche Richmond, Lapwai.
- Ada Evelin Rogers, Star.
- Henrietta Louise Safford, Moscow.
- Byrd Fanita Wall, Twin Falls.

**Bachelor of Science.**

- Francis Marion Bistline, Pocatello.
- John Harry Einhouse, Kellogg.
- Claude Yant Garber, Nampa.
- Tillman Daniel Gerlough, Boise.
- Jens Peter Jensen, Spokane.
- Ennis Leonidas Massey, Kellogg.
- Robert Martin Montague, Genesee.
- Naomi Pearl Morley, Colfax, Wash.
- Herbert Emery Samms, Pocatello.

**Bachelor of Science in Home Economics.**

- Charlotte Lewis, Moscow.
  - Flora Isabella Loomis, Moscow.
  - Mary Crawshaw Nodde, Payette.
- Bachelor of Science in Forestry.**
- Russell Nelson Cunningham, Boise.
  - Harry E. Malmsten, Fairbanks, Wn.
  - Virgil Carlton Moody, Hope.
  - Fred J. Ruckweed, Plymouth, Wis.
  - Donald Hubert Yates, Moscow.
  - Homer Smith Youngs, Moscow.
- Bachelor of Science in Agriculture.**
- Albert I. Anderson, Moscow.
  - John Martin Booth, Nezperce.
  - Theodore Stanley Brown, Palouse.
  - Grover Burnett, Mackay.
  - Charles Herman Ficke, Payette.
  - Robert R. Groninger, Port Royal, Pa.
  - Charles Homer Hudelson, Gooding.
  - Oscar Wilhelm Johnson, Idaho Falls.
  - Arthur H. Nielson, Pocatello.
  - Lester S. Plato, Bonners Ferry.
  - Chester Leon Vincent, Moscow.
  - Ronald Ellsworth Wood, Payette.
- Bachelor of Science in Household Arts.**
- Anna Gertrude Donacke, Richfield.

**Gertrude Walker, Moscow.**

**Bachelor of Science in Civil Engineering.**

- George John Beck, Moscow.
- Alexander T. Schick, Moscow.
- Earl C. Simpson, Plains, Mont.

**Bachelor of Science in Mining Engineering.**

- Norman E. Holden, Payette.
- Clifford McCormick, Rupert.

**Bachelor of Science in Electrical Engineering.**

- Howard Elwin Waterman, Moscow.

**Bachelor of Science in Mechanical Engineering.**

- Warren R. Adelmann, Boise.

**Bachelor of Laws.**

- William H. Bonneville, Coeur d'Alene.

**Bachelor of Science in Mechanical Engineering.**

- William Bert Dingle, Coeur d'Alene.
- Milton Wellesley Emmett, Kellogg.
- Samuel Dent Hays, Boise.
- Glen Earl Lowe, Rockford, Wash.
- Thomas Charles Lynch, Kellogg.
- Harry Owens McDougall, Pocatello.
- Frank Martin, Boise.
- Charles Hayden Owens, Boise.
- George Theron Warren, Boise.

**Master of Science.**

- Robert W. Ellison, Seattle.

**Master of Science in Agriculture.**

- Richard Dean Canan, Pittsburg, Pa.

**Student Apathy**

*"While there's life there's hope, but when DEATH comes, HOPE is vain"*

There is a certain young gentleman in this college running for office. Whether or not he is qualified for his office is not for us to state, but anyway this fellow is not extraordinarily well equipped with a knowledge of English diction. That settled we find him at a sorority house with his date. He uses the old gag about if "you-vote-for-me-I'll make-you-chairman-of-the-decorating-gang."

But she is wise.

"How many supporters have you, anyhow," she asked all sincere.

Cold buzzings came into the ear of the candidate and then he spoke: "Two of course. Think I am a centipede."

And they haven't recognized each other yet.

**GOOD PROGRAM AFTERNOON**

(Continued from first page)

a fork, a spoon and a healthy appetite. The last will be sufficiently in evidence, but don't forget the fork and spoon.

After the supper the whole group will go to the University Gardens to sing some of the college songs. There will be an accompaniment of stringed instruments and a good leader to start the songs. Show the old Idaho spirit and help make the singing a grand success. After the singing there will be a pretty Japanese lantern parade on the campus which will be participated in by all the members of the Women's league.

The day will end with a dance in the Gym, and the word has gone out that everyone and all their relations are to be there. The girls are to come "man or no man" and all the fellows will be on hand. The tax is but 25c which will eliminate all possible financial difficulty.

**IDAHO GRADUATES IN PRINT.**

Louie Jessup Collaborates in U. S. Drainage Survey Bulletin.

Bulletin 502 of the U. S. Dept. of Agriculture is of interest to the engineering students of Idaho. It is a professional paper written by D. G. Miller, senior drainage engineer of the U. S. geological survey and L. T. Jessup, junior engineer in the same service. Mr. Jessup is a graduate of the civil engineering department of the university, class of '13.

**VENUS 10¢ PENCIL**

No matter what course you're taking you need this famous pencil!

BECAUSE of the superlative quality of material and workmanship, VENUS is admittedly the finest pencil it is possible to make.

If you like a thick soft lead that marks so that you can read the writing half way across the room, choose the soft degrees 6B—5B 4B.

For short-hand notes or easy writing 3B—2B—B (medium soft) are popular.

For sketching, general writing purposes, etc. HB—F—H—2H (medium) will be desirable.

For drafting, a medium hard pencil gives the best results and you'll like 3H—4H—5H—6H.

For very thin, narrow lines for extremely accurate graphical charts, maps, details, etc., 7H 8H 9H are available.

Look for the distinctive water mark on each of the 17 black degrees and hard and medium copying.

Your professors will confirm these statements as to the merits of VENUS pencils.

For sale at the College Book Store.

**"No more Hot Irons can Press my Trousers"**

**Leahey's Heatless Trousers Press Valet Service**

is a wonderful little wardrobe appliance. It's a Presser, Creaser, Stretcher and Hanger, COMBINED IN ONE, WITHOUT THE USE OF THE HOT IRON that scorches the life out of fabrics, shortens their life, and makes them shiny. It's only a Dollar for a Lifetime Service.

**West Pointers Trousers Are Never Shiny**

The West Point Cadets are the best uniformed—best dressed men in the army. Their method of pressing is similar to ours. Their trousers are never touched by a hot iron. On parade, people marvel at their uniforms. Their trousers are pressed and creased perfectly, always looking like new and wear longer. A TROUSERS PRESSER, CREASER, STRETCHER AND HANGER ALL IN ONE FOR ONLY \$1. BUY YOURS TODAY.

**This Wonderful Invention**

has revolutionized the entire clothing question for men. By its use you can, IN FIFTEEN MINUTES, secure a knife-edge crease from belt to boot on trousers that at the same time are properly stretched and made absolutely free from wrinkles.

**Cut Out Tailor's Bills**

Just figure out what it costs to have your trousers pressed twice a week at 15c or 20c a pressing. Then figure the cost of the ne wtrousers you have to get so much oftener than is necessary. In pressing cost alone you save over fifteen times the price of the Leahey Press in a single year—and it's good for a Lifetime Service.

**At Home or While Traveling**

it is equally indispensable. Takes up no more room in your suitcase than a shirt. Presses your trousers while you are on the trip. Folds up with the trousers in it. It doesn't matter where or how you live or what your occupation is—you ought to have one.

# Society Gossip

## A. K. E. Toast Wines

Last Sunday, unable to resist the call of the woods any longer, the A. K. E.'s, accompanied by their "dates," fied themselves off to the woods to spend the day in approved picnic fashion. Transportation was by means of a decrepit old hay rack, which broke under the weight of the party. Due to the bubbling of Prof. Gail, however, the wait for repairs was made merry and the journey was completed without further mishap. A sumptuous camp dinner was prepared to start the afternoon properly, after which the merry makers explored the woods and mountain sides with, at least one narrow escape from a repetition of the "Babes in the Woods" stunt. The afternoon flitted past only too rapidly and at dusk the picnickers straggled into camp to devour the remains of the earlier repast together with sundry other edibles.

A lone backwoods chicken became too inquisitive for the welfare of its own neck and succumbed to the culinary art of Professor Gail, thereby adding much to the joy of the occasion.

After singing around the fires for some time the party returned to Moscow, tired but riotously happy. The guests were the Misses Douglas, Ady, Coutts, Ferrol Richardson, Florence Richardson, Bonham, Gregory, Bailey, Doyle, McCallie, Gano, Lynch, Stretter, Anderson, Pearson, Professor and Mrs. Gail, Dean Ayers and Professor Gill.

## K. K. G. Kensington.

Kappa Kappa Gamma entertained at a Kensington on Friday afternoon in honor of the Kappa mothers in town. The color scheme used in the decoration was yellow, jonquils being used in abundance. Mrs. McPhee presided at the tea table. Those invited were the Mesdames Arnold, von Ende, Hutton, McPhee, Fallquist, Pat. ten, Swartwood, Zeigler, Burke, Doyle, Nankervis, Woods, Keane and Cornwall.

The A. K. E. house was the scene of an informal dance last Saturday evening. Those present were the Misses Anderson, Glindeman, Fields, Coultts, Stretter, Bailey, Rogers, Bonham and Mr. and Mrs. Colver.

Lyle Colborn left last Friday for his home at Sterling, Idaho.

Pearl Morgan spent the week-end in Lewiston visiting with her father.

Messrs. Lynch, Parsons, Anderson and Rush attended the Hard Times ball at Pullman last Friday night.

President Brannon was absent last week on a trip to Chicago. He returned to Moscow Saturday night.

Virginia McRae attended the Y. W. C. A. conference in Spokane Friday and Saturday.

Ernestine Drennan was called her home in Rathdrum Thursday because of the illness of her father.

Christina Anderson of Coeur d'Alene was a guest of Miss Jackson and W. H. Bonneville at Mrs. Colver's last week-end. While here she attended the A. K. E. picnic, returning to Coeur d'Alene Monday morning.

Last Monday Mr. C. G. Paulson B.S., civil engineering, '13, visited Kennedy Ford where the U. S. Geological survey has a gauging station and measured the water in the Palouse river, finding it at a stage of maximum flood. Mr. Paulson worked with the geological survey in the water measurement branch and was particularly taken up with the study of the water supply of Columbia river. His headquarters are at Tacoma.

President Brannon left Wednesday night for south Idaho, where he has several engagements to speak at High School commencements. Thursday he speaks at Caldwell, following which he appears at Meridian, Middleton, and returns to deliver the address to the Moscow High school, May 25.

Memorial Day May 30.—Memorial day will be celebrated at the university May 30. All classes have been dismissed for the day and a general holiday will be observed.

English Lady: "About the potatoes for lunch, sir. Will you have them in their jackets, or in the hood?"—Record.

## Gamma Phis Have "Backward Party"

The Gamma Phi entertained the Kappas at a "Backward" party in their home on Friday evening. The hostesses and guests all appeared in most astonishing costumes, worn backwards, and representing all sorts of characters from brides and chorus ladies to soldiers and sailors. Being a backwards party, everybody said "Goodbye" when she came, and then was escorted to the attic where ice cream and cake were served. This was followed by stunts, given by Clarinda Bodler, Annette McCaley, and others. The remainder of the evening was spent in dancing and singing college and sorority songs. A real lunch was served later, while the guests sat with their backs haughtily turned to the table. The party broke up amidst hearty salutations.

## Belle Willis Surprised.

Mrs. S. L. Willis entertained the members of Gamma Phi Beta at a surprise party in honor of her daughter Belle on Thursday evening. It was in the form of a theater party at the Orpheum. After the pictures the guests were taken to the beautiful new home of the hostess. Stunts and singing as well as the presentation of a lot of funny birthday gifts, made the evening jolly. A lighted birthday cake added to the charm of the refreshments.

## Another Picnic.

A jolly party went out to Tarry-Awhile, up among the pines last Saturday. Weinies and marshmallows, a campfire, songs and dancing were the past-times indulged in. Those who enjoyed this merry time were, Mrs. Adams, the Misses Willis, Graham, Olson, Branson, Voss, Lynch, Barton, Kerr, Kenward and Young; Messrs. Chariton, McDevitt, Warren, Newman, Carey, Lamb, Barber, Ritchey, and Nettleton.

Miss Fauble entertained the girls of Ridenbaugh hall and their guests, Sunday evening with a delightful picnic supper, held in the university flower garden, in honor of Miss Sherman of Spokane.

## HOWARD MASON, '16, COMES BACK FOR SHORT VISIT.

Idaho Grads at Schenectady Hold Down Jobs Against Men From Big Schools.

Howard Mason, a graduate in Mechanical engineering, '14, was on the campus a few days ago. He has been with the General Electric company at Schenectady, New York, in the electrical testing department. He left Marvin Mulkey and Will Murray of his class still at the factory. He speaks well of the success of the Idaho graduates with the company, where they come into competition with graduates from all over the world. Mr. Murray is doing special work in the wireless research laboratory, while Mr. Mulkey is in one of the departments testing large generators. Mr. Hupp, a graduate of some years ago, is a foreman of one of the testing departments.

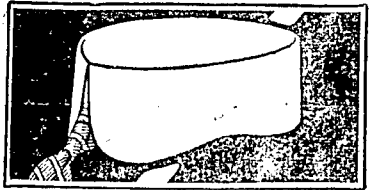

## The Soldieress.

O' she's swapped her ribbon for a Red Cross band  
And she's planting onions with a firm, fine hand  
While the fumes of arnica replace the scent  
Of Persian perfumes once so redolent.

O! her fair mitt's laden with the blister's bump  
And her trim back's curving in the "truck patch hump";  
Her complexion's sunburned—which she does not rue—  
For she says "Old Glory" is her color true!

# AG EXPERIMENT PLANT ACTIVE

Recent Appropriation Permits More Extensive Work in High Land Investigation

**GOODING STATION CLOSED.**  
Soil Survey of Latah County to be Completed Soon by Main Station Here.

The Agricultural Experiment stations have been unusually active this spring. The legislature authorized a new sub-station, for the purpose of experimenting with crop growing at altitudes of 6,000 feet or over. This work is believed to be unique. The only section of the state available for the plant is the southeast portion in Teton, Bonneville and Bannock counties. The work of other stations has also been progressing. The main station at Moscow recently completed a portion of the soil survey of Latah county, which has as its object the location of boundary lines of different soil types. The work includes physical and chemical analysis, as well as actual field work. This latter part was largely done by C. B. Michelwait, '16, while the analyses were carried thru by Dr. P. P. Peterson, soil technologist. Further surveys are planned. In addition, the station is also laying tile to drain a portion of the experiment farm, which will make available a plot of 15 acres for experimentation in small grain and legumes.

Superintendent Aicher of the Aberdeen sub-station reports exceptional progress in alfalfa growing in "dry land farming" regions, and says that the station is receiving requests for information daily. People are beginning to realize the value of the information offered by the Agricultural Extension department.

The Gooding station, where work was recently discontinued, is in print with three "bulletins," which deal with the problems in growing small grains and legumes in southern Idaho. Ex-Superintendent Welch, is now professor of agronomy and chemistry in the Maori Agricultural College, located at Hastings, New Zealand, a school for the education of the native young men. Mr. Welch has been at his new post only a few weeks, and in a recent letter to Director Jones he gives a graphic account of his trip. Due to the fact that the ship on which he sailed was chased into port by a German raider on her previous trip, the entire boat was darkened at night. Nothing unusual happened with the exception of some rough weather with the accompanying "sea-sickness." The letter required five weeks to make the trip and bore the red stamp "opened by censor."

At Caldwell, C. M. Eklof, '16, is engaged in clearing 40 acres more of his 320, to devote to experimentation in legumes and similar crops.

Frank La Frenz, '15, at Sandpoint, is conducting experiments in pasturing of dairy cattle, and is also engaged in devising better methods of clearing logged-off land.

## MISS LAUGHLIN TO BE HERE.

Meeting to be Held Sunday Afternoon May 20, at Ridenbaugh

Miss Isabel Laughlin, student secretary of the Woman's Presbyterian Board of Missions will be at the university from Saturday to Monday, May 19-21, and wishes to meet all the Presbyterian girls in college. An informal meeting will be held Sunday afternoon at 4 o'clock in the Recreation room at the Ridenbaugh hall. Those who met her last year remember her very pleasantly and it is hoped that a large number will attend this meeting.

Sixty-five students of the University of Kansas made a house-to-house survey in behalf of the Red Cross society at Lawrence. Blanks answering fourteen questions were filled out for each family. There were two groups of questions. One group concerned the relief and conservation work that the family could do. This information was desired as a part of the nation-wide movement for conservation. The other group of questions was about diseases and the children in the family.

## Natural Conclusion

She (sentimentally): I was engaged to him for three years—three beautiful happy years—and then it all ended.

He: I suppose you married him then?—London Opinion.

# AMERICAN ART IS PROGRESSING

Mrs. Goodrich Gives Lecture Illustrated With Photographs of Famous American Pictures

Friday and Saturday of last week, Mrs. Goodrich, instructor in fine arts, delivered a lecture on the development of American art. The lecture which is illustrated by a series of reproductions of works of representative American painters, covers a wide field. The work of Benjamin West and his contemporaries, the first American artists, are first discussed, followed by others up to the painters of the modern school who have found their inspiration in industrial affairs. One of the most striking features of the lecture was the fact brought out that America really possesses an art, which compares exceedingly well with work being done by the modern European schools. In landscape painting American artists are admittedly the superiors of their old country rivals.

In conjunction with the lecture, the material for which was received from the American Federation of Arts, the university has also been loaned by the federation, a collection of 160 photographs of the best examples of American paintings. The exhibit, which is displayed in the hall of the third floor from the "Ad", will remain at Idaho for the next two weeks.

# IDAHO GIVES MANY TO ARMY

Seventy University Men Have Offered Lives to Their Country in Hour of National Emergency

The complete list of the contributions of the university in students and graduates to the reserve officers' corps includes sixty-three names. In addition to these are twelve men who are enlisted in the National Guard not included in following list. Many of these have been gone from Idaho for some years, and the list also includes many first year men. Not all of the men have been called for duty at the Presidio, but they have all been accepted and will be called to a later camp if not for the first section.

R. O. Johnson, R. G. Harding, Adna M. Boyd, C. H. Owens, R. Everly, F. C. Erb, H. D. McGirr, H. O. McDougall, H. S. Youngs, R. M. Hay, T. S. Morrison, W. A. Boekel, E. E. Hunt, S. O. Phillips, C. H. Hudelson, S. D. Hays, A. Horning, L. M. Blackmer, W. B. Dingle, N. E. Holden, D. H. Yates, M. W. Emmett, G. L. McMullan, F. A. Plastino, H. J. Martinson, H. Hawley, V. Starr, J. W. Cramer, S. Hodgman, R. D. Agee, R. E. McFarland, H. Jeness, T. Jennings, H. E. Malmaten, A. Denman, S. Ross, E. W. Poe, C. W. Raney, C. E. Roberts, W. Schofield, J. T. Ross, R. A. Hammar, H. B. Funke, P. E. Arnold, L. C. Taylor, C. Parsons, C. E. Cone, L. W. Kitch, R. R. Hall, A. J. Hinkle, W. Barber, Bowman, M. F. Ward, R. M. Montague, F. R. Stebbins, R. M. Hay, R. E. Westervelt, W. B. Clark, R. R. Groninger, H. B. Barger, F. J. Ruckweed, G. W. Phillips, Bressler.

## His Family Standing

A cockney angler, thinking his Highland boatman was not treating him with the respect due to his station, expostulated thus:

"Look here, my good man, you don't seem to grasp who I am. Do you know that my family has been entitled to bear arms for the last two hundred years?"

"Hoots! that naething," was the reply. "My ancestors have been entitled to bare legs for the last two thousand years."—Tit-Bits.

Captain Cummings Goes Soon.—Captain Cummings received a telegram this week asking him how soon he would be available for service at the training camps at Presidio. He has replied that he is available at once and orders to report to the Presidio are expected at any time. Sergeant Abendroth will probably remain at Idaho to care for the work of the military department here.

"Haven't I beautiful hair, Mame?"  
"Wonderful! You can't tell which is switch."—California Pelican.

# REAL TRIBUTE TO PRESIDENT

(Continued from first page)

the university has advanced so rapidly that all such doubts have been put at rest. Militarism, so to speak, has been replaced by Democracy. Under his able direction the university has reached a high scholastic standing. We have thought of Dr. Brannon as one in whom we could always place our highest trust and confidence. We regret his leaving. We thank him for the many benefits he has given to the "U," and to ourselves.

Oscar Johnson, representing the Seniors said in part, "We are ready to leave college and go out to do the work of men and women. We haven't time to speak of the debt we owe the state or each other. Our biggest debt is to the service of Dr. Brannon whom we had the opportunity to work with these three short years. He has stood out as an ideal having the qualities of a leader. We are leaving him in person but not in spirit. In losing our President let us not lose the principles for which he has stood. We wish Dr. Brannon success and we shall go out of this institution and endeavor to live up to the high ideals he has taught."

Dean George D. Ayers of the law school spoke on behalf of the faculty. "When this meeting was called it was to be a meeting not of protest or of indignation," said the Dean. "There is no use protesting against that which is beyond recall, nor expressing indignation without an end in view. But whatever I must pay, I do not subscribe to what has been done. I cannot, I will not. This farewell word we have come to say can be a funeral in only one or two ways—either of the educational institutions of Idaho or of Idaho spirit. It is not the former, and I hope that I may be here when the Idaho spirit again wakes up. The great mistake that enemies of progress make is martyring the progressive men. Martyrs don't suffer. Their ecstasy doesn't allow them to feel the pain. The smile of our president has shown us that he too is not feeling the pain of martyrdom."

President Brannon made his last appearance before the students of the university at this assembly. He devoted the time to a recounting of the work of his administration and an explanation of some of the circumstances surrounding his coming, his stay and the reasons for his departure. "There was a reason," he said, "for my coming, a reason for my staying and a reason for my going, and I think the reason for the last is the best of all. "In the winter of 1914 I was asked

to come to this university not as a czar or a ruler, but as a worker. My pledge in accepting the position here is set forth in the telegram which I sent to the board of education at that time: 'Pledging co-operation with the board and yourself, I accept the responsible position.'

"My efforts to work along the lines of my pledge have been consistent and earnest. Members of the student body have been called into consultation to discuss student affairs and where possible, improvements in conditions were made. I also planned a ten year program for the university which if followed, will mean a great deal to this institution—in fact a real and comprehensive program is indispensable for the rapid and sure growth of any educational institution.

"In 1915 a resolution was drawn up in the legislature by Day, Hart and Thomas stating that my salary was too great, and to relieve them of embarrassment in that regard, I resigned. In response to earnest protests, the resignation was withdrawn and nothing further done at that time.

"The fight against the institution is being carried on by only a few people, a small destructive group that is hostile to giving this university any financial support whatever. The great majority of the state is loyal, and the university must be taken out of the hands of politics and freed from the control of a cabal.

"I regret that circumstances make my departure necessary, but I am sure that Idaho will come out of her period of strife and become a strong university."

Stude: That girl is a persimmon.  
Second Stude: How's that?  
Stude: She makes my mouth pucker.—Record.

An Arab stood on a weighing machine  
At the end of a lingering day;  
A counterfeit penny he dropped in  
the slot  
And silently stole a-weigh.  
—Record.

She: "When was the loose leaf system first used?"  
He: "Eve used to use it to keep track of her party gowns."—Widow.

## Ein Boshafter Gatte

She (dressing to go for a walk): Why are you looking so concernedly out of the window?

He: Oh, I was just looking to see if you or that new building over there would be ready first.—Spinx.

## Why Go To "Idaho"

The choice of a university or college to be attended by a student should be based upon four principal requirements: 1st, a high purpose and broad field of work; 2nd, a competent faculty; 3rd, a sufficient equipment; 4th, a student body of high ideals. The University of Idaho fully satisfies these requirements.

### 1. Purpose and Field—

Its purpose is to serve the people of Idaho in developing and training students; in advancing the entire State educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Forestry, Home Economic, and Educational matters not only to students in residence but also to all who desire it throughout the State.

### 2. Faculty—

The faculty is made up of eighty-three teachers of thorough training and efficiency attained by years of study and experience. They are deeply interested in the progress of each and all under their instruction. They know the State and its conditions and give their best efforts to its development. In addition there are fifteen workers in the agricultural extension division and six agricultural county agents.

### 3. Equipment—

Its equipment is ample. It has a library of over 39,000 volumes, excellent facilities for teaching Literature, Philosophy, and the Social Sciences, and well provided laboratories for the natural and applied sciences.

### 4. Students—

Its students number one thousand and one in the school year of 1916-1917, and are earnest, wide-awake, and democratic. A large number of them earned their own way. Its alumni now occupy high positions and will be the future leaders of Idaho in professions, the industrial vocations, and in the building and maintenance of homes.

The four colleges and the central agricultural experiment station are located at Moscow; the main agricultural extension office is located at Boise, and the agricultural sub-stations and demonstration farms at Sandpoint, Clagstone, Moscow, Gooding, and Aberdeen.
