

ARMY Y. M. C. A. CALLS ELDRIDGE

Orders Received to Report to New York Immediately in Sailing Trim

DR. ANGELL IS NEW DEAN
Succeeds to Administrative Duties; Classes Divided Among Faculty

Last Friday Dean Eldridge of the university faculty received a telegram from the Bureau of Personnel of the War Work Council of the Y. M. C. A., New York, calling him to New York for immediate conference with the appointment committee in regard to over seas service. The message stated that everything seemed favorable to appointment, and advised that he come prepared to sail. Nothing was said as to the branch of the Y. M. C. A. work to which he will be assigned, but it will probably be in some of the large base units, in educational or organization work. Since President Lindley was in South Idaho at the time, his departure was postponed until this Wednesday. The battalion was reviewed before him.

His duties as dean of the faculty will be taken by Professor M. F. Angell, and his courses in German will be divided between Miss Helen Patton, who assumes charge of the class in elementary work, Miss Herma Meyers, who takes the advanced work, and Miss Ida Street, who will take the work in Schiller. The first two are present members of the faculty. Miss Street has had a wide teaching experience, both in secondary schools and in the University of Wisconsin.

IDAHO POULTRY JUDGES
WIN FROM W. S. C. TEAM
Ag College Men Again Demonstrate Superiority Over Rivals From Pullman

Idaho won the annual poultry judging contest from Pullman last Tuesday by a score of 1291 to 1194, the victory being the second in two years. The Idaho team was composed of Leon Taylor, E. B. Campbell, Ambrose Johnson and Miss Elsie Martinson. The W. S. C. aggregation was composed of Hubert Spaulding, N. E. Laird, L. G. Edwards and Mrs. J. Bahrenburg. Taylor was high man with a 370 score, followed by Campbell and Spaulding.

WOMAN MADE COUNTY AGENT
Gertrude Denecke, '16, Appointed to Position in Ada County

Gertrude Denecke, a graduate of the university in Home Economics with the class of '16, has been appointed county agent for Ada county. Her headquarters will be in Boise. Before accepting this position, Miss Denecke was instructor in Home Economics in the Burley high school. Her position has been taken by Irene Gould, a member of the present senior class in Home Economics.

The freshman classes in Military Art have now been arranged so that there will be none occurring after 4 o'clock in the afternoon. The periods have been scattered out thru the week so as not to interfere with the basketball games and gym classes. The sophomores have also been arranged in the same way.

SUNDAY SKIING PARTY RESULTS IN ACCIDENT

Slippery Crust and Steep Incline Result in Fall and Serious Injury To Freshman

Fletcher Haynes, a Phi Delta freshman, was injured Sunday afternoon while skiing on a hill behind the university. Young Haynes, who had gone ahead of his comrades, disappeared over the crest of a hill, the crust of which was unusually smooth, and when he did not return his companions went over to investigate matters. When they arrived they found that he had fallen and seriously injured himself. He had apparently fallen on his head and was partially unconscious. He was taken home and Dr. Dodd immediately called. The doctor found that he was suffering from concussion of the brain and partial paralysis of one hand. His condition now, however, is very encouraging and the doctor states that the patient is doing well. He will be able to attend classes within a few days.

Buzzer School Popular
The buzzer school is progressing in fine shape. Thirty-nine have enrolled in it, of which the greater number are university students.

HOOVER TALKS TO COLLEGE MEN

United States Food Administrator Tells of Duties and Responsibilities

To the college men of America I address myself with confidence, a confidence born of unforgettable experience. In the relief of Belgium, most of the actual work of the commission in the occupied territory was done by young American collegians. Each time a call was made for volunteers many more than asked for offered their services. And those that were chosen performed their duties, not only effectively but with a spirit of devotion that made their service beyond praise. They combined idealism and efficiency. It is the combination that moves the world forward.

Today all the young college men of America face a special responsibility and duty. At no time in the world's history has the technically trained mind been at a higher premium. And this need for it and demand on it will continue after the war is over. Hence the young man in college is faced with a serious problem. He must ask himself: Is the immediate need of my country in my present stage of training greater than this need will be later, and when I have acquired a higher training? This is a question the clear answer to which cannot be indicated for all by a single formula, because the young men in college find themselves under varying circumstances. Yet an answer in general terms of some helpfulness may be made.

To the young men, the lower classmen, only beginning their professional training, I say: Keep on with your college work. If the war lasts long you will be needed more later than now; and you will be better qualified to fill the need then. If the war ends soon, there will still be urgent need for your help in the necessary great work of reconstruction and rehabilitation. The more advanced your training, the more mature your judgment, the more valuable you will be. So try to possess yourself in patience and stick to your college work. To the upper classmen, I would say: Hold yourself ready to respond to your country's present need at any moment. Where you see your way clear to make your training useful, do not hesitate to follow the way. But you, too, should remember that every additional month or semester of training will make you a more effective helper to your country in this time of its emergency, ever growing more critical. So be willing and ready to go out, but go in no thoughtless hurry, nor merely to satisfy the natural restlessness of the moment. Finally, to both lower and upper classmen, and to the great army of American college and university graduates, I would say: The country looks to you for justification of the advantages it has given or is now giving you. You are a privileged class. All special privilege brings special responsibility and special duty.

VARSITY MAULS MISSIONARIES TWICE IN SEASON'S FIRST GAMES

Brilliant Team Work Coupled with Close Guarding and Accurate Floor and Foul Line Shooting Prove too Much for Borleske's Men; Scores 52-26 and 42-20

"Hee" Edmundson's young Vandals meted out two well earned trouncings to the veteran "usurpers" of the house of Borleske who hail from Whitman college. Whitman came off second best in both encounters, simply the victim of circumstances, with the comptograph registering the following returns of 52 Idaho, 26 Whitman and the second escapade with 42 Idaho and 20 Whitman. As indicated the first tilt was an eye opener with the "Heckers" displaying a peerless brand of dazzling passing, completed long shots and other fireworks that kept the Missionaries no the defensive as well as the inoffensive. The second jamboree was just a chaser and night cap to the first, with the usual repetition of said long shots and referee Hinderman's whistle after the Idaho scores as per schedule.

The First Game
Idaho started off with a rush, and several inaccurate shots from mid floor as expected, due to their first melee before a large audience. The outcome was apparent from the first with Idaho in the best graces of the critics. The University lads outclassed the Whitman team from the start by virtue of better passing and more accurate shooting, gradually raising the ante until Whitman was forced to concede to the defensive, with "Gus" Clerin as their only offensive unit. Clerin played well, shooting six field goals. The team work on the part of the Vandals was a revelation to the local fans. It would be impossible to pick any Idaho stars because their scores came as the result of fast passing although some sensational long shots were made. Hinderman refereed well in both contests.

The Second Game
The second skirmish was slow and uninteresting, the Idaho men slowed up after the first half, allowing Whitman to besmirch the year book with a few more unnecessary scores. Referee Hinderman caught many un-

der the foul enactment, further augmenting the Whitman ledger with numerous prototypes of the Clerin signature. Clerin again demonstrated his ability as a sharp shooter by subscribing 14 points to the Missionary cause. The return of the two games were exceedingly gratifying to the Idaho dopsters, as Whitman had come with the reputation of being the fastest and best quintet of the east side conference. The fact that two old men and a first string sub of last year were coveting in their line-up caused the local fans to view the Missionary invasion from a lugubrious viewpoint. But the pessimists were soon submerged in an endless procession of baskets, and the two old men and the sub looked more than ever like two old men and a sub. The whole Missionary bunch was so completely bewildered by the Vandals' display of speed that their sea-sick attempts soon suffered cessation. The Idaho supporters were particularly joyful over the fact that every unit of the five can shoot and shoot well. Whitman's vain attempts to put a quietus on the Idaho scoring by smothering Hunter or Moe were quickly dumped by Campbell and Hyde, who displayed a variegated assortment of basket shooting ability. Long shots and short shots were made with equal facility, and the term "well oiled machine" was kicked back into oblivion, as actually incapable of describing the actions of the greedy Vandals. "Perpetual motion" is the only bunch of words which can come anywhere near giving an idea of their play.

Montana This Week.
Jerry Nissen's untamed conglomeration of Montana Grizzlies will furnish the discussion this week for the Vandals' week-end rough-house party. They come amply prepared, and in Captain Slewfoot Blitzen Benz have

(Continued on page four)

L. A. ELLINGTON DIES AT CAMP

Former Idaho Student Succumbs to Pneumonia at Fort Riley After Short Illness

Word was received at the university last Wednesday of the death of L. A. Ellington, a member of the class of 1916. Ellington had been ill but a short time with pneumonia, and news of his death came as a shock to all. He was one of the twenty-three men selected by Lieutenant Felker to represent Idaho at the officers training camp at Fort Riley, and had been there but a week when he contracted the illness resulting in his death.

During his student days Ellington was one of the most popular men on the campus. He was sergeant major of the cadet battalion, and was especially known as a musician. He was a pianist of pronounced ability and appeared often in concerts with the Glee Club and musicales. He was for two years accompanist of Earl K. Humphries, '15, baritone soloist, who died in Seattle last year of pneumonia.

Since his graduation, Ellington had been employed with the Federal Mining and Smelting Company of Wallace, Idaho, chiefly in the capacity of time-keeper and foreman.

He was a member of the local chapter of Beta Theta Pi. In respect to him the fraternity has indefinitely postponed a dance which was to have been held last Saturday.

Lewis On the Road Again
Professor H. T. Lewis will leave January 28 for Wardner-Kellogg to do some work in behalf of the State Defense League. He will go from there to Leadore, Idaho, to officiate at the dedication of a high school at that place.

SPEAKERS BACK FROM MEETINGS

President Lindley and Other Representatives Return From Southern Idaho

A number of representatives of the university were in attendance at the combined Agriculture, Engineering, and Live-stock meeting recently held at Idaho Falls, January 14-9. Those attending from Idaho were President Lindley, F. G. Miller, dean of forestry, J. S. Jones, director of the experiment station, Prof. G. S. Ray, G. S. Wooley, head of the agricultural engineering department, Dean Iddings and Miss Hoover. The meeting was well attended by farmers, engineers, and stockmen from all parts of southern Idaho. In addition to the above scheduled meeting the entire extension division, including all county agents, held a meeting during the week and continued over until Jan. 22, conferring on matters peculiarly pertaining to extension lines of work. The feeling of the visitors attending the meeting at Idaho Falls was very cordial toward the university. Also in connection with the other meetings was held the Annual State Seed Show of which G. S. Ray was judge.

In commenting upon the conference President Lindley stated that a stronger spirit of cooperation was growing up between the people of south Idaho and the university.

In addition to his address before the convention President Lindley spoke at the high schools of Idaho Falls and Rigly, and at the Ricks Academy of Rexburg.

UNIVERSITY NEWS LETTER TAKES NEW FORM

Old Leaflet Style Discarded, and Publication Appears as Four Page Folder

The form of the bi-weekly University News Letter was changed with this last issue, and the old leaflet style has been abandoned for good. The issues will now take the form of a regular newspaper, appearing as a four page folder. The sheet makes a much more attractive appearance when gotten up in this way. The style of the articles has also been "renovated" and have a more newsy flavor in place of the didactic, professoric manner in which they were previously written. The last number contains articles by Professor P. P. Peterson on the importance of nitrogen for Palouse soils, Professor M. A. Willis on the prevention and cure of peach leaf curl, and miscellaneous articles on poultry, livestock and other problems of interest to farmers and stock raisers. The News Letter is issued bi-weekly and is sent free of charge to all desiring it. Names should be sent to Miss Edith Wardwell, Morrill Hall, at the University of Idaho.

GRAPPLERS TO MEET SATURDAY

Wrestling Tournament Will Be Staged at Gymnasium at 3 P. M. January 26

The first of a series of wrestling tournaments which will be staged under the direction of the department of physical education is scheduled for Saturday afternoon when the local grapplers will have at each other. The affair is scheduled for 3 P. M. and the bouts will continue until six. Quite a class has been working out under "Carovitch" Chester, the wrestling instructor, and the stocky tutor feels that his charges are now sufficiently well versed in the ways and means of the mat game to put on a public performance. The bouts will be staged in six minute periods. Each match will consist of three of these periods (with intervals for rest) and the one securing two falls in the allotted time is declared victor. In case of a draw, the decision will be awarded to the most aggressive man.

Those who are billed to appear are Swanstrom, Peck, Plastino, Robinson, Ed and Louie Nettleton, "Tiglah-Pleser", Breneman, Kinney and Rom Kennedy. The different divisions in which the men are divided are heavy, light heavy, middle, welter and light weight.

FOUNDING OF INDIANA OBSERVED AT PULLMAN

Alumni and Former Students of I. U. From U. of I. and W. S. C. Meet, and Celebrate 98th Anniversary
Former Indiana University students now in Moscow, migrated en masse to Pullman last Friday night to celebrate the ninety-eighth anniversary of the founding of their alma mater. They were entertained together with the Washington State College delegation at the home of Prof. F. H. Pickett. Those who went from here were Mrs. E. H. Lindley, Prof. and Mrs. H. B. Reed, Prof. G. M. Miller, O. L. Inman and Ernest K. Lindley.

Meat Class Visits Spokane
Wednesday of last week Doctor Luce and Prof. Hickman made it possible for the class in meats to make a practical and complete inspection of the Armour plant at Spokane. Such a tour is a rare privilege, being granted only to students accompanied by an instructor. Up-to-date machinery and scrupulous methods of sanitation are prevalent in all quarters. This plant has a capacity of two thousand hogs, five hundred sheep and three hundred head of cattle daily. From such an inspection the student gains that practical knowledge necessary to the proper understanding of their technical studies.

Same Here, Too
In population the camps range from 300 to 47,00. It is said that no large army was ever housed so comfortably before. Four of the cantonments situated farthest north have steam heat. The rest have hot air.—Montana "U" Newsletter.

FARMERS' WEEK TO OPEN SOON

Week of January 28 Will Usher in Conclave of Agriculturists and Homemakers

STRONG PROGRAM ANNOUNCED

Authorities in All Branches Secured By Committee to Address Session

The 5th Annual Meeting of the Idaho Farmers and Housekeepers will be held at the University the week of January 28. The meeting will prove to be one of great interest and value to Idaho Farmers and Housekeepers as a large part of the program will be devoted to the discussion of many of the present war time emergency problems, such as food conservation and speeding up of food production. The program for the week is as follows:

- Monday—Poultry.
 - Tuesday—Horticulture.
 - Wednesday—Farm Crops and Soils.
 - Thursday—Dairy.
 - Friday—Animal Husbandry.
 - Saturday—Special Conferences.
- Many authorities have been secured by those in charge, and the talks scheduled are characterized as unusually good.

On the morning of Animal Husbandry Day, Increased Swine Production will be discussed in detail; while in the afternoon W. T. Ritch of Salt Lake City, Utah, Expert for the American Wool Improvement Association, will give an address on "Wool, Its Care and Handling." Mr. Ritch will also lead in the discussion of Important Wool Problems in the Special Wool Conference on Saturday morning. Another address, "The Management of the Farm Flock," by J. L. Chapman, a prominent farmer and sheepman of Asotin, Washington, should be of especial interest to many farmers.

Professor E. B. Woodward, Head of the Dairy Department of Washington State College, will discuss, "More Efficient Dairy Cows" and the topic, "Cooperation as a Factor in Increasing Dairy Profits," will be handled by Mr. W. E. Meyer of the Western Dairy Division. In addition, Mr. H. H. Beier, County Agricultural Agent of Kootenai County, will discuss, "Dairy Rations for Present North Idaho Conditions," a topic which should be of vital interest to all dairymen of this section.

"Bulk Handling of Grain," one of the farmers most pressing problems, will be discussed by C. W. Booth of Nez Perce; while A. E. Wade, County Agricultural Agent of Lewis County, will discuss "Smut Control," as he has worked it out in his county. Among other speakers of interest will be Mr. L. W. Fluharty, Director of Extension in Idaho; Dr. P. P. Peterson and J. C. Wooley of the University faculty.

The Horticultural Department has secured able speakers in Professor A. M. Morse of Washington State College, who will discuss the topic, "The Farmers' Vegetable Garden," and a prominent vegetable gardener, W. S. Shearer, will tell something of his experience in "Growing Special Vegetable Crops for Profit."

Poultry will be discussed by J. R. Terry, Chief of Poultry Husbandry of British Columbia, Canada, in his address, "War Time Problems in Poultry Production in Canada." Other speakers of not will be Mrs. Helen Dow Whitaker, Director of the All-Northwest Egg Laying Contest, and P. R. Moore of the University of Idaho Poultry Department.

The housekeepers will have a very interesting and instructive program each day. Methods of conservation and war time work of various kinds will feature the program of the week. Forenoons are to be taken up by class work with lessons in First Aid and emergencies, knitting, children's club work, remodeling of old garments, and demonstrations of war breads.

Beginning Monday afternoon the meetings will open with invocation by Rev. Perry. Mrs. Lindley will deliver an address of welcome with response by Mrs. L. P. Davis. Dr. Lindley will deliver a lecture on Mental Housekeeping.

Tuesday Rev. Bridge will give a reading and R. F. Bicknell, Federal

AN APPRECIATION

With the departure of Dean Eldridge for service in France, the university loses one of its most able teachers, hardest workers and one of its most loyal backers. Since his coming, he has worked unceasingly for the betterment of Idaho. He has stuck to his post thru the succeeding administration with unwavering loyalty to the school and its ideal of service. Now that he has changed his watchword from "a bigger and better Idaho," to that of a better and more democratic world, the university joins in wishing him success in his new sphere.

PULLMAN AGAIN

Next week Idaho tackles Pullman again in a two-game series. The team having the edge in this series will in all probability win the east side championship. The varsity will be traveling at top speed then, and it will have had its baptism of fire. But the first game is played at Pullman, and it will be the team's first game on an opponent's court. This brings us down to brass tacks.

A hundred Idaho rooters, at that game, yelling for the team, cheering 'em on and fighting with them, may be the deciding factor in the winning of the championship. A victory there will be a sure indication of three more to follow. We can have that victory. All it takes is a little action. Pullman is only nine miles off—a half hours trip, and if a sufficient guarantee of fares could be made, the O. W. R. & N. "Bug" could be chartered, and an Idaho rooting section transported to the Pullman gym. Rates can be secured if enuf enter the party, and the return trip can be made immediately following the game. Reciprocity, whereby Idaho student tickets would be honored at Pullman and W. S. C. student tickets here, could be arranged for, and the cost of the trip thus reduced to cost of the fare.

Nothing will come, however, if nothing is done. Action must be taken and taken at once. The president of the A. S. U. I. should consult the graduate manager immediately and set things up. Idaho has a team of championship calibre this year, and they should have a chance to demonstrate it, but championship or not, it is our team and has a right to our support. Let's see that they get it.

IDAHO SPIRIT

A gratifying feature of the games with Whitman was the attitude shown by the Idaho rooters toward the Whitman team. The biggest factor in the forming of the opinion of other colleges about Idaho, is the treatment accorded their teams when they come here. It is the only direct means they have of judging our student body, and the story the teams carry back to their institutions will be favorable or unfavorable as our attitude is sportsman like or unsportsmanlike. Idaho students can dictate that story, and they should feel gratified that last week it was the right kind of a story. Keep it up.

SENIORS—NOTICE

Seniors desiring teaching positions may list their applications with the U. S. Employment Service, Chicago, Ill., Dr. P. B. Prentiss, Acting Director. This is one of the 85 employment offices operated by the Government, and no charge is made for the service. The branch at Chicago is given over entirely for the benefit of teachers and those in the professional services.

Spread for Seniors

The Junior girls of the Home Ec. Department will serve their annual formal dinner to the "dignified" senior girls of the department. Among the invited guests are Dr. and Mrs. Lindley, Dr. and Mrs. Von Ende and Miss French and the faculty of the department.

President Delivers Baccalaureate President Lindley delivered the baccalaureate address to the January graduating class of Lewis and Clark high school in Spokane last Sunday.

"JAZZ ARTICLES"

With great reluctance do I refer to that Whitman conclave, its simply heartlessness to bring up such an affair but again I am forced to throw some light on the matter. I fear that I am jeopardizing, and liable to arrest for indecent exposure.

Hinderman, the vigorous grid mentor, from Lewis and Clark suffered contusions of the femur or rather the ulna, while refereeing the first fracas. The injury came as the result of undue roughness on the part of "Drom" Campbell, our obstreperous center. "Drom" and Garver, the Whitman tilter, were eager to get the jump in the tossup and when Hindy threw up the sphere, the two worthies automatically catapulted themselves into the air, while the little referee was subjected to their barbarisms. Hinderman also sustained a fractured jaw from the continued whistling after the endless registering of "Vandal" scores.

The Whitman men could not refrain from looking around and trying to locate the ball. This was a factor in summing up the result, for they always found it safely tucked under the referee's arm after it had gone on an uneventful journey down the floor, through the net, to be caught beneath by the nimble Hinderman.

"Blitzen", will U just keep in mind the facts concerning 1918 athletics at Idaho. Rememehr the insistent "Wrecking Crew" that ruined your chances for salvation at Missoula. Well, the present crew of Vandals are just as reliable as the football team or more so.

With great trepidation does my meagre intellect endeavor to apprehend the results of the coming "sessions" with Montana and W. S. C. Alas, a vivid picture of destruction, and pillage wrought by the pusillanimous "Vandal" phantoms like across my vision. The conclusion is very evident.

The seismograph at Gonzaga registered a violent quake in the near proximity on last Friday and Saturday nights. The shocks were not intermittent but continued. Ah! the cause is evident, the dancing class was in progress.

Profanity in Athletics

It has been a custom in Idaho, of long standing and low standing, to give two very unconventional yells during athletic contests: The very commonness of the yells alone should be enough to obliterate them from the category of college cheers. The said sacrileges were of course copied from the W. S. C. farmers, and this in itself is enough to render them obsolete as Idaho yells. Another objectionable feature is that the women are reluctant to join in such halla balooes as HELL YES! and HELL NO! Equal suffrage and chivalry demand that a yell be adopted in which the sect may join without violating their traditions of ladylike decorum. I submit this as an amendment to the constitution of the A. S. U. I., in full confidence that the proper action will be taken.

Yours,
"JAZZ".

The wrestling bout will take form on Saturday. Several lugubrious personalities will compete for Graeco Roman honors. "Ribbon" Bob Peck and "Slender" Carl Swenstrom will clash in gory combat. Peck measures 6 ft. 4 in. from tip to tip with 7 in. girth. "Slender" Karl requires 7 ft. 2 in. of tape to get his linear dimension with a 4 in. girth. "Ribbon" Bob will weigh in at 160 lbs., while "Slender" tips the scratch marked 98. Cigars will be in evidence. The tickets are on sale at 103 Ad. See promoter Leon Taylor for particulars.

BARBED WIRE

Now we know why Fred has such a hard time keeping the ad building warm—there are so many heavy frosts among the faculty.

Not to mention the fresh air cranks.

And the student "assistants."

The height of foolishness—a person with a bald spot getting a "convict clip" haircut.

Simplified Spelling.

Moral Hall
Chemouflage.
Home Hecknomics.
English Litterature *
"Zip" Holiday.
Dietdeadies.
Hyde-gene.
Fizzical Culture.
* Locally.

There is a national Sunday School fraternity called Phi Mu Sigma. If the local churches would only install a few chapters a lot more students would get religion.

Now that the ice has really come, the usual number of co-eds are falling off the front steps.

It is more blessed to catch than be caught—in Barbed Wire.

Our idea of gall—a debater dancing in the "I" special at the Athletic.

If we slam at the rate of 10 people a week, it will take up a year to get to the whole student body.

We will have to increase our capacity.

Or else kill off some of the students.

But we think the semester exams will save us that trouble.

This is enuf for this week.

Pre-Medic Club Meets Thursday

Thursday night the Pre-medic Club will hold its first meeting at the Zeta Chi house. The meeting will be called to order by President Earl B. Smith, at 8 o'clock sharp. After a short business meeting a "get together and get acquainted" evening will be spent. All students registered in the Pre-medic course are eligible to this club.

Fawcett Goes to Seed Market Work

V. P. Fawcett, a graduate from the Agricultural College, class of 1914, has been appointed to a position in the Federal Division of Markets in connection with marketing of seeds and will be located at Spokane, Wash. Mr. Fawcett has for the past three years been the capable Assistant Seed Commissioner of Idaho, working in the Extension Department at Boise, and the new appointment is a well merited promotion.

Why Go to "Idaho"

The choice of a university or college to be attended should be based upon four principal requirements: 1st, a high purpose and broad field of work; 2nd, a competent faculty; 3rd, a sufficient equipment; 4th, a student body of high ideals. The University of Idaho fully satisfies these requirements.

1. Purpose and Field—
Its purpose is to serve the people of Idaho in developing and training students; in advancing the entire State educational system of which it is a part; in assisting toward the solution of economic and social problems; in furnishing expert knowledge in Agriculture, Engineering, Forestry, Mining, Home Economics, Law, and Educational matters not only to students in residence but also to all who desire it throughout the State.

2. Faculty—
The faculty is made up of eighty-three teachers of thorough training and efficiency attained by years of study and experience. They are deeply interested in the progress of each and all under their instruction. They know the State and its conditions and give their best efforts to its development. In addition there are fifteen workers in the agricultural extension division and 15 agricultural county agents.

3. Equipment—
Its equipment is ample. It has a library of over 40,000 volumes, excellent facilities for teaching literature, philosophy, and the social sciences, and well provided laboratories for the natural and applied sciences and for the technologies.

4. Students—
Its students numbered one thousand and nine in the school year of 1916-1917 and were earnest, wide-awake, and democratic. A large number of them earned their own way. Its alumni now occupy high positions and will be the future leaders of Idaho in professions, the industrial vocations, and in the building and maintenance of homes.

The six colleges and the central agricultural experiment station and the cooperative work with the U. S. Bureau of Mines are located at Moscow; the main agricultural extension office is Boise, and the agricultural sub-stations and demonstration farms at Caldwell, Sandpoint, Moscow, and Aberdeen.

The University of Idaho
Moscow, Idaho.

Society Gossip

Delta Gamma Frosh Entertain
 One of the most enjoyable affairs of the season was the treat to which the Pi Alphas invited the Delta Gammas. The affair was in the nature of a surprise and was successfully carried out by the freshmen. The Delta Gammas were invited over to Ridenbaugh Hall where the men assembled also, and dancing was indulged in for a greater part of the evening. The party then went back to the Delta Gamma house where "cats" were served. The living room and dining room were lighted with shaded lights and the color scheme was carried out in the sorority colors. A delicious lunch was served. Those invited were, Miss Esther Thomas, Messrs Steyens, Meeker, Bullock, Denecke, Decker, Thompson, Morris, G. Wood R. Wood, Bistline, Carnahan, Anderson, Rettig, Johnson, Moe, Shrontz, Darling, Romig, Gerlough, McRae, York, Cox, Atwood, Buescher, McDonald, L. Johnson, Schetzle, Langroise, Proctor, Barber and Hammond.

Manilla Reed, Florence Bauer, and Marie Freehafer entertained a group of the Hall girls at an informal masquerade party last Friday evening. Almost every conceivable character was represented from the devil to dashing young gentlemen. The entertainment consisted of dancing and games. The spirit of fun was further carried out by the serving of cider and cookies in kitchen pans. The guests present were Sylvena Pechance, Myrna Kenward, Sarah Lynch, Elsa Voss, Lilly Olson, Evaleen Kerr, Letha Saben, Gertrude Saben, Eulalie Burns, Jean Orr, Eula Badger, Ernestine Brown, Gladys Kircheck.

Zeta Chis Dance
 The Zeta Chis held a house dance Saturday evening. Those present were: Miss Goethals, Messrs Hulbert and Ralph Largent and the Misses Morgan, Taylor, A. Schott, Hiley, Spaulding, Chittenden, McCrae, Erb, Davidson, Chubbuck, Kercheck, Moan, Swanson, Smith, Sund, L. Schott, Chapman and Bucklin.

The Kappa Sigmas gave an informal dancing party last Saturday evening. The guests were the Misses Burns, Carithers, McCallie, McKenna, Kendall, Salter, K. Frantz, Blomquist, Kerr, H. Frantz, Thatcher, Robins, DeMott, Douglass, Armbruster, Richardson, Dewey, Whitter and Strom, and Messrs Parsons, E. Friedman, G. Friedman, Torson, and Sampson. The party was chaperoned by Mr. and Mrs. Cliff Edmundson and Dr. and Mrs. Hills.

Carey-Stapleton
 Mayme Stapleton, ex-'18, was married during the holidays to Gail Carey of Nez Perce.

EXPERIMENT STATION ANNOUNCES BULLETINS
 Series of Publications an Experimentation in Agriculture is Made

The experiment station has recently published several bulletins which should be of service to those interested in agriculture. One, Bulletin No. 99, by Taylor, gives the result of experiments made to determine the right of water to be applied to apple orchards. Besides irrigating data, notes were taken on the keeping qualities of apples raised with varying amounts of water.

Bulletin No. 100, "The Production of Clover Seed in Southern Idaho," by Akern of the Southern Experiment Station, shows the requirements of the clover plant with the regard to irrigation and the principles governing the setting of the seed. It also treats various methods of harvesting and marketing the seed. Another pamphlet by the same author deals with the production of alfalfa seed. These two pamphlets, taken in conjunction, should meet all requirements of farmers along this line.

Bulletin No. 102, "The Management of Dairy Herds," by E. V. Ellington, discusses the various breeds of dairy cattle with regard to their adaptability to conditions found in this state. It also treats the various methods of feeding dairy cattle and the rearing of calves. All the above bulletins are free on request.

Isn't he a ham?
 Yeh—I never sausage a boob—Utah Chronicle.

Gamma Phi Beta entertained informally at tea on Wednesday. Several members of the faculty called.

PERSONAL MENTION

Signia Nu announces the pledging of Richard Westover and Kenneth Anderten, both of Moscow.

Miss Ernestine Dronnan and Miss Gladys Duthie were dinner guests at Sigma Nu Sunday.

Ronald Wood, '17, was the guest of Sigma Nu last week. He goes to North Yakima to take a position with a creamery company located at that place.

Mrs. C. C. Brown and Mrs. J. E. Addy were dinner guests of Delta Gamma Sunday.

"Hee" Edmundson and Coach Bleamaster took lunch at the Kappa Sigma house last Thursday.

Messrs Samms, Blackinger and McDonald spent Saturday evening in Pullman, where they contributed their "jazz" to a pleasurable dancing party given by the Delta club, the occasion being in appreciation of the award of a Phi Delta to the hosts' chapter.

Lieutenant and Mrs. Felker and the Misses Douglas, Johanneson, and McCormick were dinner guests of Alpha Kappa Epsilon Sunday.

Alpha Kappa Epsilon announces the pledging of Vernon Miller and Richard Fox of Nez Perce.

William Bonneville of the class of '17, made a brief visit at the A. K. E. house Sunday to say good bye to his college friends before leaving for the U. S. school for aviation at Berkley.

Mrs. Reed, house-mother of Chi Delta Phi, spent the week-end in Spokane.

Chi Delta Phi announces the pledging of Edith Anderson.

Elsa Voss was a dinner guest of Chi Delta Phi Wednesday.

Battalion News

Last week Commandant Felker received a post card from Maurice Davidson, now at Camp Riley. The ex-cadet major stated that on account of the 5:30 and 9:30 schedule he did not have time to write a letter, but as soon as he has become accustomed to the regulations he will write more in detail of his life there. Among many other requirements, one is that all men learn the infantry drill regulations by heart.

We'd Like to See Those Cars
 To be in a railroad wreck in which eight cars were overturned and the others seriously wounded, and to escape unharmed, was the experience of Prof. J. N. Van der Vries, of the department of mathematics, during the holidays.—Daily Kansan.

W. S. C. PRESIDENT DELIVERS ADDRESS

Doctor E. O. Holland, Pullman Executive, Gives Regular Assembly Talk

Idaho students were especially fortunate last Wednesday in having as assembly speaker Dr. E. O. Holland, president of Washington State College. Dr. Holland spoke of his intimate acquaintance with Dr. Lindley for the last twenty-six years and said that our president had had a great deal to do with his graduation and becoming a college professor. "If you are wise," said Dr. Holland, "you will go to Dr. Lindley's office and consult him about the course you intend to pursue in college."

I wish to speak to you this morning upon a few problems of educational and social unrest that we as young people have to face. We may have the notion that unrest didn't occur before the war. There was always unrest. Dewey said that there should always be unrest. If there is no change we become inclined to worship things of the past.

In a large measure we are no different than the men who lived 1000 B. C. The size of our brain and our intellectual capacity is practically the same. The only difference is the complex environment that we have been thrust into. We have no more equipment, native ability, or instincts than they had. Our civilization has been becoming rapidly complex. For a number of years the immigration to this country has exceeded seven million yearly. It means a great deal to be able to assimilate these people. At one time the immigrants were from northeastern Europe but recently the flow has shifted to southern Europe, which makes the task of assimilation more difficult.

What further offers to the complexity of modern life is our education system. One hundred and fifty years ago there were six cities in America. Our grandparents lived in the country. Boys at that time were masters of thirty or forty trades. But apprenticeship is gone and training is now taken care of outside of the home. The methods of education had to change to fit the economic conditions. Twenty-five years ago a movement towards measuring the scientific methods and ability of teachers was begun. This work contributed materially to the progress of education. Mr. David Stan Jordan has said, "The world stands aside for the man who knows where he is going." A man who excels in his line of work

can receive recognition and find a field for service. It is now possible for the agriculturist and mechanical engineer to serve humanity as well as the doctor and lawyer. In the past people have raised questions and left them unsolved. Today the universities are based on scientific methods whereby they are able to answer these questions. Medicine in thirty years has been most instrumental in making it possible for science to serve.

Germany has leaned very heavily upon her scientific men. Their technical knowledge was made use of in every possible way to the advancement of her armies.

Germany has had the astuteness to put into her schools as instructors, men with military training. They have no discussions about the workings of their government. Their business is only to recognize and support the government as it exists. In the German caste system, one who is lowly born, has about one chance in four thousand of ever rising.

If all people of humble parentage rose no higher, what would have become of Lincoln. We believe that education should carry one along the line for which he is best adapted. We should consider what we can borrow from an autocracy to make us a more efficient, liberty-loving and free people.

The Game

The soldierly pose of Brose Johnson.

Swanstrom hiding behind a stay rod, gazing with elevated eyebrows and lofty mein.

The full moon twinkling from the Sergeant's skypiece.

Sister Gail, perched birdlike, on a chair top, chirping blithely.

POETIC EFFORTS IN DEMAND

Henry Schmittkind, Compiler of College Anthology, Desires Contributions

Poetasters, rhymers and other campus pests with a limerickal (Accent on second syllable) twist to their mental apparatus, are notified that any masterpieces they may have given vent to will find an interested reader in Doctor Henry T. Schmittkind, Ph. D. Dr. Schmittkind is compiling "The College Anthology" for the year 1917-18, and has sent out an S. O. S. to all colleges and universities urging that the geni extant in these various institutions freight their efforts to him with all possible speed. However, this S. O. S. won't begin to compare with the ones he'll send out when he starts to read them. Rules for consideration for admission are legibility of penmanship or typewriting, and a reasonable amount of reasonableness in the de-

velopment of the theme. While this last condition will probably prove a barrier to most of the embryonic Walt Mason's, they should not be discouraged, they can rest assured that their work will ultimately reach its destination, the waste paper basket.

The De Smet Club will hold its meeting on Wednesday of this week at the Kappa Sigma house.

W. W. Langdon, freshman engineer, will not return to school on account of the death of his mother.

Conditions for Flying Service Are Described

College men are needed for the air service.

There, of all places, they are best fitted to serve. They can use the education and the physique that their peculiar advantages have given them; there they can express their own individuality and be their own directing general.

Aerial warfare has become as specialized in the last four months as that on land. It is fought in different strata by different planes. There are the small machines for the air duels; there are the heavier, slower machines for spotting and photography; the cumbersome, awkward machines of great sustaining power for all night bombing trips into the enemy's country. Each requires a different type of man to guide it. Each places before America a different problem in personnel.

It is pretty easy to say what kind of man is not wanted for the air service. First of all a man who has a weak heart or lungs and who might collapse at a high altitude. Nor a man who is timid or cowardly, who might lose his head in an emergency. Nor again a man who is ill-disciplined, unable to obey orders, or to play his assigned role in the great team work of the skies. Every airman must be as nearly perfect as is humanly possible as he is responsible for the lives of thousands of men on the ground beneath him.

This leads to positive qualities. Besides health, besides bravery, besides conscientiousness, an airman must have brains and judgment. Brains because only a trained mind can master flying, radio, aerial photography, codes, reconnaissance and the kindred sciences necessary to this new science. Judgment, because all these powers in the hands of an ill-balanced mind might work a ghastly havoc among the men who are sent forward or held back on an airman's signal.

Such men are not plentiful. They must be sought with the greatest diligence. That they are being so sought, as can best be shown by figures. In a recent examination of applicants at Seattle, of 12 applicants 4 were accepted. The safety of the country as well as of the men themselves demands that the standard maintained be irreproachable.

The one greatest of all places for real airmen is in the colleges. There are the men who having received much, owe much. The proportion of them answering the requirements of the air service should be immeasurably larger than among less favored, less fortunate men.

If America breaks the deadlock of three years through the air, it will largely be the college men who will have the credit of it. Already there is a great fraternity of them in the service, working as they never worked before, in this country, in England, France, Italy and Egypt.

Now is the time, for it will require until next summer for an aspirant starting now to become complete master of the air.

The description of the course through which a man is put before receiving his "wings" will be given next week.

PENN STATE POSTS OFFERS FOR TEACHING FELLOWS

Chance for Seniors in Agriculture, Engineering, Arts, Mining, Science and Home Economics

The following literature has been received from the Pennsylvania State College concerning the opportunities to obtain teaching fellowships there, for the coming school year:

As a preparation for college teaching, six fellowships are offered annually in the Pennsylvania State College of the value of six hundred dollars each to men and women graduates of any college of good standing. In return for the stipend, the holder must render a limited number of hours' service in class-room or laboratory and must make at stated intervals to the dean of the school to which he or she is appointed, reports of progress in such investigation or research as will lead to an advanced degree in this or another institution. One fellowship open to men only is assigned to each of the schools of Agriculture, Engineering, Liberal Arts, Mining, and Natural Science. One fellowship open to women only is assigned to the Department of Home Economics. Selection is made by the faculty of each school prior to May first each year. For application blank, write to the school in which you are most interested, addressing the letter to the Dean of the School in which you are interested at State College, Pa.

"Hec" Edmundson and Aden Hyde attended the basketball game at Pullman Friday night.

Gym Record Goes

Another gym record was smashed last Friday when George Freese, a sophomore pre-med, blew the top off the lung capacity indicator in the physical director's office. The previous record was 380 cubic inches, held by Lee Gregory. The new one is 400 even. The apparatus reached its capacity at that point, and refused to register further. Freese thereby wins a pie, which is the standing offer for the person breaking the lung capacity record.

VARSITY MAULS MISSIONARIES

(Continued from page one.)

the biggest center in civilization. Three other old men will make the journey with Blitzen, but if the Vandals will cut loose their assortment of basketball talent, it is likely that their old men will go back to Missoula older yet. Johnson, the slicker who raised such big lumps of Cain with his opponents last year, will camp at one of the forward positions, and Driscoll, quarterback on the Bear eleven, will undoubtedly perform as his standing mate. With these football huskies tearing around the gym floor, the melee will not probably be run according to Robert's Rules of Order or Hoyle or anybody else. The undefatigable "Heck" however, has a war chest replete with a diversified array of bandages, tape and smelling salts with which to care for all broken limbs, ribs and noses.

Pullman will be the opponents for the week following, and no efforts are being spared to put the Vandals in tip top condition for these two collisions. Pullman in its games with Whitman, displayed a world of football ability and it is rumored that "Heck" is putting the Vandals thru a stiff scrimmage every night, so that they can cope with the situation. With "Bill" Carder in the reserves, and ready to be injected into the campaign whenever the battling gets too strenuous, the local sports are not fearful for the results. Bill isn't troubled with a gentle disposition.

Coaches: Idaho, Edmundson; Whitman, Borleske.

HOOVER TALKS

(Continued from page one.)

Yours is the advantage of the expanded mind and the uplifted spirit. Your knowledge of the conditions and needs of your country, and your understanding of the real meaning of patriotism should be beyond those of the many denied your privilege. Therefore, your response to the call of your country's need should be quicker, more insistent, more persistent and more ready to adapt itself to any form of this need than that of the unprivileged many. You have already responded nobly to the call to the colors. But not all of you can

now march to battle; not all of you should try to, but all who should not or cannot, and all who are sticking to their work of making themselves fitter for their future service can still serve, and serve now. There is very much that you can do right now.

FARMERS WEEK TO OPEN SOON

(Continued from page one)

Food Administrator for Idaho will address the housekeepers.

Miss Mary F. Rausch, head of the U. of W. Economics Department, will give lectures during the week. Among her topics will be Butter and Sugar Substitutes, Meatless and Wheatless Meals; How to Dress With Taste, and Homes in France. On this latter subject she is particularly well fitted to speak for she spent a year in the homes of France just before this war.

Tuesday noon will bring the big annual luncheon for the women at Home Ec. Department and for the men down town.

The Program in full:

The Farmers' Program
Monday, Jan. 28, **POULTRY DAY**, Pren Moore, Chairman.
Registrations.
Address by President Lindley, "Getting Into the Game."
Talks by J. R. Terry, poultry expert from British Columbia, Helen D. Whitaker, head of poultry department at W. S. C., Dean French and Pren Moore.

Tuesday, Jan. 29, **FARM GARDEN DAY**, C. C. Vincent, Chairman.

Talks on vegetable raising, utilization of garden produce, insect control, etc. by Prof. A. C. Burrill, E. R. Bennett, Prof. O. M. Morris of W. S. C.

Wednesday, Jan. 30, **FARM CROPS DAY**, G. S. Ray, Chairman.

Addresses by Director of Extension L. W. Fluharty, Professor J. J. Putnam, Professor P. P. Peterson, "Bill" Booth, and J. C. Wooley.

Thursday, Jan. 31, **DAIRY DAY**, E. F. Goss, Chairman.

Talks on cattle breeding and feeding for highest efficiency by various authorities. Special instruction and demonstration in the manufacture of dairy products and in milk and cream testing, under the direction of E. W. Pritchard.
