

# SPOKANE GAME TO DETERMINE LEADERSHIP

## WASHINGTON AND IDAHO MEET IN CRUCIAL CLASH WEDNESDAY

Northern Pacific Train to Return to Moscow After Classic Contest—Many Students to Take Advantage of Opportunity of College Generation.

### PREMIER HONORS AT STAKE SPECIAL TO CONTEST

#### Gonzaga University Gymnasium Agreed Upon as Best for Both Quintets

Basketball teams of the University of Idaho and the University of Washington, tied for first place in the northern division of the Pacific coast conference, will meet in the new Gonzaga university gymnasium at Spokane Wednesday night at 8 o'clock. The one game will determine the championship of the northern division.

The tie in the northern division resulted from the defeat of the University of Oregon by Washington at Seattle Saturday night, 39 to 27.

Leaders Even Up. With all games on the regular Pacific coast conference schedule played off, Idaho and Washington are tied with records of five games won and three lost, giving each team a percentage of .625.

Idaho and Washington are also even up with each other on the two conference games played this season. Idaho lost to Washington at Seattle in the first conference game by the narrow margin of one point, while the Vandals evened up at Moscow in the second contest, 40 to 26.

Genuine Basketball Classic. The game will be a genuine basketball classic when the league leaders meet for the championship of the northern division and the right to meet the University of California, winners of the southern division of the conference. The game will be a battle from start to finish, and a superb exhibition of basketball from every standpoint.

## "BLUE BUCKET" TAKES PLACE OF "NUGGET"

STUDENT OPINION CHANGES MAGAZINE NAME.

Editors Believe New Name Will Prove More Fitting For Idaho Publication.

A popular move for reconsideration has resulted in the substitution of "The Blue Bucket" for "The Nugget," as the name of the magazine about to be published at the university. The change of name was accomplished late last week.

"The Blue Bucket" was selected because it was deemed much more distinctive than the one previously chosen. Observations subsequent to the first choice led the management of the magazine to the conclusion that the new title would be much more appropriate than the former.

It was found on investigation that at least one high school of the state published an annual with the name "Nugget" and that the name itself had lost a great deal of its connotative power in regard to the early historical episodes of Idaho.

Another argument advanced in favor of the new name is that "The Blue Bucket" smacks of the spirit of mystery and elusiveness to a much greater extent. In fact, it is said to be indicative of that something that lies "just over the mountain."

Name Very Connotative. "The Blue Bucket" stands out in the early days of Idaho life in several ways. For one thing, it is connected with a legend of the early days.

(Continued on page two.)

#### EQUIPMENT LEAVES MOSCOW AT 3:30, RUNNING ON LIMITED 3-HOUR SCHEDULE—LEAVE AT 11 O'CLOCK AFTER GAME.

Plans are complete for the carrying of University of Idaho students to the Idaho-Washington basketball game at Spokane Wednesday night. The Northern Pacific special train will leave Moscow Wednesday afternoon at 3:30 and will arrive in Spokane at 6:30. The special will leave Moscow at 2 o'clock. The schedule will be a fast three hour run with no stops.

A rate of a fare and a half will be effective for the students provided there are more than 100. As a number of Moscow people have signified a desire to see the game it is believed that the special rate will be obtained.

The fare will be \$4.50 for the round trip. The reserved seats including general admission to the game will be \$1.50.

Two Hundred on Train. According to estimates made last Monday night more than 200 will be on board the special when the train pulls out of Moscow tomorrow afternoon.

Through a misinterpretation of the interstate commerce commission ruling in reference to special rates it was announced that the rates would be for a fare and a third. When a check was made on the federal commission's ruling it was discovered that the railroad company could only grant a rate of a fare and a half.

The Idaho Pep band will make the trip to Spokane on the train and the members of the basketball team will return with the Idaho supporters. The special train will be a feature in itself.

Upham Sanctions Train. Through the special schedule the students will be able to obtain dinner in Spokane before the game and the departure of the train at 11 o'clock will give all students plenty of time to catch the returning special. President.

(Continued on page three.)

## U.W. MAT TOURNAMENT

The University of Washington wrestling team will meet the Vandal mat men in the home arena March 5. The strength of the Husky aggregation is beyond question, and the mettle of the home team will be put to a supreme test in this contest.

Little direct information as to the individual men on the Washington team is known, but the prowess of the visitors may be judged from the fact that they took the University of Oregon into camp with a score of 28 to 0. Such a victory is unusual in the annals of intercollegiate wrestling, and would point to the fact that the Huskies are to be respected and feared.

Brown vs. Grimm. Efforts are being made to schedule a special match for this meet between "Babe" Brown of Idaho and "Big Bill" Grimm of Washington, for the evening. If arrangements are completed local fans will have the opportunity of witnessing a bout between the two best big men of the northwestern institutions.

Brown is easily premier among Idaho wrestlers, with Grimm as his only possible rival. Grimm is one of the best known athletes on the coast.

## MAGAZINE CAMPAIGN PLANNED THIS WEEK

TO INTEREST STUDENTS IN "THE BLUE BUCKET"

Representatives to Present Data to Each Campus Group—Strictly Student Publication.

An extensive subscription campaign for "The Blue Bucket," Idaho's coming literary publication will take place on the campus this week. It is hoped by those in charge to secure enough subscriptions to enable the staff to place before the students, three copies of this magazine. Having thus subjected to the student body, an example of what really can be accomplished it is felt that all future issues will be in great demand.

In the near future a representative will visit each group on the campus and present to them all the data concerning "The Blue Bucket." The purpose as well as the legendary significance of the name of the magazine will be fully explained to each group. At this time, everyone will be given an opportunity to express his opinion concerning the magazine.

(Continued on page three.)

## KIMMEL AND GREGORY WITHDRAW FROM RACE

Winton Arnold, present acting business manager of The Argonaut, will be officially named for that position for the balance of the semester through the withdrawal of Rex Kimmel and Lee Gregory, nominated by the executive committee for the business managership. Mr. Kimmel and Mr. Gregory withdrew their names from the ballot Monday. The withdrawal leaves Mr. Arnold as the lone nominee for the position and his election is naturally assured.

Primary elections for manager of the girls' glee club and manager of women's athletics will be held Wednesday from 10 o'clock in the morning until 3 o'clock in the afternoon.

Demerise Ebbley, Unita Lipps, and Irene Starr are the nominees for manager of the girls' glee club, and Cleyts Gossett, Eugenia Cruzen, and Margaret Mimms are the nominees for women's athletic manager.

The nominations for the two new women's departments were made by the women's league at their last meeting.

(Continued on page three.)

## Overcrowding Is Seen By Idaho Alumnus

Overcrowded conditions due to lack of room for the various departments is seriously hampering the work which the University of Idaho is giving the young people of the state in collegiate education and training, according to a statement by Claude W. Gibson as carried by The Evening Capital News of Boise. Mr. Gibson is one of Idaho's most prominent alumni and as an undergraduate was one of the first editors of The Argonaut.

Mr. Gibson was called to Spokane on business and hearing of certain conditions prevailing at the university, he visited the university and made an inspection for himself. He said he found badly crowded conditions, although the students themselves, the faculty, and the citizens of northern Idaho are doing creditable work in trying to relieve them.

Impressions of Alumnus. "A few days ago," said Mr. Gibson, "I had occasion to make a business trip to Spokane and northern Idaho, stopping off at Moscow to visit my alma mater, the University of Idaho. The campus appeared more beautiful than ever, and the general excellent

## A.S.U.I. HANDBOOKS PUBLISHED IN MARCH

BOOKLET TO BE HANDY UNIVERSITY ALMANAC.

Forty-Eight Pages to Contain General Information—Constitution to be Feature.

The publication of a University of Idaho handbook is being undertaken by the A.S.U.I. in accordance with the recent decision of that body to sponsor such an enterprise, and will probably be ready for distribution by the last of March, according to a statement issued Monday by Lynn Hersey, A.S.U.I. president.

Tentative plans for the publication have been made already and it is the expectation of President Hersey to have the material in the hands of the printers by about March 15.

Forty-Eight Page Book. The book will contain approximately 48 pages of general and specific information about the university and the relationship of students to their Alma Mater and the various campus groups and activities. It is to be

(Continued on page three.)

## IDAHO WRESTLERS WIN TOURNEY AT CALDWELL

Members of the University of Idaho wrestling team returned from Caldwell Monday after having taken the College of Idaho mat men to a 40 to 16 cleaning at Caldwell Saturday night. The College of Idaho grapplers were pretty much outclassed throughout in practically every division.

Eighty, Idaho 125 pound man, lost his first bout by a fall to Bryant of the College of Idaho, but the next two bouts were draws. Phillip, Idaho, tossed his opponent in the 135 pound class in two minutes and 35 seconds. The College of Idaho man was unable to continue as a result of the fall.

Molyneux, Idaho's 145 pound wrestler, although behind his opponent an don the aggressive most of the time, was awarded a draw. In the 158 pound class Frank Kinnison of Idaho had no difficulty in winning his match in two straight falls. In the light heavy-weight class Johnnie Vesser and Jackson, College of Idaho, furnished a spectacular match which ended in a draw.

## VANDALS' WIN FROM COUGARS IN TWO FAST GAME SERIES

W. S. C. Team Meets Defeat Friday and Saturday at Pullman and Moscow—Both Contests Won by Four Point Leads—Conference Standings Not Affected.

### PULLMAN GAME FAST MAC USES NEW COMBINATION

#### UNIVERSITY BASKETEERS LEAD FIRST HALF 17-6 BUT RALLY CUTS DOWN POINT DIFFERENCE—CLEVER DEFENSIVE

The W.S.C. basketball team fell before the superior teamwork of the championship-bound Vandals last Friday night at Pullman. The feature of the game was the close checking of both teams and especially of the Idaho team. The game was fairly fast and in the second half was inclined to be a bit rough. When the game ended the score-board showed Idaho on the long end of a 24-20 score, but at the end of the first half the score stood at 17-6 in favor of the Vandals.

Idaho took the tip-off, and the game started with a bang. For a while the defense on both sides was close but after a period of short passes and heady teamwork Edwards broke through and made the first counter of the game. W.S.C. was forced to depend on long shots and they were having hard luck with them. Friel and Kelso each dropped in a long one but that was the extent of the Cougar scoring from the field.

Vandals County Heavily. But the Idaho men had little difficulty in scoring, despite the brilliant defense put up by the Cougars. Time after time the Vandals would break through and take a shot at the old basket until when the first half ended they had earned a total of 17 points. For the last ten minutes of the first half the Cougars didn't have one good open shot at their basket, due to the wonderful defense of the Idaho team. All the Idaho players were getting their share of the counters and they all helped on the defense.

In the second half the Cougars staged a wonderful comeback but were unable to overcome the big lead that the Vandals had piled up in the first half. The W.S.C. men were shooting from any place on the floor and were making a good share of them count. With seven minutes to play the score stood 20-17 in favor

(Continued on page three.)

## INDOOR BALL SEASON

The intra-mural indoor baseball series opened Saturday afternoon, instead of Friday, as planned. It was found necessary to postpone Friday afternoon's games because of interference with classes. It was announced by Coach Mathews that no more Friday afternoon games would be scheduled until lights could be provided in Lewis Court.

Results of Saturday's games are as follows: S.A.E. won from the Elwetats, 25 to 21; Lindley hall defeated Phi Alpha Psi, 17 to 12; Kappa Sigma ran up a score of 56 to 30 against Phi Delta Theta; and Beta Theta Pi forfeited to Phi Gamma Delta.

Games Again Saturday. The games scheduled for Friday afternoon will be played off Saturday next, together with several more games which will be scheduled later. The contesting teams were somewhat handicapped by limited playing space in Lewis court, batted ball having an elusive habit of playing hide and seek among the rafters, while fielders waited fretfully beneath, hoping against hope to be able to check the speeding base runners. This fact had much to do with large scores run up.

#### Bohler's Men Tie Score 26-26 in Second Half With Long Shots

The game Saturday night between the University of Idaho and W.S.C., played on the Idaho floor, was a repetition of the game at Pullman on Friday night. The play was a bit faster in Saturday night's game and the defense on both teams was not as tight as in the previous game. The first half ended with the Idaho team on the long end of a 20-12 score but when the game ended the Cougars were only four points behind, the score being 30-26.

Coach MacMillan started the game with a new combination which worked effectively. "Alarm Clock" Keane was playing center and he got the tip-off practically every time. After he got the first tip-off the ball was lost to Idaho and in about two shakes Kelso of W.S.C. dropped one in from the sidelines. After a nice exhibition of teamwork Al Fox made a dandy pass to Bill Gartin who registered two points for Idaho. The play was fast and both teams were scrapping hard. Friel made a dandy shot for W.S.C. and then Al chalked up another good one for Idaho. Then "Telly," the "Terrible Swede," took the ball out of Schroder's hands and shot a good one. Al came right back and swished a fast one through the net for another two points and the score stood 9-4 at the end of the first ten minutes of play.

Idaho Leads Half. Loomis was substituted for Schroder. Friel dribbled the length of the floor and shot a difficult basket. Then

(Continued on page two.)

## IDAHO FRESHMEN WIN FROM SPOKANE TEAM

UNIVERSITY YEARLINGS STAGE SECOND HALF COMEBACK.

Coach Hunter's Team Works as Well Oiled Machine—Talbot High Point Man.

Staging a comeback the second half, the University of Idaho freshmen defeated the Spokane university five at Spokane Saturday evening by the score of 25 to 23. Feeling ran high in the contest owing to the defeat administered the Spokane team earlier in the season by the yearlings. This enmity developed the fracas into a rough and tumble affair. The game was played as a preliminary to the finals of the Spokane Valley high school basketball tournament.

Talbot, the yearling rangy center, was high point man of the game, converting one field goal and 11 out of 16 from the foul line for a total of 13 points. Nelson at floor guard, besides being a remarkable factor in the floor work of the squad shot three pretty goals from the field. Cotter, Stevens and Rowe, while not figuring in the scoring played excellent floor games, passed well and guarded their men consistently. Pintler and McHenry were the chief source of worry to the Idaho quintet. Both men proved dangerous around the basket and worked the ball consistently down the floor.

Fresh Overcome Lead. The yearlings in the initial period seemed to be lost on the small floor. Their team work was rugged, but the

(Continued on page three.)

# RESTRICTION NEEDED SAYS U. OF I. NURSE

### OBSERVATION OF RULES URGED BY MISS ANDREWS.

Visiting Hours Set From 5 p.m. to 8 p.m. and Sunday 3 p.m. to 6 p.m.

The University of Idaho infirmary is for the use of the students but a stricter observation of the necessary infirmary rules and particularly the rule in reference to clinic hours has been urged by Miss June Andrews, University nurse. The rules are designed for the best interests of the students in that their observance will bring about greater efficiency.

Undergraduates are urged by Miss Andrews to make as much use of the infirmary as is necessary, in that she would rather have the students come in for medical help at all hours than not at all. In order to keep within the budget allowed the infirmary and to make up a deficit of last year the infirmary rules, designed to bring about greater efficiency at less expense, are necessary.

**Calls by Appointment.**  
Clinic hours are from 8:30 a.m. to 10:30 a.m. and from 4 to 6 o'clock in the afternoon. Calls outside these hours must be arranged for by appointment. The clinic hour rule is violated consistently by students who keep dropping into the infirmary at all hours of the day. Through the setting of the clinic hours it is possible for Miss Andrews to take charge of the regular infirmary work and to look after the courses offered in nursing.

If the clinic hours were not fixed it would be necessary to employ another nurse. Students may make special appointments by calling Miss Andrews at phone 252.

House patients are admitted between the hours 8 a.m. and 8 p.m. only. Serious emergencies may be admitted, by special permission, at other times. There has been a tendency on the part of some students, Miss Andrews said, to wait until evening to enter the infirmary when immediate attention at the infirmary will result in faster recoveries.

Men do not visit women house patients in the infirmary, nor are girls permitted to call on men who are patients there.

Visiting hours are from 5 p.m. to 8 p.m. on school days and from 3 p.m. to 6 p.m. on Sundays and holidays. The visiting hour rule is becoming more generally observed. Students are realizing that visits, except at certain hours, are detrimental to the welfare of the patients and that visits break up the routine work of the infirmary.

Board for house patients will be \$1.25 a day. However, a discount of twenty-five cents per day will be allowed all patients who pay their bills before the first day of the ensuing month.

All empty medicine bottles should be returned promptly to the infirmary.

## 36 IDAHO UNDERGRADUATES FORMER CLUB MEMBERS

Thirty-six students have been found in the university, who have been members of boys' and girls' clubs conducted under the auspices of the extension divisions of Idaho and other states. Practically all the students were members of Idaho clubs.

District Club Leader H. A. Stone is confident the roll will number more than 40 if all the former club members are found, and he is anxious to have the list completed before March 1. Names may be signed up on notices posted on the bulletin boards in the Administration building and Morrill hall, or they may be telephoned to the club leader's office, phone 189-J.

Names now appearing on the list are those of George Tucker, Calvin Pease, Edwin Weick, Frank Schuetz, Harold Steele, Elwin Scheyer, Lorne Wilson, Thomas Speedy, Bryan Bunday, Clarence Fales, Jake Matter, Norris Atwood, H. W. Thulin, Howard Martin, Harriet Swart, Mabel Griffith, Wesley Calkins, Neil Derrick, Arlie Parkins, E. F. Brinkman, Cecil R. Tulley, Mayne W. Biven, Clytes Gossett, Martha Ramsey, Edith Beebe, Harold York, Muriel Tuttle, Ruby Tuttle, Curtis Talbot, Rex A. Pickering, Kenneth Hunter, Eugenia Cruzon, Gladys Allen, Vada Allen, Ella LaRue, and Dorothy Bates.

Sunday dinner guests of Kappa Alpha Theta were Mrs. White, Mrs. Basso, Mrs. Hoagland and Mrs. Monroe.

## ANNOUNCEMENTS

Now that spring is opening up there will be more or less work coming in to the employment office and Ted Turner would like to have all persons desiring work to leave a new schedule card with him at the office in the University Hut. Students who do not really want to work have been advised not to bother about handing in a card.

The junior class will meet in room 316 of the Administration building Tuesday afternoon at 4 o'clock. There will be a discussion of the date for the Junior Prom and other business, according to Lynn Rogers, president of the class.

## ALUMNI

Donald DuSaut, Editor.

Major Herbert C. Fooks, '16, was presented the Belgian Croix de Guerre with palms by Major General Muir, on behalf of the Belgian government at the headquarters of the Third Army corps area on February 5, 1923.

Major Fooks graduated from the University of Idaho with an LL.B. degree, from St. Johns College, Annapolis, with A.B. and A.M. degrees, and from George Washington University with a Master of Laws degree.

Following is an article from an eastern paper giving his service record during the late war:

"Major Herbert C. Fooks entered military service from Maryland, as second lieutenant in infantry. He served with the 16th infantry in Nebraska, Alaska, California, Mexico and France with the 145th infantry, 37th division in Flanders. On detached service he was professor of military science and tactics at the University of Idaho for three years and on duty in the judge advocates general office in Washington D.C., for two years.

He was retired from active duty for gunshot wounds received in action and awarded the distinguished service cross for extraordinary heroism in action near Eynne Belgium, November 4, 1918, as follows: Although severely wounded and his jaw shattered by a machine gun bullet, he refused to be evacuated, administered first aid to himself and continued to fearlessly direct his battalion during a strong counter attack. The personal example of this officer was a vital factor in the success of the operation.

From the home economics department of the university have come some alumni who are now dietitians. Among them are:

Dorothy Grace Ellis, '15. On leaving the university Miss Ellis held the position of assistant home economics instructor at the Lewiston State Normal in 1916-17 and instructor of home economics in the Washington State Normal school of Ellensburg, Wash. from 1917-19. She spent one summer as dietitian at the Y.W.C.A. summer camp at West Poland, Maine. Miss Ellis also held the position as dietitian at the Y.W.C.A. Industrial club at New Orleans, La., later coming to Boise as director of the Y.W.C.A. cafeteria at that place. In the summer of 1922 she resigned this position to become state supervisor of home economics in Idaho.

Volma Violet Spaulding, '18. Miss Spaulding completed the student dietetic course at the University of California hospital in San Francisco in March, 1921. She taught home economics in the Emmett and Caldwell high schools and then went to the University of California hospital where she was nutrition cook for the nurses of the hospital. Miss Spaulding is now assistant dietitian at the Potter Clinic at Santa Barbara, Calif.

## SCHOOLBOARDS DEMAND "U" TRAINED TEACHERS

Evidence that university trained teachers are in demand in Idaho is furnished by the number of requests for teachers that are being received by Dean J. F. Messenger of the school of education.

Progressive school boards throughout the state are beginning to hire their teachers for the coming year, although the majority of schools will not elect until later. Dean Messenger is now preparing a list of available teachers in expectation of an increased demand in March and April.

Candidates for teaching positions are now registering with the appointment committee the subjects they are prepared to teach and the kind of positions they desire. Applicants for teaching certificates, who have done the required work, are recommended for certification to the state superintendent by the school of education; but all certificates are issued from the superintendent's office.

## IDAHO FACULTY MEN SPEAK FOR FARMERS

### PROFESSORS ADVOCATE DAIRY- ING AND POULTRY RAISING

Atkeson and Parkhurst Attend University Extension Division Meeting in Lewiston Orchards.

Prof. F. W. Atkeson of the dairy husbandry department and Prof. R. T. Parkhurst of the poultry department attended an extension meeting of the Lewiston orchard farmers in the interest of dairying and poultry raising the latter part of last week.

The meeting was arranged by County Agent W. W. Skuse, and was one of a series of meetings which have been held through the winter on agricultural questions. Mr. Atkeson talked on dairy cattle farming for the orchards and Mr. Parkhurst spoke on poultry production for that district. Mr. Atkeson stated that the farmers in the section, even such a specialized district as it is, are turning toward diversified farming. Although nearly all of the land is in fruit trees, berries or garden truck, the farmers are beginning to realize the necessity of having some cash crop that they can depend on throughout the year. They are also realizing that the time will soon be at hand when they will have to find some means of fertilizing their tracts if they intend to keep up production.

### To Develop Dairying.

Dairying will always be developed in a limited way in this section as it is necessary to buy practically all their concentrated feeds and hay on the outside. They are able, however, to grow unlimited amounts of legumes and by using their cover crops for feed instead of green fertilizer, the production will be possible.

About 60 people attended the meeting, and many questions were asked on both topics showing the keen interest that is being developed in these two agricultural branches which are practically new in that section.

## SPEAKER TO TELL STORY OF IDAHO'S GOLD RUSH

Frontier life in the early gold rush into Idaho years ago will feature the talk on placer mining in the early days, to be given in assembly Wednesday by F. E. Smith, attorney of Orofino, and president of the North Idaho Chamber of Commerce.

Mr. Smith has a wealth of material on the picturesque days of the gold rush, and was a close and personal friend of Judge Israel B. Cowen, who died last year, pioneer of the Pierce mining district and thought to be the first probate judge in northern Idaho. At Judge Cowen's death Mr. Smith came into possession of a number of valuable letters and documents on Idaho's early history, and he has donated a large part of them to the university library to aid in the researches being carried on along that line.

In 1838 gold was found in Colorado and a few years later in the Clearwater country in Idaho. The gold seekers who had come into California and into Colorado swarmed into central Idaho. The life and methods of those days were intensely dramatic. Their existence was strenuous and dangerous. There was little law, and no mining law at all at first. Mr. Smith, who is a keen enthusiast on Idaho's history, is familiar with the conditions as they existed then. He has gathered much material relating to it, and will be able to give a vivid description of those times.

Edward Otis Smith, his son, is now attending the college of law.

### Officials Named.

C. E. "Buck" Hunter of Moscow and Woodward of Tacoma were agreed upon as officials by the Idaho and Washington athletic heads on Sunday. Hunter is well known as the most competent and fairest basketball referee in this section.

Woodward is in charge of basketball at Tacoma high school. He has been officiating at a number of the games on the coast this season.

The question as to which of the two men will referee and umpire will be determined the night of the game.

## OVERCROWDING SEEN

BY U. I. ALUMNS.

(Continued from page one)

being a member of the state board of education who has ever been connected with any of the educational institutions of this state, either as president, member of board, instructor or student. Although the spokesman says that I am ineligible thus to ever represent the university on the state

board of education simply because I happen to be a graduate of the university, no law they make can prevent me from giving to the public the direct need of the university, and state the deplorable conditions resulting from the penurious propensities of the appropriation bodies. I will do so very briefly.

### All Classes Crowded.

The administration building was designed, intended and built for offices, class rooms and library but to my astonishment I found the botany zoology and physics laboratories installed there, with the result that classes and offices have been crowded out of the building, and others crowded together causing much confusion. But there is no science building or other place for these laboratories, unless it be in the all-outdoors with the sunny or starry dome a roof. As an example of the crowded conditions, class rooms for 30 students have 50 crowded in, those built for 50 have 80 and so on, making the use of chairs in the aisles and everywhere necessary whereas desks are necessary to properly take notes of lectures. And so it is with various laboratories. For example, the chemical laboratory was built for 191 students and I have reliable data showing that 286 are crowded in; in zoology 130 use the space for 90, and the space for 48 in psychology is used by 200, and 80 use laboratories in botany designed for 64, and so on. The philosophy class room is so crowded that some of the students occupy a small room at the back of the professor and out of his sight. It is most fortunate that students can hear around a corner even though they cannot see around it. In many instances the halls are partitioned off to make offices for the professors. There are three of such hall-offices each occupied by three instructors. Imagine three professors in one office 12 by 12 feet, each conferring with a student about his studies. In one instance an entire class must pass through one of these hall-offices to get to and from the class room. The familiar 'desk room' in our downtown offices has lost its exclusiveness. A freshman English class is held away over in the dairy building, with the dairy machinery as accompaniment, and a history class (others too) has to go over to the engineering building to recite on the events of the world, stimulated by the chemical fumes and gases from one department of the chemical laboratories improperly installed there because there is no other place to put it. The military science department, added by part of the hundreds of thousands of dollars donated to the university every year by the United States government, is crowded out and over to the old gymnasium. This is the place where one class of 150 girls are compelled to take their exercises and have only four showers in a room 12 by 12 feet. The boys' physical education quarters are located in this gym, the only one on the campus, and are just as crowded in certain respects. The library is in the administration building and many students have to stand and use window sills. A noted educator, not connected with the university tried several times to get a seat in the library, but without success.

### Gases and Fumes.

Likewise, the engineering building was not intended or designed for laboratories, but here we find the chemical laboratories, except the agricultural laboratories. Naturally the necessary hoods, conduits and ventilating means to dispose of the gases are absent, with the result that the gases and fumes reach all parts of the building to be breathed by the students of the many classes that are held there. No wonder that boy said the gases made him sick!

Also, the expensive engineering instruments are being seriously damaged throughout the engineering building by the erosive gases and oxidizing vapors from the chemicals. Some of these days somebody will want to know why other instruments must be purchased! The chemical laboratories should not be in the engineering or any other building not especially designed and built for them. The university has no such building. I might say also that the general crowded condition of the entire university prevails in this building. Some classes must be held at night with hours from 7 to 10 o'clock.

### Buildings Overcrowded.

The agricultural building is overcrowded. The entire school of forestry, so well known throughout the country, is crowded into one-half of one floor of this building. Here also we find the agricultural chemical laboratories. As stated above in reference to the other chemical laboratories, the chemical laboratories should be in a separate, specially constructed science building, but that cannot be done because there is no such building. If for no other reason, economy and efficiency would be pro-

moted by installing the laboratories at all designed or constructed for the laboratories, as I have stated. As I have also said, a new properly designed science building would relieve the entire crowded condition by taking the laboratories and certain other classes from the other excellent buildings, except the physical education departments would not be sufficiently relieved but could get along for the present in some way.

## A Peep Into FASHION'S MIRROR for Spring

That's what a visit to our women's wear section is.

**COATS  
DRESSES  
THREE-PIECE SUITS**

Millinery. Beautiful new fabrics. Approved advance Styles. Exclusive models. Surprisingly inexpensive
