UNIVERSITY ARGONAUT, FRIDAY, FEBRUARY 8, 1924

NUMBER 35

IDAHO CO-EDS LOSE DEBATE AT WHITMAN

Affirmative Upheld By Bess Savage And Louisa Martin

Whitman College won the decision in the co-ed debate Wednesday night by a single point. The question debated was: "Resolved: That the United States should enter the World Court under the Harding Plan." The debaters on the affirmative team from Idaho were Misses Louisa Martin and Bessie Savage, and on the negative team, Misses Fern Coble and Fern Clark.

Dr. George Morey Miller presided as Chairman, introducing the speakers. The judges were Professors Todd and Woody of W. S. C., and E. D. Lewis, of the Lewiston Normal.

The debate opened with the affirmative. Miss Louisa Martin being the first speaker. Her main arguments were that the World Court must be made a permanent institution in order to bring about universal peace, and she gave proof that it is possible to establish such an arbitrary body that would bring about such a result.

MISS CLARKE SPEAKS

The first speaker on the negative was Miss Fern Clark. Her most important argument against the World Court was that its provisions did not strike at the cause of war and international troubles, and she claimed that the world is too large a jurisdiction to insure the perfect functioning of the court.

Miss Bessie Savage closed the affirmative side of the question. She bore proof of her colleague's statements, and showed that such an institution as a World Court is the most logical plan whereby public opinion may play a part in world affairs, resulting in the abolishment of the old idea that "might makes right."

POLICY OF ISOLATION

The last speaker, Miss Fern Coble, showed that the United States could accomplish more by maintaining its policy of isolation and providing other means of help which would not endanger such policies as our Monroe doctrine, and that we would remain immune from the present European fever.

TEAMS WELL MATCHED

The speakers on both teams were well qualified, and quite equally well matched. The speeches of the Idaho team showed that their material was probably better organized, but they were not quite as successful in their delivery as their opponents.

Inspires Marksmen Of Feminine Team

With the stool from her dressing table in one hand and a flat iron in the other, the "sweet young thing"—otherwise known as the "future champion sharpshooter," stood taking her daily arm strengthening exercises.

"Ninety-seven, 98, 99, 100, there! I've done it," she gasped with her last breath. For now Captain Lloyd's requirement, of exercising the arms with a six pound weight, had been filled, and she was eligible for the rifle team.

Her less muscular sisters marvelled at this remarkable display of physical prowess, gritted their teeth in grim determination and immediately set about to acquire a "Samson arm," with the aid of brooms, books, hunting boots—in fact anything that even hinted at being heavy.

Captain Lloyd, of the Military department, said, "Girls shoot as well as men, in all positions, except standing and this is due to lack of strength in the arm muscles."

Therefore, at least 72 Idaho girls will endeavor to overcome this weakness and will probably prove to be better marksmen than the sterner sex—who knows?

CURTAIN TO PRESENT "THE DOVER ROAD"

Three-Act Comedy Will Be Shown Tuesday at Guild Hall, Thursday at U Hut

On Tuesday evening at the Guild Hall and on Thursday evening at the University hut the Curtain will present a reading of "The Dover Road," by A. A. Milne, author of "Mr. Pym Passes By".

"The Dover Road" is a comedy in three acts and is concerned with the adventures of two runaway couples who have taken the Dover road from London to the channel fort that leads to France.

THE CAST

The Cast will be:
Mr. Latimer John H. Cushman
Leonard J. Stanton McLaughlin
Anne Pearl Stalker
Nicholas Talbot Jennings
Eustacia Camille McDaniels
Dominic Everett Erickson
The Staff Louisa Martin
Pauline Pence
Vivian Kimbrough
Sidney Yaeger

The admission fee will be the same as that charged for the Little Theatre plays.

Require Application For Graduate Study

Students desiring partial enrollment in graduate study during their last semester in the university are asked to pay particular attention to the following rule that has been put in force:

"Seniors who desire to do a certain amount of graduate work during their last semester in the university will be required to make application to the Committee in advance and may be counted as in graduate residence, if a majority of their credits are of graduate character, provided they have already satisfied the undergraduate residence requirement."

All matters pertaining to graduate study are under the direction of Dr. J. E. Wodsdalek, head of the department of zoology and entomology.

"Gem Mountains" Sales Increased This Week

Sales of the 1924 Gem of the Mountains have materially increased in the last few days, according to a report given out by the business staff of the book. This is undoubtedly the result of the announcement that only as many copies will be printed as are ordered. However, for the benefit of those who were unable to pay for their annual at the time of registration, about 75 copies have been held over which may be ordered from the business staff at any time. Those who still desire a book will find it best to attend to the matter immediately because they are being put out upon a "first come, first served" basis.

Present prospects for a good annual seem to be of such a material nature that the University of Idaho has seen fit to order 100 copies for its own disposal.

Annual Military Ball Scheduled this Month

The Military ball, the thirtieth annual event of its kind, will probably be held on Saturday, February 23, according to present plans of the committee in charge.

The dance will be formal, following the custom of previous years, and tickets will be \$1.50. The gymnasium will be decorated appropriately for the occasion, and the best music obtainable will be procured.

GRADUATE GETS COMMISSION

W. S. Briscoe, who was graduated last year from Idaho with a B. A. degree in Economics has been notified of his appointment as a second lieutenant in the regular army. He is at present acting as principal of the Kellogg high school.

FARM LIFE INSTITUTE VISITS IDAHO TOWNS

President Upham and Four Of Faculty Appear On Program

Eight important farming centers of south Idaho are being visited this month by the university farm life institute which includes a two or three day program in each town on the circuit, consisting of illustrated lectures on prominent agricultural subjects, discussions of local farm problems, and home economics demonstration work.

Towns of the institute's appearance are Twin Falls, Rupert, Arco, Shelley, Rexburg, Greenleaf, Parma, and Emmett. Over a schedule extending from Feb. 6 to Feb. 20.

UNIVERSITY DIRECTION

The institute is being held under the direction of the extension division of the university and aims to make practical application of various phases of work given at the university, particularly in the college of agriculture and the home economics department.

Dr. A. H. Upham, president of the university, will appear in most of the towns on the program. Dean E. J. Iddings of the college of agriculture and acting director of the extension division, F. W. Atkeson, professor of dairy husbandry; C. C. Vincent, professor of horticulture; Prof. H. C. Dale, head of the department of economics; and Miss Katherine Jensen, director of home economics, are other faculty speakers.

Members of the extension division of the university who are directing the institute and who will be on the program include E. R. Bennett, field horticulturist; Pren Moore, poultry specialist; Miss Marion Hepworth, director of home economics demonstration agents; and county and district agents.

Miss Florence Selby of Boise, a student whose voice has already won her many laurels on the campus, is singing on the institute program.

FROSH PLAY MOSCOW H. S. RETURN GAME AT 4 P. M.

The Frosh basketball team will meet the high school five in a return game this afternoon at 4 o'clock in the high school gymnasium. The frosh succeeded in winning over the high school quintet by a score of 17-11 after a hard and fast game last Saturday night in the university gym.

The line-up will be the following for the frosh: Miles and Nedros as forwards, Martin playing the pivot position, and Green and Parson as guards. Roise and Estes will play forwards with Drury in the center and Woods and Thompson as guards.

Senator Randall Speaks at University Assembly

"Fundamentals of Government" was the subject of the address given by Senator F. S. Randall, of Lewiston, at the university assembly Wednesday. Senator Randall traced the history of the government of the United States from its inception to the present day with particular emphasis on present day tendencies of the government.

Senator Randall is chairman of the tax economy board of north Idaho Chamber of Commerce, which met in Moscow Wednesday for organization for the present year.

The new seating plan, in which the freshmen occupy the entire right section, was tried for the first time, and proved successful. The new plan was inaugurated by President Upham for additional ceremony. An Idaho song was sung by the audience immediately before Senator Randall spoke, and the assembly was closed with the singing of "America."

ANNUAL PICTURE REBATE

Anyone who has paid more than fifty cents for more than one entry of the same picture in the Gem of the Mountains is entitled to a refund of the sum over the amount named. This refund is possible because the same cut can be used any number of times thus making it unnecessary to have more than one.

MEMBERS CHOSEN FOR THREE DEBATE TEAMS

Six Selected Are Smith, Greathouse, Ridgeway, Mckee And Chandler

Six University of Idaho students have been chosen to represent the university on three debate teams to enter intercollegiate contests during the coming spring. In the dual debate with the University of Southern California, to be held at Moscow in April, Walsor Greathouse of Boise and Ted R. Smith of Spokane, were chosen. Both are seniors, and the former has taken an active part in previous debates while the latter formerly attended Cheney Normal school, Washington.

Warren Montgomery of Boise and O. Larmar Ridgeway of Pocatello will debate the University of Montana in a triangular debate between Idaho, Montana, and Utah state universities February 29, while Francis Mckee of Nampa, and Charles Chandler of Moscow will meet the Utah team the same night at Salt Lake City.

Professor W. F. Michael is coach of the Idaho teams. Idaho recently won her first debate of the season, a triangular affair between the University of Oregon, the University of British Columbia, and the University of Idaho. Members of the team will commence immediately preparing for the triangular event scheduled for the last of this month, that between Utah, Idaho and Montana.

BORAH PRIZE

The tryout was also for the purpose of picking the three best debaters in the university, to award them the Borah Debate prize. Though the decision was made by the judges as to the winners, no names will be made public until after the close of the last inter-collegiate debate. Other competitors for the teams and the prize were Iva Silva, Louisa Martin, Constance Taylor, O. L. Ridgeway, E. T. Beecher, George Sugg, and Clair Reem.

VIOLIN RECITAL PLANNED BY PROF. CLAUS, FEB. 22

Carl Claus, professor of violin in the music department is planning his big recital which will take place Friday, February 22, at 8:00 p. m.

Mr. Claus has distinguished himself here as a solo violinist of great charm and technique, and his recitals have been one of the most entertaining and enjoyable interests on the campus.

Girls' Rifle Practice Grows in Popularity

Girls' rifle practice, the most "sought-after" sport for Idaho co-eds begins next Monday afternoon in the shooting gallery located in the basement of the Administration building. More than 75 girls have signed up for practice and many applicants have been turned away, because of lack of accommodations.

"It is important that all girls register for practice hours before next Monday," said Miss Wirt, director of Physical Education for women. "For after Monday, registration for those who signed up, but have not scheduled practice hours, will be cancelled. Thus there is a possibility of allowing a few more applicants to register after that date."

BIG MUSIC ENROLLMENT

The music department anticipates a very large enrollment this term, according to Mr. Bangs, head of the department of music.

WILLAMETTE ANNUAL IS PLANNING BEAUTY CONTEST

Williamette University, (P.I.N.S.) The junior annual, the Wallulah, is sponsoring an innovation—for Williamette—a beauty contest for the purpose of discovering the five most handsome men and the five most beautiful girls in the upper classes. The results will not be known until the annual is published in the spring, when the pictures of the winners will appear in the feature section.

BOISE VALLEY TOUR BY GIRLS' GLEE CLUB

Treble Clef Club, Comprising Twenty Girls, To Appear In Six Towns

The Treble Clef, the girls' glee club of the university, will appear in six of the leading cities in the Boise valley early in March, according to the tentative schedule arranged by Prof. O. E. Bangs, director.

Appearances in Boise, Nampa, Caldwell, Weiser, Payette, and Fruitland are planned. Twenty girls will make the trip.

The club having had such a remarkable and praiseworthy tour last year, a similar one is anticipated this year, as most of the old group are back again and are "going strong", according to Professor Bangs.

The voices have progressed considerably during the year and the force and vim expressed at rehearsals prove a quality of tone work that is well organized and dependable.

NOVEL PROGRAM

This year there will be several novel features on the program which will make it most original and entertaining in character; and it is with a new feeling of interest and appreciation that the university looks upon the Girls' Glee club this year, knowing they are capable of giving a concert with originality, charm, and professional form.

Hulbert Fills Vacancy Left By Prof. Bonnett

Professor H. W. Hulbert, formerly associate professor of agronomy who has been employed in the department of agronomy of the college of agriculture of the University for the past seven years, has been placed in charge of both the teaching and investigational work in agronomy under the title of acting head. Professor Hulbert succeeds Prof. R. K. Bonnett who recently resigned to enter private business with the Washburn & Wilson Seed company.

Professor Hulbert is a graduate of the Michigan Agricultural college. Later he spent two years at the Iowa State college specializing in agronomy from which institution he received the degree of master of science in agriculture. He has been successful as a teacher and investigator and is well known over the state and among former students of the college of agriculture.

TO NAME ASSISTANT

At an early date an assistant will be chosen to help in the farm crop phase of the agronomic work of the college of agriculture.

The work in soil physics, which is one of the units of the department of agronomy, is in charge of Prof. G. R. McDole, associate professor of agronomy and soil technologist of the experiment station. Professor McDole who has been in charge of this work for the past three years is a graduate of the University of Nebraska. He is well acquainted with the soil problems of the state and has a wide acquaintanceship among the farmers of Idaho.

Baseball May Be Conference Sport

University of California, Feb. 2.—(By P. I. N. S.)—Baseball may be made a part of the regular Pacific Coast conference sport schedule, if the plans of Coach Carl Zamloch of California are carried through. At present baseball, though a major sport, is conducted individually by each of the coast colleges, and no cognizance is taken of it by the conference.

TWO SUMMER SCHOOL SESSIONS SCHEDULED

Two Sections Will Overlap—Open On May 19 And June 9

Plans for two overlapping sessions of the University of Idaho summer school, to accommodate teachers whose schools close early as well as those which close later, have been announced. The first is a nine-weeks session opening May 19, and the second opens June 9, to continue for six weeks. Both sessions will close on July 18.

Owing to the growing demand for graduate work, the nine-weeks course will be largely for graduates and will offer many new courses to them. The six-weeks session includes a few undergraduate courses but in general presents a curriculum for teachers who want graduate work.

It is announced that high school teachers may conveniently enter on May 19 and begin research work in their chosen fields and either register for full nine-weeks courses or put in all the first three weeks on research and take up additional courses when the six weeks session begins.

The work required for raising the grade of county certificates will not be given. The growing tendency is to pass as rapidly as possible to state certificates, thus minimizing demand for county certificates.

SURPASSING PROGRAM FOR SUNDAY MUSICAL

Ten Numbers In Vesper Services To Be Held At 4 O'clock Sunday

Vesper services will be held Sunday afternoon at 4:00 o'clock in the auditorium.

The program which is one of the most interesting so far given is as follows:

- Piano Solos-Waltz in A flat ..Brahms
- Waltz in E flat .. Brahms
- Impromptu in A flat ..Schubert
- Gertrude Baker
- Violin Solos -Poetic Souvenir ..Fibich
- Waltz No. 2 .. Weber
- Helen Wood
- Piano Solo- Caprice Burlesque ..
- Gabrilowitzsch
- Irene Starrh
- Vocal Solos- Fairy Tales .. Wolff
- Have You Seen A White Lilly Grow
- Old English
- Mary Gettys
- Piano Solo- Humoresque ..
- Rachmaninoff
- Maybelle Gehrke
- Piano Solo- Sonata in E Major ..
- Beethoven
- Beatrice Meeker
- Vocal Solos- Little Woman in Gray ..
- Hahn
- My Desire .. Nevin
- Helen Forsyth
- Piano Solos - Improvisation ..
- McDowell
- Witches Dance .. McDowell
- Lucille Ramstedt
- Violin Solos- Slumber Song...Weitzel
- Serenade .. Drlia
- Werner Ripplinger
- Piano Solos-Scherzo- (B flat minor) ..
- Chopin
- Pauline Lawrence

GO-EDS BEGIN PRACTICE FOR INTER-HOUSE GAMES

Will Be Followed By Inter-Class Games After Three Weeks

Girls' basketball practice for the new semester, will begin Tuesday night, in order to allow the girls sufficient time to get in training for the inter-house tournament, to be held in three or four weeks.

The inter-class tournament, which will be held about three weeks after the inter-house tournament, will make it necessary for the upper-classmen to put up real competition against "swarms" of sophomores and freshmen.

The town girls, who are organizing their own group, rather than joining with the "dorm" girls, promise to be important contenders for the championship. They have about ten girls competing for places on their team.

THE REAL ROMANCE OF ENID BENNETT

Enid Bennett, who plays the heroine in "Strangers of the Night," now showing at the Kenworthy Theatre, attributes her success in pictures to her husband, Fred Niblo.

While she was working in an office in Perth, Australia, Mr. Niblo advertised for someone to play a minor part in his current production. Her girlish penchant for the stage was gratified when Mr. Niblo, who was then appearing in Australia, gave her the part. Her performance led to other engagements and Mr. Niblo coached her in the art of acting. Their marriage followed and Miss Bennett was seen in a series of screen plays directed by her husband.

Miss Bennett reached the pinnacle of success when she appeared as the

demure maid Marion opposite Douglas Fairbanks in "Robin Hood," and Mr. Niblo was meanwhile gaining international prestige by his producing of the "Famous Mrs. Fair," "Blood and Sand," and "The Three Musketeers."

The Niblos are now together again for "Strangers of the Night," the screen version of Walter Hackett's "Captain Applejack." This is the second of the series of Fred Niblo productions presented by Louis B. Mayer and distributed by Metro Pictures Corporation. Bess Meredith wrote the scenario, the photography is by Alvin Wyckoff and the art direction by Robert Ellis.

The cast includes Matt Moore, Barbara La Marr and Robert McKim.

Reliance on "Sleep Machine" by Students Discredited Experience of C. J. P. M. Rind

Students should not look too hopefully to the "Sleep Machine," which seemed to offer an easy solution to the sleep problem for overworked students. The following is an account of what became of one scientist, Cornelius John Percival Musk Mellon Rind, who had hoped to eliminate the need for sleep by perfecting a machine which could give the desired rest by charging the body with energy.

THE STORY

Cornelius John Percival Musk Mellon Rind was possessed of a marvelous fact-seeking mind. He dabbled in politics, botany, science, and published long essays proclaiming defiance of versions accepted on various topics concerning psychology, beasts of the tropics, chemistry, Hottentots, students and lunatics. Staid old professors caught practicing spooney tricks, poultry, astronomy, poetry, and limes.

On every known subject he'd written at times. Most studious, learned, and thoughtful we find was "Corny" John Percival Musk Mellon Rind. Cornelius John Percival happened one day to come on an article reading this way:

"One third of man's life," says Professor Threedrinks, the well known instructor of "Tiddleywinks," "is spent in that manner most well known as sleep. Eight hours a day, of two dozen, we keep to our beds and endeavor to gain what we've lost. For eight hours of deep slumber enables most men to arise in the morning well rested again."

After reading this statement, more thoughtful we find was "Corny" John Percival Musk Mellon Rind. It set his mind working and planning and scheming on how to abolish all sleeping and dreaming. So that third of our lives we had wasted before would no longer pass by to the tune of the snore.

He didn't know how the task was to be done, but that bothered him little, and soon he'd begun to tinker and putter, and swear, sing, and weep over machines that perfected would banish all sleep. "Eliminate sleep, but replace it," he said, "with rest giving energy hidden in bread." To get his full meaning required a mind like that of John Percival Musk Mellon Rind.

For long years he labored. At last on inspection he said his machine was fast nearing perfection. Some twists, turns and tweaks and the job would be done, the greatest invention since time had begun. But alas, just before poor John Percival Rind received his deserts for his labor and grind, he sickened, was stricken, and sickened some more 'till at last death's grim shadow had darkened his door. No physician he had, so the coroner came to examine poor

John, and find what was to blame for John's death. He examined and finally said:

"I have formed deep convictions this poor man is dead. What is more, sleeping sickness occasioned, I find, the decease of John Percival Musk Mellon Rind.

IDAHO WRESTLING SQUAD TO MEET PULLMAN

The Idaho wrestling squad will meet the Washington State college grapplers in the first conference tournament this season at Pullman Friday night immediately following the Varsity basketball game scheduled there. This will be the first attempt made to mix the two sports on one evening's program, and the results are expected to be satisfactory.

If successful the system will probably be adopted more universally, as the mat sport has not been the drawing card that the more spectacular and more universally understood hoop game has been.

SAME LINEUP

Coach "Babe" Brown states today that the men who will represent Idaho have not as yet been chosen, but that the lineup will probably be about the same as that used against the S. A. A. C. last Saturday, with the exception that Johnny Vesser is expected to be in shape to enter. With Vesser handling the 175 pound class, Kinnison will be able to enter at 160 pounds if he can make the weight. Both men have had previous varsity experience and are counted upon to win in their division.

In the welter-weight class Pachen is improving daily and judging by the showing he made against his S. A. A. C. opponent he will be a strong contender for Idaho.

135 CLASS UNDECIDED

It has not been decided yet who will wrestle in the 135 pound class. In the feather weight division Bittner will probably be picked, but Derr Boardman, and Pettibone are showing promise.

Saturday afternoon the Idaho and W. S. S. freshmen will have a wrestling meet at Pullman and they are expected to furnish as good a match as the varsity. There is more mater-

Lindley Cook Provides Copious Gratification For Hunger Passions of Masculine Students

Somebody is always attracting attention by doing his stuff better than other people do it. Mr. A. M. Merry, the new chef at Lindley Hall, is undoubtedly the most popular man in the place. Each day he places upon the altar great stores of tasty viands and each time receives new blessings from those who come to worship.

Long rows of juicy brown pies, big pans full of fluffy cakes, frothy puddings and ices, big steamy pots of fragrant coffee, mashed potatoes, preserved fruits, roasts,—always different and just to a queen's taste.

With a broad smile and plenty of pep, this young man of fifty-five snags, with the help of one assistant, reels off pies ready to put in the oven at the rate of more than one a minute. He breaks eggs with both hands at once and does it so fast it

would take all the chickens in Idaho to keep up with him. At a recent reception given in the Lindley hall dining room where fifty guests were expected, eighty were present fifteen minutes before time to serve, but the ingenuity of the galley shark saved the day.

KITCHEN INVITATION

Mr. Merry is always in a good humor too. Go into his kitchen and see. Instead of being told to get out of the way you will be greeted with a big smile and, like most men interested in their jobs, he will tell you how it is done.

Forty years ago, when the Indians went down to the banks of the Missouri and took pot shots at the steamboats, Mr. Merry began to learn his trade by cooking for the boat crews on the river.

ial in every weight in the yearling turnout than in the varsity class and the prospects of a winning freshman squad this year and a much improved varsity next year are good.

So far only two meets are scheduled for the frosh, both being with W. S. C., but another is in prospect.

VANDALS ENJOY REST AFTER GONZAGA BATTLES

Idaho Vandals enjoy a brief rest from conference basketball games this week when they play Washington State college in their second two-game series, which, although not counting in either Pacific Coast or Northwest conference ratings, is expected to be as closely contested as was the first series two weeks ago, which resulted in a victory for each team. The first game will be played in Pullman Friday night, and the second Saturday in Moscow.

Since the two teams last met, W. S. C. has halved a two-game series with the University of Montana at Missoula, and Idaho has won twice on her own floor from Gonzaga university of Spokane. Washington State still has the edge on Idaho in conference

ratings because she has played more official games, having won the first Montana game at Missoula, which is the only one counting in the Northwest conference. Idaho is gradually coming back from the temporary slump of the last few weeks, and the games this week will be indicative of her returning strength and aggressiveness.

OREGON HERE WEDNESDAY

The W. S. C. games will prepare the Vandals for the game here with the University of Oregon next Wednesday, February 13. The game, on the Idaho hardwood, will count on both the Pacific Coast and Northwest conference standings. Oregon this season with a veteran team and with "Hunk" Latham at center has been most successful. The outcome of the Idaho-Oregon game will be watched with the greatest of interest by the entire Pacific coast, in that Idaho's Vandals are looked to, to bump the Oregonians.

Tickets for the W. S. C.-Idaho game here Saturday went on sale today at Jerry's and the seat sale for the Oregon contest will open at Jerry's Monday morning.

University freshmen basketballs meet the Moscow high school tomorrow afternoon in the high school gym at 4 o'clock.

ROGER BACON
1214-1294
English philosopher and man of science. Studied at Oxford and the University of Paris. Wrote the *Opus Majus*, *Opus Minus*, *Opus Tertium*, and many other treatises.

He Marvelled at It

As the scientists say, it is not easy to tell what is going to impress a stranger when he visits other lands. An Abyssinian prince was delighted with our ice cream cones. An American financier who made a trip to Montreal was asked what impressed him most. He tried to give a faithful answer to this question, thought it over carefully, and then replied: "The fact that Canadian money was accepted without question everywhere I went."

"Whiskerino" at Nevada To Transform Campus

University of Nevada—Another famed Whiskerino, where the king will be awarded a handsome prize, will be the climax of Junior Week, scheduled to take place March 17 to 22.

From Monday morning, St. Patrick's

Day until the following Saturday night the juniors will be in the center of a dozen activities. The student body, unappreciative of the talent of '25, will be the judge of a special stunt one day. Lunches, matinees, and evening diversion, however, will be for juniors only.

Of course the big event will be the Whiskerino. In order that there may be no foul play in the race for king of the dance, aspiring Bluebeards shall not discard their razors until March 1.

Till then, prepare your hair tonics!

For this he was sent to prison

Roger Bacon may not have invented gunpowder, as has been claimed by some biographers of the famous Franciscan friar, but he exploded some of the outstanding errors of thirteenth century thought. Because of his advanced teachings, Bacon spent many years of his life in prison.

In an age of abstract speculation he boldly asserted the mathematical basis of all the sciences. But even mathematical calculation, he showed, must be verified by experiment, which discovers truths that speculation could never reach.

In the Research Laboratories of the General Electric Company, Bacon's principles are followed in every experimental investigation. The gas-filled electric lamp and the electron tube were worked out on paper, but it was experimental verification of the underlying mathematical theory that made electric illumination, radio broadcasting and X-rays what they are today.

More than a million dollars a year is devoted to research by the General Electric Company in order that the giant—electricity—may be made more and more useful to mankind.

Co-Eds To Wear Everything But Trousers, Latest Style Decree

University of Washington (P. I. N. S.)—Locked bureaus and clothes closets with time-locks attached will be in style for men and garments of a decidedly masculine cut will be what the fashionably dressed Washington co-ed will wear in the spring of 1924.

Tailored suits of mannish lines, vests, he-shirts with pleated bosoms, masculine collars, fore-in-hand neckties and the like will be "the thing" for the well-dressed young woman this spring, members of the Columns patronage committee were told last night by Miss M. G. Baldwin, style expert at a meeting at the Delta Delta house.

The barricaded bureaus and padlocked closets will be necessary for

males who are blessed with co-ed sisters, to prevent the latter from appropriating shirts, vests, collars, neckties, handkerchiefs, cuff-links, and watch-fobs for their own use in order to evidence an appreciation of current styles.

"The thing for morning and informal afternoon wear, for spring, will be the tailored suit with distinctly mannish lines and cut," said Miss Baldwin, representing Carmen, a downtown style shop. "The coats will be long without belts and slightly pinched at the waist. The sleeves will not be deep-set, as is now the custom in women's tailored suits, but will be square, joining the body of the garment at the tip of the shoulders, as is the case with all men's suits.

Intuition of Woman Is Swifter Than Is Man's

Sir Humphrey Rolleston, president of the British Royal College of Surgeons, verifies the observation that in women instinct is highly developed, says a London letter in the New York Evening Post.

"Women," declared Sir Humphrey the other day, "have in a more developed degree than men the power of rapid perception or intuition, allied to second sight and clairvoyance, or of arriving at a correct solution of a problem per saltum. Apart from its potential use and application in research, this faculty of arriving immediately at a correct opinion, without the process of conscious ratiocination, resembles the clinical instinct born of long years of experience, and is no doubt a function of the unconscious which is so invaluable in diagnosis. Hospital sisters often have this power, and when re-enforced by a more extensive training, it should be an asset to woman doctors.

While the average woman student was superior to the average man, the best woman students were not so able as the best men.

Following Orders

A young artist was given permission by the captain of a large ship to get on a staging, slung over the side, for the purpose of getting a better view of another vessel which he wanted to paint.

It was not long after that the captain got into the ship's boat, and shouted up to the deck, "Let go the painter!"—the painter being a rope by which the boat is made fast to the ship.

The order not being obeyed promptly, he shouted again, "Let go the painter."

Instantly a voice replied, "He's gone, sir; brushes, paint and all!"

Merely Incidental

Doctor Rubetinkner was a qualified M. D., but, settling in a cattle country and finding the demand strong, he had added veterinary work to his other practice.

"Nothing serious," announced the doctor, after examining a valuable bull which he had been summoned posthaste to treat. "Give him one of these powders in a quart of bran mash three times a day."

The rancher heaved a sigh of relief. "Walt," he said, as the M. D. V. S. was about to leave, "I reckon, as long as you're here, you might as well have a look at the old woman. She's been allin' for a month or two."

Air in Rooms Usually Is Too Dry for Health

Most authorities agree that the factors that distinguish good from bad air are proper temperature, proper humidity and adequate movement. The temperature of rooms for health is about 72 degrees Fahrenheit. Most Americans like the temperature much higher and complain of feeling chilly when it is at this level.

Why? The principal reason is that the air is too dry. Dry air means that excessive evaporation of moisture takes place from the skin, mouth and nose, and this evaporation takes heat away from the body. The worst combinations between temperature and humidity are cold damp air, warm moist air and excessively dry air artificially warmed.

The comfort zone lies between 69 and 70 degrees Fahrenheit, with a humidity between 30 and 55 per cent. The average indoor room in winter has a humidity between 15 and 22 per cent, and to offset the great loss of body heat which this causes the temperature is kept far too high.—Hygeia.

COMMITTEE ENTERS INTO AGREEMENT WITH CREAMERY

The permanent committee, appointed from the chamber of commerce and from the Business and Professional Women's club, for the purpose of representing the purchasers of season tickets for the new natatorium, under construction by the Purity Creamery company, has entered into an agreement with the company, setting forth in detail the plans for the natatorium, and the rights and privi-

shows will be heated by a separate ideal boiler and stored in a 500-gallon storage tank. The plunge will be connected with privately owned well and city water mains, so that in emergency water may be obtained from either source. The tank will be drained from a six-inch cast-iron line to a man-hole on the south side of Sixth street, with 550 feet of eight-inch sewer from the man-hole to Paradise creek. The tank can be drained, filled and heated during the night.

HEATING AND FURNISHING

Radiation of the natatorium, dressing rooms and lavatories will be derived from the present heating system in the Purity Creamery. The amount of radiation necessary for the comfort of all will be supplied at all times. Two showers will be installed off both men's and women's dressing rooms. The ladies' lavatory will contain one basin, two toilets. The men's lavatories will contain one toilet and one urinal. The floors of dressing rooms, showers and lavatories are to be of water-proof finish.

COMPANY POLICING

The Purity Creamery company will conform to all laws governing natatoriums and will conduct it in a good, business-like manner. The charge for admission for those not having season tickets will at no time be more than the customary charge at other natatoriums.

Signed, PURITY CREAMERY CO. By N. WILLIAMSON, President.

"THE FRONTIER WOMAN" COMING AT KENWORTHY

Frontier Woman Is Motive Of Yale Historical Picture

The chronicle of the frontier woman will be the motive of the next Yale historical picture showing at

"AS NECESSARY AS A FOUNTAIN PEN"

REMINGTON PORTABLE TYPEWRITER

BUY ONE FOR \$5.00 a month

Hodgins' A BOTTLED DRUG STORE

the Kenworthy Friday and Saturday. "The Frontier Woman" is the title, and it is the true story of the courage and self-sacrifice of Margaret Johnston, a soldier's wife in the Wautauga valley among the mountains of Tennessee. In the fall of 1870 her husband had ridden with the mountain men under Nolichucky Jack Clevier against the British Ferguson, who was terrorizing the Carolinas. Margaret Johnston foiled the attempts to recall Sevier by alarming him with the news of a threatened Cherokee invasion of the Wautauga settlements. Unhampered by the need of giving assistance at home, the mountain soldiers pressed on to King's Mountain in North Carolina, where they fought and won the great battle of King's Mountain.

"King's Mountain" should be of special interest to Idaho people because King's Mountain is near Charlotte, North Carolina, where the Idaho troops as units of the 41st (Sunset) division were sent for division mobilization during the World war. The 41st division was composed of men from western states—Oregon, Washington, Idaho, Montana, Wyoming, Colorado, the Dakotas, etc.—and the splendid physique and bearing of the Sunset men made them the subjects of admiring comment on the part of the hospitable southerners. During the divisional parade at Charlotte in the fall of 1917 one enthusiastic North Carolinian likened the western men to the fighters of King's Mountain—"new King's Mountain men come out of the west again to fight the European terror. Every Chronicle picture is made of

INCREASE THE GENESIS REDUCE THE EXODUS

Good food, such as may always be had from us, along with regular habits of study, rest and play, will go a long, long way to increase the genesis of that which will result in grades that safeguard against the next exodus.

What Industry Owes to Explosives Power

THE ENGINEERS who built the pyramids of Egypt and dug the canals of Babylon did not have to consider costs.

The modern engineer strives for more and better work at lower expense—and he must consider economy as well as accomplishment.

The economical production and distribution of wealth are made possible today through the use of explosives. And the enormous consumption of explosives throughout the world is an index of the influence they exert in our economic life.

The du Pont Company produces 120 million pounds of dynamite and from 85 to 100 million pounds of blasting powder a year. Twenty-four du Pont mills are scattered over the country at strategic points for better service to our industry. Five research laboratories are maintained for constant improvement of the product. An expert technical field staff offers counsel in employing the most scientific blasting practice.

And while du Pont is the largest single manufacturer of explosives and is the leader in the industry, this company makes only about one-third of the total quantity consumed in the United States.

The history of the du Pont Company is the history of explosives evolution. Du Pont has been privileged to lead the way in the development of explosives power.

Welcome

WITH the entrance of two more national fraternities upon the campus, Idaho takes another step upward in the scale of intercollegiate activity recognition. Credit for securing the installation of these two nationals is due largely to the untiring work of the local organizations petitioning them, although every assistance possible was given by alumni, the faculty, and the rest of the students.

Idaho already has an enviable reputation in one branch of athletics, her basketball record has given her national recognition. She is rapidly and surely forging ahead in several other lines of sports. Her scholastic standing has always been one of the highest; and now her increasing enrollment and its consequent enlarging sphere of activity has resulted in greater social organization.

And who can say that the new Idaho chapter of Alpha Chi Omega is not deserving of its reward? The organization which has built its own beautiful home and has filled its place in campus life successfully and admirably has surely more than earned its national recognition.

And to the men who soon will compose the Idaho chapter of Sigma Chi is due most of the credit for their tireless efforts to succeed in doing what they have now done. And their campus reputation and recognition has been assured by the sterling qualities and capacities of their members.

To Alpha Chi Omega: congratulations and welcome into the family of campus national sororities. And to Sigma Chi: welcome, and thanks for the realization of the Miami Triad on the Idaho campus.

Our Traditions

A surprisingly small number of Idaho students really know the history of Idaho traditions, and there are many who are even unaware of the actual existence of many of our most treasured customs.

In co-operation with the "I" club, The Argonaut, during the present semester, is going to uncover the history of as many as possible of the Idaho traditions, explain their origin and meaning, and attempt to make them seem more worth while and applicable in present day college life.

Idaho's customs and traditions are many. The Vandal university is in a position to boast of a group of as unique and novel traditions as any institution in the country. For the most part they have grown up with the university, and have been assimilated as a part of student life.

Traditions are a vital part of collegiate spirit and life. They are the backbone upon which college spirit is built, the framework of the whole structure. And as such they should be carried out, understood, and appreciated.

Assemblies

TWO changes were inaugurated at the last assembly which bid fair to make this weekly student gathering exactly what it should be,—dignified, and formal, around which some semblance of tradition and custom has been built.

The suggestion made by President Upham, that an Idaho song be sung at the beginning, and "America," at the end of every assembly was tried, and it immediately met with unanimous approval. This singing, as a part of every assembly, aids to a great degree in giving that touch of formality that has been so lacking before.

And the new seating plan, which has been definitely adopted, eliminates the mad rush that has been the custom of previous years, and students are now able to walk out, with no risk of life, in an orderly, quiet manner. And

seniority rights have been established by the same action. Both new schemes are worthy of merited praise.

Woodrow Wilson

WOODROW Wilson's passing from the stage of human affairs, upon which he played so great a role, has brought forth profound expressions of regret and sorrow from the entire world. He reached the highest pinnacle of power ever attained by man; he swayed the entire world. The operations of Caesar and Napoleon dwindle to child's play compared with the vast forces under the hand of this great chief during the World war.

The work of Woodrow Wilson has yet to be viewed from a greater distance by other generations, but when the time comes that the crowded peoples must unite, the author of the League of Nations will live again.

—Blaine Stubblefield.

Society

"JITNEY DANCE"

Delta Gamma seniors entertained the other members at a unique "jitney" dance Tuesday evening. A sign above the door outside read "Delta Gamma Dance-Hall", and the house was arranged to resemble a public dance-hall, with placard warnings around the walls. The guest room was fitted up as a check room and two bell hops acted as checkers. The girls bought the tickets and, as they paid, gained entrance to the dance floor, which was marked off with ropes. Pop stands and penny slot machines stood everywhere. Music was furnished by a three piece orchestra.

Dinner Guests

Kappa Kappa Gamma: Professor and Mrs. G. W. Hamar, Professor and Mrs. F. W. Gall, Mr. and Mrs. McLaughlin, Miss Bernadine Adair, G. Elrod, P. Arthur, C. Bolshied, L. Rogers, F. Kling, D. Johnson, G. Platt, R. Burbidge, M. Jackson, Grace Hagen, Frances Ritchie, and Martha Green.

Pi Beta Phi: Messrs. J. Priest, R. Irving, T. Turner, B. Wilcox, H. Doty, and R. Cummins.

Chi Beta Epsilon: Misses Martha Green, Frances Ritchie, Grace Hagen, and Dorothy Teats.

Delta Gamma: Misses Laura Faulkner, Elizabeth Franck, Mabel Morris, Hazel Green, and Mona Quillman of Lewiston.

Beta Theta Pi: V. Green, J. Chapman, and V. Hoobling.

Gamma Phi Beta announces the pledging of Orvetta Jones of Rigby, Idaho.

Pi Beta Phi announces the pledging of Opal Hunt of Omaha, Nebraska, and Wilma Keel of Twin Falls.

Miss Fern Coble and Miss Fern Clarke of the Women's Debate team of Whitman college were the guests of Miss Mandell Wein during their stay in Moscow. Miss Coble is a member of the Delta Delta Delta sorority and is a sorority sister of Miss Wein who attended Whitman last year.

Miss Neil Barnett was a week-end guest of Kappa Kappa Gamma.

Miss Marian Sweet of Kappa Alpha Theta attended the Alpha Tau Omega dance at Pullman Saturday evening. While in Pullman, she was a guest at the Theta house.

Sigma Nu announces the pledging of Volney Hoobing of Boise, Idaho.

Beta Theta Pi announces the pledging of William Quilles of Boise, Ida.

Sigma Alpha Epsilon announces the pledging of Charles Gregory and Phillip Gustafson of Chicago, Ill.

The freshmen of Forney and Ridenbaugh halls entertained the upper classmen at a fireside Sunday evening. A program was given and refreshments were served.

Kappa Delta announces the pledging of Dr. R. A. Muttkowski, assistant professor of zoology, and Steve Johnson of King Hill.

BUFFET SUPPER

Women of the university faculty, at the close of their regular business meeting, which was held at Lindley hall the past week, entertained the

fellows in the hall with a buffet supper and a short program. About 85 were present to enjoy the occasion and the readings by Professor Cushman, the violin selections by Prof. Claus and the piano recitals by Prof. Clarke were thoroughly appreciated.

John Bum Says

After a particularly trying session with several would-be humorists, the magazine editor called to his office boy.

"Jimmie," he said, "take this waste-paper basket way out somewhere, and empty it."

Then, because the office boy giggled audibly, he became irritated. "What the hell are you laughing about?" he roared, "There's nothing funny in that."

"I know it sir," Jimmie sheepishly looked at the basket. "That's just what struck me as funny."

"I drew my own picture yesterday." "That's odd. I thought you said you had never made an ass of yourself." —Yale Record.

As far as we can see, the only way to abolish the Ku Klux Klan is to corner the sheet market. —Burr.

The snow may be on the pumpkins, but mercury and girls' legs are two things that won't freeze in wintry weather. —Witt.

HE BURNED UP HIS MONEY

I doff my grey fedora To Uncle Rodman Babbitt; He's smoked cigars for twenty years And never got the habit. —Sun Dial.

"Why does he wear those loud stockings?" "So that his feet won't go to sleep." —Stone Mill.

"Why, Camilla, I didn't know you had a child. How old is she?" "Oh, she's one of the Follies of 1912." —Jester.

"Do you ever draw pictures in the nude?" "No, I usually wear a smoking jacket." —Gargoyle.

"Want a ride?—Whoa— Det in—Diddap— Dimme a tiss—No?—Whoa Det out—Diddap." Prof—"When do the leaves begin to turn?" Student—"The night before exams."

IDAHO TRADITIONS

GREEN CAPS

The first Idaho tradition of which a student becomes aware upon his entrance at Idaho is the "wearing of the green." Every freshman before him has worn a little pearl-buttoned, short-visored, green cap. He knows that he must wear this emblem of newly acquired collegiate standing,
