MOSCOW, IDAHO, WEDNESDAY, MAY 14, 1924

NUMBER 52

## AMBASSADOR FROM ITALY TO ATTEND JUNE GRADUATION

### Prince and War Hero Was Formerly Engaged in Mining at Kellogg

Prince Gelasio Castani, Italian ambassador to the United States, will be a guest of the state and of the University of Idaho at the university commencement exercises in June, according to an announcement by President A. H. Upham.

Prince Caetani was for seven years closely connected with the mining industry in northern Idaho, beginning in 1903. Although a graduate in mining engineering from the Royal university of Rome, the prince started work in the Idaho mines as a drill runner. During the last three years of his residence in Idaho, he was superintendent of mines of the Bunker Hill and Sullivan Mining and Concentrating company, at Kellogg, where he designed and constructed new ore-dressing plants.

### SEVED IN ITALIAN ARMY

During the following years, Prince Caetani carried out a similar work at mines in Alaska, Colorado, and Mexico. Later he went to San Francisco and formed a firm of consulting engineers with Albert Burch and Oscar Hershey, which numbered many of the largest mining corporations in the west among its clients.

At the outbreak of the war he returned to Europe, became a second lieutenant of engineers in the Italian army and soon was sent to the mountain district. Here he planned and helped execute the tunneling and destruction of Col di Lana, the snow-

(Continued on page four)

## Valuable Articles

### Contained in New

### "Idaho Engineer"

The first issue of the Idaho Engineer, official magazine of the Associated Engineers of the University of Idaho, has appeared on the campus, containing many excellent articles of both technical and popular nature. The opening article, "Engineering Education," by Dean Ivan C. Crawford, head of the college of engineering, presents a brief but explicit synopsis of the present condition of engineering education and some of its vital problems and their proposed solutions.

### GRADUATE WRITES ARTICLE

"The Field of Highway Engineering," by Raymond Harsch, Idaho engineering graduate in '22, is an article on the status and possibilities of highway development in Idaho and the northwest. "The Boise-Mountain Home Irrigation Project," by John Reed of Idaho Falls, a junior in civil engineering, is a fine article, dealing with the proposed project to irrigate 500,000 acres of good land between Boise and Mountain Home which is as yet unclaimed for any useful purpose.

"Recent Developments in Steam Engineering," by Gustus L. Larson, an Idaho graduate who is now professor of steam and gas engineering at the University of Wisconsin, shows some marked advances that have recently been made in the art of steam engineering. "Engineering Achievements of the Year 1923," by H. B. Hodgins of Moscow, Idaho electrical engineering graduate in '23, who is now a student with the Western Electric company, is a good outline of the development in electrical science during the past year.

### HAS PROFESSIONAL TONE

Other articles on structural engineering.

## Vandal Beauties Featured as

### "Four Girls of Golden West"

The pictures of the four fairest Vandal women as selected by John Held, Jr., well-known artist of New York, have been exhibited not only by local newspapers but in leading journals throughout the United States.

The New York Times featured them and the Pictorial Weekly devoted an entire page to "Four Girls of the Golden West." When eastern people

## VANDALS WIN 4 OF 7 GAMES ON COAST TOUR

### Idaho Annexes Four Victories in Seven Games

With a record of winning four out of seven games played on a week's trip, Idaho's ball team returned home Friday, having won a game and lost one to the University of Washington, lost two to O. A. C., won one from Willamette and won two from the University of Oregon. The only games in which the Vandals slumped were the two against O. A. C., losing to the Aggies, 6 to 1 and 11 to 0.

### GOLDEN STARS

The feature of the entire trip was the first game with the U. of O. which Idaho won 6 to 5 after 12 thrilling innings. Skip Stivers wrote his name in the hall of athletic fame by losing the ball in center field in the 12th inning, making the circuit for the winning tally. Art Golden pitched the entire game, allowing but 9 hits, practically a big league accomplishment for a 12 frame game. Fitzke gained four hits during the game and the entire team gave puncture proof support. Oregon again bit the dust the following day, losing 17 to 4 in a game lacking the spectacular elements of the first tilt. Snow worked from the mound, with Kinnison receiving.

### O. A. C. INVINCIBLE

Against O. A. C. the Vandal batteries seemed helpless, and although Fields and Snow pitched good ball, the Aggies were on a hitting streak and could not be stopped. The second game was a shutout, Idaho being blanked at the Oregonians were evidently putting magic on the ball. Fitzke and Stivers, noted sluggers, were walked repeatedly and few hits were not timed to bring in counters.

A six inning game with Willamette went to Idaho, 10 to 1, which will count in the Northwest conference.

## STOCK EXCHANGE OFFICIAL

### TO LECTURE ON N. Y. FINANCE

### Brings Film Entitled "A Trip to Wall Street"

Jason Westerfield, Director of Publicity for the New York Stock Exchange, will be at the University, Monday, May 19, to show two reels of film entitled "A Trip to Wall Street." All Economics classes will be excused to attend this picture, according to an announcement made by Prof. H. C. Dale, head of the Economics department.

Monday evening at 6:30 Mr. Westerfield will be the guest of Alpha Kappa Psi, national honorary business fraternity, and Pi Beta Gamma, local business sorority, at a banquet given in his honor.

Mr. Westerfield has been visiting professional fraternities throughout the United States and from the best of reports his picture is attracting considerable attention. His lecture will be given in Room 217 Monday at 10 and 2 o'clock.

## Former Frosh Captain Enters Olympic Trial

Phil King, ex-'25, Twin Falls, in company with his brother Clarence, is stopping over for the week on the Idaho campus enroute to Eugene, Ore., where he is to make his bid in the Olympic tryouts for a berth on the American team.

King is training to enter in the mile, and five and ten thousand meter runs. In his freshman year, Phil was the star miler and captained the frosh team. With his brother he will return to the Idaho campus next September.

## HIGH SCHOOL TRACK WINNERS TO HOLD STATE MEET FRIDAY

### Eleventh Annual Interscholastic Promises To Be Best in History; Many Records Already Have Been Broken

Winners of first and second places and the winning relay teams in the four sectional high school track meets held last week at Pocatello, Caldwell, Lewiston and Coeur d'Alene will compete in the eleventh annual state interscholastic track meet at the University, Friday afternoon, May 16.

Indications are that the meet, which will include the winners and runners up in each event from the four elimination meets to be held at Pocatello, Caldwell, Lewiston, and Coeur d'Alene, will be one of the best ever staged at the University. Reports from some of the competing school show several state records to have been broken in pre-tournament meets. The high school record for the javelin has been broken and some of the dashes are being timed at exceptionally low marks.

### MANY UNIVERSITY PROSPECTS

The principal interest in this annual event is the fact that most of the participants are seniors who will be making their choice of a university next year and it is the desire of the university authorities that as good an impression as possible be made on the visiting athletes. Through the courtesy of the various campus groups the visitors are cared for at the group houses and dormitories, which eliminates a large item of expense.

Work is progressing rapidly on the athletic field to get it in perfect shape for the meet and the athletic department is preparing to handle one of the largest crowds ever attending a high school meet at the university. In addition to the track meet, several varieties of entertainment are being prepared for the benefit of the visitors.

Among the entries Timms of Twin Falls has beaten Long of Rupert, last year's champion, in the dashes. Cleaver, miler from Caldwell, has broken the state high school record for the mile, doing it in 4:42, and Kerchesnek of Burley threw the discus within a foot of the state record. Kyle of Kooskia is tied with Clayton Pickett of the University of Idaho, for the high jump record and Sandpoint

(Continued on page two)

## DUAL TRACK MEET GOES TO CREDIT OF COUGARS

### Pickett, Supreme Field Man, Breaks Discus Record

Washington State college track and field athletes won the dual meet from the University of Idaho Saturday afternoon on MacLean field, 79½ to 51½. Feature races included the 100 yard dash, won by Keith of Idaho with "Giff" Davidson, Idaho, on his heels for second place, and the two mile race, won by Captain Williams, Idaho, but a few yards ahead of the Washington State distance man.

Pickett, Idaho's star field man, smashed the Idaho record for the discus throw in taking second place in the event with a heave of 132.77 feet. Davis, Washington State weight man, established a new record for W. S. C. in taking first place with a throw of 141.17 feet.

### CLOSE FRESHMAN MEET

Idaho lost the chance to win the meet by Henry Powers' hard luck in the low hurdles. Powers, generally conceded as the best low hurdler of the two institutions, tripped and broke his stride and was disqualified for tripping over four hurdles. Johnny Wagner, in taking the broad jump for Idaho with a mark of 22 feet three and three-quarter inches, approaching the Idaho record and the sophomore broad jumper is looked to establish a new mark for Idaho before the current track season closes.

A freshman meet run in conjunction with the varsity tourney also went to Washington State college, 63 2-3 to 53 1-3. The frosh meet was close throughout, narrowing down in the end to the mile relay when the score stood 58 2-3 for W. S. C., and 58 1-3 for Idaho.

### THE SUMMARY

Mile run—Sowder, Idaho, won; Leslie, W. S. C., second; Hillman

(Continued on page two)

## THETA'S PREMIER IN SCHOLASTIC AVERAGE

### S. A. E.'s Lead Fraternities for First Semester

Grade averages for organized groups of the University of Idaho and the various departmental divisions of the university show that while the average for men students as a whole was higher for the first term this year over last year, the women's averages were generally lower. Competition has been exceptionally keen this year among organized groups for scholarship honors, in lieu of a new cup having been offered to the winners of the men's groups by Representative Burton L. French, congressman from Idaho, who is an alumnus of the university.

For the several fraternities, Sigma Alpha Epsilon won first place with an average of 4.389 based upon 6,000 as perfect. Sigma Chi, with an average of 4.376, placed a close second, with other groups fairly well bunched together, Kappa Sigma, 4.248, Beta Theta Pi, 4.241, Lindley Hall, 4.198, Sigma Nu, 4.197, Phi Delta Theta 4.096, Kappa Delta, 4.087, Elwetaz, 4.069, Phi Gamma Delta, 3.949.

For the women, Kappa Alpha Theta easily took first place toward the Elizabeth Kidder Lindley scholarship cup for women's groups, now in possession of Pi Beta Phi. The average for the Kappa Alpha Theta girls for the term is given as 5.239. Other sorority averages are—Gamma Phi Beta, 5.080, Delta Gamma, 5.021, Pi Beta Phi, 4.904, Kappa Kappa Gamma, 4.877, Forney Hall, 4.744, Ridenbaugh Hall, 4.595.

Non-organized men of the university averaged 4.423, placing them midway in the fraternity lists, while unorganized women fared similarly, with an average of 4.785.

Other average classifications, as compiled by Miss Ella L. Olsen, registrar, follow:

### FIRST SEMESTER

University Average ..... 4.445  
Average of all women ..... 4.819  
Average of all men ..... 4.241

## 130 ESSAYS SUBMITTED IN ECONOMICS CONTEST

### Winner Will Be Announced at Commencement

Over one hundred and thirty essays were submitted in competition for the Philo Sherman Bennett prize, on the "Principles of Free Government." The preparation of such essays was made a part of the required work in Economics 22 (American Government). Each quiz section of that course was assigned a different topic on which to write, as follows: Section A, "The Presidential Primary;" Section B, "Legislative Blocs in Congress;" Section C, "The Idaho System of Taxation;" Section D, "The League of Nations, 1919-1923."

The essays were read first by members of the department and one outside judge. From the total number submitted, the eight best were selected and are now in the hands of the final judges. The department was fortunate in securing the services of three distinguished citizens to act in this capacity, Chief Justice Charles P. McCarthy, of the Idaho Supreme Court, Hon. F. S. Randall, of Lewiston, and Mrs. Mary E. Forney, of Moscow. Of the eight essays submitted to the judges, five were written by freshmen, one by a sophomore,

(Continued on page three)

## IDAHO WINS FIRST HOME-GAME SERIES FROM MONTANA NINE

### Rally in First Contest and Home Runs in Second Give Victory

Idaho won the first home-game series from the University of Montana, 4 to 2 and 7 to 1, Monday and Tuesday afternoons on MacLean field. The first game was won on a sixth inning rally when Fitzke brought in two runs with a single which netted him three bases on an error; and the second with the aid of home runs by Stivers and Kinnison in the seventh and eighth innings.

In the opening games Monday the score was tied at one all from the first to the sixth when O'Conner eased up for a little and walked Wicks. Cameron was hit on the back and took a base, Fitzke clouted a three bagger scoring Wicks and Cameron and Kleffner sacrificed, bringing Fitzke in. This spurt gave Idaho a lead which Montana was unable to overcome although threatening to do so by getting one run across in the ninth. Fields pitched aright ball, receiving good support at all times.

Yesterday's game started out to repeat Monday's performance. The teams were tied at one apiece until the lucky seventh. Kleffner got to third; Lawson, batting for Melne, knocked him in, followed by a home run by Skippy Stivers. In the eighth Cameron got third and Kinnison connected for a beautiful four bagger. Montana rallied in the ninth and with the bases full and one down a flock of runs seemed imminent. However,

(Continued on page two)

## STUNT FEST MARKS PINNACLE OF WIT AND CLEVER MUSIC

### Celebrated Student Productions will be Shown Thursday and Friday Nights

The 1924 Stunt Fest, Thursday and Friday will fall under the spell of the witches who on certain nights in May ride on broomsticks to remote gathering places and there hold festivals which mortals should speak of rather than describe.

The prologue with all due respect to Shakespeare, will reveal the witches of "Macbeth" in their haunt on the fateful heath. By special radio from the powers of the air it is announced that the witches allotted to Idaho for the Stunt Fest will be Winifred Veatch, Ula Hughes, and Dorothy Gallup.

The show this year will also include a dance epilogue designed to entertain the audience while the judges are picking the winning stunt. The cup will be presented to the victorious class on the stage, and the evening will be closed by the singing of an Idaho song by a picked group of singers from all the classes.

## Miners Taking Work In Mine Rescue Car Sent by Government

More than 100 mining students have enrolled in the classes in miners' first aid and mine rescue work being conducted by officials in charge of the mine rescue equipment car which is now at the university. The car is a "traveling fire department for mines," and those in charge aim to give practical first aid in mine rescue instruction to miners and mining students.

### OPERATED BY BUREAU

The rescue-equipment car is owned by the United States bureau of mines and operates out of Butte in Idaho, Utah, Montana and part of Washington. It is in charge of J. S. Gavin, foreman miner, and W. J. Needham, first aid miner, who are cooperating with Ernest W. Ellis of

## To Our High School Athletes:

MORE than 100 high school students representing every part of the state will be guests of the university over this week end. They are the flower of Idaho's high school athletes. Among them are many future University of Idaho athletes and students. And all of them, as candidates for Idaho student membership, deserve and demand of the present Idaho students the courtesy and consideration of fellow students.

The big majority of these high school athletes should, if they expect to go to college, be deciding to enter Idaho. Idaho can offer them every advantage of most other colleges and in addition has the prior claim of being their state institution. It is the solemn privilege and duty of every Idaho student to show these high school men that their first consideration belongs to their own university. Will every Idaho student remember this important responsibility?

After seeing and meeting the University of Idaho next Friday, every high school athlete will become a university publicity agent when he returns home. Will we have him say of Idaho, that it is a big-hearted, democratic, wholesome place to live and learn? Will we have loyalty and thoughtfulness enough to make him feel that and so tell the folks back home?

## IDAHO MEN TO WORK ON BLISTER RUST CONTROL

### Prevention of Spread of Disease Undertaken Extensively

(By Clair Reem)  
The prevention of the spread of white pine blister rust into the forests of Idaho will be taken up on an extensive scale this summer. The work will be carried on by cooperation of the Federal government and other organizations interested in the protection of the forests. The work will be carried out under the authority of the State Department of Agriculture of which M. A. Means is commissioner.

### DESTROY SOURCES

The prevention program is divided into two classes, the actual work of prevention and the elimination of possible sources for the future spread of the disease. The first division will be composed of about thirty men from the various colleges of the Northwest with Idaho men in the majority. The work of this group will be the destroying of wild blackberry vines in the upper Priest Lake county near the Canadian border. The other division will be composed of six Idaho men and will be engaged in digging up and destroying cultivated black currant vines in the central part of the state.

### IDAHO MEN ON CREW

The six men who have been chosen for this work are Bung Snow, Keith Smith, Walter Seth, Ted Turner, W. J. Stone, and Vernon Patch. This work will start May 15, while the other work will not start until July first.

The White Pine Blister rust is one of the worst of forest diseases and is hard to control because of its fast spreading nature. The last indications of the disease were found at Nelson, B. C., about thirty-five miles from the Northern boundary of Idaho. The spread of the disease was traced over a path of one hundred miles last year and if the spread should make as much progress this year it would be found as far in Idaho as Priest River and Sandpoint. The season to date has been unfavorable to the

spread of the blister rust which requires a great deal of moisture. The disease is carried from an infected pine to a currant or blackberry vine and then back to the pine so that the extermination of these vines is vital to the protection of forests.

The state of Montana is conducting work along the same line and their crews are working along the boundaries of Idaho.

### IDAHO WINS FIRST HOME GAME SERIES FROM MONTANA

(Continued from page one)

a neat double play by Idaho retired the side.

Idaho now has a percentage of .600 which is nearly .300 higher than at this time last year in which Idaho finished third in the conference. Next Monday and Tuesday the Husky nine journeys here from Seattle for a series of two return games.

### SUMMARY MONDAY'S GAME

Batteries—Hanson and Long; Snow and Kinnison. Umpire Bray of W. S. C.

## YOUNG ORATORY WINNER PLANS TO ENTER IDAHO

### St. Maries High School Seniors Will Enter Next Fall

Herbert Wunderlich of St. Maries, winner of the Spokesman-Review oratorical contest in which more than 500 high school students of the Inland Empire participated, has signified his intention of entering the University of Idaho next fall, according to his answer to a questionnaire sent by the university to all high school seniors in the state. He will probably enroll in engineering, architecture or science courses.

to Spokane last week as district champion of Kootenai, Benewah, and Shoshone counties and there the Inland Empire championship in competition with eight other district champions was won. The contest was held in the Lewis and Clark high school auditorium before a crowd of 1500 people. According to the Spokesman-Review, young Wunderlich delivered a "powerful oration, punctuated with dramatic periods which was enthusiastically cheered by the audience."

As Inland Empire champion he will compete in a contest among the six western champions in Los Angeles, May 16. The winner of this at Los Angeles will go to Washington, D. C., to participate in the national contest of the six sectional champions which will determine the grand national champion of the United States. Prizes of \$3500, \$1000 and \$500 will be awarded to these winners.

## TIMBER TRACT WILL BE USED AS FORESTRY LAB

### Area on Moscow Mountain to be Utilized in Research

Use of the square mile of forest land on Moscow mountain, which was recently acquired by the school of forestry of the university as a research laboratory, for studies in forest plantation, western yellow pine, grazing and forest measurements, has been announced by C. W. Watson, instructor in forestry and grazing, who is in charge of the forest laboratory.

Experimental plantations of scotch pine, yellow pine, douglas fir and white pine have already been made and plantations of many other species are being planned. In all of these experiments the young trees are grown at the university and are entirely handled by the forestry faculty and students.

Mensuration records by the students show that most of the recently cut timber on this section was from 100 to 300 years old. The present stand of young timber is about 20 years old. Other phases of the mensuration studies include measurement of standing trees and scaling of felled timber.

It is also planned to use the forest laboratory for experimental grazing purposes. Special attention is being given to preserving and cultivating the grasses now growing on the section. Arrangements are being made to build a cabin on the grounds to serve as a recreational spot as well as a study laboratory for the students.

The section is situated about six miles due north of Moscow and within one and a half miles of a surfaced road. Use of the land was granted the school of forestry recently by the state land board in charge of all state-owned lands.

## HIGH SCHOOL TRACK WINNERS TO HOLD STATE MEET FRIDAY

(Continued from page one)

has developed some good men on the sprints and javelin.

All the entries are not in yet, but those from the southern part of the state are as follows:

50, 100, and 220 yard dashes—Timms of Twin Falls; Long, Rupert; McCormick, Boise; Flint, Downey; Stanger, Idaho Falls.

440 yard dash—Hammond, Blackfoot; Knight, Briggs; Brown, Payette; Stone, Rupert.

Hurdles—Mitchell, Parma; Canine, Burley; Wilson, Idaho Falls; Stanger, Idaho Falls.

Mile run—Clever, Caldwell; Griffiths, Burley; Randall, Idaho Falls; Houchens, Idaho Falls.

Pole vault—Chaney, Caldwell; Pagaoga, Boise; Hammond, Blackfoot; Stoddard, Stanthony.

High jump—Campbell, Boise; Mitchell, Parma; Ritchie, Pocatello; Shot put—Pagaoga, Boise; Settle, Wendell; Butler, Idaho Falls; Jess, St. Anthony.

**HENRY CAVENDISH**  
1731-1810  
English chemist and physicist, of whom Biot said, "He was the richest of the learned and the most learned of the rich. His last great achievement was his famous experiment to determine the density of the earth."

## He first made water from gases

Henry Cavendish, an eccentric millionaire recluse, who devoted his life to research, was the discoverer of the H and the O in H<sub>2</sub>O. In fact he first told the Royal Society of the existence of hydrogen.

He found what water was by making it himself, and so became one of the first of the synthetic chemists.

Cavendish concluded that the atmosphere contained elements then unknown. His conclusion has been verified by the discovery of argon and other gases.

The Research Laboratories of the General Electric Company have found a use for argon in developing lamps hundreds of times brighter than the guttering candles which lighted Cavendish's laboratory.

### Society

Kappa Delta announces the initiation of Frank H. Thum of Peestone, Minn., Jefferson Rodgers of Moscow, Steven E. Johnson of King Hill, Chester L. Mink and James O. Cromwell of Gooding.

Beta Chi announces the membership of Allan A. Bailey of Coeur d'Alene.

The seniors members of Kappa Alpha Theta entertained the other members Monday evening at a formal dinner at the chapter house. Apple blossoms, pink tulips, butterflies, and crystal candle sticks were cleverly used in carrying out the table decorations.

#### Wedding at Sorority House

A pretty wedding was solemnized at 8 o'clock Sunday evening at the Pi Beta Phi sorority house, on Deakin avenue, when Miss May Anderson of Boise, became the bride of Leigh Dunbar, also of Idaho's capital city. The marriage was performed by the Rev. Kendall E. Burke, pastor of the local Christian church, the impressive ring ceremony being used. The bride and groom stood under a beautiful floral arch in the living room of the house, which was beautifully decorated with spring flowers.

The ceremony was witnessed by the sorority sisters of the bride, who is a former student of University of Idaho, the parents of the groom, and a number of close friends of the young people.

#### "T" CLUB SHOW CALLED OFF

The big sensational Vaudeville that the "T" club was going to put on has been definitely called off due to a conflict with Campus Day there being no other possible date for its presentation.

### SPOKANE ENGINEERS UNIVERSITY GUESTS

#### Association Member Banqueted by Engineering College

Some forty-odd members of the Associated Engineers of Spokane were guests of the University of Idaho Friday noon, upon the occasion of the annual spring auto trip of the association. Luncheon was served at Forney hall for the members and their wives, and was attended by a majority of the students enrolled in the college of engineering and the school of mines, and all faculty members of the two colleges.

Directly following the luncheon, the visitors were taken through the engineering laboratories and shops by faculty members of the colleges, and the trip was resumed to Lewiston, where a banquet was given in their honor at the Lewis-Clark hotel that evening.

#### DISTRIBUTE BLUEBOOK

One of the features of the trip of the Spokane engineers was the preparation and distribution of copies of the "Geological and Physiographical Bluebook," prepared under the direction of Dean Francis A. Thomson, dean of the school of mines, Dr. F. B. Lancy of the United States geological survey, and A. M. Piper, geologist. The book given the geological formations for the entire distance, starting from the Davenport hotel, through to Lewiston.

The visitors were welcomed to the university and Moscow by President A. H. Upham at the luncheon, Friday noon, a response being given by George Keith, president of the Spokane association. Other short talks were given by Kriss Crowther, president of the university engineers association, Elwyn Eastman, president of the associated miners, Dean Crawford, and Dean Thomson.

### Co-Ed Athletic League Takes in 16 Neophytes

Sixteen new members have recently been initiated into the Women's Athletic association, as a result of their having won 100 points toward award in a major sport this year.

Those initiated were: Lola Hedge, Olga Gustafson, Eva Jane Wilson, Ruth Wolfe, Harriet Swartt, Katherine Nelson, Nita Basford, Winifred Veatch, Dorothy Teats, Blanche Tull, Louise Wilson, Avis Bowdish, Nell Staker, Fontella Langloise, and Gertrude Groestema.

### Creditable Showing Made in Trial Meet By Idaho Wrestlers

Ralph Ross and Ray Patchen returned from Spokane Sunday where they were entered in the Olympic tryouts in wrestling Thursday, Friday and Saturday. Both men did well in their matches, Patchen going nearly ten minutes with Griffin of the University of Washington before Griffin was able to get sufficient advantage to obtain a decision.

Ross met the renowned Red Friday night, losing in three minutes of wrestling against the man who won the championship in the 145, 158, 174, and 194 pound classes at Spokane and will enter the Boston elimination meet for the Olympic team in the 145 pound class in which he is conceded the best chance to win the world's championship in the welter-weight division.

"Babe" Brown, wrestling coach at the University of Idaho, acted as one of the judges of the wrestling.

### Important Positions Taken by Eleven of School of Education

Eleven seniors and former graduates in the school of education have been elected to responsible teaching positions in the public schools of the state, according to recent announcement by Dean J. F. Messenger, head of the school of education.

Pauline Pence of Payette will become an instructor in languages in the Payette schools. Charles Chandler of Burley takes a position in the history department of the Boise high school. Leo Provost of Lewiston has accepted the position of principal of the Weppe schools. Constance Taylor of Burley will teach in the grade schools of Centralia, Wash.

#### HOME EC AT COEUR D'ALENE

Helen Ramsay of Sandpoint will teach home economics in the Coeur d'Alene schools. L. L. Carlson of Moscow will become superintendent of the Kamiah schools. Velma Hamilton of Kamiah has accepted a position as home economics instructor in the high school at Lapwai. Margaret Blackinger of Boise has been elected physical education instructor in the schools at Kent, Washington.

Frances Harris of Kellogg will teach home economics in the Spirit Lake high school. James Winegardner, '21, now principal of the Genesee schools, will become head of the science department of the Sandpoint high school. L. A. Thomas, '21, principal of schools at Lewisville, has accepted the position as superintendent of the Malad schools.

### Campus Preparing for Visit of Club Workers

Approximately 325 boys and girls are expected on the Idaho campus to take part in the second annual boys' and girls' club short course, held at the university June 15-22, according to an estimate by H. A. Stone, district club agent for northern Idaho. This number will represent approximately 60 per cent of the total junior club enrollment in northern and 40 per cent in southern Idaho.

The object of the short course is to give every Idaho club member an opportunity for a week of intensive practical training in the fundamentals of applied agriculture and home economics. During this week the boys and girls will spend at the university, the mornings will be given over to study and class work, the afternoons to field excursions and recreational games, and the evenings to programs, picnics and get-acquainted parties.

The boys will be offered work in livestock, farm crops, and horticulture. Practical judging, fitting, showing and managing of dairy and beef cattle, sheep and hogs will be included in the livestock work. Seed selection, judging, soil preparation and handling will be given in the farm crops courses. Gardening work of every variety will be offered in the horticulture courses.

The girls' work will consist principally of courses in home economics. Instruction for beginners and advanced students in sewing, canning, and baking will be offered and special work in these departments will be open to club leaders.

Reports from the various clubs throughout the state indicate that a wide interest is being taken in the club short course, according to Mr. Stone, who has recently returned from a survey of the clubs in north Idaho. Business men in every community seem to take an unusually active interest in the club preparations to come to the university next June. Many of them are organizing to provide means of transportation of the club members to Moscow, while others are supporting cooked food, sales, basket socials, and programs by which the boys and girls are raising money to make the trip.

Features of the short course work at the university include a big all-club track meet, an Idaho-Washington state-line club picnic for club members of Idaho from the university and Washington from Washington State college, and a big stunt night when all clubs will stage competitive stunts for prizes.

Three appointments to student body managerships have been announced by the A. S. U. I. executive committee.

Fred "Scoop" Taylor of Nampa has

been appointed business manager of the University Argonaut for the coming year; Louis Helphrey of Sandpoint was chosen business manager of the university year book the "Gem of the Mountains," and Llewellyn Rowlands of Sandpoint, was made business manager of the university literary magazine, "The Blue Bucket."

These appointments are made under the provisions of the "general manager" system adopted recently by the students. Each recognized department of the student body organization—athletics, debate, glee clubs, publication, etc.—has its manager appointed and removable by the executive committee. The remaining appointments will be made tonight.

#### 130 ESSAYS SUBMITTED IN ECONOMICS CONTEST

(Continued from page one)

one by a junior, and one by a senior. The announcement of the winner, the final award, and the presentation of the Philo Sherman Bennett prize of thirty-five dollars will be made a prominent part of the commencement exercises.

#### DUAL TRACK MEET GOES TO CREDIT OF COUGARS

Caesarina, still another	Marie Johnson
Jackie, one more	Agatha Platt

### SOPHOMORE SONG

"The Light Upon the Mountain"

## STUDENT HOUSING IS WELL HANDLED ON IDAHO CAMPUS

### Dormitories and Group Homes Built Largely by Private Funds

That the University of Idaho stands among the highest of all western collegiate institutions in respect to housing facilities for students, is the conclusion reached from an informal survey of western university campuses.

At Idaho the housing quarters are concentrated on the campus, a condition which possesses the special virtue of centralizing completely the entire interest of the students, and thus alleviates down-town loafing.

With such adequate facilities, the administration is able to insist on all girls making their homes at the dormitories and sorority houses, which enables proper supervision with the corresponding elimination of overly-stringent restriction necessary when the student are scattered about town.

### SUFFICIENT DORMITORIES

This constitutes a marked contrast to the majority of other western campuses, where insufficient dormitory facilities force the students to seek housing quarters in all types of rooming houses, private homes, and

cooperative establishments. Idaho has completely eliminated such heterogeneous student residence and has achieved an enviable student body compactness.

Another large men's dormitory will probably be built in another year if prosperity returns to the state, which will raise to twenty the total number of buildings for student occupation. The "student homes", for this is what the dormitories and other living accommodations really are, create an impressive array grouped about the campus with their air of comfort and collegiate luxury.

### BUILDINGS ARE VALUABLE

The buildings now utilized for student living include two women's dormitories, Forney and Ridenbaugh halls, one men's dormitory, eight fraternity houses, six sorority houses, and two cottages. One-half million dollars, the cost of these buildings, conveys a good idea of the magnitude of Idaho's living facilities.

All of this construction has been made possible through the willingness of local investors to make their funds available for university use. \$400,000 of bonds for construction of housing facilities have in the past been absorbed by local funds. Thus the state up till this spring had appropriated only \$210,000, for the construction of university buildings, as compared with twice that amount loaned locally for building housing accommodations alone.

Ferris and Hardgrove, a Spokane firm, have already agreed to handle the bonds to be floated for the new men's dormitory. The university ex-

periences no difficulty in financing its construction programs.

## NEW ENTOMOLOGIST IN EXTENSION DEPARTMENT

### F. E. Whitehead to Devote Time to Control of Weevil

F. E. Whitehead, newly appointed entomologist for the extension division of the university, has assumed the duties of his new capacity and is now with Claude Wakeland, experiment station, according to Dean E. J. Iddings, head of the college of agriculture at the university.

Mr. Whitehead is a graduate of the Baker university in Kansas, and has received his master's degree in science at Kansas State Agricultural college. He has had much practical experience in entomological work. During the war he was an aviator instructor on one of the largest American fields.

### WITH EXTENSION SERVICE

He has been employed by the university under a new plan whereby he will spend the summer months in field extension work over the state and the winter on the university campus as instructor in entomology. Immediately following his work with Mr. Wakeland, where he will familiarize himself with methods of insect control in Idaho, Mr. Whitehead will take up his work in the field, spending most of his time in work for control of the alfalfa weevil.

## Y. M. C. A. FOR IDAHO OBJECT OF MOVEMENT

### W. S. C. Secretary Addresses Assembly on "Y" Work

(By Blaine Stubblefield)

"The Work of the Y. M. C. A. on College Campuses," was the subject of a short talk by Paul Phillips, secretary of the Y. M. C. A. at Washington State College, at general assembly last Wednesday morning.

Mr. Phillips outlined the work of the "Y" at W. S. C., and gave some opinions as to its possibilities on the Idaho campus. He said that the association had had to face much opposition since the war on account of its alleged graft overseas. In sketching the history of the organization, Mr. Phillips stated that it was founded in England in 1844 by George Williams and was first introduced into America at Montreal in 1851 by a Captain Sullivan who was working for the welfare of sailors.

### CHENOWETH TALKS

Professor C. W. Chenoweth spoke entertainingly upon college life and religion. His comparison of science and religious faith upon the basis of method and purpose showed keen insight into the subject.

"Science," said Professor Chenoweth, "asks 'how,' but religion must know 'why'. Science describes behavior but religion wants to know why it should be thus. Experience is none the less real because it cannot be explained. If religious emotion makes a man better, there is no need of explanation.

"University life should cover the whole range of experience, and unless it does, it is incomplete."

Professor Chenoweth concluded that Idaho could offer students complete education whenever religious needs are satisfied. He said that we should not lay ourselves open to missionary work but that ever activity we feel ready to accept should originate in the student body.

Suppe's "The Light Cavalry" was played by the Pep band and the assembly showed sincere appreciation. Mr. Marineau's organization handles the heavier music with as much skill as they swing through the fox-trots.

## ASSOCIATED FORESTERS PLAN FOR BIG BARBECUE

### Timber Attaches Also Chose Officers for Coming Year

Election of officers of the Associated Foresters, an organization of students in the school of forestry to promote educational and social activities among members, was held at a recent meeting.

W. E. Buckingham of Moscow was elected president; Clarence Olsen of Seattle, vice-president; and Robert McLaughlin of Moscow, secretary-treasurer.

Announcement of the first annual barbecue to be given on the square mile demonstration forest north of Moscow, Saturday, May 24, by the Associated Foresters, has been made by the committee in charge. A program consisting of competitive sports, such

### AMBASSADOR FROM ITALY TO ATTEND JUNE GRADUATION

(Continued from page one)

capped stronghold of the Austrian army in the Alps. This colossal mine exploded successfully and destroyed the Austrian garrison.

### NAMED AMBASSADOR IN 1921

Prince Caetani was elected national deputy to the chamber in 1921. He upheld the Fascista party program and assisted the present government to success. Premier Mussolini then appointed him ambassador at Washington.

Prince Caetina is a member of one of Italy's most distinguished families, a graduate of Columbia university's school of mines, and has been awarded honorary degrees by Yale and Columbia. He started his career as a mining engineer by graduating from

the Royal university at Rome in 1901. Since leaving Idaho as a permanent residence, Prince Caetani has returned several times to visit the "diggings" in north Idaho and to see his many friends and business acquaintances. This will be his first appearance on the University of Idaho campus.

Where Quality and Service Are Higher Than Price

If you knew what ageing in wood does for pipe tobacco

Even the finest Kentucky Burley Tobacco (and that's the kind we use) is green and raw when it's pulled. You could hardly smoke one pipe load of it.

And here's where Velvet is different: Our ageing takes out that rawness and harshness, and makes the tobacco mild and mellow and gives it fine flavor. Ageing in wood does what no artificial treatment can do.

Remember—Velvet Tobacco aged in wood.
