## THE UNIVERSITY ARGONAUT

**VOLUME XXVI** 

CNIVERSITY OF IDAHO, MOSCOW, TUESDAY, FEBRUARY 8, 1925

## Today, 10 Years Ago

The first play of the present school year will be given next Fri. evening in the Auditorium. The members of the cast have been working for four weeks on Stephen Phillip's "Paolo and Francesca," a love tragedy in four acts. Miss French is coaching the play and among those having leads are Willard McDowell, Beth Soulen, Marguerite Linn, and C. F. Johnson.

帝帝帝帝 Idaho's first conference game put on Saturday night at Pullman proved disastrous and the ads from across the line outscored Idaho and finished the game at the head of a 28 to 17 score. Bohler was the scoring star .Kinnison delivered the goods for Ida-

Prof. Iddings in the Animal Husbandry Department is making feeding experiment to find profitable feeding rations for sheep and hogs.

The Governor of Idaho in his recent address to the state legislature paid a big compliment to the state university. He said that the state of Idaho is fortunate in having its university located in Moscow and that there is a great future before the university. He highly praised the moral atmosphere of the college and said that the young women housed in the dormitories were surrounded with every infuence that will tend to make them women of the type that Idaho is proud to have.

Idaho will play O. A. C. Wednesday night in the Gym. It will be a bang-up battle froc start to finish; something to start those red corpuscles to shaming Mrs. Vernon Castle in their dancing up ond down in your veins and fill you to the guards with that old Idaho spirit.

## **NEEDED AT ONCE** SAYS DR. UPHAM

Armory-Gym and Dormitory Provided for; Completion of Science Hall Asked of Legislature

"Not year after next nor five years hence, but right now," the university should have six new buildings finished and furnished, to care for the 1700 students resident on the campus during the college year, says the administrative publication, "The Limits of Economy." These buildings are:

Science Hall .....\$400,000 Armory and Gymnasium .. 250,000 Library ......300,000 New Dormitory for men ..100,000 Agricultural Building ....350,000 Fine Arts Building .....200,000

\$1,600,000

Of these buildings, only the completion of the Science hall is being asked of the present legislature. The armory-gymnasium is being provided by the memorial fund being raised by the Idaho Memorial association as a tribute to Idaho's war dead. The new dormitory will be furnished by sale of bonds, backed by an organization of Moscow business men, which financed the construction of Forney hall by the same means.

The library, agricultural building Varsity Squad Looks Strong- and fine arts building are not being est in Years; Will Meet asked for nor provided for. The need Several Strong Teams; for them will be met to a certain extent by the remodeling and rearranging of buildings that will be vacated when the sciences move into Science hall. ### **POULTRY FEED TEST COMPLETED BY AGS**

Two-vear Experiment Finds Best Food for Chickens

Milk curd or cottage cheese contains the most valuable nutrients of sour milk for increasing the laying capacity of hens, it was found in a two-year experiment just completed by the department of poultry husbandry, University of Idaho. Although these two elements contain the most valuable ingredients for increased laying, milk whey contains some nu-

The latic acid and milk salts from sour skimmilk did not aid in increasing the size of the eggs or in any way indicate value for poultry feeding, the experiment brought out. Milk casein gave slightly better results than milk whey or protein-free sour skimmilk, but not as good as milk curd. As casein is the principal protein contained in sour skimmilk, there apparently are other substances supplementing casein in both milk curd and sour skimmilk that are valuable for egg pro-BILL IN HOUSE duction. The sour skimmilk has so far given higher production and greater profits than any of its constituents. The pen getting unlimited sour skim milk laid 52 per cent production for the year. The pullets in this pen averaged 191 eggs each, made a profit over feed cost of \$2.79 each and produced eggs at 11 cents per dozen. Only 14 per cent of the eggs produced by these fowls were below 22 ounces per dozen in weight.

For the two years of the experiment there has been a heavy mortality in the pen in which there was no additional vitaminic feed added to the basal ration, which consists of wheat in the scratch feed, the dry mash consisted of bran, shorts, white corn

### Looking Backward

Kooking backward with eyes to the front, doesn't necessarily imply that one is two-faced. Rather, in this case, at least, it simly means that the past is being marshalled in review to furnish basis for criticism of present and future standards and policies.

The Argonaut opened the 1924-25 collegiate year facing certain conditions at Idaho. These conditions involved a rapidly growing student body, an increasingly broadening university horizen, and a healthily mounting scholastic and athletic reputation. Idaho students wanted and decided they could support a twice-a-week campus newspaper. Accordingly, the plan was tried two years ago; and again last year with increasing success.

And now, pausing in the middle of the 1924-25 collegiate stream, not to change horses but to "take inventory," The Argonaut steps forward or a woman be a woman. There is no into the second consecutive semester as a bi-weekly for the first time in doubt about it. It also tests the ingenuits history! The experimental stage is over; The Argonaut has establish- ity of the pledge-and the strength of ed itself as a bi-weekly because the student body it serves has developed a more plentiful supply of news sources. Idaho deserves a bi-weekly newspaper and, fate and the almighty dollar being willing, she will get it!

### Eddy Points the Way

Without a doubt the visit and message of George Sherwood Eddy to Monday morning. But donations were the Idaho campus received universal attention and consideration, Any man who can combine interesting stories of world travel with powerful charitable disbursements that a mere revelations of world conditions so effectively as did Mr. Eddy will never organ grinder and monkey did not lack an interested audience. And when those conditions involve such stand a chance. deep-seated campus problems, American university students cannot help PALO ALTO TREE MAY DIE but be particularly attentive.

Mr. Eddy's disclosure of some American college campus conditions were surprising and probably seemed exaggerated to many. But cer- tree may die within ten years," detainly much that he said is undoubtedly true; and as such demands the clared Professor G. J. Pierce of the serious consideration of college people. It is unfortunate that Mr. Eddy could only point out problems and remedies because generally the ones troyed root system, and sooted foliwho most need to are those who least will head him. That seems to be age are threatening the life of Palo the way of the world, though, people who are most to blame are the ones who are least intelligent and considerate of their own and others' wel-

That, however, leaves a great responsibility upon the shoulders of the more intelligent thinking people, the job of ceaselessly working, by organization and individual effort, to focus efectively the light of common sense and reason on American campus problems today.

### Ye Cross-Word Puzzlers

Fearing that the tremendous "let-up" in brain activity resulting from the close of finals would upset the mental set of many other-wise normal students. The Argonaut will print, in its next issue, a four column Vandal cross-word puzzle.

This little mental teaching-ring should provide a safe outlet for all forms of explosive energy generated during exam week. The puzzle was made expressly for The Argonaut by one of Idaho's prominent artists and students. Brief articles on the history and rules governing this universally popular indoor sport will also appear, and The Argonaut desires very much to know and to publish the name of the first student sol ving the puzzle.

### 0 0 0 0 Registration

Did you ever stop to think what a tremendous job it is getting two thousand students lined up and enrolled in the hundreds of courses offered at the university with practically no friction or lost motion?

That's what the efficiently organized registration staff does at the University of Idaho twice a year. The patience and effectiveness of these staff-members is certainly commendable; and it surely behooves every. Idaho student to remember the bigness of the job, and to always endeavor to work with and not against these registration people.

## STATE TAXPAYERS

When the house at Boise defeated the bill for a four-year standard college course at the state technical institute at Pocatello it saved Idaho taxpayers millions of dollars. It can not be doubted that the purpose of the defeated measure was expansion of the technical school into a second state university, to be run in competition with the university at Moscow.

vocates of the defeated bill. Representative Pond, first speaker for the mea- the north and the south. sure Tuesday, said the people of southeastern Idaho are demanding more but is not yet rich in population and

MILLIONS SAVED FOR | their chidren and are sending them to

No state, however rich in population and wealth, can hold all its college students within its borders. Washington has not been able to do that, with its university at Seattle and its state college at Pullman. There will always be parents who choose to send their sons and daughters to distant col-

state universities, and an attempt to Alto's famed landmark." set up an additional institution in the maintenance of another weak institution in the south. The inconvenience to the university at Moscow is a minor objection when weighted against the burden of maintenance of two state institutions. - Spokesman Review.

## Complexes

Now that exams are over and stulents have a little time to spare a large | yeast did not prove of value in innumber of them have discovered that they are sick. The infirmary reports a rushing business after trade had almost ceased during the week of finals. Its remarkable how little sickness there is among people who haven't health when used with a ration low in time to think about such unimportant

nocturnal quests for tom cats, in the interests of science and in general living the life of a vassal, the poor pledges are finding it difficult to think of anything.

A stranger on the campus asked why some of the boys wore little red ribbons. Also why did it sound like sleigh bells? And where were they?

The same stranger asked if it were new fad that girls crawl in the windows. The Pi Sigma Rhos explained that their door was out of commission.

Initiation is a great institution. It tests whether or not a man be a man the paddle. Some say that initiation is a better test of the members than of the pledges. But it is undoubtedly worth while. It tests the mettle of a man-and who ever heard of a pledge falling to show true blue?

The registration line was entertainsmall. The bursar calls for such heavy

## Winning the West

Irrigation by electrically driven pumps has made hundreds of thousands of acres of desert land in the Intermountain West blossom like the rose.

For a few cents a month per acre, electricity—the giant worker-brings the life-giving water from distant lakes and rivers to rainless valleys, producing rich harvests of fruits and vegetables, cereals and forage.

What electricity is doing for the farmer is only a counterpart of what it is doing for Industry, Transportation, City and Country life or any of the professions. It is a tool ready for your use and which, wisely used, will make the impossible of today an accomplished fact tomorrow.

How electricity does these things is important to the student in a technical school—but what electricity can do is important to every college man or woman, no matter what their life's work may be.

The patrons and patronesses evening were: the Misses Eugenia Alford, Ruth Montgomery, Lucile Eaton, and Mrs. J. J. Gill, Prof and Mrs. S. Gladys Ide, Bernice Brett, Frances Ritchey, Dorothy Helm, Ruby Hoyne, Gene Springer, Louise Nagle, Jean McCracken, Ione Penwell, Margaret engagement of Miss Alene Long, Delta Clark, Dorothy Miller, May Alvord, Gamma and Mr. William C. Guernsey. Mary Dunn, Bernice Glindeman, Ruth Both are juniors at the university.

## ARREST TURNS INTO

University of California, Berkeleythat. Think it's a race track?"

And such was the first meeting. He, the officer, who patrols the college district from 4 to 12 o'clock. And she the beautiful young girl out is a gain in this quarter's enrolldriving in her auto.

But a year and a half will change things. For now he says "yes my VANDAL MATMEN MEET OREGON love" or "yes my wife."

Friends are congratulating the newly married couple, the bride, formerly Helen Eldridge of Berkeley, and George H. Brereton 124. Brereton has been on the Berkeley police force for three years, and during the letic clubs. past year was connected with the history department of the University .--

### WILL GIVE TRACTOR SHORT COURSE HERE

To Cover Soldering, Babbiting, Operation and Repair

The department of agricultural engineering of the college of agriculture, University of Idaho, will conduct a farmer's tractor short course the freshmen also. The turnout for during the period between January almost every weight has exceeded 26 and February 7, it has been an- expectations and the men have made nounced by E. J. Iddings, dean of the their places on the squad have shown college. This course is given to those some real wrestling. Although the who wish to obtain a more practical places on the team are not cinched, knowledge of farm tractors and their the following men were reported by operation.

The work will cover soldering. babbiting, case hardening, the operation and repair of various models of farm tractors which have been pounds, McCammon; Phillip W. Cox. loaned the university by factories for this purpose. Experts from each of these factories will assist in the operation of the machines.

Transportation to and from Moscow, board and room while attending school and a charge of \$2 by the university will cover the expenses of the course.

### SOUTHERN IDAHO TO HAVE SHORT COURSE

Cheese and Butter Making Methods Will be Taught in 3-Day Term

Cheese and butter making methods will be taught in a three-day short course offered in southern Idaho this spring by the University of Idaho college of agriculture. The exact dates and places have not been decided, but the time probably will be about April 25. Cheese-making probably will be taught at Pocatello or Idaho Falls, and butter-making at Boise, Nampa or Jerome.

This course is unique in the west, according to Prof. H. A. Bendixen, of the department of dairy manufacture. All other courses offered by the western universities are longer.

The second term of the annual fivemonth short course in dairy manufacture is just starting with students enrolled from Washington, Montana, and Idaho. The first term was devoted to the study of cheese and icecream manufacture, dairy mechanics and bacteriology and related sub-

The second term will be devoted to butter-making, marketing problems and factory management. The work, which is under the supervision of Professor Bendixen, is done both in the laboratory and the classroom.

### WASHINGTON'S ENROLLMENT GROWS

University of Washington, Seattle (P. I. N. S.)-Although the official check on registration figures has not been completed, indications point to the fact that registration for the

university at Spokane fell through and now Mr. Mathews is angling for some matches with northern Idaho or eastern Washington amateur ath-

The freshman squad will meet the Washington State college yearlings at Moscow, Feb. 14, as a preliminary to the varsity contest and also will meet the college team the week following, when the two varsities meet at Pullman. These two bouts are all that are scheduled for first year men.

Every indication is for a good year, said Mr. Ross, who is directing the coach as doing the most promis ling work:

Kenneth J. Bradley, 128 pounds, Challis; Henry J. Harkness, 138 148 pounds, Kellogg; and Clarence J McCall, 158 pounds, Caldwell.

EDDY DISCUSSES SUBJECTS

(Continued from page one.)

Eddy said that leadership was one of the greatest questions involved in college education. Are universities turning out leaders?

Tests have shown, declared Mr. Eddy, that out of 100 college graduates studied over a period of 25 years, 35 will be dead, 54 financially dependent, five making a living, five

will be well to do, and only one will be rich. Hence every college student should continually be asking himself if he is doing his best.

"There are two great touchstones for the development of character," continued Mr. Eddy. "Honesty is one of the strongest moulders of men, And real honesty on the campus precludes such bad habits as cheating, cribbing, drinking, gambling, and their like. And if a student is to be honest with himself, he must be clean, mentally, morally and physic-

"The other great touchstone is earnestness. Is the college student in earnest about his education; is he getting into the fight for characterdevelopment, or merely standing on the sidelines? The whole future of the world depends on how these and other problems are solved."

President A. H. Upham introduced Mr. Eddy who is here for a two-day visit on the campus studying conditions and interviewing students.

There is a reason why! The Idaho Barber Shop.

## The great leader of a great industry

VERY industry has its leader. L Du Pont was the pioneer in explosives manufacture in this country, and has held that leadership for 122 years.

It has been the privilege of the du Pont organization to inaugurate every great forward step in the development of explosives through continuous research and experiment.

Du Pont not only has produced explosives of every type to meet the varied requirements of industry, but has anticipated those needs by developing explosives to meet new conditions and new problems.

Send for your free copy of the "Blasters' Handbook", an authoritative work describing the practical methods of using explosives for various purposes - industrial, agricultural and general. You will find this book useful in your college work.

### WAR SCARE IS MOSTLY MYTH

Statements That Next World Con-flict Will Be More Terrible Declared Ridiculous.

Washington-Predictions that the made more terrible than any herein developing poisons, were declared in a statement tonight by Secretary Wilbur to be "ridiculous."

poison gas in sufficient quantities to fairly well determined, and walks and wipe out the entire population of a drives worked out. The University of W. S. C. and Idaho Saturday and next city is impossible, he said, and fears that such terrors will be practiced, "should be relegated to the field of sion to hundreds of our young people bedtime stories of the 'bogey man who will get you if you don't watch

Reports that scientific methods of wholesale destruction had been perasserted, "are not true and not justifled by past history or present conditions."

On the contrary, the secretary thought that "the next war will be like most of the wars in history, sporadic and local and involving comparatively few people, and will be relatively quickly over."

Secretary Wilbur said that those who predict vast expansion of the use of gas and germs in future wars forgot that both sides could use such weapons and that "the nations using disease germs as a means of offense cannot confine the effects of disease to one side of the fighting line."

"The chances are that the judgment of mankind will oppose any war which has for its purpose the extermination or annihilation of nations or peoples."

In addition to the physical difficulties of transporting sufficient quantities of poison gases to destroy whole cities, the secretary also cited that treaties have been made prohibiting their use in warfare, and asserted that "we have a right to assume that these treaties have been made in good faith and will be lived

### IDAHO SPRING LAMBS SHIPPED TO MARKETS

In the Shipment Were Some of the Finest Animals Fed by University

Four hundred and eighty 1924 spring lambs fed by the University of Idaho substation at Aberdeen, were shipped to Chicago and eastern markets this week, according to E. J. nium, we much look forward to this Iddings, dean of the college of agri- at the very earliest possible time. culture here. The lambs comprised four pens exhibited at the substation at the annual feeders' day program January 22.

The feeds used in fattening the animals were all produced in the upper Snake river valley section and comprised alfalfa hay, barley, refuse from clover and alfalfa seeds and sugar beet pulp. A complete report on the relative gains and shrinking of the animals on this feed will be available after the lambs are sold.

This week's, shipment of lambs contains some of the finest animals shipped from the university substation, according to Dean Iddings.

### FOREST AUTHORITY WILL VISIT SCHOOL

Dr. C. A. Schenk Will Address Associated Foresters Saturday Afternoon; Lives in Germany

Dr. C. A. Schenck, a forester of international repute, will visit the school of forestry, University of Idaho, for a few hours Saturday afternoon, January 31, and will address the Associated Foresters at two o'clock in room 113, science hall.

Dr. Schenck was for sixteen years the director of the forest school at Biltmore, South Carolina, and during that time, through his publications and travels, became widely known to lumbermen and foresters. His home is now at Darmstadt, Germany.

### 6 NEW BUILDINGS NEEDED

(Continued from page one.)

with neighboring states or with the growth in enrolment in providing buildings for the university" says this report. "During the ten years prior to 1923, while all neighboring states averaged an outlay of \$1,900,000 for college and university buildings, Idaho spent \$206,00".

Within the next two years, according to this report, Idaho needs buildings and improvements worth \$2,110,-000, of which \$475,000 can be provided from private funds and of which \$1,-635,000 would have to be expected from the state.

Would Turn Away Students

"The university neither expects nor the coming biennium," says the presi-

dent's report. "Certain of them, as ing certain precautions. indicated, are more pressing than struction and growth according to sult. some well-defined campus plan. Such a plan is now ready, with the site of Production and transportation of every one of these proposed buildings Idaho must enter directly upon this Monday, both will have three games era of physical growth or deny admiseach succeeding year."

Students have been turned away from the library reading room at almost every hour of the day, this year. on account of lack of space. Use of fected since the last war to such a room 217, Administration building, as point that whole civilian populations a supplementary reading room, n the Whitman at Walla Walla, then Washcould be annihilated by the use of floor above the library has provided gases, germs and high explosives, he temporary relief but this was possible mette at Salem, O. A. C. at Corvallis, only because the Science hall laboratories had not been equipped and so could be used temporarily as lecture

### Should Start Library.

"At this very time construction should be under way on a new and adequate central library for the university," says the report to the board of education. "No other function of the university feels the additional load of every hundred students more directly than does the library. College reference reading in the library that these trips. all students must spend a considerable part of their time in the library reading rooms if they would succeed at all . With the rapid growth of scientific knowledge along many lines there is no end to the production of new and valuable books, with which every standard institution must continue to supply itself year after year.

"The University of Idaho is sadly hampered by lack of library space. Yet only three years ago the present library rooms were opened up, giving us what then appeared to be adequate quarters for years to come. Now there is hardly an hour in the day when students in considerable numbers are not turned away from the reading room because of lack of seats and table space. The periodical room will hold only one table for students, the book-stacks are filled to overflowing, and there seems to be no way to extend the present quarters by appropriating adjacent rooms. While there is no prospects of undertaking to build a new library during the coming bien-

Agricultural Building

'For years attention has been called to the need of an additional building for the work in agriculture. In Morrill hall, where most of the offices and laboratories of this division are located, every conceivable inch of space has been utilized. Basement and attic are completely occupied, and offices and storage rooms have been built into corridors. Probably no other agricultural state in the union carries on its experimental instructional work under such adverse conditions.

"Then, too, the school of forestry, rapidly growing in enrollment and reputation, is compelled to use this same building, being crowded away in one end of the floor. Entire completion of the new Science hall will afford a breathing space for forestry, but for that very reason agriculture will not be helped at all. Important agricultural activities like dairy manufacture have developed amazingly in the state in recent years, with no chance whatever to develop our instructional equipment in like degree. At least one new agricultural building should be started in the next three years and will then be too late to accommodate the revival of interest in agriculture sure to follow the present depression.

Fine Arts Building

"The department of music now ranks with the best in the west. Yet it is uncomfortably crowded into two private houses, one on the campus, one rented nearby. The university's work in dramatics has attracted much more than state-wide recognition. It has makeshift quarters in the university hut. Private and class instruction in art is much in demand but cannot be offered for lack of studio space. The answer is a specially designed fine arts building with a small auditorium and practice rooms and studios as needed. Such a building could be filled tomorrow and would place us more mearly on a parity with other state universities as regards facilities for these valuable lines of work."
