#### VARSITY BASEBALL HOPES ARE HIGH

Show Considerable Improvement Since Whitman Games

A reinforced and determined Vandal eball nine anxiously awaits the initial onslought of the Washington State college Cougars this afternoon, when they clash at Pullman in the first of two game series. The second same will be played at Moscow Saturday, starting at 2:30 sharp.

The Idaho team, after splitting a two game series at Walla Walla with Whitman college last week, has been displaying real baseball in practice Bessions. All positions on the nine are filled with the same men as in former games, with the exception of second base, Coach MacMillan will start any one of Campbell, Jacoby, or Simonds in an effort to solve the problem of the second base berth.

Washington State college won a pe points to a close game, but if Clymonds and serves the crop needs as has been put up in practice this W. A. Moss is carrying on experibe tucked away on the won side of River dry farms. the Vandal percentage column.

#### Agronomy Experts Make Experiments

(Prof. H. W. Hulbert)

In addition to the teaching work given by the agronomy department of the college of agriculture, investigational and extension work is carried on in all parts of Idaho. The teaching and experimental staff of the college includes H. W. Hudbert, head of department, G. R. McDole, associate agronomist, J. D. Remsberg, assistant agronomist and F. L. Burkart, field superintendent .The college staff is directly in charge of the experimental work at Moscow and the demonstration plots at Winchester, Idaho. In addition ,a large amount of cooperative soil, weed and seed production work is carried on with farmers.

#### GRANT CHAPTERS OF PI LAMBDA THETA

Pi Lambda Theta, woman's national educational honorary fraternity, will install a chapter on the University of Idaho campus on May 22. Miss Lois Brown of the University of Washington, who is the national Keeper of Records, will be the installing Norway Champion Pole officer.

There are 16 members on the campus at present who will be taken in, and about 15 former graduates are expected to attend the installation ceremony.

The officers of the local group are: Syble Felt, president; Elizabeth Haymond, vice-president; Allegra Eckles, treasurer; and Alice Carnie, secretary. Miss Bernice McCoy, Miss Grace Zudrele, and Miss Katherine

Bruggraf, are the faculty members. Some alumnae members who are especially notable, and who wil attend are: Miss Ethel E. Redfield. state commissioner of education, Miss tendent of public instruction; and Miss Lydia Winkler, critic supervisor at the Lewiston state normal school.

A man-sized song book was built by the Seattle Ad club to stimulate special sales of the University of Washington song book for song week.

Effectiveness of the honor code this year has been due to publicity in the opinion of members.

#### The Farmer's Vindication

His is the oldest task of civilized man. The issue of his Loors has fed armies in time of war and permitted of contentment and progress in time of peace. He is ever the staunchest and strongest supporter of his country. He competes not only with his fellow men, but with the most relentless and impartial of all—nature. He profits form no one's labors save his own. The roominess of the onutdoors, association with the save his own. The roominess of the onutdoors, association with the trees, flowers and birds fill his days with pleasure. He toils thru a long day, but knows when evening comes that he has accomplished with the united states on college comics is making in cooperation with the United States something. His work is always constructive. In a field of waving mittee on college comics is making in cooperation with the United States grain he sees justification for his labor. He is underpaid in what the economists call our medium of exchange: But he is a philosopher, his pay is in personal satisfaction and love of his pursuit.

That really belongs to life. I thin long to get standing varieties bred up and distance away—but why do we go in a blant-ling herd? A day with two hundred ing herd? A day with two hundred soda pop drinkers in a dirty train is soda pop drinkers in a dirty train is sola pop drinkers in a dirty train is sola pop drinkers in a dirty train is sola pop drinkers. Soil Technology, Grain Grading

#### The Ag School

The College of Agriculture, thru its extension department, Smith ton is part of the business, I shall Hughs instructors, and University Faculty, comes in closer contact with the tax-paying public than any other department of the University. From the standpoint of the "U" it is a remunerative contact—the whole staff of extension workers, teachers and professors are efficient, sincere, and tireless in performing their duties. That their theories are directly applicable to common agricultural pursuits is evinced in the following ways: The breeding of university livestock to the peak of perfection as shown by the wholesale winnings in animal husbandry at livestock shows, and by the production records of dairy cattle; the success of extension workers; our judging teams winning in competition with the larger schools of the west and Canada; lastly, practically one hundred per cent of the Ag graduates have proven successful in their various pursuits. It would be difficult to find a saner, more practical, form of utility advertising for the "U" than the form these things con-

Without the cheers of a football crowd, and with a minimum of ado we are striving for and bringing—more fame to the "U".

#### The Little International

I am very anxious that our students—yes, and all members of the faculty and their families—look in on the Little International Stock Show, to be held by the College of Agriculture on Friday. The University is not yet so large or so complex that all of us cannot be informed and interested regarding all our lines of service.

The University live-stock is famous not only throughout Idaho but all over the United States. The prizes won by our herds at the great live-stock exhibitions are multiplied rapidly year after year. People have a trim little come hundreds of miles to see these prize animals. Now let's all see ting around that."

of Agriculture. Suppose by the end of the college year we all try to know all there is to know about the University. There is an excellent start in attending the A. H. UPHAM. Little International.

## The Safety Valve

I read with great interest and considerable astonishment Mr. Stubblefield's column in The Argonaut. This latest outburst of his, however, was too much for me, and I feel called upon to retort.

The campus oracle's attack on J. Stitt Wilson gives good evidence of one of those "youthful and immature minds," encased in a shell of cheap cynicism, filled with ready-made, -hand-me-down ideas.

The fact that some of the keenest heads on the campus were among those who stayed to argue with Mr. Wilson would indicate to a discerning mind that he had something to say. This, however, had no weight with Mr. Stubblefield.

It was Mr. Wilson's hope that he would cause a few students to think. Well, it is quite evident that Mr. Stubblefield didn't do any very deep or original thinking. His outburst was merely a group of more or less cleverly arranged phrases and wise cracks, all of which show a halfbaked, shallow philosophy.

Since straightforward talk is called for, let me say this: Mr. Stubblefield's published opinion of J. Stitt Wilson finds an exact parallel in my opinion of Mr. Stubblefield. To paraphrase our well-known columnist: I go on record, with strong support, as placing Blaine Stubblefield at the head of the class of undergraduate donkeys. Moreover, I say it here where he can defend himself, which is more courtesy than he showed to Mr.

#### J. Clayton Yearsley

"Oh he's just an Ag. Don't mind mind him, he acts like a farmer. Such remarks as these, with con siderable reference to heels of different kinds, seen to float around from students (if they be such) of other schools, one school in particular Whether these are meant as jokes or merely to deride the basic profession of all business and industry we do not know.

We wish to point out that these he men, who pass such unseemly remarks, are perfectly willing three times a day to fill their superior bodies upon the so-called worthless produce of the plebian class. With the advent of spring we also notice that these golf enthusiasts yet condesend to use wool for their bloomers. Or at least, they kick like the devil if they think they are not getting wool,-E. W. W.

Blaine Stubblefield

We are advised by sundry men, Of riper years and learning, That we should be conservative Albert Alford And not so harsh concerning Things that other people value;

> A democrat and a republican, can didates for the same office, were stumping the county. One day they happened to take dinner together at an isolated ranch house. The two politicians were seated side by side at the family table. The rancher, being very religious, was accustomed to say grace and then ask that members of the family and guests each quote a verse from the Bible. As the republican's turn drew near, he racked his brain for a verse but could think of only one. "Jesus wept", he said. And the democrat, in a still worse plight quavered, "He sure did."

## **POULTRY INDUSTRY** HAS BIG GROWTH

Fourteen New Courses Testify to Interest Taken by Idaho Raisers

(Prof. R. T. Parkhurst)

With the remarkable growth of the poultry industry in Idaho there has poultry in almost any line of work been a great deal more interest in in which a graduate of the agricultry production, fourteen courses are Poultry Husbandry. now offered in this department, eight of collegiate character and five in connection with the school of practical agriculture, commercial dairying, and poultry short courses. Most of the courses given in poultry include some practical work under supervision. Students taking a course in incubation and brooding operate incubators and take care of baby chicks in brooders in addition to the lecture and reference work required. same methods of combining study and practice apply to courses in feeding and housing and to most of the short This spring four students brought off good hatches and successfully brooded chicks to three weeks of age. A poultry short course was given from February 6 to March 6 for the first time this year. Fifteen students registered and work was outlined for them from 7:30 to 5:00

Poultry Are High Class

### AG COLLEGE GRADS ARE SUCCESSFUL IN **VOCATIONAL WORK**

Farmer Students Reach Attainment in Nearly Every Case

LIST OF MANY NAMES

Many Prominent in Field Work; Some are Department Heads

"In nearly every case agricultural students graduating from the University of Idaho have made some attainment," said Eugene Whitman, second year ag student. The college records show innumerable accounts of the graduates making a success in the business and professional world. "It. seems customary," said Willard, "for the different colleges or schools to boast of the accomplishments of their 'grads' at every opportunity, thus showing the fruits of toil put forth by the instructors and students."

Frdm the experiments that have who are interested in the industry throughout the state.

Along with the regular college course th department maintains each year a short course to materially help those who are interested in the industry. This short session deals with the practical side while the longer session deals with the theoretical as well as the practical. It is the aim of this department to become familiar with the dairying industry, to advise and to cooperate with all who are interested; to solve the many problems

'PRACTICAL POETRY" IS ASSEMBLY TOPIC

Dean H. C. Dale Says This Type Soothes One's Mind

Dean Harrison C. Dale of the school of business administration spoke in riers before half of the studes are assembly Wednesday on the subject of "Practical Poetry." Dean Dale is Editor's note: As an aftermath of one of the most popular speakers road company with headquarters in the Doctor's discovery, it has been sent out to various points in the surfound that he has contracted the or- rounding country, and his services are always in demand for addresses

> DR. W. M. HATFIELD Osteopathic Physician freats all diseases, Chronic and Acute Telephone No. 48, Office Telephone No. 93, Residence

Dean Dale said that although he had never made much actual study of the English language, and its poetry, this form had a power of soothing one's mind. This is the practical value of poetry. Such poems as Kipling's introduction to "Starkey and Company" reconcile one to the present six weeks' examinations. For any occasion which may arise, there a verse to which it is applicable. Poetry is also practical as an outlet for the anger, Dean Dale said. He told of an experience in southern Idaho where he had run out of gasoline in the middle of the desert. While he was waiting, he wrote a poem describing things as they appeared to him. This poem he read in closing his speech

#### LAWYERS ENTER **BULL IN SHOW**

We of the Ag School appreciate very much the interest shown by the members of the Law School in our Ag. Fair. They have been fitting a bull ever since the Law School was established. The animal has been thrown many times by all members of the school. It seems they take great pride in their attitude at bull throwing. The animal they are showing was sired by the "Moonlight" and dammed by the "Whole Community." If it were a Spanish Athletic contest instead of an up-to-the-minute fair, their animal would no doubt be placed near the top. But as we said be-fore, this is entirely a modern Ag. show, and animals of the Spanish type will be discriminated against. Nevertheless, this worthy ambition of the Shysters to mingle with intelligent people should be commended.

Come in and hear these marvelous new records. They will touch your heart, or tingle your toes. We will be glad to play them for you.
