The Golden Fleece

By Jason No. 78—Leo W. Jeffres

Far Reaching...Perhaps Controversial

E-Board will be confronted with a farreaching and perhaps controversial proposal tonight, and their decision will determine the future of Student government

The ASUI structure has served its purpose well but with the increasing demands being placed on E-Board it can no longer handle both policy making and executive administration efficiently.

The one proposal seems to be a compromise designed to appeal to those who are afraid their positions may be at stake. The ASUI president remains in his present position as chairman of the E-Board. He still would retain the little power he presently has.

Dividing the legislative from the executive branch would provide opportunity for both the branches to exercise some leadership and possibly even engage in some healthy controversy. It is conceivable that the Senate could refuse to confirm a presidential appointment or override his veto of a major policy decision. The result would be more lively politics-long since absent from the U of I campus.

The proposed composition of the new Senate, which would be instituted in both plans, is itself the basis for more controversy since more views will be represented from across the campus.

More Bodies & Views

What will be some of the reservations expressed by members of E-Board tonight? Undoubtedly someone will introduce the question of whether certain sections of the campus will attempt to control the Senate. The present Executive Board is composed of three members of residence halls and six members of fraternities and sororities.

Ex-officio members add four from residence halls and two from fraternities and sororities. The result is eight from the fraternities and seven from residence halls. This does not include the ASUI president and vice president both from fraternities.

The new Senate would include representatives from the Interfraternity Council, Pan Hellenic Residence Hall Association, and Associated Women Students. In addition there would be four class Senators and seven district senators. This conceivable composition of the new legislative body could remain in the same ratio as the present.

Main Criteria

IF THE SENATE IS adopted, the main criteria will be the same as at present-leadership, campaigning and all the other qualifications and personalities that win elections. Members of residence halls will have a greater opportunity to be represented in the Senate, but so will members of fraternities and sororities. The very size and composition of the Senate ensures that.

Regardless of House

What will determine the actual composition is the initiative and leadership which will be presented by students-regardless of where they live. The four class Senators could be all fraternity men or all members of residence halls or off campus. The Senators representing the four organizations include two from hall, (one man, one woman) one from a fraternity and one from a sorority. The fifth from AWS could be either.

If there is any discrimination in the new Senate, it is that there would be three women representing organizations and only two

Even the prospect of gerrymandering has some limitations under the new plan (Plan A). The only requirement is that students declare which district they want to vote in at the same time they register. Students running for offices must register from the districts from which they are seeking election. Districts would be decided according to population.

There is a possibility that districts could be so manipulated to deny representation to certain groups. One possible reprieve from such distasteful action could be action in a student Supreme Court which would be on the same level as the other two branches of the government.

Insufficient Role?

Here is where the reports which will be presented to E-Board are deficient. Neither explains sufficiently the role of Judicial Council or Supreme Court. Charges

In fact, the report indicates that the Senate would appeal decisions of Student-Faculty Committees to the President of the University, by-passing the Student Supreme

This is a major weakness of the proposed structural changes. If a federal the inclusion of a Supreme Court which would combine many of the duties of such groups as the men and women disciplinary committees and the traffic safety committee.

Policies and pieces of legislation enacted by the Senate could be appealed to the student Supreme Court.

Empty Bookshelves Disturb Students; Is It Necessary?

The question as to what ex- nance, is currently living at the textbook for Wednesday so that we discuss only continued to increase. some of the major principles involved in the course, the professor said to his class. problem. But the basic quali- nancial distinction into desired Be sure to get this book and not the one fications of these laws, are the improvements, as they see that benefits they create which usually health and safety requirements listed in the booklist which is wrong, he

So, with that 30 students left class to go to the bookstore so that they could buy their book and complete their reading assignment. Through the isles to the letter K they filed only to find the following:

Sorry Out of Stock Reorder Has Been Placed Delivery time 12-14 Days.

"Well, that is really great," a student comments. "That should only put me behind about three weeks in the reading assignments."

And so it goes. Unfortunately, this did not happen to just one student. Many students found that at least one of their books was out of stock and was on order.

The question is why? With a decreased enrollment in the second semester by about four per cent it stands to reason that this problem of book shortage should not be so great. Last week the Bookstore said that the selling was heavy but no more than was to be expected

This shortage of books did not occur just this week following three days of book buying by students. The shortage began

Please read the first two chapters in this while registration still continued and has

he reason is unknown. It is possible that some faculty members failed to turn in their orders until later than the deadline and that the books just haven't arrived. Or perhaps registration in some of the classes is larger than expected and there are more students than books.

However, this problem occurs every semester and this semester it seems to have grown worse. Perhaps a committee should be formed to analyze the situation and to find a possible solu-

If not employed, a deadline should be imposed to faculty members to turn in their desired list of textbooks so that the bookstore can order the books well in advance and then possibly alleviate the prob-

The Bookstore is here to serve the students and faculty at the University and the under-stockage of books is not helping. Too many students have gone in and out of the bookstore emptyhanded to let the problem be ignored.

One student suggested that this might be an area that the Executive Board could undertake. Isn't that part of the job of the Bookstore committee which was formed by E-Board members?

Campus Representative

A position is now open on your campus. A Time Inc. college representative on a small or medium-sized campus can expect to earn \$200 to \$750 in commissions annually selling subscriptions to TIME, LIFE, SPORTS ILLUSTRATED and FOR-TUNE at reduced students' and educator rates. On larger campuses, many of our representatives earn over \$750 a year. They work hard, of course, but their hours are their own, and they gain valuable business experience in this yearround marketing program. Send name and address, college, class and any other information you consider important to Time Inc., College Bureau, TIME & LIFE Building, Rockefeller Center, New York City 10020. All applications must be submitted by March 1, 1966. You will be contacted promptly. DAVE: Will Byrne Hay

The Debate: The End Of The Wiggle Or The Wiggle Wins In The End

A Little Wiggle Is Dangerous Thina

Arg. Asst. News Editor As many men know a little wiggle is a dangerous thing, but

Idaho coeds interviewed in an

Argonaut survey agree to its

The coeds were responding to a statement made by a noted Chicago doctor recently that there is no physiological reason for a girl to wiggle when she

The doctor said that the wiggle is entirely put on by the female. Wiggle is Put On

Carla Rotert, Forney, agrees with the doctor:

'I'm inclined to agree in most cases. However, I've seen some girls who do this because of physiological problems such as being overweight."

Miss Rotert thinks that a rather than being beautiful, is repulsive.

Julie Pence, Gamma Phi, agrees that heftiness is the cause

Miss Pence said, "destroys the it appeals to the male which body's conflibrium and causes adds social pressures. But a very the wiggle."

Some girls, however, admit their strategy. "It all depends," Leslie En-

LDS Speaker Is Set At Pullman

Mark E. Peterson, a member of the Council of the Twelve Apostles of the LDS church, will speak at 10 a.m. this Saturday at the LDS Institute of Religion in Pullman.

Peterson is the author of many books and was formerly the editor of being as bad as girls about of the Salt Lake City Desert News. Previously head of the Western European Missions, he is now a member of the Board of Education for Brigham Young University than the girls I've seen." and a director of the Desert News.

stitute of Religion.

sign, Kappa, said, watching you walk." Jerri Roe, Shoup, said that most girls wiggle naturally, but

that "some help a little." "Everybody walks in their own way and style," Joan Balley, Tri Delta, said "When a girl wiggles,

it comes naturally.

A girl always wants to be noticed. When she walks past a table of boys, there is a little spark that makes her want to

THE CHEVROLET

This is about a Chevelle—a very special one—with a bulging hood, a black grille and red stripe nylon tires. Start it up and you've tuned in on 396 cubic inches of Turbo-Jet V8.

Get it moving and suddenly you're a driver again. With gears to shift. A clutch to work. Even a set of gauges to read, if specified.

Now take a curve, surrounded by a machine that delights in crooked roads.

This, you see, is an SS 396. A Chevelle, yes. But what a Chevelle.

For the guy who'd rather drive than fly: Chevelle SS 396

Most Unusual

This is a most unusual setting for moose, but some 100 or more animals spend 3 months in a stabilized sand dune area feeding on bitterbrush and wild black cherry and then in March move Restoration of mountain goats back into the country adjacent to Yellowstone National Park.

The black bear is fairly common in a large part of Idaho's timbered country. They are not often seen, but bear hunting has become increasingly popular and about 3,500 were killed in 1964. Bears are omnivorous in their feeding habits. They are particularly fond of wild fruits and berries and huckleberry pickers sometimes find bears in their favorite huckleberry patches. Grizzley Bear

rarest of all large mammals in Idaho is the grizzley bear. A few are reported to live in the wilderness country. No one knows how many and authentic reports are few and far between.

Water Meet Held Here

"An intellectually honest basin account can be an invaluable tool your region," members of the Economics Subcommittee of the Columbia Basin Inter Agency committee were told at the U

E. G. Nielsen, Phoenix, administrator of the Arizona Power Authority, traced the evolution of reclamation financing to define basin accounting and how The bulk of the range of this basin accounting bears upon species of mountain caribou is policy determinations. Nielsen's talk followed a subcommittee business meeting chaired by H. W. Harding, Seattle, of the U.S. Department of Labor.

"Develop a basin account concept which recognizes the places and potential contributions of power, and existing irrigation in the regional and national economies." said Nielsen, "rather attend and to take part in the root and the Salmon River country of timber by fires has probably than one which subordinates all to future irrigation.'

When tax dollars are used to send men to the moon..

they are playing a part in space exploration-a job we expect the federal government to do. The nation is much better able to pay for jobs of this kind when the government cuts out needless spending. But, right now, some people would have the federal government spend more of your tax dollars for additional federal government electric power plants and lines.

This is needless spending because the more than 300 investor-owned electric light and power companies can supply all the electricity our growing nation will need.

Wouldn't it make sense for the federal government to stop such needless spending and use your tax money only for items that can be justified on the grounds of national interest?

THE WASHINGTON WATER POWER CO.

The IBM interviewer will be on campus March 2

Interview him. How else are you going to find out about new ways to use your talents and skills in an exciting "go-places" career?

> You could visit a nearby IBM branch office. You could write to the Manager of College Relations, IBM Corporate Headquarters, Armonk, New York 10504. But we would like to see you on campus. Why not check at your placement office today? See if you can still make an appointment for an on-campus visit with IBM. Then interview the IBM interviewer. Whatever your area of study, ask him how you might use your particular talents at IBM. Ask about your growth potential in America's fastest-growing major industry. You'll never regret it. IBM is an Equal Opportunity Employer.

The Pi Kappa Alpha Colony inspection te took a step toward the attain- on a tour of the campus by colony ment of their charter Saturday members. by passing the offical inspectby national, according to John Pederson, acting publicity

Pi Kaps Near Chapter Charter

The inspection team included the national executive director of Phi Kappa Alpha, Earl Watkins. Watkins made the trip out from Memphis with a five-man inspection team from district chapters at Washington State, Linfield College, and the University of Washington.

Pi Kap national vice president R. H. Clark was also scheduled to come but was unable to do so.

In order to pass inspection several things had to be done. Thirteen requirements were set by the national fraternity, including the attainment of a grade point average higher than the all men's campus average.

Talks were given by various officials regarding the colony's progression and status on campus, among which talks by Guy Wick s, dean of students; Gary Chipman, IFC President, gle Felton, Kappa at 2-2441 or 2-1546. and vaious colony officers. The

The colony now must make a perspectus or petition, explaining in detail functions of the colony, its individual members, and the campus. This petition then will be sent to each of the 130 Pi Kap chapters in the United States for approval.

If approved by all the chapters, plans will be arranged for an initiation ceremony and banquet in the spring.

The national inspection team also approved appropriation of funds for beginning construction of a new addition to the present colony house which will enable them to expand their present capacity, Pederson said.

Zags Tough On Defense

By JOHN JAMES Arg Sports Writer

All but eliminated from the Rig Sky basketball title race, the Idaho Vandals will try to play the role of spoil. ers this Friday when they invade Ogden for a return match with the Weber

Defense Tough

Again, the old nemisis to highscoring teams ruled in this encounter, namely good, tough defense. Idaho's point-production machine was throttled to 30 points under its nationally-rated 95 average by the tough Zag de-

The Vandals did jump to an early 8-3 edge in the initial moments of the first half; but Coach Hank Anderson's conference hopefuls slowed the tempo to their style of ball and played a tight man-to-man defense to claim a 37-26 margin at the

Lack Rebounds Idaho's lack of rebounds and inconsistent scoring made Gonzaga's job easier in the second half. The Bulldogs finished with a 50-38 board advantage and a 43.8 to 37.3 shooting percentage edge. Idaho was also on the lowend of the foul margin, committing 21 to Gonzaga's 18. The turnovers were nearly even.

Dave Schlotthauer, Idaho's 6-8 center, finished the game with 11 points and Bob Pipkin had 9. Zags Gary Lechman got 15 and John Brodsky and John Dougherty collected 12 each.
This weekend the Idaho Vandals

travel to Weber State and Idaho State, Friday and Saturday. The Vandals now have a 11-9 season

Vandals Qualify For NCAA Meet

Idaho's Vandal skiing team placed third in the University of Idaho Invitational Ski meet held last weekend at McCall's Brundage Mountain. The third place finish earned Coach John Ostbo's club a birth in the NCAA finals at Ft. Lewis, Colorado, March 3,4,5.

Ostbo's crew accumulated 355.7 team points behind Big Sky with a time of 1:15-just one tenth opponant Montana State Univer- of a second ahead of Jay Jalsity with 373.1, and the Univer- bert, a University of Washingsity of Washington team with ton product. Jalbert's time was 381.2, and a first place finish just two-tenths of a second betin the meet.

Fourth In Skimeister Event Malcolm Orkney, 1:15.3.
Vandal skier, Mike Rowles. Five Vandals Place Vandal skier, Mike Rowles, picked up 313.6 points in the Skimeister event for a fourth tian Guttormsen of the University of Washington with 354.7.

Teamwise, the visiting University of Washington squad swept the field of events with first place team honors in every event. The Husky crew picked up 94 team points in the jumping, 98.3 in the downhill, 94.7 in the slalom, and 94.2 in the cross country. Idaho's Ole Bergset and Jon

Seetin finished high in the individual standings. Bergset placed third in the hour long cross country race with a time of 1:05.9 for two runs in the finish. Rowles placed fifteenth slalom.

in the downhill with a time of 1:17.0 just five seconds behind winner Dale Miller of Weber State. Jim Shafer, also of Weber, placed second, just two seconds behind his winning teammate.

Charlie Meaker, Montana State downhill specialist placed third

ter than that posted by teammate

Idaho's Brent Brady, Mike Rowles, Barry Boydstun and Dave place finish behind winner Kris-tian Guttormsen of the University sixteenth, twenty-fifth and twentysixth, respectively. However, only four and one-half seconds separated the thirteenth and twenty-sixth places. Brady's time was 1:19.0 while McNaughton turned in a time of 1:23.5. Boydstun, Brady and Rowles

also placed in the slalom event along with third place finishing teammate Seetin. Boydstun's time of 1:13.2 for two runs was good for eighth place, while Brady's time, just three seconds slower, earned him a tenth place with a time of 1:24.9. Mjoen Wins Slalom

The slalom was won by Thor Mjoen of the University of Washington. Mioen completed the course on two runs with a time of 1:03.4. He was followed closeby Weber ace, Dave Miller. Miller, this year's downhill winner, crossed the finish line just three-tenths of a second behind Mjoen. Bill Ahrens, Montana State, captured fourth place honors behind Seetin with a time

Sectin Qualifies for NCAA Seetin brought home fifth place honors in the jumping event, to qualify him for the NCAA jumping finals to be held in conjunction with the Ft. Lewis fials in March. Seetin's jump was

measured at 195.6 feet. Karl Blom, University of Washington, captured first place jumping honors with a jump of 222.5 feet. He was followed by Montana State jumping ace, Jan Senerued, 218.9. Senerud has already made a name for himself in Big Sky sports circles with the soccer type kick he uses as the Bobcats football kicking specialist.

Teammate. Eric Johnson. placed third with a jump of 206. - Idaho 95, Hawaii 72 (Moscow) 9 feet. He was followed by Jan garretson, University of Wash-

Tom Thomsen wanted challenging work

He found it at Western Electric

T. R. Thomsen, B.S.M.E., University of Nebraska, '58, came to Western Electric for several reasons. Important to him was the fact that our young engineers play vital roles right from the start, working on exciting engineering projects in communications including: electronic switching, thin film circuitry, microwave systems and optical masers.

Western Electric's wide variety of challenging assignments appealed to Tom, as did the idea of advanced study through full-time graduate engineering training, numerous management courses and a company-paid Tuition Refund Plan.

Tom knows, too, that we'll need thousands of experienced engineers for supervisory positions within the next few years. And he's getting the solid experience necessary to qualify. Right now,

Tom is developing new and improved inspection and process control techniques to reduce manufacturing costs of telephone switching equipment. Tom is sure that Western Electric is the right place for him. What about you? If you set the highest standards for yourself,

enjoy a challenge, and have the qualifications we're looking for - we want to talk to you! Opportunities for fast-moving careers exist now for electrical, mechanical and industrial engineers, and also for physical science, liberal arts and business majors. For more detailed information, get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.
