IN WASHINGTON, D. C. -Dr. Alfred W. Bowers, professor of anthropology at the U of I, is now in Washington, D.C., to provide information about the migration movements of three Missouri Valley Indian

tribes to the Indian Claims Commission. It is investigating tribal claims to land areas in the Great Plains and Western Woodlands.

Madame Nehru **Cancels Speech** Madame Rajan Nehru, wife of

the Secretary-General of the Minhas cancelled her appearance here today. It was announced by William E. Folz, head of agricultural economics, representing

the Public Events committee. Madame Nehru was scheduled to be at the University as a Public Events lecturer at 10 a.m. in the Memorial Gym-nasium. Ill health forced her

cancellation of several speaking engagements, Folz said. Folz said the committee was unable to obtain a suitable replacement, so that appearance was dropped entirely. The next Public Events speaker will be Edward P. Morgan, ABC news analyst.

Brought to the Idaho campus for a journalism conference, Morgan will speak to students, faculty and townspeople at 9 a.m. March 18, in the Memorial Gymnasium.

# **E-Board Hashes Over SCRUB Plans To Revise ASUI Structure, Schedules Public Hearing For Students Tomorrow**

## **Senate Representation Is Discussion Topic**

Executive Board hashed over the proposed ASUI structural changes presented by the Student Government Review and Revision Board at its meeting Tuesday night and scheduled a public hearing for tomorrow morn-

U of I students are invited to attend the hearing to question board members on the representation proposed for the newly constituted Senate suggested in both plans.

The hearing will be hold at 9 a.m. in the Eee-da-hoo Room of the Student Union Building or the Borah Theater if enough students attend.

members would be eliminated. Under both plans the Senate

would include: 4 class senators, one from each class; 7 district senators elected from specified areas of the campus; 5 residential senators; including 1 from Interfraternity Council, 1 from PanHellenic, 2 from Residence istry of External Affairs of India, Hall Association, and 1 from Associated Women Students; and

a non-voting faculty advisor. Veep As Speaker lected by the Ser Tuesday night the consensus of its membership. the Board was that the ASUI

vice president, which would be chosen in campus-wide elections,

DIANNE GREENE

included in both plans-composi- SCRUB member, directed the tion of the Senate. Ex-officio discussion of the proposals. Miss Green favored a separate speaker of the Senate, rather than placing the ASUI vice presi-

dent in that capacity. Johnson and Bill McCann, ASUI president, both disagreed. McCann said that Miss Green's suggestion would give the speaker of the Senate more power than the ASUI vice president, whowas elected by the entire student

body. The Speaker would be selected by the Senate from among Cut Size He added that the vice presi-

dent as speaker would also eliminate one cabinet member and cut its size as well as adding continuity between the legisla-

tive and executive branches. Miss Green agreed. Johnson suggested that Activities Council be eliminated and

that it's areas be incorporated into the ASUI President's cabinet Miss Green said that areas of

the Council are already overburdened with work but that perhaps they could be worked around. Johnson said that possibly AC cabinet members could each be in charge of 8 to 15 committees. Budget Difficulties

Later Johnson concluded that because of the budget, splitting up Activities Council would be difficult and therefore suggested that the Council be placed under a single cabinet member — but not the vice president.

The veep would already be speaker of the Senate and busy with liason and other responsibilities.

Fry said the cabinet should be

# Premarital Sex Is Out, Says Father Van Christoph

"With increased emancipation of women, at least in our society the position of women has deteriorated as far as morality is concerned, and the chaste woman is a joke-she is the chased woman, who runs just hard enough to be caught."

This was one of the points made by Father Van F. Christoph of Gonzaga University in a speech on the Idaho campus Sunday. His visit was sponsored by the Religion In Life Committee.

He said that in the past century the attitudes concerning sex have swung from one extreme to the other. The Victorian male acted as if there were no sex and the twentieth century male acts as if there is nothing but sex.

**Right To Free Love** The right to free love and promiscuity cannot be determined by the excuse that everyone's doing it, he said.

"Will the wisdom of the ages-and it remains wisdom still-prevail? Our

passions are tremendous servants, no one should allow them to be his master. The thought of undisciplined sex ---where should it start and what should control it-must be questions answered by those who preach and sponsor free

"Right and wrong is not a matter of counting noses. For right is right if

no one is right and wrong is wrong even if everyone is wrong." Sex Is A Gift

Sex is a tremendous gift of God to man to be used not in any old way, but in a manner suited to man-a rational being with a supernatural destiny, he said.

The press, stage, screen and TV have capitalized on our interest in sex and it is no accident that present-day college courses on the family usually devote considerable time to the premarital sex question.

"Few problems have more relevance to students and while in the last analysis, one's stand on premarital sex is a personal matter, the arguments pro and con have been bandied back and forth so often, and the various statistics have been interpreted in so many convenient ways, that it is often difficult to sort out the pertinent facts.'

The double standard still remains, he said.

"Sex infractions on the part of males are more casually regarded than failures on the part of women. If we can believe the reports of the investigators, close to 70 per cent of the male population in the United States have had premarital sexual experiences.

### 'Andorra' Is Criticism **Of Human Prejudices**

The play, "Andorra," carries its audience to a myth-ical setting and is filled with dream-like characters which can be applied with penetrating realism to our world. Written by Max Frisch, the play in 12 scenes, hits hard at human pettiness, conformity, and prejudices.

"Andorra" will be presented at the University at 8 p.m. March 17, 18 and 19. in the Auditorium. Casting took place last week under the direction of Prof. Jean Collette, chairman of dramatics.

Several included in the cast are John Daley, off campus, Andri; Vickie Haight, Pi Phi, This ssue Barblin; Walter Brennen, Lind-ley, Teacher; Julie Martineau, Huston, Mother; Kandy Kemp, Kappa, Senora; Jim Freeman, Phi Delt, Soldier, and Don Volk,

Each semester students complain about poor estimates by professors about the size of their classes, extremely high prices they pay for textbooks, and the "log-jam" that occurs during registration.

Some of the complaints may be justified—others aren't.

In a letter to Jason last week, one student cited that 65 class enrollments had been miscalculated, resulting in textbook shortages.

The student asked "I am aware that the University Student Bookstore cannot anticipate student enrollment in every class but to miscalculate on 65 of them?

He, like most students, deducted that the directors of the bookstore estimate the number of texts which will be used and ordered.

But instead the bookstore employees and directors are on the other end of the chain of command.

The chain begins early in the fall. Professors are asked to estimate the size of classes for the entire year and to give the name of the texts to be used. Most do-some fail to meet the deadlines and students are confronted with the shortage.

A second estimate is also requested by the bookstore to allow faculty members to up-date the original estimates.

Before the end of each semester the bookstore sends notices to faculty members asking for estimates of the size of classes and for the text to be used. The professors receive a yellow post card which they are asked to send to the bookstore after classes. The card tells the store the size of the class and whether more textbooks are needed. If the cards are not received, the bookstore calls faculty members who are responsible for classes whose texts have run out or are in short supply.

erature will be almost impossible to determine or estimate before actual registration. The number of English literature textbooks on the bookstore shelves exemplifies this.

Some of the class shortages include: Actual Est.

#### By PAT COBB 🛲

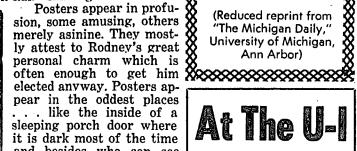

As you read these words, I am somewhere in San Francisco. Having never been to San Francisco, I am somewhat excited. With my kind of luck, I'll probably catch that flu that's going around and see San Fran-cisco from my hotel window. Naturally, you all knew I'd get around to campus politics, so here it is, early in the game

Since two conventions are coming up this weekend, reflections are in order concerning the campus political atmosphere. These conventions are held with an outer semblance of order and an inner chaos indicating confusion, ignorance and despair. One must, for example, keep that blond head delegate from bowing to her boy-friend's fraternity and thus throwing precious votes away on a fair-haired, empty-headed boy. Hourly conferences sometimes have things all sewn up before the gavel sounds, insuring "the machinery's wishes." Oh, the machin-ery should be so powerful!

Candidates rush around looking slightly harried but never admitting this as it might be an indication of an inability to handle the situation. So many cliches float note situation, we need your around that people merely assume a polite indifferent assistance. By sacrificing your stare and never hear a word a candidate says.

This is sometimes brought on by a candidate standing at the front of the dining room telling the room at males to enter the upper half large that he is only going to make a few remarks while of their class. This is not an atyou sit there, first of all, with a forkful of food in your tack on intellectualism. Study, mouth while the rest of it gets cold. You have an exam next hour anyway but you sit there idly wondering why in the world he used a bowl to cut his hair.

These candidates, in the meantime. get very little sleep, but most of the fatigue probably comes from so much phoniness. He manages to hit most classes but with very little preparation and gets jittery mouth muscles from so much smiling or broken hand bones from so much hand-shaking.

and besides who can see without their contacts? The word apathy gets kicked around at this time of the year, directed at all kinds of people. Of course, this attitude has been around forever but it is always assumed that this

time perhaps something can

be done about it. With my innate idealism I ask, Why not? All it takes is one person in each key place wheedling, coercing, pleading and flattering people into inter- tions of The Argonaut had been est. Maybe somebody should see to it that there are people around to get others on the band wagon.

Pat Cobb

It's the "in" thing to be involved and campus politics is as good a place as any to begin. I hear so many people grouse about the "way things are" (whatever that means) and vet these same people have an intensely negative attitude when it comes to getting with it.

Perhaps the men of Lindley could help organize the omplex which is, in fact, potentially omnipotent. However, with the kind of organization present now, they're about as powerful as a sackful of marshmallows.

Last fall there was a great deal of pseudo-underground independent action threatening to do various things and ultimately accomplishing nothing. One of the ideas brought up was to bolt parties in order to support

TWENTY-FIVE YEARS AGO Bundles for Britain

By Bob Stanfield

Out of the Mines Building came 20 men strangely equipped with gas masks and metal tanks strapped to their backs. Gurgling and mumbling they shuffled out of sight headed for a strange and hidden underworld as part of their course in mines safety techniques. This underworld, known only to renegade college students, physical plant maintenance men, and a select group of mining students, is that of the heat tunnel which runs under a number of sidewalks on campus.

The sight of this weird procession brought back memories of great body of legend and myth which has

sprung up about this unknown region. One particu. larly romantic epic, as related to me as a freshman by a fifth year student, was that of the Mole. The Mole was an under-

graduate some years back who lived at Willis Sweet. He dedicated his entire four years at Idaho to the full life in the heat tunnels. The Mole didn't like people, and his roommate delighted in inviting large num-bers of people up to the room for lengthy bull sessions. The Mole would disappear, and for a long time nobody knew where he

**Bob Stanfield** . . .

went. Later it was discovered that he spent his time exploring the vast network of heat tunnels. The Mole knew where every tunnel went and where all the safety exits were. He found the heat tunnels especially inviting in the winter. Instead of braving the bitter Moscow air, he would stroll to his destination via the heat tunnel, pop out of a manhole, dust himself off and walk into a classroom building. The Mole was not the only student to practice this

form of civilized spelunking. Several years back at an Eastern university, it was discovered that an architecture student had lived an entire semester in the heat tunnels, fixing up an area with a mattress, a desk and bookshelf.

The Mole's world was a strange one. Stretching along the ceiling into the distance are the various pipes which supply the heat for the various university buildings. At intervals the pipes rattle and pound as though they might explode. On the walls are names and drawings which reveal previous student penetration. In the tunnel in front of McConnell and Upham there is a vast mural painted on the wall depicting University life with the faces of some prominent administrators being recognizable. Like caveman drawings, they await discovery by some future anthropologist.

The closest the University ever came to introducing a large number of students to life at the underground level was the recent Borah-Lindley bombshelter experience. That was the year the men's half of the Complex wasn't ready when school started.

Since the University is an educational institution which endeavors to prepare its students to meet the demands which might be put on them in normal life, the 212 members of the two halls were put in bomb shelter under the Complex cafeteria (while paying the same room rent everybody else paid for a regular room). As an officer of Borah Hall, I had the unwelcome task of introducing freshmen and their parents to this new en-

vironment. The freshman and his folks would appear at our table to sign up and to be directed to his room. After the paperwork was taken care of, I would innocently announce Knitting becomes campus fad- -- "Would you like to see a sample room?" staying." "Oh-isn't he staying here?"

At The U-I Years

The bookstore immediately reorders by airmail for texts and asks for special handling delivery. Depending on the location of the publishing company, reordered textbooks usually arrive within a week to 10 days.

As of Feb. 17, 27 of the 75 texts reordered had already ... ived. The greatest shortages are in the upp relassmentechnical fields. Courses offered for the first time are also difficult to estimate.

Although students seldom ask about overestimates, they do occur. In one business course only 15 students enrolled, compared to an estimated 80. The result compiled several times adds to the \$100,000 stock of books now on hand.

In business 133 the opposite occurred. A total of 120 students enrolled in the class, double the estimate of 60.

Last fall the bookstore upped estimates of some texts by 10 per cent because of the increased enrollment forecasts. Determining which texts to include was the difficulty.

Orders for new textbooks which will probably be used again are also upped.

Although a few faculty members do not realize the mechanics involved in obtaining textbooks, most do and meet the bookstore deadlines.

Even those that do are confronted with a problem. How do you estimate the enrollment of a course? Certainly past sizes of the class must be taken into account. But often the number of students in courses such as American literature and English lit-

vernmental decision-makers.

tober. If the store bought a text that was not used again, it would stand to lose a considerable amount money.

Another factor is the amount of storage space available. There is plenty of space during summer school when few texts are kept on hand, but little during the spring, according to the bookstore.

Perhaps the most controversial question is why are textbook prices so high? The bookstore manager says the prices are determined by the publishing houses, not the store and that the markup is only 20 per cent. Although this answer may be justified by the bookstore, students are still caught in the squeeze for profits by the publishing company and for maintainance by the bookstore.

What is the solution? Some co-operative bookstores are operated at colleges and universities, including Harvard. Some institutions have dropped the coop idea.

A student-faculty committee was organized by Executive Board last year. Other universities are also inquiring about student bookstore operations. It's time for some new ideas and fresh approaches. Perhaps the "culprit" in the situation is the publishing company which-although itself caught in a price-profit squeeze-is capitalizing on the greatly increased demand for texts.

The bookstore committee needs some fresh ideas. Perhaps an open, KUID televised student forum would help. The SUB Sound-Off might add some help. But students must end their crying and do some investigating and thinking.

Campus Union Party conven-

the independent candidates?

But independents could be an influence both in convention and then campus-wide if, for instance, they sent their delegations en masse to convention, IF they were informed and organized when they hit the convention floor. One of the issues in the convention and thus the campaign will be the proposed ASUI structure change. Do you know what it is all about?

## **Business Barometers Influence Changes In Tax Structure**

### By MIKE SEIBERT

**Argonaut Managing Editor** 

The escalation of spending for the war in Viet Nam, increased production, increased spending, more money in the economy all account for the rise of prices which have been increasing steadily in the last five years.

All of these factors give the green signal for go-go and produce and spend on the local level as well as on the national level.

Cloyd J. Sisty, manager of the Moscow Bank of Idaho, said that Moscow sales are increasing. In 1965, he said, there were more automobiles sold in Moscow than in any other year.

Television sets, refrigerators and other more expensive pro-ducts were in demand here and Editor's Introductory Note

everywhere. Jim Newsome, district man-Insurance office re-enforced this rising spending by Moscow citizens. There was no slack in real estate purchases this year,

he said. In fact people seemed to purchase more and certainly had more money and were more willing to spend it, he added. The Newsletter put out by the First Federal Bank of Idaho confirmed these expenditures. It stated that a sixth consecutive vear of economic expansion is the general outlook of 1966. It also said that personal income

a rate of increase almost equal to that of employment, wages, and business profits. The Newsletter also said that

capital expenditures by businesses for new plants and equipment in 1966 for the nation expected to increase by 14 per cent over the record year of 1965. This is, reflected, the article said, in the backlog of unfilled orders for machinery and equipment and from the surveys of capital spending anticipated.

Figures from the Bureau of Labor Statistics show the wage increases won in 1965 averaged per cent in the first three quarters of 1964 and 3.1 per cent in 1963.

#### CPI

Meanwhile, the consumer price index (CPI which is figured by comparing the prices of today with those of a base period, this period most often being 1947-49) increased 1.5 per cent in 1965, as against a rise of 1 per cent to 1.3 per cent in each of the previous years.

he tun-Perhaps the most significant a vast warning is the 1.7 per cent rise in the wholesale price indexafter fe with ng recgenuine stability for six full discovyears.

All these increases may appear to be a good sign for our economy. They are considered by the economists to be business barometers or measures of the present economic situation. However, as most economists will say, this con-tinuing upsurge could be bad. Christmas

That the upsurge might be imagined can be negated with a look at the 1965 Christmas sales. A recent survey of 128 store presidents by the National Retail Merchants Association showed that 98 per cent of them

**Class President** ır table the panounce **Resignation** Is parents ell Hall **Defended By Fry** ie girls

Business barometers are often cited in an econoager in the Moscow Farmers mist's view of the economy and often given as reasons for increase or decrease in taxes. But what are business barometers?

These barometers are used to find out if times are good and to predict the future state of the economy.

Mr. Average Man does this by the feel of his pay envelope on Friday, by the thickness of his pocket-book, by the size of his rent or tax bill, by the price of steak or hamburger.

The economists use all these criteria, but they also follow others which are not so obviously related to personal welfare. Among the most sensitive indicators of our economy are the stock and commodity gains in 1966 are anticipated at markets. When people are confident they buy stocks and bonds, and, in answer to the law of supply and demand, the market goes up. When people lack confidence they sell, and the market goes down.

Production indexes are also good barometers. Obviously, if we produce more goods this year than last, our business has been more active.

Money being spent for industrial expansion is also highly regarded as an indication of business health. This reflects the confidence level of the industrial leaders.

Price indexes are also widely followed as barometers. One of the misleading things about a price index is that it is easy to accept it because it is presented with the finality of figures, when in reality the index is only a human estimate. In the story 4.2 per cent compared with 3.2 below an attempt has been made to use these business barometers to indicate the economy at present. 

received at least 10 per cent Nam and increased expenditures above 1964. This same survey for the Great Society, deficit showed that some store chains finance is expected to be near including Detroit's Federal De- \$8 million.

new all-time record well above \$500 million. This indicates an increase of approximately 8 per cent over cash receipts in 1964. Deficit

and inflation sets in.

This is also true on the nat-ional level. In an article in the January 12 Newsweek Henry Hazlett pointed out that in the current fiscal year spending is expected to exceed \$105 billion, some \$24 billion more than in the 1961 fiscal year. He added that in addition substantial tax cuts have been enacted with the result of an annual deficit averaging more than \$6 billion.

Hazlett says that President John-

GENIUS button!

### General Electric is passing out GENIUS buttons. What's the point?

We want to spread the word that there's room at General Electric for talented people who want to take on big challenges. We like to call these people GENIUSES. But what they're called isn't so important as where they're headed. And at the General Electric Company, there's plenty of room for GENIUSES, no matter what

their particular field of interest. If you want to be recognized for your talents come to General Electric, where the young men are important men. And be among the first on your campus to own a genuine GENIUS button. It will serve as a reminder that G.E. . . . and GENIUS . . . and important challenges . . . all go together.

50-year leader in aerospace technology

Let's talk about a career at Boeing...

**Engineers and Scientists:** 

Campus Interviews, Thursday and Friday, March 10 and 11

The most effective way to evaluate a com-pany in terms of its potential for dynamic career growth is to examine its past rec-ord, its current status, and its prospects and planning for the future, together with the professional climate it offers for the development of your individual capabilities.

Boeing, which in 1966 completes 50 years of unmatched aircraft innovation and production, offers you career opportunities as diverse as its extensive and varied backlog. Whether your interests lie in the field of commercial jet alriiners of the future or in space-flight technology, you can find at Boeing an opening which combines profes-sional challenge and long-range stability.

The men of Boeing are today pioneering evolutionary advances in both civillan and military aircraft, as well as in space programs of such historic Importance as Ămerica's first moon landing. Missiles, space vehicles, gas turbine engines, transport helicopters, marine vehicles and basic research are other areas of Boeing activity.

There's a spot where your talents can mature and grow at Boeing, in research, design, test, manufacturing or administra-tion. The company's position as world leader in jet transportation provides a massure of the calibre of pacies with measure of the calibre of people with whom you would work. In addition, Boeing people work in small groups, where initiative and ability get maximum exposure. Boeing encourages participation in the company-paid Graduate Study Program at leading colleges and universities near company installations.

We're looking forward to meeting engineering, mathematics and science seniors and graduate students during our visit to your campus. Make an appointment now at your placement office. Boeing is an equal opportunity employer.

Idaho campus is progressing on schedule with no major problems, according to George Gagon, di-rector of the university physical plant.

Contractors are currently installing the window wall on the north side of the four story main building. Weather permitting, the brick on the west wall of the one-story administrative quarters will go in soon, Gagon said.

Work is also being done on block and brick installation of the main building, as well as on the interior stair wells. Gagon indicated construction

has met with no problems, although little is being done now due to cold weather. Art and architecture facilities

will be moved from a temporary classroom building after the July completion date.

### **Officer Team Is Planning Visit**

The Navy Officer Information Team from Seattle, Washington, will be at the Student Union on the U of I campus Tuesday and Wednesday to talk to college stu-dents interested in becoming naval officers, according to Capt. Harry E. Davey, Jr., Commanding Officer of the University NROTC Unit.

The Information Team will administer qualification tests and interview interested students who meet eligibility requirements. Selection for the Naval Officer Candidate Program leads to four months of intensive training at the Navy's Officer Candidate School at Newport, Rhode Island, and three years of active ser-vice as a commissioned officer. Applications are now being accepted from college juniors for all monthly classes at Navy Of-ficer Candidate School, Newport,

Rhode Island, convening June 1967 through November 1967. College graduates with majorsin all fields are eligible for

consideration. Applications are being received for Supply Corps, Medical Service Corps, Civil Engineering Corps, Unrestricted line, Legal Specialist and in sev-eral other categories. In addition to the various of-

ficer programs for men, information will be available on the Navy Nurse Corps and the Wave Officer Programs.

### Waves Team Sets U-I Visit **On Opportunities**

**Opportunities in the Waves may** be discussed with an Officer Information Teams from Seattle which will be in the Student Union Building from 9 a.m. to 3 p.m. Tuesday and Wednesday.

A special program of internships for women studying occupational therapy, physical therapy or dietetics is available to WAVE officers, according to the U. S. Navy recruiting station at

Seattle. A summer program for college Scheduled juniors is also available.

A Wave officer candidate takes one half of her officer training Party Convention, will nominate between the junior and senior year. After graduating from college, she is commissioned and the SUB Ball Room, at 7 p.m. completes officer indoctrination.

A variety of assignments in different living groups are exavailable to Wave officers, according to the Seattle station. Further information is available from the recruiting team which will visit the U of I campus.

**Pilot Information** 

A Naval Information Team from the Naval Air Station at Seattle will visit the U of I eches and acceptances, and ele-

Role of Faculty

The role of the faculty is to teach, research and perform pub lic service. Through these state ments, the faculty is granted freedom in the pursuit and dis-

semination of knowledge according to personal judgement. The committee pointed out that with any freedom there is res. ponsibility. They said that the faculty should recognize its ob-

ligation to maintain the reputa. tion and integrity of the University. The statements said that each

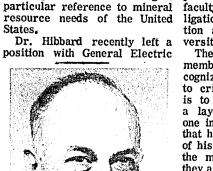

member of the faculty should recognize that others are as free to criticize his opinions as h is to express them, that he is a layman in all fields except one in which he specializes, and that he should weigh the validity of his statements in relation to the manner and form in which they are expressed.

In other statements, Academic Freedom was defined as essential to teaching and research and to the advancement of truth. It carries with it duties correlative with rights.

### Sigma Delta Chi **Sets Conference**

The problems and prospects of offset printing in newspaper production will be discussed in a meeting scheduled at the Mos-cow Hotel at 4:30 p.m. Saturday, The Idaho chapter of Sigma Delta Chi, journalism honory, is sponsoring the meeting; which is expected to draw journalistic minded students from Idaho and WSU.

### With this one exception, GT&E blankets the world of electronics.

GT&E makes no effort to compete with nature's awesome forces. But we do the next best thing. We take the reason for lightning and harness it to everyday tasks.

In that way, we've helped to make the lowly electron mighty. And our own capabilities more extensive.

In fact, we've made electronics an important force in our business. And branched into virtually all directions electronics would take us... communications, radio, TV, stereo phonographs, automatic supervision and control, and advanced military systems.

GT&E member companies, such as Automatic Electric, Lenkurt Electric and Sylvania, either manufacture the complete equipment or the electronic components from which they're built. And at the same time serve as major suppliers

to other electronic manufacturers and the communications industry. You might say that, because of

electronics, GT&E's possibilities are endless. That's the way it looks from where we sit.

If you're interested in getting a complete picture of GT&E as it is today, ask your Placement Director for a copy of the booklet that tells the story. Or write General Telephone & Electronics, 730 Third Avenue, New York, N.Y. 10017.

STATE OF HAWAII DEPARTMENT OF EDUCATION

Will interview candidates with degrees in Mechanical Engineering and Electrical Engineer-ing. Interviewing for manufacturing, research and technical sales, Business and Liberal Arts majors. U. S. Citizen. Placement Office.

We'll pay half your fare.

The idea's not as crazy as it may seem. Anytime we take a jet up, there are almost always leftover seats.

So it occurred to us that we might be able to fill a few of them, if we gave the young people a break on the fare, and a chance to see the country.

#### The American Youth Plan\*

We call the idea the American Youth Plan, and what it means is this:

American will pay half the jet coach fare for anybody 12 through 21.

It's that simple.

All you have to do is prove your age (a birth certificate or any other legal document will do) and buy a \$3 identification card.

We date and stamp the card, and this entitles you to a half-fare ticket at any American Airlines counter.

The only catch is that you might have to wait before you get aboard; the fare is on a standby basis.

"Standby" simply means that the passengers with reservations and the servicemen

get on before you do. Then the plane's yours.

The American Youth Plan is good year

# American Airlines

\*DOES NOT APPLY IN CANADA AND MEXICO.

round except for a few days before and after the Easter, Thanksgiving and Christmas rushes.

If you can't think of any places you'd like to go offhand, you might see a travel agent for a few suggestions.

We can't add anything else. Other than it's a marvelous opportunity to just take off.

Complete this coupon—include your \$3. (Do not send proof of age—it is not needed until you have your ID validated.) In addition to your ID card, we'll also send you a free copy of AA's Go Go American with \$50 worth of discount coupons. American Airlines Youth Plan 633 Third Avenue New York, N.Y. 10017

# Dean Sees Alpha Kappa Psi Initiate Business Majors

Dean Kendrick, College of Business, spoke at a banquet following the Alpha Kappa Psi initiation Sunday, Feb. 13 at the SUB.

Kendrick told of the importance of having business graduates enter the field of business when finished with their academic careers. There has been a tendency, he said, for them to enter other fields.

"The business world is still in need of men of high qualifications," he said, "and opportunities are ever becoming greater."

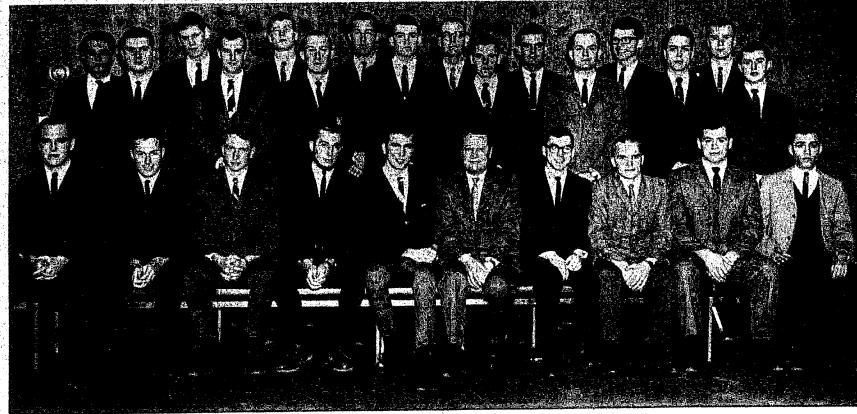

Kendrick said the business college here is now only regionally accredited. But, he expressed confidence that it would have a national accreditation this year. Alpha Kappa Psi, a business honorary, initiated 13 members.

### **Foreign Languages** Workshop Set Sat.

A workshop for foreign language students will be held next Saturday by Dr. Lalia Boone, professor of English and Dr. John Sita. professor of Spanish, it was announced this week.

Boone and Sita will discuss linguistics which apply to teaching foreign languages in high school. Sita will demonstrate foreign language lessons using audio-vision methods.

The workshops are being ar-ranged by Mrs. Marjorie Boyd, supervisor of Modern Foreign Languages, in the State Department of Education.

**Argonaut Social Editor** 

Happy Friday everyonel February sure is disappearing rapidly, but after George's Birthday, who cares. It seems everyone needs a rest after the pseudo four-day weekend just fin ished.

Someone was overheard saying that an unnamed sorority had presented the "Sky King" award to the biggest flyer in the pledge class.

\* The Sigma Chi's are planning the annual Derby Day, Saturday. The activities include a parade, relays and skill events. Freshmen women representing their living groups will participate in hat grabbing, pants painting and several assorted other "stunts."

★ The Engineers Ball is scheduled for 9 p.m. Saturday at the SUB Ballroom.

\* Movies downtown this week are "Do Not Disturb," at the Kenworthy; "Red Line 7000," at the Nuart; "That Darn Cat," Walt Disney's latest, at the Cordova, Pullman, and "Never Too Late," at the Audian, Pullman.

★ C-Cap and CUP, campus political parties, are planning conventions Sunday at the SUB. The organizations will nominate candidates for student body offices and E-Board."

\* "Ashes and Diamonds," the SUB film this weekend should prove to be a worthwhile show to see. Directed by Andrzej Wajda, the film tells a clear and psychological interesting story of the political assassination' of a veteran Polish leader by a young resistance fighter. It gives a great deal of insight into life in a communist society. So says the advertisement.

\* An original play by WSU Professor Paul Wadleigh, "Afoot and Lighthearted," will be presented at the University Theatre, WSU, Feb. 24, 25, 26 and 27.

\* And, someone is planning to hit the sundeck this weekend? Really now!

# Plays Set For RIL Week, Speakers Set

Leddy will be the guest of

liance nations.

Religious Emphasis Week, March 20 to 23, will feature two professional players from the Theatre of Concern in various plays on campus.

Karl Koch, the purpose of Religious Emphasis Week is an full of strangers impossible to attempt to say, "Hey, religion's still around."

activities during the week are an that occasion for community attempt of church people to focus - which we believe to be the campus attention on the real needs of the students.

Koch emphasized that the program is not set up to convince students concerning the doctrines of a particular church, but rather that it is concerned with religion in general.

General Religion "The issues are of a general religious nature," said Koch. "They involve cultural, social concern and just life in general. The plays presented are pointed, and sometimes caustic outlooks on life."

Norman and Sandra Dietz will be the only players in a collection of short plays, sketches and 10 a.m. Tuesday, March 22 to theatre pieces. See "Norman and Sandra Dietz

fornia, winner of the other

Their style varied widely. Spectators dubbed St. John 'Mr. Outside' for his sweeping

hook, and Weber as 'Mr. Inside' for his tightly controlled ball.

St. John beat Weber in the first game, but slipped badly in the second. Which style was superior? Weber's 192 was

hardly up to his usual perform-

ance but it brought him within

seven pins of St. John as they came to the final game. He opened it with a spare and then

reeled off five strikes in a row, two of them on so-called Weber

specials, a ball that hits the pocket lightly, but causes the pins to bounce off the side wall

and come back to topple the

remaining pins. The final total:

Weber 608 total pins and St.

Idaho's 2-6 mark.

Against Weber State the Van-Against Weber State the Van-dals could not quite pull it "out zlies of the University of Monof the fire" but they managed to play exceptional ball throughout the game. By defeating the Vandals, Weber State managed to keep their perfect record of having never been beaten on their home floor.

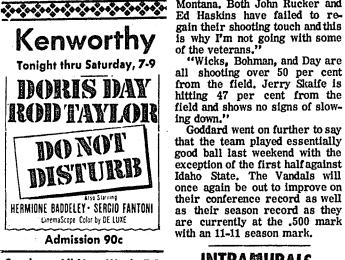

Can't Win The Close Ones Idaho has played the Wildcats five times and on four of these occasions the final score has been a difference of four or less points. Said coach God-"We just can't seem to dard. win those close ones with Weber State.'

In the scoring column the Vandals were once again lead by Jerry Skaife who collected 27 points for the night. Rick Day contributed 19 points which was his best effort so far this season.

Against Idaho State the Vandals had a cold first half and could not regain their poise as the Bengals avenged an earlier defeat at the hands of Idaho. The Vandals will have another chance to show their superiority over the Bengals when the two teams meet in TwinFalls, March 3, in the rubber game which will decide the King Spud trophy.

Mountain Teams Are Next This weekend the Vandals are concerned with two conference

foes in the Big Sky country of Montana when they take on Montana State at Bozeman tonight and then travel to Missoula Sat-
