## AWS Plans Elections, Women's Week

### AWS Wed. Voting Selects Names For General Election

Four hundred and forty-one University women voted Wednesday during the Associated Women Student's primary election paving the way for final balloting in next Wednesday's general election which will select officers for the coming year.

"I'm happy to see that more women are voting," said Marg Felton, Kappa, outgoing AWS president. "However," she said, "we should have many more turn out for Wednesday's general election."

Approximately 300 ballots were cast during last year's primary voting, she reported.

Names appearing on the final ballot are Joan Eismann, DG, running unopposed for president; Barb Howard, Kappa, and Sue Cairns, Theta, for vice-president; Karen Arndt, Alpha Chi and Candy Watson, Pi Phi, for secretary, and Sally Harris, Campbell and Allison Miller, Alpha Phi, for treasurer.

Voters will also be asked to cast a yes or no vote on two amendments to the AWS constitution.

"That the following wording be appended to Article VI (Members of the AWS Legislature) Section 2: One additional member from each living group chosen from the freshman, sophomore or junior class."

Amendment No. 2, if approved, will alter the process of amending the AWS constitution.

"That Article XII (Amendments) which now reads: Section 1: A majority of those present at a properly advertised meeting of the Associated Women Students of the University of Idaho shall be required for an amendment to this constitution.

Section 2: Amendments must be presented in writing at a meeting of the Legislature and voted upon at the next meeting.

Section 1: Amendments must be presented in writing at a meeting of the Legislature and voted upon at the next meeting.

Section 2: Amendments approved by Legislature will be placed to a vote at the yearly scheduled AWS officer elections.

Section 3: Special elections dealing with amendments may be called when deemed necessary by the AWS President.

Voting will take place all day

### Coffee Hour Today

A German coffee hour will be held at 3 p.m. today in the Blue Room of the SUB. The film that will be shown will be "Upper Den Tag Hinaus."

CREAMY WELCOME—Student representatives from the Up With People sing-out spectacular are greeted by Larry Hansen, right, Upham. They are, from the left, Bill Radcliff, Gary Alber and Bill Saltzman. The students travel on their own expenses which they raise from ticket sales. (Photo by Baccarach.)

### Singers Flood Campus For Tonight's Show

By ELLEN OSTHELLER Argonaut Associate Editor One Hundred and fifty-five student members of the sing out cast, traveling through the United States on their own time and expenses, are flooding the campus today in preparation for tonight's Up With People performance. The singers migrate from the university living groups, where they are staying, to the Memorial Gymnasium tonight for their 8 o'clock opening.

While the program is sponsored by the Moral Re-Armament Demonstration for Modernizing America, the students finance the \$1,000,000 annual program almost entirely by themselves, from the proceeds of ticket sales.

Three student representatives on campus earlier this week described the program. They were Bill Radcliff, Ft. Myers, Fla.; Gary Alber, Ventura, Calif.; and Bill Saltzman, Miami, Fla.

"The students finance the singing tours themselves and receive no salary," Saltzman said. "The efforts are all for free."

"We get expense money—for

### U-I's Ten Best-Dressed Coeds Chosen To Model

Ten coeds were chosen by Interview Tuesday evening as finalists in the "Glamour" best-dressed college woman contest. These finalists are Ellen Ostheller, Pi Phi; Ann Rutledge, Tri Delta; Elaine Wozniak, Alpha Phi; Kathy Giesla, Kappa; Jane Langley, Pi Phi; Ann Hildebrand, Eitel Steel; Connie Bradley, Alpha Chi; JoAnne Martin, Gamma Phi; Ann Moree Jones, Kappa; and Lin Severson, DG.

These 10 finalists were chosen from over 40 contestants who had been nominated by living groups. After filling out questionnaires concerning their own wardrobes and budget, the contestants appeared before a panel of three judges. Judges were Miss Elsie Nielsen, home economics department, Ann Marie Rytting, social and conference co-ordinator in the Student Union Building, and Sandy Wright, AWS president at Washington State University.

A practice will be held tomorrow for the 10 finalists who will model Monday evening at 8:30. The practice has been set for 10 a. m. in the Bucket, said Mike Seibert, co-chairman. The finalists will again be judged Monday evening as they model. The girl chosen to become the "Glamour" contestant from the University will be announced Wednesday evening at the banquet which will culminate the three days of activities planned for women students on campus.

The style show is being co-sponsored by Theta Sigma Phi and Associated Women Students.

Tuesday a panel to discuss "Values Chained or Changed" will be held in the Student Union Building. Campus leaders, faculty members and students will be on the panel to consider the new morality and value-system that is prevalent in today's society and to discuss the effect upon the younger generation. The panel is at 4 p.m. in the Student Union Building.

Wednesday will culminate "Women's Days" calendar with

a banquet for all women students. At the banquet the "Glamour" winner will be announced and introduced. Also to be announced are the new Associated Women Students officers. Primary elections were held Wednesday and the final votes will be cast next Wednesday, the same day as the banquet. Every girl enrolled in the University is eligible to vote and to attend the banquet. An award will also be given to the living group who most improved scholastically from first semester last year to second semester last year.

The main feature of the banquet will be the guest speaker Louise Shaddock, executive secretary of the Department of Commerce and Development. Miss Shaddock will consider the role the woman plays in the world of today.

"This is the first time such an event has taken place on the Idaho campus and the first time AWS has sponsored such an event. We hope that the program will be of interest to all women students on campus," said Margie Felton, president.

### New Deans Appointed

A new associate dean of the College of Letters and Science, and a new dean of the College of Engineering at the University of Idaho, were among appointments announced yesterday by President Ernest W. Hartung, following approval of the Regents at their Boise meeting.

Dr. Jerry Joseph Crockett, 38, associate professor of Botany at Oklahoma State University at Stillwater, was appointed professor and associate dean of the College of Letters and Science, effective June 1. He will serve under Dean Boyd A. Martin.

Janssen, 59, who has been a member of the Idaho engineering faculty for 36 years, and dean of the college for 21, had asked to be relieved of his administrative duties.

"This is a move I have been considering for some time," Janssen said. "Besides returning to my first love — teaching and research — I will have opportunity to do consulting work."

For 25 years, Smith served as an engineering consultant to various industrial firms in the United States and in Liberia. He is a former partner of the Stanley Engineering Co. of Muscatine, Iowa, Chicago and Cleveland. Since 1962, he has been on the faculty of the University of Iowa, South Dakota, Minnesota, Wisconsin, Illinois, and Missouri.

Dr. Crockett, who will become associate dean of the College of Letters and Science, is a native of Chickasa, Okla. A graduate of Northwestern Oklahoma State College at Alva, he has an M.S. degree from Fort Hays, Kansas State College, and a Ph.D. from the University of Oklahoma. He served as a chemist in industry for seven years before joining the Oklahoma State University faculty in 1962.

Other appointments are Dr. Elmer K. Raunio, chairman of chemistry and a member of the

faculty since 1949 who was named acting head of physical science. He will take the place of Dr. Malcolm Rendrew, who on a year's leave to serve on the Advisory Council on College Chemistry at Stanford University.

Dr. Crockett, who will become associate dean of the College of Letters and Science, is a native of Chickasa, Okla. A graduate of Northwestern Oklahoma State College at Alva, he has an M.S. degree from Fort Hays, Kansas State College, and a Ph.D. from the University of Oklahoma. He served as a chemist in industry for seven years before joining the Oklahoma State University faculty in 1962.

### Military Ball Queen Will Be Chosen Sat.

Marcie McGuire, Colleen O'Keefe, Marsha Bohman, Ann Shelley and Pam Jones are finalists for Military Ball Queen. The annual dance is scheduled for Saturday night in the SUB Ballroom from 9-12 p.m. Music for the dance will be furnished by the "Gentlemen of Note," an eight piece band.

Theme for the dance will be "Born Free," with decorations consisting of gold and white with accents of navy blue.

Cadets voted yesterday for their favorite candidate. The queen will be announced Saturday night at dance intermission. Cadets, from Navy, Army and Air Force, and their invited guests, which include couples invited through invitations, will be present at the dance. Couples at the dance must present an invitation at the door or be in ROTC uniform.

All five finalists are soror-

ity girls. Marcie McGuire, Theta; Colleen O'Keefe, Alpha Phi; Marsha Bohman, DG; Ann Shelley, Kappa; and Pam Jones, Gamma Phi, are all vying for the title of queen.

Chaperones for the dance include Col. and Mrs. Thompson, Professor of Aerospace Studies; Col. and Mrs. Rimlinger, Professor of Military Science; and Col. and Mrs. Case, Professor of Naval Science.

The dance will be formal and long or short formals for girls are appropriate, according to the Army department.

Chairmen for the Military Ball include Ted Bell, Air Force; Rod Bohman, Army; and Jim Watt, Navy. In charge of the band will be Edgar Story; Ted Bell, intermission programs; Jim Watt, pictures; Dennis McCormick, queen balloting; and Barb Yoshida and Ann Shelley, decorations.

Dr. H. Sidwell Smith

Dean Allen S. Janssen

### Districting OK'd, Reports Accepted

Executive Board endorsed the recommendation of a campus electoral districting plan, accepted three new reports and referred a KUOL monetary request to the budget committee during their meeting Tuesday night.

The board recommended the districting plan be drawn up under ASUI regulations, thus not necessitating a constitutional change. If the board passes proposed regulations, the representative plan of electing will be instituted in next fall's elections.

Discussion on the districting

### Parking Revisions Need Student Help

Changes in campus parking regulations will be done on the basis of student recommendations this year, according to V. W. Howard, Graduate Representative on Operations Council.

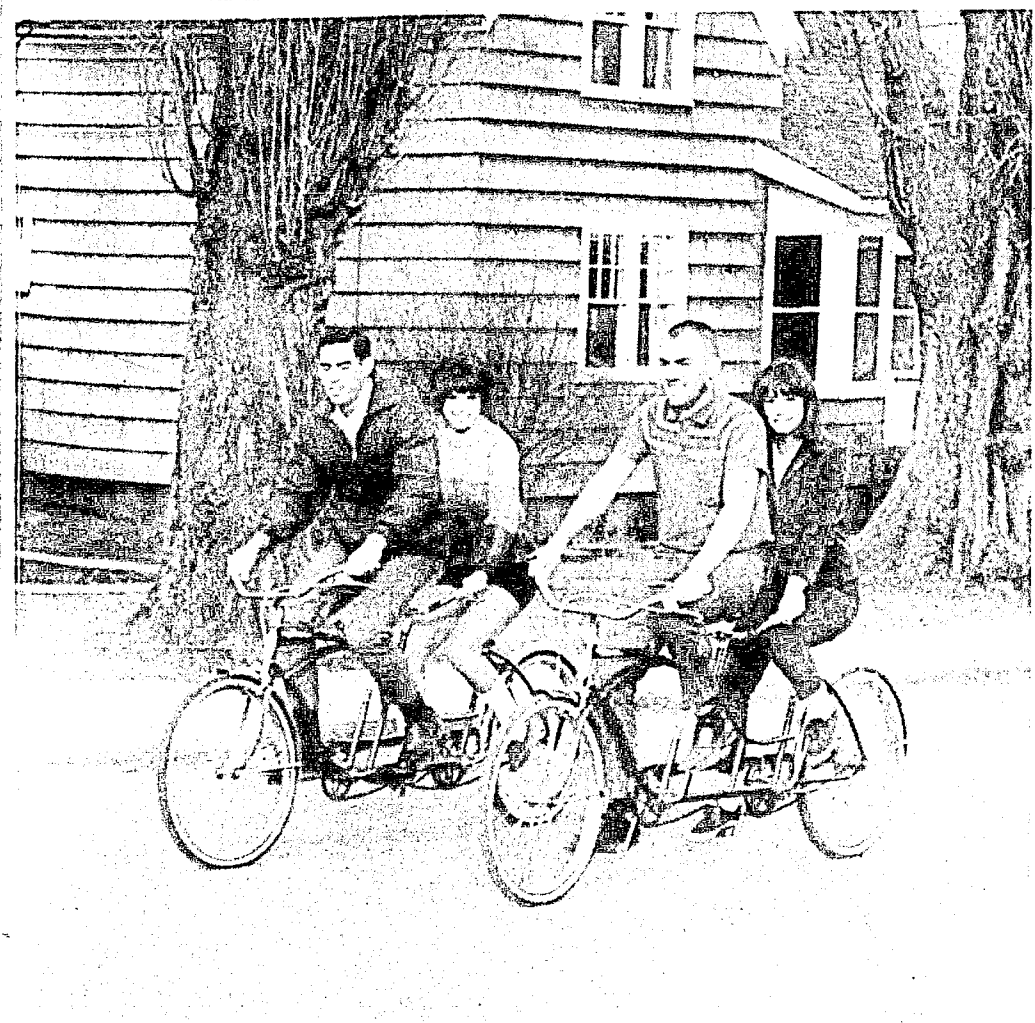

The Council is now in the process of revising both the parking area diagram and parking regulations pamphlet, and are seeking ideas from the students, he told ASUI Executive Board Tuesday night.

Regular gripe forms for filing complaints or suggestions are available in the ASUI office in the Student Union Building. All areas of parking problems will be considered; including those of off campus students, graduate students, and those living in regular campus living groups.

The Council hopes to accomplish an overall re-districting in parking rules according to the needs of the University community, Howard said.

Students are urged to participate in the revision suggestions.

(Continued on Page 5, Col. 6)

SIGNS OF SPRING—Unusual good weather early this week brought a rush on the tandem bicycles which the Student Union rents. Taking advantage of the Moscow weather are left to right, Art Crance, ASUI vice president, Ann Cline, Gamma Phi, Luke Boyd, off-campus, and Kathy Morgan, Gamma Phi. (Photo by Seale)

**Misinformation From The Statehouse**

Shock and open-mouthed wonderment were the first reactions of most Idaho students yesterday when they read the pronouncement of Gov. Don Samuelson concerning education in the State of Idaho.

His position that the University and Idaho State University have "gone too far in the liberal arts" and that they have not been preparing enough technicians needed by Idaho industry left everyone gasping like landed fish and wondering what sort of reasoning was going on in the Idaho Statehouse.

A second look after a slight recovery from the shock that that reasoning is full of errors and evidently based on incomplete information. Aside from the glaring error that the University is oriented toward the liberal arts too much, there is the question of the correlation the Governor seems to see between the supposed lack of accreditation of the College of Mines and the money spent on the University president's house.

**Of Mines And Houses**

An Associated Press report has quoted Samuelson as saying that he is concerned that University authorities were spending "almost \$100,000" for a president's home but could not find "the \$2,000 or \$3,000" needed to retain the School of Mines as an accredited department.

Jason asked Rafe Gibbs, University director of information, about the status of the College of Mines and the source of funds for the president's house.

"The College of Mines definitely has not lost its highly valued accreditation by the Northwest Association of Secondary and Higher Schools," he said. "It is only the professional body which is temporarily withholding its approval of the course of mining engineering." This is not the entire college.

He explained that this came about because of the recent retirement of Professor W. W. Staley, a noted authority in the field of mining engineering and author of a nationally used text book for the course. Until a man of Staley's caliber is found as a replacement, the courtesy accreditation by the professional society in that area will be withheld.

However, this has no effect on the students. As long as the college is recognized by the Northwest Association, all credits are fully transferable and the college is recognized in the academic world. It would be nice to have the prestige of being recognized in the professional society circles but as Samuelson recognizes, this will take more money. It takes a healthy budget in order to be able to afford to support professors of good quality.

Somehow the Governor managed to

balance the lack of funds to hire such people with the construction of the president's house. He, of all people, should know this is a gross misstatement. He was a member of the last session of the Idaho legislature, which voted to appropriate \$62,000 specifically for a president's house at the University. Evidently someone thought the structure was worthwhile.

**Additional Funds**

Additional funds for the house came from a fund set up after the sale of the original president's house. The money has been sitting in the bank collecting interest for the sole purpose of helping finance another president's house.

The remainder of the funds came from the Regent's nonappropriated funds derived from the profits from extension courses and other University activities. Such funds are earmarked to be used for one-time-only projects that the Regents may choose.

Salaries for professors are definitely not one-time-only things. The funds to hire someone for the College of Mines will have to come out of the budget set for University salaries. Since the Governor has hardly suggested an increase in this budget, it would seem that the college will either have to delay finding a replacement for Prof. Staley or the salaries of others will have to be reduced to cover the cost.

Now to the meat of the subject, after clearing up the inaccuracies in the original premise. An interview of a random sample of University students would, Jason is sure, would reveal that Idaho students do not think that the school has gone too far toward the liberal arts. In fact, most feel there is starvation in that area on this campus.

Cheers have been going up for the proposed performing arts center (not to be financed by state funds) which might encourage some culture around here. If a person does not have some foundation in the liberal arts, how is he to communicate with other people?

**What Industry?**

As for training technicians for Idaho's industry, one is forced to ask, what industry? Idaho has never been noted as an industrial state, nor has it been noted as an intellectual center. It would seem that a group of versatile citizens would be far more desirable than a group of unemployed experts, when considering the future of Idaho.

We can only hope that the legislature has the knowledge and wisdom to make the right decision concerning the future of the state and the education of its young people.

**Editorial**  
**Student Discount Possibilities Could Be Considered Here**

Rising food prices, staggering book costs, a feeling of exploitation on the part of the students against Moscow merchants — all factors that could be eliminated with a little ingenuity and forethought on the part of the Idaho student body. There really is something we can "do about it."

The answer lies in a student discount. Many schools have been initiating the system with both the local merchants and the student bookstores.

At Washington State University the student owned bookstore gives both students and faculty the flat rate of four percent on text books and five percent on supplies. Previously, the faculty there was given a 10 percent discount which was changed due to student demands.

The program extends to other goods at such institutions as the University of Minnesota, Princeton, Northeastern University, University of New Mexico, Georgetown, University of Illinois, and the State University of New York at Buffalo, just to name a few.

The discount cards sell to students at about 50 cents to \$1.00 and can assure bargains up to 30 percent off on anything from pizza to gasoline. Even one of the local movie theaters admits students with discount cards at the same price as youth under twelve.

A similar system was recently started at Temple University where merchants in the Delaware Valley Area offer discounts to all year college and university students. The purpose in any plan is two-fold — it helps the students get lower prices and encourages them to patronize area merchants. Thus also having a dual benefit.

The merchants can set their own discount rate, usually about 10 percent to students showing University Identification cards.

One drawback is the difficulty in convincing merchants that the system would also work in their benefit. The big selling point here, however, is the

factor of "selective entry" where the merchant would be the only one in his field to offer discounts to students. And if the students supported the merchants who gave discounts, the policy could not help but spread to the competition factor.

Recently one Moscow merchant considered and disregarded the idea of discounts due to the feeling of other segments of the local economy, but if confronted with the possibility of more patronization and support from the entire student body, the sentiments would undoubtedly change.

The other problem would be in making the students realize their potential in a unified purchasing power. But with one card entitling students to discounts in all areas of the local businesses, who could pass up a bargain?

The concept of the student discount system, still relatively new, could be undertaken by some enterprising committee or even sponsored by the University student government. (It would give them something to do.)

The standpoint of the University bookstore situation is somewhat different, however, from that of the WSU organization where the students themselves own the business and the loss of money on book sales is made up on other articles. But it could still be feasible here at the University, with the price of the discount cards making up for the loss caused by discounts on book sales.

Objections can already be heard from the bookstore committee — about the special projects the profits help to finance. But from the student's standpoint, the service from the discount would be of much more concern. They could see the benefits of a discount and in contrast to the benefits of the "special projects" which they usually do not know their funds are financing.

So who cares about an unfinished parking lot that they will have to pay meter money on, anyway?

—E. H. O.

**Dear Jason**

**Vocational Ed., Governor Mocked**

Dear Jason: Have you heard the latest professed statement from Idaho's "governor"? It seems the U of I and Idaho State University have gone "too far in the liberal arts." If Mr. Samuelson knew what the "liberal arts" were, we could possibly analyze his views. But obviously he does not and this comment, as the "beatnik, peacenick" statements which amazed the intellectual community earlier, will go down as another example of the governor's ignorance.

There was a time when voters could have some satisfaction and assurance in the governor's "willingness to listen." However, Mr. Samuelson forgot to tell us to whom he would listen. As his California hero, this cut-rate version of Ronald Reagan has showed his inability to cope with the complex educational problems of today's society.

The Idaho governor, in one of his infrequent press conferences (keeping his mouth shut during the campaign worked; perhaps he believes the same will apply during his tenure), announced that the two state universities should concentrate on vocational education.

Let's view what his approved curriculum might look like: Janitorial Services 203 (a graduate course, no doubt, in view of his emphasis on housekeeping activities).

Economics 141 - Labor Economics, As Viewed by the Chamber of Commerce  
Political Science 126 - Political Thought, or The Evils of Socialism Which Prevails Throughout Our Welfare System (textbook copyright, John

Birch Society).  
Political Science 128 - American Political Thought, or The Consistency of a Conservative.

In addition to these few academic courses, which might survive, would be his suggested vocational education courses: Chain Saws 101  
Mechanics 171 - How To Grease An Auto  
Business 199 - How to Cut Meat and Be a Supermarket Checker  
Philosophy 109/- How To Be Sane, Sincere, & Sober  
Ditch Digging 51 - A sophomore course  
Ditch Digging 52 - Same course, Second Semester  
Advanced Ditch Digging 191 - (Change from small to larger shovel.)  
Garbage Collecting 82 - (Laundry fee is charged here.)  
Journalism 199 - How To Avoid The Press & Still Win Elections

Leo W. Jeffries  
Phi Delt

**Profs Point Out Liberal Arts Need**

"Clear up your doubts," said St. Thomas to his friends. In this regard Governor Samuelson's recent statements in a press conference clears up any doubt we might have had about his attitude toward the concept of higher education. He puts us all at ease by letting us know that he has no doubt.

Samuelson stated that Idaho's universities have "gone too far in the liberal arts" and, according to the A. P. report, that he is greatly disturbed at the university's failure to "prepare the technicians needed by Idaho industry."

The governor crystallizes for us not only his own attitude and what we might expect from him for the next four years, but even more, a confused idea of the traditional and proper function of the university: its function is to educate minds not to train hands. A university can only be indirectly concerned with the needs of industry and vocational-technical training; direct concern with these functions is perhaps the province of the institute of technology. And maybe it is in this context that the desire to locate the vocational center of the state at Lewiston can be seen as a meaningful suggestion.

But, to center on the key issue, the confused idea of the function of the university sadly fails to see that the essence of any university is its liberal arts program.

It is only through this program that students can be made to realize the significance and meaning of man; that he is not just a fragmented piece of mechanism that blindly turns at its appointed task without questioning the meaning of the task. Nor is he a dumb animal strapped to a turnstile which pumps water for some vast hydroelectric plant of industrial progress.

A liberal arts program, if well-developed and well-staffed—and in comparison with other universities, neither of Idaho's universities, nor any of its colleagues (Continued on Page 3, Col. 1)

**If I Ran The Menagerie**

By Don Fry

I am sure that you have seen them around the campus with their weary faces, carrying slide rules and clip boards. Perhaps as you passed a group of them you heard some of the foreign language that they use among themselves.

You might have heard "integral" or perhaps "isothermal reaction" or "axial line." If you are a typical Idaho coed, you might have speculated on the income of an engineer.

If you are an agriculture or forestry major, you might have thought, "Boy am I glad I don't have to go through what he's going through."

If you are a typical liberal arts major, you probably thought to yourself, "My, aren't those engineers a narrow group of people with their slide rules and formulas and all of whatever it is they use! What a dull life they must lead, not knowing any of the really important humanistic things that I am learning."

If you thought something like that, you were mistaken. You may very well be the one who is narrow. That discipline which calls itself liberal arts has come to be far more narrow than engineering in one way, because it has excluded entirely the largest area of human learning today—the technical fields.

Friends in the college of letters and science have sometimes told me with a touch of pride that they

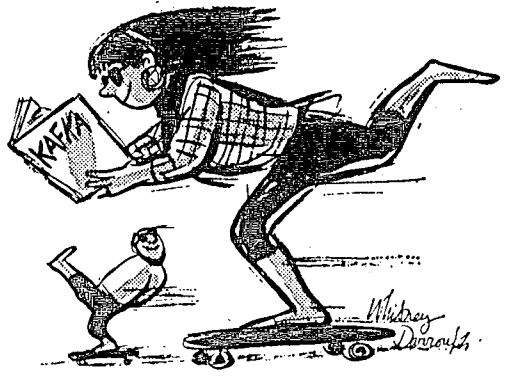

(Continued on Page 4, Col. 4)

**STAMP OUT YOUNG LOVE**

It happens every day. A young man goes off to college, leaving his home town sweetheart with vows of eternal love, and then he finds that he has outgrown her. What, in such cases, is the honorable thing to do?

Well sir, you can do what Crunch Sigafos did.

When Crunch left his home in Cut and Shoot, Pa., to go off to a prominent midwestern university (Florida State), he said to his sweetheart, a wholesome country lass named Mildred Bovine, "My dear, though I am far away in college, I will love you always. I take a mighty oath I will never look at another girl. If I do, may my eyeballs parch and wither, may my viscera writhe like adders, may my ever-press slacks go baggy!"

Then he clutched Mildred to his bosom, flicked some hayseed from her hair, planted a final kiss upon her fragrant young skull, and went away, meaning with all his heart to be faithful.

But on the very first day of college he met a coed named Irmgard Champerty who was studded with culture like a ham with cloves. She knew verbatim the complete works of Franz Kafka, she sang solos in stereo, she wore a black leather jacket with an original Goya on the back.

Well sir, Crunch took one look and his jaw dropped and his nostrils pulsed like a bellows and his kneecaps turned to sorghum. Never had he beheld such sophistication, such intellect, such *savoir faire*. Not, mind you, that Crunch was a dolt. He was, to be sure, a country boy, but he had a head on his shoulders, believe you me! Take, for instance, his choice of razor blades. Crunch always shaved with Personna Super Stainless Steel Blades, and if that doesn't show good sense, I am Rex the Wonder Horse. No other blade shaves you so comfortably so often. No other blade brings you such facial felicity, such epidermal *elan*. Personna Super Stainless Steel Blades take the travail out of shaving, scrap the scrape, negate the nick, peel the pull, out the ouch. Furthermore, Personnas are available both in double-edge style and in injector style. If you're smart—and I'm sure you are, or I'd w'd you get out of high school—you'll get a pack of Personnas before another sun has set.

But I digress. Crunch, as we have seen, was instantly smitten with Irmgard Champerty. All day he followed her around campus and listened to her talk about Franz Kafka and like that, and then he went back to his dormitory and found this letter from his home town sweetheart Mildred:

Dear Crunch:  
Us kids had a keen time yesterday. We went down to the pond and caught some frogs. I caught the most of anybody. Then we hitched rides on trucks and did lots of nutsy stuff like that. Well, I must close now because I got to whitewash the fence.

Your friend,  
Mildred

PS... I know how to ride backwards on my skateboard.

Well sir, Crunch thought about Mildred and then he thought about Irmgard and then a great sadness fell upon him. Suddenly he knew he had outgrown young, innocent Mildred; his heart now belonged to smart, sophisticated Irmgard.

Being above all things honorable, he returned forthwith to Cut and Shoot, Pa., and looked Mildred straight in the eye and said manly, "I do not love you any more. I love another. You can hit me in the stomach all your might if you want to."

"That's okay, hey," said Mildred amiably. "I don't love you neither. I found a new boy."

"What is his name?" asked Crunch.

"Franz Kafka," said Mildred.

"I hope you will be very happy," said Crunch and shook Mildred's hand and they have remained good friends to this day. In fact, Crunch and Irmgard often double-date with Franz and Mildred and have barrels of fun. Franz knows how to ride backwards on his skateboard one-legged.

So you see, all's well that ends well—including a shave with Personna Super Stainless Steel Blades and Personna's partner in luxury shaving—Burma-Shave. It comes in menthol or regular; it soaks rings around any o'her lather.

# Foyer Club Gives Awards

Foyer Club, originating in Upham Hall, was founded four years ago when the boys in the hall began gathering in the foyer after dinner and talking to the hostesses. The club held its first annual awards banquet Wednesday and named Ed Van-Winkle "Mr. Negative."

In other house news, Greeks and Independents have been electing house officers. Leading Borah Hall will be Allen Tubbs; Mike Dalton, Willis Sweet; Gary Parberry, pledge president at the ATO house; Larry Kirk, Gault Hall; and Roger Bacon, TMA.

### UPHAM HALL

The Foyer Club of Upham Hall held its first annual awards banquet Wednesday, to honor those chosen as "Wing-Dings." Each wing selected one man to represent their wing in the "Mr. Negative" contest. First balloting was held Monday noon.

The eight men chosen were Ed Van Winkle, Blair Clark, Bryan Parks, Roger Oedawaldt, John Couzens, Jack Gilbert, Ralph Larimar and Dennis Thompson. Each of the contestants were presented with a snaggle-toothed comb.

Winner Ed Van Winkle was presented a long list of prizes by Master-of-Ceremonies Mike Berrochoa.

Among prizes were a set of keys to a brand new 1967 Oldsmobile for the remainder of the week. No car, just the keys. Mr. Negative was also rewarded an all expense paid tour of Wilson Rogers pick-up truck.

Another prize on "Negatives" day, was to be escorted to 504 North Main and be treated to a free ride in the number four dryer of the "Three B's Laundramat."

Van Winkle received one February Playboy Magazine staple, a "Do not remove this tag under penalty of Law" tag, complete salvage rights to the Titanic, a two foot yardstick and a straight fingered back scratcher.

To complete the list, Van Winkle received a sincere note of apology from the B.F. Goodrich Company to replace his lost birth certificate. Upham's "Mr. Negative" also was presented with the world's shortest post, "Who's Who in Canada."

PI KAPPA ALPHA The third annual Pi Kappa Alpha Dream Girl contest started yesterday when several of the girls were asked to dinner at the chapter house.

Nine semi-finalists will be selected Tuesday, Feb. 14, and five finalists will be chosen a week later, Feb. 21.

The girls running are Kathy Wilcomb, Alpha Chi; Emily Patterson, Alpha Phi; Nancy Byers, Tri Delta; Barbara Hardy, DG; and Sheila Cornish, Gamma Phi.

Other contestants are Julia Maloney, Kappa Alpha Theta; Ann Murphy, Kappa; Connie Hoffbuhrm, Pi Phi; Shellagh Stiev, Campbell; Lynn Beckwith, Carter; and Linda Mayes, Forney.

A-1 USED PLEDGE—Hardy specimens of pledge will be on sale at the Pi Kappa Alpha slave auction tomorrow at 1 p.m. at the Pi Kap house. The highest bidding women's living group will have use of the pledge til 5 p.m. that afternoon. (Photo by Seale)

These four Idaho coeds will be vying for the title of LDS Sweetheart tonight in the Student Union Ballroom. Seated from left to right are Andrea Hill (Tri-Delt), Jan Arrington (DG), Linda Hoopes (DG), and Sarah Hall (Off-campus).

## Here's More About Sing-Out

The procedure for joining the group is simple. If there are persons who wish to participate, representatives of the sing out stay behind the group and stage interviews, they said. "If the students are sharp and want to go, then they come with us," Saltzman said. They said that singing is not the only characteristic considered when selecting members. Enthusiasm is one of the main criteria.

The program began a year and a half ago with 150 members. It's big initial appearance was before a group of senators in Washington, D.C. There the sing out was so well received that it has been going ever since. There are currently three traveling casts of 150 within the United States, two groups of 150 in Germany and more in Japan, Australia and Africa. There are also sing outs in Indonesia, Russia and Venezuela. Their goal is to demonstrate American enthusiasm in sacrifice to help create a better world. The students write all the songs for the show, Albers said. "It is fantastic music—all new," he said. "It is the beat of the day quality," Saltzman said.

MACHINERY, CHEMICALS, DEFENSE, FIBERS AND FILMS, RESEARCH AND DEVELOPMENT

Senior and graduate students in Engineering, Science and Business will want to talk over career opportunities at FMC Corporation. Appointments should be made today with the college placement office for individual interviews with company representatives who will be on campus—

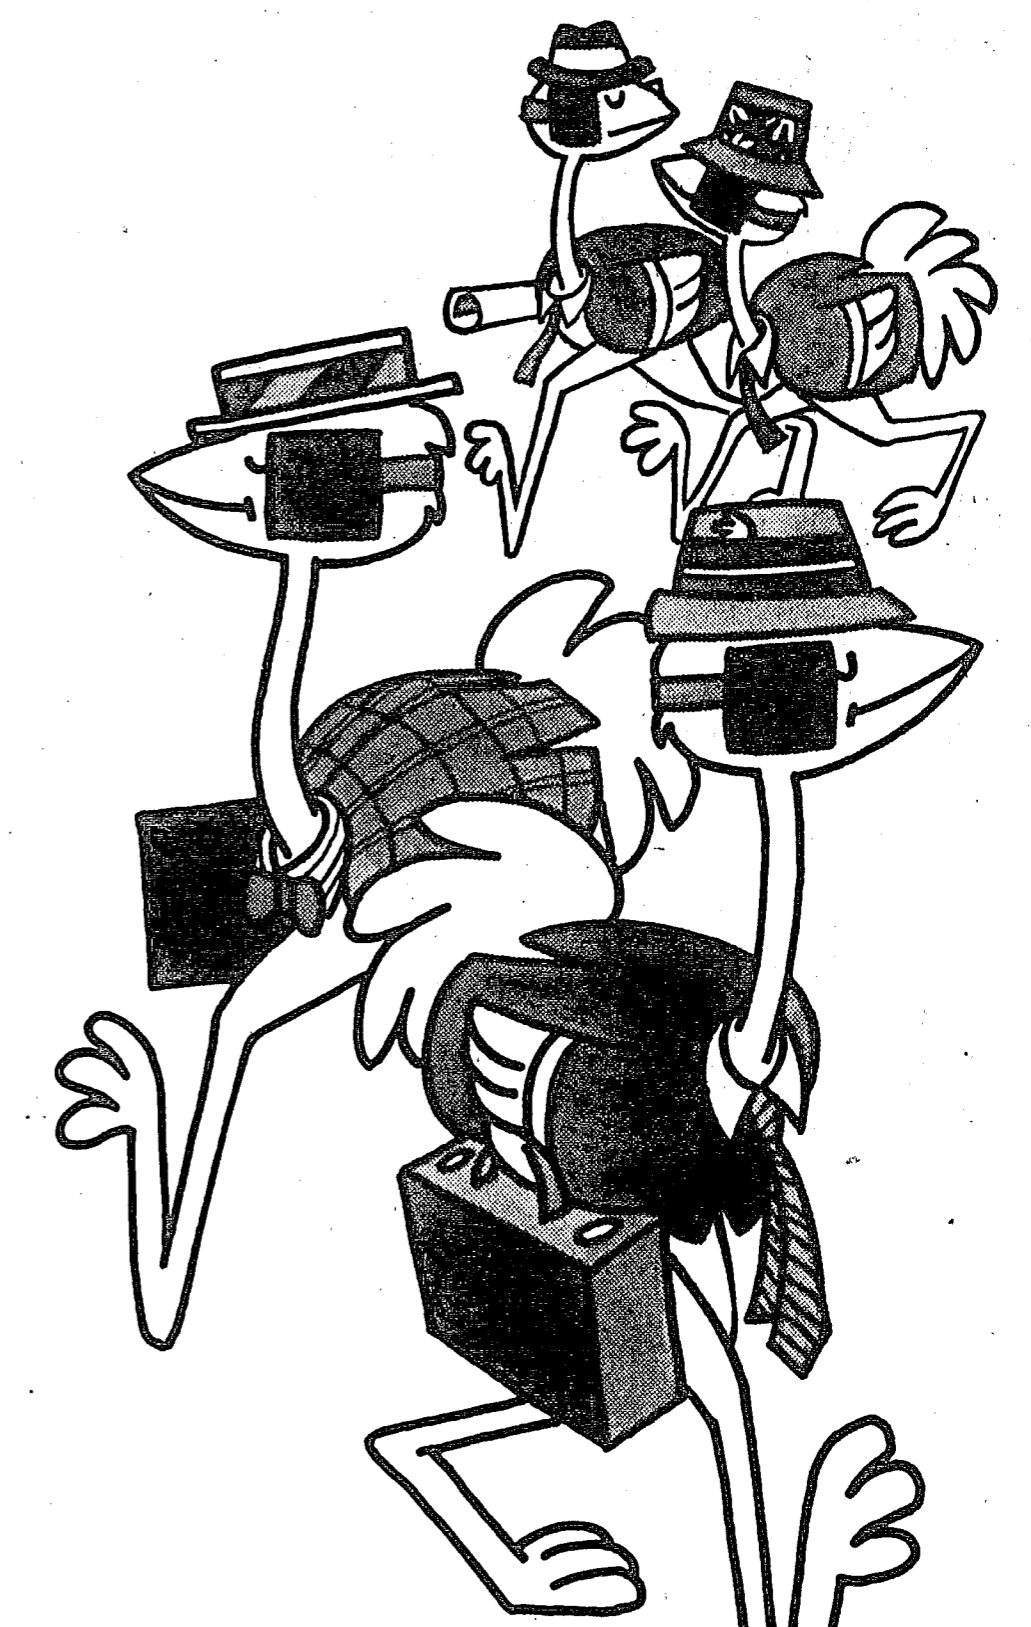

February 15, 1967

FMC Corporation's dynamic growth and diversification offer challenging and rewarding careers in a wide range of disciplines. The important first step is to make arrangements now for an interview with a representative of FMC.

Putting Ideas to Work in Machinery, Chemicals, Defense, Fibers and Films

An Equal Opportunity Employer

**"Business is for the birds!"**  
 Who says so?

Lots of people do. Some right on your campus. And for rationale, they point an accusing finger at business and say it lacks "social commitment."

Social commitment? We wish they could visit our Keamy, N. J. plant, where we make cable and apparatus for your Bell telephone company. But we have time for other thoughts, other talents.

Like the situation in nearby Newark. With civic and business leaders, we began buzzing with ideas. "Let's teach higher skills to some of the un-employed and under-employed. Say, machine shop practice. They could qualify for jobs that are going begging — and help themselves as well."

We lent our tool-and-die shop, evenings. We found volunteer instructors. A community group screened applicants. Another supplied hand tools. The Boys Club donated classroom facilities. Another company sent more instructors.

Some 70 trainees enrolled. Their incentive? Self-improvement. Results to date? New people at better jobs. Happier.

And this is only one of dozens of social-minded projects at Western Electric plants across the country, where our first job is making communications equipment for the Bell System.

So, you don't give up ideals when you graduate. If anything, at a company like, say, Western Electric, you add to them. And it's not just a theory. It's practice. Satisfying. Come on and find out. And watch a feathered cliché fly out the window.

Western Electric  
 MANUFACTURING & SUPPLY UNIT OF THE BELL SYSTEM

# FILM WORLD

By Phil Holaback

## Three-Way-Stretch

This week I shall touch upon three very different motion pictures: "A Funny Thing Happened On The Way To The Forum," "Rebecca," and "Jules and Jim."

"A Funny Thing Happened On The Way To The Forum" is a slapstick musical (?) farce about life in ancient Rome. It's a good comedy, a lousy musical, and reasonably funny. It's also a perfect picture to take a girl to.

What's the test of an excellent comedy? Simply, how you feel when you are leaving it. If you feel that the cup of laughter has been drained dry, why, then the comedy producing such an effect has been monstrously funny; if, on the other hand, you experience only partial relief, you then leave somewhat frustrated. I left "A Funny Thing" wishing that it had been even better than it was.

The problem is one of style. Richard Lester, the director, does not have absolute control over the form of this—his fourth film. Heretofore, Lester has come up with a perfect style for racy, adolescent pictures like "A Hard Day's Night," "Help!," and "The Knack." But burning up the screen with pyro-cinematics does not serve "A Funny Thing" well. Frankly, I got the impression that Lester never knew quite what to do with his material; he just stood there... with a nervous camera. And although Dick Lester tries desperately to be sexy, the picture's sex remains only desperate.

This week's ASWSU foreign film (Todd Hall Auditorium, Pullman; Feb. 11, at 7:30; Feb. 12 at 3:00 and 7:30) is Francois Truffaut's "Jules and Jim," the story of two men and the woman they love. When I first saw "Jules and Jim," it was playing with "A Taste of Honey." I was so enchanted with the latter—that I probably did not give Truffaut's film a fair chance. At any rate, I definitely prefer "The 400 Blows" and "Shoot the Piano-Player."

That's all.

Here's More About

# Menagerie

haven't had any mathematics since high school and that they intend to leave the situation just as it is. I am sure that they are encouraged in this by their professors, too, since I have never seen liberal arts majors in my technical classes broadening their knowledge.

We engineers realize that our curriculum is a restrictive one and that very often we get short-changed in the humanistic and social areas of study. Therefore, every engineering student is required to take at least one semester's work in these areas.

Many of us take much more than the required amount. Most of the rest read at least something on their own to fill in the gaps.

The liberal arts major, on the other hand, does not reciprocate and take a semester or more of physics, electricity, chemistry, math and slide rule.

We live in a technical world. Every Philosophy professor and English major enjoys his television set, stereo, or radio. He has an automobile, lights his home with electricity, uses a modern kitchen, depends upon a modern hospital, and reaps a hundred other benefits from technology. Yet he probably knows little or nothing about them.

In other words he is completely ignorant about a large share of the world around him.

I challenge you, the so-called liberally educated man. I am an engineer. You and I can discuss together the writings of Plato or Emerson, but we cannot discuss automatic control theory.

We can apply ourselves to the enjoyment of Bach, Beethoven or Beatles, but not to the problems of developing an economical civilian nuclear power plant.

You and I can appreciate a poem, but we can never appreciate together the intricacies of an internal combustion engine.

Apparently, ONE of us has not received a broad education.

# Student Art Show Students Dissatisfied On Tap For March With Selective Service

All students of the University of Idaho are eligible to enter a student art show which is sponsored by the ASUI Art Exhibits Committee during the month of March.

Entries will be accepted in the divisions of photographs, oil paintings, water colors, sculpture and pottery, drawings, prints, and mixed media.

Works entered in the contest will be accepted for exhibition, subject to review of a jury, consisting of Mrs. Geneva Sloan, Moscow, and Ken Kaefler, and Don Nepean, both of Spokane Community College.

All works must be original and drawings may be of any medium. First, second and third prizes will be awarded providing that there are fewer than 15 entries in a given division. Cash awards will be \$10 for first place, \$5.00 for second place, and \$2.50 for third place.

College and university student opinion polls regarding the Draft were released today by the United States National Student Association (USNSA.)

According to Eugene Groves, President of USNSA, more than 80 percent of American students feel that a nation can be justified in conscripting its citizens into the military.

Also, more than 70 percent of American students are not satisfied with the present Selective Service System which also equals the feeling of the students who would prefer non-military service, such as VISTA, Peace Corps, or Teachers Corp as an equal alternative to military service.

Over 60 percent of the students and universities to the Draft and on various alternatives to the Selective Service System.

# Cecil Andrus Set To Address YD's

Cecil Andrus will be the special speaker at the Young Democrats meeting Wednesday night, February 15. The 7:30 meeting, in the SUB Borah Theater, is open to the public.

The three term State Senator and 1966 gubernatorial candidate will discuss the Idaho political issue. A question and answer period will follow the talk.

After the meeting everyone will adjourn to the Governor's office in Boise for the entertainment, according to Roy Haney, off-campus.

Students do not feel that students should be deferred just because they are students.

Last November USNSA issued a call for campuswide referendum on the relation of the colleges

# Registration Is Almost Complete

Second semester enrollment is presently at the 5,613 mark and is expected to rise to somewhere near 5,668 reported Registrar F.L. O'Neill.

The 5,668 mark was the final registration for last year's second semester and O'Neill added that "although you can never tell for sure, both years registration should be close to identical based on last year's figures and this year's first semester totals."

There is a week-and-two days for the rest of the late registration to take place said O'Neill.

## College Queens To Be Honored

The annual search is now under way to select and honor "the nation's most outstanding college girl." All young women attending this school are eligible to enter the 1967 National College Queen Pageant.

This Pageant is the annual event which gives recognition to students for their scholastic ability. It is not a "beauty contest." Judging is based on academic accomplishment, as well as attractiveness, charm and personality. The judges are seeking the typical American college girl.

The Pageant will be held in June and this year pageant officials will again award 50 free trips to New York City. One girl from every state will be flown to Manhattan to compete for high honors.

The winner will receive more than \$5,000 in prizes, including a trip to Europe and an automobile.

A candidate may send in her own name, or she may be recommended. For full details and a free entry blank, write to: National College Queen Contest Committee, P.O. Box 935, New York City, N.Y. 10023. Applications or nominations must be received in New York City no later than February 28.

# Opportunities at Anaconda

in mining and metallurgy here and abroad, at Anaconda American Brass Co., Anaconda Wire & Cable Co., and Anaconda Aluminum Co.

## Extractive metallurgy is a key to more metal

The metallurgical bubble bath above is a flotation cell in a new Anaconda concentrator. Although it may seem crude and simple to a layman, the process involves complex combinations of colloidal and surface chemistry, crystallography, physics, and special grinding methods adapted to the ores at each individual mine. It represents one way Anaconda's metallurgical research is helping make more metal available for our growing economy.

At Butte, Mont., such research, in raising recovery of metal from low-grade ores, is making today's submarginal material part of tomorrow's ore reserves.

As Anaconda's intensified geological research and exploration turns up new prospective mineral deposits, the need for metallurgical research and development grows. Each deposit must be analyzed to determine the feasibility of recovering its metal. And as research develops more efficient extraction processes, lower grade and more complex deposits can become mines.

To accomplish this, Anaconda is establishing a central extractive metallurgical research center at Tucson, Arizona. It is carefully planned and is being superbly equipped. It is near a large university staff, which can be consulted as needs arise, thus offering a stimulating environment for progressive research and development. In turn, this means attractive new openings for a variety of engineering talents—not only in metallurgy, but also in chemistry, physics, and mechanical engineering.

## Dynamic test yields new data on copper-metal springs

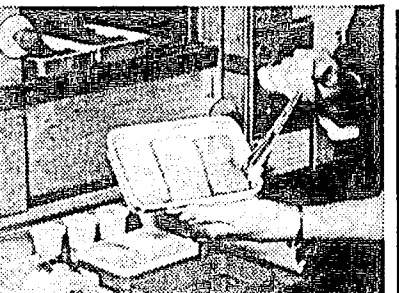

Copper metals are among the most useful spring materials known to man. The role of modulus of elasticity in this application was studied at the Research and Technical Center of Anaconda American Brass for more precise data and to make possible predicting spring performance at various ambient temperatures.

Modulus of elasticity can be determined by physical testing in tension or compression. But Anaconda found the dynamic method (below) easier to perform and just as accurate. Results are of prime importance to designers of spring devices. The significantly lower modulus of elasticity for copper metals means that at the same level of stress, copper alloy components will deflect or extend almost twice as far as components made of steel—usually with no sacrifice of maximum stress. This can mean more sensitive controls—or "softer" action in the absorption of energy.

This is but one way Anaconda is refining and broadening knowledge of the many useful properties of copper metal.

The talents and skills of technically qualified men and women will always be needed by Anaconda in important positions in exploration, mining, extractive metallurgy, manufacturing, scientific research, sales, and administration.

If you wish more information, see the Anaconda representative who will be on the campus February 14, 1967

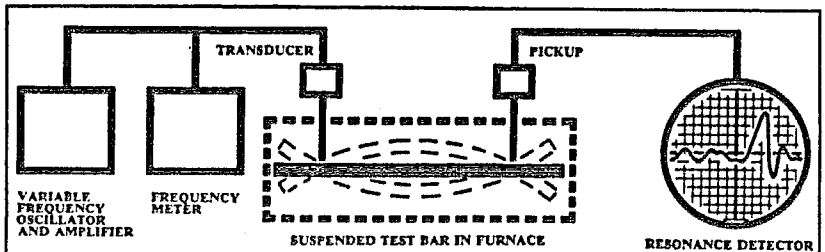

## Bright future for a bright metal

How do you make containers to hold motor oil or citrus concentrates at lower costs? How can you package airline in-flight meals to enable reconstituting of foods at very high temperatures for fast serving—and retain quality and flavor? These are typical questions asked and answered in the Packaging Development Laboratory of Anaconda Aluminum.

A growing factor in the aluminum industry, Anaconda Aluminum is particularly strong in packaging—with plain foil, laminated foil and rigid foil container products. And it has developed several firsts in the aluminum industry. One is the patented foil-fibre container for motor oil and for citrus concentrates. Another is foil containers (see above) for better airline service in the jet age. Now frozen and refrigerated meals can be heated rapidly and served quickly. Anaconda Aluminum has an outstanding record of developments which have had a tremendous impact on the packaging industry.

Anaconda Aluminum is also a producer of primary aluminum. To meet the growing demand for the metal in packaging, transportation, electrical, and building products, Anaconda Aluminum has been steadily increasing its output—is currently expanding its primary ingot capacity by two-thirds. Anaconda Aluminum is growing, and will become an increasingly important factor in the bright future of the bright metal. For this it needs people—not only for its packaging laboratory and foil operations, but also for its other fabricating plants and reduction operations. This means growing opportunities for metallurgists, chemical engineers, industrial engineers, plant engineers, and system engineers.

Left: Dynamic test for modulus of elasticity. Oscillator changes frequency until test bar begins to vibrate. From natural frequency shown on oscilloscope, "dynamic modulus" can be computed.

# CAREER NEWS FROM HUGHES

## Aerospace Divisions in Southern California

### NEW AND CONTINUING PROGRAMS AND PROJECTS

PHOENIX Missile & Fire Control System  
 SURVEYOR Lunar Landing Spacecraft  
 Synchronous Communications Satellites  
 TOW Anti-Tank Missile System  
 ATS (Applications Technology Satellites)  
 AIM-47A/AIM-4E Missiles  
 VATE Automatic Checkout Equipment  
 CORDS

These examples of Hughes Aerospace activities are representative of more than 230 major product and service capabilities ranging from aerospace vehicles to ASW systems. Diversification such as this promises long-range stability both for the company and its employees.

### HIRES OF ENGINEERING GRADUATES

Year	Additions to Engineering Staff
1963	85
1964	104
1965	124
1966	243
1967	250 (est)

Of the over 12,000 employees of the Aerospace Divisions, over 5,000 are Members of the Technical Staff. Average experience is 11.7 years. Average age is 37.9 years.

### NEW MISSILE SYSTEMS DIVISION

More than 1,600 engineers, scientists and technicians are now at work on expanding R&D programs at Hughes new 85-acre Canoga Park complex in the San Fernando Valley. Unexcelled facilities and the professional atmosphere at Hughes encourage creativity and achievement.

### HUGHES-CULVER CITY/CANOGA PARK

Hughes Aerospace Divisions at Culver City, and Canoga Park offers Engineers and Scientists a unique combination of urban and suburban advantages. Located adjacent to major freeways. Los Angeles Civic Center is about a half-hour distant—beaches, just a short drive. Attractive residential neighborhoods are nearby. U.C.L.A., U.S.C. and Cal Tech offer outstanding educational facilities.

### IMPORTANT OPPORTUNITIES

steady growth, diversification, long-range stability, professional atmosphere, advanced facilities, fine living conditions—these are the advantages which Hughes Aerospace Divisions can offer you at Culver City and Canoga Park.

For additional information and to arrange an appointment with our Technical Staff Representatives, please contact your College Placement Office or write: Mr. Robert A. Martin, Head of Employment, 11940 W. Jefferson Blvd., Culver City, California 90230.

OX IS BACK—Joe Pacello and Bill Noyes, Theta Chi dog trainers brought the Theta Chi Saint Bernard, Ox, back from Homedale this week. The trainers doped Ox with a small bottle of tranquilizers before the trip, but he still managed to rip a hole in the white leather upholstery during a dream. The Saint Bernard is the national mascot of Theta Chi and almost every chapter has one. Ox, named after the Greek letters Theta Chi, is four years old, weighs 175 pounds and is very gentle. (Photo by Seale)

# Peace Corps Is Well Established

The United States does it, France does it, even tiny Liechtenstein does it. Like a new parlor game, the idea of starting a Peace Corps has caught on throughout the world...and everyone seems to be getting into the act. Twenty-one nations have established overseas voluntary service programs. Another 42 countries—all considered part of the developing world—have caught the volunteer fever and set up domestic service programs.

## Dates Set For Summer School-1967

Tentative time schedules for the 1967 summer school session are now available at the University summer school office and the registrar's office, according to Paul Kaus, summer school director. This year's eight week session will start, Monday June 12, with registration that day. The last day of the summer session is Aug. 4, thus giving students returning in the fall five weeks vacation before the opening of fall term Sept. 11. Kaus noted, that there may be a few changes in the tentative schedule, but they would be minimal. There is a definite increase among students continuing their education during the summer, according to Kaus. He noted that many students are now interested in completing their degree in three years instead of four, figuring they can earn more salary in the first year after graduation, then they can in three summers. He also said, there is interest in summer school by those students who have changed curriculum or failed courses, or for other reasons need to catch-up with their class. Typically, the Summer School student body is about ninety per cent teachers, school administrators, and other professionals, seeking to complete baccalaureate or advanced degrees.

THE NAVY PREPARES—MSGT George Moffett corrects the form of Make Kephart, Chrisman in preparation for the Northern section of the Idaho State Gallery Smallbore Championships to be held in Memorial Gymnasium rifle range tomorrow and Sunday at 8 a.m. The meet attracts ROTC, collegiate, and civilian competition from Eastern Washington and Montana as well as Northern Idaho. The scores will be compared with scores from a Southern Idaho competition to determine the state winners.

# Legislation Passed On Humanities Committee

A resolution calling for the passage of legislation establishing an Idaho commission on the Arts and Humanities was passed Tuesday night by the Executive Board. In response to the resolution ASUI President Richard R. Rush sent a letter to each member of the Idaho House of Representatives informing them of the decision. The E-Board Report and resolution was introduced by E-Board member Gary Vest. Its purpose is to congeal the support of the Idaho student body behind a bill, now pending before the Idaho House of Representatives, that would establish an official state department the Idaho commission on the arts and humanities.

## CUP Caucus Outlines Plans

Christen Dethomas, Campbell, was elected corresponding secretary, and Bob Stanfield, president, outlined plans for the coming spring election, during a Campus Union Party caucus, Feb. 1. The coming plans for CUP include an open platform committee meeting, headed by Randy Stamper, off-campus. Stanfield announced that all candidates must have their names in to the ASUI office by Feb. 22 and all houses belonging to CUP must have their spring roster in to Bob Knittel by then for convention. Stanfield emphasized that the most pressing item before convention is the platform committee report. The platform committee will have an open meeting this Saturday to hear ideas from persons interested in 67-68 E-Board issues. Stamper said that this meeting is the one way that CUP can best serve the students of the University and up date the system of student government. Stanfield announced that there would be two more caucuses, Feb. 15 and Feb. 22, and convention is set for Feb. 26, with registration starting at 1 p.m. and the seating of delegations at 2 p.m.

## LDS Sweetheart To Be Crowned

The first LDS Sweetheart Queen will be announced during the intermission of the LDS Sweetheart Ball tonight. The dance which is the first of its kind, is sponsored by the LDS Student Association. It will be held tonight from 9-12 p.m. in the Student Union Ballroom with music by Scott Reed and his Combo.

According to the senate bill, the objectives of the commission are to "stimulate and encourage the study and presentation of the performing and fine arts and public interest therein." The bill further specifies that the commission is to make surveys of the public and private groups in the state that are engaged in work in the arts and humanities. Areas outlined for study by the commission include music, the theatre, dancing, painting, sculpture, architecture, and the applied arts and crafts.

Additional duties of the commission are to "take such steps as may be necessary and appropriate to encourage public interest in the cultural heritage of the state, and to expand the state cultural resources." In encouraging the legislators to support the commission, ASUI President Dick Rush wrote all members of the Idaho House of Representatives. In his letter Rush states, "We at the University recognize the need for this program and are anxious to see it instituted. It is our feeling that we, as Idaho's educated, owe the opportunity of exposure to cultural pursuits to all citizens of Idaho, particularly its youth. It is time that Idaho began to advance in this area."

In his letter Rush went on to describe the establishment of the arts and humanities commission as a "step toward the abolition of Idaho as a cultural island."

## Home Ec. Club Elects Officers

University Home Economics club met Tuesday for the election of new officers. At the conclusion of the regular business meeting, the officers were installed including Chairman Ida Glenn, Tri Delta; Vice-Chairman Ginger Ross, Ethel Steel House; Secretary Carolyn Ely, Alpha Chi; Treasurer Donna Stevens, Theta; Historian Carol Helmgartner, Campbell and Editor Sue Stettler, off-campus. Various committees were appointed and plans were made for a luncheon to be held May 6. Advisors for the club are Mrs. Gretchen Potter and Miss Shirley Newcomb. Gem pictures were taken before the meeting was dismissed.

## Law Applications Due Says Bell

Students planning to enroll in the College of Law in September, 1967, should apply now for admission, according to George M. Bell, acting dean of the College of Law. It is necessary that a student apply for admission even though he is in a combined arts and law or combined business and law course, the dean added. Application forms and instructions on the necessary procedure may be obtained in the dean's office, College of Law. "Since the number of spaces for entering law students is limited," said Dean Bell, "delayed applications may be rejected."

## Tri Deltas Plan Scholarship Competition Here

Theta Tau Chapter of Delta Delta Delta is now receiving applications for a \$200.00 scholarship to be awarded a woman of this campus. All full-time, under graduate women students are eligible to apply. Academic record, contributions to campus life, and financial need are the basis on which the scholarship will be awarded. All local winners will be eligible for one of the \$1,000 National Delta Delta Delta Service Projects awards. Application blanks may be obtained from Dean Neely or Delta Delta Delta. These forms must be completed and returned to Dean Neely's office or the Tri Delta Chapter house by March 1. Last year the scholarship was won by Pat McCollister, Houston.

## Here's More About E-Board

Issue aroused much interest. The board decided the proposal should be put before the students again. Other amendments approved for the ballot provide for: 1. The election of an ASUI secretary by Executive Board. 2. Extension of polling hours during elections. 3. Change of spring election date. 4. The addition of a Budget Department.

The board also accepted the recommendation to endorse current Idaho legislative action regarding a Commission of the Arts and Humanities — a bill presently before the Senate. Vest proposed the endorsement, saying, "You realize what a lack of cultural environment we have in Idaho — especially when we are young. — And I don't feel endorsing this bill would be 'playing politics' as such."

Student-faculty committee appointments, presented by Lois Grieve, were also accepted by the board. The board refused a \$4,400 request for radio station KUOI equipment, however, Budget director Joe McCollum moved the request be sent to the budget committee and referred back to the board the following week when more information regarding the financial condition could be obtained.

## Sophs Name Chairmen

Larry Duffin, Sigma Chi, was appointed chairman of the Dance Contest with Co-Chairman Swanie Schmidt, Gamma Phi, according to Campus Chest Publicity Chairman Bob Fry, Delta Sig. Others included: House Actions Chairman Mary Kay Pinch, Alpha Chi, and Co-Chairman Larry Swan, Sigma Chi; Tuesday's Dance Chairman Jane Slaughter, Tri Delta and Co-Chairman Carlye McGinnis, Pi Phi; Miss Campus Chest Contest Chairman Bob Dixon, Sigma Nu and Co-Chairman Marilyn Foster, Pi Phi; Friday's Dance Chairman Michelle Burkett, Gamma Phi, and Co-Chairman Jeff Blankens, Phi Tau; Ugly Man Contest Chairman Bruce Austin, Phi; and Publicity Chairman Bob Fry and Co-Chairman Lynn Van Diver, French. General Chairman is Mike Powell, sophomore class president. Campus Chest will begin Feb. 20 with activities extending through Feb. 25.

# Vandal Cagers Enter Crucial 4 Day Series

## Vandals Travel To The South

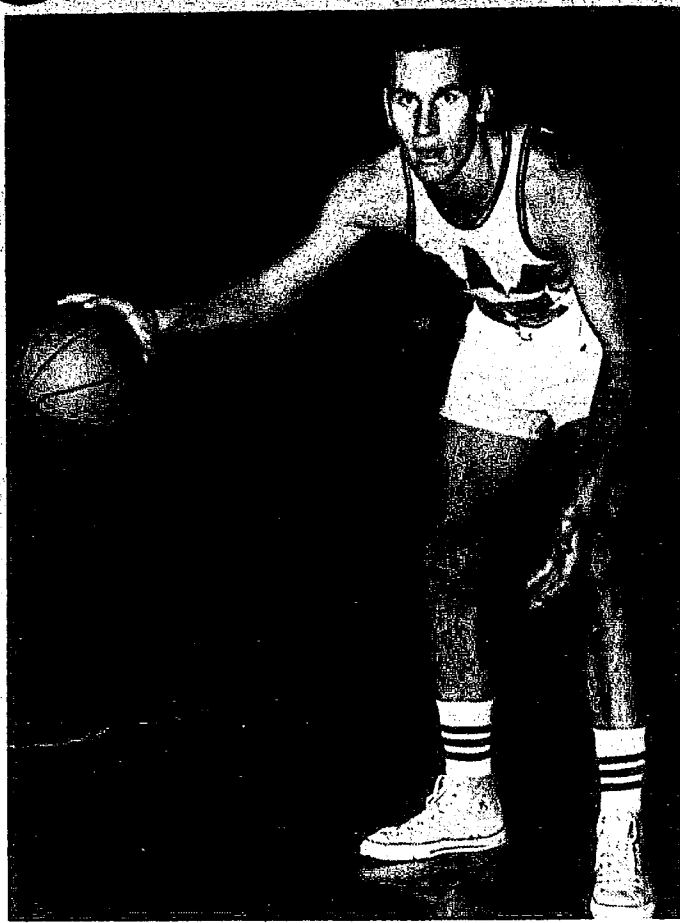

The Vandals travel south to play the Idaho State Bengals twice and the Weber State Wildcats once. The first game will be tonight against the Bengals in Pocatello. Saturday night will put the Vandals in Ogden, Utah, where they will be trying to break Weber's 45-game homecourt winning streak. On Monday they will return to Boise where they will play the Bengals again.

The Vandal Cagers play the Bengals of Idaho State tonight in a game that will start a four day, three game weekend. Tonight's game will count in the battle for the "Spud" trophy as well as being a conference contest. The "Spud" is a traveling trophy that is given to the winner of the series of games between Idaho State and the Vandals. The Bengals will be out to capture the trophy which the Vandals have held for several years.

Starters for the weekend, as they leave Moscow, will be Rod Bohman, Mike Wicks, Bob Pipkin, Dave Schlottbauer, all seniors and sophomore Larry Kaschmitter. Coach Anderson also expects to get some use out of Wildcats. Unless the Gonzaga Bulldogs defeat the Wildcats on Friday night the Vandals will be out to break Weber's home court winning streak which will then stand at 46 games without a loss. Last year the Vandals

came within five points of defeating them but the Wildcats managed to win, 100 to 96. Capital High in Boise will be the sight of the second game with the Bengals. This game will not count in conference competition, but it will be a crucial game in the series with them for the "SPUD."

Other conference action this weekend will see Montana at Moscow, Idaho State at Pocatello, and Gonzaga at We-ber. Last year the Vandals

Bob Noice

Basketball Coach Wayne Anderson expects juniors Bob Noice and Rick Day to see some action this weekend as the Vandals travel south to meet the Bengals of Idaho State, and Weber State.

Rick Day

Coach Wayne Anderson expects junior Rick Day to see some action this weekend as the Vandals travel to meet Idaho State and the Weber State Wildcats.

## University Ski Team Places Third In Banff International

The Vandal ski team placed third in the Banff International Ski Meet which was held in Banff, Alberta last weekend.

Terry Skogland, Theta Chi, and Ole Bergset, Delta Sig finished first and second in the cross country to place Idaho first in that event. Friday morning the downhill team of Brent Brady, Theta Chi, Barry Boydston, Borah, and Mike Rowles, Delta Sig, finished fourth in that event. Saturday afternoon the Vandals fortunes changed a little as the slalom team of Rowles, Seetin, and Boydston finished just three points out of first place. Sunday the Vandals undermanned jumping team showed well in that event but were hampered by the ab-

sence of a third man to fill their unit to full size. They were allowed to compete with just two men, but their score was still compared to the combined totals of the other teams which all had three members.

The ski team's next outing will be next weekend as they travel to Bozeman, Montana, for the Big Sky Championships. "It will be a tough meet, but if we have a good day and find a third jumper we could come out real well," said Mike Rowles who is the Alpine captain.

## Pool Tournament Set At Wazoo

The Region 14 pool tournament will be held at the Compton Union Building on the 16th and 17th of Feb. The competition is sponsored by the Association of College Unions and will draw teams from all over the northwest. After the tournament at Pullman is finished the teams will move to our SUB and compete in the WSU-Idaho Invitational. It is scheduled for Saturday the 18th. A time has not been set for it to begin.

## 'I' Wrestlers Defeat Zags

The Vandal wrestling team defeated Gonzaga University 20-6 in a wrestling meet held at Kennedy Pavilion in Spokane on Wednesday.

The Vandals were led by Mike Day in the 167-pound class as he topped Gonzaga's Mike Farrell in one of the quickest and closest matches of the meet. Pat Eck wrestling for the first time on the varsity in the 177-pound class for the Vandals, pinned John Hanlan of the Zags in 4:31 of the second round for the only pinning of the meet.

Bob Jordan of the Zags topped Charles Hinds on the opening match and Mike Dineen of the Zags pinned Jim Dowty of the Vandals for the only two wins for the home team.

The Vandals grapplers have now won seven of 13 matches on the season and will meet Whitworth next Monday at Moscow in the Armory of Memorial Gym.

Results: Bob Jordan, G, defeated Charles Hinds, I, 4-2, 123-pound class; Tim Lape, I, defeated Dan Dempsey, G, 11-0, 130-pound class; Dale Mowrer, I, defeated Bob Gillis, G, 4-0, 137-pound class; Mike Black, I, defeated Bob Placta, G, 15-1, 145-pound class; Mike Dineen, G, defeated Jim Dowty, I, 5-0, 150-pound class; Mike Day, I, defeated Mike Farrell, G, 2-0, 167-pound class; Rick Mayer, I, defeated Lance Campbell 16-4, 160-pound class; Pat Eck, I, defeated John Hanlan, G, 177-pound class.

## Idaho Coeds to Play Badminton

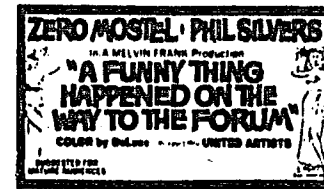

Three Idaho coeds will travel to Seattle this weekend to represent the University in the Northwest District Badminton Tournament. The girls are Fern Eberhardt, Forney and Carol Stevens, Forney, and Sue Jennings, Pine. Miss Thomas, women's physical education, will accompany the girls and act as advisor.

WRA bowling will begin tomorrow at 8:45 a.m. in the SUB. "Approximately ten teams from the living groups are expected," said Miss Sylvia Zuroff, women's P.E., who is the bowling advisor.

A general meeting of the Women's Recreation Association will be held at the home of Miss Betts on Feb. 16 at 7:00 p.m. If you need a ride meet at the Women's gym at 6:50. Everyone is invited.

## Swim Team Slates Two

The Vandal swim team will travel into Washington for two dual meets this weekend. The first will be this afternoon in Ellensburg against the Central Washington Wildcats. Tomorrow will see them in Bellingham competing against the Vikings of Western Washington.

Coach Hathaway had high praise for veterans Steve Calhoun and Frank Burlison. Burlison swims the 200 yd. breaststroke and the Individual Medley which is also 200 yds. long, while Calhoun competes in the 200 and 500 yd. freestyle events. Others competing and their events are: Dick Curtis, Phi Delt, 100 and 200 yd. freestyle; Bill Ross, off campus, freestyle; Gary Powers, Sigma Nu, backstroke; Bill Harvey, freestyle; Ed Williams, Graham, diving; and Courtney Chamberlain, off campus, 500 and 1000 yd. freestyle.

The coach also made some scoring and participation comparisons with football. Football is a team sport with the scoring computed on a team basis, while swimming is an individual sport which has the "team sport" name forced on it by the scoring system. A unified effort is needed to score in football, but in swimming one man can score points even if he is the only "team member" competing. This is very unfortunate because it tends to discourage individuals by refusing them the recognition they deserve. Hathaway also pointed out that, "although some swimming scholarships are given, not a single member of the team was receiving money when he first turned out for swimming. These men didn't even compete in swimming during high school. They have just combined desire with natural ability and what they have done on desire is remarkable."

## Baseball Meeting Draws Veterans

Seven lettermen answered the call to arms as Coach John Smith held his first general meeting since being named baseball's head mentor.

The lettermen are: Al Simmons, pitcher; Ken Johnson, pitcher; Dean Cherbas, outfield; Gary Johnson, shortstop; Wally Posey, infield; Doyle Demond, infield; and Jim Spencer, outfield.

## Hole-In-One

Steve Beebe, a law student, scored a hole-in-one at the Vandal golf course last Tuesday.

He shot the ace on the 215 yard seventh hole with a three wood. Playing in the foursome were, Scott Bistline, Pocatello, Klaus Wiebe, off-campus, and Don Gessel, also off-campus. Dick Snyder, also has an ace to his credit on the seventh hole. His came back in 1958. Other fine shots have been recorded as far back as 1945 when John Cermack dropped one in on temporary green number two.

## Ski Reports

Feb. 10, 1967  
Brundage Mtn.—Packed powder with 121" on the top and 84" at the bottom. Sunshine is expected for this weekend.

Mtn. Spokane—Hard packed snow with a high overcast. The road is in good shape and the average temperature is 30 degrees.

Schweitzer Basin—The top half of the chair is reported as excellent with a thin overcast. Number one T-bar is in good shape.

Sid Acres—Closed for the season.

Tamarack Ski Area—Closed for awhile.

North-South Ski Bowl—Fair skiing this weekend.

## Professional Careers in Cartography

CIVILIAN EMPLOYMENT with the U.S. AIR FORCE  
CREATING AEROSPACE PRODUCTS.  
Minimum 120 semester hours college credit including 5 hours college level math. The required math must include at least 2 of the following: college algebra, trigonometry, analytic geometry, differential calculus, integral calculus, or any course for which any of these is a prerequisite. Equivalent experience acceptable. Training program. Openings for men and women. Application and further information forwarded on request.
