

The Idaho Argonaut

1889 Vol. 78, No. 21

The University of Idaho - MOSCOW, IDAHO

Tuesday, November 19, 1968

Governor Don Samuelson

Senator Len B. Jordan

Advise for the Legislators

KUOI now broadcasting FM to Moscow, Pullman

The University of Idaho student radio station began its first day of FM broadcasting last Sunday, bringing a "Student Sound" to the Moscow-Pullman area.

According to Student Manager Chuck Simmons, "The format of the station is based on a concept called 'The Student Sound.' This includes folk music, jazz, up-tempo rock, comedy and former hits.

KUOI-FM also provides comprehensive news coverage. Through the facilities of United Press International, regional, national and international news is presented.

Fall concert given Sunday by Idaho Symphony Orchestra with LeRoy Bauer conducting

The University of Idaho Department of Music will present their Fall Concert Sunday, November 24 in the University Auditorium at 4 p.m.

Each year the orchestra presents three major concerts in the University Auditorium, transcribes radio broadcasts in collaboration with the Radio-TV Center.

Miss Barnes has sung professionally in oratorio, opera and concert and teaches voice in her studio in Moscow, Idaho.

Opera workshop presents scenes

The University of Idaho's annual production of short scenes from well-known operas will be presented in "The Opera Workshop" at the Music Recital Hall, 8 p.m. Thursday, November 21.

The production will be done in costume and with minimal scenery in the best workshop tradition which has become popular with area audiences.

The presentation will be done in costume and with minimal scenery in the best workshop tradition which has become popular with area audiences.

For the second semester offering, the Opera Workshop will present a full length opera, "The Bartered Bride," complete with orchestra, in the University Auditorium on Mother's Weekend.

Admission for the shows which begin at 7:30 and 9 is \$25 per person, which includes all the popcorn you can eat.

The membership of the University Symphony Orchestra represents many different courses of study and most of the colleges of the University.

Senior Class Extended Board will meet tomorrow at 7 p.m. in the SUB. Off-campus seniors are invited to attend.

Senior Class Extended Board will meet tomorrow at 7 p.m. in the SUB. Off-campus seniors are invited to attend.

Samuelson, Hartung address state legislators at Chamber meeting

By Chris L. Smith

Idaho Governor Don Samuelson asked the Idaho legislature to give "immediate attention to a unified system of higher education for Idaho," and University of Idaho President Ernest W. Hartung called for a 25.9 per cent increase in the operating budget for the University Friday.

The North Idaho Chamber hosted all the newly elected members of the state legislature to a tour of the north Idaho area which included State Hospital North at Orofino, the Dworshak Dam site, Lewis and Clark Normal School, and the Port of Lewiston site.

Chamber hosts legislators

United States Senator Len B. Jordan spoke to the group at its Friday luncheon on the need for Idaho to retain its water resources. Hartung made his budget presentation to the legislators Friday afternoon.

Speaking at a Friday night banquet to over 300 people, Samuelson noted that the state should "end sectionalism, and adopt a long range facilities construction plan for all campuses."

Samuelson speaks on budget requests

On the matter of his budget, which will be presented to the 40th session of the legislature, Samuelson stated that budget requests from the various state departments totaled over \$230 million.

"Since there isn't anywhere near that much money in sight, the task was to establish priorities to do the best we could for everybody by preparing recommendations for the legislature."

"I would caution at this point," the governor said, "that outright inclusion of the \$15 million dollar expected surplus bonanza in the general fund for 1969-71 would neither be prudent or responsible."

Hartung requests increase

"We must increase our attention to school funding," Samuelson said. Hartung asked for a \$23,080,895 budget to operate the University for the next biennium. That request was 25.9 per cent over the 1967-69 biennium budget of 18,330,351 that the legislature granted the University.

The President said referring to the University staff salary scale that, "In our presentation for the 1967-69 budget, we pointed out that we were in a desperate situation in regard to salaries. You responded, and as a result we were able to increase our competitive position substantially, thus being able to retain faculty members we would otherwise have lost and to fill vacancies with qualified personnel."

"Our salary rating by the American Association of University Professors rose from a "C-D" average to a "B" average. Naturally, we hope to retain this position, and our present budget request is vital to keep us competitive."

26 per cent increase asked

In the 1967-69 biennium the appropriation for salaries was \$14,347,283; the budget request for the next biennium is \$18,079,501 or a 26 per cent increase. The greatest budget increases in the requested appropriation over the last two years are a 10 per cent increase in the scholarship area where \$133,370 is asked. A 27.5 per cent increase is asked in the travel budget for the University.

The budget if passed, would allocate the University \$23 million from the state legislature. Other funds would be received from the federal government, and endowment income. Money received from sources other than the state would total \$3 million.

Mining re-accredited

Hartung noted that as a result of the previous budget increases, the University had been able to full staff the mining engineering department, and had been able to as a result regain its accreditation with the professional mining engineering societies.

Samuelson stated, "the only way that we can maintain the schools at Moscow, Pocatello and Boise and hope to fund them properly is through coordinated and cooperative efforts to create a unified statewide higher education system and constructive program."

"A fragmented program simply will not work for the benefit of our young men and women, who after all are the only reasons for operating our universities.

Total picture—sectionalism mentioned

"The scarcity of dollars makes it mandatory that all of us involved look at the total picture, and that picture requires cooperation and not competition."

He said, "Sectionalism is nothing more than a roadblock in the path of progress of our institutions of higher learning."

The governor said Idaho cannot afford duplications any more than it can afford sectionalism.

"No one wants three mediocre schools operating with no chance to scale the heights of excellence. For each to justify its future,

each must concentrate in the specialized fields for which it is best fitted and in which it can excel."

Long range construction

As for construction, he said all involved should make adoption of a specific long-range procedure an immediate priority project.

In addition to the general budget, the university is requesting the following from the state for the coming biennium:

- Agricultural Research — \$3,696,593.
- General Agricultural Extension — \$2,519,996.
- Agricultural Extension — Pure Seed — \$75,375.
- Applied Research — \$145,000.

University of Idaho projects requested from the State Permanent Building fund for the 1969-71 biennium, in order of priority, are:

- Movable Equipment for the Women's Health-Education Building — \$48,000.
- Agricultural Science Building and Agricultural Engineering and Laboratory Building — \$1,535,000.
- College of Law Building — \$1,535,000.
- Administration Building — \$1,990,000.
- Central Heating Plant Expansion — \$770,000.
- Museum Building — \$1,765,000.

The university report on building needs pointed out the following:

The Women's Health-Education Building is now under construction but, according

to custom, equipment funds were not asked for it in the request for building funds at the last session of the Legislature.

Heating plant reaches limits

A number of departments in the College of Agriculture are housed in old, inadequate and inefficient buildings. These include Entomology, Agricultural Education, some of the Plant Sciences, a portion of Agricultural Bio-Chemistry, and Veterinary Science. The Department of Agricultural Engineering has never had an adequate shop and laboratory building.

Organized in 1909, the College of Law was among the early law schools accredited by the American Bar Association, but "today it has the unenviable distinction of being unquestionably the most poorly housed school of law in the United States."

Additional administration services in present-day operations are stressed in the need for a new Administration Building.

Many departments in poor buildings

The addition of buildings required to serve the university's growing needs has approached the limits for the Central Heating Plant.

The present University Museum is located in what was once the old Geology Building, which was constructed in 1906 and remodeled inside in 1963. While it was pointed out that this is providing a minimum start on a museum program, both the size and location are limiting growth factors for the museum which serves all departments and all subjects.

AAUP sponsors discussion

"Should the student have control over curriculum planning?"

This is the title of the panel discussion sponsored by the University of Idaho American Association of University Professors in the Student Union Building, Thursday, November 21 at 7:30 p.m. in the SUB Gold Room. Friday's Argonaut incorrectly gave the date of this discussion as last Thursday.

"Faculty, students and the general public are invited to attend this open discussion on such a timely topic, what with the student unrest and rebellions all across the country, and with the Faculty Council's proposal for 'Student Bill of Rights' here at the University of Idaho," J.H. Cooley of the AAUP Program Committee said.

The panelists are Robert Stevenson, professor of law; Robert Jordan, instructor in English; Larry Craig, President, ASUI; and John Orwick, student. The moderator of the panel is Dr. Frederick Weltzin, Dean Emeritus of the College of Education.

The panel was chosen for their keen and witty observations, criticism and participation of those areas considered in the discussion, Cooley said.

Interviews for Holly Week will be held this evening in the SUB at 7 p.m. The room will be post-d. If the necessary number of sophomores do not turn out there will be no Holly Week activities.

SINGERS WILL PERFORM—Students in the Music Department will present the seventh annual Opera Workshop Thursday night for University of Idaho students in Recital Hall at the Music Building. The group will be assisted by Margaret VanOrman and Brent Waqner. Scenes from "Don Giovanni," "Merry Wivers," "Faust," "Carmen" and "Manon" will be presented.

Editorial Opinion

Growth At Whose Expense?

Football season is over and the mighty gladiators of the gridiron have lived successfully through another season. Possibly even more successfully than usual. In spite of the 77-3 battering they took in the Astro-dome Saturday they have emerged with a 5-5 season, which is the best since Dee Andros left earlier in the 1960's.

Y C McNease came to Idaho and didn't promise a winning team the first season. In fact, he said he would consider three wins a good start. Yet the season is over and the Vandals have five wins to their credit and two losses that were ever so close.

There have been grumblings about Y C and his methods which I suppose are to be expected when a man comes to a new school and enforces his policies on people recruited by other men with other policies.

The football dormitory is probably the biggest change that the campus has had to accept, some have given up football because of the dormitory set-up.

But even the hardships of living together have not dulled the Vandals' desire to win. In fact, I would venture a guess that most players like the living and eat-

ing arrangement that is facilitated by living in a group. It is unfair to expect a 235 pound football player to live on the same amount of food that a 110 pound woman eats or even a 175 pound man, but that was the situation in many of the dormitories.

It is still too early to pass judgment on Y C and his system, but the first results are more than encouraging. My only reservations as I look at the changes that have been made and those still to come revolves around the de-emphasis of other programs so football can be given more emphasis.

To Y C and his players football is almost the only thing in the world, and I would hate to see the same be true of the entire athletic department. We have fine baseball teams and many other smaller sports could be excellent for a fraction of the support football receives, and they have only been getting a small piece of the pie.

Y C has the football coaching and team building ability. Now it remains to be seen if the athletic department has the administrators to run the whole outfit and not ruin the smaller sports at the same time football is being emphasized. s.a.b.

The Student Bill of Rights, Again?

"Though a Student Bill of Rights must serve many functions, the most essential function that it must serve is that of acting as a reference for present and future students to base their actions upon. In order to serve this function, it must be clear-cut, easily read, and understandable to the average student. It is quite clear that in this area the Bill of Rights now falls miserably," said ASUI Executive Board member Tom Carroll in Campus Affairs Committee yesterday afternoon.

Carroll brought up an excellent point. The present Student Bill of Rights is neither clear-cut, nor easily read. Students, for whom the Bill of Rights was written, don't have even the foggiest notion of what is in the document, much less its relevance to the University of Idaho Campus, and themselves.

"What the use of a document when no one can understand it?" asks Carroll. It's no use for me, as a reporter in fact it causes me many problems and headaches, as students ask me to interpret and write about that present nine page diatribe. I am finally starting to understand the Student Bill of Rights after being exposed to it for over a year, but yet I find it very difficult to explain.

If my memory is correct, the original student Bill of Rights passed Executive Board by a 6-5 vote, the result of a tie that was broken by former ASUI President Dave Leroy. Supposedly all of the errors contained in the Bill were to be ironed out in the Committee on Campus Affairs last spring. But several members of E-Board forgot about their obligation and duty to the Campus Affairs

Committee, and took a leave of absence from a majority of meetings at which the Bill was discussed and improved. Then suddenly one late night during finals, the whole student Bill of Rights document was to be voted on by Campus Affairs.

A strange thing happened that night, something this reporter hadn't seen for months, the vice-chairman of the committee finally made it to a meeting, and strangely enough all of his cohorts that had mysteriously disappeared also reappeared.

Alas, the Student Bill of Rights and Responsibilities as it was then rightfully dubbed, passed by a valiant vote of 9-1, and was sent on to Faculty Council.

This semester Faculty Council has made an honest effort to do something with the Student Bill of Rights, but where among that verbose, wordy nine page document can you start and do anything constructive without rewriting the whole Bill?

Carroll is right in asking for a reconsideration of the whole Student Bill of Rights by the Campus Affairs Committee. Campus Affairs Committee is basically responsible for the Bill that is before the Faculty Council now, and if there are problems, they should be corrected now.

If Iowa State can write a two-and one-half page Bill of Rights inclusive enough to cover their whole University campus, I think its about time Idaho looked to their ideas and what they have done.

If we are to have a Student Bill of Rights on this campus, it should be written so that every student can understand it, otherwise lets not have one at all. C. J. E.

An Apology

This is an apology. One week ago today I spent considerable time and space belittling Detroit Iron and Corvettes in particular. I was wrong. Some of the Vettes were out Sunday and even some other American cars. I am sorry. I should have addressed my self to the owners of the numerous MG's and MG-B's on campus.

There wasn't one MG or Triumph in the field. You say you are just starting and have never raced before. Don't feel like the lone ranger. Sunday was just my second race. I keep losing, but I'm getting closer and it isn't possible for everybody to win. Have a heart. Bring out your MG-B so I can beat somebody. s.a.b.

What About The College Years?

Yellow Springs, Ohio—(L.P.)—Are the college years a last fling of adolescence, a period of "childlike freedom from responsibility" that comes with escape from parental supervision? Or are they rather a first fling at behavioral determination, a period of experimentation with new values, new life styles?

Dr. Edward S. Bordin, of the Bureau of Psychological Services at the University of Michigan, holds the first view, while the second is advanced by Dr. William L. Gurtner, recently resigned college counselor of Carleton College. Both agree, however, that the turmoil on college campuses is as much a reflection of the turmoil within the individual students as they cut their ties with childhood and seek new identities as adults, as it is a reflection of the turmoil of the outer world they are preparing to enter.

This was one of the exchanges at a conference for college counselors and others held at Albion College last fall. Part of the problem the participants faced

was identifying the sources and causes of the great emotional and social stresses facing college youth today and the psychological factors of their response.

Their other concern was the ways the resources of the college—counselors, teachers, administrators—can best be used to help student toward maturity and to guide their responses to the pressures they feel toward personal growth instead of destruction.

The liberal arts colleges, being smaller and more flexible than the larger universities can often respond to these problems in different and pioneering ways. Experiments with the curriculum, with vocational and educational guidance, with community organization and housing arrangements, as well as the customary counseling procedures with individual students, can contribute to a campus climate for healthy student growth.

But the smaller campuses are also frequently beset with problems of limited financial and personnel resources, as well as philosophical differences about what role the college should play in students' personal lives.

It was to discuss these areas of concern that Dr. Joseph C. Hoston and Willard B. Frick of the Albion College Bureau of Institutional Research and Counseling convened the Albion Symposium, with aid from the Danforth Foundation, and invited to it counselors, teachers, chaplains, deans, and administration officers from a variety of liberal arts colleges.

Addresses of the principal speakers at the meeting, as well as summaries of the discussions which followed are reprinted in COUNSELING FOR THE LIBERAL ARTS CAMPUS: THE ALBION SYMPOSIUM (Antioch Press). Panel presentations were made by representatives of the smaller campuses on the topics "Educational-Vocational Guidance" and "Innovations and New Directions in Counseling." These are also published in the book, as are the summaries of the group discussions.

FROM ACROSS THE BORDER Science Requirements and The WSU Evergreen

Although it is true that science courses for non-majors need to be radically reorganized, it would be a mistake to heed the recommendation of the humanities study council to lower the general university requirements to two semesters of science.

A broad understanding of natural science and mathematics is essential for any student who graduates under the assumption that he is an "educated" man. All students can benefit from the exposure of four semesters of science and mathematics to help understand the natural world in which they live.

Although the four semester requirement is crucial, freshmen who can demonstrate a satisfactory level of knowledge in science should be exempted from a portion of the requirement. Qualifying exams, similar to those used in the foreign language department, should be used to determine each student's level of proficiency.

To fit the needs of students with good high school science backgrounds, additional science courses should be offered at the intermediate level which would satisfy the requirements.

Also a revision is needed in the course structure itself. All science departments should realize that the needs of majors and non-majors are not the same. They should realize that courses for non-majors should be made much less technical than many of them presently are.

Entirely new courses, stressing a general science background, should be implemented to satisfy the needs of non-majors. Such a course in historical science could combine the talents of astronomers, geologists, biologists, chemists, geneticists and anthropologists to teach one general class concerning solar evolution and the evolution of life.

Another possibility is a course in prob-

lem solving. Such a course could demonstrate how tremendously important scientific principles are to man's relationship to the natural world.

Aside from totally new courses, additional orthodox classes are also needed. Study council reports from the natural sciences have recommended the addition of atmospheric sciences and oceanography to fulfill science requirements.

The science study councils have also recommended to split the physics introductory course to fit the separate needs of majors and non-majors. They plan to offer a course in philosophy and logic theory principles for non-majors and a more technical course for majors.

It is just possible that with the revision of present courses, the addition of more approved courses and the implementation of proficiency tests that more non-majors will even want to take four semesters of science.

To The Editor

The Idaho Argonaut welcomes letters to the editor and recognizes they are an invaluable contribution to the paper. However, it is necessary that we set guidelines concerning letters to the editor. All letters must be signed and an address and telephone number given. The Argonaut reserves the right to edit letters for libel, poor taste, and length. Letters should not exceed 250 words and may be edited subject to space available if the limit is exceeded.

Save the rifle team!

The University of Idaho Rifle Team is in danger of becoming a memory of the past unless something can be done to get rifles and equipment for the team.

In the past Idaho has had a good rifle team and there is no reason why the same couldn't be done this year if we can get rifles and equipment in time to start practicing for the upcoming matches.

Although ASUI claims to support us, they will not grant us any more money except enough to pay for transportation to matches which may have to be called off anyway because of lack of equipment.

There are many students genuinely interested in this sport and are unable to shoot. Fifteen rifles are needed plus additional equipment.

So far at the meetings, we have discussed ways and means of making money. A wildlife film is planned to be shown in the near future and raffles are being organized. All interested persons are in-

The Sophomore Extended Board meeting will be held this Thursday evening at 7 p.m. in Conference Room No. 2 in Wallace Complex.

Legislators review

Two Idaho constitutional amendments passed by the voters this month were reviewed Friday for 75 Idaho legislators meeting at Moscow with the North Idaho Chamber of Commerce.

Max Yost, executive manager of the associated Taxpayers' Association of Idaho, said, "Only two of the five resolutions passed have what might be called important fiscal connotations — one regarding the investment of endowment funds, and the other, annual sessions of the legislature."

"S.J.R. No. 4, regarding investment of endowment funds, did not accomplish the purpose for which it was publicly promoted," he said. "It will take at least one more amendment to grant the authority with which the legislature can by law provide for the investment of State endowment funds in stocks of private corporations. It will take an additional amendment to the Constitution before there will be clarity as to the difference between interest,

and appreciated. For more information call Sharon Jennings at 5200 after 5 p.m. Idaho is the greatest hunting state in the country. Don't let it get shot down. Bobbi Cunningham

income, and growth or loss of principle."

Yost said H.J.R. No. 1, which provides for annual sessions now gives the "legislature great latitude in determining its operation."

He suggested that one annual session might be devoted entirely to fiscal matters of the State budget, including revenue measures to balance the budget.

"Another very important matter which the proposed increase in State budget "of from \$166 million appropriated for the current biennium to \$235 million of requests. If the new budget were to be \$235 million, it would require, including the use of the surplus, a tax increase of \$28 million.

"Requests for all education purposes at all levels and purposes in the state from the general fund could well exceed \$162 million, compared to the \$112.5 million appropriated from the general fund for the current biennium," he said.

BANFF IS THE GOING THING—The Vandal Ski Club is already planning for their annual ski trip to Banff, Alberta Canada for semester break. Deposit payments can be made at the SUB Information desk. Deposit should be \$10-\$15 according to Bill Kyle, president of the ski club, and should

be made by Dec. 20. Five and six day plans are available if enough people sign up for the trip. An information page will be given out at the time of deposit. Above is part of last year's crew on the Banff trip.

Deposits for the Vandal Ski Club's trip to Banff over semester break can be made at the SUB Information Desk or to one of the officers, Bill Kyle, 4355, Pete Goodman, 9982 or Kathy Keator, 3521. The deposit of \$10-\$15 is to be made by December 20. An information sheet will be given at the time of payment.

Alpha Kappa Psi, professional business fraternity, initiated the following new members: Dennis R. Hanel, Wade Bloom, Dennis Burr, Don Eaton, Bill Langford, Steve Engstrom, Joe Ledgerwood, Bob Brower, Lee Gusberg, Kim Howard, Denis Clement and Dennis Schaffner.

Social Security change; payments available

A recent change in the Social Security Law enables children under 22 who have lost a parent to receive social security payments. The child or surviving parent can get in touch with the Lewiston Social Security Office for information. The office is located at 726 21st St., Lewiston. The telephone number is 743-9456. Anyone who can benefit from this should write a letter of inquiry to Social Security District Office, Box 643, Lewiston.

The U of I chapter of Phi Kappa Phi wants to be sure that its mailing list includes everyone in the Moscow vicinity who is a member of this national scholastic honorary. Those who became a member at some other institution and did therefore not receive the information mailed out last week to area members should contact Forrest H. Hall in room 124 of the Engineering Bldg., 6516.

Cosmos club presents Arab World program

Cosmos Club will present its first program of the semester, "The Sounds of Colors of the Arab World," Sunday, November 24 at 6:30 p.m. in the SUB.

Speaking will be Miss Wijdan Shami, Ph.D. student in the education department at the U of I. The presentation will be illustrated by slides from Jordan, Lebanon and the Holy Land. A few pieces of Arabian folk music will also be played. All interested faculty and students are welcome.

According to Ashok Kotwal, Cosmo Club member, "it is a small world we live in yet one knows so little about it. Today man is looking for a suitable planet to move a part of his family from this overcrowded home. Still in the eyes of many, India remains a land of Yogis and mystics, and Chinese are the people who eat rats and cockroaches, Arabs are the guys who, for some inexplicable reason prefer camels as the means of transportation to the most natural means, namely the automobile.

"The realization of this situation is appalling," he continued to comment on the reasons for Cosmo Club's presentation of the films. "In fact, this very appalling thought motivated the present office-bearers of Cosmo Club to assert that the first aim of the club should be to make possible inter-cultural exchange on this campus. Work has already begun on the first International Lounge in the Campus Christian Center. It must be emphasized, however, that Cosmo Club is not a club of only foreign students."

THE MODEL 40 — computer is now running programs for several hundred students. Most programs are developed by students in classes for computer operation.

Computer system assists students

By Don Smith

How would you like to use a computer to do your next research project? It only costs \$100 an hour to rent the one at the University's computer center.

Sound unreasonable? Not really, since the average student job on the IBM 360 Model 40 computer takes only one to two seconds to execute, according to Dr. Ward Crowley, director of the center.

"We are now running programs for several hundred students," he said. Most of these programs are developed by students in classes for computer operation and programming at the university, but a fairly large number of graduate students doing research also make use of the generation three system.

The center, located below the entrance to the College of Law in the Administration Building, charges only for the time used on the computer. "We keep track of the time with an accounting routine running all the time in the computer," Dr. Crowley said. There is no minimum charge for computer use, unless it would be that for one second, since that is the shortest time recorded in the bookkeeping system.

Any student is eligible to make use of the facility, but authorization from a department head is required. "A student wishing to use the system would come to the computer center and get an official form for assignment of a job number. This would then be taken to the department head for approval," Crowley said. The source of funding and the amount assigned to the project would have to be reported to the center before computer time is given, Crowley noted.

A card is then read into the computer with the job number. The number identifies the division, department and the particular job. The accounting routine checks the job every 1/1000 of a second to be sure it is the same one. Every job's time is recorded on discs in to system itself.

At the end of the month, a billing program takes information from the disc, creates and prints the bills for use of the machine. Rates are from \$100 per hour for research, to \$75 per hour for testing of programs, to \$40 per hour for class related projects. "That is less than half the cost of machine rental," Dr. Crowley said.

Dr. Crowley denied the rumor that the system is not getting enough use.

Some decisions are relatively unimportant. Where you put your engineering talent to work is not.

As you contemplate one of the most important decisions of your life, we invite you to consider a career at Pratt & Whitney Aircraft. Here, you will find wide-open opportunities for professional growth with a company that enjoys an enviable record of stability in the dynamic atmosphere of aerospace technology.

We select our engineers and scientists carefully. Motivate them well. Give them the equipment and facilities only a leader can provide. Offer them company-paid, graduate-education opportunities. Encourage them to push into fields that have not been explored before. Keep them reaching for a little bit more responsibility than they can manage. Reward them well when they do manage it.

And your decision is made easier, thanks to the wide range of talents required. Your degree can be a B.S., M.S., or Ph.D. in: **MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL • CIVIL • MARINE • INDUSTRIAL ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • MATERIALS SCIENCE • CERAMICS • MATHEMATICS • STATISTICS • COMPUTER SCIENCE • ENGINEERING SCIENCE • ENGINEERING MECHANICS.**

UNIVERSITY OF IDAHO, MOSCOW, IDAHO

Ski club sale set

The annual ski sale sponsored by the Vandal Ski Club will begin at the club meeting to be held at 7 p.m. on Dec. 3 in the SUB.

The sale will continue through Dec. 5 every night from 7-9 p.m. in the SUB. The sale is open to anyone who wishes to buy or sell any ski equipment. All of the merchandise will be second-hand.

This year the club will charge a 10 percent handling fee on the asking price of all merchandise at the sale. This fee will be used to finance the club's activities and to bring more ski oriented programs to the University said Bill Kyle, club president.

Last year the sale included over \$300 worth of ski equipment and this year the total is expected to double, according to Kyle.

Beginning soon ski reports will be posted every week and broadcast over both KUOI and KRPL.

Plans for the club's annual trip to Banff are progressing. Anyone wishing to go should contact one of the club officers for information. A \$10-15 deposit is required before Christmas vacation. The deposit is refundable.

Later in the year the club plans an invitational race at Jackass Ski Bowl in Kellogg.

Botanist speaks

Dr. Marlon Ownbey, Professor of Botany at W.S.U., will speak on "The Birth of Two Species of *Tragopogon* in Palouse" at 7:30 p.m. Wednesday, November 20, in Life Science 201. His talk will be illustrated with color slides. All are welcome to attend.

The Vandals suffered a 77-3 loss at the hands of the Houston Cougars last Saturday in the Astrodome.

The game ended the Vandal season at 3-3 and increased the Cougar record to 5-1-1. The score calls to mind last year's game in which Idaho was beaten 77-6. Idaho's only score came early in the second period when Rob Young kicked a 32

yard field goal. Until this point the contest had been pretty well matched. Idaho had held Houston to seven points in the first quarter. By the half Houston was leading 42-3 and pulling ahead.

Young ended his college career with 104 net yards in his final game. This gave him 979 net yards for the season, an average of 4.7 yards per carry.

Houston actually scored twice in the first period, the first two times they had the ball. Their second touchdown was called back and several fumbles, combined with a tough Idaho defense, held the score down.

The Vandals had moved the ball well early in the game. Ken Salesky recovered a Houston fumble on the Idaho 45 and from there the Vandals drove steadily toward the goal line. Steve Olson passed twice to Jerry Hendren and once to Jim Wickboldt and Young gained 13 yards on a draw play to put Idaho in scoring position on the Houston six.

Olson was thrown for a 15 yard loss and Young kicked for Idaho's only score. From then on the Vandals played a defensive game.

Four plays after the kickoff Houston scored and Idaho's losing battle began. Ken Bailey passed 40 yards to tight end Paul Dulong for the score.

Jeff Gullory fumbled a short pass on the Idaho 26 and Houston recovered with the ball in scoring position. Gullory was injured on the play and never returned to the game.

Four plays later Bailey sneaked into the end zone from the one.

From to the half Houston got the ball three times and scored three times.

The third quarter was the same story,

as Houston got the ball five times and scored four. Only one Cougar drive was stopped, this when Gordon DeWard recovered a Houston fumble.

Idaho had one chance to score in the second half when Joe Tasy recovered a Cougar fumble on the 19. Mitch Lansdell threw a six yard pass to Dwight Bennett, but then lost six yards, threw an incomplete pass and fumbled.

The Vandal defense stiffened in the fourth quarter, holding the Cougars to one touchdown. The defensive effort coupled with several penalties stopped the Cougar drive and kept them from breaking the record.

Coach Y C McNease said of the game, "They were a good club. No, a great club tonight. I can't get upset about the loss to such a fine club."

Coach McNease is already looking ahead to spring football and next year's opening game with Northern Illinois.

Parachute club meets

Parachute Club's business meeting and make-up lesson will be held tomorrow night at 6:30 p.m. in the gym basement. Business should take roughly 30 minutes. Those who have any questions contact Mike Cimino, 8971.

CLASS C WINNER Jim Gray of Pullman wheels his Datsun 1600 around the Administration Building drive last Sunday in the University of Idaho Sports Car Club sponsored autocross. Gray won with a time of 1:11.9, four tenths of a second ahead of the next place car.

Jim Gray drives Datsun 1600 to win in campus Autocross

Jim Gray drove his C Class Datsun 1600 to first overall in an autocross sponsored by the University of Idaho sports car club Sunday afternoon with a time of 1:11.9, four tenths ahead of the next car.

The course, which was set up around the drive in front of the University's Administration building, was three tenths of a mile long and wet in spots from snow that fell Friday.

First in A class went to Richard McDonald, in a 427 Corvette who covered the course in 1:13.9 for his two timed runs and 1:11.5 in a third run to break a tie for the class lead.

Kent Curtis finished first in B class and Sam Bacharach in another Datsun was the top man in C Class after Gray was given the first overall award. Bacharach's time was second fastest for the day at 1:12.3.

Mike Williams took first in D Class in a Porsche and Charles Fletcher won E class in a Volvo sedan. Eldon Sorenson finished first in the modified class in a dune buggy powered by a Volkswagen engine.

Basketball seats on sale

Season tickets for the coming University of Idaho basketball season are on sale. Those who wish to purchase tickets may do so by contacting the Athletic Office at Memorial Gymnasium or by telephoning the Ticket Manager at the office.

Ron Stephenson, ticket manager, said that for the first time, a general admission reserved section will be offered for sale. This section will be located on the stage end of Memorial Gymnasium and will be reserved until 7:30 p.m. the night of the game.

Season tickets for the general admission reserved section will be \$25.00. Season tickets for the regular reserved seats will be \$30.00 for the 15 home games.

The Idaho Vandals will play their 15 home games in Memorial Gymnasium, starting at 8:05 p.m. each night. Preliminary games played by the frosh team will start at 5:50 p.m.

Scuba lecture given

A Scuba Diving lecture and discussion will be held in room 106 in the gym at 6:30 p.m. Thursday. The topics will include diving tables and various interests in the sport. For information contact Mr. Hall in the P. E. Department or Gary Stubblefield, 6443.

CBS student drama is Idaho's spring play

A member of the student generation will have a major dramatic entry on television the night of December 4.

The CBS Playhouse production of that night comes from the pen of Ron Cowen, 23, who's currently winding up work on his master's degree at the Annenberg School of the University of Pennsylvania.

Cowen first came under the critics' eyes when he wrote his first play, "Summertime" in 1967. The play, which was a hit when it opened in Connecticut, will be produced by Idaho drama this spring.

Directing the show which will play May 1-2-3 will be Forrest Sears of the drama dept.

The play deals with the Vietnam war, and will be produced here under the experimental theatre concept.

Till now, CBS Playhouse has presented only top TV dramatists, such as Reg-

nald Rose and JP Miller, but the network and sponsor, General Telephone & Electronics, have long wanted to find a new, young author for this series.

Cowen wrote "Summertime," during the 1966-67 academic year. After eight months of work, he'd sent the completed script to Jerome Lawrence, under whom he'd taken a playwrighting course at UCLA (Cowen had started college at Ohio State, transferred when his family moved from Cincinnati to Los Angeles).

Lawrence sent the script to the Eugene O'Neill Foundation in Connecticut, where it was given a try-out performance in the summer of 1967.

CBS producers saw it there, got in touch with Cowen, and asked him to write an original for CBS Playhouse.

He's the youngest dramatist ever commissioned by the network.

The play "Saturday Adoption," derives from Cowen's own experience. In the script, Rich, a college student, tutors a 14-year-old Negro boy, Macy. Soon he's sharing his dreams of future possibilities with the lad, to whom optimism is an oddity.

Cowen says he wishes the established generation would listen more to what the younger generation has to say and not cavil so much about hair length, dress, and other trivia. He likes TV as a vehicle of expression because it reaches people where they are (30-million of them watched "The People Next Door," the generation-conflict drama on the last CBS Playhouse).

How did he do it, getting his second script on TV's most august dramatic program even before he'd earned his master's?

"I was lucky," says Cowen.

Macklin to travel to Washington

The University of Idaho will be represented at the Forty-Fourth Annual Meeting of the National Association of Schools of Music by Hall M. Macklin, head of the Department of Music.

Some 350 member schools will be represented by the Deans of the Music Departments in most of our universities and colleges, and by the Administrative heads of conservatories.

The general sessions this year will be held at the Statler Hilton, Washington, D.C. on November 25, 26, and 27, in addition to being the official representative of the school Macklin is also a member of the State Certification & Legislation Committee. The University of Idaho has been a member of the NASM since 1956.

The NASM has been designated by the National Commission on Accrediting as the responsible agency for the accreditation of all music degree curricula with specialization in the fields of applied music, music theory, composition, music therapy, musicology, and music as a major in liberal arts programs. Its deliberations will play an important part in music education trends in this country during the coming years.

The Honorable Walter Washington, Mayor, will give the welcoming address.

Additional distinguished speakers will include: The Honorable Roger Stevens, National Foundation for the Arts and Humanities; Dr. Harold Arberg, Music Consultant to the U.S. Office of Education; Dr. Donald Schetter, of the Eastman School of Music; Dr. Paul Eichman, of the Eastman School of Music.

Officers are: President, Robert Hargreaves, Ball State University, Muncie, Ind.; First Vice-President, Warner Lawson, Howard University, Washington, D.C.; Second Vice-President, Lavahn Maesch, Lawrence College, Appleton, Wis.; Treasurer, Carl M. Neumeyer, Illinois Wesleyan University, Bloomington, Ill.; Secretary, Thomas W. Williams, Knox College, Galesburg, Ill.; Executive Secretary, David Ledet, Washington, D.C.

KUOI CELEBRATES—KUOI celebrated its 23rd birthday Sunday and an open house was held in honor of the station's birthday. Interested students were given a tour of the station and birthday cake was available for the occasion. KUOI also took the birthday opportunity to introduce its FM broadcasting to the University. Chuck Simmons, radio station manager, pictured above, cuts KUOI's birthday cake.

String quartet prepares for Washington concert

The Philadelphia String Quartet, artists in residence to the state universities and colleges of Washington, will present the season's second concert at WSU's Kimbrough Hall tonight at 8 p.m.

The program will begin with a new composition by the young Japanese composer, Toshiro Mayuzumi, entitled "Pieces for Prepared Piano and Strings." It involves the placing of nuts and bolts on piano strings for varied effects. Dr. Loran Olsen, associate professor of music, will play the piano part.

The program also includes Bela Bartok's "Third String Quartet (1927)" and the Smetana "Quartet in E Minor." The Bartok work, in one movement, was composed just before his first concert tour to America, and exemplifies the first use of many new devices. Smetana's work is subtitled "From My Life," deriving its formal structure from biographical events.

This Thursday two members of the quartet, Irwin Eisenberg, violinist, and Charles Brennard, cellist, will appear with the WSU Symphony Orchestra for a performance of the Brahms "Double Concerto."

Eisenberg and Brennard are well known to Northwest audiences for their performances with the quartet. The role of soloist with the orchestra will reveal another facet of their abilities. Both come from musical families and have had the instruction and environment and experience necessary for the development of a first rank artist.

Interview symposium to be conducted

In an effort to better prepare not only seniors, but all University of Idaho students for future job interviews, Alpha Kappa Psi, professional business fraternity, is sponsoring an "Interview Symposium" to be conducted by representatives from Boeing Company and Crown-Zellerbach at 7:30 p.m. tonight in the SUB.

The representatives will speak and answer questions on what they are looking for while conducting interviews. All interested people are urged to take advantage of this opportunity.

Veda Reynolds, violin, and Alan Iglyzin, viola, are the other two members of the quartet.

Tickets will be available at the WSU Bookstore and at the door.

Retired head dies

Henry F. Gauss, 83, retired head of mechanical engineering at the University of Idaho and member of an internationally-noted academic family, died in Gritman Hospital here Wednesday.

Gauss, who guided Idaho students for 30 years through the intricacies of heat power and internal combustion engines, retired in 1955. The citation upon his retirement read:

"As teacher, administrator, inventor, engineer and builder, his influence on students and colleagues has been great. The growth of the Mechanical Engineering Department and its importance today may largely be attributed to his unflinching efforts."

FTA members confer at Idaho

About 200 members of Future Teachers of America from northern Idaho high schools are expected at a conference to be held at the University of Idaho today, according to Joan Maltz, Wendell, president of the university chapter of the organization.

The keynote speaker will be Dr. Thomas O. Bell, assistant dean of the College of Education.

Worker burned

A Spokane steelworker foreman received second to third degree burns on his hands and face while on the University of Idaho campus Friday.

Don Heisteman of Eureka Construction Company was treated at Moscow Clinic, and taken to Sacred Heart Hospital in Spokane, but the attending physician said that the burns were not critical.

Heisteman was apparently building a fire at the construction site on the UI campus, and mistaking a can of gas for diesel, poured the gas on the fire, causing an explosion.

Work in Europe

American Student Information Service has arranged jobs, tours & studying in Europe for over a decade. Choose from thousands of good paying jobs in 15 countries, study at a famous university, take a Grand Tour, transatlantic transportation, travel independently. All permits, etc. arranged thru this low cost & recommended program. On the spot help from ASIS offices while in Europe. For educational fun-filled & profitable experience of a lifetime send \$2 for handbook (overseas handling, airmail reply & applications included) listing jobs, tours, study & crammed with other valuable info, to: Dept. M, ASIS, 22 ave. de la Liberté, Luxembourg City, Grand Duchy of Lux.

OPERA WORKSHOP—Directed by Charles Walton, part of the Opera Workshop crew rehearse for their performance in Recital Hall Thursday night at 8 p.m. Five different acts from five operas will be presented. Fourteen soloists will be participating in the Workshop with the Opera Workshop Chorus helping in the program.

KXLY to rebroadcast Marmes Man search

By special request, KXLY-TV is again televising a half hour special, "Search for the Marmes Man," tonight from 10 to 10:30 p.m. P.S.T.

Because of the great response by educators and because many students missed the original broadcast, the Hennessey Funeral Home is again making this program available as a special service to the community.

The Marmes Rock Shelter has become one of the world's most valuable archeological sites. The program is being presented so that students may share in the valuable historical discoveries being made in the Inland Empire.

Playtex invents the first-day tampon

(We took the inside out to show you how different it is.)

Outside: it's softer and silky (not cardboardy). Inside: it's so extra absorbent... it even protects on your first day. Your worst day!

In every lab test against the old cardboard kind... the Playtex tampon was always more absorbent. Actually 45% more absorbent on the average than the leading regular tampon.

Because it's different. Actually adjusts to you. It flowers out. Fluffs out. Designed to protect every inside inch of you. So the chance of a mishap is almost zero!

Try it fast. Why live in the past?
