Brian Lobdell photo

'Phantom of the Opera' tonight

Tonight, Friday the 13th, U-I students can see the classic silent horror movie, "Phantom of the Opera," with theater organ accompaniment.

The two showings, at 7 and 9 p.m. are being sponsored to provide funds for proper maintenance of the University's theater organ and to assist the Fund for the Performing Arts Center.

"Phantom of the Opera' is undoubtedly the best remembered horror picture of the twenties," wrote Deems Taylor in his book "Pictorial History of the Movies." "Few who have seen it can easily forget Lon Chaney's horrific makeup or the scene where the huge opera house chandelier comes crashing down on the heads of the audience."

Lew Wells, veteran organist from Bremerton, Wash., will be the featured artist at the two performances. He will present a short concert of music from the 20's at each performance and then play the accompaniment to the 65-minute

Wells has spent more than 40 years performing organ and has played accompaniment to silent films in theaters through ut the Northwest in addition to giving numerous special concerts and recitals.

The organ to be used for the performances is the theater organ given to the University in 1936 by Milburn Kenworthy, Moscow theater owner. The two performances will include the

rededication of the organ as the Milburn Kenworthy Organ.

Tickets are on sale at the SUB information desk, Carter's Drug, Roban's and Haddock and Laughlin's for \$1 per person. The auditorium holds 834 people so advance purchase of tickets is

The organ, now in the auditorium, was originally used in the Kenworthy Theater to provide music for silent movies and sing alongs during the 1920's. The organ, then valued at \$10,000, was given to the University in 1936 when "talkies" came to replace the old silent films.

For a few years after its donation to the University, the theater organ was the only organ used by the University's music department for student practice and

When the new music building was built a classical pipe organ in its recital hall became the preferred instrument for those uses and interest in the theater organ declined.

Restoration of the organ began last fall when Dr. Norman Kelley, Idaho graduate and member of the American Theatre Organ Society, came here from Ohio to do research on this organ for a magazine article. His article will appear in the April issue of "Theatre Organ," the bimonthly magazine of the organ society.

Most of the restoration has been possible because of the volunteer service by Paul Arndt, engineering student, who did much of the repair because of his interest in the organ.

Knecht: "stay in Big Sky, Play Boise State in '71"

By Brian Lobdell

The Idaho Argonaut

Volume 73, Number 36

Idaho Athletic Director Ed Knecht told ASUI Executive Board and approximately 30 observers Tuesday night that, "I hope within the next two weeks we can make a joint announcement with Boise State College for a 10-year football

Knecht spent an hour and half explaining the views of the Athletic Department and answering questions concerning Idaho football, the Big Sky Conference and the funding of athletics.

Knecht's appearance was at the request of E-Board which is considering a four-point proposal presented two weeks

ago by E-Board member Mike Mann. Mann's proposal calls for Idaho to drop out of the Big Sky conference, to play Boise State in 1970 as an 11th game, and for student athletic fees to be administered under student control within the athletic program.

"The idea for an 11th game in college football came about because of finances,' said Knecht. "Many colleges need money, and football is the big money-maker."

The Athletic Board of Control at Idaho decided not to play an 11th game, he explained, because the feasability couldn't be clearly worked out.

"We have lucrative contracts worked out already," he continued. "Wyoming approached us with a \$20,000 guarantee. But it would cost us \$12,000 in travel funds to take the team to Wyoming, and another \$4,000 or so to bring the team and coaches back to train a week early," he said.

Boise seeks contract "Boise State is most anxious to contract a game with us," Knecht commented. He explained that Boise is in the ackward position of growing too big for teams such as Whitworth, and said that these teams have "gotten off the schedule or

cancelled.' Knecht explained that several problems made the possible game feasibly questionable.

A fixed Big Sky Guarantee would give the university \$3,500 for a game in Boise, he remarked. This is all the university receives at any away conference game, but that it is also all we have to pay for

conference games here, he continued. When questioned about recent rumors, Knecht stated, "No offer has ever been made to have the U of I play a home game

In a bind

"And we're both in a bind, field-wise," he said. "We don't know how much WSU will allow us to use their field, and the new Boise stadium may not be ready if there's any delay in construction."

Knecht explained that the old "Bronco" stadium has been torn down, and that a game even a week early may not be

Aside from these problems, waiting a year will give the athletic department a chance to really calculate the 11th game theory, the athletic director continued.

When questioned on the second point, moving out of the Big Sky Conference, Knecht said he felt that "If we dropped the Big Sky we would be hard pressed to find games."

He presented figures from many of the western schools showing they are scheduled up to the 1980's. Negative replies

"Schools such as Washington want to play with schools that will draw a large gate," said Knecht, who emphasized his

point by reading several negative replies from schools who were contacted concerning possible games. "We will remain big name," Knecht remarked, "but until we can prove

ourselves, we will play schools which aren't way over our heads - teams that will play home and home games.'

Knecht pointed out that within the next few years the Vandals are scheduled for five and six home games.

Looking at other teams which have gone independent, Knecht said that Utah and Colorado are struggling and felt that "We may get in this trouble if we jump out of the Big Sky.'

Must build image "We must build our image in the Big Sky first," he continued, "gradually until we can present an image to these other schools.

One interested student attending asked Knecht how he intended to improve the

current system. "I think we can beef up our present program with some changes I'm not at liberty to say, right now, and lure better people here for our other sports such as

track and wrestling. In answer to another student's question, "How do you expect to build Idaho into a major college by staying in the Big Sky?' Knecht replied, "I'm not implying we can build Idaho into a major college power by staying in the Big Sky, but only that we can build and enhance our current program to a point at which we can begin

Over scholarship limit

to look elsewhere.'

When questioned as to whether Idaho was currently over the scholarship limit imposed by Big Sky regulations, Knecht stated that while the department is sometimes over the limit first semester. second semester is below the limit because of the number of students who leave for various reasons.

A question was also raised as to whether the athletic dormitory, Vandal Hall, was operating on a "better food budget at the expense of the students.'

Knecht stated that Vandall Hall has no different food or operations than any other dorm, with the exception of some pre-game dinners which are paid for separately by the Athletic Department.

February 13, 1970

Student control

Moving to the question of student control, ASUI president Jim Willms asked Knecht, "Since the students are putting \$88,000 in mandatory fees into the athletic department, don't you think that they should have the say for how it is used?"

Knecht answered that he felt the three students now on the Athletic Board of Control were being listened to and were doing a good job on the board.

"But was if those students wanted to allocate \$5,000 to fund the Rally squad and pom pon girls for next year," said Willms.

'How would the board vote in that case?" Stresses 'beefing up' Knecht said that we can do this, and

that the athletic department is willing to help these groups, but stressed "beefing up the program first." "By doing it now we would put a further crimp into what we already are trying to

do," he continued, "but we would be most willing to do this if we could get a little more income. Willms, Orwick, and several Board members were still debating the issue with Knecht, when it was moved to put

the entire proposal back into the Athletic Study Commission which was organized several weeks ago to study Mann's The motion carried, and the discussion

closed until further study and a report by

Petitions to lower voting age presented to Idaho legislature

Kristi Greenawalt, ASUI E-Board member presented the University of Idaho student petitions in favor of Idaho Legislature, last weekend.

Miss Greenawalt, who was in Boise for the Executive session of Idaho Student Government Association, ISGA, presented the petitions to Rep. Pat McDermott and Sen. Cecil Andrus, who came to speak to the group about lowering the voting age to 19.

"Senator Andrus told us that petitions and letters are the best way to get the voting age bill out of the House Ways and Means Committee," said Miss voting age to 19 is presently being held by that committee."

According to Miss Greenawalt, the petitions were to be presented to the Idaho Senate early this week. The Senate early in the session approved the lower voting age bill.

After presentation in the Senate, a page will probably deliver the petitions to Rep. McDermott in the House, so the Ways and Means Committee will have to recognize the fact that some Idaho students are interested in lowering the voting age, Miss Greenawalt said.

"We were the only school that presented petitions to the Legislature," she said. Andrus indicated that the position step on the part of the students

LEW WELLS, a veteran organist from Bremerton, Wash., will be the featured artist in two combined benefit concerts and showings of the silent film "Phantom of the Opera" in the University Auditorium at 7 and 9 p.m. tonight.

Changes in P. E. requirements approved by Faculty Council

Changes in the men's and women's P. E. requirements were approved in principal yesterday afternoon by Faculty Council. The Council also approved removing P. E. 101, Healthful Living as a general requirement for women students.

Specific catalog changes for the Faculty Council's action yesterday will soon be voted on by the General Faculty. The Council ruled that the effective date for these changes would be September 1, 1971, the date of the new catalog

The approved recommended change in the men's and women's P. E. requirement alters the existing program so all freshmen would be required two semesters of P. E. in their respective areas. These classes would meet on a

University curriculum committee were voted upon separately. Speaking for the curriculum committee was Robert Lottman, who told the Council that the results of a joint student faculty poll last spring favored a double rate of exposure for P. E. classes and that it only be required for two semesters.

Dr. Elmer Raunio asked the Council why P. E. should be required for even a year? P. E. Department Head, Dr. Leon Green answered the query by saying that it was through this P. E. requirement that most students became interested in various recreational skills, which they could apply to their life after college.

Dean Ernest Wohletz said that he felt P. E. was very directly related to mental alertness, and that the program ought to be continued on a four-semester basis.

"You're talking my language," said Dr. Green, "but the proposal is a compromise, which we will accept because we think that teaching it twice a week will allow us to do a better job."

Dr. Francis Seaman asked the Council if the change would require an increase in the P. E. faculty, but Dr. Green said that the existing staff could still handle the requirement program. Head of women's P. E. Miss Edith

Betts told the Council that her department was presently placing their emphasis on the use of physical education in life and the need to learn more about a girl's favorite area of recreation.

(Continued on Page 5

Athletic Director questioned on financial success of football

A question concerning the financial success of last year's football season became one of the debated issues Tuesday night when Athletic director Ed Knecht appeared before E-Board to discuss Athletic recommendations proposed by board member Mike Mann.

The question came as Knecht was querried on the disapproval of the Athletic Department concerning Mann's proposal to place student allocated funds under student control.

Student John Orwick asked Knecht, "Is it true that the Athletic Department did not make a profit last year on football, and in fact, lost \$150,000 on the football program as was suggested to me by Vice President Carter?

Loss termed 'little deficit' Knecht replied that "We did not lose \$150,000 last year, we had a little deficit,"

Orwick then asked Knecht if the football program hadn't lost the year before, and was told that "The department put \$80,000 into the general reserve during 1968.

Continuing with his questions, Orwick asked how the \$90,000 in student fees was allocated. Knecht told him that the fees go into the general athletic program. 'The money,'' he stated, "is used mostly for tuition fees and general outlay.' \$488,500 budget

When asked for specific figures, Knecht said that the total athletic budget is \$488,500 this year, and that of this approximately \$45,000 comes from the Alumni and \$88,000 from the students.

Asked what the gate receipts were for last year, Knecht said that the football program took in \$119,000.

Knecht, who had previously quoted the cost of the football program at \$295,000, was now asked by Orwick if the difference between the program cost and the gate receipts didn't equal an approxi-

mate \$175,000 loss. Stephenson interjects

Ron Stephenson, Assistant Athletic Director also in attendance, interjected here to answer Orwick.

"You can't figure it that way, because of the over-all general program," he said. "If your asking if the football program was cut out, would we have an extra \$175,000, the answer is no," said Stephenson.

Stephenson said he felt that athletics can't be considered on a strict, money basis, but that the educational and entertainment factors must be

considered. Knecht explains loss

Questioned yesterday, Knecht said that some of the reasons we lost money last year was because of the loss of Neile stadium, the few home games we had, and other expenses such as partial sponsorship of the buses used for the Pullman trips.

"The big reason we made \$80,000 in 1968 was because of the University of Washington game and a televised game,'

When Orwick was asked yesterday why he questioned the financial outcome of football, he made reference to Knecht's

(Continued on Page 5

2,000 SIGNATURES of Idaho students in favor of lowering the voting age in 19 were presented to members of the Idaho legislature by ASUI E-Beard member Kristi Greenawalt. Receiving the petitions from Kristi, left, is Rep. Pat McDermott and Senator Cecil Andrus. Both legislators spoke last weekend be the Executive Session of the Idaho Student Government Association.

What's the difference?

Pago said it. "We have met the enemy, and he is us."

That's what the increasing uproar over ecology is all about. The 70's decade has only just begun but its already apparent that man's understanding and control of his environment will be one of the biggest factors influencing policy and politics during the next few years.

The media daily expounds on issues concerning pollution, resources, pesticides, population and many others in the long list of environmental ingredients

The awareness to these problems is not new, of course,—arguements started even before the early sixties when Rachel Carson's book "The Silent Spring" brought cries of indignant alarm from the general populace.

But only in the last several years has this awareness expanded to its present level.

Our own area of the Northwest, "the land of the sky-blue waters", "big sky country" and wherever they say "its the water", is extremely involved in these problems which are only now being recognized.

It is appropriate then, that the institutions of higher learning within this area become actively involved in the study of these problems, and the results of the solutions.

Some of the various activities already underway include;

University of Montana:

A new class labled Ecology-Economics-Environment. . .drew 300 people at its first evening meeting. . . 100 turned away for lack of classroom space. . .a new section created to handle them.

A new club "The Environmentalist" has formed on campus. . .takes active part in various state issues.

Announcement given last week of a 14 week seminar on environmental science. . .started yesterday. . .various faculty and four state authorities to lecture.

Decided even Arizona has pollution problems. . .a seminar is being offered this semester.

Plans contine on the Idaho campus for the Borah Symposium on Ecology which will be held this spring in conjunction with parents week-

Authorities and guest speakers from many parts of the U.S. will contribute to the planned panels and lectures. Some of the people being contacted include:

On the home front, a proposal has been given to the administration which would create an "Institute of Human Ecology." According to Dr. Chapman in the Forestry Dept., the institute would center around graduate research and undergraduate education. However, no faculty is presently available for such an institute, and its exists only as a

But the Borah Symposium is months away, and the time to "get with it" is now! There are issues at the present time in Idaho such as the Wild Rivers controversy which won't wait for the symposium. So what can you do?

There's an organizational meeting for anyone interested in the environmental teach-in group. Wednesday Feb. 18. . .

If your not inclined to be an activist, but want to be informed, there are plenty of articles being published on all phases of environment and

The February 2 issue of "Time" magazine, for example, carries several good articles. . .The Argonaut will be featuring several columns and features on various phases within the structure of ecology. . .

All you have to do is look around. A broad spectrum of imputs and a good foundation of ideas is the start we need towards a correctly controlled environment.

"What's the difference if we don't wake up" is the theme for the Washington D. C. college editors convention this month. This theme is far to meaningful to limit to several thousand college editors. .

Think about tomorrow, . . BL

to student government for rewriting.

unreadable and incomprehensible.

to our Committee on Campus Affairs."

The death of the Student Bill of Rights

We took President Hartung at his word when he told us, in the Spring of 1966, that students would find the faculty quite responsive to the idea of a student bill of rights. "If you go through the proper channels," Hartung assured us, "the ? faculty will be sympathetic."

And now, four years later, the bill of rights has once more been emasculated, this time by Faculty Council. Finally, there are no more proper channels left for us to try.

In the Spring and Autumn of 1966, a carefully worded bill of rights was developed for this campus. In February, 1967, we tried our first Proper Channel, the newly created Faculty Council. The Council Chairman, Professor Thomas Walenta, refused even to submit the bill of rights to the Council for consideration. "Who are you?" Walenta demanded to know. "This campus has a student government. Get their approval and then come back.'

Ehrlich fathers awareness of environment, writes book concerning population control

This week I will talk about something dear to all of our hearts - children; to

have, or not to have. This subject, better known as population control, was recently discussed by Dr. Paul Ehrlich, head of Dept. of Biological Sciences at Stanford University, in his book "The Population Bomb." The statements he made shocked many people and fathered (pardon) much of the awareness of our environment in our nation today.

Dr. Ehrlich was on the "Tonight Show" Monday night and many of the following remarks are from his interview with Johnny Carson.

Today, disciplines are all very closely interrelated. Economics affects all forms of life in this country and sociology and physics, etc. all affect economics. In the post-war boom our nation has become so prosperous and technologically advanced that whatever we do affects the world.

\$500 billion increase Our projected increase in the GNP for the next decade is \$500 billion. But our quality of life has degenerated. Not only biologically, but morally and spiritually also (although church-going is highly fashionable). Some view this as enlightenment, but I submit that it is down right degredation.

Crime rates are high, but more people than ever go to church; pollution is out of control, and people are starving, but a padded pew is pleasant to snore in.

On top of it all sits the almighty dollar. Our society is so materialistic it smells. The more one gets, the more he wants. I am no different; I am not a saint. But I do want to do something about it.

What is the danger of a high consumer rate in our country? Our country has 6 per cent of the world's population, yet we use 30 per cent of the world's natural resources. We have 50 times the power consumption of India, even though their growth rate is higher. This means that every child born in the U.S. has 50 times the effect on the environment that a child in India has. Our population growth rate in America is about 1.5 per cent.

Population doubles This will double our present population in 65 years. Already we can't feed or clothe ourselves, and our cities are choked with traffic and smog 15 million people are malnourished in this country alone.

Population and people exist on an inverse relationship . . . one-half as many people cause two times as much

Yet in our capitalistic society consumption gets higher and higher, supposedly for the good of all. But is it? More and more energy to run our automated life is lost as heat, to the atmosphere, in our inefficient systems. At our present rate, this could raise the temperature of the atmosphere in our future. When then? The icecaps melt, and you had better have an Ark, baby!

It all comes back to population The more people, the more they consume: the more they consume, the more is produced; this uses resources, and our life-support systems degenerate.

Ronald Hicks

· We may be extinct

Like the ancient dinosaurs, we may already be past the point of no return. We may be extinct and don't know it. I don't mean to be sensational. This is straight. scary talk, brother.

The solution lies with you. Plan for no more than two children; if you truly love and want more children, love an adopted child. Watch our government; if Nixon doesn't face the problem squarely by 1972, dump him. We need leaders, not just another pretty face. This must be societies' business, or it (and we) will be out of business. Support legal abortion as a backup means to inefficient contraceptive measures, or side effects of the pill.

You control destiny

You have control over yours and your children's destiny for quality living or mere existence. The problem is being focused on in a nationwide environmental teach-in in April. On our campus an organizational meeting will be held Wednesday in the SUB. Its success depends on you and me. I will help rh

-Guest Column

Tom Loucks

Off campus housing project fails to progress

Once upon a time during the reign of Leroy over the kingdom of the ASUI, an involuntary corporation, the sum of \$300 was set aside for a project called Off-Campus Housing (OCH). Now the King's council, often called E-Board, instituted a committee to spend the money. The committee attempted to survey the offcampus residents of the kingdom, thus to set some regulations over the buildings in which the residents of the kingdom could seek shelter. Of course, it didn't work. In a matter of months OCH had blown \$190.

A new king, Craig the Kind, came to control the kingdom. He set off without a white charger to set things right throughout his domain. By chance he came upon OCH, or the tattered remnants thereof, for in truth it no longer existed. Craig the Kind puzzled publicly over the fate of OCH. With his urging, a group of off-campus subjects was persuaded to consider taking OCH as a club project. Off went the king to overcome technical difficulties for the project.

Difficulties solved And it came to pass that Loucks the Evaluator, a person of conservative leaning, rather given to thought, did spring forth from the club to solve technical difficulties between the club and the proposed OCH project. It came to pass that Craig the Kind and Loucks the Evaluator did solve the technicial difficulties. Thus was OCH proclaimed to be a major accomplishment of the King's council.

With much gnashing of teeth, OCH now brought forth a new survey form and had

it printed. The SUB, part of the king's castle, did make the stencil and provide the paper. Thus a bill for \$5 was sent to OCH. Now the procedure established for the paying of bills for OCH specified that the remaining \$110 of the first OCH would be available for OCH bills. Thus the king's money paid the king's castle's bill. However, the new survey form proved to be of no use. A new form was made, but not printed. At this time a new difficulty arose. The castle's phone system could not handle anymore phone traffic. Due to circumstances beyond its control, OCH was stalled for the rest of the kingdom's year. Loucks the Evaluator was no longer the chairman. Thusly did the OCH wither.

Willms reigns

Now the reign of Willms the Terrible had come over the kingdom. With it came fee increases and rumors of fee increases. Loucks the Evaluator did evaluate the kingdom and concluded that the kingdom was unnecessary. Nothing accrued to him for money extorted from him to pay for the kingdom's activities. Thus did he shake the dust from his feet on the corporation. He was much saddened by the kingdom and its king.

Willms the Terrible and his council had been informed by a verbal report of the change in chairmanship of OCH. This did not prevent the king from sending forth his garbage, foul letters and forms, to the Evaluator. On a recent occasion the Evaluator replied to the king in the King's own tongue. Thus came a wailing and a wagging of fingers in the kingdom's newspaper.

Newspaper errs

As the newspaper was given to errors much like those spoken of by Spiro the Hero of the People, it misinterpreted the message to the king. Cliff the Confused just the same as asked to be corrected. Thus it came about that Loucks the Evaluator did set out to set straight the record.

Some of the newspaper article needs an additional answer. The fee increases were from last spring, certainly unnecessary and came as a result of recommendations made to the Administration. Those who voted for the increases should have been the ones to pay for them, not the rest of the student body. As for the recent round of increases, Loucks the Evaluator has not finished his evaluation. There is reason to question why the fees were raised. Might not part of the reason to have raised them at this time been to blackmail the legislature for additional funds? Why the increase at Boise College? Is not someone out to increase fees for any reason and just happened to pick three areas and specify that they need more funds?

Other questions asked Other questions were raised. These are

not answered here for lack of space. Does the Argonaut want more? Has the point been made or does it need more development? One important thing was left out of the note to Willms, where to file

For what it's worth

(Letters to the editor)

Objects become masters, men become slaves

Editor, the Argonaut:

In answer to Frank Bogardus' letter of Feb. 10 in which he suggests that the peace movement lacks 'Spiritual Quality' (sic) because we object to being beaten up by cops: You say that "myth of a police riot was introduced and blown out of distortion (now there's a phrase with a ring to it) by the , liberal press.'

The "myth" of a police riot was introduced by the commission Lyndon Johnson appointed to investigate the Chicago disturbances. The fact that they chose not to whitewash the police probably indicates that no amount of whitewash could do the job.

Sentence quoted

One sentence of your letter is worth quoting in full: "The good decent 'Silent Majority' of the German People (sic) were not merely following a fanatic with fanatical ideas; rather they were overreacting to liberal ideas of government and politics expressed by Communist factions that were active in Germany at that time."

Historians will no doubt be forever indebted to you for explaining that the "good decent" Germans murdered six million Jews, ravaged Czechoslovakia, raped Poland, and started a world-wide conflagration because they were frightened by a few Communists. Some might suggest that this only shows that an unreasoning fear of communism leads "decent" people to commit unspeakable atrocities, but this is probably only a bleeding-heart liberal delusion.

You seem to be arguing that, if your silent majority decides to have me liquidated, this is forgivable since they were frightened of Communism. I find it difficult to accept that argument.

Your letter mentions that swastikawaving was unpopular in 1944 - too bad the same isn't true today.

IFrom Middle America

Students warned of danger

🗕 Frank Bogardus 🕂

With great community interest and often furor, the American voting public is faced with the dilema of whether to incorporate sex education into the public school system.

Without taking a stand, let's look at the proposed methods that could be used. First off I believe a few questions should be asked about sex education in general. Does a school system take a subject such as the relationships between man and woman, which are very deep and personal and try to teach of these relationships on a mass scale to a very

se se to

ey

are

ınt

re

file

ıka-

the one to decide what should be taught and what should not be taught? Romantic love

impressionable age group? If so who is

This leads one to the age-old myth of omantic love whereby some persons try o say that sex is love. In no way can this be considered valid, for there are very nany loving relationships that in no way are they even vaguely related to a sexual

In some very advanced and super elite school districts the act of sexual union is explained to children with the use of plastic animals in the mating position; purported to be valid is that present day young people are more mature and better able to comprehend what is going on. The fallacy behind this statement is simple; true, young people are exposed to more news media, more publications and magazines, and often times movies with an over-exploited sexual theme. But maturity per se is growth both emotional and physical, and this process, believe it or not, takes time and experience and

oftentimes victories and failures. To be honest one who knocks should offer an alternative; therefore I say that present day biology courses taught in high school which emphasize the organic origins of sex are adequate.

Parent's consent needed

in certain cases where consultation is available, it should be given only with parent's consent. In other areas such as low income families and minority groups, consultation can be made available

through the various welfare agencies. At this time and age of the soaring 70's there are still a few individuals who still like to shape their own and their family's destiny without the intervention of crusaders and the local school districts.

this puts the relationship of man and woman strictly on the animal basis without any consideration given to the deep interpersonal relationships between man and woman, and very little to basic moral precepts.

Adolescents and sex

Many pseudo-intellectuals and pseudopsychologists and often some professionals have contributed to the modern myth that young adolescents think about sexuality and sex all of the time. I am sorry to announce that the only persons thinking about sex all of the time are the bone heads that dream up these

Young adolescents are certainly aware of their sexuality and growing bodies to some extent, but they are more concerned with problems of dating, personal appearance, and the greater problem of becoming adults.

There are many broad-minded and quite liberal parents who still feel that a deeply human relationship such as sex, should still be the responsibility of the individual instead of the State.

George thanked

Editor, the Argonaut: A letter to "Crazy George" Dear George,

You can't imagine what a great impression one "Crazy George" has left upon the University of Idaho campus. Never before have the students realized what a big part they play in deeping up the player's morale and the spirit of the student body.

Everyone respected you and you will be a legend at the University of Idaho for years to come.

But most of all, you helped twelve people, the twelve Idaho Rally squad members, realize that they are important and can inspire school spirit among the students. This was important at the game last night when a crowd of 4,000 people watched Idaho lose by seven points and still vibrated the gym with noise. The people were behind us completely and supported the team like they never have before.

Thank you, George for everything you helped us achieve by your visit. We hope that someday you can come back and help us cheer again.

We are enclosing the article and pictures that were printed in our school paper, the Argonaut. Many thanks again.

port one's thesis in the paper;

we have created; from that moment to this we have needed to destroy this order and reorder socity. The need is more urgent now than it has ever been.

What golden calf could create the terror of a thermonuclear bomb, the failsafe bureaucracy, or even the exhaust pipe from an internal combusion engine? What pagan idol could better rob the people of their own creative power than a government which fights the rising cost of living by creating more unemployment, more poverty?

Government breaks law

If the promise of the Declaration of Independence is to be fulfilled, it is clear what we must do. "When government becomes the law breaker," Rap Brown once said, "the people must become the law enforcers." Obviously the government is not about to punish itself.

If, as Joe Allen argues, we are criminals who seek to enforce the law upon the government, then let us take pride in our criminality. Who else is going to stop incidents such as the torture of Lee Berry.

Lee Berry was hospitalized in March. 1969 as an in-patient at the Brooklyn VA hospital for treatment of an epileptic condition which resulted from wounds received in Vietnam. After three days of treatment, Berry was arrested in his bed and charged with conspiracy to bomb stores, police stations, railroad tracks and the flowers in the Bronx Botanical Berry jailed Gardens.

Berry was jailed in the Tombs in Manhattan. For three months he received no medical attention and slept on a bed without a mattress. Berry was held under maximum security, involving 24 hour lock up, isolation from other prisoners, limited visitation, no library or recreational privileges, and lights on in the cell 24 hours a day.

During Berry's fourth month in jail a court order was finally issued for him to receive medication. In the mean time he had suffered several seizures, two of them serious. Shortly after he began receiving medication., Berry was beaten by John Deislehurst (Badge No. 488), a "guard," and sustained a serious injury over his left eye. Instead of better medical care, Berry received five days of solitary confinement

Lapses into coma

After nine months of this kind of treatment, Berry was transferred to Bellevue Hospital prison ward because he had lapsed into a coma. Lee Berry is still in serious condition in the Intensive Car' Unit. Marva Berry was unable to find out why Lee's condition was steadily getting worse. After demonstrations were held at

Bellevue Hospital, doctors revealed that the had a blood clot which was spreading and apparently, it was caused by an injury." Apparently it was caused by John

Under \$100,000 bail

Lee Berry should not be in Bellevue. He should be somewhere where he could get the specialized care necessary for his recovery. One reason this hasn't happened is that Berry, like the other brothers and sisters of the Panther 21, is under \$100,000 bail.

This is an obvious case of a man being imprisoned illegally because of his political beliefs and because he is black. Jane Alpert and David Hughey, a white couple charged with bombings which actually did occur, have had their bails set at \$20,000 each.

If all of this was not clear enough, Lee Berry is never mentioned directly in the government's 30-count indictment. 20 bail hearings before 35 judges leave no doubt that the government plans to maintain order - silence the opposition - without letting the 5th, 5th, 8th, and 14th ammendments interfere with the 'officers in the performance of their

Need more crime

If it is criminal to go into the streets without a parade permit in hopes of saving Lee Berry's life, then we need more crime in the streets. If justice for Lee Berry, the Panther 21, hundreds of other political prisoners, and all the people threatens the order of the state. then I say with William Lloyd Garrison. . let the State perish.

If the Republic must be blotted out from the roll of nations, by proclaiming liberty to the captives, then let the Republic sink beneath the waves of oblivion and a shout of iov louder than the voice of many waters fill the universe at its extinction."

If the government cannot relate to community control of the community's destiny, to a meaningful education, to an end to mercenary wars, to an end to police brutality, to an end to the colonization of Blacks, Chicanos, and Indians, and to justice in the courts, the government should be abolished.

If capitalism cannot relate to full employment, to decent housing for all people, and to the primacy of people over things, then we no longer have any use for capitalism. Let it burn

If the needs of the ppeople demand the destruction of this order and make the gun and the fire bomb a necessity, then we should awaken all of humanity with our joyous proclamation, "let it burn. Let

-Mack Faith,

By Cathy Clemens

Picturing the end of the Russian feudal era and the very lives of the landholding aristocracy, is Cherry Orchard, the best known play by one of Russia's foremost authors, Anton Chekhov. The play, which examines both tragic and comic characters who are welded together by human emotions, will be presented by the A.S.U.I. Drama department at 8 p.m., March 13 and 14 in the University Auditorium.

Madame Ranevskaya, played by Elizabeth Watkin, is a high-living Russian aristocrat, a woman nieve about life and finances, and unaware that the landholders "Golden Age" is over.

She is forced to sell her villas and is left with nothing except her present country house and the famous cherry orchard; so famous, she states, that it is mentioned in the Encyclopedia. Her family, who are totally lacking in common sense of common living, are powerless to aid her

Her billiard playing, candy eating brother, Gaev, characterized by John Naples, who had been managing the estate in his sister's absence, suggest

Psychology professor will present lecture

Dr. William H. Bergquist, assistant professor of psychology, University of Idaho, will present the next lecture in the University's Faculty Forum series next Wednesday.

Bergquist's address, covering the uses and abuses of group discussion techniques, will be given at noon in the Faculty Club. In the talk, he will discuss how group

techniques can be used as a vehicle for education. He will also present a short demonstration of a "T-Group" situation.

The forum is open to the public without charge.

countless but improbable solutions, never quite grasping the gravity of the situation.

Madam's seventeen year old daughter Anya, played by Kristi Esvelt, abounds with ideals for the "new Russia", under the influence of Peter Tromimov, a perpetual student and nihilist, portraved by Jim Cash. Anya cannot help her mother because she cannot identify with either order, finding only turmoil.

Representing the old order before the emancipation is the aged reactionary, the footman, Tiers, played by Craig Scott. He longs for the days of plenty and of class stability and even supports Madame Ranevskaya as she blithly plans a ball for the following week, an absurd attempt to recreate a past age.

Lopahin, pertrayed by Bill Grubb, a

merchant of the rising and now dominant middle-class, remains the single person with the obvious solution. His father and grand-father were both serfs on the estate and by financial struggle and honest but unattained intellectual improvement rose to comfortable finances. Lopakin proposes selling the cherry orchard, now past bearing fruit. Because he is a peasant, his vision of the orchard is undistorted by aristocratic dreams and past fantacies. As his family had toiled to create capital from the land, he could easily envision the land becoming valuable property for villas and estates.

In The Cherry Orchard, chekhov yields play of deep meaning and understanding; a play of timeless reality indentifiable by all ages and eras.

Vocalists slate concert

The University of Idaho Vocal Quartet will present a concert of 19th century music Tuesday, Feb. 17.

The quartet, composed of Dorothy Barnes, Norman Logan and Charles Walton, of the Idaho School of Music faculty, and Joyce Mow, Moscow Junior High School teacher, will perform at 8 p.m. in the Music Recital Hall.

Featured in the concert will be a group of love songs by Schumann; a series of duets by Rossini, and two sets of quartets by Brahms.

"The love songs, duets and quartets which the group will sing are not often performed today because of their difficulty in ensemble, but are considered some of the most beautiful in vocal.

Recreation club will meet Tuesday, Feb. 17 at 7 p.m. in the Ee da Ha Room of the Student Union Building.

An Upward Bound film will

Charlotte Todd

Idaho graduate heads program in Bermuda,

Lt. (jg) Charlotte Todd, class of 1967, the Naval Station's first and only WAVE to be stationed in Bermuda, is in charge of the Navy Family Services program.

The Navy program is very similar to the Air Force's, and the Navy has taken over the Family Services' equipment left by the Air Force, according to the lieutenant.

Lieutenant Todd is the personnel officer at the Naval Station and is organizing the Navy Family Services program as an additional duty, until more Navy people arrive to take over the job.

She opens the Family Services' office on Mondays, Wednesdays and Fridays. Women volunteers run the office on those

Lieutenant Todd, who arrived in Bermuda in August, spends most of her working day at the Naval Station, but lives in the bachelor officers' quarters (BOQ) at Kindley.

She has beer in the service two years and was the operations administrative officer at Naval Air Station, Lemoore in central California before coming to Bermuda.

Lieutenant Todd, a well-seasoned traveler, enjoys traveling and one of the reasons she picked a Navy career was the travel opportunities it offered.

Her father, Harry E. Todd, Assistant Manager of the Student Union, who retired in 1963 as a major, was in the Army, and her childhood was spent in such places as Japan and Germany.

She graduated from the University of Idaho with a major in psychology.

During her last semester, she taught English in Moscow; then she decided to join the Navy. She took her officer training at Newport, R. I.

DEPARTMENT STORE - MOSCOW

Members of the Black Student Union at Eastern Washington State College picketed the office of Emerson Shuck, president, last week protesting that the administration is indifferent to their

The problem they referred to was the controversy leading to a court case which stems from a clause in the athletic code that prohibits the expounding of political, philosophical or religious ideas in the athletic arena.

The E.W.S.C. students who brought suit against the school charging that its athletic code violates their constitutional rights are Al Sims, Black Students Union president, J. Wayne Sepolen and Carl

Jones, a former member of the football team, was suspended from the team in September after he raised a clenched first during the playing of the National Anthem prior to a game.

Last week, President Shuck issued a statement saying that if the case were withdrawn from court, it "could once again become a matter to be handled by

our academic senate.' "I would expect that the athletic department could then initiate regular procedures to the academic senate which could respond to the spirit of the senate's previous consideration of the central matters," he said.

The faculty senate had earlier recommended that the disputed section of the code be eliminated.

The students announced later that they will make a motion to dismiss the suit and waive any claim against the school if the matter of the disputed section of the code can be resolved.

"The lawsuit will remain in suspension for a period of 30 days to give the president (of EWSC) and the board of trustees an opportunity to abolish this clause of the athletic code," said their attorney Carl Maxey.

He added that the students will accept nothing less than the rejection in its entirety of the paragraph which forbids the expounding of religious, political or philosophical views in the athletic arena and a statement from EWSC President Emerson Shuck that students' rights will not be interfered with and that black students will not suffer punishment for

exercising constitutional privileges. "After the conclusion of the 30-day period, if no resolution of this problem has been arrived at, the lawsuit will be reinstated and followed to its conclusion," said Maxey.

Al Sims, president of the Black Student Union and one of the original litigants, said they intend to continue to picket Shuck's office and "take the matter back in a peaceful way to the college.'

He added that the BSU has contacted the Rev. Ralph D. Abernathy, head of the Southern Christian Leadership Conference, and that he would probably make an appearance here. Sims said it was a matter of working out a date.

regular campus procedures. He asked that the students withdraw permanent legal action. Maxey stated he was amazed Shuck could ask that the suit be dismissed permanently and that the students

involved "rely solely for relief on the very people who adopted this code and refused to rescind it." Shuck was not in town Tuesday and

could not be reached for further

In a statement issued last week Shuck

said that if the suit were withdrawn from

federal court, it could be handled by

Grant R. Thomas, president of the EWSC Academic senate, said the academic senate's rules committee would meet Thursday to set a special meeting for Monday at 3:30 p.m. at which time the

matter of the code would be taken up. Earlier the academic senate voted that the entire code should be reviewed and the disputed paragraph should be abolished.

The students bringing suit — J. Wayne Sepolen, Carl Jones and Sims - claim the code violates their constitutional rights. Action was precipitated after Jones was suspended from the football team in September after raising a clenched fist during the playing of the national anthem prior to a game.

At a press conference Tuesday Maxey also gave the names of several other students who have desired to become plaintiffs in the suit. They are basketball players Joseph Bullock, Albert Gale, David Hayden and Swayne Barnett; track and field man Cleotis Ray; football players Arthur Sullivan, Melvin Collins, Donald Sims, Charles Bell, Donald Havis, Alfred Mackey and Edward Ray.

Maxey said their names will be added

When asked whether the action brought by the students would usurp the authority of the coaches, he said that the athletic department is only one adjunct of the total school picture and that when a student turns out for athletics he doesn't surrender his God-given constitutional

He said athletes are permitted to make religious gestures such as blessing

WSU totals record for spring enrollment

PULLMAN, — A total of 12,465 students were enrolled at the end of mass registration for the spring semester at Washington State University, Registrar Claude Simpson reported.

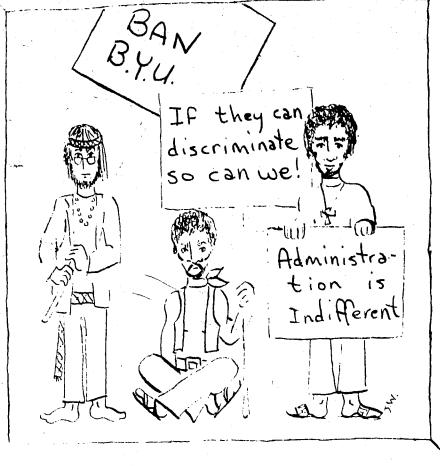

Simpson said the total is expected to increase to 12,700 at the end of the late registration period Friday. The final total would compare with the spring semester enrollment of 11,501 set last year, which had been a WSU record.

Registration for the fall semester was 13,150, also a new record. The decrease in enrollment for the spring semester is considered normal, Simpson said.

The total includes undergraduate, graduate and special students.

themselves or faiting to their knees and they do not give up their fundamental religious rights when they step into the athletic arena.

"These students will have to be accepted as black students with rights also or there will be no black athletes," he

Petition at U of W requests ban of athletic competition BYU

A petition at the University of Washington requesting a ban of further athletic competition with Mormonsupported Brigham Young University has gained the support of about 1,300 students

on the school's campus. The petition, started last week by Lynn Hall, a U of W black gymnast, claims the Mormon church (which supports BYU) discriminates against blacks, because according to Mormon doctrine — a black man cannot enter the priesthood.

The petition was to have been officially presented to the University officials earlier this week.

Several meetings on the matter have already taken place. Meetings have been held with Hall, the coaching staff, the Student-Athletic Advisory Committee and Mormon representatives. Officials of the University of

Washington have said they can't be "shotgunned" into a decision on the matter and that they will take plenty of

The school's next scheduled athletic competition with BYU - a wrestling match - will not take place until next

Earlier this year Washington competed with BYU in swimming and gymnastics. Before the gymnastics meet - which Washington won — about 20 blacks spread eggs, catsup, and salad oil on the gym mats and doused Gymnastics Coach Eric Hughes with water containing disin-

Hall said the petition and the demonstration were two different things, and had nothing in common. He also said the petition had no connection with seven whites, who identified themselves as Weathermen, that entered the office of the Editor of the University of Washington "Daily," Steve Weiner, and attacked him because of what they called a "racist" editorial. The editorial concerned Washington's relations with

According to Hall, the petition had gained the signatures of over 1,300 students in only 8 days of circulation.

The controversy centers around a Mormon doctrine that blacks cannot enter the priesthood, a group which most male Mormons enter as teenagers.

The controversy over athletic competition with BYU has come to attention at several western colleges. Blacks at Wyoming, San Jose State, and now the University of Washington, have started movements against athletic competition with BYU.

Total injuries Decline as **Skiers improve**

SUN VALLEY, IDAHO (AP) - A California doctor says the injury rate in skiing has dropped by about half since 1958. He attributes this to the fact that Americans are learning to ski better and there are more experienced skiers around

Dr. James Garrick, University of California at Davis, addressed the Northwest Medical Association at its annual meeting at Sun Valley.

He made a recent survey of 11 ski areas under a Public Health Service grant and found that in 1967, the injury rate had dropped to 2.4 per 1,000 skiers. In 1958, the rate was 4.28 per 1,000.

In 1958, just 59 per cent had been skiing more than two years but in 1967 the figure had climbed to 73 per cent.

Garrick reported that the injury rate drops steeply among skiers who have advanced from the snowplow turn to the stem christie. He also said the injury rate among women was almost four times as high as that for men. He attributed this to the possibility that women generally are not in as good physical condition as men.

He also said there is no evidence that release bindings are a factor in the decrease of injuries since they so often are improperly set or badly adjusted.

BYU, in the head of the controversies, last week enrolled its first black athlete in the history of the institution. Robert Knight, a black football player from Sand Springs, Okla. entered the school this

Saturn rings are ice

Reprinted from the Arizona Daily Wildcat

Researchers at the Lunar and Planetary Laboratory (LPL) have concluded that the rings of Saturn are ordinary water ice, but of an extraordinarily low temperature. "The conclusions are definite, although

there will be continuing observations which will give additional precision for our publication," Dr. Gerard P. Kuiper, LPL director, said.

A preliminary report made last November stated that the composition of the rings could be ammonia ice. Further laboratory comparisons of the spectrum of the rings with the spectra of ices of water, ammonia, methane and other compounds ruled out ammonia.

Discovery is detective story

Kuiper, who worked with Drs. Dale P. Cruikshank and Uwe Fink, both of the LPL, termed the discovery a laboratory "detective story brought about by the fact that the reflection spectrum of water ice changes with temperature.' While the water ice at familiar

temperatures does not represent the rings ... the overall ring spectrum is best represented by water ice at -190 degrees Centigrade (320 degrees below zero

Fahrenheit.)" Kuiper said. "The explanation of water ice is, of course, much more plausible than that of ammonia ice from the point of view of the

long-term survival of the ring particles in a vacuum," Kuiper added. It was noted that ammonia ice, even at -300 Fahrenheit, is rather volatile and would likely evaporate in a vacuum.

Kuiper said water ice in the same temperature range is very stable and would be subject to little or no evaporation. Team investigates

The team investigated the infrared

reflection spectrum of Saturn's rings with a powerful interferometer attached to the 61-inch NASA telescope at the LPL observatory in the Santa Catalina Mountains, north of Tucson. The findings were announced by Kuiper

last week at a meeting of the Planetary Sciences Division of the American Astronomical Society held in San Francisco. He said that four spectrum readings of the rings were taken - two in mid-November and two in mid-Decem-In making the announcement, Kuiper

noted the conclusions concerning the rings of Saturn confirmed findings published in 1952, based on low-dispersion spectra. The satellites of Saturn, which is second

only in size in our solar system to Jupiter and almost 900 million miles from the sun, are "almost certainly composed of water ice also," according to Kuiper.

Patterns wouldn't change with lowered voting age

Reprinted from the LEWISTON TRIBUNE.

by Bill Hall

Proposals to grant 19-year-olds the vote have progressed halfway through both the Washington and Idaho legislatures. The practical effect of these measures, if adopted, will be little if any change in the voting patterns of either state.

The 19-year-old vote, if it comes to pass, is likely to have far more influence on the young people who are permitted to vote than on the outcome of elections in which they participate. And it will be a constructive influence.

As a general rule, the more responsibility you give an individual of any age, the better he will perform. That is doubly true of the young who often strive more passionately for excellence.

The residents of states not much beyond their frontierhood should be familiar with the concept. Children who are given the work of men usually mature early and perform admirably. Young adults who are treated like children often behave like children.

Gov. Dan Evans is a prime sponsor of the Washington proposal, and State Sen. Cecil D. Andrus of Lewiston is spearheading the younger voting age in Idaho. Both are believers in the relative maturity today of 19 and 20-year-olds. As Andrus pointed out, most young people

have some or total self-reliance forced upon them after graduation from high school. Most are on their own, earning a living or going to college.

The benefits of a lower voting age are quite obvious, and the drawbacks are greatly exaggerated.

A major assumption by lower voting age is that 19-year-olds are more susceptible to the glamorous personality aspects of a campaign and less attentive to the more substantial factors, such as the issues and the relative intellectual depth of the candidates.

Presumably what critics of this law are saying is that strange developments might have resulted if 19-year-olds had always had the vote in America. For instance, with youngsters in the electorate the nation might have elected a heroic general with no prior governmental experience to the presidency. Or they might have elected someone president because of such flimsy credentials as being athletically handsome and colorfully Irish Catholic. Or the voters of California might have selected a movie star governor or senator. Or the Democratic voters of Idaho might have nominated a couple of candidates for governor because those candidates promised the state a pie-in-thesky gambling program. Or the voters of Idaho might have elected a governor on the simplistic and meaningless promise he would run the state like a business. Or they might have voted for an able U.S.

ownership of their guns even though that ownership wasn't threatened. Presumably all that could happen if 19year-olds are given the vote. The Probable Reality ality, the participation of younge

senator, not because he was able, but

because he promised to preserve the

voters is unlikely to make much difference on way or the other. For one thing, the participation among well-read young men and women will be much higher than among those who will never or have yet to gain an interest in politics and government. Only about half the eligible citizens of this country vote anyway, and those who don't are largely those who are most bored with the subject and thus frequently the most poorly informed. The same will be true of the young.

Those best prepared to cast an intelligent ballot will be the ones most likely to do so. Any presumption that they will be mostly Republican or liberal or radical or easily seduced by phonies is groundless. As a matter of fact, they are likely to

follow very closely the mixed voting pattern of their elders. School straw polls in Idaho are often extremely accurate indicators of what the electorate is going ly because so many young people inherit their political views from their parents and partly because they are human. The flamboyant style or the gut issue that catches the fancy of the older voters will probably have just about the same effect on younger voters. Moreover, the 19-yearold boy who admires a tough talking Wallace and the 19-year-old girl who is ecstatic over the good looks of a Kennedy will probably react in about the same way when they are twice that age.

If granting 19-year-olds the vote has any perceptible influence, it might be to stimulate some extra effort on their part to live up to the faith that has been placed

landals move into Montana to battle Bobcats and Grizzlies

By Mark Cooper

he Idaho Vandals now must look to a d trip into Montana in order to get k on the winning track. The Idaho ad have played four good games in a but have only managed to win one of

The Vandals first meet the Montana ite Bobcats in Bozeman for a pair of mes on Friday and Saturday and then move on to Missoula to face the izzlies of Montana.

The Vandals who certainly didn't have uch luck at home, are hoping a little comes their way on the road. Breaks have been few and far between this year for the Vandals, and a team usually expects to smiled on by 'lady luck' when they ay at home. Anyone who witnessed londay nights game against Weber knows well that no breaks fell for the Vandals during that game. A big and rough Weber team were whistled for only nine fouls during the whole game, while the Vandals were called for 16 fouls and many turnovers.

According to the statistics the Vandals have been improving at a very good rate in both Offensive and Deffensive categories. The Vandals have moved their shooting percentages up and now are shooting at a 40 per cent clip from the field and are averaging 69.5 points a game. Defensively the Vandals have been playing much tougher and have lowered their opponents score from 80 points a game down to 76.5.

The Vandals and Montana State are now tied for last place in the conference and both teams have been improving rather

108-263-41 68-164-.41 59-108-.55 51-126-.41 rapidly. Coach Anderson knows that his squad must play a very fine ball game to come up with the two victories needed to carry them out of the cellar.

The University of Montana Grizzlies have as much talent as any team in the league, but they haven't jelled in most of their games. It is always easy to get up for a Big Sky game and the rugged Montana crew will be very tough to beat on their home floor.

The Vandals seemed to gain in confidence during their recent home stint, and the main reason is probably the fact that they found out they have many fans behind them. It was very obvious that the Idaho players were spurred on by the home crowd and they may gave learned they have the talent to play with anybody in the Big Sky.

Malcolm Taylor came out of his scoring famine and put on a tremendous display of talents during the last two games. His play earned him the Big Sky's Player of the Week award, and if he can continue to go to the basket, the Vandals will be tough to stop the remainder of the year.

The big question mark for the Vandals seems to be Adrian Prince. He has seemed to play in spurts this year and during the Weber game he played the game of his career. It has been said that his capabilities are limited, but this was the one where his talents were really first seen. When he wanted to score he seemed almost unstopable and he also aided in slowing down Willie Sourjouner. If the Vandals could get a performance like this from Prince every game they could win their remaining nine games.

Taylor named Big Sky player of the week

PULLMAN, Wash. (AP) — University of Idaho Junior forward Malcolm Taylor led his Vandal basketball team to an 80-68 victory over cross-state rival Idaho State last Saturday, scoring 25 points in the

For that performance Taylor was chosen the Big Sky Conference Player of the Week Tuesday.

Taylor also hauled down 15 rebounds in the game, which was Idaho's first league victory of the year.

For the two-game weekend, Taylor hit 17 of 30 attempts from the field and two of six from the free-throw line for a total of 36 points. He also collected 23 rebounds during the same stretch.

Although small for the forward position at 6-foor-2, the Dayton, Ohio native has been a mainstay of the team all year.

8 games in Big Sky

Eight games will be featured in the Big Sky Conference basketball action this weekend. Idaho, Montana, Montana State, and Gonzaga will play three games, while Idaho State and Weber State are slated for two.

The Gonzaga Bulldogs are the hottest team in the Big Sky Conference after startling upsets over Weber State and Idaho State. Gonzaga will host Montana State on Friday and Saturday night, and the University of Montana on Monday night.

Montana heads for the Kennedy Pavilion on Friday night. Their front line will be led by Willie Flowers, while the backcourt will depend on Dave Gustafson, who has already been the Big Sky Player of the week once this year.

The Montana State Bobcats have not done as well as they would have liked to this year, but their two close games with Weber State certainly makes the Bobcats a threat to the outcome of the Big Sky

Idaho State and Weber State will meet on Weber's home courts for a two game series. The ISU Bengals could move into a tie for first place in the Big Sky Conference with two victories.

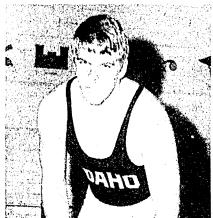

The Bengals are off from a two game losing streak handed to them by the University of Idaho, and Gonzaga, Idaho State does not have the momentum they had hoped for at this point of the season. but with the high stakes, and the scoring of Willie Humes and O'Neil Simmons, ISU could be threats on the Weber State hardwood.

Weber state was upset at the Kennedy Pavilion last weekend, but they came back the next night to give Idaho a 67-60 defeat.

If Weber State is able to win two games against ISU, then the Big Sky Conference championship will probably go to the Wildrats for a second year in a row. If Weber State only wins one of the two games, the ISU will still be in the race.

S-portrait

By Chuck Malloy

Wrestling is a sport that receives little publicity. Because of this, many athletes associated with the sport are often

Bosma, who is from Seattle, started taking wrestling seriously when he was in the seventh grade. Classmates could not counter to his strength, as Bosma pinned

less than desirable wrestling season, he attended the Tall Timber Wrestling Camp. "The Tall Timber camp," as Bosma explained, "improved me very much, and there were instructors from

ignored. In order for a wrestler to receive publicity, he must be outstanding, and Larry Bosma, Idaho's 6-6, 255 pound freshman heavyweight, he has been just

everybody he wrestled that year in 30 seconds or under. High school wrestling found the not an instant success. As a sophomore, he was only 4-12. After that somewhat

Japan and Oklahoma who were excellent wrestlers.'

After the wrestling camp, Bosma started showing noticeable improvement. After a mekiocore 9-9 record in his junior year, Bosma wrestled to a 17-4 mark in his senior year, and placed third in the state tournament that same year.

Since coming to Idaho, Bosma has defeated heavyweights from Idaho State. Eastern Washington State (twice), Calgary, Eastern Oregon, and Boise State. He has also won on three forfeits for a total record of 9-0.

Talking about Bosma, Idaho's wrestling coach Mike Standley said, "I feel Larry is a fine wrestler, and he also has a fine chance to win the Big Sky Conference wrestling tournament. Larry has excellent speed and agility for a man of

In addition to being a top-notch wrestler, Bosma is also a highly regarded offensive tackle prospect in football. During the football season, his weight is near 275 pounds. His natural physical strength combined with his weight puts Bosma high on the list in the plans of the football program. YC McNease, Idaho's head football coach said, "We feel Larry is a fine potential athlete in both wrestling and football. One thing we can't afford to do is bring him along too far too fast, but we believe he will eventually be a fine

Great things cannot be expected from a freshman athlete, but Larry Bosma has gone far beyond expectations. By the time he is a senior, Bosma could very well be one of the better athletes to come out of the University of Idaho.

football player.

Vandal wrestlers host in tri-dual

Thanks! Never was the roar of the crowd so great or so

You were out of sight! With your continued help and

The Idaho Vandals wrestling team will join Washington State and the Montana State Bobcats and the University of Oregon Ducks in a tri-dual meet this

enthusiasm we will win!

The Vandals, 4-3 in dual meets so far this season, will meet Montana State in Memorial Gym on Friday at 7 p.m. This will be the first meeting this season between the two Big Sky opponents. The Vandals will be looking for their fourth win in a row after downing Gonzaga, University of Calgary and Eastern Washington in their past three outings. Vandal heavyweight, Larry Bosma, 255pounds and 6 foot 6 inches, will be looking for his 10th straight victory in his division. Bosma, freshman from Seattle, has won

six matches in competition and has been awarded three by forfeit.

The Vandal Basketball Team

Vic Stone, at 118 pounds, has one of the Vandals' best records with a 4-2 dual meet record and Hank Boomer, at 177 pounds, has a 5-2 mark in dual meet competition and has pinned his last three opponents. Randy Peterson at 190 pounds, has a fine 5-1 mark, which includes two pins.

On Saturday, the Vandals will meet the Oregon Ducks at Memorial Gym in a 1 p.m. match and will then tangle with the WSU Cougars at 3:30 p.m. in a match at

The final dual meet will be with Gonzaga at Spokane on Monday, February 16th, with the Big Sky championships slated for Bozeman, Mont. on February 27th.

The Hell divers will put together workshops at the living groups in effort to get people interested in the program. Photo by Erich Korte

"HERE THEY COME, pouring out of the blue. Little arrow for me and for you. . ." Idaho's Dan Cupid practices up for tomorrow night. Valentine's Day is traditionally the day for 'Lovers.' Photo by Cliff Eidemiller

Cupid prepares for Valentine strike

By Mike Kirk

"Do people have a tendency to dump on you? Does your group have more cavities than theirs? Do all the hippies seem to get the jump on you? Do you sleep alone when others sleep in pairs?

Don't sorry about it. Tomorrow, if you play your cards right, you can end your daily strife, and at a reasonable price.

Valentines Day is just around the corner. The traditional day when Dan Cupid gets it all together, neutralizing the brains of the young and young at

In an independent survey taken of students it was discovered that while the University plans no formal celebration, several individuals and groups will commemorate the annual birthday of St. Valentine in traditional, as well as, unconventional ways — All in hope of being on the recieving end of one of those elusive Cupidian arrows.

"I'm not expecting too much to happen this year," said one coed, "people just aren't sentimental anymore." After a little prodding she confided, "I did buy one of those funny cards for my boyfriend, he probably won't give me anytning, but I

just thought it might be funny."

Apparently a lot of people are buying cards for others. Of the total output of the American greeting card industry (estimated at roughly five billion cards annually) 8 per cent are valentines.

"I was thinking about flowers, but they're pretty expensive, so I think we'll

will call us," Mr. Kirkland said.

"We hope any student who needs advice

just go have a couple of beers and then study chemistry," was the reply of one hurried male. When asked if he thought his fiance would remember, he said, "I think so, girls like that kind of stuff."

Several of the students questioned said that they planned to go to parties on Saturday night. These parties will range from two and three couples to massive affairs equipped right down to the heart shaped decorations.

"I don't know if it's going to have anything to do with Valentines Day or not, we usually don't need an excuse, but it's not a bad idea," was the answer of one of the potential party goers, who faintly resembled Dan Cupid himself.

Another survey revealed the places to stay away from on Valentines day if you don't want to get caught by Cupid's arrows. The list, in order of "places most likely to get stung" are:

Idaho student **Jonnie Griffith** dies of injuries

University of Idaho student, Jonnie C. Griffith, 26, Syringa Trailer Court, died at St. Lukes Hospital in Spokane of injuries he received Feb. 5 in a headon collision on the Pullman Highway 2 miles west of the

Griffith was born Feb. 24, 1943. He lived in Bayview, Idaho before moving to Moscow. He is survived by his wife Sandra and his mother, Mrs. Phillip

After the mishap Griffith was taken to Pullman Memorial Hospital and later transferred to Spokane. On Feb. 6 he was listed in 'satisfactory' condition with two broken legs, a broken arm, and a broken nose. Hospital officials said an autopsy

Also injured in the accident was Mrs.

that Peyton and Mrs. Walls were wearing safety belts at the time of the accident.

Four seminars offered; sign-ups wanted today

'Today is the day we would like to have sign-ups completed for the non-credit. seminars," according to Edward Weiskotten of the Campus Christian Center staff. "The seminars will all hold their initial sessions this coming week, and we would like to have some idea beforehand of how many to expect at each one. Persons who have not signed up beforehand will still be welcome in the seminars, but a sign-up gives us some advance information.

'There are sheets for registration in the SUB at the information desk, on the first-floor bulletin board at Theophilus Tower, at the St. Augustine Center, and the Campus Christian Center," Mr. Weiskotten continued.

The four seminars will deal with some of the major concerns of the day. "The Search for Personal Identity" will be a study of man's search for meaning in contemporary society. It will meet next Monday at 7:30 p.m. in the St. Augustine's Center, with Sister Joan Margaret acting as coordinator.

"Alienation and Ideology" will provide an opportunity to listen to and discuss contemporary music and lyrics as a basis for analyzing today's culture. It will meet Monday at 4:10 p.m. in The Burning Stake Coffeehouse. Dr. Stan Thomas will be the coordinator.

'Black Theology and Black Power," with Bill Davis and Ed Weiskotten as coordinators, will explore the development of a black perspective within Christianity which relates to the black freedom movement. This seminar will meet the first time on Tuesday, Feb. 17, at 7 p.m. in The Burning State Coffeehouse

The Fourth seminar will be "Violence in America," a study of the Report of the Presidential Commission on the Causes and Prevention of Violence in America. It will meet on Wednesday, Feb. 18, at 7 p.m. in The Burning Stake Coffeehouse,

seminars are only for the first session.

Each group will be given the chance to choose its own time and place of meeting

for the convenience of all. "It is anticipated that each seminar will meet from six to eight weeks, but again, the number and duration of sessions will be left to each group," Mr. Weiskotten said.

U of I slates jazz festival for March

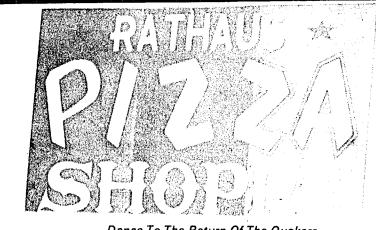

The University of Idaho's Jazz Festival has been set for Saturday, March 14. according to Robert Spevacek, instructor of music. The festival will include a concert by the UI jazz band in addition to the competition of the high school groups.

William Billingsley, professor of music. will be soloist with the University's group. During their portion of the Saturday night concert, the Jazz Lab Band will play arrangements by Stan Kenton and Buddy Rich. The band is directed by David Seiler.

Groups from approximately 15 high schools in Idaho, Washington, Oregon and Montana will be here to compete in the day-long contest for high school groups. In the first part of the evening performance, the top three groups from the day's judging will compete for first, second and

Most of the evening's entertainment will be by the University's band. This band received a standing ovation from the audience at last year's festival and recorded an album of the concert. The concert should last for about two hours.

DANCE, DANCE, to the music of the Bridge" Friday, Feb. 27 from 9 - 12 p.m. in the SUB Ballroom. This group is from Seattle and is being sponsored by the SUB Dance Committee. Admission is \$1 per couple and includes a light
