3 U of I law students attend national moot court competition

Three University of Idaho law students are among those attending the national Moot Court competition in New York City this week. The Moot Court is a mock court where law students argue hypothetical cases; in this instance, Samuel T. Gudgye, as next friend of John Gudgye vs. T.T. Notrub.

The three students are Pat Monaghan, Hy Forgeron and Ted Wood. They became eligible for the nationals by winning a regional competition held at the University of Oregon in mid-November

The regional and national competitions are similar. Each team must draw up a legal brief outlining their position for the defendant and their position for the plaintiff. This counts as one-third in the judging. Oral presentation counts twothirds. The Idaho team was judged as having the best of both at the regional

Professor of Law Robert L. Jones, Moot Court advisor is accompanying the students. According to Jones, this is the first time Idaho has won the regional and gone on to the national competition.

Competes against Drake

Idaho will be up against a team from the Drake University law school in the first round of competition. It is single elimination which means that if Drake wins, Idaho is not eligible for further competition. If Idaho wins the first round, the team may then come up against one of the 23 other teams. The others include teams from Columbia University, Northwestern, New York University and Ohio State.

Under Moot Court operations, one team member takes the side of the defendant,

one the side of the plaintiff, and one is prepared to serve as counsel to either side. Which position two team members will take during any one round is determined by a coin toss.

According to Monaghan, the basic issue in the Gudgve-Notrub trial is a conflict between the rights implied by the first amendment to the Constitution and the power of a court to compel testimony.

Case occurred

Monaghan said the (hypothetical) case occured when a reporter brought in as a witness in a libel suit refused to reveal his sources of information. The original case was Samuel T. Gydgye as next friend of John Gudgye vs. Muckraker Sophisti-The trial was being held in a District Court.

The reporter, T.T. Notrub, was charged with contempt of court. He took the charge to the Circuit Court of Appeals which denied his appeal to have the charge lifted. He then took his case to the Supreme Court decisions involving the students will present their arguments.

Interpretations of several recent Supreme Court decisions involfing freedom of the press and libel will be used by the Idaho team in pleading its cases, Monaghan said.

Funds for the trip came from the ASUI which granted the team \$900 for travel expenses; the American College of Trial Lawyers, sponsors of the U. of I. Moot Court; Bench and Bar, the local Law Students Association; and from private donations.

The national Moot Court competition is sponsored by the New York City Bar

find the best wording used to express

those thoughts and incorporate that into

"The Code of Conduct Committee

Argonaut Political Editor

A basis in civil law is the approach taken in the Code of Conduct being prepared for presentation to the Code of Conduct Committee of the Associated Students of the University of Idaho, according to John Orwick, ASUI Attorney-

Orwick, who since June has spent about 230 hours preparing the Code, said it will embody a civil law approach instead of a criminal law approach because the highly punitive concept of enforcement used in criminal law approaches would be

Codes of Conduct for other Universities, law reviews and other writings, besides existing U of I regulations have served as a basis for the Code, said Orwick. The Code is defined in the Student Statement as a codified document containing all disciplinary regulations of the University.

"The basis of the Code is to make the student pay for the damage," said Orwick. Punitive enforcement is not effective because, in many cases, it only makes the problem more evident.'

The value of a class period will be determined and any student disrupting a class period would have to pay for it, said

Expulsion not effective

He noted that expulsion from the University of students who are having a sit-in in the University President's office is not an effective control against that kind of activity because many of the students who sit-in have already made up their minds to accept that penalty.

Orwick also noted that the Code of Conduct would move away from the concept of parental authority.

"Many universities in the past used the concept of "in loco parentis"," said Orwick. "During the last 10 years the universities have moved away from that concept and taken up a concept based on criminal law. Ours is an attempt to move in a new direction."

Elimination of excessive and unnecessary duplication between state and federal law and University regulations is another goal of the code according to Orwick.

Authority limited Orwick said, in essence, this means the authority of the U of I will be limited to the instances when the University has a

clear, separate interest. Disciplinary regulations deal with penalties imposed for misconduct and include cheating and plagiarism, according to the Student Statement of

Disciplinary actions, except those necessary to terminate a violation may not be taken against a student until after he has been proved guilty at a fair and impartial hearing.

Research concerning a Code of Conduct for the University of Idaho had been going on for more than two years, according to

"During the last two years there have been two committees studying Codes of Conduct," said Orwick. "One was U of I General Faculty rules no classes during Symposium

Classes will be dismissed for the Borah Symposium this spring despite an emergency calendar recommendation that classes not be dismissed for the symposium. The General Faculty of the University yesterday approved the dismissal of classes after Borah Committee Chairman Dr. James Calvert told the assembly that the symposium has grown to be an essential part of the university's academic program.

"The symposium is an educational experience," said Dr. Calvert. "It allows the students and the faculty to examine closely the problems of war and peace and see how they relate to our life." Dr. Calvert said that this year's topic concems the role of opposing cultures in civilizations, and will be centered around cultural clashes within our own society.

"We hope to examine the reasons why people become polarized," said Dr. Calvert. He emphasized that the symposium is a real educational venture and that both students and faculty have much to gain from attending the sessions and talking with the authorities. Last year, he said that over 5,000 people attended the symposium sessions.

"Despite the fact that I feel students have much to gain from the symposium, I feel that I cannot dismiss my classes so these students can attend, unless the faculty approves the dismissal," said Dr. Carl Baumgardner.

The original proposal suggested that classes not be dismissed for the symposium, in an effort to make up for lost class days due to the shortening of second semester by one week.

The emergency calendar changes were necessary after the 1971 commencement was moved up a week so that it would not conflict with WSU's commencement which was scheduled for the same day, June 6.

According to the proposal approved by the General Faculty, commencement will be held on May 30, 1971 and second semester will be shortened by one week, from May 21 through May 28. Washington's Birthday, February 22, formerly a holiday, will now be a regular day of classes. Next semester's dead day. which would fall on May 20 will be eliminated for next semester only and regular classes will be held on that day.

Professor of physical education slates retirement after 29 years

Miss Mabel Locke, professor of physical education and former chairman of the Department of Women's Physical Education at the University of Idaho, will retire from the university effective June 30, 1971, after more than 29 years of service, it was announced Friday by President Ernest W. Hartung, following regents' approval.

"It is never easy to accept a termination of service from one who has served the university well, and this becomes doubly difficult when the period of service to be terminated has been long and faithful," Hartung said.

Active regionally and nationally in the field of physical education, Miss Locke has served as president of the 53,000-member American Association for Health, Physical Education and Recreation. In addition, whe was president of the AAHPER's Northwest District and National chairman of the group's divison for girls and women's

In 1958 and 1962 she received honor award citations from the AAHPER in recognition of her leadership services to the physical education profession. The Idaho Association for Health, Physical Education and Recreation presented her with a distinguished service award for 1968-69.

Miss Locke has also served on former President Eisenhower's Citizens

Advisory Committee on the fitness of American Youth.

> Before coming to the University in 1947 as associate professor and chairman of women's physical education, Miss Locke was an assistant professor of physical education at the University of Chicago from 1944-47.

She received her bachelor of science degree in 1929 from Northwestern University and her master of science degree from the University of Wisconsin in 1936. She also received a physical therapy certificate in 1943 from Northwestern University Medical School.

Season's Greetings.

Merry Christmas from the Argonaut staff

Nightline service functions

About 115 calls have been received and processed by Nightline, the area's telephone service for those with a rumer, those facing a crisis, and those in need of information.

Mrs. Corlann (Corky) Bush, the program's coordinator, said she is very pleased with the response Nightline has

She is especially pleased with the dedication shown by the volunteers who man the telephones each night, she said. More calls

"We have received more calls than we , expected. Nightline has shown itself to be a necessary service. I feel Nightline personnel have been doing a good job. We have helped fill a great need."

According to Rich Slothower, program secretary, about one-half of the calls received have been from people facing a crisis. Most are from people who feel depressed or just want someone to talk to. The rest of the calls have been divided rather evenly between rumor calls and

information calls. 90 volunteers

Slothower said Nightline has about 90 volunteers, and will take more. About 60 per cent of the volunteers are people from the University community. Slothower said they would particularly like to have more volunteer townspeople. A training session will be held in January for new

Nightline's present hours are 8:30 to 4 a.m. According to Slothower, they are considering having Nightline open for 12 hours beginning at 4 p.m. Nightline's number is 882-0320.

Many referred

Many Nightline calls are referred to "back-up" people who are professionals or semi-professionals, either doctors, lawyers, clergymen, or others qualified in some way to give advice. Nightline volunteers who answer the phones do not give advice.

Besides giving help to those with personal problems, Nightline has given information on such subjects as public welfare programs and pre-holiday class cancellations. Nightline has received and checked our rumors dealing with drug raids and hiring and firing of faculty and administrative personnel.

Board of directors

Mrs. Bush said a board of directors for Nightline is in the process of being formed. It will be responsible for setting policies, establishing guidelines, and controlling funds.

Nightline, Mrs. Bush said, receives all its funds from private donations. The Mental Health Association has assisted them with a contribution of \$225.

Besides funds, Nightline needs a used typewriter, book cases and books. They could also use a good radio and refreshments for volunteers, Mrs. Bush

She said they woulld appreciate receiving information about community services and organizations to which they

Dr. Hosack plans to teach full-time

Dr. Robert E. Hosack will return to fulltime teaching next year, President Ernest W. Hartung announced Friday.

Dr. Hosack, chairman of the Department of Political Science and Public Affairs Research, said he requested the change because he felt he could serve the University of Idaho more usefully by teaching.

The change, approved by the regents last week, will be effective Sept. 1, 1971.

Commenting on Dr. Hosack's many years of efforts in academic administration, President Hartung noted that instruction at all levels from freshmen through the doctorate has developed under Hosack's leadership.

The political science department recently passed unanimously a resolution in appreciation of Dr. Hosack's years of service as head of the Department of Social Sciences and Political Science,

Christmas and newspapers are healthy

The Christmas season is indeed an unusual time of the year when thoughts are reflected by everyone in a healthy, positive manner. It is a season of goodwill and cheer. . . a departure from the normal everyday drudgery which has enslaved men in the uptight generation.

Christmas is like a newspaper, it's a departure from normalcy, but a newspaper is also unlike Christmas, since it is the target of critics who feel it is a negative force in a positive society. The question, "Why not emphasize the good news for a change?" is resounded over and over. Gilbert Love of the Pittsburg Press recently answered this much asked question with this question, how would you, the average newspaper reader like to find these headlines in your morning paper?

"No Rioting by 7,000,000 College Students Today." "Most Nations At Peace This Week."

"Calm Maintained by 3,500,000,000 During Nixon Trip." "Americans Have Money Left After Taxes."

"Millions Love, Obey Parents."

"Most Mugs Go Unmugged."

"Takes 4,00,000,000 Miles to Kill an Airlines Passenger." "More Trips on DC-9 Than LSD."

"Fraternization Among Whites, Blacks Is Widespread." "Hippies are .00657* Per Cent of Population." (*Estimate) "Majority of High Schools Unscarred."

"Over 75,000,000 Workers Not On Strike."

"Safe Drivers Generally Survive." "Marriages 31/2 Times Divorces."

"Bible Still Best-Seller."

"Spring Always Follows Winter."

"Many Pittsburgh Streets Minus Potholes."

"It's A New Year For Pirates, Steelers." "Hope Springs Eternal For Pittsburgh Republicans."

Mr. Love's headlines point out clearly that newspapers are oriented, toward the unusual, the departure from normalcy as well as the everyday good news. It is this departure from the tide of normal events that helps to put everything into its proper perspective. That's why Christmas is healthy and newspapers have their place in society. CJE

Amid notable debate in the ASUI Senate concerning fiscal integrity one notable appropriation needs to be noted. That is the appropriation of \$2,978 for furniture for the new **ASUI Senate Offices**

While other organizations have been forced to prove the value of appropriations to their organizations by demonstrating the public relations benefits that the extra appropriations will provide. The ASUI Senate appropriation does not require such proof of benefit. In fact, the only rationale stated for purchase of the furniture was that "We have a new office at the cost of \$13,000 and it must be furnished."

Numbers of people represented in the organization seeking the appropriation has been required by the Senate, yet no show of support was required by the Senate concerning this appropriation

Possible support could be given to the Senate because it is the elected representative body of the ASUI. However, if members believe themselves to be representatives of the ASUI then they have to assume the responsibility of asking the people they represent how they wish the money to be spent. Many living group presidents report they are not even informed of the business of the Senate let alone consulted concerning the opinions of the living group members.

As ASUI Senators Ron Ball and Tom Slayton have repeatedly told the other members of the Senate, the General Reserve of the ASUI is limited and is dwindling to the point where it is insufficient to cover emergencies. Furthermore, the dwindling funds limit the ASUI's ability to take advantage of beneficial programs requiring additional funds in the middle of the school year.

An example of an organization which may seek additional funds is the Issues and Forums committee. Issues and Forums was allocated \$1,200 at the beginning of the school

year. With this money they have, to date, presented a debate between Idaho State Attorney General Robert Robson and ASUI Attorney General John Orwick about student rights and student unrest, a forum on abortion and a poetry reading by a nationally known pet.

Attendance totals for the three events have exceeded 1,000 people. The total expenditure for the three events was less than \$400.

Chairman of Issues and Forums committee, Rhonda Brammer, plans a program for second semester of this year which will include forums about the military draft, the outlook of minority groups in the United States, women's liberation and the failure of the United States' judicial

At present Miss Brammer is attempting to bring to campus such people as Senator George McGovern (D-SD), the Rev. Ralph Abernathy, head of the NAACP, Benjamin Spock, and Willim Kunstler.

She estimates bringing all of these people or others of similar stature to the U of I campus would require about \$7,500. A lesser sum would bring some of them to the

When considered in comparison with the goals of the Issues and Forums committee's plan and support among the University community, the need of the ASUI Senate for desks seems a bit ridiculous.

Using less than \$400 Issues and Forums reached more than 1,000 members of the University community. With the \$3,000 the Senate spent for desks to fill its \$13,000 office. Issues and Forums might be able to reach the rest of the people on campus.

How many people will be affected by desks for the Senate? bf

GARBAGE, GARBAGE — The University of Idaho could be used as a bad example in an anti-litter campaign. Pictured above are just two places where the garbage

cans have been over-filled, over-flowed and created an ugly mess.

Reader's response

Writers comment on Y.A.F., unrest

Editor, the Argonaut:

In a sincere effort to be true to myself, I felt that the posters skillfully and artfully placed across campus should be at least answered, there being no point for them. I'm speaking of a lovely orange and blue declamation by a group called Y.A.F. The poster asks, "Is YAF contagious?" "Yes,,' it goes on to say, and some "65 U.S. Congressmen agree."

To this I have to say that I agree, YAF is definitely a contagion along with staph and venereal infection, and that shows you where Congress is at.

YAF is definitely on the spread, and true to most epidemics, can be controlled with soap and water, or possibly a shot of anti-biotic. However, if you feel that you want to join the deluge of McCarthyism and other diseases of the cognitive process, go ahead and join up.

YAF is the kind of organization that can ferret out a communist at a saint's convention. The qualifications for membership are stupidity, paranoia, and acute hindsight. If you have these and other negative traits, go ahead and sign up. It serves you right.

George Driskell 1113 Deakin

that will be beneficial to the world and its population.

Story wording 'deplorable'

Editor, the Argonaut:

In the December 8 issue of the Argonaut, the story on page 4 about Professor Roy Bell was worded in what seems to me to be a most unfortunate

Specifically, the use of the words 'nervous troubles" was deplorable, even though they may have been used by Professor Bell's son. The phrase is so vague as to be meaningless, and, what is worse, is subject to interpretations which can be very damaging to Professor Bell's

I am registering this objection with you now in hope that before any future report of the illness or hospitalization of an individual is printed, careful consideration will be given to the propriety and appropriateness of the wording of the story.

Warren S. Owens Dean of Instructional Services and Director of Libraries

Letters to the editor must be submitted by Sunday for publication Tuesday and by Wednesday for publication Friday. All letters must be typed. Due to space limitations, short letters will be given space preference. Letters should be limited to 250 words (one double spaced typed page).

All letters must be signed and the author's name and address must be attached. The author's name will be withheld from publication upon request.

The Argonaut reserves the right to edit all letters in order to comply to corresponding laws, space limitations and Argonaut style.

The Idaho Argonaut will not be published again until after Christmas vacation. First issue of next year will be Jan. 5.

A matter of priorities

The Senate decided to trim \$150 million for water and sewage facilities from an appropriations bill Monday. It declined to trim \$110 million from the same bill to begin work on a space shuttle.

One of the arguments for the space funds was that the aerospace industry needs the money to provide employment to people it now employs.

Did it occur to the Senate that people are also employed in doing such things as building sewage facilities?

The space shuttle is an interesting project. It would be used to carry men and hardware from the earth's surface to orbiting space stations at less cost than with separate launch

But the task of treating the nation's sewage is more important right now. Not nearly so glamorous or exciting, but more important.

While Congressmen worry about aerospace unemployment, a tremendous opportunity to put more people to work exists in attending to the urgent business of cleaning up the

Some of the technical and scientific talent in the aerospace field ought to be working on these problems.

The national shopping list is too long, in relation to the available funds. Congress ought to forego some items on that list in favor of others which are more important.

If the basic problem is providing jobs for people in aerospace industries, then give the same firms contracts to work on environmental improvement.

The nation needs a technology for the recycling of solid waste more than it needs a space shuttle. It needs technology that can help clean up the air more than it needs a space shuttle. It needs technology to clean up the water more than it needs a space shuttle.

Is Congress powerless to make such judgments? Does the space program exist to serve the country, or does it exist to provide jobs in aerospace in California?

The nation has been moving far faster to put men and hardware into space than to clean up its portion of the earth, or to deal with other basic needs.

plane departs.

Campus violence concern

Editor, the Argonaut: An open letter to the student body and

The Tauran Society of Southern State College is aware of the problems facing the college population in the 1970-71 and following scholastic years. We request those attending higher learning institutions to participate in what our club considers a worthy cause.

The colleges and universities have witnessed and participated in many violent, destructive demonstrations. Students have been killed in Kent, Ohio, Jackson, Miss., and Berkley, Calif. Many students viewed these situations with different feelings of sadness, concern, displeasure, and destructive protests.

The Tauran Society asks each constituent to make a concentrated effort to disprove any remarks the news media, press, and individuals have made predicting increased campus destruction

Our club suggests colleges take the initiative in circulating our cause. We ask that two copies of this letter be sent to different colleges within your state dividing the state east-west or northsouth. Then request this college send the letter to one of the colleges in its section, adding the name of their institution at the bottom.

We hope what we accomplish will be right and beneficial to a worthy cause. May we always be guided in a manner

FRANKLY SPEAKING . . . by Phil Frank

Idaho professor speaks at WSU

Professor Robert McConnell, head of the department of art and architecture, has been invited to speak to the Washington State University chapter of the American Institute of Architects.

He will speak today on possible cooperative projects that the two schools of architecture can work on. It will be the first time a member of the art and architecture department at the University of Idaho has spoken to the WSU students.

Good and bad

Christmas meanings varied

By Janet Rugg **Managing Editor**

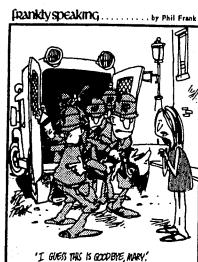

Christmas time, what does that mean? To the student at the University of Idaho it can create an entire procession of images, some good - and some not so

really going to pile it on the week before vacation. Christmas is repeating to yourself,

Christmas is knowing your teachers are

'Just one more week.

Christmas is a smile to yourself. Christmas is hating the sight of Christmas trees in stores the day after Halloween but spending an entire night just gazing at one in late December.

Christmas is a gaily decorated door in a residence hall.

Christmas is looking for a happy spirit and finding many frowning, rushed and uncaring people.

Christmas is a song sung slightly out-of

A kiss Christmas is a kiss in the snow. Christmas is a time to go skiing, to sleep and to eat.

Christmas is when you finish the term papers that have been assigned all semester. Christmas is wishing there really was a

Santa Claus. Christmas is wondering what it's all about.

Christmas is wanting to be in the snow and the pine trees knowing you'll be home, arguing with your parents. Christmas is a commercially wrapped

present that is beautiful but sterile. Warm bread Christmas is the smell of warm bread and turkey.

Christmas is slush and not snow. Christmas is early morning present

Christmas is buying presents with a iovful heart. Christmas is a war in Vietnam. Christmas is cold and hungry, some-

Christmas is hope for peace. Christmas is three warm quilts. A letter

Christmas is a letter to Santa. Christmas is wishing your teacher a Merry Christmas and having him nod

Christmas is wanting to hug someone good-bye but being afraid to express the emotions that are disdained by society.

EVERYONE'S JOB — Keeping the tables of the Student Union Building cleared is the task of everyone. Because of financial reasons, the management can't afford to pay personnel simply to clean tables. Consequently, this unappetizing scene remains after every lunch.

By Mike Kirk Argonaut Feature Editor

Returning to school in the fall of 1965 a University of Idaho student decided to show off his new car to one of his fraternity brothers. The walk from the

house to the car was the last he ever took.
Four miles later Sherm Bellwood was pinned inside the demolished shell of an automobile and his once promising life seemed abruptly ended.

Fight back But that was when the fight back to life

began.

He found himself in the Moscow hospital where he was treated for his

minor injuries.
"I remember that terrible feeling when I came to and tried to feel my abdomen—and felt nothing," he said.

TV's

It was while he was enrolled at Washington that a hot water bath once burned his insensitive legs so severely that a staphylococcus infection resulted.

Washington.

At this point the odds seemed insurmountable.

Then, in 1968, his fraternity brothers at the University of Idaho decided it was time to bring Bellwood back to school and help him build his life.

Guys helped
"If it wasn't for the guys in the Kappa
Sig house, I would have never gone back
to the University," he said.

Special accommodations were made for Bellwood at the house. Doors had to be enlarged to facilitate his wheelchair. Bathing facilities were added to his room along with special study equipment and desks.

He started making his new life going to classes in an attempt to earn a Bachelor of Science degree at the University.

Some of Bellwood's problems at the U of I included travelling from class to class over the rolling hills of the spread-out campus. He said the students and faculty were especially helpful in helping him to arrange his class schedule so that he could complete his requirements.

Third floors

He said he had some classes on the third floors of buildings, but friends just piled their books on his lap, picked up the wheelchair and delivered him to his destination.

Bellwood completed his degree requirements this summer and is presently living in Twin Falls where he is employed as a vocational rehabilitation counselor aide.

His daily living pattern has been altered radically. It takes him at least two hours each morning to get ready for work and he must allow himself extra time to make appointments because of transportation difficulties.

Bellwood does all of his own cooking, has learned to drive a car and has replaced his former love of physical activity with an avid desire to read and an appreciation of good music.

Dave Bergh, president of Kappa Sigma, said he remembers what a lift Bellwood's presence was in the fraternity house. "Most of us thought we would have to take care of him a lot, and we were a little worried about that, but Sherm just overwhelmed most of us—he has a lot of courage and wanted to do things himself."

One of those things Bellwood learned to do for himself was to help others.

He wants to be a career counselor for the handlearned. He thinks his personal

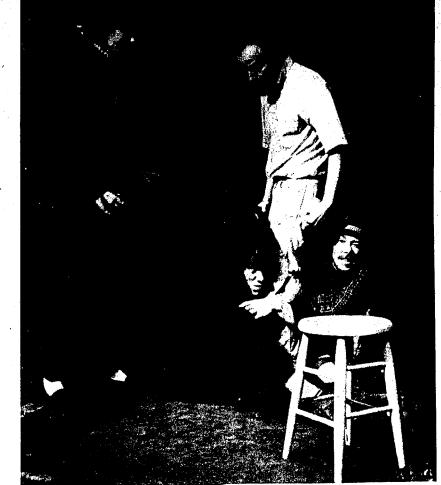

the handicapped. He thinks his personal crisis has helped him understand the problems that face them.

That personal crisis has been five years

That personal crisis has been five years of pain and learning to do it all over again. Now he's found a place in life.

Forms available for alien reports All aliens in the United States, except a

Page 3

All aliens in the United States, except a few diplomats and accredited members of certain international organizations, must report their addresses to the government each January.

Forms for this purpose are available at any post office or office of the United States Immigration and Naturalization Service. They may be filled out in those offices and returned to the clerk from whom received or they may be mailed to the nearest office of the Immigration and Naturalization Service. Parents or guardians are required to submit reports for alien children under 14 years of age.

If you or any members of your family are not citizens of the United States, you should tell your parents of these requirements. If you have relatives or friends who are not citizens, you will do both them and the government a great service by telling them of the requirements.

Argonaut corrected

The graduate student health fee is \$16 per semester rather than \$12 as stated in the Dec. 11 Argonaut on page 5.

For a good time, call 743-2697 and ask for Oly.

Call him. He's your Olympia campus representative. He'll tell you about our go-anywhere kegs with the new Oly Picnic Tap.
Olympia Brewing Company, Tumwater, Washington. *Oly*®

Why doesn't General Electric sell new ideas to the cities instead of new gadgets to the suburbs?

After thirty years or more of neglect, there's no question our cities need help.

But what kind of help?
Will another thousand sanitation men be the answer to dirty streets?

men be the answer to dirty streets?
Will doubling the police force finally bring crime under control?

Can new rent laws force landlords to provide more low-income housing?

All the old, obvious ideas have

been tried. What's needed are new ideas and new technological developments.

General Electric has been

working on the problems of cities for a number of years now. And in that time we've come up with some things we think will help.

Garbage

General Electric research has come up with what is probably the most revolutionary idea in garbage disposal in years. Our scientists are working toward a process by which a special strain of bacteria converts garbage into a high-protein food for cattle.

The process is still something of a "laboratory trick," but it could be in the pilot-plant stage in as little as three years.

Crime

You might not expect a company like General Electric to be doing anything about crime.

But the fact is, GE has been working with the Syracuse police, looking for a new approach to the problem. Our scientists there came up with a whole new concept in police organization called "Crime Control Teams."

In their first year, these teams were credited with cutting crime 62% in one large, representative neighborhood of Syracuse. And the concept has since been adopted by a number of other cities.

Housing

To meet the critical need for new low-income housing, General Electric is participating in the Department of Housing and Urban Development's Operation Breakthrough.

While GE has no intention of going into commercial home building, we do hope to supply the builder-developer with new products needed to improve his efficiency.

We now have several design prototypes of advanced, modular homes that can be assembled in a matter of hours.

These are just a few of the new ideas General Electric has come up with to help cities at the same time that we continue to improve

"gadgets" to help people. We don't think our home products are at all unnecessary

products are at all unnecessary or frivolous. If they seem that way, it's because people have forgotten how much they rely on them. To wash dishes. To wash clothes. To keep warm. To keep cool. To entertain. And on and on.

New ideas for the cities and new "gadgets" for the home both have the same end in mind, after all, To help people live better.

Why are we running this ad?

We're running this ad, and others like it, to tell you the things General Electric is doing to solve the problems of man and his environment today.

The problems concern us because they concern you. We're a business and you are potential customers and employees.

But there's another, more important reason. These problems will affect the future of this country and this planet. We have a stake in that future. As businessmen. And, simply, as people.

We invite your comments.
Please write to General Electric,

Campus parking said acute problem

On campus parking has become an acute problem. This year, faculty, staff and students, at any given time, require 4,296 parking spaces. Only 3,349 such spaces now exist and the problems could

An Ad Hoc Traffic Committee report is currently being compiled under the Committee on Campus Affairs. Dean Vettrus is the Chairman of the committee and he expects the report to be helpful in figuring out the U of I's complex parking problems.

The current shortage of parking spaces is more serious in certain areas of the campus than in others, according to

"For example, 298 persons working in the Administration Building, Ad. Annex, and vicinity must compete for 130 existing parking spaces in Ad. lot No. 1," he said.

"Serious or potential problems also exist in the areas in the Forestry (new).

No opinion

Faculty Office (Chrisman-Willis Sweet). Ag. Science, Elm Street Greek Row (fraternity-sorority), SUB area, and the Wallace-Shoup Hall Complex," he added,"especially when accommodation for about 800 commuter-cars driven by students are considered.'

Vettrus said the Campus Affairs Committee is aware of the parking dilemma, and of Oct. 5 approved the establishment of his Ad Hoc committee, composed of students and faculty, to study the problem and gather data from which recommendations may be made.

"There will be a questionaire circulated to all Deans, department heads, directors of major administrative units and officials of student living groups," he

He also noted that the questionaire appears today in the Idaho Argonaut for the benefit of off-campus students.

Vettrus suggests the questionaire be completed and mailed to Capt. Harold I. Bell, Army ROTC , Memorial Gym, not later than Jan. 8, 1971. He said students may also turn the forms into the SUB Information Desk at their convenience.

He said after the data is tabulated some concrete action on the parking situation may take place. The next step, after tabulation, is to send the results to Campus Affairs Committee, according to Vettrus, from which the necessary stepswill be taken to implement suggestions

READY FOR SALE - Unloading a ceramics kiln in preparation for the annual University of Idaho student art show and art sale is Michael E. Barr, Moscow, a senior majoring in sculpture. Snow, winding slick roads await student travelers

Argonaut Feature Editor

"Tis the season to be jolly..." or is it? To the thousands of U of I students who are going to be doing some traveling over the Christmas vacation — and aren't looking forward to that long drive home the prospect is anything but a laughing

Snow, winding icy roads, long stretches of wilderness and hours riding or driving in weird winter weather has student travelers "up-tight" in grim anticipa-

Distance

It is about 300 miles to Boise, 300 miles to Seattle, 300 miles to Portland and more than 500 miles to Pocatello and Idaho Falls.

All routes — north, south, east and west of Moscow - involve at least one awesome mountain pass. Even Lewiston, the nearest quasi-city, requires negotiation of the famous Lewiston Hill.

The trip to Boise is, by now, one that is seldom forgotten by commuting U of I students. Lewiston Hill beckons initially. It takes about one hour to veer in and out of the switchbacks that snake along the southern side of the edifice. Then White-

Winding hill

After finishing the 40 minute gamble on the narrow, winding, broken surfaced highway that drastically drops the driver to the bottom of the hill the group in the

car sit back and wait the next 100 miles worth of sharp corners, one-lane bridges and desolation.

The trip to Seattle isn't much better. The mountain passes are habitually frozen solid with snow tires and chain required. Fog, blizzards and winding roads make the homecoming more like finishing the world's hardest road race than merely a 300 mile drive to waiting presents and family.

To Montana
Lolo Pass and the worst part of Montana beckon the traveling Eastern Idaho student. He looks forward to miles of snow-covered roads, trees, mountains and a noticeable lack of gas stations, state police and rest areas.

Preparing the car is the easy part, compared to fitting in all the luggage involved in transporting a carload of homeward bound students.

Dresses folded Girls don't like to fold their dresses they somehow expect the driver to find room for five other students and all the dresses — neatly pressed and mounted on

about 1,000 hangers. Books and typewriters never seem to fit into the available corners and loading the trunk has often been the reason for driver exasperation

But it all seems worthwhile - once the roads are negotiated, the hills slid down, the avalanches and oncoming traffic

avoided. And two weeks later, and 10 pound

Questionnaire on campus parking

- There is no problem that more strict enforcement will
- 2. The parking problem is serious for persons working, living, commuting or visiting in or near: (Identify no more than three)
 - a. Administration Building
 - Forestry
 - c. Faculty Office (Chrisman-Willis Sweet)
 - Ag. Science
 - Elm Street-Greek Row
 - SUB area
 - g. Wallace-Shoup Hall Complex
- 3. Assuming the need for additional parking facilities and continuous maintenance, these should be: (Note: facilities are listed in order of increasing costs)
 - Gravel extension of existing lots to the extent possible.
 - Graded gravel lots on the periphery of the inner campus where space is available.
 - Graded gravel lots wherever adequate, vacant space is available. Paved, lighted lots on the periphery of the inner campus.
 - Paved, lighted lots wherever suitable space is available. Multistoried, above-ground parking structures wherever adequate space is available, including the inner campus.
 - Single storied, subterranean parking structure(s) Under Ad. lot No. 1-west of Admin. building
 - Near Performing Arts Center and proposed stadium 3. Anywhere adequate space is available
- Funds for development and maintenance of parking facilities, whatever the type, should be from:
 - State appropriations allotted to the university within
 - its annual budget. Minimum, but sufficient, fees paid by students, staff, and faculty with registered cars on a graduated scale, and with reserved spaces available at the highest fee. (Driving and parking non-registered vehicles on campus streets permitted.)
 - Metered lots and streets allowing a choice of 1-8 hours day-time parking, at minimum cost, and free all night
- 5. The maximum distance from a parking facility to place of work or class, assuming service drives for the afflicted should be:
 - · a. 1 block (ca 300 ft.)
 - 1-2 blocks
 - 2-4 blocks
 - 4-6 blocks
 - e. 6-8 blocks
- 6. Other than service vehicles, no driving or parking should be allowed in the inner campus. Existing parking facilities in this area should be eliminated and the areas used for necessary buildings or aesthetic purposes.

Decorations: Deck the halls walls, windows and mirrors.

YAF urges participation

Today is Appreciation Day, an event sponsored by the National Committee for Responsible Patriotism intended as a show of solidarity behind the law enforcement officers and fire fighters of the United States.

Plans for the day include a nation wide moment of silence at noon in honor of all those who have lost their lives while defending the nation. The national organization has asked Americans to fly the flag and to drive with their headlights on during the daylight hours. Churches have been requested to ring bells for five minutes from 11:55 a.m.

The University of Idaho Young Americans for Freedom are urging all students to take part in the observance of Appreciation Day, according to Roger Koopman, YAF chairman.

Palouse skydivers will hold training meeting

The Palouse Parachute Club, recently honored as the No. 1 collegiate parachute club in the nation, will be offering a training class in the near future to all students who think they could enjoy getting high in an airplane. Tomorrow night, there will be a meeting in the SUB to orient interested people on the activities of the club. Also, arrangements will be made for post-Christmas vacation training. The training should be completed and the first jumps made by

semester break. The remainder of this year is filled with fun activites for the club. Some of these include several months of "snow jumping" followed by northwest spring competition. The club is in need of new jumpers to fill the novice classes on the team, not only for spring competition but next year's nationals team as well.

If you think you could enjoy this exciting sport, please attend this meeting. It will be held at the SUB at 7:00 p.m. The room will be posted at the information

National Championships held in DeLand, Florida over the Thanksgiving vacation, the University of Idaho skydiving club took nine members and placed fourth behind Air Force Academy, 1st, West Point Academy, 2nd, and Boise State College, 3rd. There were 48 universities participating in the event.

Vandal grapplers win over Montana

The University of Idaho wrestling squad picked up their second victory of the season to no defeats as the defeated Montana, 28-16, in a Big Sky Conference dual wrestling match Friday evening.

Behind the number of men they had wrestling, the Montana club won six of eight matches but lost their four heaviest weights on forfeits as three wrestlers could not make the maximum poundage.

Rudy Ochoa, Vandal wrestler, pinned Montana's Wayne Strong in the 118 pound class as the Idaho grapplers were the first to score. The Grizzlies won the next three matches, however, as Montana's Jay Swarthout pinned Dave Freeman, Pat Cheney decisioned Idaho's Dave Kjos, 12-3, and Terry Cottier surprised everyone by pinning Tom Judd.

The Vandals and the Grizzlies split wins in the 150 and 158 pound classes as Dwight Lennick decisioned Grizzlie's Rick Lau, 4-2, and John Ingham from Montana defeated Galyn Decoria in a 7-3 decision.

Ray Thibodeau, 167, Dan Laqua, 177, Hank Boomer, 191, and heavyweight Larry Bosma all won their matches with Montana by forfeits.

Football banquet will be tomorrow

The Vandal Football Banquet will be held in the Student Union Building on Wednesday, Dec. 16th for the entire football team and will be sponsored by the local chapter of the Vandal Boosters.

The entire program will be handled by the ten senior football players who played their final season for the Vandais this year. According to Bob Maker, Vandal publicity director, it is a stag-type meeting open to the players and boosters.

Merry Christmas

PRES. ERNEST W. HARTUNG

Photos by Erich Korte

Holiday hangings trim Idaho campus

Argonaut Campus Editor

Bright blinking lights, fragrant pines, and a blanket of snow . . . the Christmas season is making changes all across the

Early in December, the portrait of President Ernest Hartung cutside of Dean Vettrus's office in the SUB took on a new look. The addition of a red cap, a white beard, and a cheery "Ho,ho,ho!" gave the University president an entirely seasonal appearance.

Living groups all across campus have decorated their doors and windows for the holidays. Christmas lights, evergreen boughs, and pictures painted in the windows adorn many of the fraternities, sororities, and dorms.

The Sigma Nu's have covered the pillars on the front of their house with silver and red paper in candy-cane fasion. Evergreen boughs have been placed at the front of the Kappa Sig house. Of course, Shoup Hall is displaying its message of "Bah, Humbug!" in its windows.

Lights greet city Multi-colored blinking lights show a

Christmas greeting to the whole town of Moscow. The eleven stories of decorated windows, some with tiny trees on the ledge, make Theophilus Tower a Christmasy sight.

The complex also has windows filled with seasonal decorations and lights. Along the west side, Olesen Hall windows

spell out the greeting of Merry Christmas. A tree on the main floor of the University library adds to the holiday spirit for those who find it necessary to study for tests this week. Silver tinsel decorations hang from the ceiling to cheer those who still have papers to write. Doors decorated

Doors in the Administration Building have been decorated as is the tradition there. The president's office door has a huge fireplace with dear ol' Santa upside down holding a package. A little tag on the box says "Keep out until Dec. 25" - that doesn't mean to stay out of the office!

The Development office has a bright portrayal of the Nativity done in colored foil. It looks like a real stained glass window. Across the hall, the planner's office door has been decorated in red, white, and blue with the words Merry Christmas. The letters have appropriately been made from a map.

Last year the doors, which the office secretaries decorate, were judged and prizes were awarded for the best ones. No one has officially judged the decorations this year, but a gold tag saying "First Place 1970" has been making the rounds on all of the doors.

The Student Union is also in beliday.

The Student Union is also in holiday attire. Valkyries decorated most of the building with garlands, big red bows on the doors, and Christmas tree.
