# The apostle in the grass

Once upon a time, far away and long ago, there was an ant hill. Workers moved through it ceaselessly and countless tunnels connected it to the encircling grassland. Winds might swish the grasses now and then, but the tramping of thousands of busy ants never stopped.

One day an ant crawled out one of these tunnels, crept forward into the grass and suddenly halted. She had seen the frightening bulk of a spider sitting among some tall stalks a short distance away. She had heard about the dangers in the grass from her elders and teachers, of course, but this spider did not look dangerous in the least — he just sat there with his eyes closed, humming to himself.

To her further astonishment, the spider started to talk to himself in a very sad, mellow voice. He talked a little too softly for her to hear all his words, but he did say "love," "soul," and "peace" several

times. His voice went on and on, now and then dipping to such a tone of sadness that she felt like an eavesdropper.

But before she could creep away, the spider closed his mouth and opened his eyes a sliver. The two animals looked at each other.

"Well, what's your problem?" the ant finally asked.

The spider's eyes cracked open just a little wider than before. He folded his legs under his fat abdomen to give the ant more confidence before he replied.

#### Inner peace

"You see, miss," he said softly, "I have been trying for some time now to help you ants find the meaning of inner peace. But until you came along no one would stay long enough for me to explain." He paused and shook his head sadly.

"A missionary faces many trials, but the most painful is always distrust."

A vague premonition disturbed the ant, but she held her ground stubbornly. The tunnel was close, and she could just imagine the sensation she would cause when she announced to her friends that she had talked to a spider!

"Please explain to me, Mr. spider," she

said. "I promise not to leave if you don't come any closer."

"If I don't come any closer!" he spat indignantly. "That is exactly the problem — how can you possibly understand inner peace when you are so fearful? Never have I seen such a suspicious people as you ants. You're terrified of death, you're afraid to go into the grass, you're tied to a stupid schedule, you rush from here to there, working day and night, even bolting your food frantically. Don't I know how you need peace and love!"

#### He understood ants

The ant saw with a shock that his legs were no longer folded under his abdomen. But even before she reacted, he noticed her worry and folded his legs out of the way again. He certainly understood ants.

"How do I know you have anything to say?" the ant asked uncertainly. "You're just a spider sitting in the grass."

"Listen here," the spider went on calmly. "What did your teachers tell you

about our sting? Surely you young ants are liberated enough not to believe the baseless rumors they spread about that?"

The ant looked at his slowly widening eyes with confusion. How did he know so much about her?

#### They say...

"They say that the sting is addicting," she murmured helplessly. "And then they say..."

"They say," the spider retorted, "the colony says. But a colony needs workers and so they teach ants to fear that which could set them free. They call it a trance and an addiction but I call it a groove. They call it destruction, but I call it expansion. With my sting you will vibrate with the chord of the universe."

The spider was sure of the ant now, and moved deliberately toward her. But there was still something troubling her — she asked one last question:

"Some of my friends talked about trying this," she said thickly. "But they are all gone. Why..." But the answer came to her in the first prick of the spider's stinger. It was so simple — what good would a colony be now? It was so flat and common. And this — wow! She was vibrating in a delightful new world. It was really a groove....

#### He ate her

The spider ate her completely up, saving the head for the last — it was the best. He enjoyed doing a good turn immensely, and often wished that there were more like him in the world. There were so many ants struggling in a loveless, fearful world that it was discouraging to be a missionary sometimes. Of course he felt better after a conversion, but still —

Then he saw the frightening bulk of a frog sitting among some very high clumps of grass a short distance away.

Moral: If you must walk in the grass, keep away from missionaries that are heavier than you are.

## Congestion or practicality

"There's no time like the present," commented some wise old man who immediately lost his job on a university's long range planning committee. No room appears to exist for those over-anxious people who want to implement last decade's future project.

Postponement seems to insure that in 10 years some committee will be talking about the same long-range ideals.

It has infiltrated the thoughts of some faculty members that eventually it would be a good idea to eliminate parking from the inner campus. The screening out of cars would not only discourage the use of automobiles for environmental improvement and beautify the campus in general but would also eliminate the necessity of charging students additional fees for parking.

However, the need for additional parking spaces seems so urgent to the members of the parking committee that long range thinking gives way to immediate necessity.

Why not the present? In three years, the predicted end of the proposed fees, the number of cars to eliminate from campus will not be less but the need for more parking lots even greater. Three years time will provide no greater opportunity than now for initiating such a project. The inconvenience involved is one of choice.

Would students and faculty prefer fees and the right to hunt for a parking spot to the option of clean air and an uncongested campus? One choice is for convenience the other for long term practicality.

If Faculty Council must vote for parking fees it should at least consider the possibility of using the \$25,000 to \$35,000 expected fee income on something other than parking lots for more cars. The concept of a campus bus service or transportation which would decrease the need for multiple cars has been discussed very little as an alternative way to spend the funds.

Long range goals lose their value when committee members value immediate convenience so greatly they ignore future problems. Ten years from now, no doubt, some faculty member will yell through the smog, "Whatever happened to that long range plan?" — FULLMER

"FOR THE SUPREME COURT WE'LL NEED A LIBERALLY CONSERVATIVE WHITE, PRO-INTEGRATION, ANTI-BUSING, SOUTHERN WOMAN WHO LOOKS GOOD TO MINORITY GROUPS!"

## Argonaut Interviews

The Idaho Argonaut will conduct interviews for persons interested in being either a senior news editor or a proofreader tomorrow night between 8 and 9:30.

Both positions are salaried.

## Put football second

Editor, the Argonaut:

I noticed in Friday's Argonaut an article, "Athletic Vote Nears". It seems to me that the university is trying to tell the students, with regard to the funding of the stadium, "too late, we've already made too many promises for your money and without your knowledge." So now they want students to believe they have to pay for its completion; the stadium's started and now it must be finished. Got to keep your children in debt.

I say, if the students think their money can better be spent elsewhere, then let the stadium stand unfinished as a reminder of this tremendous financial stupidity.

I fail to see how a school that can't afford decent salaries for teaching and other staff, can't afford a really complete library, can't even support a day-care center for students' children, can justify building a new stadium with student money. The students should reconsider the true uses of a university before the Oct. 27 polling.

The U of I could be in the vanguard of a new movement to put interscholastic football second to academic needs.

Edie Morey  
Former student

## Football knowledge?

Editor, the Argonaut:

Re: June Schou's letter of September 24, June,

If you honestly believe that the future of this school is dependent upon our football team (hell, we've had a losing team every year that I've been here, but enrollment keeps increasing) — something is vitally wrong.

The future depends, as Mr. Plastino notes, on the quality of the University of Idaho graduate.

You infer that an "unknowledgeable" reader might be misled to having students de-emphasize football and support the other "minor" sports, but the statistics you cite show that YOU are unknowledgeable about our athletic program, not Mr. Foley. Try these stats on.

1. Vandal Booster contributions have never totaled \$300,000 in five years, let alone in a single year. Rather, the Boosters contribute in the neighborhood of \$45,000 a year. (hardly the "huge" sums from those "generous" contributors that you spoke so fondly of, June)

2. The "Idaho Congress" appropriates a lump sum of money for all of the state's higher education. This money is divided up by a formula (not based on win-loss records, rather) based on Full Time Equivalent (FTE) students by the Regents.

3. With student money alone, we could maintain our current level of spending on baseball, track and cross country, wrestling, tennis, golf, skiing, swimming and add soccer to the budget. Plus this would leave enough left over to pay for half our costs in basketball.

4. To maintain the PRESENT level of spending on athletics, it will require a \$16/year/student fee increase (Can you dig it, June?).

If it is so important to the Vandal Boosters to have a football program, why don't they throw in more money???? I am tired of dumping \$90 a year into an athletic program whose main feature is a losing football team. The priorities of the institution and the athletic department need to be refocused.

June, your last sentence about liking it or leaving for BSC surely betrays that you must be a freshman. Many of us came up here for an education instead of being a football spectator, if we had wanted the latter, we would have gone to Boise.

de-emphasize football,  
Tom Slayton

## All aren't born equal

Editor, the Argonaut:

We of what I might call the "liberal persuasion" have had a difficult time of it lately. Some of the 'food for thought' we have been offered recently has been a bit hard to swallow.

We have known, for instance, that inequities have long existed in our society. We have generally attributed these inequities to environmental factors: i.e. differences in educational and employment opportunities. But, starting with the Moynihan Report in 1965, we have been confronted with substantial evidence that in fact our inequities may be due to other factors.

Moynihan blamed much of the inequity between Black and White America on the Black family structure instead of racism and oppression.

Then last year Edward Banfield published *The Unheavenly City*, which caused a storm of controversy in sociological and political science circles. Banfield argues that motivation (what he calls 'future-orientation'), not poverty or inferior educational facilities, is the foremost cause of slum strife. His conclusions call for a revamping of our attitudes toward slum problems that many of us would find odious.

And now an article appears in this month's issue of *The Atlantic Monthly* magazine that could possibly be the most disconcerting report yet. It is entitled "I.Q.", by Richard Herrnstein, and explores the contention that intelligence is not affected by environment nearly as much as we believe.

More specifically, Mr. Herrnstein examines recent research in Psychology that indicates that intelligence is overwhelmingly a derivative of hereditary factors. If these findings are true (and there seems to be no reason to doubt the validity of the research involved), the implications are most significant.

It could negate the contention of most minorities that their lower-class social and economic status is primarily caused by repression and an underprivileged environment. And it leaves the door wide-open for the less thoughtful among us to claim that certain elements, groups, races, and classes of our society are inherently mentally or motivationally inferior.

This type of claim — whether empirically substantiated or not — is simply not necessary today.

My main concern with reports such as Mr. Herrnstein's is that they lend themselves to some form of neo-Social

Darwinism. If these recent findings are correct, it is important that we recognize them as facts and deal with them accordingly. But more importantly, we must recognize that intelligence is only one of many variables of the human personality.

Native intelligence, by itself, certainly doesn't ensure anyone of material success, self-satisfaction, or personal achievement.

After all, it is obvious that all men are not really created equal in their physical and mental potential. But this does not negate the necessity that all men and women be given the equal opportunity to make full use of whatever potential they have. Come on, people, let's try and work together, right now. This, it seems to me, is the true spirit of Jeffersonian democracy.

Gary Moncrief  
Grad. Student  
Political Science Dept.

## Back to nit-picking

Editor, the Argonaut:

In reply to W. B. Request's letter praising Jack Gilligan's weekend psychology presentations:

As for the weekend — Right on! But wait until you take a few of Jack's irrelevant tests. Somehow his "humanity" becomes fossilized; he turns the other 180 degrees to put education right back on the nit-picking track.

Yours truly,  
George Onuska  
Pysch 206

## Idaho for all times

Editor, the Argonaut:

In a recent copy of *The Argonaut* a statement was quoted as having been made by Mr. F. P. McCreary that the old concept of the University as "bricks and mortar" was being replaced. I take issue with that idea, Mr. McCreary, dear friend that you are. For this was never true — or, if it was, then it is still so, in a sense, for at the Faculty Women's Club this week, Dr. Coonrod substituted for President Hartung telling us that he was in Boise seeing about the new Law building and the addition to the Ag building.

But to say that there has been a "bricks and mortar" attitude is misleading. A truer picture of the University, and we like to say it like it is, was that it has been a "beacon for mountain and plain" for a long time — remember that the first settler in this area came a hundred years ago, 1871. Remember that this University was established in 1889, before Idaho was a state, and from that time was the site of the pioneer culture and intellectual achievement.

The first school of upper division learning was Ricks College in Rexburg, so both ends of the state had people who valued an education. The effort to provide suitable intellectual growth for our youth has been close to the heart and deeply in the effort of the people of this state from the outset.

Has this meant meaningful contributions? Yes. Earlier this week I was at coffee in the home of the late Henry F. Gauss, formerly head of Mechanical Engineering, who served on

this faculty for many years. On the wall of this living room is a picture of his grandfather, Carl Friedrich Gauss, who by some authorities is classed with Archimedes and Newton as the greatest mathematicians of all time. Just a few blocks from this home is that of Mrs. D. D. DuSault, daughter of Dr. M. F. Angell, former dean of Letters and Science and contributor to the body of Physics Law. (This I cannot at this time document further, but I shall pursue just what this is.)

Nearby the DuSaults lives Arthur Fahrenwald, retired dean of the College of Mines and inventor of the Floatation System which revolutionized the extraction of metals from ore. This brought him, the College of Mines, and the University of Idaho world-wide reputation. At 203 S. Polk lives Dr. W. J. Brockelbank, distinguished member of the faculty of Law, retired, who wrote the "Runaway Father's Law" or "The Uniform Reciprocal Enforcement of Support Act" upon which the entire nation bases the means to force irresponsible fathers to care for their children, money-wise at least. Welfare care finds this law invaluable.

The odd geography of our state has helped to keep alive a long-established rivalry among the schools of higher learning. But Dr. Coonrod reported that the budgets of the four state schools coordinated their figures the last time they were prepared. This is good. There are certain marks of achievement which our University has proudly held for many years and which our other schools are and will be very happy to achieve as time goes by. To list only a few: Sigma Xi, 1922, Mortar Board, 1923, Phi Beta Kappa, 1926, and Phi Kappa Phi, 1960. Idaho is comparatively new and comparatively sparsely settled. Let's recognize it like it is, a growing entity.

A concept I like was one used for a good while which said that our University was the site of Learning, Service, and Research. You students and faculty have a chance to add to the worth here — so please keep your public image one which doesn't down-grade the past, but builds for the future, feeling as your predecessors have that it is worth the effort that you leaders of tomorrow, all over the state, shall have opportunities of great worth.

Sincerely,  
Grace Wicks  
(Mrs. Guy P.)

P.S. When I wrote the above, I felt a bit crusty. But Bob Seale, in Forestry, gave me another idea. For he thinks Mr. McCreary meant we should see the return of the warmth of human being to human being emphasized in faculty-student relationships. If this is true, power to you. The present regard the student body feels for President Hartung is ample proof of a no-bricks-and-mortar attitude. I've known seven University of Idaho presidents. Two as undergraduates and five who were my husband's bosses, and of them two have kept an especially cordial open door in the corner office. As for faculty-student rapport, you have the advantage of many several-generation education-minded families.

To name only two: Mary Ruth and Mike Mann whose grandmother, Ruth Stark Millay was a distinguished teacher and a PTA enthusiast. And Paul Mann, their father is on our electrical engineering staff and moonlights as a Moscow city councilman, a difficult job just now. Number two: Nancy Berrigan. At the turn

(Continued on page 4.)

# At Idaho...

## today

Student and faculty members of Phi Beta Kappa will meet for lunch at noon today at the SUB.

Theta Sigma Phi members will meet at 7 p.m. tonight in the SUB. Initiation of new members will be discussed.

A rap session on employment, for all students who are graduating in December 1971, May 1972 or August 1972, will be at 7 p.m. tonight in the Borah Theater.

An Ethnic Dance Festival, sponsored by WRA, will be from 7:30 to 9 p.m. tonight in the big gym of the WHEB. Everyone is invited to this co-ed recreational event. No experience is necessary.

Dean H.S. Smith of the College of Engineering will speak on the crucial issues concerning the various attacks being made on the engineering profession at an IEEE meeting at 7:30 p.m. tonight. The meeting, which is open to the entire engineering community, will be in Johnson Laboratory 221.

## this week

Arlene Baldwin will speak at a meeting of the Paradise Valley and U of I chapters of the Idaho State Employees Association at 7:30 p.m. Wednesday. The meeting will be in the Spalding Room of the SUB and all state employees are invited to attend.

Alpha Zeta is sponsoring an Ag. barbecue at 6 p.m. Wednesday in the Pavilion. Freshmen and faculty are urged to attend. Tickets are \$1.50 per person or 75 cents for children under 12 years of age. There will be plenty to eat and lots of fun.

All collegiate 4-Hers are invited to a meeting at 7 p.m. Wednesday in the SUB.

Vandal Mountaineers will meet at 7:30 p.m. Wednesday in the SUB. A program entitled "Northwest Mountaineering" will be presented.

Young Democrats will meet at 12 noon Thursday in the SUB.

There will be a meeting for all persons interested in learning to skydive at 7 p.m. Thursday.

The forthcoming issue of the "Dean's Den" contains an important notice for all Engineering students.

## Applications due October 15 for overseas study scholarships

Applications for overseas study scholarships, provided by the U.S. Fulbright-Hays Act and by foreign donors are being accepted until Oct. 15, Prof. W. Kent Hackmann, scholarship chairman, announced recently.

The Institute of International Education (IIE) annually conducts the competition for Fulbright Grants, Rhodes Scholarships and Marshall Fellowships.

Fulbright grants are made for one year of graduate study, research or professional training in the creative arts, Hackmann said. Approximately 275 grants are available for 1972-73 and will be made to countries in Europe, Asia, Australia and New Zealand and South America.

### Judged highest award

Marshall scholarships are judged to be the highest award possible for a U.S. student to win to any British university, he said. The 24 annual grants are open to students under 26 years of age who will be graduates before the fall of 1972.

Awards are made for two or three academic years at any of the 46 universities in England, Scotland, Wales and Northern Ireland.

Bachelor men between the ages of 18 and 24 may apply for study in England at

the University of Oxford, under the Rhodes Scholarships. These scholarships are normally held for two years, and 32 new awards are made each year.

Additional eligibility requirements are that a person must be a U.S. citizen at the time of application, he must have bachelor's degree or its equivalent by the beginning date of the grant, language ability equivalent to the demands of the proposed study project, and good health.

Except for certain specific awards, applicants may not hold or expect to receive the Ph.D. before the beginning of the grant.

### Other information

Other information about the Fulbright grants may be obtained by contacting Prof. Lindeborg; Central European countries; Prof. Fiske, Western Europe; and Prof. Higgenbottom, who advises students interested in South America, Asia, Australia and New Zealand.

Prof. Schuster is the Marshall scholarships advisor and Prof. Hackmann advises those interested in the Rhodes scholarships.

## Correction

The Sept. 24 Argonaut had a story on page three entitled "Complaint against paper to be directed to editor." The story, about an ASUI Communications Board decision, said at the beginning of paragraph seven, "Roger Koopman, a member of the board...."

Roger Koopman, a well-known YAF activist, is not a member of the Communications Board, and the Argonaut has been advised by the Registrar's office that, in fact, Roger Koopman is not a registered student at this university. He is therefore ineligible for any ASUI position.

## Readers' Response

(Continued from page 3.)

of the century, Dr. J. G. Eldridge, whose degree came from Heidelberg, came to Idaho as a teacher of languages. His home was where the Campus Christian Center now stands. Throughout his long career, his front door was kept open to students. He was Nancy's grandfather. She graduated in June having had about every honor the campus could give.

If this is what was meant, the joy of give and take between human beings who care, then my apologies to Mr. McCreary and to you all, God bless.

G. W.

Reti was a philosopher as well as a grandmaster. He saw many parallels between the game of life and the game of chess, and even asked the question (In *Modern Ideas in Chess*, Dover, 1942),

"Should a man from the very outset develop all his powers and capacity or should he, from the commencement of his career, keep before his eyes a distinct object in life?"

## Philadelphia string quartet performs at WSU

The Philadelphia String Quartet, beginning its sixth year of performance in the state of Washington, is giving its first concert of the season tonight at 8 p.m. in the Kimbrough Concert Hall of Washington State University.

Known as one of the most adventurous of all musical organizations, the quartet has pioneered in the presentation of 20th century music.

Contemporary work is represented on tonight's program by Alban Berg's "Lyric Suite", which he composed in 1925-26. It has six movements and has been described as a highly chromatic work, essentially a romantic one. Berg, an Austrian, was a student of Arnold Schoenberg and a contemporary of Anton von Webern.

The quartet opens with Hayden's "Quartet in G Major, Opus 54, No. 1", and

closes with Debussy's "Quartet in G Minor, Opus 10". The latter work is Debussy's only strong quartet, composed in 1893.

Members of the quartet, artist-in-residence to the state universities and colleges of Washington, include Veda Reynolds, violin; Irwin Eisenber, violin; Alan Iglitzin, viola; and Charles Brennand, cello.

## Cheyenne plays free rock concert Thursday

The rock group Cheyenne will stage a free one hour concert this Thursday at 4 p.m. on the plaza in front of Theophilus Tower. In the event of rain, the band will move inside to the SUB cafeteria.

The five piece Los Angeles band is now playing at an entertainment spot in Pullman and is presently releasing a national recording called "Love and Hate" and "Lot of Good Reasons."

Cheyenne is playing for the hour long concert here with funds from the ASUI bands committee. Chairman Randy Luce explained, "We pay for bands through student fees. I could charge, but any money goes back to the general fund. We should provide entertainment at no cost because students should get some return."

## Pre-Hispanic stone rubbings displayed at museum

A display of pre-Hispanic stone rubbings from ancient Mexican and Guatemalan sculptures is at the University Museum now through Oct. 13, 1-5 p.m. daily.

**McCONNELL MANSION** at 110 S. Adams St., former home of an early Idaho governor and a senator and the first Moscow home with indoor plumbing, is one of the many historic old homes in the city.

*Let me live in a house by the side of the road  
Where the race of men go by —  
The men who are good and the men who are bad,  
As good and as bad as I.*

Sam Walter Foss

"The House by the Side of the Road"

## Old Moscow homes recall history

By Drew Radescich

The city of Moscow was originally settled in 1871, long before Idaho gained statehood. However, many of the old mansions seen around town are not as ancient as might be imagined, though they glint of old world architecture.

The early settlers surely brought with them the idea that a man's home is his castle. Perhaps they took it literally; some of these places look like castles, only reduced to a smaller scale. And they are built as castles — spires, thick walls, heavy timbers, 12 foot ceilings, winding staircases, and a lot of rooms. Some of these mansions are three story, but most are two.

If you are a person with that type of imagination who stands before old houses and feels the sights and sounds of life passing through generations, you definitely should see Moscow's old homes.

Most of these antiques are on the east side of Main St., a short stroll from campus.

If you are out to explore the neighborhoods for old houses, a good starting place is the McConnell Mansion at 110 S. Adams. It was built in 1883-6 by William J. McConnell, Idaho's third governor and one of the state's first two appointed U.S. senators.

This was the first house in Moscow with indoor plumbing, the water system being supplied by windmill in the back yard. The finished woodwork was shipped from San Francisco to Portland, taken up the Columbia by paddlewheeler to The Dalles, and then by wagon to Moscow. The fourth owner of the McConnell

home was Dr. F. C. Church, once head of the history department at University of Idaho. In 1966 at his death, the house was willed to the county to be used as an historical museum, the collections for which are to be heritages of Latah County. The period to be covered is 1871 to 1921.

The McConnell Mansion is open for visitors Wednesday and Sunday 2-5 p.m. and Saturday 10-12 a.m.

The next stop may be at 308 S. Hayes. This is the 1889 Mason Cornwall estate, with spacious lawn, tall trees, and a "stone" two story house (once with a cupola). The house is built on a granite foundation and holds a basement, fireplace, bay windows, large living areas, and square nails.

An original pane of glass, in one of the circular-topped windows, is etched in signature, "Mason A. Cornwall, Moscow, Idaho, Jan. 1, 1903."

The oldest residence in Moscow may be the Almon Asbury Lieuallen place at 107 Almon St. A. A. Lieuallen was the first settler in Moscow in March, 1871, and later became the town's first postmaster. The third floor of the Lieuallen home was once used for a skating rink.

At 528 E. 1st is the Frank David home built in 1893. He was one of Moscow's early merchants. Other houses of Moscow's beginning days are easily spotted. Their appearances seem to fall into a style of the times which makes them readily recognizable as some of Moscow's originals.

Only a few of the mansions have been dwelt upon here, but for the student of architecture and history, either academic or self-styled, the beauty of these old places is before you.

**TOBY**, a 13-month-old chimpanzee is a new pledge at the Fiji house. Toby's abilities include dancing, riding a tricycle, doing somersaults and eating with a fork. His owner, Tom Sankey, is a freshman and has trained chimps for the Ice Capades.

## DSEP students to study at other institutions

By Celia Schoeffler

How would you like to spend 12 beautiful months studying at the University of Hawaii in Honolulu without having to pay out-of-state tuition costs?

The newly founded Domestic Student Exchange Program (DSEP) enables sophomores and juniors, who are Idaho residents with a 2.5 cumulative GPA, to spend up to a year at one of the 12 DSEP institutions with out-of-state residence fees waived.

The 11 other DSEP schools that undergraduates are eligible to exchange with are Grambling College, La., Illinois State University, Montana State University, Paterson State College, N.J., Portland State University and the University of Alabama, Towson State College, Md., University of Massachusetts, University of Montana, University of Oregon and the University of Wisconsin.

### Full credit given

Students receive full credit while attending an exchange school and all grades are transferable. The only extra costs a student pays are for transportation. Room and board fees are paid directly to the exchange institution.

"DSEP is a great opportunity for students. It gives them a chance to experience the variety of cultures within the U.S. and to take advantage of special courses that might not otherwise be available to them," said Mrs. Corky Bush, director of Intercultural Programs, who acts as DSEP coordinator at the U of I.

As head recruiter for the program, Mrs. Bush sets up meetings, hands out and evaluates applications, arranges exchanges, finalizes exchanges, helps with registration problems and corresponds with other DSEP schools.

### First successful year

"This is the first semester students have successfully been exchanged. Last year was spent in planning and organizing the program," she said.

Eight Idaho students exchanged this semester. They are Bruce Baird, Rhonda,

Brammer, Barry Bryson, David Goicoechea, Jerry Goicoechea, Mary Grandjean, Cathy Murray and Mark Wah.

Included among the eight incoming DSEP students are Judy Anderson, Ed Krysinski, Erlyne Lum, Charles Oliver, Joan Penwell, Susan Smith, Dennis Taylor and Gene Zavadil.

"There must be approximately 30 to 40 applications to actually send or exchange ten students," said Mrs. Bush.

### Two plans

Two different registration plans are used by DSEP, said Mrs. Bush. A student under plan A goes through the normal registration procedures of the host school and is charged the normal fees for a fulltime, in-state student of that institution. Plan B students pay the tuition and fees that they would normally pay at their home university.

A national meeting for all DSEP coordinators is scheduled to take place in Chicago this October. Following the conference, Mrs. Bush will tour DSEP schools in the East from Oct. 14 until Oct. 27.

"I will be staying with Idaho exchange students on the different campuses to get a personal tour and to see how each of them are doing," said the U of I coordinator.

### Recruiting in N.Y.

Grambling College, Towson State College, the University of Alabama and the University of Massachusetts are included among the schools Mrs. Bush is scheduled to visit. She will also go to Albany, N.Y. in an effort to recruit another school for DSEP.

"The Domestic Student Exchange Program is self-perpetuating," said Mrs. Bush. "I am very pleased with first semester results. Hopefully, by next term two or three more schools will be added to DSEP."

An organizational meeting for students interested in exchanging second semester will be held Oct. 11 at 7:30 in the SUB. Everyone is welcome to attend.

## Monkey business?

# New pledge for Fijis

One of the new pledges at the Phi Gamma Delta fraternity wears diapers, enjoys being tickled, and likes to be pulled around in a little red wagon. The pledge is Toby, a 13-month-old chimpanzee.

His owner and trainer, Tom Sankey, is also a Fiji pledge. Sankey is a 19-year-old freshman from Coeur d'Alene. He has trained chimps for the Ice Capades, a nationally known ice show.

Sankey, a veterinary medicine major, has a dealer's license for wild animals. Currently, he has two chimps, Toby and 4-year-old Skipper.

Toby was brought to New York from Liberia, Africa and sold for \$600 wholesale. Sankey has to take him to a baby doctor for shots and check-ups. Toby likes to dance, somersault, and is always ready for a beer after a hard day of tricks.

The other chimp, Skipper, lives in Jungle Land in Spokane, but is often a

dinner guest at the Fiji house. He eats with a fork, rides a tricycle, signs his name, and is even toilet-trained. Sankey said that Skipper is 3 feet tall, 75 pounds, and "strong as any man."

Skipper, being older than Toby, enjoys his seniority, and has advanced to Vodka Collins—but only with a straw.

Sankey explained that baby chimps are taken from their mothers one week after birth.

"The chimps are trained and cared for by humans, and they think they are humans," he said.

Trained chimps are worth from \$1,500 to \$2,000. They are "very intelligent, can be trained like babies, and are excellent pets," according to Sankey.

Toby is never out of babysitters at the Fiji house.

"He loves to put on shows," Sankey said. "He also brings in the girls."

## U of I leaders to attend meet

U of I president Ernest Hartung and ASUI president Mary Ruth Mann will attend the third annual Presidents to Presidents Conference in Washington, D.C. Oct. 1-3.

The conference is designed to present the current political and administrative situation to university and college leaders.

Miss Mann feels that she may have some input for the senate when she returns regarding the attempt to set up a National Affairs Committee.

"This may give us a way of getting more information in order to be prepared for or more aware of situations such as the Cambodian invasion or Vietnam Moratoriums," said Miss Mann.

Funds for the trip were budgeted by the Senate last spring. The \$132 registration fee has been waived and Miss Mann's other single largest expense will be about \$242 for plane fare.

"I will fly stand-by on the way to the conference, but had to reserve a flight for the return trip," explained Miss Mann. The Senate had budgeted \$300 for the trip.

The keynote speech will be delivered by George Romney, secretary of Housing and Urban Development. Other speakers will be Rogers Morton, secretary of the Interior, Elliot Richardson, secretary of HEW, and Senators George McGovern, Edmund Muskie, Birch Bayh, and Hubert Humphrey.

# Soccer Club socks Whitman College, 1-0

Idaho forward Sunny Lin rammed in the only goal of the game Saturday as the ASUI soccer club whipped the Whitman team 1-0. It was the second win of the year for the undefeated Vandals.

The score came after 37 minutes of play in the first half. Idaho sustained a controlled ball drive into Whitman territory and halfback Jose Almeida passed in to center field to Lin who kicked the ball over the head of the goalie who came out to block the shot.

Whitman couldn't seem to penetrate the outstanding Idaho defense. Vandal goalie, Bob Dobson easily blocked the two attempts at a score. Defense was the key to the game as time and time again the Vandals stole the ball.

Idaho scored again in the second half

but it was nullified by a holding penalty. The Vandals had three shots in the first half and two in the second which could have scored but the aim was off.

For the second half, coach Alan Rose rearranged the offense moving Frans Hoogland to left half and Nicos Rossides to right front, in hopes that more men up front would bring another score, but Whitman tightened up. Rose is going to work with the forwards this week trying to get them to shoot more often.

The soccer club's next home games are Oct. 9 and 10 when they play Seikir Canada and Notre Dame Canada. They play the University of Montana in Missoula, Oct. 3.

Saturday's crowd at the new Vandal soccer club was the largest since its creation.

HEADACHES WERE OF NO CONCERN as the Idaho Vandal soccer club defeated Whitman College, 1-0 Saturday. Defense was the key to the game.

## Football, softball, tennis scores noted as intramurals continue

Results of Intramural touch football as of Sept. 23 were:

Phi Gamma Delta over Lambda Chi Alpha, 15-11; Delta Sigma Phi lost to the ATO's, 8-7; Sigma Gamma Chi forfeited to Phi Delta Theta; Pi Kappa Alpha downed the Sigma Chi's, 18-12; Beta's rolled over Delta Tau Delta, 19-6; TKE's bombed AKL, 25-12; SAE over Farm House, 20-0; Sigma Nu edged Phi Kappa Tau, 13-6, and the Delta Chi's snipped Kappa Sig, 13-6.

In Intramural Co-Recreation Softball: Graham Hall-1 won by forfeit over Lambda Chi Alpha-1; ATO-3 forfeited to

Kappa Sigma-2; Gault Hall-1 lost to Chrisman Hall-1, 11-6; Borah Hall-1 edged ATO-4, 3-2; Campus Club forfeited to the SAE's; Phi Kappa Tau-1 lost to Sigma Nu-2, 1-0; and Sigma Nu-3 over Upham Hall-2, 9-8.

Intramural Tennis results were:

K. McKinney (TKE) won by forfeit over R. Rich (SH); D. Lee (TMA-1) over R. Bartholomew (TMA-4), 6-1, 6-4; R. Wagner (PKA) forfeited to T. Klein (WH); C. Walgamott (DTD) over T. Saraino (SN), 6-2, 6-3; Low (CH) lost to M. Vanstone, 6-2, 6-3; D. Oppenheimer (BTP) victorious over B. Nowierski (PGD), 6-4, 8-6; and K. Van Vuren (McH) lost to D. Stubbs (ATO), 6-2, 6-4.

VANDAL RUNNINGBACK, FRANK DOCTOR, had an outstanding evening Sat. night as he scored the winning touchdown that led Idaho to a 10-0 victory over Colorado State.

## Vandal gridders win over Rams

Idaho apparently found its starting unit Saturday night when the Vandals axed the favored Colorado State team 10-0.

The Vandals put together their kicking team in the Boise State opener and added the defense in last week's Iowa State contest. This week a rearranged front line and changed backfield assignments worked for the Vandals as they rushed for 228 yards net although the passing game only netted 31.

Frank Doctor's play was especially impressive as he gained 116 yards on the ground and Fred Riley added 102. Doctor started in place of Robert Lee Williams who has been sidelined with a hip injury and has seen sparse action since the Iowa State game.

Rick Seefried started at the quarterback position and impressed the Vandal coaching staff. He will likely start this Saturday against Montana.

Idaho's offense began early in the game as, after the opening CSU series, Idaho got the ball and Riley opened with a nine yard run and Doctor completed the first down.

Idaho's first score came in the late moments of the opening period when safety Kelly Courage returned a CSU punt from the Idaho 47 to the Ram's 20. Riley carried for a gain of two, but two passes

were incomplete. Ricardo (Pancho) Castillo came into the contest and booted a 35-yard field goal to give Idaho all it needed.

The icing for Idaho's victory was set up midway in the second quarter with an 89 yard drive. The drive was highlighted by a 23-yard pass from Seefried to Alan Head and two runs by Doctor, a big 34-yard gainer and a 16-yard touchdown run. Castillo's extra point finished the scoring for the evening with it 10-0.

The "Wild Bunch" defense again put in an outstanding game as they earned the Vandal award as a unit for the outstanding performance of the game. The defense as a whole consistently forced Ram quarterbacks Scott Simmons and Jim Erickson to give up the ball on incomplete passes. Linebackers Ron Linehan and Rand Marquess picked up 13 tackles each to key the team. The Vandals will have their hands full next week when they try to break the University of Montana's 23 game regular season win streak.

Following the game to be played at Missoula's Dornblaser Field, Idaho will prepare for the first Moscow "home" game since 1968. Idaho will host Idaho State at the New Idaho Stadium Oct. 9.

## CLASSIFIED

DISCONTINUED TEACHING STUDIO—Have over 25 new and used guitars—Yamaha, Harmony, Classic, Folk. All guitars marked 25 per cent below suggested list price. Call 882-7140.

Beer Signs: Great selection of neon beer signs. Excellent for the dormitory, apt., and fraternity. Phone 882-5388.

Rock band needs place to practice, keep equipment. Will pay. Contact Ron, 882-1556; leave message, 882-9971.

Photography—custom film processing and printing in 35 mm b & w; thesis work, art copying for portfolios. Call 882-1270.

1969 Road Runner for sale, 31,500 miles. Warranty valid, excellent condition. Call Monte Swenson 509-878-3591, Palouse, Wash.

## Frosh Council elections set

Seven freshmen will be elected on October 13 to the Freshman Council, according to ASUI senator Mel Fisher, chairman of last year's council.

This will be the second such election at the university. The Freshman Council began last fall and consists of seven freshmen who are elected in the fall by their peers. Any freshman may campaign for a position on the council.

The member getting the most votes is designated as chairman of the Council. The chairman is also an ex-officio member of the ASUI senate.

Fisher said that the Freshman Council was successful last year, and established a beginning for freshmen representation in student government.

"We're looking forward to a better year through a more productive election," he said.

### Good precedent

"Last year we set a good precedent. I hope the new council follows some of last year's programs. Experience wasn't necessary because some of the programs we initiated were new."

Activities of last year's council included establishing a Freshman Curriculum Committee, and getting more freshman representation on the senate. The council also worked through University Relations with a trial high school program. Last spring they showed a film on ecology, "1985."

### Council eliminated hours

Kathy Oliver, council member, said that the council also succeeded in getting freshman hours eliminated.

"The council promoted more freshman awareness of student government," she said.

Councilmen Mel Fisher and Doug Oppenheimer were elected to the senate last spring. Besides their senate duties, they will also be directing the new Freshman Council. Both predict a good year for the council.

"Freshman Council is very effective. It can be better this year because we have something to look back on," said Oppenheimer.

## Photocontest deadline set

Entries for the first annual University of Idaho Photography Contest are due Oct. 22.

The contest is open to all students, undergraduate, graduate or part-time. All entries must have been taken by students but may be commercially developed and mounted. First, second and third place ribbons and honorable mentions will be given in three categories—black and white prints, color prints and color slides.

The winning photographs and slides will be displayed at the University of Idaho Art Gallery Nov. 3-22.

According to the contest rules, a student may enter five pictures in each category for a total of 15 pictures. Prints must be at least 8-by-10 inches but no larger than 16-by-20 inches; no mounting may exceed 16-by-20 inches. Slides must be in the standard two-by-two inch mountings.

All prints and slides must be labeled with a student's name, address, university identification number and the title of the photograph. Slides must also have a dot placed on the shiny, non-emulsion side in the lower left corner as the slide is normally viewed.

Care will be taken with the photographs but neither the Department of Art and Architecture nor the University of Idaho will be held responsible if slides or photographs are lost or damaged.
