## Lack of snow may hurt Palouse

#### **By MARY SOCHINSKY Argonaut Feature Writer**

Skiers are not the only people who like to see a lot of snow during the winter-wheat ranchers like to see it too.

The problem is that there has not been much snowfall in the palouse area as well

this winter, Futter said, the wheat seed may have been damaged and possibly killed by the extreme cold This means that many acres of wheatland may have to be replanted to replace the wheat that has been damaged or killed.

Wheat Hard Hit Futter went on to say that wheat will be the crop hit hardest by the lack of snow of wheat has to be reseeded or complete crops have been lost -- it'll hurt them." Futter went on to say that the Palouse area and this part of the Northwest has many thousands of acres of wheatland which are the livelihood of hundreds of

families. "If this area would be struck by a bad crop year because of a lack of snowcoverings or precipitation, it will

## The Idaho drug scene drugs infiltrate campus

#### **By ELAINE AMBROSE** Árgonaut Staff Writer

As spring approaches, kites won't be the only things getting high around campus. This spring hundreds of students will invest thousands of dollars getting stoned.

According to sources, the drug scene at Idaho has increased rapidly this year. Drugs of all kinds are being brought in from Seattle, Spokane, Portland and Salt Lake. More is expected after spring vacation with students returning from southern California and the East.

Drugs aren't limited to the arboretum or the ad lawn as much as last year. Walk down the halls of many living groups and look for towels stuffed around the doors. Chances are, the occupants inside are high, or getting there.

Marijuana is the easiest and cheapest drug to get on campus. Lids sell for \$10 for normal grass. Extra special grass, like Panama Red, sells for \$20.

#### **Hash Scarce**

Marijuana can be obtained from many places and in various quantities. One source reported getting a lid from a four-pound sack. That's \$600 worth of grass.

Hash is harder to get than marijuana. It usually sells for \$12.50 a gram. Hash has just started to catch on and isn't as common as grass.

Chemicals, including reds, speed and acids. are hard to get but available. Blotter acid comes in hundred-hit quantities and sells for \$1 per hit. The latest thing in pills is from southern California. They are blue and equivalent to three reds (downers).

#### **Few Hassles**

Cocaine isn't used too often. A pinch of it can be purchased for \$10.

There have been no major hassles with officials, advisors, or other students concerning drug users. Students know which rooms can be used for smoking dope. One girl received complaints for smoking in her room. She had come from an eastern college where they "shoot up in the student lounge.

Pushers aren't stereotyped as shifty little guys giving dope to sixth-graders. Some campus pushers are working their way through school. Others come from bigger places where they have greater access to cheaper drugs. The pushers usually seem to just stick with the campus. The high school has its own pushers, according to sources.

Although the drug scene has boomed at Idaho, not many people are getting too excited about it. It's getting so that you can't distinguish someone with a hangover from someone who's burnt out.

### Moscow Bakery: small business still working hard By Mary Welland

Argonaut Staff Writer

One half block from Main Street, stands an establishment that is probably one of the oldest in Moscow. Since 1909, that has been the site of the Moscow Bakery. For the last twenty-four years, Bill and Lois Scheaffer have provided a variety of goodies that would frustrate any weight-watcher.

Mr. Sheaffer has been baking "since he was so small he had to stand on pans to reach the oven." His father was a baker in southern Idaho, so baking has been an intergral part of his entire life. He continued to work in his father's shop until 1949, when he moved to Moscow and bought the bakery from Charlie Schroeder. With him he brought several special recipes for bread that his father originated, "but we never reveal those, of course.'

large as in a Northwest.

'The biggest effect of the lack of snowfall is that there may be a lot of injury to fall wheat," said Homer Futter, Latah County Extension Agent. "Fall wheat needs a blanket of snow to act as an insulator to keep the seeds from freezing during the cold months. In the Palouse area, there are a lot of places where no snow has covered the ground this winter. I think that this is happening all over Idaho and much of the wheat-growing Northwest.

9

Without this snow cover and with the temperatures dropping below -10 degrees

cover "Fall wheat crops will be hurt the most," he said. "mostly because this part of the country has more of it than any other type of grain and it is the heaviest

producing crop that requires a lot of

moisture and snowcover. Futter added that other grain crops similar to wheat--such as fall planted barley and hay-may also have been damaged from exposure to cold weather. The fields may need to be replanted, a move which will cost the farmers money. Affects Hundreds

"This could really put a stress on the farmers," Futter said. "If large amounts

hurt our economy a little," he said. "But there is a good chance that we'll get more precipitation in the next few months." Yearly decline

According to a pamphlet published by the University of Idaho Agriculture Department, there has been a trend towards decreasing amounts of snowfall for the past 70 years. It states that in the decade between 1900 and 1910, an average, snowfall of 58 inches fell during a winter. By the 1960's, the average snowfall decreased to 36 inches.

Dale Everson, professor of agriculture at the university, said that less snow has fallen this winter than last year.

"Last year at this time we had 71.3 inches through the end of January so you can see there is a marked difference. " Effects?

Besides being an insolator for the seeds, the layer of snow provides moisture that is absorbed and held in the soil until the plants need it during the summer months. 'We usually have a pretty stable annual precipitation-around 22 inches," Futter said. "We may not have had much snow this winter but we still have a few more months for it to rain. Usually at this time of the year the subsoil is saturated with water--this year it is not.'

#### Average up

Even though the soil is not saturated. data collected by the University's Agriculture department shows the Palouse area has had a higher than average precipitation so far this winter. "So far we've had 13.13 inches of rain and snow this winter," Everson said. The average amount for this time last year was 11.51, so we've had more than our share.'

However, Everson added, 5.86 inches of the 13.13 fell in December, most of that in just two days.

University Study "The trouble is that the rain fell when the ground was thought to be frozen, (continued on page 6) ..... 

#### **Baking Begins Early**

A baker's day begins at 1 a. m. to bake for the coming day. With his helper, Mr. Scheffer makes everything that he sells himself. He has standing orders with several restaurants, the University library, and some of the houses on campus, besides what he keeps in the store for the public. Mrs. Sheaffer acts as a "jack of all trades." She gets Mr. Sheaffer up in the morning, does the bookkeeping, frosts the maple bars and does what ever else needs to be done. The amounts that they bake varies a great deal over the week but on the average they make enough dough to use one hundred sacks of flour, at one hundred pounds each, per month.

The bakery sees all kinds of clientele, from housewives to University students. Many youngsters and older people come in to buy a single doughnut to eat while shopping or before class. They really miss the students in summer, according to Mrs.Sheaffer. When bakeries appeared in the grocery stores, it definitely affected their business. However, most of their old customers have returned and they do a thriving business. Their gross sales are the same as ever. Over the years, their prices have just about doubled as inflation has forced the rise to allow them to make any kind of profit. The prices have remained constant for a long time now, in spite of rising costs, but unfortunately, they can't afford it any longer, and on March 1 they, too, will show a mark-up. Mr. Scheffer says that, for example, raisins have gone up in price to the point that it's almost too expensive to put more than four in a loaf of bread.

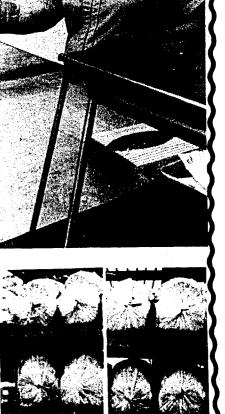

The Sheaffers employ six people altogether. This includes one helper who bakes, a frier and sales people. One sales lady, Grace Weinmann has been there for twenty-two years. She started working afternoons when her little boy was in kindergarten. She never quit and her boy is now married and with a child of his own. They've had three boys from the University who worked there all four years. Getting to work at 4 a.m. and then attending classes. One is now a lawyer and another an architect.

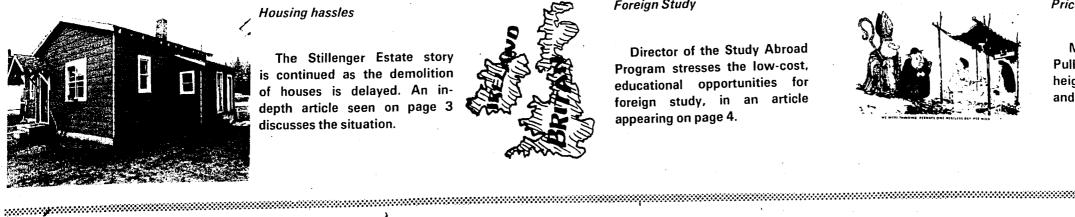

#### No Preservatives

Unlike grocery store baked goods, the things from the Moscow bakery have no preservaties. They use only enriched flour. They have quite a variety of pastries and breads. Upon entering, one sees maple bars (their biggest seller), cinnamon rolls, Danish pastry, bear claws, twists, doughnuts (plain, filled, glazed) and other confections. They stock big, thick slices of farmers bread, whole wheat, raisin, cinnamon, date nut, pumpernickel, black forest rye and caraway.

Some time ago, Mr. Sheaffer started making sour dough bread every other week or so. Then the demand became so high that he now makes it about twice a week and it has become almost a trademark. Mr. Sheaffer decorates birthday and wedding cakes. The customer usually gives him a general idea of what is wanted and then he takes over from there. A large cake takes up to five hours to complete and costs about \$40.00

The Moscow Bakery is one of the few specialty shops left in the area. In an era when the trend is toward consolidation of goods into a large establishment it's exciting to see a small highly successful business. Even more exciting is tasting some of their wares, as this reporter has done.

Housing hassles

The Stillenger Estate story is continued as the demolition houses is delayed. An indepth article seen on page 3 discusses the situation.

Ì

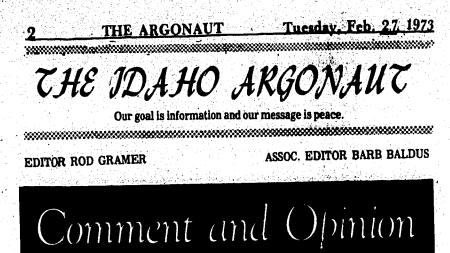

#### Foreign Study

Director of the Study Abroad Program stresses the low-cost, educational opportunities for foreign study, in an article appearing on page 4.

Prices soar

Meat prices in Moscow-Pullman area are reaching new heights. For details on costs and locations, see page 8.

## out of the audience and into the arena

A few weeks ago I announced that the ASUI side-show (elections) were coming to town. Today the show is here and we're suppose to play the role of the apathetic audience.

Blindly, or so the performers would like us to believe, we're forced to sit on the sidelines watching political jugglers toy with our emotions, and brown-nosing acrobats fly from living group to living group carrying with them platforms that conform nicely to platforms of everyone else.

They have expected us to sit back and take the whole show in, remaining aloof until the time when we drop our vote in the box to reveal which act we liked the best.

Let's fool these miniature P.T. Barnum politicians. Let's show them if we can, that no egotistical self-promoting student politicians are going to get by the scrutiny of our better judgement.

Let's get off the sideline. If the ASUI refuses to come to us except at election time when the clowns do their act, let us go to the ASUL

Idaho has a statewide (growing to national) reputation as the most apathetic University around.

This doesn't have to be so. Dropping a vote in the box doesn't take a long time to exercise this constitutional duty. Voting used to mean something when past students had to sit back and catch whatever mud the autocratic University administration threw at them - without the chance at electing representatives.

This reminder to get out of the audience and vote will probably do little good. But if it motivates even one of you to cast your vote today and tomorrow then this show of ours will be worth it. -GRAMER

#### The ASUI ballot

## Let's not vote for football

The ASUI Senate passed in its last meeting a bill (No.128) "Providing for a proposed referendum ballot at the ASUI General Election." This is a two-section questionaire to be passed out at the election polls. It is an opinion seeking device, not a binding ballot.

The first part poses five questions to the student body concerning the athletic program. The second part asks the student to list in order of preference what programs that he or she feels are most important. The second section is straightforward. The section on Athletics bears some examining.

"Do you favor making the University's athletic program essentially selfsufficient financially(i. e., no increase in student fees or appropriated monies?)

The positive opinion on this should be strong, but what are the chances of it happening? Presently, the General Operating Budget contributes \$307,000 (40 per cent) to athletic operations; funds generated by the Athletic Department are \$298,000 (39 per cent); and Student Athletic- fees \$93,000 (12 per cent). These figures are from the Office of Financial Affairs. If Self-sufficiency is to happen in the future (not considering possible increases in the budget) then the Athletic Department must increase its funds somehow by about \$399, 000. The Vandal Boosters already contribute \$74,000, and a large increase from them is improbable. Where is this money to come from?

#### Increased Fees

"Do you favor an increase in student fees for the varsity athletic program?" Presently our fees per semester include \$37.50 for the stadium (which at the present time must be considered an athletic expenditure). and \$71.50 for events admission. This is a good chunk of money for sports. The stadium is to be multi-purpose for a full range of student activity, but until it is covered this cannot really be. Presently, the primary users are varsity football, soccer (which is not supported out of the athletic budget), and track. The oval is not even a regulation 440 yard track.

"Do you favor the University continuing athletic competition with Boise State College and Idaho State University?'

#### Rambling on

## Racing to other things

isn't, the three presidential candidates with independent roots certainly is.

I expect the reverse in the Faculty Council race caught a few people by surprise. The two one-year positions looked like they were going to see a good race and the two-year seat appeared to be going to Mike D'Antorio on a silver McFarland and Mary Ruth Mann both with a minimal ASUI background, came from the shadows to become one of the best combinations in recent years. The next year MR moved up and earned the nickname Mary Ruth Yorty for her absences from Moscow. Then a year ago Roy Eiguren moved from the post of

It is possible that this also will be answered by the majority in the affirmative. These schools are two of our three most potent (at the gate) rivals. Presuming any continuation of varsity sports, these should be the last schools for us to consider severing relations with. Why was this question asked? Does it indicate that they would not wish to compete with us if we left the Big Sky Conference?

#### Leave the Big Sky

"Do you support the effort to terminate Idaho's membership in the Big Sky Conference?

The strongest argument put forth to leave the Big Sky has been of a financial nature. It has been alleged that leaving could put the athletic budget on a solid, self-supporting footing if we were to compete with schools with whom our income, both at gate and from TV, would be higher. This has been the primary reason the present ASUI Administration has supported President Hartung's efforts to lead the school in this direction. But there have been no figures given to the student body on how much such a move would truly enrich the program.

If we were granted permission to leave the Big Sky Conference, and we were then asked to join the PCAA (Why are we not given a formal invitation now, if in fact we are wanted?), Would we then instantly become a fully participating school in all sports? Football is a primary source of

### Betty Hansen

### Lincoln's kind of amnesty?

one of compassion.

, country.

The Idaho Legislature celebrated Lincoln Day with much pomp and circumstance on Feb. 12. In honor of this occasion, legislators invoked Lincoln's name and post-mortem support into debate on all nature of bills. But one important memorial-that on amnestyslipped by with all sorts of legislative approval and without the slightest mention of Mr. Lincoln.

I hate to second-guess what anyone would do in a given situation-especially if that individual isn't here to defend himself. Had Mr. Lincoln been sitting in these halls, however, I have reason to believe that his vote would have been one of dissent.

In the aftermath of the Civil War, Lincoln's chief concern was that the divergent forces in the nation be reconciled and that the government work industriously to "bind up the nation's wounds

#### Alienation on many levels

Like the Civil War, The Vietnam War has splintered and fragmented the fabric of our society and alienated people on many levels. But in the aftermath of the Vietnam War, the approach taken by the Idaho Legislature and our national

the athletic department's income (not to mention the largest consumer). But are not most football games scheduled years in advance? How much would it cost us to cancel out present contracts for competition to compete in the PCAA? Is there a place in the schedules of each PCAA school to accomodate us? If the PCAA is such a money maker, why did University of California, Santa Barbara, leave the program?

John Hecht

#### Support the effort?

"Would you support the effort to terminate Idaho's membership in the Big Sky Conference if it will make the athletic program self-sufficient?

We have already shown that it will take \$399,000 to make the varsity athletic program self-sustaining. It must once again be presumed that President Hartung's Athletic Director Ed Knecht's solution to this is to join the PCAA.

But can we take in that much money to justify the move? Perhaps we could become Independent. Notre Dame is an example of such a program, and it makes quite a bit of money. Its program is strongly supported by its directors. administrators, student body, and a very broad base of alumni. But Notre Dame is an historical and perennial power. It would take us years to build such a stature, if it could be done at all. This would of course entail a large dedication of funds for high-power recruiting, many more grant-in-aids for athletes, and other

the University are needing funds badly. some are even losing their accredation. The primary mission of a university is academic. Sports are important in that they encourage the normal person to 4. regard his body and his health. But why should support for physical exercise be limited to a few elite athletes?

Senate Correct

The Senate is acting correctly in taking a survey of the Students' wishes. The questions are well-founded in intent. But too many persons within the whole University system have been derelict in informing the students of the implications and alternatives that are also present.

I feel that until President Hartung fully publicizes answers to these questions to the university community, and gets a full feedback from all levels, he should table any requests to the athletic questions for the Regents.

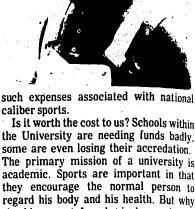

The Regents will be meeting at the University of Idaho in April. Perhaps they should hold a special open-to-allcomers meeting to question the students. and in turn be questioned. This could hopefully bring to light the positions of all concerned.

not and do not subscribe to this hog-wash are labeled unpatriotic or worse.

Supposedly Mr. Nixon was sincere in his stated intentions to bring an honorable peace to what millions of Americans deem a dishonorable war. He should then realize that punitive and vindictive actions towards those who oppose his "mad bomber" policies will not only engender further domestic unrest, but will pathetically sustain a tacit endorsement of the national "cold war" policy that got us involved in Vietnam in the first place.

If Mr. Nixon can grant amnesty to Lt. Cally, an individual who acted insanely in an insane situation, why can't he grant amnesty to the thousands of consientious young men whose personal standards prohibited them from participating in that war?

)

14

While I sit here a couple of things come to mind. The first is why I ever went roller skating last night and ruined my ankle, but since that doesn't really have anything to do with politics, I'll ramble on to the other, which is the campaign. As you read this, it will be completed.

One thing I've noticed in the past few weeks in the general nature of campaign posters. Virtually every candidate tries to put stands on posters and that means they all come out the same. So and so for such and such a position. Against in-state tuition, for better representation, for reorganization, for redistricting, etc.

Posters not needed

It seems to me that a person is wasting poster space to put much more than a name and position on one. Votes aren't really won on the basis of posters unless it's because of good graphics. However the personal contact is generally the best way to get votes, posters are best used to reinforce the name.

Another oddity I've noticed in the campaign is the part McConnell Hall is indirectly playing in it. Two of the four presidential candidates along with one of the VP candidates resided there in the past. Both Steve Stuk and Nile Bohon are former McConnellites, as is Mike Mitchell.

#### McConnell is a Key

It also might be pointed out that Wallace Complex president Ken Buxton, who is involved to one degree or another on one or two campaigns, also resided in McConnell last year. And in addition to the campaigning he is holding a contest to get a high voter turnout in the Complex with a "container of beveridge" going to the hall with the top voter turnout

It's also interesting to note the high number of independents running for office. I don't know if it's unlucky, but between the senate. ASUI President and Faculty Council there are 13 candidates. The eight senate candidates have to be some sort of record. And if it

platter. Then only Clive Strong and Ken Marcy turned in one-year petition which two days before petitions were due, Dave Warnick entered the fray against D'Antorio.

It's nice to see an apparent twoopponent race for ASUI President in addition to the one for VP. Melville Wiley (Trout) Fisher has seen Carl Wurster emerge from virtually nowhere to become a definitely viable candidate. That and the Casey-Mitchell test look to be close races.

I think this is a good time to look back on past ASUI presidents and administrations. Five years ago Larry Craig came from the position of an unknown to that of ASUI President with minimal ASUI experience. His successor, Jim Willms, was almst a direct opposite with a year on Frosh Council, a year out of politics, followed by two years on the Exectutive Board (this was in the pre-senate days) and finally his term as President.

The next year the twosome of Jim

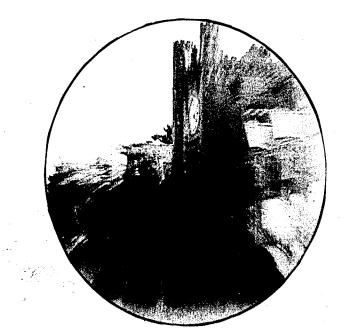

## Argonaut senate corrections

#### To the Editor:

Despite the fact that most candidates are running on a seemingly identical platform, the Arg need not add to the confusion by shuffling pictures and comments of the candidates and arranging them haphazardly. I'm sorry to see Jeff Stoddard confused with Vicki Thomas and Jim Etherton with Mike Renoux. Although one might argue that child development is one of Jeff's extracurricular activities, it is not his major field of study! I don't care about reprimanding the Arg--but I'd like the students to know the straight story. Lastly, I urge everyone to vote. Patty Keim

## Viewpoints

### Out of the Big Sky -- into the PCAA

#### To the Editor:

On the ASUI election ballot there will be a student referendum about the University of Idaho's athletic program. The results of the referendum will be used to show the Board of Regents the student body's opinion on such issues as supporting an athletic program that is essentially self-supporting financially, and the effort to get Idaho out of the Big Sky Conference.

We all know where the administration. faculty and alumni stand on the Big Sky controversy. Yet it is the students who pay for the stadium, make up the football team, and form a sizeable part of the spectators at home games. Let us show the Regents that we do not want our athletic program to go any farther downhill. Let us show them we want out of the Big Sky.

Why should Idaho leave the Big Sky? Our membership in the conference is forcing us to lose money on athletics, to the tune of \$76,363 in 1971-72. As a result, the University has to heavily subsidize the athletic program. Wouldn't it be great to make the athletics more nearly selfsufficient? Then the money with which the University subsidizes the program could be used to help the University in other areas.

The athletic program will never be financially self-sufficient as long as Idaho remains in the Big Sky. The conference is going downhill. It has cut the number of athletic scholarships. Idaho and several other conference have dropped or do not

field teams in various sports because of tight budgets.

But if Idaho leaves the Big Sky and joins the Pacific Coast Athletic Association we will have a better chance to develop a more self-supporting athletic program. We will draw larger crowds for major division PCAA games than we have for college division Big Sky games (excepting, of course, games with our instate rivals Boise State and Idaho State). The PCAA has national TV privileges and the possibility of a major division bowl game bid. The Big Sky has neither of these money-making advantages.

Besides giving us an opportunity to develop a self-sufficient athletic program, membership in the PCAA will allow us to continue competition among small major division universities, along with one or two games with the big schools. PCAA membership could also help strengthen our minor sports, which are barely surviving in the Big Sky. And because there are many more alumni in the PCAA area than in the Big Sky states. we can strengthen alumni interest in, and y support of, the University of Idaho. BOIL ALL THIS DOWN, AND WE ARE SAYING JUST THIS: Changing leagues is not an attempt to build an athletic, empire. Rather it is an attempt to maintain our present level of competition without needing the same or increased state or student funds to do it. So when a you vote on Feb. 27 or 28 vote your support for Idaho's effort to leave the Big Sky. Alan Graham

"I am not going to ask for bids or sign any contracts until I receive instruction from Dr. Hartung," said Sherman Carter, concerning the proposed demolition of the Stillinger estate.

Meanwhile the residents of the four houses proposed for demolition seem to have resigned themselves to its destruction. "I'm not in favor of tearing the place down, but I'm not going to lie down in front of a bulldozer or anything," said law student Bruce Green.

Green, who lives with his wife in one of the units, said it would be "all right if the University is willing to relocate us in comparable housing." **Phase Three** 

The demolition of the Stillinger estate (which includes the former Black Student Union Building and four housing units immediately to the east) and the construction of a parking lot in its place was first planned in 1965. It would have been the third phase in a three-part

action was contrary to what the University had said earlier in the year, "Last fall they told us they weren't going to tear it down." **Eiguren Dissatisfied** Roy Eiguren, ASUI President also expressed dissatisfaction with the administration's consultation with the students. "We only had one senate meeting between the time the memo came out and they took it to the Regents." At that meeting a hastily passed resolution expressing

On Jan. 9 of this year, Dr. Carter,

announced in a memorandum that he

would attempt to get Regent's

approval to carry out this third phase.

The memo states: "It is estimated

that the houses can be removed and

that the parking area can be

completed in accordance with

According to Green, this proposed

previous plans for about \$40,000."

building plan for Student Union Eiguren, President Hartung has conceded that they didn't give the students adequate time for consultation, with the start of spring Financial Vice-President of the U of I

semester being so close to the Board

of Regents meeting, Feb. 1-2. At that meeting the Regents approved the proposal and provided that six houses owned by the University would be removed (the additional house is a Universityowned dwelling at 412 College Avenue which was to be replaced by "grass planted on that site,") and 57 parking spaces to be constructed at a cost of 'less than 50.000 dollars.'

#### Student Concern Up

Since that time, increasing student concern has been evident. A second, more detailed resolution protesting the Regent's action was passed in the ASUI Senate. Eiguren had presented the student view at the Board of Regents meeting, but according to Dr. Carter, "The Regents had already taken their action when Roy made his statement.'

Among the objections raised were that there was little reason to

Since that time according to

opposition to the demolition was

### Financial student loans show good collection rate

This school year 1,145 students are receiving financial assistance through university-based student loans. Seven hundred eighty-one other students are receiving assistance from loans they have obtained from their private banks under the Federal Guaranteed Student Loan program.

According to Charles Decker, Director, Student Financial Aids "our students have generally done an outstanding job in living-up to the obligations they assume when receiving a loan to help meet their college expenses.'

He explained the several types of loan programs available through the Student Financial Aids office.

#### Federal Loans

"Final arrangements for Federal Guaranteed Loans are made by the student with a bank of his choice. The application process starts in the Financial Aids office. If the student is eligible, and this generally means an adjusted family income below the \$15,000 level, the federal government subsidizes the interest payments on these loans while the student is in college." Thus far this year 781 students have borrowed \$886,000 under this program. After leaving college, the student has a 10 month grace period before he is required to start paying back his FGS Loan and at that

time he also assumes the interest payment at the 7 per cent rate. Decker had no specific information on the record of collection of FGS Loans, but said that reports in the press have indicated a rather poor record of repayment.

#### National Loan

National Direct Student Loans are available through the University's Student Financial Aids office. During this school year 725 University of Idaho students have borrowed \$495,000 through NDS Loans. These are more popular loans since the loans are repaid at 3 per cent interest. Repayment and interest start after the 10 month grace period the same as the FGS Loans. These loans are

usually limited to \$1000 per year for undergraduates and \$1500 for graduate students. Minimum payments on all loans incurred after July 1, 1972, are \$30 per month. According to Decker the record of repayment on NDS Loans made to Idaho students is a good one. "Collections are handled by the Business Office and the rate of overdue loan accounts is 2 per cent. This is a very excellent record. I understand the national rate is substantially higher," he said.

Other Loans Short term loans and emergency loans

-Comment-

The ASUI requests the honor of your presence at its regular weekly meeting tonight at 7 p.m. in the Chiefs room . student union building If and when you stand in a voting booth and cast a ballot

today or tomorrow, you'll come face to face with a sheet of paper termed a referendum on athletics. This survey was passed through at the last senate meetng in an attempt to measure student interest in the Big Sky are also available to University of Idaho students through the Student Financial Aids office. About 420 students have been assisted by these two forms of loans so far this school year. A bit more than \$59,000 has been made available.

Short term loans are repayable in one to four months, according to Decker. There is generally a maximum of \$200 available under these loans and they are repaid at 3 per cent interest.

Emergency loans, as the name implies, are issued for periods of from several weeks to two months. These loans are interest free and can be obtained with a minimum of red tape if there is a substantial emergency need. The amounts available are generally small usually \$30 to \$50.

"The overall collection record on University-based loans is good. There are occasions when repayment plans get messed up, but readjustments can be made. In the very few instances where a student fails to meet the obligation, we can ask the Registrar to block his registration or release of grades and transcripts. The last resort is to turn the account over to a collection agency. We don't have to do this too often.

demolish all five buildings just because a boiler had blown out in the Black Student Union. Dr. Carter defended this on the grounds that it's much more economical to destroy all

the buildings at once, as it's difficult to build a parking lot in small sections. Carter stated in a memo to Roy

Eiguren replying to the various objections, on Feb. 16, that it would be economically sensible to repair the BSU building.

**Thirteen Residents** Presently there are about 13 people living in the houses according to the reports of various residents. One unit is occupied by two students, two units

are occupied by a student and his family, and one unit is occupied by a single student. According to Green, a "little old

lady" lives in one house, and "she said she was in favor of tearing the place down." The University has agreed to relocate her. One of the double units is occupied

by a non-student pair.

Willed by Stillinger

The houses were part of the estate willed to the University by Charles Stillinger who passed away last summer. According to Green, "Last fall the University took over the houses, about all we got from them was a gallon of paint. They tried to repair a leak in the roof, but I don't know how enthusiastic they were about it."

Green's unit is in good repair. "We had a fire 4-5 years ago here, so there's all new wiring, with electric heat. I understand this is the only one with new wiring." The plumbing is in good shape.

Rent on the Green's unit is \$50 a

month, with \$25 for electricity. His wife explained that as the cause of the heating. "There's no insulation." With \$12 for water, the monthly total is usually between 80 and 90 dollars.

Low-cost housing The figures point up one problem Eiguren has noticed, "What is your definition of low-cost housing?"

In line with this problem, Eiguren and others have recommended to Dr. Hartung that a President's Special Task Force be formed to investigate University housing. "The first priority would be an investigation of the Stillinger estate in particular."

According to Dr. Carter, this recommendation is a definite possibility, "I understand that Dr. such time as he does. Carter will not ask for bids or sign any contracts concerning the demolition.

#### Breakthrough

Eiguren termed this a "significant breakthrough." Another important change he noted was that the Campus Planning Committee who were cited as approving the proposal in Carter's first memo, had tabled their ··· They recommendation. unanimously tabled their recommendation that the houses be torn down until a more thorough investigation is made of the matter.

Which seems to agree with one student in the Stillinger units. "It's a real pity that they have to tear down to put up a damn parking lot. We need housing worse than we need a parking

Conference - one more time. Senator Casey promises that this poll will truly be used as Regent fuel - hopefully to get Idaho out of the Big Sky.

Eiguren, Fisher, Casey, and a guy named Al Graham put the referendum questions together. They give you a chance to answer yes - make the team self-sufficient, raise student fees for football, play BSC and ISU, and yes, for heaven's sake, get out of the Big Sky Conference. You also have the choice of saying no or holding no opinion.

Besides leading the questions a little towards the exit door, Eiguren and the boys just didn't make the ballot clear enough for the average student in their constituency. For those without a Big Sky background, here are the correct answers to the ASUI test:

- YES favor making the University's athletic program ESSENTIALLY self-sufficient financially. Essentially, because what is self-sufficient? Gate receipts and television just won't make it for Idaho. Getting out of the Big Sky Conference is a gamble that could help a lot.
- NO Don't favor an increase in student fees for the obvious reason that you are a student.
- YES Continue competition with BSC and ISU who has said anything about stopping it? It's tradition. And it's money
- YES Support efforts to get out of the Big Sky. The question, unfortunately, goes no farther than this. Where to go from here is not discussed and there are risks and doubts involved with bigger conference. It's an inadequate inquiry but for what it's worth, the Big Sky is a losing proposition.
- YES Of course, terminate Big Sky membership if it will make the athletic program self-sufficient. Send in your box tops if it will lower tuition too. One is not a guarantee of the other. Again it is a gamble, and one the ASUI seems anxious to try.

As a post script to athletics, the ballot contains a list of services for you to mark your favorites. The ASUI programs range from intramurals to the Birth Control Information Center, and you must mark the five that are most important to you.

Let's hope both sections of this piece of paper carry more weight than ASUI surveys of the past.

## Championship playoff scheduled tomorrow

After weeks of relentless elimination, aggravating defeats and unique victories, the intermural A basketball season inherits its two finalists.

Sigma Alpha Epsilon claims the title of greek champions in A basketball action, after defeating the Delta Chis for the honor. With an almost perfect record of ten wins and one loss, losing to the Phi Delta Theta's in sudden death play, the SAE's will try to take sole occupation of the roundall championship.

Most of the SAE team members have played together for the past few years, and have managed to develop some good outside shooting, but defense seems to be the key to their victories.

#### **A Strong Defense**

"We rely on a strong defense with a scoring punch afterwards," said Mike Newell, team member. "In the game against the Delta Chis, we went into a man to man defense, in order to stop their big men," Newell said.

"There's really nothing we do to get ready for a game," said Newell. The SAE's haven't had a team practice all year. "We use the better players in the house, those with shooting ability," he said. Newell is the biggest man on the SAE squad, breaking the tape at 6' 4".

SAE team members are: John Adams, Lon Stokes, Mike Newell, Gary Lefors, Rick Siefried, Don Ormond and Bucky Brun. Top scorer for the team is Brun, who averages approximately 15 to 20 points each game.

The other remaining finalist in A basketball play is Willis Sweet Hall.

÷...

#### Willis Sweet Hall

Settle state and the set of the set

Willis Sweet earned the honor of independent champion after defeating Upham Hall, in last night's game at the Memorial gym.

Willis Sweet relies on a strong defense, which depends on capturing the rebounds. The independent champs have a big team with three men at 6'6".

"I think our defense is outstanding because we rebound well," said Howard Crosby, team captain. Willis Sweet has an experienced team, with five veterans in intramural action. "We practice some and rely on our experience in our games," - said Crosby.

#### **Eight Wins Record**

The WSH team has a record of eight wins and no losses. "The average points scored against us is in the low twenties," stated Crosby. The Sweet makes effective use of its man to man defense. "We run man to man all the time," he added.

Willis Sweet team members are: Del Hammond, Daryl Hart, Howard Crosby, Dwight Sauin, Jeff Thomas, Bill Harrison, Charlie Prausa and Chuck Roady.

High point scorer for WSH is Howard Crosby, who averages 16.7 points a game. "We run some organized patterns, but try to keep it in close and shoot when we can," he said.

The deciding game in A basketball will be tomorrow night at 6:45 in the Memorial gym. Come out and watch a game that seems to be a defensive battle from the word go.

SIDP

Foreign study opportunities excursions, local transportation and

"Explaining Europe to someone who's never been there is like trying to explain college to a high school student," says Ellis Burcaw, U of I Study Abroad director. "Going to Europe is not like going to Yellowstone ... you're in a completely different world. The doorknobs are different, the light switches are different. It's a stimulation, a rejuvenation ... You not only learn about foreign cultures, you learn about your own. It opens your eyes.

This is how Burcaw describes study and travel abroad. For those students interested, the University of Idaho offers several opportunities.

Burcaw says, "Studying in another country is a very valuable experience and the University of Idaho is all for it. The registrar is very cooperative. They will lean over backwards to see that a student gets all of the credits he is entitled to from his foreign study.

We encourage foreign study and there are many ways a student can do it: on his own, through a study tour, through the Northwest Interinstitutional Council of Study Abroad (NICSA) and others," he added.

Some of these opportunities which Idaho offers include:

University of Idaho Study Tour - August 5-27. Three weeks in Italy, Switzerland, Austria and southern Germany. A comfortable, guided tour open to students and non-students. Can be taken for three hours of social science credit. NICSA - Courses in London, England and Avignon, France, for direct University of Idaho credit. Full information available on course offerings from now through spring of 1974. Sign up anytime for as little as one quarter to as long as you want. Six semester hours credit available for study in Archaeology and Geography

in London this summer

University of Idaho Charter Flight - June 4 to Aug. 9. Plan your own tour of Europe. Programs of other American Universities. There are many of these, of all types and in many different locations. In most cases, credit can be transferred to the University of Idaho. To be sure, check with your dean before you leave. Special and regular programs of foreign

universities open to American students. Ordinarily, credit can be transferred Your own travel and work plans apart

from a university.

Burcaw explained that those students wishing to go on the U of I study Tour for credit would enroll in a special correspondence course here at the university. The cost for the course is included in the tour cost.

'The course is specially designed to be an introduction to the tour," said Burcaw. "It will cover European history, some art history and some geography.

If the student is here on campus, he will be required to attend meetings prior to the tour. If the student is not on campus, he is not required to come to campus for the meetings

London, Avignon. 'Once in Europe," Burcaw continued, "the student taking credit would be required to attend all prescribed field trips. A report of his experiences would be written upon his return. For those taking the credit at the upper-division

## Idaho wrestling title

Idaho State University won the Big Sky Wrestling championships last weekend, amassing 85 points to edge Weber State, which collected 80 points.

The meet produced very few surprises. perhaps the biggest one being Montana State's third place finish. MSU's coach had earlier predicted a Bobcat victory by 25 points or more. Montana State eventually finished behind Idaho State by

21 points. The University of Idaho wrestlers could do no better than two fourth place finishes, to finish seventh place with 114 points.

Gonzaga finished in eighth and last place, with 0 points.

Mick Otto got one of the fourth place finishes, barely losing his consolation match to a Northern Arizona wrestler by a 4-1 score. The other Idaho fourth place finisher was Carl Hensyel, a 4-0 loser in his consolation match with a Montana State wrestler.

The Idaho wrestler with the brightest prospects in the meet, Greg Luna, sprained an ankle in a preliminary match, and was forced to forfeit his match. The wrestler who eventually went on to win that division title had defeated Luna earlier in the season by only a single point.

In winning the title for the 2nd straight year, Idaho State took three first places in the meet, three seconds, and two thirds. Weber State could win only one of five championship matches it entered, ending up with four seconds and two thirds.

The University of Idaho women's extramural swim team sponsored a meet Feb. 17. Those on the team are: Dianne Scott, Sarah Swinehart, Debbie Leone, Nancy Westermeyer, and Nancy Call. Nancy Westermeyer and Nancy Call qualified for this year's national swim meet, to be held at the University of Idaho March 16-18. Westermeyer and Call, according to last year's national times. would have ranked from nineth to twentysecond place in twelve different events. The winner of the meet on Feb. 17 was Oregon State with a total of 175 team points, followed by WSU with 165. Idaho with 79, and WWSC with 34 total team points.

The women's extramural basketball team played North Idaho College on Friday and due to cold shooting, the University of Idaho women fell to defeat 26 to 23. Saturday proved to be another bad day for Idaho as they lost to EWSC. The team travels to WSU tomorrow and to Walla Walla on Thursday for the Northwest "B" Tournament.

The extramural bowling team traveled to Pasco, Washington this last weekend for the Northwest College Women's Bowling Tournament. Out of ten teams entered, the University of Idaho placed third, with a total team score of 2422. Vicky Carter received an award for bowling an outstanding game of 203.

The PEMM Club went on a ski trip Sunday to Schweitzer Ski Area where they found the weather wet and the snow sticky. A Bicycle trip and picnic are slated as future activities for the Women's Physical Education Majors and Minors.

### What's worse than a tornado?

#### By LIZ WESTON and MIKE MORRISON **Argonaut Film Reviewers**

The simplicity of The Getaway is inherent in its title. It is nothing more than your everyday action-packed getaway, and at best a sort of poor man's Bonnie and Clyde. Sam Peckinpaugh has again included the theme of the innately violent nature of man which he popularized in such as Straw Dogs and The Wild Bunch, but in this film it is on a much more mechanical, blasse level.

Speaking of mechanical, the only trace of good acting in the flick is in the practically cameo roles of veterans Slim Pickens (gawd-dammn!) and Academy Award winner Ben Johnson (The Last Picture Show). Chic Ali MacGraw and her open-mouthed, blank stare can't even act like she's acting, and, in addition, Sally Struthers is built better than she is. Steve McQueen acts as he always acts-as if he's not really acting. He does, however, reveal an intimate acquaintance with cars, guns, and slapping women around, for what it's worth.

Perhaps the most appropriate part of the movie is when McQueen and MacGraw are deposited and compressed in a trash truck and taken to the local dump. The analogy is all too clear. On a comparatively deeper level, this particular point of action parallels the tenuous on-screen love affair between Ali and Steve which climaxes (so to speak) in the trashyard and continues uphill from there. The lovers seem to revive their love in this romantic locale, and, with their "hard-earned" cash, eventually effect the getaway relatively unscathed.

In the end, the film's title is further appropriate. It should reflect any rational person's most immediate desire after sitting through about half of the show.

### Limited budget cookery offered

The scene might have been any informal chat among a few housewives around a kitchen table.

"I save my dried bread and put it in a grinder; if you don't have a grinder, use a rolling pin," advised one woman. "And if you don't have a rolling pin, use

a coffee can, " added another. "Or a bottle works, too," said a third

woman. These three women actually were

meeting around a kitchen table. However,

Vandaleers set tour

The University of Idaho Vandaleer Concert Choir will take a Western Coast tour March 11-24. Forty women from the 65-member choir were chosen to go. The trip is sponsored by the ASUI and the Alumni Association. A speaker from the President's office will speak before each Vandaleer tour performance.

The tour was approved by the Alumni Association last October at the Homecoming meeting. Dick Johnston, alumni secretary, organized the tour.

The trip will include stops at Seattle, Portland, Ashlund, San Francisco, Los Angeles, Las Vegas and Lovelock, Nevada. Local tours will include, Lewiston, Kendrick, Grangeville, Orofino, Coeur d'Alene, Kellogg, Spokane and Boise. Transportation will be by chartered bus.

Alumni meetings will be held in conjunction with each Vandaleer concert. Glen Lockery, director of the Vandaleers, said that the Vandaleers will be used as a focal point to bring U of I alumni

it served as a podium in the living room of Talisman House, where "Cooking on a Limited Budget," a free university

course, meets every other Wednesday. The woman behind the "podium" was Julie Rolland, a home economist employed in the Food Services department of the university, who teaches the class on a voluntary basis. "I'm a community-minded person who likes to help others," she commented. "They (Talisman House) had a notice in the newspaper asking for instructors."

In Wednesday's meeting, Rolland and two local housewives, Dee Mitchell and Elise Mills discussed a variety of topics including nutrition, price saving techniques and meal-planning.

Rolland suggested that to save money, women should plan a week at a time for three meals per day. "Consider the amount you have to spend, then plan your main dish for the dinner first as this meal is considered most important by your family. After this, plan the other two meals to get in the remainder of the nutritional requirements."

The discussion turned next to food prices and, in particular, meat prices. Rolland noted that she no longer will buy steak even though she can afford it. "I'm interested in forcing prices down," she said. "I have a husband who hunts and we fish.

The buzz of a timer interrupted one discussion. A cheese souffle, prepared by Rolland, was taken out of the oven and given to class members and other around Talisman House. Rolland prepared the dish to demonstrate the use of cheese as a substitute for meat.

The class meets from 1:30 to 3 p.m. on alternate Wednesdays. The next meeting is scheduled for March

## Graphic design — Japanese style

Tsutmu Toguchi is a graphic designer and teacher from Osaka, Japan who feels that "Moscow in comparison to Japan is a Utopia.'

Toguchi spoke to a design class at the U of I last week and told them of his life and his art.

Toguchi said his work is strongly influenced by his homeland. It is symbolic of modern man and his polluted society. The majority of his work stresses time

and how little there seems to be. He uses clocks and numbers to make his point. He explained that in Japan everyone is always in a hurry and always busy meeting schedules.

"I feel that a picture reflects the artist's heart. In this way, my pictures can speak to all people. For example a musician

expresses what is in his heart through sound, a poet by words and the artist uses visual images. This expression of what is in the heart is a creative process." Creativity is art and through this creative process the artist can change common place objects into works of art, he added.

Tsutmu concentrates on-silk-screening because many times artists make only one original picture, and often this can be a barrier. "Sometimes we need to speak to many people and since prints make many originals of a work, we overcome this barrier.

He uses methods of mass communication as a vehicle to send visual messages to people. "Though we still have so many traditions, through mass communications everyone receives the same message. This is dangerous because people become the same personality and think the same ideas. To be human we must have different personalities. If modern people become the same through mass communication, this is humorous and nonsense, but I too am a victim of this mass communication," he said.

Toguchi added, "My work is about myself and my experiences in life and with other people. I always use these ideas of mass communication and modern people. My works speak of human nature and man in society

Toguchi, whose works are currently being shown at the gallery in Pullman, spoke through his interpreter Yukio Aki.

Paul Butterfield plays blues rock Saturday

By Denny Eichorn & Christ Vlachos Paul Butterfield, internationally famous blues-rock musician, will appear at the University of Idaho with his Better Days Blues Band on March 3rd, at 8:00 p.m. in the Memorial Gymnasium. The live concert will be presented by the Talisman Project in co-operation with

Woodstock and the Monterey Pop Festival, as well as Fillmore West-Fillmore East.

This concert offers the University of Idaho-Moscow community another alternative to the Big Name Entertainment problem. The majority of U of I students have shown that they will

event, and a large mat will be placed on the gym floor, with no chairs. Committee members voiced mild concern about the mat, and advised students to treat the performance as a concert, rather than a dance. In other words, don't dance on the mat with your shoes on. It won't take much of a beating, and it's not fireproof. Talisman Project will provide security

The Women's Center's Brown Bag Series is entitled "Day Care: Do We Need It or Not?" The discussion begins at noon in Ad 201B. The public is invited.

Noon Bible studies are from 12 to 1 a.m. and 1 to 2 a.m. each day at the Campus Christian Center. Today's topic is the Gospel of John, Wednesday's: 2 Timothy, and Thursday's: | Peter.

Intervarsity Christian Fellowship will have a meeting at 6:45 p.m. in the SUB.

Vandal Mountaineers will have a meeting e\* 7:30 p.m. in the SUB Dipper. Basic mountaineering knots will be discussed. Everyone is welcome.

College Life will meet at the Kappa Alpha Theta house at 9 p.m. The meeting is open to all students and faculty.

#### Wednesday -

Behavioral Science Seminar will have a meeting at 3 p.m. in the UCC 328. Dr. Roderick Sprague, Head of the Department of Sociology/Anthropology, will be the first speaker, presenting "Burial and Cremation: Truly Alternatives?"

Abe S. Ashcanase, executive officer for the United States Agency for International Development in Afghanistan will speak at 2 p.m. in the SUB. All students and faculty are welcome to attend. Ashcanase has been instrumental in many humanitarian efforts of the USAID.

#### Thursday -

The regular meeting of the Plant and Soil Sciences Seminar will meet at UCC 108. 4th period. Interested persons are invited.

The Soccer Club has a meeting at 7 p.m. in the SUB. Players that want to play in the WSU game and cannot attend the meeting should contact the coach. The game is Sunday at 2 p.m. in the WSU stadium.

Baha'i Club will have a meeting at 7 p.m. in the SUB. Everyone is invited.

Alpha Phi Omega will have a meeting at 7 p.m. in the SUB. Check the information desk for the room.

Bible study will meet at 7:30 p.m. in the conference room No. 2, Wallace Complex.

Anyone interested in studying Phillipiens is welcome to come

Applications being taken for student advisors for Freshman Orientation can be obtained in the Office of Student Services UCC 241. The deadline is March 1.

#### Coming Up -

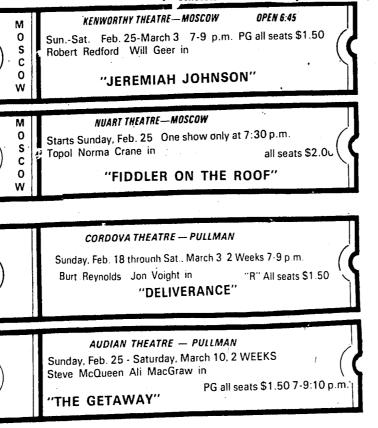

Deadline for applications for the National Student Exchange Program is Friday, March 2.

March 2 through 4th a CHORD workshop will be held for married couples only, to train couples how to "fight fairly". Tuition is \$25.00 a couple.

A big thanks is in order to all those who came and made our annual Basque Dinner such a big success. Along with a special thanks for those who helped. Esuerriai GASXOE! (A warm Basque Thank you) Gratefully, Mary Louise Aguirre.

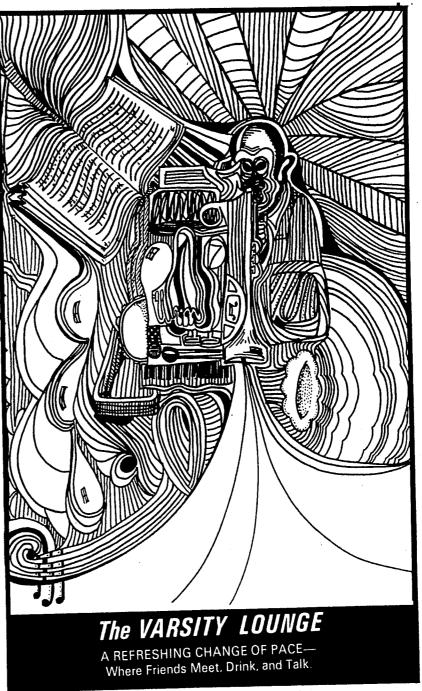

AUM Productions. Tickets are now on sale at the University of Idaho SUB Information Desk, Washington State University's CUB Listening Lounge, and Factory Sound Center, 610 S. Main, in Moscow. Prices are \$2.50 in advance, and \$3.00 at the door.

Paul Butterfield's Better Days have just released a new album, "Better Days,)) on Bearsville Records, and are now on the first leg of their world tour. Their swing through the northwest includes concerts in Spokane, Moscow, Portland, Seattle, and Vancouver B.C. The group has been sequestered in Woodstock, New York, for the past few months, rehearsing and recording. They are managed by Albert Grossman, the high-octane manager who propelled Bob Dylan and the Rolling Stones to stardom. Besides Paul Butterfield, the group includes Geoff Muldaur, Amos Garrett, Ronnie Barron, Billy Rich, and Christopher Parker. Butterfield himself is probably the best-known blues harmonica player in the world, and has performed and recorded with virtually every significant blues musician in the country during the past decade, including Michael Bloomfield, Buddy Miles, Elvin Bishop, Muddy Waters, Sam Lay, Don Dunn, Nick Gravenites, Little Walter, and dozens of others. Butterfield has performed at hundreds of festivals and concerts in the last few years, including

support major entertainment productions, as evidenced by the large turn-out for Blood, Sweat, and Tears. However, ticket prices must be reasonable, and the big name must really be a Big Name. Talisman Project, by arranging to present this group, has shown real initiative. They have contracted a 90-10 split with AUM Productions, and will put their proceeds into their Emergency Fund.

The Facility Use Committee has authorized use of the gymnasium for the and maintenance for the concert, and Project members have asked that students be aware of University regulations regarding smoking and drinking in the gym. If the community wants a place to have Big Name Entertainment, they'll have to settle for the gym. There's just no other suitable facility in the area. So, let's hope things are mellow for this concert. It would be nice to see more concerts of this nature..say, one a month.

### Tuesday, Feb. 27, 1973 THE ARGONAUT Meat price guide for Moscow area

### By KENTON BIRD Argonaut Staff Writer

Meat prices have increased drastically the past two months, and the Moscow area hasn't been spared from the onset of higher prices.

In a recent shopping trip in Moscow and Pullman, the Argonaut found that meat prices are as high as they've ever been. And some items were even higher than they were at the time a similar survey was made by the Intermountain Observer just a month ago,

Prices were checked for one pound of T-Bone steak and one pound of the cheapest ground beef. And with just a few exceptions, the price was \$1.89 a pound for the steak and \$.79 a pound for hamburger.

The Safeway stores in both Moscow and Pullman had T-Bone steak for \$1.79 a pound, while Clyde's IGA had hamburger for \$.75 a pound.

Steak was \$1.89 a pound and hamburger \$.79 a pound at Modern Way Thrift and Rosauer's in Moscow,

E WERE THINKING, PERHAPS ONE MEATLESS DAY PER WEEK

and at Dissmore's IGA and Rosauer's in Pullman.

And even at Trent's Grocery and Meats, an old fashioned meat market in Pullman, no relief was found; it was \$1.89 for T-Bone and \$.79 for hamburger.

#### **Observer's Survey**

Moscow prices were surveyed by the Intermountain Observer in early February and showed hamburger was less expensive than at all stores, with the exception of Clyde's where it was the same. Modern Way's hamburger was \$.75 a pound then and Safeway's was \$.77. But Rosauer's, who boasted a \$.64 a pound price for hamburger Feb. 1, had raised their price a whopping \$.15 a pound.

For T-bone, prices were up \$.10 from \$1.79 at Clyde's and Rosauer's; while at Safeway, the price was actually \$.10 lower than a month ago. Warehouse Foods in Moscow does

not carry meats. **Lewiston Viewed** 

The Intermountain Observer also included prices from Lewiston, and they were considerably less than Moscow prices at the time their survey was made. One pound of T-Bone was \$1.59 at Albertson's, \$1.69 at

ا الألار الألار الألار كان كان كان كان كان الألج كان في عن ع ا الله الله بيه جد حد م T-BONE 1 lb. Cheapest Ground Beef 1 lb. MOSCOW Feb. 1 Feb. 26 Feb. 1 Feb. 26 Clyde's IGA \$1.79 \$1.89 \$ .75 \$ .75 Modern Way Thrift 1.89 1.89 .75 .79 Rosauer's 1,79 1.89 .64 .79 Safeway 1.89 1.79 .77 .79 PULLMAN **Dissmore's IGA** 1.89 .79 Rosauer's 1.89 .79 .79 Safeway 1.79 Trent's Grocery & Meats 1.89 LEWISTON Albertson's \$1.59 .73 Buttrey's 1.89 .76 Safeway 1.69

ا اللہ اللہ الباد کار کے ایک بری ایج کے بارے پر

Safeway, and \$1.89 at Buttrey's. Hamburger was \$.73 at Albertson's, \$.76 at Buttrey's and \$.77 at Safeway. But these prices, too, have probably gone up in the last month.

While meat prices are high, Arthur Burns, chairman of the President's Council of Economic Advisers, has urged Americans to eat cheese instead of meat one day a week.

**Cheese Costs More** 

Just out of curiosity, the Argonaut checked the price of cheese. The cheapest we found was \$1.11 a pound for mild cheddar cheese-more expensive than hamburger.

So for meat-eating Moscowites, it doesn't look like there's any relief in sight.

## Forest service seeks public reactions on plans for use of White Pine area

#### By Sam Schrager

The wishes of local people will be "the critical factor" in choossing a management plan for a large piece of country on either side of the White Pine Drive, according to Vic Standa, Resource Assistant for the Palouse Ranger District.

Alternatives range from keeping the unit in much its present condition for high recreation use, to developing it intensively for maximum timber production. There are choices in-between.

The future of big game in the unit is also at issue. If the public chooses, certain key areas can be managed for elk and deer winter range.

The 32,500 acre area, known as the White Pine Planning Unit, has its south edge near Laird Park, northeast of Harvard. On the north it is bounded by the Palouse Divide Road. A little more than half of the land is owned by the Forest Service.

At this stage of planning the Palouse District has prepared five general management options for the public's consideration. An open meeting will be held this Wednsday, February 28, at 7:30 p.m. in the Borah Theatre, U of I SUB, for people to ask questions and make their recommendations.

Vic Standa emphasized that the Forest

I'm almost begging for them.'

The White Pine Planning Unit is the first to undergo long-range planning on the Palouse District.

In the past it has been favorite local recreation country, because of its proximity to Moscow-Pullman and relatively undeveloped condition. Activities are day-use oriented, including camping at Giant White Pine Campground, hiking, horseback riding, berry picking, hunting, snowmobiling, cross-country skiing and just plain looking/

Many do not realize that the area has a fairly extensive trail system, partly abandoned, which is not indicated on most maps. The trails pass through old second growth and some virgin timber, virtually uncrossed by roads except at the trailheads.

Big game in the unit is now endangered by a decline of winter forage. State game biologists who are fighting the same problem in the Selway-Lochsa country have located the key winter range on the unit. If it is going to be managed for big game, they prescribed clearcutting certain slopes over a period of years, then burning them occasionally to stimulate the browse.

There is an estimated 265 million board

looking for reactions from people. In fact . Palouse District as a whole. If logged, many types of cutting would be done, depending on conditions.

> One point that all the plans agree on is to preserve a white pine corridor on either side of Highway 95A.

> Beyond that, all Forest Service land on the unit would be intensively managed for sawtimber under Alternative "B". Trails would be eliminated during logging, and land would not be set aside for winter game range. Few roads would be maintained for public use.

The unit would be managed mostly for sawtimber and winter range under Alternatives "B" or "C". A screen of trees would be left on either side of maintained trails for 100 feet in "C", while logging would proceed without regard for trails in "B."

After harvest, the public would have access to the area on trails and logging roads. A parking lot and a picnic site would be developed in "C". The allowable cut in either plan is almost 2.6 million board feet a year.

The unit would be almost entirely preserved for recreation and big game range under Alternative "A". All abandoned trails would be reopened, and 3000 acres would be managed as a roadless area where all non-motorized activities would be permitted. Trail construction and very limited cutting would be done only to enhance recreation.

Finally, part of the unit would be preserved for recreation and game range while the rest would be developed for sawtimber under Alternative "E" Country east of White Pine Drive would be managed under Plan "A", while country west of the highway would be managed under "C". The annual cut would be 1.25 million board feet.

Modifications of these proposals are welcomed. Copies of the alternatives may still be examined at the Forest Service building at the south end of Moscow

During March recommendations can be sent to the Palouse Ranger District, Potlatch, Idaho, in letter form.

## **Snowfall not** problem

areas have been scraping the

bottom of the bucket, and boy

scouts have had to sleep on top of

the snow on overnight outings

because there wasn't enough snow

In 1972 the state had an average of

160 per cent of our usual annual

precipitation said Molnau. "We had

water left over from last year. so

the small amount of precipitation

this year won't be terribly serious,

However, if next winter is dry also.

In previous years, according to

Molnau, the snow covering has

prevented much of the ground from freezing. This year, the ground is

frozen more than usual because of

the cold temperatures in December

and January. If a heavy rain season

comes in March, there will be flood

possibilities. The rain wouldn't soak

into the ground, but would instead

run on top of the ground, and quite

possibly cause flooding. As a

matter of fact, people around Mud

Lake are taking precautions in case

Dr. George Belt Jr., chairman of

the faculty council, is concerned

with the erosion aspect. If the area

is clearcut of trees and the ground

is frozen, the water flows more

quickly to the stream. With an

excess of silt in the stream, it could

be detrimental to the fish and the

minimize this problem, but if the

ground is clear and the loggers go in

earlier, then that could increase the

erosion problem immensely."

this happens," he said.

4

we may have some problems.

to dig a cave in.

"The absence of precipitation this winter is not going to have any measurable effect on wild plants, according to Fred Johnson. agriculture engineering professor. "We've got Ponderosa pines instead of palm trees because they are

adapted to this kind of winter.' He explained that wild plants can only use so much water, and right now are using very little. When the spring run-off comes, the water runs into the soil to sustain plant life through the growing season. "Generally speaking, we have a hell of a lot more snow water than the amount for saturation, and this generally is far less than the average amount of snow melt we have.

Some people will look at the light snow pack and say that it will cause a heavy fire season this summer. "It's just not that simple," claimed Johnson. "Lots of hot weather and lots of lightning combined with an absence of moisture is what causes a heavy fire season. As a matter of fact, in southern Idaho, a lot less rain will give less growth in range grasses. If they dry out, there will be less grass, and fewer range fires.

The wild plants may not be affected, but, according to Myron Molnau, assistant professor in agriculture engineering, several effects of the dry winter have been witnessed statewide. The wheat crops have been damaged due to a lack of insulation the snow cover provides, the grapes in southern Idaho have been hit hard, the ski

## Snow shortage

(Continued from page 1) Everson said. "If it were frozen when the rain fell it couldn't sink in so the question, is, how much good is the precipitation we've had going to do?" Looking forward to March and April's

precipitation possibilities, a study by the university shows that an average of 2.07 and 1.64 inches falls in those months

said "There isn't much a farmer can do,"

Futter said. " He can plow the soil, plant the seeds and watch them grow but he can't make it rain or snow. He just has to do his best and then go to church and pray a lot.

We'll meet with college seniors

Jetliner orders have come faster

have application in desalination atment of industrial and

Service does not now favor any of the options, and will not until the public has been heard. "They are all viable alternatives to us," he said. "We are

feet of sawtimber on Forest Service land in the unit, and the timber industry is interested in it. The quality and amount of timber is typical of that found over the

## Student police force to be considered

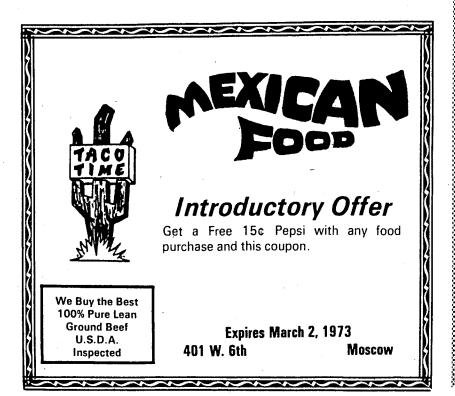

The Student Safety Committee will meet tomorrow at the SUB at 7 p. m. to consider adding more students to the committee. Visitors are welcome and encouraged to attend the meeting.

The committee is composed of two students, two staff members and is supposed to include a Moscow Police officer, which it presently lacks. The idea to add more students was recently approved by the Committee on Committees of Faculty Council.

The Student Safety Committee was organized to study the feasibility of Student "security" force available for student needs as they may arise. It is hoped that such a force can be institued at the university to provide an efficient and viable group of students who realize the importance of security in other areas such as concerts, sports and special events, dormitory and Greek housing security said Tim Hart, Chief of Security and Chairman of the committee. Hart said student imput in such a program is "a must."

"Numerous possibilities for far-ranging ideas can be determined by the student committee, said Hart. "A similar situation that was set up at the University of Alabama could also work for the U. of

They used the campus police to supervise discipline at football games, concerts and any large gathering of students. These police also provided equipment to help stalled or troubled cars get back on the road. Their present 6 man force writes parking tickets, checks buildings and investigates crime reports. Hart urges interested students to attend the meeting to find out all the opportunities for campus police control.

and graduate students campuses this spring.

We're listening. To what new engineers and computer science graduates have to say. About their goals. About their professional responsibility to Spaceship Earth.

We're also talking. About the opportunities at Boeing this year. And the years that follow.

Frankly, we want the brightest graduates in the country to be inspired by our work and the Boeing environment. To feel a compatibility. And to rank Boeing as No. 1 job choice.

Before we get together, you should know a little about us. Naturally, much of our business is related to the airline industry.

from the 727-200 have passed the 1000 mark. We've sold ten 707s to China. The 747 continues to be queen of the sky. And we're looking into a brand new jetliner now labeled the 7X7.

Boeing is involved in a number of defense programs, space projects, development of a short takeoff and landing (STOL) aircraft, and missile and helicopter production.

Boeing Computer Services, Inc., is concerned with general business and financial systems, medical systems, automated manufacturing techniques, inventory management, scientific and engineering problem solving techniques and computer operating systems. We have also started programs on: 1) people movers to help unclog traffic problems in cities: 2) hydrofoils to move people and freight over water faster;

3) reduction of aircraft noise; and 4) pollution control processes that waste. We are also at work on programs that can lead to better understanding of this planet's natural resources.

If this sounds like the kind of equal opportunity employer you're looking for, let's get together at the Placement Office.

Our interviewer will be on campus next week interviewing EE, ME and CE graduates.
