

Idaho Argonaut

Tuesday

Nov. 26, 1974
Vol. 79, No. 25
Moscow, Idaho

Mike Hebling

Winter arrives

Winter arrived in the Palouse over the weekend. Although most snow in Moscow melted by mid-morning Saturday, things were still chilly on Moscow Mountain when this photo was taken.

It looks like more of the same, too. The forecast for this week calls for increasing clouds with snow in the higher elevations. Lows 20s to low 30s and highs from 38 to 48.

He's not mad

Arthur Rourke is a scientist who enjoys fly-fishing in the streams of Idaho. Find out about his research on muscular dystrophy as well as his personality in today's centerspread.

Taking it all off...

If you think you're having turkey for Thanksgiving, cast a glance at page 11, where the Argonaut's cartoonists unleash a full page of comic strips to celebrate the holiday.

It's a dog's life

The Argonaut has gone to the dogs. Kathy Deinhardt and some campus canines tell you about a dog's life on campus on page 5.

Concert control problems are discussed

More control at concerts was the concern of a number of people at the U of I before the Fleetwood Mac Concert last week. The four different views are identical in some cases and not so identical in others. The four views are from Campus Security, Entertainment Committee, the SUB manager and from Talisman House which was in charge of the "t-shirt brigade" at the concert.

The Fleetwood Mac concert was the first concert this year that provided chairs for the masses to sit, the first concert to have uniformed police present, the first concert to print on the tickets "No Smoking No Alcohol."

Ed Schmitz, the new head of Campus Security, said the two main reasons for the new procedures were "to insure the safety of the people attending and to cover the liability of the University."

Schmitz said the reason for the chairs was because the Earl Scruggs concert crowd was "completely out of hand and there was no mass exit possible." Schmitz doesn't feel the chairs dampened the atmosphere of the concert.

Quorum may be lacking for senate meeting

A bill to reimburse Dean Johnson for buying extension cords for the Blue Mountain IV project will again be submitted to the senate if there is a quorum present tonight at 7 p.m.

The reimbursement request was turned down but resubmitted to the finance committee, and that committee has this week returned it to the senate, along with a resolution condemning Denny Eichorn's action of promising Johnson reimbursement.

Senator John Rupe said

"There is more to a concert than the people on the stage but it is not to raise hell," said Schmitz. The security chief added, "As far as I am concerned festival (open floor) seating has come to an end at Idaho."

Entertainment chairman Rich Brown said the new procedures were "the result of an overall concern to relieve the administration of responsibility of 'no-control' concerts." Brown said "the reason for the police is to legitimize glass control and guard the cash box, not control the crowd."

"Concerts are here to stay and we will always seat the most appropriate way," commented Brown. "We live in a sheltered and liberal community so we can't institute bias control," said Brown. "The policy before has always been to ask the people 'cool it' but now it seems to be changing more to a policy of 'squelch it'," Brown said.

"Entertainment has always had a good relation with the administration and our goal is to provide secure concerts as always," said Brown. "I feel there was more of a potential hazard with the seating at the concert."

Dean Vettrus, SUB Manager, says "It was a more secure situation with the police there and they will probably continue to be there in the future." "I've been to all three concerts and I think the best one was Fleetwood Mac," commented Vettrus. "Seating arrangements will probably be determined

before each individual concert. There could have been more continuity at the concert if there would have been an earlier start."

"The official purpose of the 't-shirt' brigade was to remind people not to smoke and to try and curtail the use of glass containers," says Bob Cameron of

the Talisman House and head of the 't-shirt' brigade. "Given the deplorable physical facilities we did a good job," said Cameron.

The police are needed at concerts. They can provide a form of rapid communication in an emergency," Cameron said.

Tape recorder issue on tap for council

Faculty Council will consider the restructuring of the audio-visual facilities on campus at their meeting this afternoon in the Faculty Office Building.

A faculty committee on

audio-visual facilities recommended earlier this year that a central agency be created to keep track of all audio-visual equipment. The council will consider creating a committee to implement

the recommendations.

The council will also be considering a motion by council member David Warnick that would allow students to use tape recorders in class if the

tapes are only for students use. The motion, which was introduced in a memo dated Nov. 22, may be referred to committee at today's meeting.

Action to possibly change the procedure for publishing the campus directory will probably be postponed tomorrow, because directory publisher Scott Hanford will not be attending the council meeting. When the council does consider the question, publishing rights may be taken away from the Blue Key Honorary, who has failed to meet its publication deadline for the last three years.

In other business the council will consider amendments to already approved guidelines for the termination of employees during time of financial emergency and suggested guidelines for the use of language in University publications.

Media head interviews to be held by Board

Communications Board will be holding interviews for various media heads Wednesday and Thursday, Dec. 4 and 5. Interviews for the following

positions will be open: Argonaut editor, KUOI station manager, and handbook editor. Applications can be picked up at the SUB information desk and the ASUI offices, according to Dave Carlson, Communications Board Director.

Applications should be completed and returned to the ASUI offices by Tuesday, Dec. 3. No special qualifications are necessary, Carlson said. Interviews will also be held for

one Communications Board position, 7 p.m. Monday, Nov. 25, in the SUB.

Communications Board represents the various media in such areas as budgeting, as well as overseeing relations between and within the media.

Applications are also available for one position on Communications Board, Carlson said.

A vacancy was created when Peggy Bennett, a member since last spring, resigned because of illness.

More information is available from Carlson at the ASUI office.

Statement of ownership

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Act of August 12, 1970: Section 3685, Title 39, United States Code)

1. TITLE OF PUBLICATION: THE IDAHO ARGONAUT

2. DATE OF FILING: NOVEMBER 4, 1974

3. FREQUENCY OF ISSUE: Twice weekly on Tuesdays and Fridays, September through May except during examination and vacation periods.

4. LOCATION OF KNOWN OFFICE OF PUBLICATION: Argonaut Business Office, Student Union Building, University of Idaho, Moscow, ID 83843.

5. LOCATION OF THE HEADQUARTERS OR GENERAL BUSINESS OFFICES OF THE PUBLISHERS: Argonaut Business Office, Student Union Building, University of Idaho, Moscow, ID 83843.

6. NAMES AND ADDRESSES OF PUBLISHER, EDITOR AND MANAGING EDITOR PUBLISHER: Associated Students of the University of Idaho, Student Union Building, University of Idaho, Moscow, ID 83843. EDITOR: Kenton Bird, Argonaut Office, Student Union Building, Moscow, ID. MANAGING EDITOR: Susan Thomas, Argonaut Office, Student Union Building, Moscow, ID.

7. OWNER: Associated Students of the University of Idaho, Student Union Building, University of Idaho, Moscow, ID 83843.

8. KNOWN BONDHOLDERS, MORTGAGEES, AND OTHER SECURITY HOLDERS OWNING OR HOLDING 1 PER CENT OR MORE OF TOTAL AMOUNT OF BONDS, MORTGAGES OR OTHER SECURITIES: None.

9. TITLE OF EDITOR, PUBLISHER, BUSINESS MANAGER, OR OWNER: Carol Harbin, Business Manager, Student Union Building, University of Idaho, Moscow, ID 83843.

10. THE PURPOSE, FUNCTION, AND NONPROFITS STATUS OF THIS ORGANIZATION AND THE EXEMPT STATUS FOR FEDERAL INCOME TAX PURPOSES has not changed during the preceding 12 months.

11. EXTENT AND NATURE OF CIRCULATION: (A) AVERAGE NUMBER OF COPIES PRINTED EACH ISSUE DURING PRECEDING 12 MONTHS: 7,000.

ACTUAL NUMBER OF COPIES PRINTED OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE: 5,000.

(B) AVERAGE PAID CIRCULATION EACH ISSUE DURING PRECEDING 12 MONTHS THROUGH SALES TO DEALERS AND CARRIERS, STREET VENDORS AND COUNTER SALES: 4,855. ACTUAL PAID CIRCULATION OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE THROUGH DEALERS AND MAIL SUBSCRIPTIONS: 249.

(C) AVERAGE TOTAL PAID CIRCULATION OF EACH ISSUE DURING PRECEDING 12 MONTHS: 180. ACTUAL TOTAL PAID CIRCULATION OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE: 4,904.

(D) AVERAGE FREE DISTRIBUTION BY MAIL, CARRIER OR OTHER MEANS EACH ISSUE DURING PRECEDING 12 MONTHS: 6550. ACTUAL FREE DISTRIBUTION BY MAIL, CARRIER OR OTHER MEANS OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE: 58. AVERAGE NUMBER OF COPIES DISTRIBUTED TO NEWS AGENTS, BUT NOT SOLD: 280. ACTUAL NUMBER OF COPIES DISTRIBUTED TO NEWS AGENTS, BUT NOT SOLD: none.

(E) AVERAGE TOTAL DISTRIBUTION OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE: 6970. ACTUAL TOTAL DISTRIBUTION OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE: 4,980.

(F) AVERAGE NUMBER OF COPIES EACH ISSUE DURING PRECEDING 12 MONTHS THAT WERE FOR OFFICE USE, LEFT OVER, UNACCOUNTED FOR OR SPOILED AFTER PRINTING: 30. ACTUAL NUMBER OF COPIES OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE THAT WERE FOR OFFICE USE, LEFT OVER, UNACCOUNTED FOR OR SPOILED AFTER PRINTING: 40.

(G) AVERAGE TOTAL NUMBER OF COPIES EACH ISSUE DURING PRECEDING 12 MONTHS: 7,000. ACTUAL TOTAL NUMBER OF COPIES OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE: 5,000.

I certify that the statements by me above are correct and complete.

(Signed, Carol Harbin, Business Manager, Idaho Argonaut, Student Union Building, University of Idaho, Moscow, ID 83843.)

Students voice opinions in ISL referendum

U of I students overwhelmingly desire a change in present tenant landlord laws according to the results of this year's Idaho Student Lobby referendum.

The students taking the survey were asked, "Do you favor a change in the present Idaho landlord-tenant law to provide an equal agreement between parties, and to state the obligations and duties of both tenant and landlord?" 86.4 per cent of those responding said "Yes."

Other questions, and the results were:

Given the limited resources of the Student Lobby (time, personnel, money, experience) how should the ISL best direct its efforts during the coming year?

Work only on higher education issues and other areas—27.0 per cent

Work primarily on non-educational issues—2 per cent

Work only on higher education issues—16.7 per cent

Work primarily on higher education issues and on a limited number (1-3) of issues of general concern to students. (Landlord-tenant law, land use planning, beverage container deposits, etc.)—54.4 per cent

What are the highest priority items within the higher education budget that the lobby should work hardest to change during coming year? Check two.

- a.) increased faculty salaries—9 per cent
- b.) more new buildings—6 per cent
- c.) the improvement of undergraduate teaching programs—31.5 per cent
- d.) increased student financial aid programs—24 per cent
- e.) new or expanded graduate and professional programs—10.5 per cent
- d.) expanded state support of departmental research—5.5 per cent
- f.) new or expanded vocational-technical programs—13.5 per cent

It has been stated that one barrier to equal access to higher education is the lack of child day care centers to care for the children of students. How would you rate the priority need for the centers as compared with other student needs?

High—11.2 per cent
Average—50.1 per cent
Low—38.7 per cent

A beverage container deposit bill will be reintroduced this session. This environmental bill provides for a deposit on all beverage containers. Do you favor such a measure?

Yes—79.7 per cent
No—20.3 per cent

Do you favor a locally controlled, locally originated, state assisted Land Use Plan?

Yes—79.7 per cent
No—20.3 per cent

Should Idaho adopt a presidential primary election in May to permit people to help select delegates to the national nominating convention of each party?

Yes—76.5 per cent
No—20.3 per cent

Possession of under three ounces of marijuana in Idaho is a misdemeanor, punishable by a fine of up to \$1000 and one year in jail. Possession or sale of more than three ounces of marijuana is a felony, punishable by up to five years and \$15,000. Which of these options do you most agree with? Select one.

- a.) Possession of any amount of marijuana should be a felony—5 per cent
- b.) the present law is adequate—23 per cent
- c.) possession of any amount should be a misdemeanor, with the maximum of one year and \$1000—12 per cent
- d.) possession of under one ounce should carry no jail sentence and only a minimal fine of up to \$200—30 percent
- e.) marijuana should be legalized—29 per cent.

The survey was administered by ASUI Senator Greg Casey and the Frosh Council.

The Idaho Student Lobby attempts to represent Idaho college students in the state legislature. During the last three years, ISL has promoted many student oriented bills on the basis of the survey.

Gagon readies campus for winter

Wearing sweaters indoors and turning thermostats as low as possible will be as necessary this winter as last year.

So anticipates George Gagon, director of the University of Idaho physical plant, the man who prepares the campus for winter's onslaught.

The fuel bill, normally between \$315,000 and \$350,000, will run 15-20 per cent higher this year than it would under normal cost and supply conditions, Gagon expects. Ralph McBride, chief of the central power plant, agrees.

The U of I uses three fuels—coal, oil and gas—and all three are affected by the national economic situation, McBride said.

"There is a coal car shortage and coal miners' strike reducing

supply, and the Wyoming coal fields' are giving the eastern plants preference over us. There wasn't much coal last year, and it looks like we can't get it at all this year," McBride said. Referring to recent newspaper predictions by the Washington Water Power Co., McBride reasons that an overall Northwest gas shortage would affect the U of I as well.

"Also, we are heating more space," he said, due to recently completed structures such as the Performing Arts Center.

Getting ready for winter on a large scale involves many chores familiar to the average home owner: leaf disposal, storing garden hose and winterizing vehicles.

Leaves—tons and tons of them—must be cleared away

and disposed of in some way other than burning, prohibited by anti-pollution laws. Many are hauled to campus compost heaps, but most are mulched right where they fall, according to Hank McNeel, grounds superintendent.

When the snow arrives, McNeel has around 12.6 miles of sidewalks to be shoveled and 9,250 feet of steps which must be kept clear.

"We divide our work and that helps. The janitors handle the steps and ground crews take over from there to do the sidewalks. The trouble is the steps all have to be shoveled by hand, it takes a long time to do that, and if we get two storms back to back, it piles up pretty fast," McNeel said.

Know why we carry Advent speakers? Because they're terrific, all three of them. You can spend a tubful of money and not do nearly as well.

The reason that Advent speakers, largely on the strength of word-of-mouth advertising, have become the standards of value in the stereo business is that they do exactly what they are represented to do.

They weren't designed in imitation of anyone else's, or to make a broad line of speakers with entries every ten dollars or so to make sure to get everyone's money. What they do is what you really hoped for, at a price that's less than you expected to pay.

There are three Advents. The original, which costs \$1 to \$2 depending on cabinet finish, was designed to compete with the most expensive speakers in every audible respect for a fraction of their price. The Smaller Advents, which

cost \$3, have the same range as the originals (not close, but the same) and essentially the same sound, but they won't play quite as loud. The new Advent/2's, which cost \$4, come within a half-octave at the bottom end of the other two (plenty low enough for the heaviest rock stuff and virtually everything else), and are the lowest-priced speakers you can find with absolutely convincing overall sound.

Now. The way Advents help us to set things up, we can offer three systems - at \$5, \$6, and \$7 based on the original, the Smaller, and the Advent/2. Each one of them has a good reason for being that's based on people's real needs and each one of them is unbeatable at, or anywhere near, the price.

ISL missed

The Idaho Student Lobby has missed.

They missed a chance to get true student input in setting priorities for lobbying efforts in the legislature.

For instance, the ISL set the following priorities at its fall meeting last Friday:

- The higher education budget.
- Student financial assistance.
- Changes in the landlord-tenant law.
- Environmental legislation-including land-use planning, and a ban on no-deposit, no-return containers.

The annual survey contained many poorly-written leading questions. For instance, it asked if students and faculty members should be on the Board of Regents—one of the greatest non-issues around.

It appears that the group decided beforehand on what to push and then conducted the survey. For instance, one leading response went like this: "(the ISL should) work primarily on higher education issues and on a limited number (1-3) of issues of general concern to students. (Landlord-tenant law, land use planning, beverage container deposits, etc)"

Certainly land-use planning is needed-but it's not an issue the Idaho Student Lobby should spend any of its limited resources on. This year's survey showed 84.8 per cent of the students favor a "locally controlled, locally originated, state assisted land use plan."

But this figure is misleading since only 82 per cent of those asked responded to the question—the lowest response of any question.

The ISL Survey should have asked really pertinent questions, such as: "Should Idaho institute kindergartens, even though this will mean less money for higher education?"

In addition, the survey should have provided space for comments.

The ISL needs to open up.

Other papers say...

"Advertisement is put up for a purpose. If the boys and girls must rip off the posters I cannot understand why they can't wait until after the event."

US and USSR now in cool war

Cool War: The United States and the Soviet Union are preparing for a momentous conflict over Western Europe. The Kremlin believes that the threatening economic breakdown will make Western Europe ripe for revolution. There is open talk in Moscow about the defeat of capitalism in Europe.

Mikhail Suslov, the No. 2 man in the politburo, has taken charge of the undercover operations in Western Europe. He has already strengthened the Kremlin's ties with the Communist movements in Spain, Portugal and Italy. His aim is to take advantage of Western Europe's economic troubles to bring the Communists to power.

Washington is fully aware of the Kremlin's activities and is taking measures to prevent a Communist takeover of Western Europe. The word has gone out to our European allies that the Soviet-American detente doesn't mean they should relax their vigil against Communism.

Secretary of State Henry Kissinger, during his recent visit to Rome, urged Italian leaders not to admit the Communists into a coalition government.

Jack Anderson

Kissinger's strong opposition reportedly prevented an accommodation between the Christian Democrats and the Communists.

Both Washington and Moscow, meanwhile, are still pushing peaceful coexistence. But behind the scenes, they are girding for a new "Cool War" over Western Europe.

Meanwhile the new Congress, with its liberal tilt, is expected to cut military spending. The liberals would rather spend the money to feed the hungry and find jobs for the jobless.

President Ford has promised his military chiefs, however, that he will battle for the defense budget. He will accept moderate, but not deep cuts,

he told them.

He urged the armed forces to take the initiative by cutting out the fat. The Army, for example, is top-heavy with brass. Consequently, Pentagon insiders anticipate a "reduction-in-force" next year that could, in words of one high-ranking official, be "damn bloody."

The Army is also weighted down with support troops, who perform services for one another, without adding anything to the Army's fighting power.

Under the President's prodding, the Army will start moving support troops into combat units. The goal is to stretch the number of combat divisions from 13 to 16 without adding any manpower.

The other services will also trim down to better fighting shape. The goal, once again, will be to get more bang for the buck.

Doctor's Debate: The medical profession is in an uproar over ex-President Nixon's phlebitis operation which almost resulted in his death. His treatment has become the hottest controversy in medical circles.

The chief physician in the case, Dr. John C. Lungren, has been sharply criticized for performing the operation while Nixon's blood was thin from anticoagulants. Dr. Lungren's choice of the vein which was shut off to prevent the movement of blood clots has also been questioned.

But the biggest issue is whether Dr. Lungren should have called in specialists. Some doctors say the former President might have avoided a close call if experts in bleeding and clotting had been consulted.

Dr. Lungren has answered his critics, in private, by demanding how they can criticize his decisions without knowing all the facts. He has also argued that too many specialists result in fragmentary care for the patient.

The controversy may be settled by the court-appointed doctors who will examine Nixon and report their findings to Judge John Sirica.

Washington Whirl: The National Park Service prints up and mails, at public expense, over 2,000 invitations to its annual croquet tournament in Washington. As one wag told us, the players have a ball, but the taxpayers get knocked through the hoop...The State Dept.'s "freedom of information" files are kept in heavy steel cabinets equipped with oversize combination locks...

Campus? by K. SCHREIBER

AFT different from AAUP

To the Editor:

We were grateful for the fine coverage of our organization, American Federation of Teachers, in Friday's Arg. We would, however, like to clarify some points that your readers might have misconstrued. Professor Meldrum of the American Association for University Professors was quoted as saying that AAUP operates differently than AFT. She then goes on to list a number of activities, ones in which AFT also engages, but generally with much more impact and success.

For example, AFT locals all over the States have upheld the highest standards for university professors by establishing contractual, and therefore legally binding, protection for tenure and academic freedom. Idaho State University moral and financial support from AFT was crucial in the case of Professor Rufus Lyman, who was reinstated after blatant violation of due process by the ISU Administration. AFT's support for Lyman was

total; AAUP's role was, by their own admission, "limited."

At one point Professor Meldrum seemed to imply that AFT "dictates" to college faculties. If the AAUP chapter at the New York Institute for Technology is typical, then it is AAUP, not AFT, that dictates. At NYIT a recent contract dictated that all new faculty must join the "Council" (read: union) as a condition for continuous employment. As far as we know, no AFT contract contains such coercive clauses.

Neither the National AFT nor its affiliate, AFL-CIO, dictates to AFT locals. Although it does cause some recruiting problems, AFT is proud of its affiliation with organized labor. (We garner immediate financial and legal help because of it.) This does not mean that we do not see any difference between academia and industry. We do indeed.

Even within the private sector the bargaining models differ widely. We intend to tailor the bargaining model to suit our needs. We call ourselves a

"union," not because we wish to industrialize the university, but because we believe that the general principle of collective bargaining is the best way of protecting faculty rights.

AAUP always complains about AFT's high dues. But in terms of national dues, AFT dues (\$1.75/mo.) are lower than AAUP's (\$2-\$3). The balance of our dues remain right here on campus. This fact strengthens immensely our local autonomy and local effectiveness. In addition, we recently received an outright grant of \$500 from the National, which brought back most of the national dues for our first year! AAUP is just deluding itself if it thinks that its members can have any effectiveness impact without local funds.

Yes, AFT operates differently: its role is generally more assertive, more adversary, more effective, and more successful in protecting faculty rights.

Nicholas F. Gier,
President
AFT local 3215

Dogs

A messer worth its weight in gold

By KATHY DEINHARDT
of the Argonaut Staff

It's a late evening; the streets are deserted and only the faint sound of rustling leaves can be heard.

Suddenly, a bright porch light breaks the night's darkness. A door opens slowly and a head topped with curlers can be seen emerging. Along with the head comes a lumpy body, dressed in a ragged bathrobe and fuzzy slippers, followed by a four-legged hairy creature with a tail. A whispered voice can be heard above the night's stillness and the creature lets out a half bark, half whimper, and then just sits there.

Then the limpy body picks up the puppy, whispers something to the effect of, "if you wet on my bed," and then reenters the house, closing the door, turning off the light, and leaving the night just as it was.

Taking one's puppy to the bathroom at three in the morning is just one of the many disadvantages of owning a dog. Yet, in spite of all the problems a dog may cause, one out of five people living in the United States owns a canine of one type or another. College students comprise a large number of the people who own dogs and the problems they face with their four-legged friends put them in a class apart from the common pet owner.

The major problem of a student who owns a dog is finding a place to live. College dormitories or fraternities and sororities do not allow residents to keep pets, and most apartment owners refuse to have tenants who own dogs.

According to Otto Hill, owner of several apartment complexes in Moscow, Idaho, a university town, dogs have ruined more rugs and furniture than he can count.

"After seeing what a dog does to a shag rug," Hill said, "I can't allow my tenants to have pets. Dogs make a mess out of carpeting."

If a person is lucky, he may be able to find a landlord who allows him to keep his dog. In most cases, the student has to get the apartment stressing that he would never think of having a pet, and then on the sly, sneak his pet through the front door.

Mike Heibling

Once a student has himself and his dog settled comfortably in their new home, new problems invariably arise. The major hassle becomes that of the neighbors who prefer peace and quiet to dogs that have a tendency to bark at all hours of the day or night.

"I wouldn't mind my neighbors having dogs," said Gene Peterson, "but I also like peace and quiet. It probably wouldn't be so bad if the walls in the apartments weren't made of painted cardboard, but whenever the dog next door barks, I'd swear it was in the same room with me."

Peterson went on to say that he did not dislike dogs—he at one time owned a border collie—but he doesn't like hearing a barking dog next door at 2 a.m., especially when he has to get up early the next day.

If the dog owner manages to make peace with the neighbors before the landlord learns of a stowaway in his apartment, the remainder of the problems deal

basically with training the dog on the do's and don'ts of apartment living.

The first thing a pet owner does is try to teach Rover the correct time and place to go to the bathroom. The amount of time it takes to teach a dog this trick depends on the dog, the owner's patience, and the technique used.

Each dog owner has his own style for training his dog but

is punished, the owner places him on the newspaper until the dog gets the message that it feels good to go on the newspaper but it feels bad to go on the rug.

The newspaper training has its advantages for dogs who are unable to hold themselves all night. They may then go on the newspaper without having to wake their masters. The newspaper also comes in handy when the dog has to be left in the house by himself for a long period of time.

The major disadvantage of the paper is that often times, even though the dog is standing on the paper, his back-end is hanging over the edge. This results in a backfire with the mess ending up on the rug, not on the paper.

Another problem many students face is what to do with their pets while they attend classes or study at the library. For students who own older, fairly large dogs, it is no problem for them to take their dogs to class knowing that the dogs will be waiting for them when the lecture is over. But many people with smaller dogs, types such as poodles and terriers, are afraid that someone might decide to steal their dog if they tie it up somewhere, and if they don't tie it up, the high-strung dogs will most likely run away. This gives the student only one alternative; leave the dog by himself in the apartment.

"I hate to leave my dog in the apartment," said Vicky, who owns a small black poodle. "All he does is tear things apart. I always think I put everything away so he can't get into stuff, but when I get home in the evening, I can always find something all over the floor. Anything that catches his eye he plays with, and almost everything he plays with he destroys."

most agree at one point: when the dog messes on the floor, he should receive some kind of punishment. Dog owners vary in the punishment they administer, but the most common are spanking the dog, kicking the creature, throwing the puppy across the room, and of course, rubbing the dog's nose in the mess he has created.

But the punishment must be followed by some action that shows the dog has an alternative besides letting go on the rug. After doing something painful to the dog, the owners usually scold him with a few hostile words, and then take the pet outside for a few minutes. This shows the pet that out in the good, clean, fresh air is where he is supposed to relieve himself.

Other dog owners who live in apartment buildings where the out-of-doors is inaccessible in times when great haste is needed, try to teach their dogs to go on newspaper situated usually in a conspicuous place for the dog and all to see. After the dog

So far the black terror has ripped up part of the carpet, annihilated a dictionary, eaten an album cover, and somehow, made two dog dishes completely disappear. Vicky is not supposed to keep pets in her apartment.

Most people who leave their dogs locked in the apartment try to close off as many rooms as possible so that the dog's territory is limited. This usually helps to keep some of the rooms in fairly good condition and holds the mess to a minimum.

Dogs also create problems that chew up a student's pocketbook. Veterinary services aren't cheap these days and all dogs need rabies and distemper shots. Many dogs also get worms and fleas and these must be taken care of. And female dogs have a tendency to cause more problems in the form of more dogs.

Being animals, dogs also need some kind of nourishment which also runs into money. A two year old German shepherd will eat approximately 80 pounds of dog food a month, and depending on the type of food used, the cost can run anywhere from 10 to 35 dollars.

But despite all the hassles that a dog can create, students who own dogs wouldn't give them up for the world. The reasons they give for putting up with all the problems vary but they all stem from one basic need—companionship.

According to one dog owner, her pet keeps her company when she's alone, listens but doesn't talk back, shows her affection, and warms her feet at the end of her bed.

But even more, a dog offers students a type of continuing security, for a dog belongs to his master and will remain by his side long after the college days have passed by.

HELP!

We need people to work on the following committees:

PARENTS WEEKEND (Chairman: Dan Sample)

COFFEE HOUSE (Chairman: Dan Rudolph)

ART EXHIBITION (Chairwoman: Margaret McGough)

ISSUES & FORUMS (Chairman: Mike Fereday)

If you are interested in helping on any of the above committees, either this semester or next semester, contact the Programs Dept. in the SUB.

Arthur Rourke

A scientist who studies

Editor's Note: Portions of this story appeared in last week's *Idahonian*.

By RHONDA BRAMMER
of the Argonaut Staff

Arthur Rourke just got \$13,900 from the Muscular Dystrophy Association—his third grant in three years—to buy laboratory equipment, isotopes and more sick female chickens.

Rourke, an assistant professor of zoology at the University of Idaho, uses the chickens to study a protein called myosin. Myosin is necessary for the muscles to contract. Chickens with muscular dystrophy have less myosin in their cells than normal chickens.

What Rourke is trying to discover is how this myosin is made, and more importantly, how it is destroyed, so that he can explain why the dystrophic chickens have less myosin. Being able to do so will increase scientists' understanding of the disease.

Rourke isn't particularly eager to talk about his work. Other subjects, maybe—just not his work. Last year on a TV show, an interviewer (who probably hadn't time to brush up on his polyribosomes) asked Rourke, "What questions would you like me to ask you?"

"Ask me about Nixon," Rourke replied.

At Lafayette College, Rourke detested living in the Scholars' Mansion because, according to him, it was "overburdened with the humanities-type who talked a lot but didn't do any work." He is especially wary of the press. "All a reporter has to do is give one wrong impression," Rourke said, "and someone thinks they're going to have a cure for his disease. I'm concerned about people reading my work when it goes to the journals; otherwise, I'm generally non-communicative."

But once he had agreed to an interview, Rourke explained and patiently re-

explained his research, shook his head when explanations got complicated, and occasionally even asked questions in return—to see if I had understood. "You've got to tell me if you don't understand something," he cautioned.

At times, maybe wearied by my slowness to understand, he would become almost sympathetic. Watching as I furiously scribbled notes and then leaning forward in his chair, he would ask, half-bored, half-amused, "How's it go-

"It may not sound important, but if you're going to analyze incorporation kinetics, you have to know that."

A second and perhaps surprising conclusion is that dystrophic animals actually produce myosin faster than normal animals. "Dystrophic animals produce myosin at 1.35 times the rate of normal animals," Rourke said. But myosin is destroyed much faster too—three to four times faster than normal, he added. So in spite of increased myosin production, the dystrophic animal ends

"I thought you had it with..." I began.

"I did, I did." He darted out of the room again and came back with the cup. Then—cup and beaker in hand—he went for coffee. He returned, cup and beaker still in hand—and still empty.

"Never mind—forget the coffee. We're out of water."

So while I tried to forget about the coffee that I almost had (you'd think scientists would check their equipment more carefully), I asked more questions—about

ing, Doc? You getting this stuff?"

In his experiment, Rourke uses chickens that have hereditary muscular dystrophy (females that cost \$6 each). He uses chickens because it is easy to tell red and white muscle apart (the dark meat and the light) and because increased myosin destruction and impaired muscle contraction happen only in the white muscle for the first two years.

He injects the 15-day-old chickens with radioactive aspartic acid, a tracer or "label" as he calls it. (Aspartic acid is one of the amino acids that makes up the myosin protein. So when the protein is destroyed, the label is exhaled as carbon dioxide.) Somewhere between two minutes and nine days after injection, Rourke punctures the heart of the chickens, drains the blood, takes samples of the white skeletal muscle, and analyzes the blood and muscle for amino acids and the muscle tissue for myosin.

And what has Rourke found? "I know where the aspartic acid comes from," he said. ("That ought to turn on the city council," he muttered.) There are really two places the aspartic acid could come from—either directly from the cell membrane or from pools of aspartic acid within the cell fluid. Rourke now knows that the polyribosomes (the parts in the cell that manufacture the chains of acid in the protein) get the aspartic acid from these pools within the cell.

"That took me 18 months to figure out," Rourke said.

up with less myosin.

Third, Rourke has discovered similarities between this myosin destruction in dystrophic animals and myosin degradation in normal heart tissue.

And last, he has calculated the half-life, or rate of decay, of myosin in the animal with dystrophy—6.6 days as compared with about 20 days in the normal animal. (He told his son about the half-life discovery. "That's not very interesting, Dad," six-year-old Michael replied.)

At this point in his research, Rourke thinks the myosin destruction in a chicken with muscular dystrophy is very much like the destruction in a healthy chicken—only it occurs much faster. "It seems to be a normal mechanism of destruction, but at an abnormal rate," he said. "So next I want to study the control mechanisms within the cell," he added.

Rourke has a tiny office in the life sciences building, room 132. Above his desk is a Picasso print—a print of a rooster. His lab is across the hall. An orange "Radioactive" sign is thumbtacked to the door.

"Want a cup of coffee?" he asked me. But then he couldn't find a cup.

"You'll have to play girl-scientist and drink out of a beaker," he said finally.

He took his cup, went off to find me a beaker, and came back with only the beaker.

"Where's my cup?" he asked.

Idaho this time—about why Rourke came to Idaho.

"I wanted to teach a cell physiology course," Rourke said, "and I wanted to try my own research ideas." He also liked Doyle Anderegg, the head of the department, whom he had met at a convention in New Orleans. "He impressed me as a straight-forward, honest individual," Rourke said. "That was of fundamental significance," he added.

And Rourke liked the students here, although he had a hard time saying exactly why. He told me about a student who was in his cell

"He's a good man—one of the best. That is a very modern approach—different point of view." Anderegg

physiology course—who was always complaining about the terrific work load. (Rourke admits he had rather healthy expectations that first semester.) Rourke ran into the fellow in a bar—on a week night—and was ribbing the kid, "How come you're in here if you've got such a heavy load? The student replied simply, "It's Wednesday." "He told me, 'It's Wednesday,'" Rourke repeated, "like I should understand."

Rumors have it that Rourke is a fanatic fly fisherman. He's the kind of guy that goes out, spends hours scouting the area, looking the stream over, and especially watching the insects, said one English professor who has fished

Grammar S Haven, Con would say school was:

studies sick chickens

with Rourke, then he opens the trunk of his car, gets out his equipment—feathers, hooks, silk—and ties his flies right there—on the spot. Rourke admitted it was true. He even admitted that he belongs to the Federation of Fly Fishermen. But he flatly denied that he was a fanatic.

Yet when "Lefty" Kreh, one of the world's finest fly casters, made an appearance in Yellowstone, Rourke was there, along with about 500 fly fishermen from all over the world. Fishing there, Rourke borrowed a car from Charles "Koke" Winters, the one-time business manager of the Detroit Symphony Orchestra, who gave up the orchestra for fly-fishing. While Rourke was driving and gazing at the stream—watching for just the right riffle—he rammed Koke's car into a tree.

"I was pretty upset," he said, "but when I told Koke about the car—without batting an eye, he asked me, Did you get any fish? Now that guy is a fanatic," Rourke explained, "I'm just dedicated."

Arthur Rourke, named after his father, was born on the south shore of Boston and went to Ripley Road Grade School in Cohasset, Massachusetts, and Hopkins

went," Rourke said, "my father had his first heart attack about then—that may have had something to do with it."

Rourke applied to six graduate schools—Harvard, Yale, Johns Hopkins, Stanford, Virginia, University of Connecticut—and was accepted at all six, but went to Connecticut because the cell physiologist Heinz Herrmann was there. But in general, he was disappointed with graduate school. "It's mickey mouse," Rourke said, "even though it's highly competitive. Bloody course work—memorization—same everyplace." It's no good to lead a kid through graduate school, Rourke said, because he gets out and can't do a thing. No creativity.

Rourke seemed to be getting weary. "How's it going, Doc?" he asked. "You want some coffee now?"

"Sure," I replied.

He had the cup and beaker handy this time. I waited while he went for the coffee. First I heard voices in the next room, then a wicked—crash.

Rourke poked his head back in. "Forget the coffee," he said.

A minute later he was pushing a mop down the

getting an improperly sexed chicken. "Those guys that sex chickens are only about 98 per cent accurate," he said. Rourke shot \$360 worth of isotope into one bird that turned out, upon in-

spection later, to be a male and so worthless for all experimental purposes.

Other than that, Rourke seems to be doing all right here. He rides his 350 Honda to class every day, and lives

in a red and white house with his wife, Robin, and his children, Michael, 6, and Elizabeth, 5, on eleven acres out by Robinson Lake, where they raise a large vegetable garden and yes—chickens.

"Those guys that sex chickens are only 98 per cent accurate."

- Rourke

"I wanted to teach a cell physiology course, and I wanted to try my own ideas." - Rourke

...one of the best we've got. His approach is cellular. ... approach— an approach that provides an entirely ... w." Anderegg

Grammar School in New Haven, Connecticut. All he would say about grade school was: "I didn't take too well to authority then." Hopkins was better. "Best school I went to—bar none," Rourke said. "I wasn't screwing around then. I'd been straightened out," he said and grinned.

It was family tradition to go to Harvard. "My dad went there and wanted me to go there," Rourke said. But Rourke did not apply to Harvard. "I didn't apply to any colleges at all," he said. As it happened, a college called him. The headmaster from Hopkins had done a bit of behind-the-scenes maneuvering and Rourke ended up at Lafayette College. "I'm not sure why I

hallway.

"Ultimate research tool," he said as he passed. (And I gave up on ever having coffee.)

Rourke came to the University of Idaho in 1972 although, according to Doyle Anderegg, Chairman of U of I Biological Sciences, he is good enough to go almost anywhere in the country. "He's a good man—one of the best we've got, Anderegg said. "His approach is cellular," Anderegg went on. "That is a very modern approach—an approach that provides an entirely different point of view," he said. That's good for the department, he added.

He's had only one catastrophe in research so far, Rourke said—that was

Basketball team opens season this Saturday

The Vandal basketball will play its first game of the season this coming Saturday evening in Memorial gymnasium against a formidable Puget Sound squad. The season opener for both teams is scheduled to get under way at 8:00 p.m. and the gates will open at 7:30 p.m.

The game will be the initial debut of new Vandal Coach Jim Jarvis. Jarvis was named as head coach after Wayne Anderson resigned. He coached at Spokane Falls Community College last year. Jarvis is a young dynamic coach, who was leading scorer and an All American at Oregon State in the mid sixties. He also played professional basketball and baseball. Jarvis was a regular on the Pittsburg Pipers of the ABA and also played some class 'A' professional baseball.

According to the new coach, "Puget Sound has a really fine team it's a big team." The Puget star player is a seven foot giant. His name is Peterson and according to Jarvis, "He's a good shooter and he'll be tough under the boards with that size."

Coach Jim Jarvis

Roger Davis

The new coach said that the Vandals "will have to stop Peterson and the Puget inside game if they hope to win their opener."

Fortunately, the Vandals have some talent back from last year, along with a couple junior college transfers, and several promising freshmen. Roger Davis is the height of the Vandal attack. He stands 6'9" and will be ordered to stop Peterson. Erv Brown, a junior college transfer from Jarvis' Spokane team will be at one forward slot, and Henry Harris will be stationed at the other. Sharp shooting Steve Weist and Tom Crunk, another junior college number, will move the Vandal attack at the guard positions. Jarvis named Rodney Johnson or Rick Nelson as the probable sixth men.

The Vandals would like to win as many of these pre-conference games as possible before getting down to the real meat of the schedule. These games will be an important indicator for the new coach, who may find that he'll have to do with more size. Jarvis said, "We

can go from a small team to a big team relatively quick. I'd just put in some of our taller freshmen—they have to get their feet wet sometime."

Jarvis is disappointed in that the students will be on vacation for the opener and attendance is expected to be quite light. He said, "I sure wish the students weren't on vacation, but there isn't much that can be done about it, we'll just have to play that much more aggressively."

The Big Sky conference looks challenging for the young Vandal outfit. They were picked to finish sixth in conference standings. Jarvis is subtly optimistic about the Big Sky. He said, "The only way they have to judge is through last seasons performance." The conference favorites are Montana, Idaho State, and Weber State. Jarvis said, "Weber is the team with size, but the other two were picked for their performance last year." He continued, "We'll have to play awfully well to win it—if we don't finish better than fourth I'll be awfully disappointed." So will Vandal fans. Let's go Vandals!

Plunders and Blunders

kevin kelleher

Boise is crazy about their Broncos, and why not. They have captured the Big Sky crown for the second straight year, been invited to compete in the Division II playoffs for the second straight year, and they blew the Vandals right out of Bronco Stadium.

Boise State is a typical commuter type university with a lot of scattered buildings, a lot of parking lots, a lot of beer joints. Students sport orange visors that say "Go Broncos Go" and they are very boisterous in Boise. They love to talk about their Broncos and about Idaho students.

Friday afternoon. I stopped by the Bronco Hut after watching both teams go through their final workouts. The Bronco Hut has a reputation of serving 22 lousy, but expensive hamburgers, garnished with one or two over cooked french fries. The most boisterous of all Bronco fans are found at 'da' Hut. The walls are covered with painted signs blasting Vandal supporters. It's bad enough to look at those signs throughout happy hour yet alone listening to the 53rd Bronco tell me how great the McMillan led Broncos are, and how they were going to blow Idaho right out of Boise.

BSU didn't seem a bit concerned about losing the game. One Bronco fan said "There is just no way in hell the Vandals will ever beat Boise again-ever." I guess he was trying to "Tell it like it is." The mood in Boise the night prior to the game was one of Vandal genocide.

Boise not only wanted to beat the "Moscowites" they wanted to humiliate them. Much of the game (45 minutes) they tried in vain, but in the fourth quarter the Broncos got it together and being a measly 24 points ahead, the Broncos called 'time out' with :02 seconds on the clock. The Vandals stood there dumbfounded by their arrogance. It was probably a tactic of humiliation planned by the pompous Knap for the totally drained Troxel. Maybe Knap was saying "Welcome to the big time in Boise - you sucker!"

The game ended. Two seconds is not a very long time to wait, and Ed Troxel walked across the field and shook Tony Knap's hand. Troxel looked tired. It had been a long disappointing year. The Vandals should have won more games. Troxel wasn't too concerned about the past games except for the fact that "This one could have made up for all the rest." The record will remain the same, and Bronco sentiment will not change. Their putrifaction of Moscow athletics and Moscow students will always remain harsh in their stagnant Knapism.

Someday maybe Ed Troxel will avenge this humiliation and when he does he probably chuckle when he looks up at the clock and calls 'time out' with the Vandals comfortably ahead and with :01 second left and sneers, "Never give a Bronco an even break."

Volleyball team takes EWSC to up record

The U of I women's volleyball team played host to the team from Eastern Washington State College to close out its home season Friday afternoon.

The U of I team continued its winning ways by defeating

the EWSC team in a best three out of five game match.

The Vandals won the first three games with scores of 15-12, 15-5, 15-4. This brings the overall season record to 17-4 for the hustling women's team.

The team now begins preparation for the Northwest B Tournament at Willamette University in Salem, Oregon, Dec. 5-7.

Vandals couldn't break wild Broncos

By KEVIN KELLEHER
of the Argonaut Staff

The Vandals traveled to Boise in hopes of breaking a wild Bronco, but the capital city horse was too much for the Vandals to handle. The Bronco reared up and viciously kicked the Vandals 53-29.

The Vandals got on the score board first, when Boise's All-American candidate, Jim McMillan was dropped by a host of Vandal defenders in his own end zone. Idaho took a short lived lead of two points, but the Broncos roared back on the next series and stepped out in front 7-2.

McMillan must have resented the safety that the Vandals scored, and his own butter-

fling of the football in the first period. He fumbled several hand-offs before he decided to start throwing. McMillan completed his first 13 passes, ended the day with 327 yards, and tossed four touchdown passes.

Dennis Ballock, appearing for the last time as a Vandal, had a good day passing. He accounted for 227 yards through the air channels. The senior from California threw three touchdown passes, including an 82 yard bomb to Tim Coles.

The Broncos completely shut down the Vandal rushing attack. Fredback went out of the contest early with a suspected broken shoulder. Chadband was the leading ground gainer

for the Vandals with 79 yards, but 53 of those yards came on a long run in the early going. Chadband said "I thought I was going to get beheaded every time I carried the ball on those trap plays-I've never been hit so hard."

Monty Nash had a good day rushing. The little running back blasted around the Bronco defense on his first carry and sprinted 55 yards along the side line before being jolted out of bounds on the Bronco one yard line. An "unsportsman-like-conduct" penalty moved the ball back to the Bronco 16. Ballock found Chadband open over the middle and rifled a pass to the fullback. Chadband caught the pass on the one and was met there by two Broncos, but he hurdled over the defenders, and cartwheeled into the end zone. Idaho regained the lead 15-14, but it didn't last long.

McMillan took his team down the field mainly through the air. He tossed a nine yard strike to his talented receiver Holton.

The Vandals never folded and continually kept pressure on the play-off bound Broncos. Crucial mistakes in crucial situations, combined with some unexpected Bronco luck, killed any hope of an upset.

The Vandals held the Broncos on their first offensive series of the second half, but were off sides on the punt. The penalty gave the Broncos the yardage

they needed for the first down, and it rejuvenated their drive to paydirt.

Boise was also aided by the unexpected. Several times McMillan would connect with one of his receivers, who fumbled when hit, but another Bronco was always the recipient of the bounding pigskin. Several times this sort of thing kept the Broncos in possession of the football.

Contrary to previous speculation, McMillan didn't throw long. He continually hit his short receivers, who were splitting Idaho's zone defense along the seams, or flooding a particular area, especially the middle and flats.

McMillan's passing was so accurate that it was always a battle between receiver and defender. He put his passes right on the money every time.

The real stomper to the Idaho game plan came in the fourth

quarter. Idaho failed to put a point on the board and made some crucial errors. The Broncos took advantage of every Vandal wimper and put 18 points on the board in the final period. Idaho played 45 minutes of good football, but Boise State played 15 minutes better. The physical size of the Broncos plus the passing of Jim McMillan was too much for the young Vandal team to handle.

Hockey team drops four in hard fought battles

The U of I women's field hockey team ended its season as it travelled to the Northwest Tournament in Ellensburg, Wash. The team fought hard but narrowly lost its matches Friday and Saturday.

The U of I team lost to the University of Washington 2-1 with Karla Harmon scoring the Vandal goal in the second half. In a rough second game on Friday, Idaho lost to Oregon College of Education 1-0.

Saturday's games saw the U

of I team getting together as a team, but losing to Willamette University 2-1 and Skagit Valley J.C. 1-0. Lorrie Stensland scored the U of I goal in the first game.

The team ended its season with a 4-8-2 mark. Coach Jan Onuska emphasized the record did not necessarily reflect the spirit and hard work displayed by the team, nor the improvement and quality of play. She commended all for a job well done.

Language degree

Finding job is problem

By JEFF TRACY
of the Argonaut Staff

According to Dr. Galen Rowe, chairman of the foreign languages and literature department here at the University, while the U of I language enrollment stays fairly stable, across the nation it has been decreasing over the years. The problem, he says, is due to the fact that "the one career area that used to be pretty certain for a F.L. (foreign language) major, mainly teaching, is now over supplied."

Dr. Rowe, speaking on behalf of the F.L. department, added, as a general reason for the lack of mass enrollment in the field, the fact that the interest in mastering more than one language is being lost due to the trend towards isolationism by most Americans today. "It is a pity I think, that we Americans are becoming more isolated, because the problems we face are really not problems that can be solved by us alone. They are problems that have to be solved on a world wide basis. Energy, food shortages, inflation, all of these will require international cooperation to solve." Dr. Rowe feels that we are making a big mistake if we expect everyone to speak our language when it comes time to solve these problems.

In an effort to resolve the foreign interest problem foreign language department is presently in a state of transition. According to Rowe "We are trying to change our image from a language lit. department to a language cultural institutions type department." The dept. tries to build up a student's background enough so that he or she might be able to get along in a foreign country with nearly the same efficiency as a native.

When asked if the dept. tries to give the student a basic, blueprint idea of what a language entails (i.e. grammar, pronunciation, reading skills, etc.) Dr. Rowe replied, "Pretty much so, but we don't make it our policy. We try to give a student as much as we can in the way of variety at the early stages of learning a language."

Rowe went on to mention Guten Tag as just one of the new courses being offered this year. The course, which is comprised of twenty-six films, follows the trials of five foreigners learning German as they study, work and travel through Germany. The films emphasize the teaching of purely conversational skills in German, avoiding the heavy emphasis on grammar that most students dread and continue to have problems with in their native tongue.

On the subject of futures for foreign language students' Dr. Rowe said he readily admits the fact that there is not much a person can do simply with a background in foreign languages. "But", he added, "we feel that the student who is able and willing to put out a bit more and gain a major emphasis in foreign languages and corresponding emphasis in business or some other academic discipline would stand an excellent chance of getting a unique kind of job."

Dr. Rowe compares the F.L. dept. at the University favorably with any other outstanding liberal arts college in terms of the commitment and qualifications of the faculty. Although he did add that the dept. doesn't have the resources to compare with "the larger state universities" in the way of student population,

faculty size, and facilities.

When asked how he compares his own dept. to other depts. within the University, Rowe said, "We haven't really taken the time to compare ourselves to other depts. so far, but I think that we have enjoyed excellent support from the administration in our efforts to become a better department."

The students in the dept. appear to have their doubts about the support of the administration and their doubts recently materialized in the form of a petition for more adequate teaching facilities. The petition was shown to Dr. Rowe and he said that he "very definitely approved of the petition" and that he "certainly didn't want to prevent it." But Rowe said that he did not want to spearhead the initiative because, in his words, "That would have obscured the fact that the students have real needs and are aware of these needs."

Dr. Rowe feels that the language lab facilities of the dept. are inferior to the students needs and even went as far as to say that the lab facilities are actually a detriment to the students learning ability. "It hinders in the sense that without highly sophisticated instructional tools, the amount of innovation and experimenting that the dept. can do is severely limited."

Dr. Rowe and several of the F.L. dept. faculty agree that the ideal situation would be to have an audio-visual center within the University library. He feels that the library could staff the audio-visual room, just as it does the reserve book room, and collect and catalog all of the appropriate audio-visual material, including the foreign language matter.

Argonaut Puzzle of the week

Ode to English teachers

A famous poet once said, "English teachers should be preachers, they think their words as right as God's." Fortunately, our English teachers here at Idaho would never dream of being bombastic tyrants in their classes. (What is the mood of this line? Ironic? Sarcastic?)

The focus of this week's puzzle is the English Department. Unfortunately, only a handful of our English profs could be singled out for their much-deserved recognition. This is because, when asking students to comment on the nature of the English teachers they knew, the crossword puzzle research team had great difficulty in getting comments fit to print. (What does this statement indirectly tell you about the nature of these teachers?)

If (and only if!) you have thoroughly studied the MLA Style Sheet, you may now proceed to fill in the puzzle. (What is the author implying here? Do you know what the MLA Style Sheet is? Well don't you have a dictionary, or do you just not know how to use it?..)

Across

1. This teacher could wear shining armor to class, but it wouldn't prevent him from habitually talking to, and sometimes patting, the wils.
4. This Bus.Writing teacher's name could be the name for a new style of modern art, in which the artist throws ragout on a canvas.
7. If you can pronounce and spell this teacher's name, you will have no difficulty in reading Shakespeare in his class.
- 8.. The name of this Survey of English Lit teacher belongs
9. Although this prof. seldom goes anywhere without a cup of coffee in his hand, the last two syllables of his name are synonyms for these two words: "distant country."
12. This Lit. of Western Civ. prof. is full of more than just a wee bit of blarney.
14. This prof. could moonlight as theof Seville.
15. This prof. who likes to tell stories in class is a member of the "black berets."
16. "This is a recording" It is your fault that 90 per cent of you are flunking this course. You just don't know how to take notes."

Down

2. If you have a lisp and you try to say "seal," it sounds like this teacher's name.
3. A ham that hens is a(note the alliteration)
5. This teacher is well-known for his love of martial arts (Bruce Lee is his idol) and for his corny jokes.
6. This prof. is living proof of that old adage that eating bagels makes your hair curl.
9. This teacher would gladly trade her "drum" for a "ville" since her specialty is "Moby Dick." (could this be a phallic symbol?)
10. If you took this prof's musical instrument away from him, he might turn into a "debased" criminal, capable of mowing down innocent victims like a giant bull.....(could this be a symbol of the military-industrial complex?)
11. This prof. teaches Survey of Am. Lit. and Adv. Creative Writing; she is an example of your basic pick-pocket paranoia syndrome, which is why she always keeps her hands in her pockets.
13. The smoke from this teacher's ever-present cigar might remind his students of gray..... clouds.

Thanksgiving Day

There is still reason to be thankful

AP
The dollar is shrinking. Unemployment is rising. Millions of people are threatened by starvation. What is there to be thankful for?

Peace. Health. Opportunity. Freedom.

These are some of the things that some prominent Americans from different walks of life said they were grateful for as

Thanksgiving approached.

The Associated Press asked people in the arts, business, science, labor and several other fields what they found to be optimistic about in a time of

general economic gloom.

Here are some of their answers:

James J. Needham, president of the New York Stock Exchange: "Of greatest importance, we can be thankful our nation remains at peace. And while recognizing the problems created by inflation and recession, we should be thankful that more Americans than ever before have jobs... We can be thankful, too, that shortages of many basic materials that we experienced a year ago have largely been overcome..."

Beverly Sills, opera star who recently underwent successful surgery for a pelvic malignancy: "What am I thankful for this Thanksgiving? That I'm alive with my family and that we're all in good health; that I'm working successfully in the field I always dreamed of being in and enjoying every minute of it."

Rogers C. B. Morton, secretary of the interior: "I am thankful that—with action to curb waste—our country still has more than enough energy resources to bridge the gap until we can develop effective new forms of energy... And I am thankful that the American people, once they understand a situation, have always shown the spirit and ingenuity to do what must be done."

Quincy Collins, a former prisoner of war in North Vietnam who unsuccessfully ran for Congress in the November elections: "How thankful I am for freedom. How thankful I am for

the opportunities America provides."

Jerry Wurf, president of the American Association of State, County and Municipal Employees: "These are indeed difficult times, but we have seen worse, and if our elected officials can respond to the clear-cut demand by the American people as expressed in the recent elections for a new sense of direction and purpose to end the inequities, we can make it. We can be thankful for the spirit and good sense on the part of the electorate..."

Betty Friedan, founder of the National Organization for Women: "Women can be thankful that at last everyone's consciousness is really changing. We are taking ourselves seriously and are being taken seriously."

"We have broken through on so many fronts and our voice is finally being heard politically. I think women must join now with all concerned people... to seek the new thinking and courage that is required in a national crisis."

Frederic Ness, president of the Association of American Colleges: "We are thankful for what seems to be a growing sympathy and understanding on the part of the public to the mission and goals of higher education... We are certainly grateful for the increasing support we are getting... And we are thankful for the very strong evidence of a new seriousness of purpose among students."

Events

Argonaut

●Committees of the ASUI programs will hold interviews early next semester. In the meantime, the following committees need help this semester: art, parents weekend, coffeehouse. Information can be obtained in the programs office from Mrs. Rush or Patty Mathison.

●There will be a Phi Delta Kappa meeting tonight in the SUB. A discussion of "Crucial Issues in Education," will be conducted, with Dr. Thomas E. Richardson, Dr. Thomas O. Bell, Dr. Edward Kelly, and Dr. Terry Armstrong as panel participants. The meeting begins at 7:30.

●Ballroom dance and square dance sessions this week are cancelled due to Thanksgiving vacation.

●The Library will be closed Thursday, Nov. 28, but will be open 8 a.m. to 5 p.m. Wednesday and Friday and regular hours on the weekend.

●Hours for Memorial Gym for the Thanksgiving weekend are as follows: Wednesday—closed at 6:30 p.m.; Thursday—closed all day; Friday—closed at 9 p.m.; Saturday and Sunday regular hours.

●Intramural "A" Basketball Entries are due Monday, Dec. 2 by noon. Leagues will be drawn at an Intramural Manager's meeting Monday, Dec. 2 in room 109, Memorial Gym.

●Three-Man Basketball play-offs will begin after Thanksgiving vacation.

Portland firm takes roof bid

Emerick Construction Co. of Portland, has been awarded the bid for the project to cover the University of Idaho stadium, according to Dr. Sherman Carter, financial vice president.

Contracts are currently being drawn up on the \$4.1 million project which will convert the school's three-year-old stadium into a multiple-use facility for athletics, recreation, conventions and commencements, Carter said.

In September, the University rejected a first round of bids because they were 14.8 per cent higher than funds budgeted for the project. The second set of bids submitted Nov. 7 was lower by approximately \$100,000.

Because just \$2,400 separated the total bids from Emerick (\$4,164,400) and from Vern Johnson and Sons, Inc., Spokane, Washington, (\$4,162,000), an evaluation team including project architect Glen E. Cline, Boise, and mechanical, electrical, structural and acoustical consultants made the final recommendation, according to Carter.

In a letter to Emerick Construction Co., Carter noted, "This project is of great importance to the academic, athletic and other programs here at the University. We hope that we can count on you to give this project the special effort that will be

required in order for the facility to be available to the university by Sept. 1, 1975."

According to Carter, the U of I Board of Regents gave approval to the university to proceed with the project, including accepting bids and signing contracts. The board also authorized an increase in student fees \$5 per semester and \$3 summer school session to assist in funding the roof project. The ASUI Senate recommended approval of the fee increase in early November.

State must educate students

It is the opinion of Idaho Governor Cecil Andrus that the state has an obligation to educate its residents through their senior year of college, according to ASUI President Dirk Kempthorne.

Kempthorne met with Andrus in Boise, in connection with an Idaho Student Lobby meeting. Andrus said since Universities in other states pay more money in fees is no reason to increase fees at Idaho Universities.

Andrus also reaffirmed his faith in J.P. Munson, a member of the Idaho Board of Regents who was under fire recently for allegedly procuring beer for minors, Kempthorne said.

The student lobby decided at their weekend meeting to leave funding for the organization on the same basis that it presently is on, rather than accept a proposal that would have

raised the proportion of money contributed to the organization by the larger universities.

The meeting, which was attended by Kempthorne, ASUI Senator Emily Hansen and Jeff Stoddard, President of the Idaho student Government Association, was called to choose lobbyists for the coming legislative session, and to select legislative priorities.
