Idaho Argonaut

Moscow, Idaho, Vol. 80, No. 21
23

Tuesday
November 11, 1975

It was a cold walk to class for this University of Idaho coed. Moscow recieved its first snowfall yesterday and the weather is expected to get colder as winter approaches.

Grad program said deficient

by Randy Stapilus
of the Argonaut Staff

Of some 119 graduate programs now in existence at the U of I, 95 are operating below quantitative standards set by the Board of Regents, according to a report issued Friday by the State Curriculum Director, Cliff Trumpp.

Trumpp emphasized that, since this is a quantitative study, it will not be a final test of whether the programs will stay.

But, he said, all those areas whose master's and doctorate programs were found wanting, will be studied both by the state organization and by the university itself. Then a final determination will be made whether the programs can stay or go.

(The Argonaut has been unable to discover all the programs which do and do not meet the criteria; the available list appears near this article. A complete list is expected to be available before publication of

the next issue.) University officials, including President Hartung, Research Coordinator and Graduate Dean Ronald Stark, and Associate Graduate Dean Edgar Grahn were all out of town and unavailable for comment. Of the university masters' programs, 19 met the regent's criteria, and 76 did not. In doctoral programs, three were in proper shape, according to Trumpp, while 19 were not.

Boise State University has only two graduate programs; both of these, in elementary education and business administration, meet the requirements.

Idaho State University, however, finds itself in a similar boat to the U of I. Some 18 of its master's programs fall to meet the criteria, compared to eight that do. The doctoral program is much farther ahead, however-of its six doctoral programs, five are adequately filled.

Overall, then, a great minority of the programs fail to meet Board standards. "Har-

vard's graduate program wouldn't qualify," according to U of I Faculty Secretary Bruce Bray, "but ISU's would."

The requirements hinge on the number of students graduated from master's and doctoral programs over a period of time. Five students must graduate within three years in a master's program; three students in five years in the doctoral.

The formula went into effect last year after the legislature pressured the Board of Regents to do away with duplication of programs.

Many higher education officials-including U of I President Ernest Hartung-have indicated their opposition to a plan which bases "productivity" on the number of students the program serves.

Trumpp has said this study will not result in the immediate disbanding of any program, but the Argonaut has learned it has probably led to the disapproval of one proposed doc-

continued on page 2

GEM pictures spur dispute

by Bill Lewis
of the Argonaut Staff

Disputes between the Gem of the Mountains yearbook editors, university purchasing officials and a local photographer have resulted in the yearbook contracting a photographer the editors do not want for this year's annual.

After submitting, and resubmitting bids three times for Gem pictures, the purchasing office this month awarded the contract to Allen Kim of Rudy's studio. The Gem editors, however, along with the ASU senate asked that the contract be awarded to an out of state photographer Keith Cole because of complaints about the quality of Kim's work.

According to Gem co-editor Warren Olson, complaints from living groups who had contracted Kim's studios to take pictures at various functions, had led the yearbook to recommend Cole's bid be accepted even though it was higher than Kim's.

Former Communications Board Manager Kenton Bird also recommended to the purchasing department the bid

submitted by Kim be rejected, also citing designed documents from living group Presidents and social chairmen complaining of the quality of lateness of Kim's photography.

Bird also told the purchasing department that Kim had done work on a yearbook for Clarkston High School and that work was unsatisfactory.

Photographer Kim said yesterday however, that such complaints from the Communications department, and the ASU Senate had not been relayed to him.

Purchasing Agent Claude Dye told the Argonaut that Kim's low bid had to be accepted because definite proof of poor quality has to be produced before a low bid can be rejected on any state job.

That point of view was also presented by ASU General Manager Dean Vetrus who said that a few complaints from living groups about Kim's work would not stand up in court, if Kim challenged his rejection as low bidder.

According to Kim, such legal action might have been undertaken if he had been rejec-

ted after submitting the low bid.

"I would have considered legal action if the low bid had been rejected and grounds for such legal action existed," Kim said.

He added however, that suing the University was never actively considered.

Olson said he received the impression, during a phone conversation with Kim, however, that if the bid was rejected, Kim might take legal action to assure he got the Gem contract.

Kim defended the work of his studio, saying he wouldn't have been in business in Moscow for 10 years if his work was bad, and adding that Olson had been unreasonable in making derogatory statements about the quality of the studio's work on the basis of secondhand reports.

According to Kim, Olson had not been open with him during bidding time and had never consulted him concerning complaints about the studio's work.

He said submitting com-

e
or

GEM pictures ignite controversy

continued from page 1

plaints to the purchasing office about lateness of his work, while not trying to find out why work was late and not seeking information about other bidders was unfair.

Recently appointed Communications Manager Mike Gallagher agreed that Kim's bid had to be accepted because no conclusive evidence could be found that the quality of Kim's work was bad.

Gallagher conceded that the department did look for such evidence and for that reason submitted the complaints about the photographer's work to the purchasing department.

The only way the Communications department might have denied the contract to Kim, according to Gallagher, would be to contend that Kim had earned a bad reputation and therefore some students might be unwilling to have him take their pictures.

Again, however, such a contention could not have been backed up by solid conclusive evidence, he said.

The Communications department also sought information about the photographer's work from previous Gem editors, who had dealt with him before. Gallagher said Kim had taken pictures for the yearbook in 1970-71, and the quality of his pictures had

been good, but he had not met deadlines.

Any possible deadline problems have been dealt with under the terms of the contract signed this year between Kim and the Gem, he said. The contract levies a \$50 a day fine for each day the photographer is late with pictures, and gives the Gem the right to demand that work be done over, if the editors are not satisfied with the quality of the pictures.

Kim said any deadline problems that might result this year would be the fault of the University, which did not make final decisions on who would do the photography until October, when original bids were sent out in August.

Kim said he is operating on a

very tight schedule, explaining that under the terms of an agreement with the Gem editors, all photography except for some retakes, which will be completed next semester, must be completed by Dec. 15.

The Gem contract is for pictures of all students, which will be financed by an appropriation by the ASUI senate. Because of delays in the senate coming up with the money for the pictures, and confusions about bid specifications, the contract was put out for bid three times.

In September, after the first bid was received, Olson recommended that the bid from Cole, to take pictures for \$1.50 apiece be accepted. At

that point, according to Olson, the purchasing office told the Gem that bid specifications made it unclear exactly what the yearbook wanted and Cole's bid could not be accepted.

At that point bid specifications were revised and Kim submitted a low bid of \$1.45 per picture. According to Vettrus and Olson, Cole stuck to his previous bid of \$1.50.

According to Dye, however, Cole's bid actually went up the final time the contract was bid. Dye said under the final specifications, Cole would have charged \$1.75 per picture, but both Vettrus and Olson agreed the work Cole bid at \$1.50 would have satisfied bid specifications.

At any rate, during the bidding process, Kim substantially reduced his bid, barely undercutting the

original low bidder, Keith Cole. Although this was cited in a letter to the editor today by ASUI Senator David Vest as evidence that Kim used less than legal means to find out information about the bids of other prospective photographers, both Vettrus and Dye said information about Cole's previous bids was a matter of public record.

As soon as the first bids from Cole were opened they became public information and any person who wished to know what the bids were could have found out by contacting the purchasing office, Dye said.

Vettrus also said whether or not Kim used information obtained from Cole's earlier bid, the prospective contractors' bids were opened at a public bid session and no illegality would be involved

Grad program problem

continued from page 1

toral program.

A plan was presented to the regents for the Mechanical Engineering Doctorate of Philosophy, but it was returned to the State Curriculum Committee, where it faces an uncertain future, according to Argonaut sources.

Part of the reason it was sent back to the committee, according to Trumpp, was that the master's program in the same field was considered "deficient."

He said the state board will also investigate interstate cooperative programs, such as WICHE and various proposed doctoral engineering programs.

And as reported in the last issue of the Argonaut, the Board of Regents will consider the entire range of research in Idaho.

The University of Idaho, according to state sources, now runs the Idaho Nuclear engineering plant located in the town of Arco, but this will not be the case much longer.

Sources say that a committee is on the verge of restructuring the administration of the facility to include Idaho State University personnel. "ISU people simply can add a lot," according to Trumpp. "ISU has expertise in this area." He and others, however, said the extent of the changes has yet to be determined.

He said another point of contention was the exact role of the U of I in research in Idaho. "Although there is no doubt that the U of I is the chief research center, whether it is 'a' chief or 'the' chief center is in question.

U of I doctorate programs in education, chemistry and forestry management received high evaluations by the State Board of Education, while both Masters and Doctorate curriculum fell below standards in the following areas:

- | | |
|--------------------------|----------------------|
| Agricultural Economics | Zoology |
| Bacteriology | History |

ERA debate set

The Equal Rights Amendment (ERA) will be debated by Idaho's State Representative, Norma Dobler and Mary Helm, a senator from Oklahoma tomorrow at noon in the SUB Galena room.

Helm sponsored by the John Birch Society, is traveling around the United States informing the public that if the ERA passes in the Senate it will, "increase public dependency--at a time when responsible members of society, who support their families are groaning under the tax burden of providing for millions of 'fatherless' children and their

mothers." Dobler, on the other hand, is speaking in favor of the Amendment. She commented that the ERA had already been ratified here in Idaho and there is no way that it could be taken off the books even if it is rescinded.

Fiddlers play

The Idaho Old Time Fiddlers will play for square dancers Wednesday night at the WHEB.

It's one of a weekly series of programs in square dancing, which provides instruction for beginners from 7-7:30 p.m., each Wednesday, and dancing from then till nine for the new, the used-to-it, and the in-between.

It will be held in the WHEB, room 110.

Issues that make the candidates

By Debbie Nelson
of the Argonaut staff

A mass of issues is bubbling in the U of I political stew as 23 candidates prepare for ASUI elections Nov. 19.

From their campaign soapboxes, candidates have expounded on everything from academic freedom to the campus alcohol policy, and in an effort to clarify the major issues, the Argonaut is giving the background and importance of the issues in this article, which will be continued in the next issue.

An open forum for candidates will be broadcast Nov. 17 at 7 p.m. on KUOI FM radio station (89.3). Students who wish to discuss issues with candidates may listen to this program and phone in questions officials say.

Campaign statements written by each candidate will also be presented in Friday's Argonaut.

This section of the two-part article will present background on Blue Mountain spring music festival, the SEND scholarship drive, and the alcohol policy.

Friday's issue will go into use of field house property, the housing pinch, law school problems and possible ASUI incorporation.

Blue Mountain

There will be one issue on the ballot in this election: Do students want a Blue Mountain music festival, and if so, what kind?

The first rock festival ever held at the U of I, on May 9, 1971, was organized by two U of I students with little outside help, over a period of about one month. It lasted about 12 hours and attracted about 6,000 people, with as many as 3,000 there at one time.

The concert, called Blue Mountain from the beginning, was little advertised, and took some people by surprise.

In fact, the state as whole didn't really know about it until well after it happened.

The Argonaut devoted three full pages (equivalent to six present pages) to the event. Writers described it this way:

"The pounding, pulsating rhythm of six rock groups, the surging crowds, the sun,

the beer, the food, the dope, and the wine all combined in an explosive atmosphere that captivated the minds of thousands of students, faculty, and a few parents."

The state didn't react kindly. The university was inundated with letters from irate parents and others, condemning the festival.

Nevertheless, the administration approved the next festival. This one, planned by students Tom Slayton, Denny Eichorn and others, went down in history as "The Day of the Rains." The concert, which began in late morning, was threatened by rains at 11:30 a.m. It was moved to the SUB Ballroom for half an hour, then when the clouds broke back to the arboretum. That evening, it returned to the SUB.

Damage was not considered major, but dirt and scars on the SUB floor and walls remained for some time.

Planners of the next event were split, with the Wallace Complex Committee (WCC) on one side, and ASUI leaders on the other. Conflict persisted

spring art and music festival set-up by the Talisman house and the City of Moscow.

In the end, the festival was an event unto itself. Crowd estimates were around 7,000 at any one time; some estimated as many as 15,000 total attendance during the day.

The large crowds received much criticism from the city of Moscow and the administration, and the future of Blue Mountain looked dim.

KUID-TV manager signs off

The man who wears two hats in the U of I School of Communication, one as general manager of KUID-TV-FM and the other as chairman of the department of radio and television, has taken one off.

Pete Haggart submitted a letter of resignation Monday to School of Communications Director Don Coombs, stating that events of the past year had led him to the decision that he could no longer "handle both responsibilities."

Coombs accepted the resignation the next day, expressing his appreciation for Haggart's cooperation in the past few years. Coombs started out his letter saying that normally he would ask Haggart to reconsider, but since they had discussed the matter at considerable length before, he would not this time.

Haggart said that his "self examination-evaluation" of the past four years left him with only two alternatives. One would be to leave the U of I, and the other to seek alternate duties within the school. He pointed out his 12 years at Idaho, and expressed a desire to become a full-time member

of the teaching staff on a 10-month contract.

Coombs responded that he will begin "open discussion" (today) with both Dean of Letters and Science Elmer Raunio and Academic Vice President Robert Coonrod to find a replacement as general manager. Coombs told the Argonaut that including necessary advertising and screening the time frame could be "several months." He also emphasized that persons both within and outside the U of I will be considered.

Haggart suggested that there be expansion of the general course offering within the department, primarily in the area of film. He mentioned such classes as film production, film appreciation, film history, and film as an art form. He also suggested that broadcast law and the Federal Communications Commission be made.

1 You can sometimes control the direction of the ball by where it hits your paddle. If it hits the center it will go straight. If it hits the right edge, it will go right, etc. Flicking the paddle to get a spin might work but is less controlled.

2 Avoid the sharp angle shots since they tend to slow the ball and are easy to return. The most effective angle shots are those that rebound closest to your opponent, the deadliest being the shot that rebounds just as it hits his line of play.

3 Shots down the middle are boring and slow. However, late in the rally after the ball has speeded up, a middle shot can be a killer if used deliberately to surprise your opponent.

AND THEN ...
PRACTICE

Opinion Argonaut

ASUI Sleeper

"All Quiet On The Western Front," at least that's the way it seems when it comes to election campaigns this year.

In all my four years at the University of Idaho, this has got to be one of the most low-keyed and docile elections I've ever observed. Where are the posters which cover buildings and bulletin boards alike? Where are the candidates that show up for dinner, and give a speech on what the students like to hear? I ask you, are they all out to lunch?

Perhaps everyone wants to remain as unobtrusive as possible during the election. Nobody wants to step on any toes, so when it comes to issues this literally leaves them with a foot in their mouth.

The political attitude on campus leads one to believe that everyone with electoral aspirations is unwilling to commit themselves before their opponent does. It's ridiculous to believe that everyone wants to be a darkhorse candidate, including the incumbents.

According to the petitions taken out for ASUI elections there are 23 people running for office, who are fighting like hell to remain a part of the silent majority, if there is really such a thing at Idaho.

I've only seen two individuals seeking a position, in an active role that could be considered campaigning. Come on guys and give the students an idea what you're running for. It's really no fun to play one potato, two potato in the voting booth, but when comparing it with the election it's certainly more entertaining.

HALL

Candidates platform

Statements by candidates running for ASUI elective positions (President, Vice-President, and Senator) will be run in the next issue of the Argonaut this Friday.

All candidates desiring to make statements should have them in the Argonaut offices by noon this Wednesday, (tomorrow.) These statements may be written either by the candidate or someone else; if by someone else, they should be signed.

Word limit for statements is

as follows; 500 words maximum allowed for Presidential and Vice-Presidential candidates, and 300 words for senatorial candidates. Statements will be cut off once they reach that limit.

Candidates wishing to have their pictures accompany the statements should either bring pictures to the Argonaut offices or have new pictures shot here. The time for these shootings is from 3-6 p.m. Thursday. All pictures will be shot at this time.

Argonaut circulation

The Argonaut apologizes to those persons who have not received copies of this paper at times this semester.

Any person or group that should be getting Argonauts and is not getting them, or not enough of them, is advised to contact the Argonaut delivery people at their residences, and the error may be corrected.

On Tuesday issues, the delivery person is Doug Kisler, and his phone number is 885-6890. The Friday delivery person is Dave Lyon, and he can be reached at 882-1864.

Once again, people experiencing delivery problems are advised to call these people at home, not the Argonaut office.

Academic's form organization

To the Editor:

A group of hard-working and dedicated students can make things happen at the University of Idaho. With apologies to the Bolsheviks, it is frequently apparent that a small band of diligent students can precipitate necessary changes around campus.

"Student unions" could be the student voice of the future.

We should investigate a system of student organizations to voice the academic needs of students. Instead of the present hit-and-miss system where student opinions are seldom solicited in academic areas, and where the Associated Students of the University of Idaho is impotent as a voice of students' academic needs, local student unions could cause changes in local areas.

We're talking about needs that affect us all, but that few of us have a voice in--such as: hiring, tenuring, faculty salaries, student-faculty ratio, firing of incompetent faculty, etc. These needs are not being pursued by our present system.

Why do we have a problem?

First, the current representative of students, the Associated Students, has exhibited consistently that it is unwilling and inherently incapable of fighting for students' academic rights--except on a hit-and-miss scale.

Second, the ASUI is a closed system whose rights are afforded to a select melange; in other words--if you're not a politico, then no one considers your conflicts with the academic system.

Third, the ASUI lacks the immediacy of being close to unique academic problems. Why should the ASUI become involved with the trivial and less-dramatic problems of a particular area of study when the solutions do not offer benefits to the student body as an entity?

Finally, collective bargaining for University personnel is becoming a certainty. Students need a voice in collective bargaining that is knowledgeable to all the specific problems of bargaining. Students, who have the greatest to gain but also the greatest to lose by the eventual terms of collec-

tive bargaining, should have a substantial voice in the educational product after collective bargaining.

What can we do as students?

Reasoning concludes that student bargaining in the form of student unions could be a solution. Formation of organized academic groups will accrue the benefits of: 1) capable and willing academic representation for students, 2) an open system for all students of a specific academic pursuit, 3) a knowledgeable and interested group, and 4) a device for collective bargaining.

The students of the University of Idaho School of Communications through their newly-formed "Communications Student Association" are forming a group to cope with their needs in academic areas.

They're meeting today at noon.

Student unions for students in all other academic areas is a system which could solve some of the problems of today's University of Idaho.

Yours sincerely,

Kim Smith
ASUI Senator

Photography problem with the GEM

To the Editor:

This letter is not written to upset any particular person. It is written to let the students of U of I know why the chances are good that their pictures in the '76 "Gem" yearbook may not be what they expected. As both a student and a senator, I always believed that the GEM staff picked a photographer who had good relations with the students and who worked well with the needs of the yearbook staff. After seeing how the job was actually done, I can see that this is not the case at all, for the choice was made from every conceivable angle but quality.

When the ASUI Senate approved funds to allow every GEM purchasing student to have his picture in the annual, I was glad that the GEM staff had done some planning. They had a photographer in mind who had background, a large staff, and other items which Moscow merchants are not renown for. A short time later the Senate passed a resolution stating that we supported this decision. How WAS the photographer finally chosen??

Much to my dismay, all

student purchases must go through the U of I purchasing office. This is done to theoretically stop local threats, pressure, etc. from influencing the choice. By the time purchasing got through with it, it was clear that they had no intention of listening to either the GEM staff or the ASUI senate. After three bids were let, we ended up with a photographer who does not enjoy the support of many living groups, and certainly will not be able to work well with the GEM staff.

Why three bids? The first were sent only to local photographers, and resulted in one bid. When the GEM found out, they asked for another bid. When the second bid came in, the bids were in our favor and a decision was nearly made to accept from the man with the good qualifications who the GEM wanted in the first place. What happened now is fuzzy, but it appears that someone started yelling "Sue" on the grounds of everything from bad bidding to discrimination.

To make a long story short, the Moscow merchant won on

the third bid. He bid 5 cents under the chosen photographer, which is close for a supposedly closed bid, but after three tries, I suppose one could start making estimates. In the final analysis, what we have is a local merchant with our contract and with it the four thousand dollar potential. This in itself does not bother me, but when I see that he did not get that contract by performing well in the past, but by using threats, duress, and then setting his bid magically within 5 cents, an intelligent person must realize something is wrong.

It is too late for the ASUI to do anything about it this year, but I do have my hopes that this exposure may let Moscow merchants know that someone in the ASUI is not content to sit by and watch while the students get ripped off. It is my sincere hope that I am wrong. Maybe the GEM will get good service, but from what I've seen, it's very unlikely.

David Vest

The candidate's choice

Letter to the editor:

In past campaigns I have always expected the bizarre. Usually I wasn't too surprised at what turned up, mainly because I was busy producing them.

But to be endorsed by someone surprised even me. And to be endorsed by a vice-presidential candidate was beyond my scope of reason.

At first I thought someone was out to destroy my credibility but I quickly realized that it's so bad now as to be nearly impervious. That thought made me rest easier.

I also thought that Rene LaGrone must not want to win very bad. My past record of three consecutive losses speaks for itself.

In attempting to resolve the situation I called upon my vast storehouse of student politics and remembered a senatorial candidate who for well over a month talked to dorms and Greek houses and spent all waking hours putting up campaign materials. Well, her campaign smile was wiped off on election day.

A fellow loser. Now we were getting somewhere. I can empathize with losing politicians where as I only feel sorry for the winners.

I also know a lot about losing campaign parties. I been to em all. Was at one where the losing presidential candidate took three hours to figure out how to open the keg and shortly after that received the word

that he lost rather miserable. At that same party another losing candidate broadsided a Mustang when we were leaving. Yes, I was in the pickup that hit it, it was great though I had to withhold my humor at the time.

But, back to the story. About the only reason that I could think of for her to endorse me was that I beat out Donald Duck in the city election write in vote category and that she though perhaps I'm on a hot streak and an endorsement from her to me would also get her some extra votes, too. Or else maybe she just hates the duck.

I can't help but think that if it was a gesture of good faith, she'll probably print a retraction after reading this. So maybe I better endorse her real quick before she backs out.

After reading her campaign statement I feel like the voters will really go wild with having to read two cynics' materials instead of the traditional one.

But no doubt this has been the driest most unexciting campaign I have been in thus far. When I find other candidates that are bored with having to go around and speak at the various living groups I have to wonder about the university's political future. I can understand the voting groups being bored (if they're not, I sure don't know where they're coming from) but the candidates... Maybe the losers won't take it so hard this year

and maybe they'll be as apathetic about the elections as the winners.

Rene LaGrone may be just the spice this campaign needs. I mean, anyone that makes campaign promises like putting up row housing and selling liquor by the drink to pay for it has to know something about absurdist politics.

Though somewhat shaken by her endorsement, if I had to have one I'm glad it was written in the tone that it was. If I ever have to endorse someone I hate I'll write one just like it.

And in lieu of this I cordially invite her to run on a joint no plank platform with me.

Though it would be hard to match the campaign of my American Nihilist Party (plans that concerned putting other candidates names on bumper stickers and pasting them on people's front windshields; contemplated mailing letter bombs to myself and declaring that the other candidates were out to get me; etc.) I'm sure we could find something to entertain us and the voting populus.

Whatever, I wish you the best of luck and will unquestionably be seeing you at the losers party. It takes all kinds to make a world,

Nile Bohon

Support for Warnick

I think David Warnick should be given the chance to follow through on the issues he's raised.

One of his opponents suggested he has no follow through, and yet in eight months Warnick has accomplished more than any student president I know.

For instance---on alcohol policy. At the first Board of Regents meeting after Warnick took office, the ASUI presented a suggestion to change the alcohol policy, and make it realistic.

They turned down two suggestions on the subject, so

Warnick then went the route of approaching the Moscow City Council to change the ordinance which prohibits any alcohol consumption in any public school building. The results should be known soon, and hopefully the students will be successful.

Meanwhile, Warnick is also investigating the possibility of court action on the matter.

There have been attacks alleging the loss of ASUI credibility. In my opinion, the ASUI will gain credibility if it reelects Warnick because it will be keeping someone who is at last willing to speak up for us.

Dick Stevenson

Blind football record

To the Editor:

At 9:00 o'clock last night three young independent men confidently sauntered out of Franklin B. Gault Hall with football in hand. Upon reaching the confines of the ASUI-Kibbie Dome Activities Center, they proceeded with intense practice and drill for a solid hour.

When their turn was called, they coolly took their positions. Coach Terry Fleskes, the senior member of the squad, sure handed Jay Gramolini center receiver, and rifle arm Roger Vanderhye, readied themselves for the ensuing 3 man-blind man football contest.

The rules are simply that the quarterback and center-receiver are blindfolded until the snap of the ball. After cen-

tering the ball, the center-receiver removes his blindfold as he starts to sprint downfield from the 40 yard line. The coach then gives the quarterback vivid instructions on finding the ball that was centered and directing him to where his receiver is, so that they may complete the pass.

Statistics were phenomenal, the three men amassed 325 yards, in the three minutes time that is allotted, for a record breaking average of 36.1 yards a pass, and a 9 out of 10 completion record. The closest competitors collected a mere 4 completions for 142 yards.

After their victory, the three were quoted as saying "We issue a challenge to anyone, anytime, anywhere". That's all.

GAULT HALL

To test, or not to test...

To the Editor:

Last week an incident occurred that illustrates one of the problems within the structure of the University.

As background, let me say that in mid September, I was informed that the Master's Exam in English would be given in the first week in November, with Wallace Stevens' poetry as its subject matter. Since I had used quotes from Stevens to support my Masters' thesis in philosophy - which is another story - I immediately went to the English department and indicated my desire to take the exam.

I was given the mimeographed handouts that specified that other interested graduate students could take the exam with permission, and I was given permission by a professor on the grading committee; I signed my name to the list. I purchased the recommended books and worked through the readings on reserve.

Later, I had the chance to in-

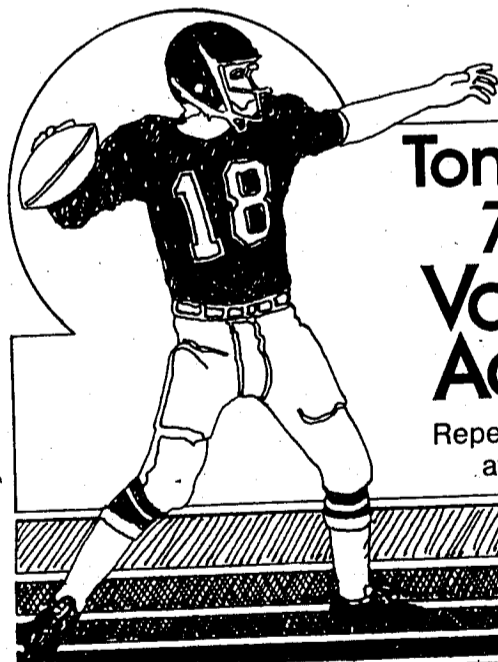

form the chairman of the grading committee, and he also expressed approval of my intentions to take the exam. On 3 November, one day before the exam, I received a note from the director of graduate studies in that department forbidding me to take the exam. After I answered that I intended to, anyway, I received a call from the two professors who had previously indicated their willingness; they graciously apologized and asked that I not take it. I reluctantly agreed not to.

I am impressed by the dedication of English scholars in fortifying their little niche in the frenetic labyrinth of education, and I wholeheartedly admire their tolerant co-existence with the engineers and economists, and other trainers and entertainers in the university community. But their attitude is symptomatic of a basic flaw in the system.

The university treats its students as specialized receptacles of detachable talents, not as wholes (no pun intended). Socrates warned the Sophists that to partition the personality is the first step away from wisdom. Even today, to isolate any skill, such as criticism, and to cultivate it apart from the whole person in whom it resides, is not only to diminish the person, but also to trivialize the skill.

Respective to this problem, what should be the goal of the English department? To protect the weak members of its guild, or to try to realize the noble, but so pitifully unattained goals of the university. Unfortunately, the actions of the department, like so many others, betray its intentions: to prepare its students for plug-in places in the world-as-it-is.

Nostalgic tavern reopens- Offers music, beer, fun

It used to be known as one of the mellower places in town, so when Old Joe Hall's closed down last year, more than one U of I student regretted the end of a Moscow institution.

But old Joe is back, though under a slightly different name. Five and a half miles out the Troy highway, Joe Hall's Tavern has recently opened, and offers music, beer, and wine to the Moscow community.

They haven't built their kitchen yet, so the sandwiches that filled student stomachs last year will be temporarily unavailable. But the folks at old Joe's say come spring the kitchen will be finished.

In the meantime, beer is 35 cents a glass and a buck a pitcher on Thursday, Friday, Saturday and Sunday. Tuesday is ladies night, when beer drops to a \$.25 a glass and \$1.00 a pitcher. On Thursday, men can take advantage of lowered prices, and Wednesday the price cut applies to everybody.

There is also an emphasis on music at the newly opened tavern. Friday and Saturday nights usually feature live entertainment from local groups, and on Sunday afternoon a jam session is open to any musician who brings his own instrument.

Glenn Cruickshank

Old Joe Hall's reopens with boogie music and beer. The new location is five and a half miles out of Moscow on the Troy Highway.

Idaho is winter wonderland

The shimmering snow-covered mountain world of Idaho is being discovered as an exceptional winter playground for outdoor oriented people.

Where can one unload a snowmobile or try a hand at cross-country skiing or snowshoeing...or drop a line through the ice for fish, while others enjoy ice skating on the same ice-covered lake? Idaho has the answer and seven of her state parks are now geared for winter camping activities.

Priest Lake State Park in the northern reaches of the panhandle provides camping with electrical hook-ups at Indian Creek. The roofed picnic shelter has a wind-break and wood fires to make a cozy warming hut for visitors. This is favored snowmobile country; however, it affords tubing and sledding areas near the lake.

In mid-January, Priest Lake

stages a Winter Festival highlighting snowshoe baseball at Cedars, while the International Sled Dog races are held in mid-February at the Priest Lake Airport. WSRA snowmobile races are scheduled for Priest Lake on January 25, February 1, and February 22.

Small picturesque Round-Lake State Park has a toboggan run and the frozen lake offers both ice fishing, skating, and winter camping.

Lake Pend Oreille does not freeze over and is a year-round fishing lake. Boat ramps at Farragut State Park on the lake's southern tip are in use during winter. Fish-cleaning rooms are winterized and heated. On one side of the main road through the park, snowmobiles have full rein, while cross-country skiers have the other. Sledding and tobogganing make up the whole show at the amphitheatres.

Heyburn, the oldest of Idaho's state parks, developed around Late Chatcolet is the scene for ice skating, ice fishing, ski touring and snowmobiling all within the 5,505 acre area.

Ponderosa State Park has excellent terrain for snowmobiling and cross-country skiing and an area large enough to accommodate both sports.

Winter survival classes are conducted within the park. A camping loop with electrical hook-ups is kept open all winter. Highlight of the season's activities is when the park joins the festivities for McCall's Winter Carnival the first weekend in February.

Police report more thefts

Thursday night two armed men with ski masks over their faces held up the Dex Bailey Service Station on West 3rd St. in Moscow.

Troy Albert, the service station attendant, reported that the robbery took place shortly before 11 p.m., when he was closing the station. The two men pointed a gun at him and demanded money, Albert said. The two escaped with an estimated \$500 in checks and cash.

One of the robbery suspects was described as black, about 5 feet 6 inches tall and weighing 150 pounds. No description of the second suspect was available.

Two U of I fraternities reported thefts last weekend. The Theta Chi house reported late Saturday night or early Sunday morning someone stole two trophies, two silver bowls, two spatulas used as breakfast trophy awards, two wooden paddles, and two imitation animal skins. The value of the stolen items was listed as approximately \$200.

Friday night the Kappa Sigma fraternity reported that an antique clock was stolen. The clock, which was a gift in 1920 from a former student, was of unknown value.

Miller becomes Mines dean

There is a new dean on campus. Dr. Maynard M. Miller assumed his new position as dean of the College of Mines yesterday.

Miller comes to the University of Idaho from Michigan State University, where he was professor of geology and, for the last 15 years, director of the Arctic Sciences Institute.

Miller received his B S degree from Harvard University, his M S degree from Columbia University, and his doctorate from Cambridge University in England, where he was a Fulbright scholar for two years.

In May, 1963, Miller was the chief geologist on the successful American Mount Everest Expedition.

According to the College of Mines, Dr. Miller was on leave of absence from Michigan State from 1968-70, during which time he was director of the World Center for Exploration Foundation in New York.

While being involved with more than 50 research projects, Miller has traveled to more than 70 countries.

Since 1950, Miller has served as a geological consultant for the U S Forest Service, National Park Service, U S Navy Oceanographic Office, NASA, and the National Geographic Society.

Store Hours: 9 a.m. to 10 p.m. Including Sundays

Early in the morning dormitory halls are quite and deserted.

He grabbed the door knob and twisted it, shaking the metal hallway separator. Seeing it was locked he turned, walked down the stairs, out the door and headed across the lawn.

"The worst thing about this job is the monotony," he said. "Sometimes Campus Security (CS) is about as boring as anything I can think of."

It was nearly 2 a.m. and we were walking through the Gault dormitory with a campus security employee. We had been walking and riding with him during his shift that night, trying to find out what campus security actually does at the U of I. After several hours of closing doors, checking windows, and turning off an occasional light, we were ready to agree that the job could be more exciting.

A campus security force is a necessary part of any university. Whether it operates as a fully commissioned police force, or as a back-up unit fulfilling basic night watchmen duties, its presence is needed.

On the U of I, the Campus Security force operates primarily in the night watchman role, leaving nearly all actual police protection to the Moscow Police Department. Campus Security employees spend much of their time walking and riding around campus at night, checking for unlocked doors and open windows. Much of this basic legwork is repetitious and as the one CS employee quoted above indicated, often boring.

During their evening and early morning shifts, which usually run from 9 p.m. to 5 a.m., the U of I security force

checks every building on campus, guarding against vandalism and burglary. But, although campus security does play a role in maintaining the actual security of the university, there are two other equally important parts to their job.

The University is required in its insurance contracts to maintain a staff of night watchmen, who will check buildings for fire. Thus the five full-time employees and the 12 part time students, who work with campus security punch in their times on time clocks after inspecting each building. This is the university's guarantee to insurance companies and others that it is doing all it can to detect and prevent fire damage.

The third responsibility of a campus security employee is what Ed Schmitz, chief of the U of I Campus Security force calls "public assistance." The campus force is often called before Moscow Police in non-criminal matters. Schmitz sees this as the most important part of his job, as it involves day to day dealing with the U of I community. "We get called to help start a lot of stalled cars, or to open a door in a building when someone has locked his keys inside," he said.

Schmitz, who has worked with Campus Security for one year, says public assistance calls occupy more time than any other single area.

They're not cops, and the campus security employees are often the first to explain what the difference is between them and the Moscow Police Department (MPD). The MPD is under contract with the U of I to provide the campus with police protection.

Campus Security, on the other hand is what one CS employee called "an intervening force between the campus and the MPD. We deal with anything of a minor nature."

Only Chief Schmitz, a commissioned deputy sheriff for Latah County, and a commissioned MPD special officer, has full capacity to function as a police officer. The other campus security employees have no powers of arrest beyond that of a citizen's arrest.

The five full-time members of the force do receive police training, Schmitz noted. They attend the Police Officer Stan-

dards and Training (POST) Academy in Pocatello, as do the officers of the Moscow Police.

The POST Academy is a permanent school of instruction for all Idaho law enforcement personnel. By state statute any person in law enforcement in Idaho must complete a five week program at POST within a year after entering a police-oriented profession. Four of the five full-time campus security employees have attended POST, while Schmitz attended a similar institution in Montana and obtained POST-certification.

The POST academy provides specialized training in most areas of crime detection.

Courses are taught by experts in such areas as burglary, DWI (driving while intoxicated), traffic enforcement, high speed pursuit driving and techniques of criminal investigation.

This specialized training allows campus security to be, in the words of Ed Schmitz, "the eyes and ears of the

U of I Campus Security guarding against theft and vandalism

Text by Morrissey

Photos by Cruickshank

police." Though not officers themselves, the security force can contact the Moscow Police when needed. Several campus security employees indicated that rather than attempt a citizen's arrest they would call the Moscow Police.

The U of I contracts with the Moscow Police Department for police protection, paying last year \$41,210.74 for this service. This amount is equivalent to the salaries of three full time officers, their equipment and the price of one police car.

The Campus Security employees have a good deal to do in their night time shifts.

Vending machines are often v. every night.

Security: Institute, Dalm

There are 66 major buildings on the U of I campus, and all must be checked for fire, break-in or vandalism. This year incidents of vandalism and theft have increased, with well over \$2000 dollars total damage being done to private and university property in the month of September alone.

What is more, the buildings to be checked stretch over a large land area. While the university proper totals just over 300 acres, buildings on the golf course and the three university farms must also be checked. This means the security forces are eventually charged with inspecting buildings on 1,365 acres.

The size of the U of I campus prevents all of these buildings from being checked by foot patrols. Thus CS uses two cars to supplement their security work. Currently in use are a Plymouth station wagon and a Ford Pinto. Schmitz noted that for a while only Pinto's were used, apparently because they could be purchased cheaply. The use of

An open door is an invitation to theft. Campus Security checks doors in over 66 buildings every night.

the Pinto's gave rise to the designation "Pinto Patrol," a nick-name which follows Campus Security even today.

The actual night watchman procedure involves several functions. Doors in buildings are checked, and those that have been left open are locked. "Stray" lights are also turned off, vandalism is noted, and a report of each building is made. Finally, a time clock is punched by the campus security employee as he leaves the building.

One of the campus security employees we talked with said that there were several reasons for the time clock.

"There's the insurance policy, of course, and they want to know we're doing all we can to prevent fire and theft and so on."

The employee also noted that recording the time when a building is checked could have

other advantages. "Say we checked a building at 1 a.m. and then maybe again at 5 a.m. If a break-in has taken place, then at least we've narrowed down the time in which it took place. That could be very important."

"Or perhaps I come out of a building at, say, 2:05 a.m. and I see a car going up the street. It might turn out to be a car wanted for something else, and I could prove just when and where I saw it."

The Campus security employees we talked with also indicated a reason some persons have had in the past for burglarizing university buildings: test thefts.

"It's more of a problem than some people realize," one security officer noted. "I've caught several people photocopying tests at night. Old buildings like these can be broken into a lot of ways."

The game room of the Wallace Complex is a frequent site of vandalism.

are often varied and must be checked

...more on the controversial issues

continued from page 3

As usual, there was no planning for several months. And once again, the students involved in entertainment organized, this time into Student Committee for an Outdoor Music Festival (SCOMF).

SCOMF tried to meet the various criticisms about Blue Mountain. Later in the spring of 1975, they met with the administration to work out plans for Blue Mountain V. They decided, after eliminating all other possibilities, to hold it, in the Arboretum again and to keep promotion of the event to an absolute minimum. (It had been promoted in the past throughout the entire Northwest).

The Argonaut raised a storm of controversy when it revealed the date of the concert (a week earlier than the traditional first Sunday in May) in an issue earlier than had been originally arranged with BM planners. Some advertising agreements also fell through. The number of people at the concert was down several thousand from the year before, partly because the weather was cold, rainy, and little snowy.

Despite its smaller size, this Blue Mountain received more criticism than any before from Moscow merchants and U of I administration. The Chamber of Commerce sent a formal letter to U of I President Ernest Hartung, urging him to ban all such concerts in the future, as they are "detrimental to the community."

Hartung has so far refused to outlaw them altogether, though he does agree that the concert adds to wear and tear on the university.

Proposals for changes in Blue Mountain are many and varied. Some would fence in the arboretum, only allowing a limited number of people inside; some would hold it in the Kibbie Dome; some want to see several small festivals over several weeks.

Students will have a chance to vote on their preference for Blue Mountain next Wednesday

Alcohol Policy

Exactly what the U of I alcohol policy is remains a matter of hot dispute.

In theory, it means that no alcohol is supposed to be taken onto, sold, possessed, or

consumed on campus.

Moscow City Ordinance 6-9-1 rules that no consumption of alcohol is allowed in school buildings in the city limits. The university Faculty Council policy does not condone or remain indifferent to "any acts or conducts which impair the pursuit or dissemination of knowledge on campus," and it supports the stand of the U of I Regents in regard to alcohol consumption.

"The Board goes on record reaffirming its opposition to possession or consumption of alcoholic beverages by students on Idaho campuses," the regents said last week.

Janet Hay, president of the board, said pressures from groups around the state would prohibit changing the policy, despite opinions of individual Regents or the Moscow city council.

The Moscow council will meet soon on the policy. One of many legal questions which has been discussed by the city council in regard to the policy is whether or not U of I can be classified as a public school.

Candidates for ASUI office have given various views on the policy, with the majority in favor of liberalizing the policy and some even promising that the policy will be changed if they are elected. Several have taken a "wait-and-see" attitude, to find out what the city council and regents decide, others have said the policy should remain, since further liberalization isn't conducive to a university learning atmosphere.

Senate candidate John Burlison said the policy is a non-issue, one which can't be decided by students anyway.

Mike Stamper, presidential

candidate, noted that student input might influence the feelings of people who will decide the issue, and Senate candidate Tarl Oliason said a test case in the courts might be effective in changing the policy.

Many candidates said drinking should be allowed everywhere in living groups, not just in private rooms. These areas are part of a person's private abode, say the politicians.

Several candidates also noted that the state of Idaho allows 19-year-olds the right to drink, so they should be allowed to do so anywhere on campus.

Candidate Debbie Brudie, while endorsing liberalization of the consumption regulator, said she felt bars were available so selling alcohol on campus shouldn't be necessary.

Send Program

The Scholarship Endowment National Drive (SEND), which would raise \$1.5 million for student scholarships, ran into trouble in September when money could not be raised to cover its operating expenses, which would come to about \$100,000.

The drive had been supported by the Board of Regents, the ASUI Senate, the Alumni Association directors and the University of Idaho Foundation former U of I Development Director Frank McCreary said he thought there was enough support among students, alumni and friends to raise the \$1.5 million.

"The drive had a better chance of succeeding than any other campaign we've ever done," he said.

But, a donor who had

promised to underwrite operating expenses of the campaign backed out last summer. Since then, the administration hasn't been able to come up with "seed money" for the fund drive.

ASUI President David Warnick (who is now a candidate for re-election) had suggested that \$100,000 from Student Union Bond reserves be used to underwrite the drive, but this was rejected by U of I Financial Vice President Sherman Carter.

Carter said, "Any reduction of these reserves at this point, therefore, is bound to make our lenders extremely nervous, and, to some degree, in terms of the truth in lending concept, is really not proper."

McCreary said the number of students receiving financial aid could be increased by 50 per cent if the drive worked from a base of \$1.5 million and raised \$75,000 each year.

The SEND drive has been a "safe" issue for candidates to support in this election. Most have urged that the administration get moving on it, or that students become interested and start pushing it, or have promised that if they were elected, they would work to push the drive through.

Presidential hopeful Thom Kincheloe summed up the feelings of most candidates when he said the SEND drive "can and must get off the ground. Through cooperation between the university administration, the alumni and the students, the drive can begin as soon as possible."

The administration is carrying the ball on the SEND scholarship drive, and there seems to be little that any present or future ASUI officer can do to hurry the possible allocation of money for the project.

Blue Mountain is the only issue students will deal with directly in this campaign, as they vote their views in the referendum. In the meanwhile, candidates have taken stands and given suggestions on the alcohol policy and the SEND drive, but these issues are in the hands of the Regents and the administration. Friday's issue will discuss issues which may be closer to the 12 officials who will be elected next week.

Gem of the Mtns Pictures

Vandals set record with tie

by John Anderson

The University of Idaho flew to Ogden, Utah, Friday with high expectations of getting their third victory in succession over a 0-8 Weber State Wildcat football team. When the game concluded Saturday afternoon, the Vandals went to the showers with a 40-40 tie, setting a new NCAA record for the highest tied football score.

The Vandal squad played flawlessly throughout the first half with senior quarterback, Dave Comstock, guiding a highly precisioned offense to a 28-17 half-time lead.

The second half opened with the absence of Comstock, who was found to have received a foot injury (sprained big toe) in the closing minutes of the first half. However, momentum still seemed to be with the Vandals until the third play of the final half, when replacement quarterback, sophomore Ken Schrom, pitched behind running back Robert Brooks, and Weber recovered on Idaho's 13 yard line. Three plays later the score was 24-28.

Momentum is a tough thing to describe in a football game but whatever it is, the Vandals latched on to it again, and sent talented running back, Tim Lappano, on a 76 yard touchdown run. The third quarter ended with the Vandals leading 34-24.

The fourth quarter opened with the Vandals scoring again, with Ken Schrom keeping from

the one yard line. Here Idaho elected to go for the two point conversion and failed. With approximately twelve minutes to play the Vandals lead 40-24.

From this point on the elusive quality of momentum shifted to the Weber State squad. Rod Bockwoldt, the Wildcat's new quarterback who had previously played as a wide receiver, came into his own. Catching a stumbling Idaho defense off guard, Bockwoldt began to pass with pinpoint accuracy.

With the help of a now established running attack due to effective passing, the Wildcats scored twice and made each of their two point conversion tries good. With less than four minutes to play, Weber had caught the Vandals and the score stood at 40-40.

Idaho received the ball again, but was unable to move and once again the Wildcats had the ball. Starting on their own seven yard line they drove with blitzkrieg effectiveness to Idaho's 18 yard line. Here the Vandal defense dug in and forced the Wildcats to try for a winning field goal. It was wide and the Vandals escaped the wrath of Bockwoldt and a fired up 0-8-1 Weber State ball club.

Next week the Vandals look forward to its neighboring state rivals, Washington State University in Pullman. The Cougars are 2-7 for the season.

Idaho traverses to fifth

University of Idaho's cross country team ran into a fifth place during the Big Sky cross country meet, hosted by the University of Idaho, on Nov. 8.

University of Montana came out on top, with a 46 point score. Boise State University took second place, with 60 points; Idaho State University earned 66, and Northern Arizona University grabbed 68 points and a fourth place. Eight schools from around the Northwest, as well as Utah and Arizona, competed in the five-mile long event.

Dean Erhard, of the University of Montana, lead the 53 participating runners with a 25:43 time. Some University of Idaho competitors and their respective scores include:

Rick Brooks, seventh place, with 26:24; Doug Beckman, eighteenth place, 27:14; Bob Griffin, 27:20; Terry Griffin, 27:23; and Dana Zentz, 27:37.

Practice begins

Practice sessions for the U of I Women's Basketball team has been set for Mondays and Wednesdays, from 4-6 p.m. and Tuesdays and Thursdays, 6-8 p.m. in the small gym of the WHEB.

Further information can be obtained from basketball coach Bonnie Hultstrand in the WHEB, room 105.

Idaho's Rick Brooks finishes just steps ahead of Doug Darko of the University of Montana in Saturday's Big Sky Cross Country Meet.

More on Hartung's five year plan

This is the second of a three part series on U of I President Ernest Hartung's five year plan by Blaine Baertsch.

President Hartung's five year plan for the university, a plan he describes as unofficial, is scheduled for formal public discussion at the December 4-5 meeting on the Board of Regents in Lewiston.

In this concluding article, we look at the recommendations and reactions concerning the Colleges of Education, Law, Letters and Science, Mines, Graduate School and Research.

Hartung's report stated that with the bulge of students majoring in education during the sixties now over, emphasis must be placed on special education programs. He said this will increase costs in the face of decreasing enrollment.

The UI's College of Education has been moving in this direction since 1967, according to Dean Everett Samuelson. In planning for their new building, occupied in 1969, Samuelson said facilities were included for the training

of professional personnel in the fields of early childhood, special education and vocational teacher education.

The training of teachers for special education classrooms began in 1967, and a main-stream program to prepare teachers to cope with children having learning difficulties, but not classified as special education children, has approximately 140 undergraduate majors enrolled this fall.

There are approximately 50 majors in the early childhood education program, which trains personnel for teaching pre-school children.

The UI also has primary responsibility for training vocational-technical teachers in the state, according to Samuelson, and has sole responsibility for graduate programs in this area.

Another program, in its second year, trains vocational rehabilitation counselors for Idaho, Oregon, Alaska and Washington. The only other program of this type in the northwest is taught at the University of Washington.

Although enrollment has decreased as Hartung stated, Samuelson said credit hour

registration has steadily increased. 1973 saw 10,589 credit hours taken through the college. This fall the total is up to 11,428.

Samuelson said this was attributable to students preparing for careers teaching at the secondary level who get their degrees through some other department and their professional training through the College of Education.

Hartung also recommended that the training of school administrators be centered in one of the states institutions of higher learning. Samuelson said this role has already been assigned to the UI and ISU by the Board of Education.

As for Hartung's statement that the Board should review the Colleges of Education in the state to eliminate duplication, Samuelson said the Board has already assigned specific roles to the different colleges and the real question is whether they wish to change any of those designations.

The college generates a great deal of outside funds for these programs. From a total operating budget of \$1,726,980, \$789,540 comes from federal and state program grants. The remaining \$937,443 is university appropriated funds.

Special education, early childhood education and vocational teacher education all receive more federal or state support funds than university appropriated funds.

Eight months ago, the College of Education made a multi-million dollar proposal to the Libyan Arab Republic for the establishment of

vocational technical schools there. Samuelson said this program would be "very exciting" if approved. As of now, no decision has been made by the Libyan government.

Hartung said the student faculty ratio, low faculty salaries, and poor law library are the three most urgent areas of concern within this college.

Lowering the student-faculty ratio must be of immediate priority according to Hartung. However, this means more money to hire more faculty members.

No one knows if more money will be forthcoming from the legislature to remedy this deficiency. Dean Albert Menard said, "No one knows at this point what the temperament of the legislature will be toward higher education."

Intermediate steps have been taken, according to Hartung to raise faculty salaries beginning next year. However, he notes that salaries will still be far below that recommended by the accrediting agency.

Hartung said salaries must continue to be raised in order to maintain full accreditation and realize the college's full potential.

This problem has been particularly unsettling to the college, according to Menard. Since 1970, 11 faculty members have left the school.

Last year alone four, or exactly one-third, of the faculty quit.

Menard said this problem will continue in the future unless faculty salaries are brought into line with other competing markets.

The deficiency in the law library is a result of low acquisition rates necessitated by the lack of space before the college had its new building, Hartung said.

Menard said the library has become deficient to the point that it is seriously hurting student and faculty work.

This problem should be corrected by 1980, according to Hartung.

Menard said he had been discussing these problems with the administration for the last 2 or 3 years and with the Regents for the past year.

"We can demonstrate our reasons and then we just have to wait and see what happens," he said. "It makes it very difficult to plan ahead not knowing what our funding will be."

Hartung said the College of Letters and Science, being the largest and most diversified college, is the hardest to judge. He did say it was strong in the hard science areas like chemistry and mathematics as are most land grant universities, but also in areas like music and drama.

Hartung said a School of Environmental design is currently in the planning stages. This school may be separated from the college because of its past orientation towards the profession of art and architecture and design.

Dean Elmer Raunio said the Faculty Council had this year directed the Department of Art and Architecture to formulate a plan for this school. Raunio said he did not know if they would recommend its continuation under L&S or its establishment as the ninth college of the university.

Raunio also indicated he had no strong feelings one way or the other, but thought the added cost in establishing an administrative hierarchy inherent in a new college was the biggest drawback to its separation from L&S.

In the social sciences, Hartung said history and political science appear sound. However, he indicated that due to financial stringency and our geographic location, social work and other helping social sciences should be the responsibility of one of the other institutions in the state and not the UI.

He said this would regrettably place limitations on the growth of sociology. However, he said anthropology should be accorded a high priority in future allocations due to their quality work in the pst.

WANTED

BY

Ambassador Auto Services
for impersonating an auto salesman

TONY VIOLA

Description:
Height- 5' 8"
Weight- Said to be on the husky side
Hair, Eyes- mousey brown, dazzling brown
Occupation- Full-time student at the University of Idaho
Disposition- Friendly, reliable, likes to talk to people about cars
Habits- Drives AMC Pacer, has been known to drive other AMC cars (Hornet, Gremlin, Matador.) On occasion has been spotted driving 1976 Subaru. Frequently parks these cars on campus so they can be seen by other students and faculty.

CAUTION

Viola is considered dangerously prepared to deal on any new AMC or Subaru car--if cornered will resort to the sale of a good used car, too. If spotted on campus, approach with confidence, chances are he'll try to make you the best deal in town.

New photography class challenges

by Carolyn Harada
of the Argonaut Staff

If you're a shutterbug or just buggy about photography, here is a shot to improve your photographic abilities in portraits, scenery, and creativeness. A non-credit photography class for amateurs who own 35mm single reflex cameras will be taught Nov. 13 through Feb. 15 at the U of I, with professional photographer Al Kim of Rudy's studio in Moscow as instructor.

The class will emphasize picture composition to improve the quality of portrait and scenery pictures. Techniques for both indoor and outdoor situations will be covered.

The student will learn about his camera, its limitations, and how to rise above those limitations, according to Kim.

"We want to get away from the snap shot idea in using cameras," Kim said. "A 35mm camera has great potential for making beautiful and artistic pictures. All one needs to learn is how to combine the proper light and lens settings with the esthetic values of what you see to make striking pictures."

Other objectives outlined by Dr. Hobart Jenkins, Director of Continuing Education, which sponsors the class, are to learn the use of different kinds of lens, the theory of depth of field, the relationship between shutter speed and aperture size, plus to challenge the camera to the utmost.

Kim said that he will be ac-

ting as an advisor, not as an instructor. He will formulate lesson plans as the class progresses. The class will not deal with the simple basics, he said. He hopes the class will attract people who have the equipment—a good 35mm camera.

If possible Kim asks that students bring their cameras to the first class session Thursday evening.

The people in the class will know how to take and use a camera already, so now is the time to improve the composition and to learn to take better quality pictures, he said.

He will also discuss processing, color negatives, transparencies, flash photography, and the descriptions of cameras and accessories.

He stresses and said that he will stress to his class that "film is inexpensive." He will also lecture on the advantages of certain films.

Class members will take black and white photographs and critique them in class to learn how to improve the artistic quality, lighting, and lens effects. The amateur can expect to learn how to use the 35mm camera well enough to take advantage of opportunities available for free-lance photography, Kim said.

Kim learned basic photography on his own and bases his knowledge on "learning by doing and practice." He graduated from the U of I in architecture and attended the New York Institute of Photography. He took a two month crash course in portraiture at the Institute.

Following the New York Institute method of teaching without a textbook, Kim will instruct the students by visual demonstrations and individual advice. He feels that reading a textbook is an aid, but does not compensate for experience. He will use Ted Demetriades' free-lance photographer work as visual examples. Demetriades won the Idahoan Photo award and is a U of I Forestry graduate.

Kim believes that all the pictures on a roll should come out, however, how good the composition of each frame is, is another question. He believes that the end result is what counts.

Kim has owned Rudy's studio for ten years, and has another shop in Pullman, Washington. He purchased the business under the name of Rudy's and has kept the

nameplate ever since. His wife, Carol, helps him with the background work such as technique involving the photographic lab.

Kim likes to do photography for personal satisfaction, and says that it is nice to hear that people like his work.

"When they say (complimentary) things, then you know you are on the right track to success," he said.

He said that the financial part goes hand in hand with the work. But he doesn't consider photography work. He enjoys doing it, and "whatever one enjoys doing, it isn't work."

Kim feels that the class will be interesting, and is happy and willing to act as advisor. The ten-session class will meet Thursdays, from 7:30 to 9:30 p.m., with time out for

holidays and field work.

Some class meetings will be held in Rudy's Studio, and others in UCC 226, according to Kim. A student may spend from 2 to 4 hours outside of class time to take pictures, if he pursues his interest. Students will furnish their own photographic supplies, Kim said.

Advance registration may be completed at the Office of Continuing Education, on the U of I campus, by telephone (885-6484), by mail, or a visit to the office on the ground floor of the Guest Residence Center.

The fee is \$15, and persons must have a 35mm single lens reflex camera to use. Class enrollment is limited to 30 people, so interested individuals are urged to register early.

More WAMI support needed

The U of I will ask for additional support in numerous operational areas, including physical plant operations, and for an increase in fees for students working in the WAMI program.

Current charges for students in the WAMI program amount to \$550 per school year, including the uniform student fee of \$400 per year. The proposal would change this current extra fee of \$150 a year to \$290 a year.

"This money will not go directly to the University," according to Don Amos, university business manager. "It will go toward the WAMI program as a whole."

He added, however, that the increased tuition would have "the effect" of reducing state appropriations toward WAMI, which now supports the program in part. Some officials

felt this might allow larger funding for other divisions of the university in future.

In other areas, the administration will ask for regents approval of a \$45,000 expenditure for landscaping an area near the Palouse Empire Mall, on Highway 8.

The land area is 2,440 feet long by 35 feet wide, sandwiched between the Palouse Empire Mall and Highway 8.

The administration emphasized in its request to the regents that the land itself is not on the land being lease to Earl McCarthy for development.

The cost would go toward an architect's fees and actual clearance of the area.

The land is now owned by the highway department, according to the notice, and the university had "agreed to improve the land," though when

such an agreement was made is not clear.

In other matters, the university will ask for additional payments to be made to faculty and staff for extra work done aside from their normal responsibilities.

Change orders for several contracted university projects will also be considered. The controversial remodeling of the university presidential offices (see related story) have so far run over the contract total by \$313. Another project, one concerning masonry repairs, has run \$21,000 over budget so far. The project was originally contracted for \$39,099; the new total is \$60,335.

The meeting will be held Thursday at Boise State University; the U of I agenda is scheduled for 4 p.m. that day.

Protor & Bergman comedy team from Firesign Theater to appear

Turn on your mind to "TV or Not TV" Friday for Proctor & Bergman, half the wits of the Firesign Theatre, will do their theatrical whimsicals at 8 p.m. Nov. 14 in the SUB ballroom.

This comedy team has been appearing in clubs throughout the country, in a comedy show that is magically produced from two road-worn suitcases full of props. During their act called "TV or Not TV," they

portray many strange and oddly familiar characters such as the loveable Fred Flamm and laughable Clark Gable; the long-winded Senator Flatus Prolongus, and the mad emperor of the Roaming Empire Coliooga. Also the once-honorable Bosco Herr, speaking for money; the all-pro superballer himself, Bobby Roberts; Ken Hinton, first victim of the spaced age; Randy

Rothnoodle and Automatic Captain Curse Lowman, of the Sensuous Cirque Internationale, plus such favorites as "Spud" Palmer singing his international hit, the Communist Love song.

After a successful six-year tour of duty with the Firesign Theatre, these two guys from Yale Phil Proctor and Pete Bergman are smashed on the continued on page 15

MACKLIN'S SIMPLIFIED GUIDE TO IDAHO POLITICS THIS WEEK ... DAVE WARLIKE ASUI PRESIDENT

DAVE WARLIKE THE ONLY CHOICE!

WELL, IT'S THE POLITICAL SEASON AGAIN SO YOU OUGHT TO DECIDE WHO YOU WANT TO RULE THE ASUI. THIS IS THE CURRENT KING - HE IS TOUGH, COURAGEOUS, AND A LEADER OF MEN. HE ALSO HAS ENOUGH EXPERIENCE TO RECOGNIZE THE VALUE IN BRIBING HIS WAY INTO THE AREA COMIC STRIP.

SO NEVER MIND LITTLE DETAILS LIKE THE FACT THAT HE IS HATED AND DESPISED BY THE REGENTS AND THE UNIVERSITY ADMINISTRATION HE HAS A NICE SMILE.

NEXT WEEK: MORE PRESIDENT HOPEFULS

Events Argonaut

A ballroom dance session will be held tonight at the WHEB II. Beginning lessons are from 7-7:30 p.m., and everyone is welcome from then till 9 p.m.

The Christian Science Organization meeting will take place at the Campus Christian Center Thursday at 6:30 p.m.

Phi Epsilon Alpha will have a noon meeting Wednesday in the lounge of the Home Ec. Building. Guest speaker will be Marie Carano, director of the School of Home Economics.

"Good-bye Dr. Freud - the Psychology of Women" will be the topic of the Wednesday brown bag luncheon at the Women's Center.

Thursday afternoon, from 1:30-4 p.m. at the Women's Center, there will be a talk on "How to Keep your Houseplants Alive and Well This Winter."

The Associated Student Wives will meet Wednesday at 7:30 p.m. in the FOC lounge. The meeting will be a crafts night.

The program of the American Association of University Women will be a report on the Rural Woman's History Project. The project was made possible by a grant from the Idaho Humanities. Meeting will be held at the Moscow Hotel Wednesday at 6:30 p.m.

There will be an Italian dinner at St. Augustine's Sunday at 5 p.m. Cost is \$2.

"Echankar: the Key to Secret Worlds" will be discussed by its author, Paul Twitchell, Sunday in the Apaloosa Room of the SUB at 7:30 p.m.

Legislative districts 5, 6, and 7 will hold a mock caucus for delegate selection Friday at the Nez Perce county courthouse in Lewiston at 7:30 p.m.

...more on Firesign
continued from page 14

streets with a new record on Columbia Records.

The Firesign Theatre has released six albums which have sold over a million copies collectively. They have received critical acclaim in every possible publication from Life to Rolling Stone.

Proctor and Bergman have separately toured both the eastern and western coasts; they have appeared on TV and in movies including their own film "The Martian Space Party," directed by Steve Gillmour, who also produced "TV or Not TV," and they even have their own nationally syndicated radio show, "Dear Friends", not to mention their best-selling souvenir program, "The Firesign Theatre's Big Book of Plays", published by Straight Arrow Press.

Advance tickets for the performance are \$1.50 and can be obtained at the SUB Information Desk and \$2 at the door, for admission for all.

If you think YOU might be the right person for the job, contact either Mike or Andy at the Argonaut or call 885-6371 and arrange for an interview.

U of I student strikes oil

An Idaho graduate student did his part, this summer, to alleviate the energy shortage.

Rolf Aadland, a doctorate candidate in geology, discovered three new oil sites off the coast of Louisiana, while conducting experiments for Ocean Products Inc., a subsidiary of Ocean Drilling and Exploration Co.

As a petroleum exploration geologist for the company, Aadland picked the drilling sites for the three wells, which should add 2.5 million barrels to the 25 million barrel total reserves in the field in which the petroleum was discovered.

Aadland's discovery means an extra \$25 million dollars for his employer and increases production from the development he was working on, by 50 percent.

Here at Idaho, Aadland is studying ancient Cambrian limestone deposits in the northern part of the state, in connection with his doctorate program. Working with geology Professor Jack Smiley, Aadland is attempting to reconstruct the environmental history of the formation of these deposits.

The rock Aadland is studying stretches from Lake

Pend Orielle, Idaho, to Libby, Montana.

According to Aadland, studying the rock formations may have some economic value for Idaho. "It is a known fact that the environmental background of rocks is often related to deposits of metals, such as copper, lead, and zinc," he said.

"Besides improving our understanding of the earth's history, this research has some economic value too," he added.
