## Ananda Marga initiates fund drive

by KEN EKLUND, president of the Moscow Ananda Marga.

The student organization Ananda Marga is organizing a fund raising campaign for earthquake relief in Guatemala, including a door-toappeal for

Ananda Marga is an international socio-spiritual organization dedicated to the development of the individual personality through meditation. In 1970 it established the Ananda Marga Universal Relief Team (AMURT), an international relief organization with a purpose of giving necessary aid and relief to those suffering in the wake of natural calamities anywhere in the

world. It was charged with the responsibility of rendering immediate aid in the form of basic shelter, food, clothing and medical supplies, and long-term aid, such as housing, community development, educational and medical facilities to survivors and victims disrupted by

The unique feature of AMURT is the requirement that all its members possess an intense desire to serve the

suffering humanity; that they be willing to undergo hardship and difficult living conditions, be willing to work hard and to sacrifice personal comforts and serving out of a deep love for humanity.

To insure that all funds collected go directly to the disaster-stricken victims, no worker is paid a salary: all work is voluntary, and there are no "middlemen" or hired workers whatsoever.

Its members have served in India with extensive drought, cyclone, and earthquake relief. During the Bangladesh crisis, AMURT established over 20 relief camps and daily provided food, clothing and shelter for thousands of refugees. AMURT distributed basic survival supplies to the victims of a severe earthquake in Turkey.

In the Managua, Nicaragua earthquake an AMURT team administered medicines to 500 refugees daily at 5 medical clinics, distributed 6 tons of food monthly at 9 refugee camps, and provided thousands daily with high-protein meals, milk, and vitamin supplements.
When the rains finally came the

volunteers distributed 3 tons of corn and bean seed to rural farmers, as well as vegetable seed to schools and hundreds of small families for home gardens.

At the present time, an experienced AMURT team is on the site in Guatemala. Relief work began minutes after the quake struck in the early morning hours of February 4th. The twenty-five man team is on location in earthquakedevestated Guatemala City, and is providing medical relief and assistance in reconstruction to the multitude of homeless victims.

Funds are desparately needed to provide medical supplies and transportation for additional doctors, nurses, and medical equipment.

As a relief agency officially approved by the Guatemalan government, AMURT has been serving the very poorest area of

Guatelmala City. In this area, hundreds of cardboard and tin dwellings built on either side of a half-mile deep canyon were completely demolished avalanches. AMURT in conjuction with the Red Cross, Catholic Relief Organization (Caritas), and CARE has been speeding delivery of the enormous quantities of food and clothing supplied by the U.S. Government and international relief organizations.

The opportunity to contribute to this relief effort is available to you right now. Extend your hearts to the Guatemalan earthquake victims by donating to AMURT through local members of Ananda Marga. Any questions you might have concerning this fund-raising drive or concerning Ananda Marga's free meditation classes can be answered at 882-3489 or 882-1279. All donations are tax-deductible and may be sent to AMURT in care of Ken Eklund, 1120 S. Hill Terrace, Apt. 7, Moscow.

#### Idaho designated bicentennial camp by GINA WISCOMBE

Get with the spirit of '76—the U of I has been designated a "Bicentennial Campus."

As one of approximately 200 Bicentennial colleges and universities across the nation, the U of I is now authorized to fly the special Bicentennial flag and use the official logo.

According to Carolyn Cron, director of University Relations, a committee has been formed to plan and conduct activities in conjunction with the nation's 200th birthday. The committee was appointed by President Hartung in December, and consists of 15 members from all areas of the university. Miss Cron was chosen to head the committee.

She said many of the planned projects and activities are now underway. The committee has begun work on:

—A University of Idaho heritage brochure. -A special issue of "Context,"

the alumni magazine, with a historical overview of the university.

-A campus map indicating "old and new."

-A pictorial display of university history for use at county fairs and a special showing in the Statehouse

the second week of March is being developed, Miss Cron said. In addition, a university-wide display of historical items belonging to various departments of the university is to be exhibited during Parent's Weekend Commencement Weekend.

Any departments wishing to donate articles suitable for the historical display should contact committee members Jim Barnes at 885-6163 or Charles Webbert at

"The committee encourages all departments and organizations on campus to participate in the celebration of the Bicentennial," said Miss Cron. They are asked to adopt projects or make displays and inform the committee of their activities. The Ballet Folk dance company and the Vandaleers have already planned special programs around the Bicentennial theme.

Soon after the Bicentennial committee was chosen, the members decided to apply for recognition by the American Revolution Bicentennial Administration. Word was received in January that the U of I had been selected as one of the campuses to receive the national recognition.

# Caldwell ag. land maybe in jeopardy

The lease has been signed, agreements made - but university use of the agriculture land at Caldwell may yet be in jeopardy.

According to Milton Small, Director Education, Governor Cecil Andrus is considering placing a 4-H Cattle program on the land now occupied by the U of I research land.

Andrus is chairman of the state land board, which governs endowment lands such as that at

Various university officials had refused to comment on the move by

Small emphasized that the 4-H program is only being considered at this time, and is "only one option" now being studied. U of I officials including President Ernest Hartung and Financial Vice President Sherman Carter learned of theoptions at an "emergency meeting" called in Boise last week.
But "the only real emergency is the time factor," Small said. He

said "things would have to move fast" in order for the Veterinary training facility now planned to occupy the land to be ready by "September, 1977." The U of I-Washington contract had called for a June 1, 1977 completion date.

The facility is a joint venture with Washington. The U of I has contracted with that state to build a

veterinary facility; Washington has an accredited medical program, which the U of I lacks.

The U of I recently learned it had to lease the land in order to build the recently lease from the State Land Board.

However, according to an opinion from the Attorney General, (see story on p.1, January 23, 1976 Argonaut), the State Land Board, of which Andrus is chairman - has the authority to revoke leases at any Small did not say the 4-H project

could not co-exist with the training center. "At issue," he said, "is whether they should co-exist. Small said he "assumed" the

decision would be made soon, as time is running out for the U of I to meet the contract deadline.

The U of I Board of Regents will meet March 4 and 5, according to Small. He said this meeting would be oriented mainly toward primary and secondary education, and did not foresee many U of I matters

On another matter, he said a proposed committee to study the fee structure at Idaho educational institutions has not yet been appointed by Board of Regents President Janet Hay. He did expect such an action would be taken by or at the Board meeting.

# Tutoring service is now available

by ROD O'DELL

Having trouble with math? Maybe chemistry has you down and mid-terms are but a short while away. A private tutor could be the answer. Too expensive??

The Tutoring Service of the Learning Resource Center can provide a private tutor in almost any subject--and it's free. There's no red tape involved, all that's needed is to contact the Learning Resource Center and fill out a card. A tutor • will be assigned immediately. The student contacts the tutor and they set up a mutually agreeable

Study skill classes, such as remedial reading and writing are also available. A study skill class will be starting second nine weeks and will cover notetaking, exam preparation, and exam taking. Students can register any time before March 22 at Room 110-C in the Education Building.

Living groups can arrange for a study skill mini-course to be taught at their residence. The mini-course includes a 60 minute lesson on a study skill and information on how

There are about 600 students per

semester using the service, but the center advises there is room for About 35 tutors are currently

active in the program, each averaging about 4 students per semester. Tutors are paid \$2.20 per hour and work about 4 hours per week. Some tutor for credit and get 1 or 2 credits per semester for their

Students who tutor are required to have a 3.0 gpa in their tutor subject, and must complete an orientation course before working. Tutors are taught to spot problems and are given informal correction procedures to follow. Tutuors are also required to follow specific guidelines and keep records as they work. Tutors are especially needed in math, chemistry, biology, biometry, and statistics.

The tutoring service is headed by Jeanette Driskell, who holds her M.A. in English from the U of I. Driskell returned last week from a conference in Boise on tutoring

At the conference, Driskell learned that the U of I program is unique because it is free. Most

universities charge for tutoring and she disagrees with this practice.

"This gives the student with money the advantage...and puts tutoring help out of the reach of financially di students," she said. disadvantaged It was also learned that the U of I

tutoring closely follows the methods that latest research shows most effective. The U of I program relies on personal interaction between tutor and student and applies the skills the student learns directly to their class work.

Driskell brought some ideas back with her that she hopes to apply here. She hopes to institute a better tutor training program, use more tutors, and better coordinate tutors and faculty. Driskell also wants to beef up the advisor program so it will provide follow-up for freshmen after registration, and to start a subject study course, like how to

study math, etc.
Starting in 1971 with volunteer tutors, Driskell has been instrumental in shaping the present tutoring program. The tutoring service is presently funded jointly by the ASUI and the university. The

does extinction due to budget cutbacks because of its proven results.

The FOC third floor is being remodeled into the Learning Resource Center, and when complete will have study skill classrooms and a tutoring area. Tutoring will be done there so it is more effective and closely supervised.

Driskell, who will complete her Doctorate as a learning specialist this spring, said that through the tutoring service she hopes "to take part in a coordinated program between students administration that will provide supportive academic help for all

Driskell urges all students with learning problems to come to the Resource Center. Classes, tutors and personal help for composition classes are available. interested in tutoring, and living groups interested in a mini-course are advised to contact Jeanette Driskell or Elinor Michel at Room 110-C, Education Dept. or call 882-6520. Office hours are 9 to 5, Monday through Friday.

# Student drives on Hartung's lawn

A University of Idaho student has been charged with reckless driving after, according to a police report, he drove his 1975 Ford pickup truck through university president Ernest Hartung's front yard Friday night, causing \$1,200 damage to his truck and \$300 to Hartung's landscaping. Daniel L. Jenkins, 23, was cited

sometime after the incident by Moscow police who received a phone call from a mailman early Saturday that Hartung's yard had been run over and damage was extensive.

The police report did not say how the investigation that followed led to

At any rate, police reconstructed

the incident in their report as follows: At some unknown time, Jenkins

was driving at about 50 miles per hour on Nez Perce Drive and lost control in front of Hartung's house.

The truck jumped the curb, ran up an embankment, over a tree, and a light pole, continued on over another curb into Hartung's driveway, struck the opposite curb, veared and went down the driveway 300 feet, bounced off the righthand curb another time, left the driveway over the lefthand curb, hit a steel gate and flattened it, before negotiating a final curb and re-

entering the roadway. Jenkins was not injured, according to the police report.

## Tests prove sex drive is lowered by alcohol consumption

by CHRIS DIPPEL

How does the drinking of alcohol affect behavior? From personal experience many people may say that short term consumption leads to changes in character which are pleasant, relaxing, stimulating, or dangerous, depending on the original mood of the person doing the drinking and the setting in which he drinks.

But how does long term, or chronic, consumption affect behavior? This question is the object of investigation by a U of I associate professor, Dr. J. Homer Ferguson of the Biological Sciences

Department; and one of his graduate students, Eugene Fink, a master's degree candidate. Dr. Ferguson, whose researches also include studies on the physiology of arctic mammals, was interested in examining the role of alcohol in aggressive behavior and the affect of its ingestion on the body's balance of hormones.

The hormonal state of man is known to be affected by such influences as temperature and sunlight, diet, stress, and even something as unlikely as a sudden

Therefore alcohol, a powerful drug, may produce serious derangements of a person's behavior by producing slight changes, occurring over a long time, on one's hormones.

The research of Dr. Ferguson and Fink into this question began last spring when they received a grant from the University Research Council. They initiated a series of experiments in which male mice were given a regular diet and an alcohol solution as the sole source of Mice, a favorite research tool, readily drink the alcohol and, since the dosage is low enough, never show any outward signs of intoxication or changes in behavior, much as a person, who drinks occasionally but not to excess is apparently unaffected.

These mice, however, are territorial, and when placed in a cage with another of their species, will pounce upon and bite the other mice until a dominant mouse is established. It was the effect of alcohol consumption on this so

called spontaneous aggression that concerned the researchers.

Their results, some of which have been prepared for publication, indicated that those mice drinking the alcohol were less prone to attack and made shorter, less effective attacks. But how does this relate to humans, who, it is commonly believed, become more aggressive and violent when intoxicated?

First of all the mice in this study received moderate amounts of alcohol over a long period of time, and,' second, their aggressive behavior is closely related to their blood levels of testosterone, the hormone which, in mice as well as in man, influences the development of the male sex organs and secondary sexual characteristics associated with an adult male.

A conclusion of the study was that circulating amounts of testosterone may have been reduced, consequently depressing the aggressive behavior of the mice and the development of accessory glands necessary for reproduction, both of which were observed in the study.

Thus, although short term alcohol drinking by humans may release inhibitions and produce aggressive actions, chronic consumption may do the opposite, decreasing aggressive tendencies and even impairing reproductive function by affecting testosterone

The results of this study and others in the same area are published in scientific journals and only find their way into the popular press when the findings can be called sensational. But it is this type of work that is the basis for treatment and care of America's nearly nine million alcoholics, and may some day show that long time consumption of even moderate amounts of alcohol can have detrimental effects on behavior, personality, and reproductive

Undoubtedly, a conclusion of this type will have little effect on the drinking habits of Americans today, but may influence future generations. Alcohol, once called "a psychological blessing, and a physiological curse," may turn out to be a curse in both categories.

#### Idaho debate team takes

The U of I debate team won the Idaho State Championship Sweepstake Trophy in Boise recently, a first for the Moscow

Also on the debate team were Nikki Newell and Wayne Rush. Newell is a senior French major and Rush is a freshman agriculture

#### Vitamin overdose found to be harmful, not helpful

Are you on an extra vitamin "kick" during the "flu" season?

If you are, chances are you're wasting your money and may even be harming yourself, according to Esther Wilson, extension nutrition specialist for the U of I.

"Vitamin C and the B complex vitamins are water-soluble," notes Mrs. Wilson. "This means you cannot store them in the body. Any amount in excess of saturation levels of the body tissues will be discarded in body waste products.

On the other hand, excess amounts of fat-soluble vitamins--A, D, E, K--will be stored in the liver and cannot be easily discarded. If large doses-20 to 30 times the Recommended Dietary Allowances (RDA) for a vitamin, or as little as five times the RDA for vitamin D for children--are continued for a period of months, toxic or poisonous symptoms can result.

Young children particularly are susceptible to overdoses of vitamins A and D, according to Mrs. Wilson. She says such overdoses are not usual from ordinary foods but can easily result from taking highly concentrated vitamin A and D in

liquid or capsule form. Symptoms of an excess amount of vitamin A include loss of appetite, irritability, certain skin problems and loss of calcium from the bones. Farly vitamin D toxicity symptoms can be loss of appetite, nausea and diarrhea, with more serious symptoms developing later.

"Drugs can interfere with the body's use of vitamins," says the U

of I specialist. "Oral contraceptive pills, for example, can affect the use of some of the B vitamins and **SUMMER 1976** vitamin C, thereby increasing their

need. Such dosing should always be under a physician's direction. The best insurance for good health, says Mrs. Wilson, is to eat the four basic food groups daily-milk, fruits and vegetables, meat or meat alternates, and bread and cereal--in their recommended amounts.

#### STUDENT EMPLOYMENT DIRECTORY

Thousands of summer jobs in camps, resorts and National Parks. SEND \$3.00 to Shaker Prairie Publications Dept. A Route 3 Carlisle, Ind. 47838

#### SEND info table to be set up in SUB

Organizers of the Scholarship Endowment National Drive (SEND) are counting on personal contacts to make the student portion of the drive a success, and toward that end they have named more than 70 students to volunteer positions in the campaign.

"The best selling job we can do is on a one-to-one basis," explained student chairman Kenton Bird.

'That's why we've selected SEND coordinators for every campus living group, as well as for off-campus students and special student groups,

SEND has set a goal of \$40,000 in pledges from students to be paid after the student leaves school. After the student drive is completed, cash contributions will be sought from the university's faculty and staff, the community of such as law students.' Moscow and U of I alumni.

Taking the campaign's message to off-campus students, Blue Key, a men's honorary, will be staffing a SEND information table in the lobby of the Student Union Building from 10 a.m. to 5 p.m. today, tommorrow and Thursday, and again Monday through Wednesday next week. Additional information on the campaign and student pledge cards will be availabe at the information table, Bird said.

A scene from 'The Plough and the Stars,' which opens Wednesday and runs through Saturday. All performances begin at 8 p.m. in the Performing Arts Center. Shown from left to right are Dan Hiatt, Bruce

## "The Plough and the Stars" Ireland's vicious circle

'The insanity of war,' is how Forrest Sears, Associate Director of the U of I Theatre, sees Sean O'Casey's play, "The Plough and the Stars." Considered by many to be the greatest Irish drama of the Century, O'Casey's masterpiece, the third major production of the Theatre's season, will be performed under Sears' direction at the Performing Arts Center, February 25, 26, 27, and 28 at 8 p.m. Tickets are available at the SUB ticket desk and at the door of the Performing Arts Center. U of I students with activity cards will be admitted free. Adult tickets are \$2.50 with a special price of \$1.50

for high school students and children under 12.

"The Plough and the Stars" deals with the events, comic and tragic, that led to the Irish uprising against the English, culminating in the Easter Rebellion of 1916. With the inner city of Dublin as its setting, the plot traces the causes of Irish unrest and illuminates the motivations behind the trouble in Ireland today. Professor Sears believes that "the play says much about the insanity of war. The time is ripe for the play, as so many contemporary problems of Ireland stem out of the Easter Week Rebellion of 1916.

In the principal roles of Nora and Jack Clitheroe, newlyweds who accidentally get caught up in the Rebellion, are Sally Ahlstedt, a

graduate student, and Mitch Webb. a junior, both in theatre arts. Also starring as Peter Flynn, a major character in the uprising, is Dan Hiatt, a junior in theatre arts. Other members of the cast are Bruce Gooch, Karen Kimsey, Denny Hartung, and Bill Smith.

Timothy O'Reilly, a music student, will perform ballads, including those of the

# Who is Holly Near?

That is a good question. To Ellen Michaels of the HERALD EXAMINER, Near "busts the molds of the everyday folksinger."
To Robert Hilburn of the LOS
ANGELES TIMES, she "is not only a songwriter with a wide range of emotional shadings, but is also a skillful and delightfully unpretentious performer." And to Near herself, Holly Near performs music which is "conscious entertainment" . . . "dedicated to the sharpening of awareness and the raising of consciousness specifically that of women' consciousness, (Richard Cromelin, LA TIMES).

You can find out for yourself just who Holly Near is because she will be at the UI Student Union

Ballroom on Friday, at 8 p.m. Tickets at \$2.50 each are available at the SUB information desk, the U of I Women's Center, Micro Moviehouse. Tickets for the concert, which is being sponsored by the U of I Women's Center and Moscow Friends of Near, are also available by mail from Bookpeople, 512 S. Main St., Moscow.

Accompanying Near will be pianist, Jeffrey Langley, and featured at Near's first stop in her Pacific Northwest tour will be Bruce "Utah" Phillips, a guitarist and songwriter from Spokane, Washington. Performing in behalf of the Idaho Study Group, Phillips recently toured with Pete Seeger on

the east coast and performed in concert last year at Carnegie Hall. One of his songs, "Rock, Salt, and Nails," was recorded by Joan Baez.

In addition to her talents as a writer and performer, Near appeared in the Broadway company of "Hair," and in the films "Slaughterhouse Five" and "Minnie and Moskowitz."

Ms. Near has three albums out, all of which are on Redwood Records, a family-operated company located in her hometown, Ukiah. California.

Matt Kramer FOLKSCENE reported: "If you get the word that she's around, don't take a chance of missing

## REVIEW Grand performance: David Bromberg and band by MARION BLACK by MARION BLACK

David Bromberg walked onto the SUB Ballroom stage Saturday night to a crowd of approximately a thousand enthusiastic listeners. His performance and success was beyond even the audience's

Bromberg, who demonstrated his virtuoso talent on acoustic and electric guitar, fiddle and manolin, performed a concert that will not easily be topped by himself or other musicians. His showmanship and his talent combined, succeeded in raising the crowd to their feet for three encores before he was finally allowed to leave.

Bromberg's music, combination of many styles, is unclassifiable. Opening with the once popular "Six Days on the Road," he carried out the evening by performing most everything from folk, old Beatle rock-and-rollto down home blues.

The evening's performance was highlighted by the talents of Bromberg's band of six very versatile musicians.

Firman. playing baritone, tenor, alto, and soprano saxaphone and flute, proved himself to be the most accomplished soloist of the group. Firman, also the most melodic soloist of the band, has the unique ability to feel out the other members and blend in without losing his own identity as a musician.

Other members of the band.

confinement of labels.

#### Women's Center topics: Divorce, sororities

Divorce laws and the images of sororities are topics for discussion Feb. 24 and 25 at the University of Idaho Women's Center noon

"Your Rights-Divorce," the last in a five-week Focus Series on 'Our Legal Rights--Women and the Law, 'will be addressed at noon Tuesday by Donna Adams and Kathy Hardcastle.

Adams, a native of Boise, is a first year U of I law student. She has worked on the Human Rights Commission and for the Consumer Protection Division of the Idaho Attorney General's office.

Hardcastle is a second year U of I law student, originally from Atlanta, Ga. She has worked as a social worker for five years and a community development volunteer

'The Women's Movement and the Sorority--Friend or Foe?" will be the noon Wednesday Brown Bag program. A panel discussion by sorority women will center around the problem of diverse yet similarly rigid stereotypes which are often assigned to sororites and to the women's movement.

The nature of stereotypes in general will be discussed and an attempt will be made to discover Moscow-Phone 882-3513 Main Office-Lewiston 743-2091

#### Dome usage questioned

Is football king of the dome?

The athletic department seems to think so.

Recently, the Activities Center Board (ACB) was presented with a request to roll down the turf for the month of April. This measure would provide the renown Vandals with a suitable environment for spring football practice. At the same time, it would curtail usage of the facility for all other parties.

The major rationalization behind building Moscow's Great Wonder was to provide a multiple-use facility which would serve all students.

The roof over the stadium costs each student at the U of I \$5 per semester. If the turf rolling proposal passes, the peasant majority will be allowed a pittance of five weeks of recreation in the activities Center this spring.

If the counter proposal to not roll down the turf succeeds, the stadium will be open to all students for a period of nine weeks.

On Saturday the activities center opened for general recreation. It boasts five tennis courts, two basketball courts, one court for volleyball and a running track.

If you desire continued access to the dome throughout the spring, attend the meeting of the ACB today at 3 p.m. in the Borah theater, and make your voice heard.

## SCOTT REEVES

#### Last day of first primaries

This is the last day of the first primary of the '76 election year, and New Hampshire voters are placing their support on the man whom they think has the correct answers concerning the issues. However, the issues which flow from the candidates' mouths today won't be the same issues come election day.

Since the revolutionary fervor of the 60's has equalized into a singleness of unconcernable rubbish, the candidates are fabricating and exaggerating the issues out of proportion in order to focus attention in their direction.

These men tend to care little about cures, and even less for their positions on important matters. Our President has been changing canoes amid stream lately concerning the Federal Budget, especially since Reagan's mouth has moved him into viable nomination position.

Ford has been getting wet lately because he has been trying to climb into Reagan's canoe, especially since Reagan has refused two, maybe 3 administration positions.

For example, President Ford, speaking to the National Governor's Conference on the eve of the New Hampshire presidential primary, urged that additional power over federal funds be given to states, while his Republican opponent, Reagan, has been keeping his mouth shut concerning his \$90 billion Federal budget albatross, (which was concerned with giving Federal power back to the states.)

Buried under all this rubbish are the solid plans for a secure future. For example, an intellectual named Sargent Shriver submitted to the public a 22 page document dealing with the economy. Using a computer, the plan calls for a public works program (creating 1.6 million jobs by mid '78), stimulating private employment, continuing last year's tax cuts, providing low interest rates on loans to small business, stockpiling food and petroleum (creating reserves to stabilizing prices and avoid shortages), developing alternative energy sources, enforcing anti-trust laws more stringently and imposing wage-price guidelines.

This may seem like a large order, but at least it's not the hot air which has been manipulating the voter since the Eisenhower campaign.

Apparently, the politicians are not out to cure any problems, although each claims to have the ultimate answers to the supposed threats against the system. This Machievellian technique to create cohesion in the populace might win the election for some lucky candidate, but could backfire on citizens like it did in Germany in the

New Hampshire may be very well informed, and may have correctly chosen the right Presidential candidate for the last 40 years (except three times) but primaries weren't created in heaven.

Therefore, each of us has a duty to watch the long, tiring primary process in order to make an intuitive selection. Politicians make strange bedfellows, and for the next four years America will have to live with the selection. So base your judgement on past performance and honesty.

#### Fees for Grads

The University of Idaho Board of Regents has set a fee of \$10 to be paid by each applicant for admission to the U of I's Graduate School or College of Law according to Administrative Vice President Sherman Carter.

The fee is non-refundable. However, it will be applied toward the applicant's fees for the semester or summer session for which he or she is accepted (if the prospective

student is unqualified or, if qualified, he or she does not actually enroll for that semester or summer session, the fee is forfeit).

The minutes of the Regents' meeting show that the purpose of the fee is to "help defray the cost of processing applications and providing material to applicants."

The fee was originally set at the Regents' meeting of May 6, 1971.

# Stamper hears priorities

by MICHAEL MORRIS

Student priorities concerning auxiliary services at the U of I were discussed at a meeting with Mike Stamper, student representative on the Budget Hearing Board, Friday

the Budget Hearing Board, Friday.
"What we're faced with right
now," said Stamper, "is a million
dollars less than what we really need
to function as a university next
year."

The purpose of the meeting, he indicated, was to come up with student priorities that could be presented to President Hartung, which Stamper did yesterday.

When asked how his presentation to Hartung went, he replied, "It turned out quite well. It turns out that the deans, and the vice-president, and the students are all along the same

lines.''
''The main thrust of what everyone seems to want to protect is the educational environment,'' he added.

In discussing funding problems at the U of I, Stamper promptly referred to the state-wide financial problem confronting all higher education institutions. "The cost of funding the turn around in Boise State from being a junior college, essentially five to six years ago, and trying to turn it into a university now, is costing a tremendous amount of money and it's questionable what the benefits are," said Stamper.

He went on to indicate that this is costing U of I students cut-backs in programs as well as educational opportunities.

The state of Idaho, according to Stamper, hasn't the necessary resources for three universities and the final result will be three mediocre universities in the state.

The regents will be having an informal meeting in March. At this time, they will be presented with a general overview of how low appropriations issued the U of I have affected this university.

In April the regents will meet

In April the regents will meet again to formally approve next year's budget at the U of I.

"Any student who has any kind of input into this or any insight into what might possibly be cut back, where we might trim fat without injuring anybody...get in touch with me," urged Stamper.

# Dome use suggestions

Editor:

Assuming that the front page article concerning the Kibbie Dome in the February 20th edition of the Argonaut is an accurate report of statements made by Messrs. Hedges and Beatty, we feel that it is essential to respond to certain of the information disclosed.

In the first place, we are concerned to see policies for student and faculty use of the Dome being based upon last semester's student use of the facility, as only the football turf existed up until December at which time the facility was closed to begin construction on the basketball surface. Thus, aside from participation in an occasional soccer game, infrequent intramural practice, and some gym classes, few people used the facility because it offered little more than any other physical activity center on campus.

However, the Dome is now equipped with tennis courts, basketball courts and a high quality indoor track, and because of this, there is every reason to believe that the university community will take advantage of the facility now that it has been opened to them.

Secondly, we feel that the use of the tennis courts should be regulated by a reservation system, not by merely a first-come, first-served basis. Because fall and spring use of the outdoor tennis courts is a fair indication of what to expect from tennis players, there will be certain periods of peak demand and other periods when most of the courts will be empty.

Additionally, during these times of high demand time limits are frequently overlooked. The solution to these (two problems is elementary: 1). to establish workable reservation system so that those who want a guaranteed court may sign up for one 24 hours in advance; and 2). to have court use turn over at a set time every hour.

A system which allows players to sign up a day ahead of time and requires players using the court to vacate at a specified interval if others are waiting would simplify turnover.

Furthermore, such a system would maximize utilization of the facility, as tennis players will be more likely to enjoy the courts at all hours if they know they will have a court reserved when they get there than if they have to chance an open court or wait an hour or more before playing

playing.
A third source of concern arises from the use of the Dome for non-university or non-athletic purposes. We recognize that the Kibbie Dome is a facility which has a broad range of potential uses, and that not all of those uses are necessarily directly related to the university's programs.

Indeed, we feel that the Dome should be available for community and state-wide activities, but only at a fair rental price. We assume that the Moscow Chamber of Commerce is paying a reasonable rental fee to cover the use, heating, and lighting for their upcoming Home& Recreational Show, and we are pleased to see that the facility can be of service to the entire Moscow

Although we feel that the dome should be a multi-purpose facility, we would not agree to use of the facility by non-university organizations in the absence of a fair

rental charge or extenuating circumstances for charity or otherwise.

It would be unreasonable to allow a non-paying outside user to have priority over students who pay approximately \$70,000 yearly for the facility

Furthermore, the managers of the Dome would receive increased student support for non-university uses of the facility if they were to announce well in advance the proposed activities and charges assessed for using the Kibbie Dome. Open communication along these lines would allow students to plan their activities around the unavailable dates and would prevent any misunderstandings which might arise regarding rental for the use of the Dome.

Fourthly, we are dubious of the merits of the proposal to spread out the turf for the spring football training session in a month or so. The university's athletic facilities should be used in a means which will alow for the greatest use by the greatest number of people.

The Dome has made it possible to have indoor tennis courts; it has increased the number of available basketball courts, and it has provided a fine indoor track. Nonetheless, if the Dome is reconverted into a football facility, winter enjoyment of these sports will be curtailed.

Students and faculty who would use the facility in its present state will have to hang up their rackets until spring, and the basketball courts in the men's and women's gyms will return to their usuual overcrowded condition.

The football team, on the other hand, does have an alternative to not playing at all. For years the team has had spring training outdoors. We suggest that if the facilities now in the Dome are being enjoyed by a greater number of people than composes the football team, that the present courts should remain and the football team, as in the past, should get into shape on the outdoor practice field. By deciding whether or not the Dome should be reconverted into a football stadium on the basis of the number of users, the best interest of the university will be served, as the use of the facility will be maximized.

We respectfully submit that the Dome managers give these suggestions due consideration and implement uses and regulation of those uses for the greatest benefit of the university.

Bruce S. Bistline Sally G. Tenney Anne Solanen Caren Burke

# Let's right the record

An Open Letter to the U of I College Republicans:

Concerning the passage of Idaho's Presidential Primary legislation, let's set the record straight and give credit where credit is due. In 1974 your own Republican Party leaders were unwilling to give you the support you requested so you came to the Democrats for help.

Governor Andrus and all other Democratic state officials supported the Presidential Primary, and the Democratic Party endorsed the Presidential Primary in its 1974 party platform. As you may recall, the 1974 Republican Party Platform failed to endorse the College

Republicans efforts to obtain a Presidential Primary for Idaho.

In the 1975 session of the Idaho Legislature, Senator Chick Bilyeu, a Democrat from Pocatello, led the floor debate in the Senate for passage of the Presidential Primary bill. Half of the Democratic Senators joined with a majority of Republican Senators in passing the bill in the Senate. In the Idaho House of Representatives not even half of the Republican members supported the Presidential Primary bill whereas two-thirds of the Democrats voted in favor of the bill's passage.

If the House Democrats had followed the dubious "leadership" of the House Republicans on this measure, the bill would have died a quick death - and you know it.

Also, had it not been for the strong support for the Presidential Primary initiative demonstrated in a petition campaign in the summer of 1974, it is likely the legislature would never have given the bill serious consideration. The very successful drive to obtain signatures on the Presidential Primary initiative was a bi-partisan effort with several Democrats including Forest and Amy Church, son and daughterin-law of Democratic U.S. Senator Frank Church, participating.

The College Republicans should be commended for initiating this very progressive legislation. However, since you were more than willing to share the responsibility and work of getting the Presidential Primary bill enacted into law, it now appears both shallow and petty for you to attempt to take all the credit for the bill's passage. That credit, like the benefits derived from the Presidential Primary, belongs to both political parties.

If the College Republicans continue in their blatant attempt to earn political brownie points by misrepresenting political reality, they are apt to learn some invaluable lessons on how not to make friends and influence people.

Betty Hansen

# Demo's not just youths

Editor:

The Democratic party is not the party of youth. It is the party of all who wish to belong. Of course, a larger percentage of young adults consider themselves Democrats than Republicans.

Fortunately for the youth, since the Democrats' McGovern-Fraser reforms both parties have encouraged youth participation.

In Idaho the Democratic and Republican parties approach youth involvement in the party differently. The Republicans have established

youth organizations separate from the party proper and maintain youth representatives on certain boards, while the Democrats encourage minorities to work within the organization. In the 1970's youth participation and offices have greatly increased within the Democratic Party without the aid of any quotas.

That's why the Idaho Young

That's why the Idaho Young Democrats disbanded in 1973. Many young people argued it was completely unnecessary to have a "separate but equal" organization. The Idaho Democratic Party invites every Democrat to participate in the caucus procedures to select delegates to the state and national

conventions. And we U of I Democrats from Congressional District 1 are especially lucky because Campus Democrats will sponsor a First Congressional District Caucus here in April. Any student who wants to get involved just call me at 882-8622.

Kay Tacke Latah County Democratic Executive Committee

#### Music applause

iditor:

My comoliments to Molly Davis for one of the best written stories in years about the activities of the School of Music. Finding a story of this scope in the Argonaut is a sign of progress, but finding it on page one is the most hopeful signs yet of cultural enlightenment on our campus.

May I expand on the information about the local Community Concert Association. Through the unique cooperative arrangement between the ASUI and the Community Concert Association we all benefit by having the finest artists and international touring groups brought to the campus. Without this cooperation between the two groups, neither one could afford the top level attractions that we should expect in a University community. Many people may be aware of the fine attractions being offered in the WSU Concert Series, but notice that their prices are \$5 per adult and \$3 per student per attraction, prices which are comparable to the prices of concerts in any metropolitan area today. Compare this with the \$.15 to \$.20 per concert allotted from student fees for the local concert organization and see what real musical bargain everyone has on the This kind of Idaho campus! cooperation in the arts is unique in

America and you the students are the real benefactors. The main attraction of this school is yet to come. Remember Tuesday, March 9th, when your ASUI cards will admit you to the Czeckoslovakian Folk Ballet, a company of 46 on its first American tour, performing at 8 p.m. in Memorial Gym. It will be an evening to remember!

LeRoy Bauer Publicity Chairman Moscow Community Concert Association

#### Send thanx

Editor:

This letter is written on behalf of Send workers and coordinators to express gratitude to all the students who attended the SEND "bash" at the Capricorn Ballroom last Friday afternoon. We would like to especially thank the personnel at Capricorn for their cooperation and hard work. To those who may have gone home thirsty, we ask forgiveness. We had to close up earlier than anticipated because of a larger crowd than expected. Again, thanks a lot. And lets really get behind the SEND drive.

Thank you, Bill Butts SEND Drive Off Campus Coordinator

Lots of enthusiasm and some fine swimming and diving characterized the 1976 North Pacific Swimming and Diving Championships held in the U of I Swim Center last weekend.

Idaho came in fifth in the overall scoring and set fifteen new Vandal The scoring went as Washington 698.5, follows: Oregon 693, Simon Fraser 453, Montana 332, Idaho 297, Puget Sound 236.5, Portland State 119, Highline Community College 110, Central Washington State 29, Whitworth Western

Senior Moore did an excellent job in the butterfly events with the aid of stiff competition from the best performers in the Pacific Northwest. His times were: 100 butterfly (:53.9) and 200 butterfly (2:00.5). Moore's mark for the 100 eliminated the oldest record on the Idaho books.

It was a very exciting weekend of swimming and diving, "Every person did his part in making it a fine week for the Vandals," said coach Hall. "Everyone of our swimmers had at least one lifetime best time during the meet. They all

Unidentified diver maintains his anonymity with this faceless approach. Action during the Northwest Swimming and Diving Championships in the U of I Swim Center.

Washington State 3.

Fourteen new North Pacific records were set and one equalled during the three day swim meet. Only three marks still stand and two of them are held by former Vandal standout Burt Stratton of Moscow.

Freshman J.R. Martin from Olympia, Washington, and Jim King from Oakland, California, paced the record-shattering Vandal attack by breaking three records apiece. Senior Hugh Moore from Eugene, Oregon also broke two

worked hard for themselves and the team as a whole. I am really proud of them, '' Hall added.

Idaho's next swimming event will take place next month when U of I hosts the Region 12, AAU championships (March 12-14).

#### ldaho swim is over Footballers sign over intentions

U of I head football coach Ed Troxel announced (Feb. 23) the signing of 20 athletes to national letters of intent for 1976.
"I think this has been one of the

U of I's better recruiting years,' Troxel commented upon releasing the names of his latest football recruits. "The young men we've signed have good size. Of course, we are primarily after interior people, and we are pleased with the

The UI mentor added, "I am certainly enthused about the young men that will be joining our program. We have signed a large number of blue chip athletes who have good size, excellent speed and, last but not least, are good students." Troxel concluded his remarks by saying, "Many of them will fit into our program on the varsity level as freshmen.'

Top 1976 Vandal recruits from

Idaho are: Dennis Dinning (Center), 6-2, 210, Bonners Ferry High School, Bonners Ferry, Idaho--Was a standout on teams that compiled ll-0-0 and 9-0-1 slates as junior and senior. Team rated No. 1 in final 1975 poll. Played guard as junior and center as senior. Also a discus competitor in track where he finished first in the regional and

district last spring. Was also captain of football team. Coach Troxel: "He is a fine foootball player. Has the size and the ability to become an exceptional center."

Lance Hubbard (Fullback), 6-l, 220, Lewiston High School, Lewiston, Idaho-This bruising fullback helped team to 8-2 season. Gained 1,274 yards and had a 6.3 per carry average. As junior named co-Inland Empire Back of Year. MV back on team and also played middle guard on defense. Was third in state wrestling meet and first in district. Also throws discus and

shot in track. Coach Troxel: "This is the type of young man we were looking for as a fullback in the Idaho veer. Has good attitude and speed. In fact, he has exceptionally fine all-around athletic ability.'

#### The Program of the Year isn't on TV. It's in the Air Force ROTC.

Look into the Air Force ROTC. And there are 4-year, 3-year, or 2-year programs to choose from. Whichever you select, you'll leave college with a commission as an Air Force officer. With opportunities for a position with responsibility...challenge...and, of course, financial rewards and security.

# SPEED READING **COURSE TO BE TAUGHT IN** PULLMAN AREA

The Oregon Reading Lab, of Eugene, will offer a 4-week course in speed reading to a limited number of qualified people in the Pullman area.

A person is required to attend only one 21/2 hour class, per week, on the evening of their choice for 4 weeks only. The course guarantees to triple the person's reading speed with a marked improvement in comprehension and concentration. The guarantee, however, is a bare minimum as the average graduate will read 7 to 10 times faster. They can read almost any average book in less than one hour.

For those who would like additional information, a series of free, one hour orientation lectures have been scheduled. At these free lectures the course will be explained in complete detail, including classroom procedures, instruction methods, class schedule and a special 1 time only introductory tuition that is less than one-third the cost of similar courses. You must attend only one of the free meetings for complete details. You may attend any of the meetings for information about the Pullman classes.

These orientations are open to the public, above age 14, (persons under 18 should be accompanied by a parent if possible.)

If you have always wanted to be a speed reader but found the cost prohibitive or the course too time consuming-...now you can! Just by attending 1. evening per week for 4 short weeks you can read 7 to 10 times faster, concentrate better and comprehend

If you are a student who would like to make A's instead of B's or C's or if you are a business person who wants to stay abreast of today's ever changing accelerating world then this course is an absolute necessity.

These Free one hour meetings will be held at the following times and places: Thursday, February 19 at 6:30 p.m. and again at 8:30 p.m.

Friday, February 20 at 6:30 p.m. and again at 8:30 p.m.

Saturday, February 21 at 10:30 a.m.

and again at 1:30 p.m.:

Monday, February 23 at 6:30 p.m. and again at 8:30 p.m.

Tuesday, February 24 at 6:30 pm and again at 8:30 pm

There will be one final meeting: Wednesday, February 25 at 6:30 p.m. and again at 8:30 p.m.

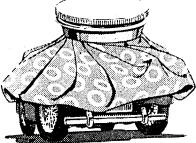

These meetings will all be held at Room 224. February 19 & 20

the Student Union Building on campus: Room 212, February 21, 23, & 24 Junior Ballroom, February 25 If you are a businessman, student,

housewife, or executive this course, which took 5 years of intensive research to develop, is a must. You can read 7-10 times faster, comprehend more, concentrate better, and remember longer. Students are offered an additional discount. This course can be taught to industry or civic groups at "Group rates" upon request. Be sure to attend whichever free orientation that fits in your schedule.

# FOREIGN C4R

438 W. 8th

Why should you have to wait for replacement parts to be shipped in from long distances—or worse yet, from factories half-way around the world? That's a king-size headache. We've got a sure cure-Worldparts-auto parts for foreign cars. A full line of quality-made replacement parts for the most popular foreign cars in town. Have your garage or service station man call us. Or, if you wish, we can give you the names and addresses of foreign car experts near you when your car needs servicina.

VOLKSWAGEN • TOYOTA • DATSUN • OPEL • VOLVO • MERCEDES • MG • FIAT • TRIUMPH RENAULT • CAPRI • PORSCHE • SAAB • JAGUAR • BMW • AUDI • PINTO • (ENGINE PARTS) We're headquarters for Worldparts – call us for a service expert near you.

## Golden anniversary adds to LDS Institute

by DEBBIE NELSON

1976 is an historic year for students interested in religious study at University of Idaho.

Why? Because it is the 50th anniversary of the Institute of Religion of the Church of Jesus Christ of Latter-day Saints, the first student-oriented religious program at the U of I.

Dr. Ernest W. Hartung, U of I president, has said, "Since this is the first such institute in the country, it has set a pattern for LDS and other denominations (in religious study programs).

Students are celebrating the anniversary with a wide variety of

activities, says A. Bryan Weston, director.

A Bicentennial musical production, "Title of Liberty," will be presented by students and area members of the LDS Church April 16-17 in Pullman and April 16-17 at the Performing Arts Center in Moscow. It tells the story of early American soldiers and their decision to fight for the revolutionary cause, officials report.

A lecture series of noted LDS educators and leaders is a top-rated activity for the celebration, Weston noted. Dr. Ronald Jolley, an attorney and coordinator of the Pacific Northwest Institute Division, will speak at Institute graduation exercises May 7.

Alumni and students will attend Homecoming, 1976, when the institute will celebrate its official anniversary, Weston says.

The program was founded in September, 1926, by J. Wyley Sessions, under the direction of LDS President Heber J. Grant. A building which looked much like the U of I Health Center housed the institute from 1928-1968, when the present building at 902 Deacon Ave. was dedicated.

The building provides a base for a wide variety of student activities. Housed in its walls are facilities for religious education, recreation, emotional counseling, sports and

Classes at the institute have been part of the Religious Studies curriculum since 1926, when it was the first church to suggest a religious education program for U of I students, Weston says. This is partially because of the emphasis placed on education by the LDS Church.

"True education. . .would contribute much toward cleaning up our 'human pollution' problems of soaring crime rates, overburdened divorce courts, dishonesty in public life," says Weston. Religious study provides students with a way to distinguish between right and wrong and "develop a personal moral philosophy which is in agreement with human agreement with experience," he said.

Classes are offered at the institute for both university and institute credit. They cover the Bible, LDS scripture, church history and religion and marriage. Students can choose between classes or individual study directed by the two faculty members at the center or professors from the WSU LDS program, says information from the institute.

Serving the whole man is another important aspect of the institute, Weston says. Thus, the building offers both LDS and non-LDS students the use of a game room and cultural hall which has a basketball court. The building serves 350-450 students, Weston says.

Activities are planned for married

and single students who meet in ( separate branches at the institute.

This year, these have included a 1950's dance, a W.C. Fields movie night, dinners, a sledding party and other activities, including Sunday meetings.

Leaders of the LDS branches report that students plan and present Sunday meetings. Times for singles branch meetings are 9 a.m., priesthood meeting and Relief Society; 10:30 a.m., Sunday School; and 6 p.m., Sacrament meeting. Times for married branch meetings are 8 a.m., priesthood meeting; 9:30 a.m., Sunday School and 4 p.m., Sacrament meeting. Relief Society is Thursday at 7:30 p.m., according to information from

Emotional needs of students are guided through counseling from institute professors, Weston says. He received his doctorate degree from Montana State University and the other institute instructor, Jan K. Hansen, received his master's degree from Brigham Young University and is working on his doctorate, officials noted.

Weston notes that the only real change in religion among students during the past few years has been an increased need for it. "There are more alternatives for students and ready access to things like drugs which make them less able to function in the world," he says.

He says the institute works to provide these needs, in part, through classes, which "Teach students correct principles so they can govern themselves more

He notes that the institute is a good place for students to study, featuring study rooms and a library of Christian literature.

As part of its 50th year activities, the institute sponsored Dr. Philip Low of Purdue University, who spoke at the Symposium on Religion, Ethics and the Environment conducted last fall. They have featured lecturers such as Joe J. Christensen, associate commissioner of LDS Education and former Moscow Institute of Religion Director; John K. Edmunds, Chicago attorney and president of the Salt Lake LDS Temple, Hartung and Truman G. Madsen, noted philosopher.

# t Sounds Incredible

BUT EVELYN WOOD GRADUATES CAN READ

THE EXORCIST IN 58 MINUTES

At That Speed, The 403 Pages Come Across With More Impact Than The Movie.

You can do it, too. So far over 550,000 other people have done it. People who have different jobs, different IQs, different interests, different educations have completed the course. Our graduates are people from all walks of life. These people have all taken a course developed by Evelyn Wood, a prominent educator. Practically all of them at least tripled their reading speed with equal or better comprehension. Most have increased it even more.

Think for a moment what that means. All of them-even the slowest-now read an average novel in less than two hours. They read an entire issue of Time or week in 35 minutes. They don't skip or skim. They read every word. They use no machines. Instead, they let the material they're reading determine how fast they read. And mark this well: they actually understand more, remember more, and enjoy more than when they read slowly. That's right! They understand more. They remember more. They enjoy more. You can do the same

thing—the place to learn more about it is at a free speed reading lesson

This is the same course President Kennedy had his Joint Chiefs of Staff take. The staff of President Nixon completed this course in June 1970, The same of Senators and Congressmen have taken,

Come to a Mini-Lesson and find out. It is free to you and you will leave with a better understanding of why it works. One thing that might bother you about your reading speed is that someone might find out how slow it is. The instructors at the Evelyn Wood Reading Dynamics Free Speed Reading lesson will let you keep your secret. It's true we practice the first step to improved reading at a Mini-Lesson and we will increase your reading speed on the spot, but the results will remain your secret. Plan to attend a free Mini-Lesson and learn that it is possible to read 3-4-5 times faster, with comparable comprehension.

#### -SCHEDULE OF FREE MINI-LESSONS-

You'll increase your reading speed 50 to 100% on the spot!
