Student govt's oppose

Prohibition is back

By JIM SPIERSCH

The Board of Regents-State Board of Education, after lengthy deliberations and heavy opposition from the student government, adopted an emergency policy prohibiting the use of alcohol on campus—at least for the next 120 days.

The statement of policy contained five provisions:

1. "Illegal possession or consumption of alcoholic beverages is prohibited in college or university owned, leased or operated facilities and on campus grounds."

2. "Alcoholic beverages may not be possessed or consumed under any circumstances in areas open to and most commonly used by the general public. These areas include, but are not limited to, lounges, student union buildings, recreation rooms, conference rooms, athletic facilities, and other public areas of college or university-owned buildings or grounds."

3. "Sale of alcoholic beverages is prohibited in college or university owned, leased or operated facilities and on campus grounds."

4. "Students who violate this policy will be subject to sanctions as have been established by institutional administration."

5. "Guests and visitors shall observe these regulations while on campus or other college or university property. Non-compliance may subject a person to sanctions imposed by the college or university as well as to the provisions of local and state law."

This policy went into effect immediately after 5-2 approval by the Regents and will be effective for a period of at least 120 days. During this time the board will proceed with the directions of the Administrative Procedures Act (APA) in formally enacting the rule. That procedure will involve publication of the policy in newspapers and possible public hearings.

The declaration of emergency was justified by the board in stating the lack of an alcohol policy posed a

threat to the "health, safety or welfare" of the public, as required in order to invoke the APA emergency clause.

They said, city ordinances concerning the use of alcohol apply on college campuses as well as state laws. "In absence of such a rule," the board declared, "students may assume they are guided only by state statutes establishing age requirements for possession or consumption of alcoholic beverages."

During the meeting, Bill Synder of Boise, a lawyer representing the Idaho Student Association, of which the ASUI is a member, advised the board not to declare an emergency and it is possible that the students will seek a court injunction to halt the emergency procedure.

Susan Mauk, Assistant Attorney General from Boise, told the board that if students decide to seek a court injunction blocking the emergency policy, it is likely a court would grant the injunction. There does not appear to be a justification to the fact that there has been no policy since last May.

However, board member John W. Swartley of Boise said that the matter was not in a court of law and said "It is an emergency!"

Despite the dispute over an emergency; the threat of a legal challenge and the lack of enforcement sanctions, the board was not persuaded.

ASUI President Lynn Tominaga said, "I was not satisfied with the board meeting in that suggestions from student leaders were reasonable. For instance, the Alcohol Policy was more than reasonable. They turned that proposal down flat and decided to go with the emergency clause of APA."

He added, "I don't believe the emergency clause should be used. No one is in any danger." He said, "We haven't had a formal policy since May 18 and up until now we haven't had any problems with alcohol on campus."

Exploring the art of nothing

(ZNS) Here's a class you probably wish your college offered: it's a course called "The Art of Doing Nothing."

According to officials at Mariemont College in Ohio, there really is such a class, and it's aimed at helping

Argonaut/Jim Spiersch

We want to make students "Aware that unregulated possession or consumption of alcoholic beverages may create an environment threatening to public safety." From left to right: Dr. Jerold O. Dugger, President of Lewis-Clark State College; Dr. Myron Coulter, President of Idaho State University; and Dr. Richard Gibb, President of the University of Idaho.

Controversial minority advisors win Board of Regents' approval

The Board of Regents approved the controversial hiring of three minority student advisors, despite an appeal from Socorro Bunts and ASUI President Lynn Tominaga to review the recent hiring procedure.

Bunts, a Chicano, filed a letter of appeal with the Regents, after applying for an advisory position, and being turned down. She charges that Student Advisory Services established a selection procedure for use in hiring persons to fill the advisory positions.

Allegations were raised that certain irregularities had occurred in the selection process used by Student Advisory Services. Subsequently, at the request of minority students, an ad hoc committee was appointed by Richard Gibb, university president, which investigated the alleged irregularities and reported back.

The report acknowledged that certain irregularities had

occurred in the selection.

ASUI President Lynn Tominaga stated in a letter to the Regents, "A person on the selection committee was biased against Miss Bunts before the selection began and the minority students were not allowed to attend all of the interviews."

He continued, "When the ad hoc committee was formed, I believe that their findings were true and they tried to present the facts as they saw them. I do not believe that Dr. Coonrod should have chaired the committee. His dealings with the minority program were needed in an advisory capacity but not as director of this committee since he could have had an influence on members of the ad hoc committee."

He added, "The person on the selection committee who was biased against the Chicano candidates should have disqualified himself or herself from the committee because he/she could not give an objective view."

"The biased committee member was also the administrator who was hiring the minority student advisor. This administrator had the opportunity to turn Miss Bunts down again if chosen, thus giving the impression of a stacked deck", he charged.

Tominaga supported Bunts

appeal and asked that Dr. Jean Hill, U of I Dean of Student Advisory Services be reprimanded. The board did not accept the suggestion and approved the hiring.

The three minority student advisors are: Carmen Loera, Jerome Mayfield and John Wheaton.

President Gibb upheld the hiring of the three new advisors. The University had conceded that voting procedures, which had been established, were not followed in the selection of the advisors. Gibb contended the faulty procedure was an oversight.

Gibb said the problem was not in the administration's procedure but in the minority community itself.

In her appeal, Bunts is asking for relocation of the Minority Student Advisory Service from under the Office of the Dean of Student Advisory Services to Gibb's office. She is also asking for the appointment of an advisory board for minority students.

After appearing before the board, Bunts said she had presumed that, "the board wouldn't do anything anyway."

She said that all appeal procedures within the university framework had been exhausted, adding she will "appeal the case outside the University."

SHHHHHH!

Don't tell a soul

The 1977 Gems are here!

Yearbooks may be picked up at the SUB Information Desk today through Friday. Orders for the '78 Gem will also be taken at this time.

Prof accidentally shoots self

Dr. Ashley Lyman, an assistant professor of economics here, accidentally shot himself in the lower right side last Thursday evening with a .22 caliber pistol, according to Elaine Walden, a Latah County sheriff's deputy.

The report stated that the bullet lodged in back muscles, and as of Friday, Lyman was in stable condition, Walden said.

When contacted yesterday afternoon, Lyman said, "it's

not a serious wound," expected to be released today.

Lyman said the incident occurred when he "shoot[ed] at a can in my backyard with a .22 caliber single action pistol." He said he "wasn't used to firing a pistol when he thought the pistol was at half-cock, he let it go downward in my hand." The pistol then discharged, according to Lyman.

Graduate student suffers serious gunshot wound

According to a Moscow City Police report, Elise Kay Lindvig, 33 Palouse Hills Trailer Ct., suffered an apparent self-inflicted wound to the abdomen Sunday afternoon at 1:42 p.m.

Lindvig, a psychology graduate student here, was taken to Gritman Memorial Hospital by the Moscow Fire Department and admitted at 2:05 p.m. According to Commie Campbell in the hospital's emergency room, Lindvig was conscious upon arrival.

Because of the danger to the

spine, a neurologist needed. Lindvig was transferred to Sacred Heart Medical Center in Spokane after 5:00 p.m. for treatment.

Upon arrival at Sacred Heart, Lindvig was taken to surgery and listed in serious condition. She was taken to surgery again yesterday.

Lindvig is in the intensive care unit at Sacred Heart and is listed in serious condition, according to a nurse there.

Dr. Lehman, Lindvig's thesis advisor, said there was nothing that he knew of bothering her academically.

What will they come up with next

(ZNS) A San Diego electric guitar maker claims to have come up with a better mousetrap.

Fifty-year-old Bob Brown says it all happened by accident when he miswired a guitar, left it on by mistake and returned to the shop the next morning. Brown says he found dozens of rats and mice sprawled on the floor of the shop, apparently zapped by the guitar's vibrations.

The inventor says that further tests have discovered that football-sized devices he has perfected interfere with small rodents' neurological systems while apparently having no effect on either people or domestic pets.

Brown now sells his electric rodent zappers at prices beginning at \$350 apiece.

The "Beta staff car" awaits its fate yesterday morning. The car owned by the Beta Theta Pi house on campus was towed away to a local junkyard around noon.

Student leaders ask for athletic fee moratorium

By JIM SPIERSCH

The Idaho Board of Regents named a 15 member committee to study the role of intercollegiate athletics at its four major state institutions. Student leaders opposed the increase and argued a moratorium should be placed on student fee increases to finance athletics.

Last July, the board approved a student fee increase of \$4, primarily to support women's athletics. The board then said the increase, effective this fall, would be subject to later review.

A committee will be headed by Idaho State University President Myron Coulter. Also included on the committee is U of I President Richard Gibe, and ASUI President Lynn Tominaga. The committee was asked to report on the issue at the board's meeting in Moscow on Oct. 6-7.

In a presentation made to the board, Mike Hoffman, Boise State student body president, said, "Students feel that before any increase is made the board should study the role of intercollegiate athletics; who benefits from athletics;

who is paying for it; whether an intramural program should be expanded and at what level of intercollegiate competition Idaho schools should compete."

"Athletics are an integral part of a college program," said Dr. Leno Seppi of Lava Hot Springs. He added, "States should pay a portion of the cost."

The board concluded, the past few years budgets have gone up and probably will continue to go up. Yet, there is no cost of living increase regarding main fees.

ASUI President, Lynn Tominaga said, "I believe the state this year should try to pay athletic fees, since students put up the money for athletics a year and a half ago." He added, "I believe the state should compensate."

Other members to the committee include: Lewis Clark President Jerald Dugger; former Idaho State

Financial Vice President William Bartz; athletic directors Lyle Smith of Boise State and Milton Holt of Idaho State; board members John Swartley of Boise, Janet Hay and Leno Seppi; the other three student body presidents and two representatives of alumni associations to be named later, one of whom must be a woman.

Tonight's Senate may send bill for committees to committee

By MARTY TRILLHAASE

The ASUI Senate will probably send most of its bills and reports to committee tonight. There's nothing out of the ordinary about that except one of those bills sent to committee may be the measure authorizing the formation of the senate committees.

And without those committees, the remaining bills will stay in limbo unless rules are suspended for immediate consideration.

The Senate will meet in the SUB at 7:00 p.m.

ASUI Vice-President Gary Quigley, who presides over that body, said he expects the passage of the committee forming package. But he added the bill could receive heavy debate and might fail.

Other bills that Quigley expects to be brought before the senate tonight for immediate consideration are SB 175, providing for the Senate living group assignments, SB 176, which calls for the assignment of senators to ASUI governing boards, and SB 177, which provides for a change in meeting nights for the Senate to Wednesday nights. The

senate currently meets on Tuesday nights. That bill could evoke heated discussion, Quigley said.

A bill calling for a review of the effects of Moscow Police surveillance of the U of I campus could also come before the senate, he said. M.P.D. officers have been patrolling the campus since last year. Previously, U of I campus security was responsible for patrolling the area.

Other bills to be introduced tonight include one that will create a procedure for placing a senator on probation or removing him from office for "not fulfilling their duties as ASUI senators."

ASUI President Lynn Tominaga said he questioned the constitutionality of such a procedure. According to the bill, authored by Quigley, the ASUI judiciary council and the senate would be responsible for such an action. Tominaga said that a senator is elected by the students and therefore only the students can remove him through the process of recall.

"What he's (Quigley) saying is anyone who the senate doesn't like, the senate can remove."

Quigley acknowledged there are constitutionality questions in the bill. He added a bill very similar to this one passed the senate in April, 1975. At that time, Quigley said, "I think I was the one who raised the question of constitutionality." He added he is working for the lesser of two evils by

sponsoring the bill "that would meet those (student) needs more adequately."

The previous bill provided for the probation of a senator and permanent censure for not fulfilling his senatorial duty. But it did not remove the senator from office, he said, "so we ran the possibility of a dead position." Quigley said his bill provides for the removal of a senator and finding his replacement.

Another difference between the two bills is that the 1975 measure involves only the senate in the disciplining of one of their cohorts. Quigley said his bill would provide for the student judiciary council to make the preliminary motion.

A senator has never been sanctioned under the methods provided for in the 1975 probation bill. "It's my understanding that at the time this bill was passed they were having trouble with one specific senator," Quigley said. He added that the bill was "aimed at one specific situation, rather than for general usage."

Asbestos Summer

I was sitting in the dining room this morning trying my best to produce a heavy-duty column about an important issue for this issue of the Argonaut, but it wasn't working at all. My deadline is

this afternoon at 3 o'clock, and the issue was just too complex for me to write a coherent column in such a short amount of time.

But then a happy thought occurred to me. I would

follow the tradition of hundreds of years of English teachers, and do my first column of the semester on the time-honored topic of "What I Did This Summer". All those generations of English teachers must've known something.

My latest misadventure — that is, my summer job — was a real goodie. I was on the fire crew for the Forest Service out at Pottlatch. But if you're expecting a thrilling tale about brave fire fighters pitted against raging wildfire, you'd best find yourself a Smokey-the-Bear comic book. They didn't call the place I worked the "Asbestos District" for nothing. In my first two months, I went on two small lightning fires. The bigger one was a whole tenth of an acre in size.

Actually, the hardest part of my job was the people who didn't think I could do it. I couldn't help but think that some of the greenshirts were quietly macho types that wanted a fire crew of "real men" (that is, not women, especially the five-foot four and scrawny variety.) I found myself being quite paranoid, and probably very unpleasant to work with. To be fair, the

discrimination I ran into wasn't entirely intentional. At least not consciously. The frustrating thing was that the discrimination was so subtle that it was impossible to complain about or prove. If you haven't been through this sort of thing, you'll think I'm full of shit. If you have, I don't need to explain it.

Anyway, most of the people I worked with were easy enough to get along with. There was even another woman on the crew. We did our work, day after day, and waited for what is known as The Big One. With all of the west going up in smoke, it was easy to hope we'd get sent away on a major fire. But it didn't happen.

I got more and more impatient. After going through all that fire training, I wanted the chance to use it. The fire danger jumped to extreme, and we were working six days a week — and then seven. Still, no fires. I'm sure some people started to think that the only words in my vocabulary were "I want to go on a fire."

Well, sometimes I think this summer wasn't real at all. It was just an O. Henry short story that never got

published.

One morning, two of our fire crew members didn't show up for work. They had taken a pumper truck to the Cotter Bar fire near Grangeville. And here is the kicker. People are called to go on off-district fires by alphabetical order. My name was the second one on the list, and since they needed to send two people, of course they called me. But I didn't have a phone, and the kid whose number I gave as an emergency contact slept right through her phone ringing. And so, I lost out.

I moved back into my dorm not long after that, and made sure that I slept within ten feet of the phone. But no luck.

We had one more spot fire on the district. This one measured 10' by 20', and it took us longer to find it than it did to put it out. A couple days later the rain started and the fire weather was shot to hell.

Now that I'm gone, another huge fire will start in California, and the whole Palouse District Fire Crew will get to go. That's the way these O. Henry stories work, isn't it?

Committee indeed!

There may still be some hope for the ASUI Senate. After all, it's early in the year. They can't be doing too bad, right?

Well, maybe.

It seems they plan to delay their duties as elected officials by delaying the formation of committees. It is in these various sub-groups that the great majority of senate work is done. In fact, there is a strong suggestion that the Senate will send the bill authorizing the establishment of committees to committee. You may well ask yourself what committee they plan to send the bill to, since committees are not yet developed.

Ask away. I urge you to attend the Senate meeting tonight, at 7 p.m., in the SUB. Not only will you see quite a show for free, but perhaps the Senate will slip out of character and do their work.

HAMMER

Crying wolf

Sunday night's brief blackout contributed to male "raids" and other attempts to break into some of the sororities on campus.

It seems that these raid are a common occurrence lately.

The sorority women call the campus police when they see a male figure trying to force his way into the house. The police arrive to protect the women and prevent a crime.

It is then that something very ridiculous happens. The girls involved refuse to sign a complaint unless something of value is taken from the house. The police officer cannot do anything..

Recently, the only description one girl could give the policeman about an intruder was "he was cute."

It is a shame that campus police have to answer the calls. There is enough theft, vandalism and other crimes committed to keep them busy.

Why tomorrow's professionals choose Hewlett-Packard's first family of advanced calculators today.

They're proven performers. In space. On Everest. In the labs of Nobel laureates. Since we built the first, back in 1972, our advanced calculators have been tested by millions worldwide, and they've passed.

They have staying power. Today's classroom problems quickly grow into tomorrow's on-the-job problems. HP calculators are designed and built to handle both. They're investments in a future that happens fast.

They're straightforward. "Advanced" doesn't mean "complicated." It means "uncomplicated." HP calculators are, above all, straightforward.

They're easy to use. HP calculators not only grow with you; they grow on you. They feel natural, comfortable, because we designed them to work like you think.

They're efficient. HP calculators take the direct approach. All feature RPN, a time-saving, parenthesis-free logic system. All programmables feature a memory-saving keycode merging capability.

They're personal. Professionals design their own ways to solve their particular problems, and they expect their calculators to be versatile enough to accommodate them. Ours are.

There's a variety. To say we offer a full line is an understatement. We offer a choice. That's why we publish a unique "Selection Guide" that spells out the capabilities of each. Your HP dealer has your free copy.

(800) 648-4711. The number to call for more information and your HP dealer's name and address (unless you're in Nevada, in which case you can call 323-2704).

HP-29C. Our NEW Programmable with Continuous Memory.
\$195.00*

Its 98-step program memory and 16 of its 30 storage registers stay "on" even when the calculator is "off," so you can store programs and data for as long as you wish. Continuous Memory plus fully merged keycodes bring typi-

cal program memory capacity to 175 keystrokes and beyond. Insert/delete editing. Conditional and unconditional branching. Three levels of subroutines: 10 decision tests. Exceptional versatility at an exceptional price.

HP-21 Scientific.
\$80.00*

Performs all standard math and trig calculations, the latter in radians or degrees. Performs rectangular/polar conversions. Displays in fixed decimal or scientific notation. Our lowest priced scientific.

HP-22 Business Management.
\$125.00*

A new kind of management tool. Combines financial, statistical and mathematical capabilities. Enables business students to forecast faster, more easily and with greater certainty.

HP-25 Scientific Programmable.
\$125.00*

Solves repetitive problems automatically. Enter your formula once; thereafter only variables. Requires no software, no "computer" language. Our lowest priced programmable. We also offer an HP-25 with Continuous Memory, the HP-25C, for \$160.00*. It retains programs and data even when turned "off."

HP-27 Financial/Statistical/Scientific.
\$175.00*

Contains the most preprogrammed scientific functions we've ever offered, plus comprehensive statistical and financial functions. Lets you forecast, allocate resources, analyze costs—quickly.

HP-67 Fully Programmable.
\$450.00*

The most powerful pocket calculator we've ever built. 224-step program memory. 26 storage registers. "Smart" card reader records contents of both. Fully merged keycodes increase typical program memory capacity up to 450 keystrokes and beyond. Superior editing capability.

Grad student takes first in Masters

Last weekend Mary Beth Phelan, a 26 year old graduate student in Bacteriology at the University of Idaho placed first in her division of the 200 meter breaststroke at the long course Masters National Swimming Championships held in Spokane.

The former U of I swimmer beat a former Olympian, Lynn Colella Bell, with a time of 3:06. She finished second to Bell in the 100 meter breaststroke.

Mary Beth began to swim competitively at four years old, and has been doing it ever since. She placed third in the Nationals in Cleveland in 1965, and then swam internationally. Mary Beth tried out for the Olympics in 1968, but failed to make the team. Later she placed third in 100 meter breaststroke in the AAU senior Nationals.

She now swims nationally in

the AAU Master's Swimming program which has divisions for all amateur swimmers over 25 years old. The divisions are separated by 10 year graduations.

With the Master's program, Mary Beth can swim competitively as long as she is capable.

"It's been a part of my life for so long that I can't imagine not swimming," Phelan said. "I get more out of swimming than anything else I do. It gives me something to work for," she added.

Mary Beth wants to do research in bacteriology after she gets her degree and keep on swimming. "I'm looking forward to the nationals next spring."

Women gymnasts organize

There will be an organizational meeting for undergraduates interested in women's intercollegiate gymnastics, Thursday September 8, in the Women's Education Building, room 201. "This should be an excellent year for gymnastics," said Coach Judi Haas. "We have a fantastic group of kids coming

in, five of whom are on scholarships." "Jeannie Swanson, Cindy Alunbaugh, and Jill Mauser will be returning; we also have some excellent freshmen prospects," said Haas. For further information see Judi Haas, WHEB 206, or phone 885-7921.

Men's soccer starts

Now in its twelfth consecutive season of play, Idaho is a prime contender for the 1977 Northwest Intercollegiate Soccer League championship in December, said Jim Anscorb.

Lead by center forwards Albert Ayala and Larry Houston, Idaho soccer has most of its starters returning this year. Ayala and Houston were chosen all star players for the league last year.

Idaho also has a "B" team open to all who have the desire to play or learn to play soccer.

Argonaut/Jim Collyer

Susan Tendy, U of I women's swimming coach, has resigned to take a similar job at the U.S. Military Academy, West Point.

Idaho coach leaves for West Point

Susan Tendy, women's swimming varsity coach, has resigned her position at the University of Idaho to fill a similar job at the U.S. military Academy in West Point, New York.

Tendy has been at the U of I since 1976, teaching swimming and gymnastics in addition to her coaching responsibilities.

Tendy recently took third in the 50 meter freestyle at the Master's National swimming championship in Spokane, last weekend, and swam on the third place 200 medley relay. She also finished fourth in the 100 and 400 freestyles and a co-ed freestyle relay. She took fifths in the 200 freestyle, 1,500 freestyle and 200

freestyle relay. All of her times in individual events were personal bests.

Basically Tendy will be building a women's swimming team at West Point from the ground up. "They called and asked if I was interested and then asked if I wanted to apply," said Tendy. "At first I said no and then I decided to go back to New York for an interview," she said.

Tendy said that it was hard to think of leaving a job that she liked. After seeing the facility and being interviewed she decided to take the job.

Before coming to Idaho, Tendy was in charge of the aquatic program at Wellesley College for three years. Prior to that, she was the assistant swimming coach at Pennsylvania State University.

Under Tendy's one year leadership at the U of I, four swimmers qualified for national competition among small colleges (schools with 3,000 or fewer full time women undergraduates)

where they had finished as high as thirteenth among 350-400 swimmers from 62 teams.

Groucho guarantees grins

Two films from the past offer entertainment and nostalgia to SUB film goers this week. *The Thief of Bagdad* will be presented by the ASUI Film Society at 5, 7, and 9 p.m. Thursday night. Admission will be 75 cents. A color Betty Boop cartoon will also be shown.

The 1930 Marx Brothers film, *Animal Crackers* will be shown Friday by SUB Films. Shows will be at 7 and 9 p.m. Admission will be \$1.

Animal Crackers is considered one of the best Marx films, with Groucho in his famous role as Captain Jeffrey T. Spaulding (the T is for Edgar), the great African hunter.

"One morning I shot an elephant in my pajamas. How he got in my pajamas I'll never know," says Groucho, brandishing the cigar that was his trademark.

Harpo is not to be outdone, displaying his talent for getting laughs without words. He has a knack for winning at bridge. With 200 aces of spades.

The *Thief of Bagdad* was filmed in 1924 and stars Douglas Fairbanks, Sr. in one of his swashbuckling roles. One of the most elaborate sets in film history provides

the background for Fairbanks' acrobatic pursuit of the royal daughter.

Fairbanks is the classic

rogue, combining a feeling of Arabian Nights crossed with how to succeed at love by really trying.

Harpo, Groucho, Zeppo and Chico Marx star in *Animal Crackers*, an epic adventure into the absurd. The film will play in Borah Theater at 7 and 9 p.m. this Friday night. Admission will be \$1.

TV documents drought

Water, and the lack of it is the subject of the documentary *Western Drought* which will be re-run this Wednesday at 8 p.m. on KUID-TV, Ch 12. The program will be repeated to give people who were away from the area this summer a chance to understand the impact the drought has had.

Western Drought will profile several individuals in their attempt to cope with the worst drought in American history. One such person is Reid Newby.

As watermaster for one of Idaho's 107 water districts, Newby daily must enforce a complicated set of rules that states that the owners of the oldest water rights have first claim to the water. This year, with the severe drought conditions, Newby daily must tell those with rights newer than 1885 that no water is available for their crops.

Sometimes Newby is met by fury, sudden violence: "Couple of times I've had the misfortune to step between a guy that had a shovel in his hand and another guy that had a fence post in his hand and I talked them out of clubbing me to death."

But because of Newby's dedication to his job—working 17 hours a day, driving 2,000 miles a week—most farmers realize that he is not to blame for the water shortage. They know too that Newby always will distribute the water as fairly as possible, and will show no sympathy for someone trying to steal another's water. "This is stealing of the worst kind as far as I'm concerned. I've had a lot of guys say to me, 'well, you can go and take that guy's wife, you can go take that guy's money, but don't go take his water.' And I believe it because, well, you can get more money somewhere, and

you certainly can get a new wife somewhere if necessary, but there's no way to get that water back once it's gone."

While Newby has escaped physical violence, the job has taken its toll. In good years—years with plenty of water for everyone—the work is difficult; in bad years—years such as this one when water is scarce—the job tears him up. Because of the drought, Newby lost 14 pounds in 4 weeks. And because of the drought, Newby fears worse illness. He remembers how another watermaster suffered during an extremely dry year: "I recall an old fella who rode the river for about 40 years and he said he couldn't figure out what was wrong with him so he went to the doctor and the doctor said 'you got anything to do with water?' He said 'Yeah, I have something to do with water,' and the doctor said 'you take these pills, you got high blood pressure.'"

Newby tries to use his sense of humor to keep the tension down, to ward off a heart attack. But he finds that he cannot control his dreams: "The dreams at night are horrible because you figure every way you can to save, or by cutting this a little closer you can get it to this guy. You wake up in the morning and you go out and look at it and it's not there to do that with. It's just absolutely not there."

Despite the pressures, Newby loves his job because he loves water: "I live water, I breathe water. I like it. I think it can be pretty, it can be ugly, it can be anything. But regardless of what state it's in, it's still water and it's still beautiful."

Beautiful, and a necessity for all of us. Whether we know it or not, drought has an effect on us all.

Fun, grub at 'Day on SUB'

The ASUI Programs Committee is sponsoring a day of food and fun in the SUB this Saturday. "A Day on the SUB" is designed to orient new students and provide everyone with a good time.

There will be an arts and crafts sale in the Vandal Lounge from 11 a.m. to 5 p.m., with a variety of wares from

local artisans.

The snack bar will be featuring a variety of specials throughout the day, with two-for-one soft drinks from 2 to 12 p.m., free donuts from 2 to 4 p.m., free popcorn from 8 to 12 p.m., a special on frozen yogurt and a spaghetti feed from 5 to 6:30 p.m.

The Coffeehouse will present

live music in the Vandal Lounge, with an open mike from 8:30 to 9:30 p.m. Anyone interested in performing is invited to do so. Liz Olds, the "fastest guitar picker in Moscow" will perform from 9:30 to 10:30 p.m. From 10:30 to 11:30 p.m. Phillip will perform on guitar and piano.

The SUB game room will be open and will feature half price pool from 6 to 12 p.m. and midnight bowling (only the pins are lit); bowl two games, get a third free.

There will be a disco dance in the SUB Ballroom from 9 to 12 p.m.

Further information is available from the ASUI Programs Committee or Devon Cuddy at 885-6484.

DRUNKENNESS

"Woe to those who are heroes at drinking wine, and valiant men in mixing strong drink."

"And do not get drunk with wine, for that is debauchery; but be filled with the spirit."

What's up doc? Mel is!

Mel Blanc, the famous voice behind Bugs Bunny and hundreds of other cartoon characters, will speak in the SUB Ballroom tomorrow at 7:30 p.m. Admission will be free.

Blanc's voice sketches became famous on radio in the 30's and 40's and became the basis for hundreds of cartoon characters. He developed voices for such popular figures as Porky Pig, Pepe Le

Pew, Speedy Gonzales, Daffy Duck, Tweety and his most famous, Bugs Bunny.

Two of Blanc's recordings, "I Taw I Taw a Puddy Tat" and "The Woody Woodpecker Song" each have sold over two million discs.

When Blanc moved into television, it wasn't long before he had created a score of unusual voice characters including that of Barney Rubble of "The Flintstones" and several characters for ABC's children's educational show, "Curiosity Shop".

Since 1961, Americans have also encountered the distinctive Blanc touch in commercials created by the staff of Mel Blanc Audiomedea for a variety of advertisers. In Hollywood, his home base for many years, he has put together a production staff that specializes in creating entertaining commercial campaigns and *Superfun*, the radio comedy programming service of 1,300 comedy sketches used by stations all over the world.

Blanc's visit is sponsored by ASUI Issues and Forums, which will present a variety of speakers and topics throughout the year. For further information contact Courtney Smith at 885-6484.

PAC named after Hartung

The Performing Arts Center is no longer the Performing Arts Center. In a meeting of the State Board of Regents, the center became the Ernest W. Hartung Theatre.

A model of a bronze plaque was unveiled at the State Board of Education meeting. The plaque will hang in the foyer of the theatre.

A drawing of the Ernest W. Hartung Theatre by Burt McCroskey, professor of art and architecture was also displayed. The drawing will be given to the former U of I President and his wife as a personal memento of his tenure at the university.

This is the semester to get your programmable.

The TI-57. Its self-teaching system gets you programming fast.

The TI 58 and 59. Both use revolutionary plug-in Solid State Software™ libraries.

TI Programmable 57. The powerful superslide rule calculator you can program right from the keyboard. Comes with an easy-to-follow, self-teaching learning guide—over 200 pages of step-by-step instructions and examples. Quickly learn the value of making repetitive calculations at the touch of a key. Recall entire instruction sequences. Display intermediate results at any point in a calculation. Eight multi-use memories provide addressable locations to store and recall data. Program memory stores up to 150 keystrokes (50 program steps). Editing too: Singlestep. Backstep. Insert or delete at any point in a program. Also a powerful slide rule calculator with logs, trig functions and advanced statistics routines.

\$79⁹⁵*

The TI-58 and TI-59 combine three major innovations to bring the power of programming to you—even if you've never programmed before:

1. Extraordinarily powerful—at remarkable low prices.
2. Revolutionary plug-in modules put complex formulas to work at the touch of a key.
3. Step-by-step learning guide that takes you from the basics of programming through advanced programmings—language you can understand.

TI Programmable 58. Up to 480 program steps, or up to 60 memories. Master Library module contains 25 prewritten programs in math, engineering, statistics and finance. Also increases number of steps—up to 5000. Library programs may also be addressed from the keyboard or inserted as subroutines. Can also be used with TI's new PC-100A printer/plotter. It lets you plot, print headings and prompt-messages.

\$124⁹⁵*

TI Programmable 59. More powerful than the TI-58. Up to 960 program steps or up to 100 memories. Magnetic cards store up to 960 steps. And, record and protect custom programs. Also 10 user flags. 6 levels of subroutines. 4 types of branches.

\$299⁹⁵*

Optional Libraries. Applied Statistics, Surveying, Real Estate/Finance, Aviation, Marine Navigation. \$35.00* each.

FREE.

When you buy a TI Programmable 58 or 59 you can get this 19-program Leisure Library.

A \$35.00 value if you act now.

Football Predictor. Forecast score, point spread. **Bowling Scorekeeper.** Track 90 bowlers. **Golf Handicapper.** Update handicap from latest round's score. **Bridge.** Computes points from tricks made and bid. **U.S. Chess Federation Rankings.** Wins, losses, draws. **Codebreaker.** 3,024 possible codes make this a unique challenge. **Black Jack.** **Acey Ducey.** **Craps.** **Mars Lander.** Pilot to a safe landing. **Jive Turkey.** Guess mystery number—tells you if you're high or low—but is it jiving you? **Nim.** Play the machine, each time it gets better. **Sea Battle.** 15 missiles to sink sub. **Quarterback.** Call plays. **Photo 1.** Compensate for change in photo enlargement magnification. **Photo II: Fill-in-flash.** Computes correct lens f-stop in strong ambient light. Use it with a PC-100A and have even more fun. **Computer Art.** **Hangman.** Put in a word, second player guesses or hangs. **Memo Pad.** Write, enter messages. Print and record them on 59's mag card. Use the card to replay the message. **Biorythm.** Plots all three cycles.

Leisure Library comes with: Plug-in module, Library manual, Quick reference guide, Label cards, Library wallet.

Offer good from August 15 to October 31, 1977. Here's what you do. Fill out this coupon. Return it to TI with your serialized Customer Information Card (packed in the box), along with a copy of a dated proof of purchase showing the serial number. **Important.** Your envelope must be postmarked no later than October 31, 1977.

Self-sufficiency in agriculture New course teaches alternative approaches

By BILL LOFTUS.

Editors note: "Self-sufficiency in Agriculture," a new course offering in the U of I College of Agriculture is the second topic of a two-part series on self-subsistancy courses.

In last Friday's edition of the *Argonaut*, Charlie Brown's course, which operates autonomously of the University, was examined.

Using R. Buckminster Fuller's concept of synergy as the hub of its approach, the new course in self-sufficiency at the University will consider alternative energy sources, structures, and agricultural methods, said Jim Day, instructor.

Day said he plans to have the class observe a wheelwright, a blacksmith, and probably demonstrations on weaving and canning.

The course originated under the aegis of a strongly supported student petition drive and found a creator in Day, a doctoral candidate in biochemistry. Day, with the support and guidance of several other persons affiliated with the U of I, founded and currently teaches the class in self-sufficiency. The class is listed as Special Topics in Agriculture 204-404.

"Our emphasis is not toward the 'back to the land' or ultra-technology outlooks," Day said, "but somewhere between the extremes."

Others who helped in the formative phases of the course include Dr. Robert Coonrod, vice president for academic affairs; Dr. Richard

Argonaut/Steve Davis

JIM DAY

Dobson, an associate dean of the college of Agriculture, and Dr. Audus Helton, a professor of plant sciences.

Day, who also teaches the labs for Biochemistry 380, is working on a master of science degree in interdisciplinary studies in conjunction with the self-sufficiency course. Helton is the major professor on the project.

Day first submitted his M.S. thesis proposal on March 20, 1977. Both internal and external motivations influenced him.

"I've been working on this

course since 1973," Day said. He said "alternatives" have interested him for longer than that.

A petition drive by a group of students, calling themselves the survival agriculture committee, began circulating petitions endorsing the establishment of a self-sufficiency agriculture course last February. The students were members of Helton's Environmental Pollution class (Ag 203). The drive began after one of course's meetings discussed the self-sufficiency topic.

The petition drive had the support of then-president Hartung, Janet Hay of the Board of Regents, and Dobson. Dr. Lucas Calpouzos, head of the department of plant and soil sciences, cast a cool pall over the proposal, however. Calpouzos noted that his department could not furnish an instructor as they had "run out of people" with time available for teaching other courses.

Student support of the petition drive was impressive.

"The committee collected about 500 signatures," Day said. "We decided to limit the enrollment in the course to 20 for the first semester, though."

Out of the 500, we thought we could expect one or two hundred to sign up for it. We want to see how it works out with a small number of students before we go that big," Day added.

According to Helton, the

course found sponsors in several areas because of the student interest. He said, "the course is supported financially by Coonrod, administered by Dobson, and managed by me."

Coonrod's support came in the way of a \$500 grant to cover the costs involved in organizing the course. The money came from a fund designed to provide for the development of experimental courses, Helton said.

Day said the money will be spent on film rentals, duplicating, and other costs involved in organizing the

course. "I've already spent \$110 on films for the course," he said. *The Other Way* a Nova program by E. F. Schumacher, the main proponent of "small is beautiful" economics, and the *Alchemist*, about an alternative farm, are among the films scheduled.

The future of the course is a subject Day is reluctant to discuss. He said, "We'll just have to see how it goes this semester. Next time it's offered we might increase the class size, but I like the room we're in and so the room size will probably limit enrollment."

Chemical Engineering snags grant

The Department of Chemical Engineering here has been awarded a matching grant of \$7,600 from the Instructional Scientific Equipment Program of the National Science Foundation.

The purpose of the NSF program is to help colleges

and universities improve their instructional program.

The grant is matched by University funds to provide a total of \$15,200 for instructional equipment purchases, according to Dr. K.L. Holman, professor and head of chemical engineering.

The funds will be used for the purchase of a gas chromatograph with reporting integrator and a catalytic reactor for use in laboratory assignments in three major courses which are taken in the junior and senior years, Holman explained.

CLIMB THE LETTERS TO SUCCESS

Air Force ROTC can give more value to your college years and help you pay for your schooling at the same time. You can compete for a two, three, or four-year Air Force ROTC scholarship that will pay you \$100 a month and pay for your tuition, books and lab fees, too.

Plus, there's flight instruction for those who qualify, a commission as a second lieutenant after graduation, then responsibility and challenge in an Air Force job.

The list goes on. Check it out. See if you can climb the Air Force ROTC ladder to success. It's a great way to get ahead in this country.

Air Force ROTC - Gateway to a Great Way of Life

KUOI-FM 89.3 STUDENT UNION MOSCOW IDAHO 83843

There will be a staff and organizational meeting Thursday, September 8 at 7:00 P.M. in the Blue Room cafeteria on the first floor of the SUB. Bring your suggestions, your criticisms, and a lot of enthusiasm.

From D.J. to Bugs Bunny

Blanc: a man for all voices

By ANN FICHTNER

It's interesting because Mel Blanc has been doing voices for a very long time. And he can do well over 400. "They're not kidding much, when they say, 'the man with a thousand voices,'" exclaims Mel.

Blanc was doing voices for Warner Brothers before they were Warner Brothers. Mel chats, "I was doing many dialects in grade school, but I didn't start creating voices until I started at—it was then Schlesinger Cartoon, who was a relative of Warner Brothers and he sold out to them."

Before Schlesinger Cartoon, Mel was busy being a pioneer disc jockey in Portland, Oregon for KGW. "They couldn't afford to give me an orchestra so I had to use phonograph records, and I sang along with them. That was in 1933," recounts Blanc. At that time, he was working 16 hours a day, writing, producing and directing *Cobwebs and Nuts* a comedy show. After two years of that, he and his wife said good-bye to Portland and moved back to Los Angeles. Blanc says, "The first job I got in Los Angeles paid more than what I got a whole week in Portland."

Then, he started creating the many voices for the Bugs Bunny Show, the first voice being Porky Pig. Those classic Bugs Bunny Shows, why are they so good? "Well because it's full animation," declared Blanc, "it took 125 people nine months to make one six-and-a-half minute cartoon." And they can't afford to do that now. "The writers for Warner Brothers' were way ahead of their time," noted Blanc.

"Frankly, I think cartoons today are pretty bad, because they're not full animation," mentions Blanc, "the background is on a turntable. It takes one-tenth amount of

time to make a cartoon now." What's Mel Blanc doing these days? Well, he's quite busy making new TV shows, like "Captain Caveman (a take-off on "Charlie's Angels"), "A Connecticut Rabbit in King Arthur's Court" and "The Bugs Bunny Follies." He's also in great demand from college campuses, "I can't do too many of them, my doctor won't let me do more than three in a week. Normally, I could do seven in a week, if I wanted to, but it's too tiring. I work hard on my speech," comments Blanc.

Blanc likes to do charitable shows. "I've done many shows and commercials for

charitable organizations," said Blanc. Mel happens to be a Shriner, too. "I love to do the voices, I see the people enjoy it, especially the kids. I go to the Shrine Hospital just to get the kids away from their pain, for a little while. I get great satisfaction out of it. It makes me feel very good."

Mel thinks radio is easiest, but he loves it all—radio, TV, cartoons and entertaining. "I love my work, I love to do all this," he exclaims.

And that's all folks. Mel Blanc will be here at the U of I, to entertain all of us, for free, Wednesday night at 7:30 in the SUB Ballroom.
