Argonaut/Jim Collyer

The new stainless steel sculpture on the administration lawn has raised several questions about its purchase and setting.

Faculty council defeats class change

By a 17 - 2 vote, Faculty Council defeated a proposal to change the class schedule for next year. The proposal suggested an 8:30 a.m. to 4:30 p.m. classroom day, instead of the present 8 a.m. to 5 p.m. schedule.

One proposed advantage of the schedule would divide cafeteria users into two groups at the noon hour. This would alleviate congestion at the Wallace Complex cafeteria. This year classes were scheduled at noon to facilitate student movement through the crowded eating area.

Dan Mertens, student faculty council member, said the Wallace cafeteria line is only a 10 minute wait. He said he consulted with several student living groups about a class schedule change, and all "overwhelmingly wanted a noon hour."

The disappearance of an open noon hour, now used for meetings and activities, was a disadvantage brought to the

council's attention. Robert Spevacek, music professor and former director of the marching band, explained that the noon period is the only time the band can rehearse.

He said the activity has experienced a 10 percent decline with this year's noon classes. "The activity would be eliminated in its present form if we went to this class schedule," he said.

At the Tuesday meeting, the council also approved a

Non-students have first shot at new Blue Key Directory

Staff, administrators and faculty will receive advance issues of the Blue Key directory this coming Monday and Tuesday. Students will be able to pick-up their pre-paid directories and buy directories on Thursday or Friday, according to Scott Hanford, Blue Key representative.

Placement of statue sparks controversy among students

By KIT FREUDENBERG

Students from various living groups have asked their ASUI senators to spearhead a petition drive to remove the new sculpture from the administration lawn to a more modern setting.

One senator, Sally Johnson, said she does not like the sculpture, and will represent student interests in moving the work. Johnson said student complaints range from dislike to no student participation in the selection of the piece and the site.

The sculpture cost \$430 to erect in its current setting, according to Ed Stohs, physical plant manager. He said the removal would cost about the same amount, plus another \$430 to "replant" it. Johnson said she has asked the fine arts committee to finance the move if the petition drive succeeds. If the committee cannot pay, she will look for other funds.

Head of the selection committee which chose the sculpture, David Moreland, said he contacted the ASUI Senate for a student representative several times. After no response, Moreland chose Kim Stavros, an art graduate student, to represent student interests. Other committee members included Robert W. Coonrod, academic vice-president; George H. Roberts, art and architecture professor and Agnes C. Schuldt, music professor.

The ASUI student representative to the fine arts committee Ray Swensen, said his appointment expired last February when Lynn Tominaga, present ASUI president, took office. Swensen asked for a reappointment, but said he really does not know if he had received it. He said the fine arts committee never had regularly scheduled meetings. The funds for the purchase of

the sculpture came from the fine arts committee's yearly budget, according to Coonrod.

He said the committee receives an annual \$1,000 budget from the university to "enhance the fine arts awareness on campus." The committee spent last year's and this year's budget of \$2,000 for the work.

Within this purpose "to purchase works of art for the university collection," the committee decided to purchase an outdoor sculpture, according to Moreland. The selection committee solicited slide portfolios from Northwest artists for available sculpture. Moreland said, "We looked at 10 to 15 artists' work." The piece selected came from "a unanimous decision" by the committee. Moreland said the committee felt the \$2,000 price tag was "worthwhile for this piece."

After purchase, the committee appointed a site selection group consisting of the original selection members with George Wray, art and architecture professor; George Gagon, physical plant director; President Gibb and a landscape architect. The group walked over the different sites chosen and looked at the sculpture.

Moreland said the various sites considered were "all on the ad lawn." The present site was "the consensus of the committee," said Moreland. "The ad lawn needed something other than the 'Old Soldier'. There was a sculpture already on the west side of campus," he said. The committee hoped the placement of the piece would force the viewer to move up to appreciate it, according to Moreland.

The work is titled "untitled," Moreland said, and probably has \$1,500 worth of material in it. He said he is pleased that the sculpture has received so much attention, but did not think it would cause much controversy among the university community.

The fate of the sculpture remains to be seen. If the petition drive to have it moved to a modern setting succeeds, funds will have to be found. Even then, the move will not be easy, because the sculpture is set in 4 feet of concrete below the ground surface.

Deadly nerve gas will fly

(ZNS) The Environmental Protection Agency has given the go-ahead for a

controversial Army plan to fly 900 deadly nerve gas bombs from Denver over populated areas to the Dugway proving Grounds in Utah.

The nerve gas bombs, which were reportedly designed to trigger respiratory failure and sudden death, are currently stored at the Rocky Mountain Arsenal in Denver. The Army, however, wants to move the toxic nerve gas to the isolated Dugway Proving Grounds in Utah.

The E.P.A. in Denver, in a letter to the Army, says that the agency has "no remaining environmental reservations" about flying the nerve gas. The agency conceded, however, that there is what it called a "definite societal risk" associated with keeping the weapons at the Rocky Mountain Arsenal, and that flying the toxic materials did, of course, increase that risk.

The Army says that the nerve gas should probably be moved because it is next to Denver's busy International Airport, where an accidental plane crash might cause a major nerve gas catastrophe in Denver.

Off-campus students discuss alcohol at seminar

By MARY STOREY

Off campus students met Wednesday in the SUB Pend O' Reille room to discuss issues of recent concern here.

Two senators, Mark Nuttman and Stacey Silva, introduced topics and listened to student's comments.

The meeting began with the discussion of the proposed alcohol policy. The students were asked if they would obtain signatures for the alcohol policy petitions which are to be returned by Oct. 24 at 5 p.m. Nuttman said, "We are trying to get as many petitions around and from there they will go to the Board of Regents and to the Moscow City Council." The students were reminded that the petitions are not limited to only students, but may be signed by faculty and members of the community. The senators distributed bulletins advertising the alcohol policy hearing Oct. 25 from 9:30 a.m. - 5 p.m. in the

SUB Gold Room.

It was noted that ASUI elections will be held Nov. 16. All students will be eligible to vote on a president, vice president, and six senate seats.

The students will also be voting on whether or not to continue paying the \$2 marching band fee for the next fiscal year. According to the senators, unless the fee is continued the marching band will be dropped.

The senators explained it is possible that a section on the ballot may allow students to vote on a fee increase, and on where that fee increase should be allocated.

They also said they would like to see a section asking students whether they lived on or off campus. This would help officials determine what percentage of each places a ballot and which students vote for or against certain issues.

Nuttman saw a possible problem. "When you create a

ballot that long, will they take their time and vote correctly?" he questioned.

Silva emphasized that 25 percent of the students are needed to vote for the fee increase to make the vote valid. She said only 23 percent of the students voted for the increase last year.

Next on the agenda was an issue concerning the last day a student may drop a class. It has been proposed by some faculty members that the date be moved up from the present (Nov. 28) to one week after midsemester grades.

Off campus student Tom Heward said he is in agreement with this because, by then, a student should probably know whether he will be able to make the

pass or fail a course and decision.

It was also pointed out that many students might not have been given a test or assignment and therefore may not have a substantial grade to base a decision on.

The off campus students began to discuss the U of I's latest controversy, the sculpture on the Administration Building lawn. The students felt the general consensus was that the sculpture might be more appropriate in a different location. Something more architecturally consistent was suggested, like the Law or Agriculture Science buildings.

It was also suggested that if left on the Ad. lawn it would become something of a fixture

over the years.

Everyone agreed that they would like to hear the artist's views on where the sculpture was placed.

The senators emphasized that the attendance rate at the off campus meetings is very low. Silva said, "54 percent of all ASUI members are off campus students."

"We need closer relations for off campus students to come back to the campus, rather than just for academics," said Nuttman.

The next off campus students meeting is tentatively set for Nov. 2. Budgets for the next fiscal year will be studied and explained in depth. Information in the form of pamphlets and bulletins will be out in advance.

Voters can't register on campus

The Moscow City Council Monday night refused to provide a voter-registration booth anywhere other than the county clerk's office and cityhall. Students planning to vote in next month's city elections won't find a registrar on the U of I campus.

The city leaders also moved to:

--- up zone an area north of "D" street and west of Hayes to single family residential - high density

--- accept bids totaling roughly \$37 thousand for six new city vehicles

--- designate the Moscow library building as a museum should voters approve a bond for a new library

--- appoint city engineer William Smith as the new city supervisor.

Gay Ronald unacceptable

(ZNS) The McDonald's Corporation has successfully muzzled an actor who once played the part of the company's mascot, Ronald McDonald.

Bob Brandon has been enjoined by a Daytona Beach court from ever putting on a Ronald McDonald clown costume again.

The unusual legal decision was handed down by Florida

A capacity crowd of 50 businessmen, students and candidates for city office attended the meeting.

Mayor Paul Mann noted a request for an on-campus voter-registration booth. But he called such action unnecessary. Mann said students travel no greater distance to the two designated registrars than most of the city's residents.

City council candidate Linda Pall disagreed. She asked the council to station a registrar on campus once or twice a week.

Mann questioned giving students that service. He said the move would set a poor precedent. Providing students with that service would be opening it up for other special interest registration places," he said.

Circuit Court Judge Robert Miller after Brandon "came out of the closet" last spring to announce that he was gay. Brandon, a former Ronald McDonald actor, stated that he wanted to make the statement to demonstrate that he, like millions of other gay people, commonly interact with children without "perverting their morals."

The McDonald's Corporation was not pleased with Brandon's confession. Corporate lawyers persuaded Judge Miller to issue the injunction against Brandon. McDonald's complained that Brandon's statements might cause the general public to get the idea that their fictional clown mascot is gay.

The council took no action on the request thus killing it.

Voters must register by November 3.

Mann appointed William Smith as the new city Supervisor at a salary of \$26,000 per year. He said he considered in-house people for the position. Smith, currently the city engineer, was unanimously confirmed by the council.

The council also voted to keep duplexes out of an area north of "D" Street and west of Hayes. The section was previously zoned as Two-Family Duplex Residential. Its classification was changed to Single Family Residential-high density.

Voters will decide whether to build a new library building in next month's election. Should the bond pass, the city will have the current building to contend with. The Council voted to designate the building as a museum, if voters approve a new facility. The Latah County Historical Society would operate the museum.

The Council accepted bids from local automobile dealers for six new vehicles. The total price tag comes to about \$37 thousand. Wally Orvik Chevrolet will supply the Moscow Police Department with two Chevrolet Impalas for \$9,903. The city administration will buy a LTD-II from Delta Ford for \$5,501. The city Streets and Parks and Recreation Departments will pay Orvik \$8,042 for two half-ton pickup trucks.

Helbling Brothers was the low bidder for a heavy truck for \$15,235.

ASUI offices up for grabs

The ASUI presidency, vice-presidency and six senatorial positions will be open for election this semester. Any fee paying ASUI student taking over six credits is eligible.

Petitions can be obtained at

the ASUI office in the SUB between today and Nov. 2. A candidate needs 75 signatures from ASUI students to qualify for nomination. It has been recommended that petitions have at least 90 signatures.

Ex Argonaut staffers complain about editor

Two former Argonaut staff members presented a list of grievances at a communications board meeting Tuesday night. Jim Spiersch, ex-staff writer, and Bill Loftus, ex-managing editor, filed the complaint against editor Rosemary Hammer and her staff policies.

The men list in the complaint several areas which they believe Hammer has not given adequate consideration and could damage the "news gathering ability of the Argonaut as a newspaper." Changes asked for include more interrelation between editor and writer, the establishment of a news department and the abandonment of personal prejudices between the editor and staff.

Spiersch, who resigned Oct. 3, said, "I'm trying for a new policy, not coming down on Hammer." He said the changes could improve the quality of the paper. Spiersch said he would like to write for the Argonaut, but only with some editorial policy changes.

Loftus, fired by Hammer Saturday, said he came into "conflict with Rosemary over policy changes which she interpreted as personal mat-

ters." He said, "As a result of her management policies, there was general confusion among the staff, specifically the news writers." Loftus said he could not support Hammer for reappointment to the editorship next semester. He would like to be reinstated by the communications board, but only if Hammer makes the asked-for policy changes.

The complaints "stem from personal differences rather than professional differences," said Hammer. "Both men have very bad attitudes." She said the incident has been "grossly exaggerated." Hammer said she felt the men made a pretense at trying to resolve differences before going to the communications board. "However, it is the function of the board to resolve this sort of problem," Hammer said.

According to the ASUI rules and regulations, "the editor shall determine all editorial and business policies...and employ and discharge all staff of the Argonaut subject to review by the communications board."

The board will hear arguments about the situation Tuesday at 7 p.m. Spiersch, Loftus, Hammer and several Argonaut staff members will be present.

Argonaut/Jim Collyer

An innovative solar collector system, developed by U of I students has won acclaim from electronics designers. The system, intended for domestic use, generates both electricity and hot water.

Prize winning solar system

Grads develop new energy

Several U of I graduate engineering students have developed an award-winning solar collector system that generates both electricity and hot water for domestic purposes.

Designed in part by John Wennstrom, U of I electrical engineering student from Boise, the tracking solar collector supplies electricity to run itself and other small loads by means of photovoltaic cells, in addition to providing hot water for heating or household.

Wennstrom, who designed the electronic circuits of the solar tracker, has received commendation for a technical paper on his project. The tracker itself, which is a highly efficient solar collector, was judged the best university display at WESCON, the world's largest electronics show, which was held recently in San Francisco.

The tracking solar collector was built as a project in a U of I electrical engineering senior design course, said George Hespelt, associate professor of electrical engineering. "The course requires the design, construction, testing and documentation of an original device."

After Wennstrom designed the electronics circuits, the tracker itself was designed and built by graduate electrical engineering students Frank Walker, Salem Issa and Wennstrom. Roy Hoar, mechanical engineering graduate student assisted in the design and construction of the mechanical parts.

The design and development of the solar collector was sponsored by the Washington Water Power Co. and the Idaho Power Co. in a continuing program to investigate alternate energy sources that may benefit their customers, according to Hespelt.

The student-built unit is a scale model of a larger device that could be used to provide hot water for domestic and heating purposes in homes throughout the country, Hespelt noted. "The generation of electricity and hot water for utility and heating purposes is of primary importance to utilities as supplementary energy systems of the future," he explained.

The student unit is a combined photovoltaic and thermal solar collector with a

parabolic cylinder focusing system, Wennstrom explained, adding that a photo-activated, digital logic system controlling a direct current motor starts, tracks and returns the collector automatically.

The fine art of priorities

Observers of the so-called "Seventies Generation" make the frequent claim that the main fault of today's youth lies on a sort of self-centeredness, a large apathy towards issues. They feel that most students are primarily concerned with just getting a job and keeping their noses out of public controversy.

Nonsense, I say. If the students of the U of I are any kind of barometer, the main drawback of our prevalent attitudes is not an unwillingness to become involved; rather, it stems from an inability to discern which issues deserve the most concern.

This semester's goings-on in University politics serve as an excellent example. At present, the "blazing issue" with which most students are occupied is a general dissatisfaction with the new sculpture placed on the front lawn of the administration building. Some feel that it is simply ugly. Others disagree, contending that it is an attractive piece of art.

But the most relevant question raised concerning the sculpture thus far has been: Do we really need it?

The \$2000 price tag came directly out of University finances in the form of the Fine Arts Committee's budget. It seems that the funds could have been put to better use at a time when our library needs more books, the financial aids office is barely keeping afloat, and the University in general is screaming for funds.

On top of that, another question arises: While the administration has been in an ongoing battle with the legislature over funds for several years now, won't our credibility be hurt in the future when it is seen that we can throw away dollars like that on a piece of art? Won't they be that much more hesitant to give us additional funds when we really need it?

All this is fairly important in terms of the problems facing the school. Mismanagement of funds at the U of I is nothing new, but there should be a point where we draw the line. (Don't get me wrong—I see nothing wrong with the university increasing our aesthetic appreciation. It's just that at a time of financial difficulties the school's main concern should be the effective education of

its students, and should relegate funding accordingly).

But on the other hand, we have a problem confronting us that has received very little attention from the students, embodied in the new KUID tower antenna. Again we have a question of aesthetic appeal. Its location will directly affect the much-acclaimed beauty of Shattuck Arboretum, and the skyline directly above it. The antenna, once built, will not exactly be a work of art.

This problem was raised almost a year ago and seemingly dealt with then. Now, we reach the real meat of the issue. It appears that a number of people, including the former University president, students and faculty, were all deceived, and perhaps even lied to, on the administration's intentions on this point.

Back in November of '76 then-President Hartung was urged to approve construction of the tower by Financial Vice-President Sherman Carter. According to Hartung, the plan as it was presented to him would have constructed the antenna on the north face of the hill and would not have been visible from Nez Perce Drive, which runs atop the hill and past the president's house. Hartung accordingly approved the plan.

Well, kiddies, what you were told wasn't what you got. The foundation for the station has been poured, and it rests on top of the hill, east of the I-

Letter policy

The *Argonaut* welcomes letters from students, staff and community members. Letters should be typed, under two pages long, and must be signed. Hand written letters are accepted, but stand much less chance of being published. Writer's names may be withheld if the editor feels there is a valid reason to do so.

Address letters to:
"Letters to the Editor"
Argonaut
Student Union Building
Moscow, Idaho 83843.

tower. There in all its glory to increase your aesthetic appreciation.

The whole matter really stinks when you consider that there are only two ways the administration could have performed this awesome feat. First, the presentation of the plan to the Zoning Board featured a completely different plan than the one approved by Hartung. Or they could have presented the same plan to the board as they presented to Hartung, and gone on their merry way and poured the foundation just where they pleased.

Students should be asking questions like: Why were we told that the tower would be one place and you made it in another? Why wasn't the site requested by the students and faculty suitable? If it wasn't, then why was no further approval of the matter sought?

But they aren't. Most of them aren't even aware of the problem. The ASUI Senate, moving at its usual breakneck pace, has done nothing to investigate the matter. Most of us are worried whether or not we should have a hunk of metal on the ad lawn, or whether the ATO's are biting off any more chicken heads. The KUID tower? Is something wrong with it, we ask?

Nothing's wrong with the tower itself. It should be a useful asset to the school. But something's wrong when we have an administration that not only mismanages its funds, but purposely deceives its students. And something's even more wrong when those students do less than nothing about the problem.

After all, deception is a greater crime than simple mismanagement.

Backward women

Last week, after their concert, Holly Near and Mary Watkins conducted a workshop for women interested in women's music.

That's nice, but why for women only?

Most factions of the feminist movement stress that men be involved, or at least welcome to participate, in their various endeavors. As well they should. It is pointless to raise the awareness of women, if her male counterpart is left out.

This campus is not known for its liberal attitudes, and probably very few men felt slighted by Near's and Watkins' rudeness. Had they been made welcome, I'd guess three or four men would have attended...hardly a disruptive number, in any case.

Some women musicians were disgusted by the rather blatant sexist attitude of Near and Watkins! They know only too well the damage that can be done by closed minds.

I only hope that the credibility of the Women's Center, co-sponsors of the event, is not damaged by this backward display.

Wayne Kidwell didn't listen

When Wayne Kidwell graduated from the U of I College of Law some 13 years ago, his uncle supplied him with words of wisdom: steer clear of politics.

Like many youths, he didn't listen.

He has been so involved that 1976 was the first time in ten years that his name wasn't on the ballot for something or other. He has been Ada County Prosecuting Attorney, the Majority leader of the state senate, a candidate for Congress, Attorney General—and for a time, a man with a chance of winning the governor's race next year.

Kidwell blew himself right out of the governor's race last summer claiming big money was attempting to buy the GOP nomination. He may not be wrong. But in Republican circles that kind of statement doesn't win support.

Kidwell thinks its time for a change in politics. There has been a change in Kidwell. He said it began with the 1976 election. Since the attorney general is a four year term, it was the first time in 10 years he wasn't on the ballot. "You know, when you're a candidate and you're out working hard and getting five hours sleep and covering the state, you think everybody cares," he said. But observing from the sidelines, Kidwell noticed something quite different. "The startling thing if I could just simplify it is to realize how little people really care and pay attention. That came screaming back to me when I was not a candidate," he said.

"For the first time in the history of this country, we now routinely expect less than 50 percent of the eligible voters to go vote," Kidwell said. "I think that is frightening," he said. "Just scary as hell."

Kidwell said the people are being turned off by the political system. The word politician has taken on insulting connotations he said, such a "being wishy-washy, or not saying anything, or being involved with special interests. And we're all guilty. I'm not saying they. I've been a part

of the system for a long time," he said.

Kidwell is not quitting the system, however. He said he plans to run for re-election. He added he has not ruled out future governor bids. But he said being attorney general gives him a unique outlook on Idaho events. "Also, with no

Wayne Kidwell

other Republican state office holders other than the secretary of state, it puts me in a unique situation of being able to see the whole perspective," he said.

Kidwell has used that "perspective" to fight Idaho's fertilizer suppliers, and the Panama Canal Treaty. He has lawsuits pending on both.

Kidwell, along with a group of congressmen and other state attorney generals filed two separate lawsuits on the treaty. The first, claiming the Federal Freedom of Information Act had been violated, hit into the Supreme Court when President Carter's signature was affixed to the paper.

Kidwell claimed the full text of the treaty was not provided until the day before the signing of the treaty. The first lawsuit was filed, based on excerpts provided by the administration, Kidwell said. As Latin American leaders flew into Washington for the treaty celebration, the lawsuit was thrown out of the court. Kidwell acknowledged it was a

long shot. But he added it set the groundwork for the second suit.

This suit charges that both houses of Congress must approve the treaty. Under Article Four of the U.S. Constitution, both houses must approve any measure by which the nation would dispose of property. Although the canal zone itself is leased to the U.S. by Panama, the canal's equipment such as locks is U.S. property. Kidwell pointed to a previous incident when the Nixon Administration gave an air field to the Panamanians. "Nobody argued then that they could do it by treaty. It was done by both houses of Congress," Kidwell said.

The Carter Administration is relying on Article Two of the constitution. That provides the president with the power to make treaties with the consent of the senate.

"The people of Idaho are being deprived of their representation in one house of Congress by the way that President Carter is proceeding. In my opinion that very much makes it a state issue," he said. Kidwell acknowledges the canal issue as a good one for a Republican. But he added it will not be the cure-all issue for the GOP. "I don't think there is any one issue that is going to bail out the republican party."

And Carter may not be the only politician in that position, Kidwell said. He pointed to Sen. Frank Church. Church, the only Democrat in the Idaho Congressional delegation, is the only Idahoan in Washington not opposing the treaty. "He has a record of

privately supporting the negotiations leading up to the treaty but now is afraid to endorse the treaty because of how the people of Idaho feel," he said.

But Democrats have charged Kidwell has no business in the treaty debate. As a state official, there is little he can do for Idaho other than make headlines, a possible Democrat opponent has said. But Kidwell noted Mike Wetherell, a former Church staffer turned Attorney General candidate, has less reason to make Panama a campaign issue.

Kidwell added Wetherell may be feeling out the Idaho political mood for Church. "I was told by some friends in Washington that I talked to on this that Wetherell has been asked to raise the issue for Sen. Church to try and see how strong the people of Idaho felt on this," he said. "Wetherell as a trouble shooter for Church may well be just doing his homework for his old boss," he added.

Kidwell said he has no objection to negotiations for a new treaty between the U.S. and Panama. He added the original 1903 treaty should not be stamped in stone. We all know better than that," he said. "I'd just say we don't have the answer yet and I'd send them back to the negotiation table," he said.

J. R. Simplot is another Kidwell target. In conjunction with the Washington State Attorney General's office and private groups from Oregon, Montana, and Alaska, Kidwell is charging the Idaho fertilizer magnate and several oil com-

panies with violating the federal anti-trust laws. The suit charges the corporations with price fixing. Kidwell noted the losses to Simplot alone add up to millions.

"I think we have a reasonable case," Kidwell said. But he added, "this is not the type of case that helps campaign treasurers." "Politically it's an awkward case because I'm going against people that normally support Republicans and I was told in no uncertain terms that maybe I should be careful in this type of case," he said.

But its a new age, Kidwell said. Politics are changing. "I just don't think those old restraints can work," he said.

Letters

Sorry...

To the Editor:

In this week's previous issue I submitted a very VEHEMENT letter damning what I felt was the partiality involved in choosing this year's Homecoming Queen. After the letter was published I received a phone call from a genuinely concerned ASUI programs official who explained that the elections were actually very fair and it was just an unfortunate coincidence that the girls who dominated the royalty committee were from the same house as the girl elected queen. She also went on to explain the reason so many Pi Phi were on the committee was no one else cared enough to devote the time or effort. In light of this information I feel obligated to admit that I was wrong in my beliefs. More importantly I would like to apologize to the Pi Phi in general and Deb Thompson, Royalty Chairman, in particular for slandering them as I did.

Ratch Cirillo

Ignorance

To the Editor:

"Ignorance is Art's worse enemy." So reads a poster I once saw. After Tuesday's letter to the editor I am convinced of its truth. The letter I refer to made particular ridicule of a new sculpture piece recently

acquired by the University. The modern sculpture stands on the administration building's front lawn. It is easily seen from the walkway and encourages passers-by to take a close look. The author found the work "worthless."

I disagree with the insensitive author-critic and intend to show the reader some of the work's worth. Casually walk with me for a moment. Let's stroll through the campus on this bright autumn day. With no particular destination in mind we enjoy our leisure. Notice nature about. See the falling leaves scattered by the wind. Stoop down, lift one for examination. Curious isn't it? Look at the intricate pattern created by the lace-fine veins. Perceive the brittle fragility of its drying state. It is a beautiful object.

Continuing on our casual sojourn we see a chestnut tree. Beneath the tree are strewn hundreds of chestnut seeds. Discern the contrast of the deep, rich, red hue in comparison to the green carpet of grass. We gather a few. Their texture is smooth, round and feels soft to the touch. We like both the leaves and the nuts.

Walking along we suddenly see a chromium object hidden among some trees. It is unexpected, so we are surprised. Here among the

trees is our reputed sculpture piece. As with the leaves and the chestnuts we are drawn to it. There is contrast between the slick, shiny surface of the cool, highly polished steel and the warm, dull, organic forms that surround it. It is tall and narrow, our eyes are guided skyward. We focus on the dented, battered portion. The surface is cool and smooth to the touch. We also see our slightly distorted image in the mirror like finish.

This adds a quality of whimsy. After our senses are titillated our ability to reason and think abstractly take over. We wonder; why the dents? You, the viewer are free to fill in the blanks. An added dimension prevails: imagination. An element that did not exist in our previous observations. Some mystery and intrigue enter with the dented portion. You can feel free to invent and interpret. This is the artists intent. He was conscious of his audience. Now, you have become a part of a whole experience: the leaves, chestnuts, and the sculpture.

I have tried to lift the veil of mystique that sometimes surrounds modern art. We sometimes perceive art as this thing above us. I have simplified things somewhat to help bridge a gap. In simplification we may find some understanding. All I am asking you to do is this. Open your senses and mind (toward art) the same way they are awake to leaves and chestnuts. Afterwards I am certain you will begin to enjoy modern creations of man.

Perhaps more of our time could be spent in appreciation of art involvement, rather than in indolent criticism.
Wm Roger Clark

Gay plight

To the Editor:

This "letter to the Editor" concerns the plight of the gay people, and the harassment that the Campus Christian Organization and others are laying on them. I am straight, but am not completely happy with it. Unlike most "all American" people, I wish I were mentally bisexual. I have many friends, who, thanks to Anita Bryant and group, have finally come "out of the closet" and let me know they're gay. The thought comes to my mind that I wish I could GROK completely with them, (complete love - I am you and you are me and we are ONE), rather than just love them mentally. But until I move to a higher plane, it cannot realistically be.

The oppression against gays makes about as much sense as that against women. Currently women comprise 51 percent of the U.S.'s population. How come they are still oppressed as a minority? The latest survey, being a very conservative one, showed that currently 28 percent of our population is gay. You'd be surprised how many of your friends are gay. If the oppression was not so extreme, maybe they'd be willing to trust you with this awareness. Thanks to Anita, many are currently

opening their closet door and have come out to fight for the right of being considered human.

The majority of the "in the closet" gay people are women. This is for an obvious reason. The rapes by males of gay women are of a phenomenal number. People of the stereotyped macho Charles Atlas type think about gay women; "If they're shown how a real man does it, they'll realize what they've been missing."

You see, no matter what kind of a "white trash WASP" you are, you know that you're always better than a "damn nigger." A Black knows they're always better than a "kike"; a Jew knows they're always better than some "snatch"; and a woman knows she's always better than a "lousy fag." If you're a gay Jewish Black woman, you're just out of luck.

Your friend,
Charlie Brown

Clarification

To the Editor:

Concerning Betsy Brown's editorial about attitudes toward homosexuality: I think the issues need to be clarified, and the inconsistencies of the two polarized sides pointed out. Those that have a concern for individual freedom in this society should realize that freedom involves tolerating behavior that we don't necessarily condone in others. If we have learned anything from our attempts to legislate morality (marijuana and liquor prohibition in particular), it is not only that they are counter-productive but, from a free society's standpoint, morally objectionable. If a person objects to homosexual relations, he should refrain from them himself, and allow others to mind their own business.

The focus of the Gay Rights movement, as evidenced by the proposed Miami-Dade County ordinance, however, goes beyond demanding the right to live one's own life free from legal harassment. The ordinance requires, by force of law, that employers and renters must rent to or hire homosexuals, regardless of their personal preference in the matter. Thus, where one group would deny the right to be gay, the other would deny the right to deal freely on the open market to those who disapprove of the gay lifestyle.

Both positions I feel are morally abhorrent. There is a lot to be said for minding one's own business. For every regulation of our lives, regardless of the implied moral good, we are a little less free.

Senate calls for alcohol policy support

It was a relatively uneventful meeting for the ASUI senators Wednesday night as a series of bills and resolutions appeared before them for consideration. Most were passed or sent to committee for further consideration.

The most notable of those was a resolution concerning the Senate's stand on the sale of alcohol at the ASUI golf course. At present, neither the consumption nor the sale of beer or wine is allowed on University premises. Senate

Resolution No. 57 is a request by the Senate to grant the ASUI the right to sell those beverages on the premises of the golf course, and to allow the Student Union Food Service to contract with an outside caterer to provide beer and wine for dinners and banquets.

"This resolution is primarily an expression of the Senate's view of the present alcohol policy on the golf course," said co-sponsor Stacy Silva. The measure passed

unanimously.

Related to that, the Senate was presented with petitions indicating student support of the upcoming alcohol injunction by ASUI President Lynn Tominaga. The Senators were asked to bring those petitions before the living groups which they represent, get them filled and returned to the ASUI offices before Monday, Oct. 24.

Mike Helbling, who assisted in the presentation, stated that "the petitions will be presented to the Board of Regents at their next meeting. We hope that we can get a lot of signatures indicating the students' support of this measure."

In addition, Helbling warned, "If we don't get these petitions signed, then this injunction will just go down the drain and we'll have to start all over. That means we'll have to go through the courts with legal arbitration if we want to achieve our goal, and that will cost us that much more over what has already been spent."

Other business included the appointment of two students to the ASUI Communications Board. The first student considered was Scott Fehrenbacher who previously served on the Activities board. After some debate and questioning, his appointment passed by an 11-1 vote. The other Comm. Board appointment, that of Cary Hegreberg, also passed.

Thom Kincheloe was named Chairman of the Election board, also after considerable debate and questioning. Kincheloe stated that he would "try to make it a policy of the Election Board that none of its members would actively campaign for any candidates." He also assured the Senate that he himself would do no such campaigning.

"Nobody but myself will know how I am going to vote," he said.

The one bill that failed concerned the appointment of

Mark Chivers to a student-faculty committee. Senator Sally Johnston stated that she felt that Mr. Chivers was "unable to adequately express himself and his opinions, and that he does not have the experience necessary for this type of position." Nine of her

fellow senators agreed with her in the final vote.

A resolution against the proposed class schedule change to a staggered lunch hour system, was presented and passed by the Senate after some debate and emendation.

Student input sought

Student attendance is strongly urged for the Regents open hearing on alcohol. Input is needed for a decision to allow alcohol at the ASUI golf course, in the SUB and in the student's rooms. The hearing will be held from 9:30 a.m. to 5 p.m., Tuesday, October 25, in the Gold Room, second floor of the SUB. The hearing will last only as long as testimony continues.

ASUI president Lynn Tominaga said he would like to see students regulate their own alcohol policy, rather than having one regulation control all four state universities. The present policy applies uniformly to all four schools.

Tominaga said he hopes the Regents will "let us be more responsible for this policy we are presenting before them." He hopes the open hearing will show a community and student concern. He said he expects Butch Alford, president of the Regents, and other Regents to attend the hearing.

Student petitions are now circulating to require the University of Idaho Regents to: allow the sale and consumption of beer and wine at the ASUI Golf Course; allow the Student Union Food Service to contract with an outside caterer to provide beer and wine for dinners, banquets and other

similar functions; continue to allow students of legal age to consume alcoholic beverages in their private rooms in the dormitories.

Tominaga said the Regents will take the information received, compile it and probably make a decision on the alcohol policy at their November meeting in Nampa.

For the proposed alcohol policy to comply with local regulations, two Moscow ordinances must be amended by the Moscow city council. One ordinance states that alcohol may not be sold or consumed on any golf course. The other ordinance prohibits sale or consumption of alcohol on elementary or secondary school grounds. According to Tominaga a definition of "secondary" is necessary.

Tominaga said the city council doesn't like being a "middle man" and would rather have the Regents and students work out a policy. He therefore feels the city council will be favorable to amending the ordinances.

A similar open hearing with the Regents was held earlier this week at BSU. Only 14 people attended, only three testified, and the hearing was adjourned only 20 minutes after it had begun. ISU will hold their hearing October 27.

Campus Capers

A two-drawer floor model filing cabinet and its contents has been reported missing from the woodworking shop of Art and Architecture North Building on Monday to the campus police.

John L. Rogers, Moscow, backed his 1977 Blazer into a 1970 Ford Mustang belonging to David B. Cowan, ATO House, Sunday afternoon, according to the police report. Damage to Cowan's car has been estimated at \$300.

A man who identified himself as "Burt" threatened KUID jockey Jack Lemmon on Oct. 8, for not playing the right kind of music. According to campus police report, the man said he would slash Lemmon's car tires for playing the wrong music records. He then gave Lemmon two albums and left. The report describes Burt as a white male, 5'7", 160 lbs., dark brown hair, wearing a beard, blue jeans, plaid shirt and a long dark brown coat. The report said the man "talked in a strange manner."

A vehicle backed into the gate on the sidewalk between the Art and Architecture Bldg. Friday causing an estimated \$100 damage, according to the police report.

Joe Day, 1109 Deakin Apt. 1, reported the theft of a \$100 grill from his pick-up truck sometime Thursday evening while parked in Campus lot 45.

According to a campus police report, someone attempted to break into the forestry lab trailer sometime Tuesday or Wednesday while it was parked in campus lot 20 on the west side of the physical plant.

KUID Radio-TV reported a Johnson two-way radio and a Sony recorder stolen Oct. 9 to the campus police.

According to a police report, someone ripped off the outside rear view mirror and put four dents in the roof of a VW belonging to John Creaven, Gray Loess Hall, on Oct. 8. Creaven had parked his car in the Greenhouse parking lot. The report estimates the damage at \$25.

Aphrodites: love Greek style

By DAVID GAFFNEY

This Sunday, the ASUI Film Society will show a Greek film "Young Aphrodites". Show times will be at 5, 7 & 9 p.m. in the Borah theater. Admission is \$.75. *Young Aphrodites* is the film version of the Greek myth of Daphnis and Chloe, two young lovers in a Greek pastoral romance written by the ancient Greek poet, Longus.

The setting is ancient Greece, where a group of shepherds, who are lost and without water, begin to wander out of their mountain home in search of new pastures. They wander into a sea-coast village which has been recently abandoned by the inhabitants who fear the rugged strangers from the hills.

The shepherds set up camp while their children run off to explore the enchanting new world of the sea-coast. Chloe wanders away from the rest of the children, searching for something they are too young to understand anything about.

She is becoming a young woman whose body is beginning to make strange demands and filling her with desire for love. This urge is more powerful than anything else she has ever experienced in her young life and she answers the mystic call.

She meets a young villager boy and they quickly become star-struck with one another and they wander off to explore the caves along the sea shore.

While exploring, they come upon two lovers in an impassioned embrace on the cave floor. Both children are

jarred at this sight and flee in fear. They become separated and Chloe wanders along the sand. She meets a shepherd who is mute but communicates his desires to Chloe and she accedes.

The film won three festival awards in 1964, one of which was the film fest at Berlin. The movie is in black and white and it is sub-titled.

Robby's the big daddy of robots

By MARTY TRILLHAASE

The success of *Star Wars* has brought some of the earlier science fiction efforts out of the closet and onto the theatre screens.

In Moscow, we have *Forbidden Planet*, perhaps one of the finest science fiction films made during the 1950's. The film begins its run at the Micro Sunday.

The year is 2257. A crew of earthlings has arrived to investigate the strange disappearance of a former expedition sent to the planet of Altair twenty years before and never heard from again.

Enter Robby the Robot. Robby takes the crew to his creator, Dr. Morbius. Morbius (Walter Pigeon) and his daughter (Anne Francis) are the two survivors of the original expedition. Morbius has learned the advance technological ways of a now defunct civilization on Altair. As a result, he soon discovers his intelligence has doubled.

With that new knowledge he creates Robby, a do-all mechanical wonder. He can provide food for his master, and bourbon for the crew. Not exactly your typical washing machine by any stretch of the imagination.

Robby is without a doubt the star of the movie. Given the power of speech, he proves

himself a very witty fellow. One of the crew remarks that the planet has plenty of oxygen.

"I rarely use it myself," Robby replies. "It promotes rust."

If all this sounds familiar, it should. One can easily see the makings of R2D2 and C3PO in this technological prototype.

Forbidden Planet may have

its share of faults. That's the danger when one dives into the future and the product remains to be viewed 20 years later by an audience that has seen man on the moon and the beginnings of a space shuttle system.

But the world was more naive then. And naive, no matter how humorous, is always charming.

If you are an undergraduate physicist, chemist, chemical engineer or biochemist in the beginning of your senior year, it may have occurred to you that decisions made in the next few months concerning employment or graduate school are going to affect your ultimate future to no uncertain degree. Each of the aforementioned disciplines has been producing graduate students who are applying to very competitive job markets. At the same time, there are many openings in broad and highly relevant fields which are related to the conventional sciences. An interesting question is then how can the graduate translate his background to maximum employment and career effectiveness?

Analysis of industrial research and academic needs indicates a mismatch between conventional training, and job opportunities in the field of macromolecules. It has been estimated that more than 60% of chemical industry deals with synthetic macromolecules - polymers or plastics. Approaches to these polymers require organic synthesis, physical chemistry and solid state physics applied to macromolecular science, yet many departments barely mention such topics. Similarly, the food industry (and many others) deal heavily with the structure and properties of biological macromolecules, e.g. proteins, carbohydrates and their assembly, yet again very few chemists or biochemists have the background in macromolecular science to handle such problems. In addition, medical science, dealing as it does with biological structure and disease, heavily involves biological macromolecules, particularly proteins, D.N.A. and related nucleic acids.

Where then can one obtain the background necessary to develop a career in the above interdisciplinary areas? The Department of Macromolecular Science at Case Western Reserve University, with well over one hundred faculty and students, has pioneered the broadening of student skills in the field of macromolecules, and has, in the process, established a noteworthy international reputation. Not only is the Department equipped with the most sophisticated instrumentation, it has extensive facilities for synthesis and biomedical research. Some of the major interdisciplinary programs include studies in high performance composite materials, aging research, connective tissue and artificial joint programs, all addressed from the molecular or supramolecular point of view. In addition, a new M.D./Ph.D. program is currently being initiated.

If you are interested in broadening your training in graduate school in macromolecular science please contact:

Superstars get it on: fun, games, grins, grunts ...

By PHIL BAECHLER

Wash out your old sweat socks and get ready to get your team formed for the Budweiser Superstars competition. Teams must be formed by this Sunday at the latest.

An organizational meeting at 3 p.m. Sunday in the Borah Theater will start the week-long competition. All team members must attend the meeting and fill out liability

release forms, turn in team rosters and get briefed on rules and events.

A week of competition in six events will be highlighted by an Oktoberfest lunch Saturday.

Teams will consist of four men and two women members and an alternate of each sex. All participants must be in good academic standing and may not be a participant in any varsity sport or be on athletic

scholarship.

The schedule for competition will be as follows:

- Monday, obstacle course, 7 p.m. in the dome
- Tuesday, 880 relay, 7 p.m. in the dome
- Wednesday, 6-pack pitch in, 7 p.m. in the dome
- Thursday, frisbee throw, 7 p.m. in the dome
- Friday, volleyball, 7 p.m. in Memorial Gym
- Saturday, tug of war, 10 a.m. in the dome

Most of the events are self-explanatory except for the obstacle course and the six-pack pitch in.

The six-pack pitch in will be a competition to measure accuracy in throwing empty cans into a barrel. Each team member tosses one can.

The obstacle course is a tricky one. It starts with an eight-foot wall to climb, followed by a 12 foot drop. Next is a net suspended two feet off the ground. Com-

petitors must crawl under the net. Next is a set of twelve tires which the contestants must run through, placing one foot in each tire. Next is a four-foot high-jump with a rubber cushion to land in. Then the competitors must race through a broad jump, over four low hurdles and race 50 yards to the finish. Phew!

Winning teams will receive four-piece athletic suits for each team member, free admission to the Oktoberfest lunch and a free keg of Budweiser.

The ASUI Programs committee is selling Superstars t-shirts for \$2. The shirts are printed with the Superstars logo and a large portrait of the Idaho Vandal flying over the Kibbie dome with a giant frosty mug in his hand. Some teams are using the shirts as unifor-

ms for the competition and are printing the team member names on the backs. T-shirts are available at the Programs office in the SUB.

...and grub

Following the Superstars finals in the dome Saturday, there will be an Oktoberfest lunch at St. Augustine's church. The lunch will be at noon and will feature weinerschnitzel, hot potato salad, sauerkraut, and other miscellaneous munchies. Mugs of Budweiser will be available at \$.25 each.

Nick Geir will perform a variety of traditional German music favorites on the accordion.

Tickets for the lunch are on sale for \$2 at the SUB information desk.

Whatever your Hi-Fi needs might be, from fixing a loose wire to a \$4,000 Audiophiles system, we have the expertise to cover you. Come in and find out what we are all about. — Progressive Audio

Coffeehouse keeps on truckin'

This week's ASUI Coffeehouse will be in the Vandal Lounge from 8 to 11:30 p.m. this Saturday. Admission is free and so is the coffee.

An open mike is scheduled from 8 to 9:30 p.m. and one and all are invited to perform.

Bruce Underwood will perform from 9:30 to 10:30 p.m. Underwood is originally from southern California. He played in coffeehouses up and down

the coast before playing on the ski lodge circuit. He plays a variety of contemporary and original vocals and accompanies himself on guitar.

Ruanne Langley will perform from 10:30 to 11:30 p.m. She is a student here majoring in vocal performance. She plays a variety of folk and mellow contemporary music and accompanies herself on guitar.

Get a taste of Duck Breath

For an advance peek at a group that will be performing here, see the Great American Laugh Machine at 11:30 p.m. Saturday on NBC.

The Duck's Breath Mystery Theatre is the name of the group. They will be bringing

their particular brand of comedy to the U of I campus Feb. 5.

The Duck's Breath Mystery Theatre has been compared by some to Monty Python, so check out the tube to get your own idea.

Dance is alive!

Dance is the art of movement. Movement is the soul of dance and music is the life blood. Dancers are tall, dancers are short. Watch them move.

Dance is an art, but it is also work. Stretching, moving, turning, counting. Tempo is the pulse of the art of dance.

Silence is the punctuation of the music of dance. Fluid movement becomes stillness in the silence. Stillness is a part of the dance. It is the movement waiting to be born. It is the ending, the last brush stroke from the palette of dance.

A dance is not born complete. It is alive, it grows. The dancers become a part of the dance and it becomes a part of them. Each movement is polished in hours of practice. The movements are refined, fitted together, intertwined until the final flow becomes joined from beginning to end.

Members of the University Dance Theatre have been polishing and refining the movements of 14 dances for next week's dance concert. Rehearsal is the foundation of dance.

text by Phil Baechler Photos by Clarke Fletcher

Sports

Harriers race in two meets

Idaho cross country hits the road Saturday as the Vandals will split up with eight going to the British Columbian Open, and five to Spokane to compete in the Eastern Washington Invitational.

Idaho travels to the University of British Columbia in Vancouver to defend the title they won last year. The year previous to that Idaho came in second.

The other Vandals will be in Spokane to run in the Eastern Washington Invitational, and it will be the first time ever that an Idaho club will participate. A hot field is represented, including Big Sky contenders Montana and Montana State.

Referring to the entire squad,

Coach Mike Keller said, "We're a much better team this year, probably the best balanced team I've had since I've been here. The practices have been excellent."

The Canadian run is 7.2 miles in length, or 12,000 meters. Vandal hopes are pinned on Steve Ortiz, a runner from California.

To the B.C. meet, Idaho will be represented by Doug Beckman, Gary Gonser, Graydon Pihlaja, Ortiz and three others, while at Spokane, the Vandals will take five runners, including Pat Wilson, Joe Kronk and Kole Tonnemaker.

The forecast calls for clear skies for both meets.

Photo by Maud Sterling

Idaho's Betty Fiandaca drives in to score against Washington State. The Idaho women are undefeated so far this season with a record of 6-0-1. Friday, they will play Northwest Nazarene College at 4 p.m. on the West Wallace field.

Sticks clash in triangular

Sporting a 6-0-1 record, the University of Idaho women's field hockey team returns home for weekend encounters with Northwest Nazarene College and Pacific Lutheran University.

The U of I women will face NNC Friday, Oct. 21, on the Wallace Complex athletic field at 4 p.m.

The Saturday Oct. 22 game with PLU will be the first contest between the two opponents this season. Last season, the U of I women defeated PLU in close

contests. The Saturday game is set for 10 a.m. on the West Wallace field.

Idaho emerged from the Central Washington Invitational held Oct. 15 at Ellensburg, Wash., with its undefeated record intact.

"We entered the CWU tourney knowing we'd have some hard games to win," Jo Dean Moore, field hockey coach said.

"We played some outstanding defense as is shown by the opponent's penetration time. We are off to a great start but know we have some tough ones coming up. I think the team needs a few weeks at home to prepare for the rest of the season."

On Oct. 15, the U of I women

defeated host CWU 4-2 on goals by Vikke Howard, a junior from Rupert; Debbie

Schenk, a senior and team co-captain from Rupert; Jeannie Meher, a senior from Ridgefield Wash.; and Betty Fiandaca, a junior from Moorhead, Minn.

The Idaho women continued their winning ways by defeating Western Washington University 5-0.

"This was a big win for us," Moore said. "They defeated us in all our encounters last season."

Scoring for Idaho was Fiandaca with two, Schenk, Karen Stambaugh, a junior from Boise, and Alise Smithe, a freshman from Rochester, NY.

Fraternity sponsors tourney

A bowling tournament sponsored by the Kappa Sigma Fraternity and involving teams from various living groups on the U of I campus will begin Saturday at 9 a.m. in the Student Union Building.

Proceeds from the event will go to the Latah County "Friends Unlimited" program, according to Stu Bixby, chairman

of the event.

"Friends Unlimited" provides the Big Brother and Big Sister program to youths from five to fifteen years old in Latah County.

23 teams representing 14 living groups are participating and we hope to bring in at least \$300 for "Friends Unlimited," said Bixby.

Big Sky Roundup

The week was all wrong but Idaho won

By SCOTT TUDEHOPE

Not everything went wrong last week. Bing Crosby died, the Dodgers lost the Series, hijacking's back in style. But Idaho won a football game. Winning 31-20 over Montana, Idaho boosted its record 1-4 overall, and 1-2 in Big Sky action in a Homecoming game seen here Saturday.

Vandal halfback Robert Taylor electrified the crowd all afternoon and ended up with Big Sky honors, the first given to an Idaho player this season. He ended up with 123 yards in 13 carries to earn 9.5 per carry, putting him fifth in line for Big Sky leading rushers.

Rick Linehan nabbed a number of key interceptions Saturday to seal the Grizzlie's fate. He's now second in total interceptions in the conference. Idaho travels to Bozeman to

game shouldn't hurt that effort at all. . . MSU to win, 35-14.

Montana State obliterated host Idaho State Saturday, 31-0. What's even worse is that a MSU reserve tailback scored twice on the Bengals.

Scott Hoard was given an honorable mention in the conference player of the week selection as he punched the ball in on short runs of four and six yards in the second and third quarters.

Should Idaho win next weekend, MSU would drop third to possibly fifth in the standings, while fifth place Idaho could go as high as third, depending on how ISU does.

As mentioned, Idaho State lost a humiliating game to MSU, and was allowed a mere 163 yards total offense. The closest the hosts got to the opponent's goal was at the

Gene Carlson's fightin' mad Grizzlies. ISU is 1-2 in conference play, and 2-4 overall.

Speaking of Montana, after Saturday's loss to the Vandals, it's a kind of "what do we do next?" sort of situation. With four losses in the Sky and 1-5 on the season, all Montana can hope for is a respectable finish - possibly fifth - in the conference. A win over ISU would sure help. Once again, Montana to win.

Nevada Las Vegas, a team that Idaho will meet at home November 5, handed struggling Weber State their fourth loss, 26-13. What more can I say?

Saturday the Weber Wildcats will host Minnesota's Bemidji State. Let's hope the jet lag works to Weber's advantage:

Wildcats to win in this non-conference game.

I save the big ones for the last. Boise State lost. Repeat, BSU lost to UN-Reno, 28-10, dropping the conference contender to a 4-2 record.

Favored BSU simply couldn't defend against the pass, which could be a key in future matches against the Broncos. Reno's QB Jeff Tisdell sailed the pigskin an amazing 314 yards in the air for three touchdowns for the upset.

It was only in the fourth quarter against Reno's reserves that the visiting Broncos could get the ball into the endzone. And even then it wasn't the usual Hoskin Hogan passing that did it. But as the old saying goes "A sad day for BSU is a

glad one for Idaho."

Northern Arizona showed the world its best side Saturday when it defeated non-conference foe Cal-Fullerton 24-9 in a designated game at Flagstaff. It was the first time a Big Sky club had ever beaten a "designated" team.

Should NAU win, with its 4-0 conference lead, it will at least tie for the conference title.

They want it badly. They want it so badly they're willing to forget that Boise has never lost a home game. I'm sticking my neck out, that's for sure, but I pick NAU to win a squeaker, in what could be the tightest, brightest game the conference has seen this season. Fans and scalpers should get their money's worth: NAU to win.

Big Sky Games

face Montana State this Saturday in another conference tilt. MSU is still in contention for the championship and this

MSU 16.

This week ISU travels to Montana where they'll get beaten into the turf by coach

Annual Turkey Trot's here

The annual intramural turkey trot, a cross-country run, is scheduled for 9 a.m., Oct. 22 at the University of Idaho golf course. Sign-up is at 8 a.m.

"It's almost a joke," said Bob Whitehead of intramurals. "Some of the fraternities almost require pledges to do it, so you'll find 40 or 50 people from one living group." Whitehead added that 200 to 250 runners usually participate in the turkey trot.

The course covers approximately two miles around the golf course, down Greek row and finishes up at the Ad building, Whitehead said. Time limit for the race is 30 minutes.

Only men can score intramural points in the turkey trot, but women are invited.

ERA approval explored

(ZNS) *Newsweek* magazine reports that White House legal staff experts are exploring ways to extend the seven year time limit for ratification of the ERA.

Newsweek says that the likeliest way to extend the deadline is by a joint or concurrent resolution of congress.

Anyone who is on any varsity squad is not eligible to participate.

Prizes are first place, a turkey; second place, a chicken; third place, a Cornish game hen and last place, a hard-boiled egg.

Vandals face MSU in Big Sky football

Following last weekend's win 31-20 over the University of Montana, Idaho will travel to Bozeman to meet Montana State University, Saturday at 1:30 p.m.

The Vandals will face a team that was Division II national champion last year and is currently 5-1 on the season. Last weekend the Bobcats destroyed Idaho State 31-0. Montana's only loss of the year was 26-0 to Boise State at a time when the Montana squad was fairly riddled with injuries.

Idaho head coach, Ed Troxel, knows that Montana won't be easy to beat.

"They are a ground-oriented football team and we have to force them to pass," Troxel said. Montana, according to the statistics, doesn't like to go to the air, as the Bobcats are ranked sixth out of seven teams in Big Sky total pass offense.

Again momentum appears to be the key to any type of Vandal success Saturday.

Montana has averaged 315.3 yards total offense per game (a 251.3 rushing average and 64 passing.) Defensively, they have allowed only an average of 189.3 yards rushing and 139.5 in passing.

Idaho has a total offensive average of 365.4, 126.8 in the passing department and 1193 total yards rushing. The Vandals have allowed an average of 288 yards, and 129 in pass defense.

The Vandals are 1-4 on the season and 1-2 in conference play.

"I think Idaho is a scary football team," said Montana's head football coach Sonny Holland. "They have had some problems but they move the ball well offensively and have some big men on defense."

Argonaut/Rick Steiner

The sunlight fades in the west and an Idaho women's cross country runner sprints for the finish line. Idaho lost their first meet to Washington State last Wednesday 40-19. This weekend the women harriers travel to Cheney to compete in the Eastern Washington Invitational.

Women lose first dual

Washington State University's women's cross-country team defeated the University of Idaho team, 40 to 19, in a dual meet Wednesday in Moscow.

Bonnie Bukowski, who placed fourth, was top finisher for U of I. Gloria Sherfey, Kelly Redman and Kathy Redman, all of WSU, finished first, second and third.

Women's cross country is offered on an experimental basis this year, according to JoDean Moore, head track and field coach.

"If there is enough interest, it may be offered on a regular basis," she added. Norm Snodgrass, a graduate student

in men's physical education, is actually in charge of training the team.

In addition to Bukowski, who is an exchange student from the University of Massachusetts, the team includes Cindy Partridge, Molly Ahlgren, Sue Hatch and Jeanna Nuxoll.

Partridge ran for the Moscow High School track team last year, and Sue Hatch was a member of last year's U of I track team.

Snodgrass said Wednesday's meet was "the first real experience for the team this year."

This weekend the team travels to Cheney, Wash., for the Eastern Washington Invitational. Snodgrass said it will be a "relatively big meet," and that possibly some of the Spokane community colleges and University of Montana will send teams.

The team will also compete in the Northwest College Women's Sports Association Regionals at Whitworth Nov. 5.

Netters head south for meet

Idaho's women's volleyball team will travel to Nampa, Oct. 22 to compete with four other schools in the Northwest Nazarene College Invitational Volleyball Tournament.

Earlier in the season, the women beat three out of the four schools they will face in Nampa. Host NNC, Boise State University and College of Idaho fell to the Vandal volleyballers. The fourth tournament contender, Central Washington University, beat Idaho last weekend 15-5, and 15-5.

"We are going to work on a new defense this week," said Amanda Burk, women's head volleyball coach. "This will give us a multiple defense which will help us against several types of offense."

"Our offense is going to have to regroup and eliminate mistakes," Burk continued. "In some cases we have beaten ourselves. But I feel that if things fall together we will be one of the contenders in our region."

U of I women lost five matches at the Central Washington Invitational last weekend, Oct. 14 and 15.

Idaho fell to Eastern Oregon State 15-0 and 15-7; Simon Fraser 15-13 and 17-15;

CWU 15-5 and 15-5; Pacific Lutheran 15-6, 9-15 and 15-8; and Seattle University 15-10 and 15-6.

The Junior varsity had a winning season assured when they ran their season record to 7-1 by defeating Yakima Valley Community College 15-13, 13-15, 15-12 and 15-3 in a best three-of-five, Oct. 14.

The jayvee women under coach Gordon Ingles will see action Oct. 25 when they meet the North Idaho College Jayvee women at Coeur d'Alene.

Soccer goes 3-0

Idaho soccer won again Sunday as the men's team downed conference foe Whitman College 2-1 Sunday at Walla Walla, Wash.

Larry Houston was credited with both unassisted goals. His second goal was scored with only 15 minutes to go in the second half.

Whitman falls to 5-3-1, while Idaho leads the conference with a 3-0 record. Second in the conference is WSU, at 3-0-1, a team which Idaho will face later this season.

Annual Lewiston-Moscow run completed in record time

By BETH GOFF

Once again camel-bronc riding has paid off and man has triumphed over the elements.

"Snortin' Norton," alias "The Ab," alias Alan Walker, completed his annual Lewiston-Moscow run in fine time Saturday, exceeding even his projected goal. Walker ran the 40-mile distance in six and a half hours, beating his goal by an hour, and cutting last year's time by three hours and 10 minutes.

At the end of the course Walker ran through a toilet paper finish line stretched across the street in front of Old Forney Hall, where the AKL fraternity is housed. A crowd of spectators had gathered to await his arrival. "Was it worth it?" one of them asked. "Yeah," he said, "but I just hurt all over."

Walker's time in completing the run amazed everyone, including himself. "It was much more successful than I could have hoped for. I'm pretty happy about being able to make it in such good time," he said. Coach Jeanna Nuxoll remarked that she was "exceptionally pleased" with Walker's performance.

At 4 a.m. Walker rose and began psyching himself up for the ordeal ahead of him. "I listened to Rocky four times," he said. Al Brockett drove Walker, as well as Nuxoll and Public Relations Manager Beth Goff, to the starting point, where Walker did some warming up exercises.

At five minutes till six, Walker jogged briskly up the street. Brockett, Nuxoll and Goff drove to the base of Lewiston hill to wait for Walker and to take some pictures.

"The sun wasn't even up yet, so we sacked out for awhile," Goff said. "We woke up about 25 minutes later and started to look for him. After half an hour he still hadn't shown up, so we drove all the way back to the starting point, thinking maybe something had gone wrong."

"We didn't find him. Then we

drove as far as the first scenic overview point on the hill, and tried to spot him from there. After another twenty minutes there was still no sign of him, so we started back to Moscow."

"About a mile and a half past the top of the hill we found him running along at full speed. We couldn't believe it. He gave us the thumbs up sign as we drove past and shouted 'I'm a half-hour ahead of schedule!'"

Walker later said that the weather had been perfect, in spite of a gusty wind that blew against him.

He also noted that the coaches worked out well. "They turned out to be strategically located. I didn't use all the food or any of the first aid gear, but I drank all the water and apple juice."

He ran about two-thirds of the

way, Walker said, keeping an average pace of about six miles per hour.

Walker added that his psychological training had paid off. "I knew I'd feel like quitting, so I was prepared. I just kept telling myself I had to keep going."

"I divided the whole thing up into small, realistic goals," he said, "like the top of the hill, and after that, the next mile marker. You just hang on that way."

Already looking forward to next year's run, Walker says he'd like to get some pledges and earn money for a local charity, probably the Boy Scouts. He said he is thinking about trying some new techniques next year, for instance, a special diet.

Walker summed up the event with a few last words. "I feel like a cleaned out carburetor."

Alan Walker triumphant after his record-breaking sprint from Lewiston to Moscow. He completed the run in 6½ hours, beating his own hope by one hour and topping the record by over three hours.

Students recon dam site with federal funds

The U of I Board of Regents recently approved a grant of \$55,684 from the U.S. Army Corps of Engineers to the Department of Sociology and Anthropology to study the archaeological resources within the dam reservoir area at Libby, Montana.

The Laboratory of Anthropology is conducting an archaeological survey on the Kootenai River near Libby. The project is located where the Seattle District of the Army Corps of Engineers is planning to construct a deregulating dam and powerhouse in the summer of 1978, downstream from the existing Libby Dam.

The project was brought to the attention of the regents because \$22,519 of the \$55,684 grant is to pay the university for indirect costs.

Acceptance of the grant commits the university to provide about 486 cubic feet of storage space for material recovered during the project until proper disposition can be made of such material, an indeterminate period of time.

According to Dr. David G. Rice, U of I associate professor of anthropology, the project will identify all exposed prehistoric and historic sites in the proposed construction area, determine their significance and develop a management plan for their salvage and/or preservation.

"An archaeological reconnaissance conducted in 1975 revealed 35 prehistoric sites within the project area," Rice said, adding it is expected that current work will disclose many new finds.

Booklet reveals unlikely firms manufacture war materials

(ZNS) If you've ever wondered who makes all the weapons that the U.S. sells abroad, a Philadelphia research group may have a few answers for you.

Narmic, a research arm of the American Friends Service Committee, has published a handy little pocket guide called *A Directory of Munitions Makers*. The booklet lists more than 1000 weapons manufacturers by state, and gives their headquarters' address, subsidiaries, officers, parent or holding companies, and the kinds of war materials they produce.

For instance, the Xerox corporation, the company which helps us reproduce memos, also makes night

viewers which were used in Vietnam, and Laser weapons. The Bulova Watch Company uses its well-known timing and precision expertise to make fuses and ammunition manufacturing machines; the Continental Can Company not only distributes six-packs and T.V. dinners, but it makes ammunition boxes as well.

Other weapons companies, Narmic says, are such unlikely names as the National Cash Register Company, Magnovox, Corning Glass Works, Eastman Kodak and the Revere Copper and Brass Company.

The directory of munitions makers is available through Narmic's offices in Philadelphia.

Business will interview students in November

Students planning to sign up for employment interviews in November may do so beginning 8 a.m. Oct. 24, according to Career Planning and Placement Center.

Students are eligible to interview for permanent employment the last two semesters before finishing a degree and must be registered in the Career Planning and Placement Center before signing for interviews.

Candidates may sign for a summer group meeting at the same time for companies having summer group meetings in November.

The various companies interested in hiring U of I graduates are listed below.

PLACEMENT INTERVIEWS - NOVEMBER 1977

Nov. 1 Tues.

PACIFIC NORTHWEST BELL - BS-MS Engineering, Mathematics, or Computer Science for Programming Analyst and Applied Engineering (not research and development). BS-MBA in Business, Economics, Finance and related degrees for candidates with sales experience for sales positions in the marketing department. BS-MS in any subject with at least 2 or more yrs of study in a science curriculum for Developing Managers Program. The Program is specifically designed for persons who seek a supervisory career in the technical operations of the Company. U. S. citizen or permanent visa.

WEYERHAEUSER COMPANY - BS-MS Chemical, Mechanical, Electrical Engineering. Process, Project and Design Engineers. Nationwide. Juniors in Forestry and Chemical Engineering for summer intern programs nationwide. U. S. citizen or perm. visa.

MCFARLAND AND ALTON CPA'S - BS Accounting. Location in Spokane, Washington for Public Accounting firm. U. S. citizen. Nov. 14 Mon.

OSCO DRUG, INC. - BS Business Admn., Management, Marketing, Retailing or Liberal Arts majors with definite interest in and/or past retail exper. Dec. grads only. Entry level management trainee for Eastern, Midwest and Western U. S. U. S. cit. or permanent visa. Nov. 15 Tues.

BURROUGHS CORP. - BS-MS Marketing, Accounting, Computer Science or any combination thereof. Dec. graduates or alumni. Locations in Northwest (E. Oregon to N. Idaho). Minimal overnight travel during training period. U. S. citizen.

BELL LABORATORIES - BS-MS Electrical Engineering with

interests in software design, systems design. Also those interested in computer science or students with pure computer science background and those interested in operations research area. BS level will be expected to enroll in graduate study program. U. S. citizen or permanent visa.

IDAHO FIRST NATIONAL BANK - BS-MBA Business, Finance, Economics or Accounting. Positions throughout the State of Idaho. U. S. citizen. Nov. 16 Wed.

TIMBERLINE SYSTEMS - BS-MS Computer Science or Math. Position is for Programmer-Analyst. Other degrees with strong math or computer background. U. S. citizen. Nov. 16 Wed.

UOP PROCESS DIVISION - BS-MS Chemical Engr. Location is McCook and Des Plaines, Illinois with world-wide travel during technical service.

Career Training Program - 18 month at Development Center in McCook, IL., most frequently followed by approx. 2 yrs. tech service with world-wide travel in startup of petroleum and petrochemical operations. Program leads to advanced assignments in design, development, marketing, technical service and other engineering and management functions. U. S. citizen or permanent visa. Nov. 17 Thurs.

UNITED STATES MARINE CORPS - Officer Selection Office will be at table in SUB.

THE BON MARCHE - BS-MBA Business or Fashion Merchandising. Executive trainee in Washington, Oregon, or Idaho. U. S. citizen or permanent visa.

L. D. SCHREIBER CHEESE CO., INC. - BS-MBA Business, BS-MS Engineering and BS-MS Food Science. U. S. citizen. Nov. 17 Thurs.

E. I. DUPONT DENEMOURS & CO. - BS-MS Chemical or Mechanical Engr. DuPont locations throughout the U. S., especially Gulf Coast, Midwest, Southeast and Midatlantic. U. S. citizen or permanent visa.

METROPOLITAN LIFE INSURANCE CO. - All degrees in College of Business with strong interest in sales and sales management.

BATTELLE-NORTHWEST - BS-MS Chemical, Mechanical, Metallurgical (materials), and Electrical Engr. MS Civil Engr. (Environmental emphasis). MS Chemistry. Science and Engr. Program positions in Richland, WA. U. S. citizen. Nov. 18 Fri.

NORTHWESTERN MUTUAL LIFE INSURANCE CO. - All majors, preferably Education, Business, Economics or Pre-Law or Law students. Openings for college intern program that can be full-time or part-time work.

Nov. 28 Mon.

CENEX - BS Agr. Business, Agr. Economics or Business Administration with interest in retail business. Farm background helpful. Locations throughout CENEX 15 state trade area from Wisconsin to the Pacific Coast. Position is Management trainee. U. S. citizen or permanent visa.

TEKTRONIX, INC. - BS-MS-PhD Electrical Engr. BS-MS Computer Science. BS-MS-PhD Chemistry or Physics (Material Sciences). BS-MS Mechanical Engr. Juniors, Seniors or Grad Students in Electrical Engr or Computer Science may sign for summer positions. All positions are located in Beaverton, U. S. citizen or permanent visa. Nov. 7 Mon.

MCDONNELL DOUGLAS CORP. - BS-MS in Electrical, Civil, Mechanical or Chemical Engineering. BS Computer Science, Bus. Administration (Computer Science or Data Processing), Math (Computer Science), Operations Research-Computer Science. Positions are for software applications. U. S. citizen or permanent visa. Positions and locations information is in Placement Center Office. This must be read before signing for interviews. Nov. 7-8 Mon-Tues.

STANDARD OIL CO. OF CALIFORNIA AND CHEVRON COMPANIES - BS-MS Chemical, Civil, Mechanical and Electrical Engineering. Positions in Engineering, Research, Manufacturing, and Production. ChE, ME, and EE Co-op students who have completed their freshman yr. may sign. Position and location information at Placement Center. Please read before signing for interviews. U. S. citizen or perm. visa. Nov. 8 Tues.

GENERAL ELECTRIC CORP. - BS-MS Chemical, Mechanical or Metallurgical Engr. and MS Nuclear Engr. Engineering program for subsequent career placement in development or design engineering within the Nuclear Energy Division. Location is San Jose, California. U. S. citizen or permanent visa. Nov. 9 Wed.

REYNOLDS METALS CO. - BS-MS Chemical, Electrical (Power Option), Mechanical and Metallurgical Engr. ChE, ME and EE positions in Longview, WA. Met. Engr. subject to relocation. U. S. citizen or permanent visa.

PUREGRO CO. - BS Entomology, Agronomy, Plant Pathology, Soil Science, Agr. Business with Plant or Soil Science background or any Agr. degree with Plant or Soil Science background. Dec. grads preferred but May grads may sign. U. S. citizen. Location of work will be in Idaho or Washington. Working

in local unit in agr. chemical sales.

Nov. 11 Fri.

DEUTSCH CO. - BS Mechanical or Electrical (Computer Science or Power Options) Engineering. Positions in Banning, California or Oceanside, California. Job descriptions in Placement Center. Please read before signing for interview. U. S. citizen or permanent visa. Nov. 9 Wed.

FIRST SECURITY BANK OF IDAHO - All degrees and all majors interested in commercial banking within the State of Idaho. Management Training Program with assignment to First Security branch within the State of Idaho upon completing of 1 yr. training. U. S. citizen.

K-MART APPAREL - Dec. graduates in Business or other fields. Management Trainee positions. Formal training program leading to positions in store management, merchandising or buying in the challenging field of fashion merchandising. Must be able

to relocate within the Western United States. Transcript must be brought to interview. U. S. citizen or permanent visa.

Nov. 10 Thurs.

CONNECTICUT MUTUAL LIFE INSURANCE CO. - Business majors preferred. All degrees acceptable. SALES MANAGEMENT TRAINING PROGRAM. Location primarily in Spokane and Inland Empire-Eastern Washington and Northern Idaho. U. S. citizen.

CHICAGO BRIDGE & IRON CO. - BS-MS Mechanical or Civil Engr. Dec. graduates only. Training program for engineering construction and sales. U. S. citizen or permanent visa.

Coed excels in orienteering

A Fairfield woman has achieved a first in the history of orienteering at the U of I.

Marcia Wells is the first female student here to pass the two-day map and compass course on the first trial. She said other women have passed it, but not on their first attempt. The test is part of a search and rescue class in recreation, Wells' field of study.

Her instructor, St. Maj. Gene Neff, U of I Department of Military Science, said she and her partner, Doug Flansburg, Palouse, Wash., not only passed the course during a recent trial, but finished relatively early compared to others in the class.

"They finished about noon on Sunday," he said. Students were given from 7:30 a.m. Saturday through 3 p.m. on Sunday to complete the test.

The test course was set up at Laird Park, a state park about 30 miles northeast of Moscow. Wells said that area was chosen because it offers space to set up a fairly long course in a wooded area. Students participating in the test camped out overnight in order to use as much daylight time as possible to complete the test.

Wells said she had not had

any experience with map and compass work before she began taking orienteering courses. She said this test was preceded with an orienteering level one exam which was laid out in around the Shattuck Arboretum on campus.

Neff said the search and

rescue class is new this fall. "We have around 45 students," he said, "and I expect to see more as time goes on."

He said a full scale practice search is planned for the end of October, also at Laird Park, to give the students a chance to practice the skills they have been learning.

Are you in shape? stress tests available

If you've ever had an urge to physically test yourself, to see if you're really in shape compared to those around you, now you can.

There's a way to find out, and it's free. U of I's "Human Performance Lab," located in the Women's Health Education Building, room 112, provides a series of stress tests for students, faculty and staff that takes less than an hour, according to Director Roger Norris.

Norris, who's been with the Lab since last year, said it includes tests such as treadmills, blood counts, lung tests, body fat content and cardiograms - all administered while a person is under physical stress.

What about that old standby for physical misfits, the sauna?

"That's something we definitely don't recommend," said Norris. "Especially for people with heart problems, if it makes you feel good, that's nice, but there're a lot of better things that make you feel good."

Like swimming and jogging, two exercises that Norris praised. He said that after the tests, a person is fitted with a program "that fits his style." He added that if a person likes a particular sport, that's what he'll try to key on.

"We feel that there are different levels of programs for different folks," he said. "The whole point is to get your heart rate at 150 beats per minute. The more out of shape you are, generally the higher it is under stress."

"We've got all the stuff down here in the Lab, all we ask is that people come on down."

Hours are arranged, and Norris can be reached by calling 885-7263 or by dropping by WHEB 112.

Kleinsasser scheduled to give life space lecture series

"Experiential Considerations and Life Space" is the topic a U of I Department of Art and Architecture lecture speaker will discuss at 3:30 p.m. Tuesday, Oct. 25.

William Kleinsasser, University of Oregon professor of architecture, will give the talk in room 112 of the Physical Science Building.

At 8 p.m. that day, he will discuss Henry Mercer and his unusual home, Fonhill.

Kleinsasser's final presentation will be a workshop on life space analysis, a technique for assessing the experiential qualities of a site, at 11 a.m. in room 6 of the Home

Marcia Wells shoulders her pack during the two-day orienteering course. She took top honors as the first woman here ever to complete the course in one try.

Man becomes extinct?

"Endangered Species — Homo Sapiens, Energy and Minerals" is the topic selected for this year's Almquist Lecture scheduled for 8 p.m. Tuesday, Oct. 25 at the U of I.

Dr. Donald A. Dahlstrom, vice president for research and development with the Envirotech Corp. of Salt Lake City, Utah, will deliver the talk, which will be in room 112 of the Physical Science Building.

The lecture is sponsored by the Idaho Student Chapter of the American Institute of Chemical Engineers and the American Chemical Society student affiliate.

Dr. Dahlstrom will discuss the threat to the lifestyle and environment of man created by an insufficient supply of energy and minerals critical to his modern existence. He says various species of mammals, birds, fish and plants have become extinct because of changes in the environment and suggest that man should give a thought now to future needs.

The Almquist Lectures are given annually in honor of Dr. J. Arthur Almquist, a U of I chemical engineering graduate in 1919 who was long associated with the duPont Co.

Living organisms can be patented

(ZNS) A federal customs court, in a landmark decision, has ruled that private companies have the legal right to patent new forms of life they create in the laboratory.

By a three to two vote, the U.S. court of customs and patent appeals ruled that the Upjohn Company, a pharmaceutical firm, may patent a new micro-organism it has developed for use in the production of medicines.

The ruling is expected to be cited by companies involved in controversial "recombinant D.N.A. research." That research enables scientists to change living cells around, producing entirely new forms of plant and animal life.

"Name That Gameroom" CONTEST

Contest Rules

The Student Union Gameroom is one of the many services provided for the university community in the Student Union Building (SUB). It features bowling alleys, pool and billiard tables and a variety of pinball and coin-operated machines in the "fun center" area. A new sign and possible decor of the area is currently being planned and it is the Student Union Boards' wish to offer a contest for the naming of the gameroom.

1 On an entry blank printed in the Argonaut or on a three by five card print your name and address and phone number. Also print on it the name that you are submitting for the "Name That Gameroom Contest." You may enter as many times as you like.

2 All entries must be received in the box at the Student Union Building Information Desk no later than November 1st, 1977. All entries will be judged for the best expression of what the Student Union gameroom means to the University of Idaho.

3 Judging will be done by the Student Union Board members.

4 This contest is open to all faculty, staff, students, and interested parties.

5 The prize for this contest shall be three hours of free entertainment (bowling, pool and billiards) for the winner and his friends or living group, at a negotiated date before the close of the 1977-1978 academic year.

Events

TODAY

...WOW! The Palouse Pow Wow, a weekend of Bible-teaching and fellowship sponsored by the UI-WSU Baptist Student Ministries, will be held at Camp Sanders, Oct. 21-23. The theme is "Sharing Your Life" and the speaker will be Jim Wilson, who has been involved in bookstore ministries for 19 years. Registration is at 6:30 p.m. this evening and sessions start at 7:30 p.m. Pre-registration fee is \$10. For more info contact Bob Lowe at 882-6090 or Kim Kirkland at 882-0262.

..."Sacco and Vanzetti" is a film which recounts the trial and subsequent execution of two innocently-accused Boston anarchists in the 1920's. Edna St. Vincent Millay has written poetry and prose surrounding the incident. Questions of politics and justice raised by the incident are still poignant today. An excellent choice for a FREE Friday night's entertainment. To be shown at 7:30 p.m. at City Hall in the City Council chambers as part of Moscow-Latah County Library "Free Friday Flick" series.

...The exciting and talented Bibb family will be singing at the First Pentecostal Tabernacle (8th and Jefferson) at 7:30 p.m. Everyone welcome.

TOMORROW

...Kappa Sigma frat is sponsoring a Bowling tournament, Saturday at 9 a.m. in SUB. Proceeds of the event go to the Latah County "Friends Unlimited" program which runs the Big Brother and Big Sister program. For more info call Steiner or Stu Bixby at 882-9109.

...Palouse Area Rabbit Breeders Assoc. sponsors Mr. Gibb Johnson lecturing on rabbit breed standards in room 301 of the life sciences bldg. at 7:30 p.m.

...Intramural Turkey Trot on the U of I golf course beginning at 8 a.m. See related article.

MONDAY...U of I Search and Rescue is meeting in the SUB at 7 p.m. to discuss plans for upcoming practice search and to view a movie about earthquakes starring Charlton Heston.

...Campus Democrats is meeting 7 p.m. in Blue dining room of SUB.

TUESDAY

...Pullman Film Society is screening "French Can Can" (1954 France)-Jean Renoir's joyous, lyrical exaltation of life as art with Moulin Rouge as his stage and his universe. With Jean Gabin, Françoise Arnoul.

...The Center for Business Development and Research is sponsoring a seminar entitled "Small Claims Court for the Small Businessman" which will teach registrants the procedures for small claims suits. Participants must pay \$10 registration fee. It will be held at the Grain Grower's Auditorium, 317 W 6th St. from 7-10 p.m.

...Min-Met seminar at noon in UCC-113 with J. Fred Williams of the USBM will talk about nickel-cobalt and other laterites in Oregon.

...Outdoor Program is having, at 7 p.m. in SUB, outdoor photographic techniques and equipment discussion at session No. 8 of the Basic Outdoor Course. Topics include types of photographic equipment, care of equip, outdoor action photography, nature photography, and developing slide shows and presentations. Admission free.

...BRAIN Organization of Idaho will sponsor a movie "The Realm of the Galaxies" and will discuss techniques currently used to make contact with more advanced cosmic intelligences, via whole brain power, Tuesday, Oct. 25, at 7:30 p.m. in the Chief's room, Sub. Public invited.

..."Experimental Considerations and Life Science" is the topic to be discussed by William Kleinsasser, U of Oregon prof of architecture-guest lecturer, in room 112 at 3:30 p.m. in the Physical Science bldg. Another discussion about Henry Mercer, an early 20th-C poet, archaeologist, architect and ceramicist, will follow at 8 p.m.

...The La Galliade Baroque Trio will give a guest concert at 8:15 p.m. at the U of I Music bldg Recital Hall.

THURSDAY

...John W. Helton will perform compositions and transcriptions in recital at 8 p.m. in the Recital Hall.

...The Sierra Club local chapter will sponsor a movie and a speaker, at noon in SUB in a room to be announced. Movie: "Alaska - Land in the Balance" will be shown at noon and at 7:30 p.m., Ron Mastrogiuseppe will speak in Cataldo room about "California Redwoods: An Overview."

...Women in Communications (WIC) is sponsoring a program called Career Focus: Broadcast, at 7 p.m. in SUB Appaloosa room. Six speakers will cover the rewards, daily experiences, and qualifications needed for careers in radio and TV broadcasting.

...The Writing Proficiency Test for transfer students will take place at 7 p.m. in the Ag. Sci. bldg. Auditorium. Beginning Monday, Oct. 24, undergraduate transfer students (Fall 1975 or later) may sign up for the test and pick up essay topics in the English Dept Office, FOC 200.

UPCOMING AND ONGOING

...The Wildlife Society is sponsoring a SHOOT-OFF Oct. 29. Details will be posted. Events will begin at 10 a.m. and run thru 5 p.m. It will be held at the Dutch Boy Dairy on the Troy Highway and signs will be posted to indicate the direction along the Troy Hwy.

...YWCA of WSU is sponsoring its 13th annual INTERNATIONAL GIFT FAIR on Friday, Dec. 2nd and Sat., Dec. 3 from 9 a.m. to 9 p.m. in the Compton Union Junior Ballroom. All types of hand-crafted items: pottery, jewelry, candles, crocheted and knitted articles, art, weaving, toys, pillows, soap, leather goods, etc. are being solicited. If you're interested in having your crafts sold contact the YWCA office between 8 and 5, Mon thru Fri, CUB B-19, phone 335-3916. All articles will be sold on a commission basis.

...Moscow Duplicate Bridge Club meets every Monday at 7 p.m. in the SUB. New players welcome.

A new trick for longevity

(ZNS) India's 81-year-old Prime Minister Morarji Desai, who is amazingly vigorous and active for his age, says there's a secret behind his good health.

The elder statesman credits a great part of his strength to the fact that he regularly drinks his own urine.

Desai startled a meeting of India's tuberculosis association earlier this month by claiming that "self-urine" therapy is a cure for both cancer and cataracts.

The Indian prime minister is quoted by *Time* magazine as stating, "for the past five or six years, I have drunk a glass of my own urine, about six to eight ounces, every morning. It is very good for you," he added, "and it is even free." He says that the *Bible* urges Christians to drink their own "cistern." Cistern, Desai claims, is just another word for urine.

Police discover lasagna caper

(ZNS) It's what you could call a mighty cheesy caper.

Detectives in Long Island say they have located over \$17,000 in \$50 bills that had been buried in a container of frozen lasagna.

Police report they went to the home of Richard Lynch, the brother-in-law of two men arrested last month for allegedly stealing money from an old warehouse trunk. After turning the house and lawn upside down searching for the money, one of the detectives wandered into the garage, opened a freezer and found a pot of green lasagna.

In this case, however, the lasagna was not of the spinach variety. The frozen dish contained four brown envelopes, among layers of pasta, meat and cheese, each containing 86 \$50 bills, or \$17,200 in all.

Police say the money was part of about \$5 million in cash that was stolen from the old

idea how long the ricotta-flavored money had been in the freezer.
