Argonaut

Senate's resolution would support station

Choices for the manager and licensed consulting engineer of KUOI-FM would be approved by the appropriate student board, according to a senate resolution submitted by senator Rob Mitchell.

The resolution provides that the student board would consult with the liaison officer.

After the student board approved or disapproved the choices, it would then present an explanation of its decision to the state coordinator and the state board for final approval.

Senate will consider Mitchell's resolution in its regular meeting Wednesday at 7 p.m. in the Chief's room.

Senate will consider a recommendation from the Golf Course Board regarding transfer of responsibility for the golf course to the Board of Regents. ASUI President Bob Harding is the bill's sponsor.

A bill to provide for the trade-in of the present ASUI car and the purchase of a new car will be considered. Funds for buying a new car would come from the repair and replacement reserve.

Senator Dave Lockhart is sponsor of a bill which would allow the Communications Board, rather than the editor, to appoint the *Argonaut* business manager. Lockhart is also sponsor of a bill which would include Photo Bureau and the Production and Graphics Arts departments in the Communication Department.

Senate will also consider two bills dealing with the Judicial Council and will consider establishing the salaries for the Photography Department.

Faculty eyes committees

Faculty Council will consider changes in two standing committees at its 3:10 p.m. meeting today in the Faculty Lounge.

The Faculty Council will be asked to approve elimination of the Student Services Committee. The committee's function would instead be served on an ad hoc basis.

The Student Services Committee is supposed to recommend policies about structure, performance and function of student services; represent student interests - if questions or complaints arise about the operation of student services; and maintain liaison with other student-related committees.

Changes in the structure of Juntura are also proposed. The committee would include nine voting members, including five faculty or staff members and four students.

Each minority student organization would nominate someone to fill the remaining vacancy.

In addition, the three minority student advisors would be ex-officio members without vote.

Liaison members, also without vote, would be appointed to act as sources of information for the committee.

The council also plans to consider a proposed policy on faculty personnel file.

Fellowship money given

Students and institutions will be given \$3.2 million in grants and fellowship awards for the 1978-79 academic year under a new Graduate and Professional Opportunities program of the Department of Health, Education and Welfare (HEW).

Of this amount, \$500,000 will fund 20-30 colleges and universities to strengthen their graduate or professional training programs. Money may be used for recruiting students, financing special

orientation programs and paying for counseling and other support services.

The remainder of the money will be awarded to minorities and women studying in career areas the HEW considers "important to the national interest."

No students or graduate programs at the U of I have applied for the money yet, but Nancy Weller, grant support service assistant, expects some to compete for the grants and fellowships.

Ann Wilson, lead singer for Heart, wails out original lyrics during last Friday's concert under the dome. Opening act for the concert was the Jay Ferguson band. More

than 6,000 people attended this concert, the first major concert in more than a year. Photo by Rick Steiner.

Alford defends Regents

The President of the State Board of Education said Friday that "the Board is not after censorship of the student radio station."

A.L. Alford Jr., Lewiston, appeared Friday on KUOI-FM's weekly program "Media Analysis" and defended the Regents saying that if it ever turned into censorship "we would change that," although he did not say how.

Alford said also, "now is not the time for overreaction."

Alford summed up the situation in saying that the stick-ler is not only the Regents, but also the Public Broadcasting Committee and the Federal Communications Commission. The stick-lee, according to Alford, is KUOI.

The State Board's President said he does not see any problems with supervision as long as it does not become censorship. He suggested the

station try the new system to see what happens.

Alford noted that students here are "properly concerned" with the situation at the radio station. He said that student concern is the number-one safeguard against abuse of supervision, and that the Regents' open-door policy is another.

Alford claimed that the Regents are being fair in the

matter and that "wolf is being cried a little bit."

The Regent said the *Argonaut* is not currently under consideration for a faculty advisor. "The problem with having a more independent newspaper is that you must first have a more independent Communications Board. This is something that all the schools in the state need," he said.

Library open over vacation

The University library has announced hours for spring vacation.

The library will be open Friday, March 17, from 8 a.m. to 5 p.m., but will close both Saturday and Sunday, March 18 and 19. The following Monday through Thursday,

March 20-23, the library will be open from 8 a.m. to 5 p.m. and from 7 to 10 p.m. Hours for Friday, March 24, are 8 a.m. to 5 p.m.

The library will also be closed Saturday, March 25, but will resume regular hours Sunday, March 26.

Earthquakes will be predicted

Successful earthquake prediction may be possible within a decade, and when it comes, the American public will learn to use the predictions without panic, a California Institute of Technology geologist said here in an interview Thursday.

Dr. Clarence Allen, at U of I for two days as Phi Beta Kappa visiting scholar, said hurricane prediction is now a reality and people have learned to react calmly to predictions.

"You wouldn't want to make an earthquake prediction lightly, but on the other hand the work shouldn't be done in secret. We must work in the public eye, and make sure a credibility gap does not develop between scientists and the media," the earthquake expert said.

Four techniques look

especially promising as prediction tools. These include:

—Measurement of ground tilt which is known to occur before earthquakes.

—Geodetic surveys to see how the land is being deformed.

—Measurements of radon, a radioactive gas found in ground water supplies, which has been found to increase in concentration before quakes.

—Study of seismic patterns, including patterns of small quakes preceding large ones.

Allen, who was vice chairman of the American Seismological Delegation which visited the People's Republic of China in 1974, says the Chinese are using many of these techniques, but their prediction successes result from the vast number of people monitoring signs of coming quakes.

New water treatment plan

A U of I chemical engineering professor has invented and patented a new method to treat waste water for pollution control.

Based on two already-existing processes—bacterial breakdown of organic materials and separation of solids from liquids through flotation—Dr. Melbourne Jackson's continuous fermentation process combines a very deep aeration tank with a flotation unit that operates on dissolved gases from the tall tank.

According to Jackson, the deep aeration tank system requires less space, shorter treatment times and lower capital costs than do other biological treatment systems currently used by pulp mills, potato-processing plants and other industrial plants that produce organic wastes.

"The system also could be used for something exotic like single-cell protein production," Jackson said. The proteins are found in the microorganisms that collect at the top of the flotation unit and could be used as a protein source for animal

consumption, he explained.

Jackson's process was officially patented Jan. 17 and assigned to the Idaho Research Foundation, Inc., at the U of I. The Idaho Research Foundation also holds about a dozen other patents and copyrights, including one for a computer program that is used widely by the paper industry.

Presently, one paper company has successfully tested Jackson's waste water treatment process, and a cardboard recycling plant in California has planned to install a system based on his design. According to Jackson, several Northwest industries are also currently considering installations, including a potato-processing plant in southern Idaho and several pulp mills in the Northwest.

Jackson has applied for a patent on the method in Canada and has recently discussed his ideas in Germany, England, Korea, Sweden and the Phillipines. A paper on the process was presented Feb. 25 at an international water conference in Thailand.

Idaho gets research grant

The effects of the controversial pesticide Kepone on the reproductive systems of living creatures will be further unraveled as a result of a \$105,000 grant to U of I zoologist Dr. Victor Eroschenko from the National Institute of Environmental Health Sciences.

Eroschenko, assistant professor of zoology and veterinary medicine, has been studying the organochlorine pesticide since 1972.

A white powder used to kill roaches and ants, Kepone caused symptoms of liver and brain damage, loss of memory, slurred speech, eye damage and sterility in more than half the employees of a Kepone manufacturing plant in Virginia. The substance, known to be a threat to human life, has also been detected in mother's milk, the zoologist says.

Under the three-year grant, Eroschenko will examine and describe the ultrastructural changes in the cells of the reproductive tract of Japanese quail, where egg yolk and eggshell are produced. The electron microscope facility in the Department of Veterinary Science will be used in the study.

The zoologist will also continue his collaboration with mechanical engineering professor Dr. Alan Place. Using a highly sensitive hydraulic press, they have found that eggs of Japanese quail fed Kepone are significantly weaker around the equator than eggs from control birds.

"It is hoped that the changes in the actual structure of the eggshell will reflect the changes and functions of the cells in the region of the quail's reproductive system where eggshell is formed," Eroschenko said.

In earlier work, the zoologist established that the pesticide affects the reproductive system of Japanese quail in the same way the hormone estrogen does. The development of the reproductive system of the female is enhanced while the male's deteriorates. However, Kepone also appeared to interfere with ovulation and egg laying.

"One very important fact that turned up during our work was that the birds that stopped laying eggs seemed to accumulate Kepone in their bodies and died," he said,

explaining that female birds apparently excrete the toxic substance through the egg-laying process.

"The effects of these studies will be far reaching in providing insight into the action of the Kepone pesticide on the human reproductive organs," said Eroschenko, who is also on the faculty of the WAMI Medical Program.

He said much of the information that will come out of the study will be basic and applicable to other pesticides which might be considered for use in the future.

The results will also be useful in understanding the hazards to wildlife and domestic animals in areas contaminated by the pesticide. This includes the land and water around the manufacturing plant near Hopewell, Va., where serious effects on workers were found, and also in the South where the related pesticide Mirex was used for about 16 years to combat the fire ant.

"Mirex is a close chemical relative of Kepone, and it now appears that 10 percent of the Mirex sprayed during those years is gradually converting to Kepone," he said.

Eroschenko's early work was funded by small grants from a number of sources, including the Idaho Research Foundation. He indicated the WAMI coordinators were also very instrumental in helping get this research underway.

"They provided me with laboratory space and certain vital research equipment,"

Diabetes seminar slated

New developments in treatment and care of diabetic patients will be the subject of a May workshop scheduled at the SUB.

The workshop is designed for diabetic patients and health care professionals who work directly with the patient in day-to-day diabetes management. The Moscow-Pullman Diabetes Association and the Office of Continuing Education are the workshop sponsors.

New developments in diabetes and insulin, urine testing and its importance, diabetic diet, fats and complications, fats in diet, insulin equipment, injections and mixtures and oral drugs

are among workshop topics. Personnel from the Deaconess Hospital Diabetes Education Center, Spokane, Wash., will present the May 10 program. They are Dr. O. C. Olson; J. Davis, R.N.; and M. Gehring, registered dietician.

Fee for the workshop is \$2.50 per person. Students and persons over 65 may register free. Donations from the Campus Chest fund and the U of I chapter of Lamda Chi Alpha social fraternity are making the workshop possible.

Interested persons may obtain more information or pre-register by contacting the Office of Continuing Education, 885-6486.

University Year For Action

Opinion

Write your Regent

john hecht

in a pig's eye...

The ASUI Senate tomorrow will consider a resolution submitted by Senator Rob Mitchell concerning the fate of KUOI-FM, the university's student-owned and operated station.

The resolution brings out many good points. It "recognizes the liability of the Board of Regents" in being the ultimate holder of the station's Federal Communications Commission license.

It points out that the FCC has accepted the rules and regulations imposed by the ASUI concerning the station.

It notes that format and programming policies of the station are chosen via choice of the station manager. It also says a couple of other things, which if you're interested, you may hear at the Senate meeting Wednesday at 7 p.m. in the Chiefs room in the SUB.

But the final thing it says, is that the Regents should change their recommendations concerning the Public Broadcasting Committee. And well they should. But the resolution offers a compromise on something on which we cannot afford to compromise.

It suggests that choices for station manager be approved by the Communications Board with consultation with the U of I's institutional liaison. Final approval of the station manager still would rest with the Regents, according to the Senate resolution.

Well, the Senate's heart is in the right place. But it seems to me that instead of fighting little pieces of the new policy, we should fight the whole thing. If the Regents have final say on the approval of a station manager, then the whole thing is out of student hands. And keep in mind that your money built that station, and your money, no matter who controls the station, supports it.

As long as you support it, you may as well run it.

Printed below are the names and addresses of all the Regents. If you feel strongly about losing control of your radio station, write and tell them. And do it fast.

Soil club offers scholarship

Plant and Soil Science Club offers a \$250 undergraduate scholarship for next fall. Application forms are available in the Plant and Soil Sciences Department office, and must be returned by March 30.

Applicants must be a member of the Plant and Soil Science Department, and will be asked to provide an application letter and at least

two reference letters. Final candidates will be interviewed.

Scholastic achievement, need, and activities in plant and soil science club, plus other agricultural and general activities, will be considered.

The award will be given to a freshman, sophomore or junior for the sophomore, junior or senior, year, respectively.

"...Student station managers and licensed consulting engineers would be selected and removed by the institutional liaison in consultation with or upon recommendation of the State Coordinator (for Public Broadcasting) and the relevant student (Communications) board..."

The ASUI is contesting the very real threat to student-run and controlled KUOI-FM.

However, past mistakes and inactions by ASUI politicians and communications types are hurting the present cause.

Friday, Board of Regents President A. L. "Butch" Alford, Jr., indicated that the new guidelines for election and approval for the KUOI manager are here for at least a few months, or as he said, until it can be seen if the new system works.

Unfortunately, on the ASUI level the system is barely functional, and the new layers will serve to make things even more unworkable.

Presently, the ASUI Communications Board conducts interviews and recommends to the ASUI president its choice for station manager (and media heads). The president has the option to follow that recommendation and passes on his nomination to the Senate, which either confirms or denies the choice.

Under the new Regents policy, the U of I President designates an "institutional liaison" who makes his recommendation. The president apparently passes on that name to the state coordinator, who gives final approval or disapproval. Among other problems, how much time will the new system take?

The students are in a weak position when they argue that such a process might become arbitrary, that there are no guidelines by which the added layers will make the decision. This is because the Comm Board itself has no selection guidelines for media heads, no official job descriptions, no minimum qualifications standards, and no quantifiable methods for evaluating applicants.

The board interviews, debates, and then votes.

To protect its own minimal independence, the Comm Board must come up with solid methods, perhaps patterned along affirmative action guidelines, in order to select the most qualified person for KUOI manager, and thus demonstrate a reason

for confidence in its choice. This will need to be done before media interview season starts. While it is doing that for the KUOI manager, the board should do the same thing for other media heads. Selections of one type or another are made every semester.

If and when the Comm Board comes up with guidelines, students will have firmer ground on which to be a little more righteous about their choices.

The disclaimers by the state coordinator about non-intervention fall short when another point is brought up. He wants veto or approval power on the "licensed consulting engineer." The engineer for the last eight years, who has volunteered his time and the authority of his First Class Federal Communications ticket, has already met FCC standards. That is why he has the job. It seems unnecessary for a non-expert to select someone who has the approval of the FCC, which is what the state coordinator said he was worried about in the first place.

The most chilling aspect of the new policy, which also must be met on the Comm Board level, is that of removal of media heads. It has been brought home to the ASUI politicians several times in the last year that they have absolutely no way to remove a media head. The Statement

of Student Rights, as approved by the Regents, states that media heads may be removed only for "proper and stated causes" and then only by "procedures prescribed at a prior date."

The politicians and the Comm Board have not yet set forth any methods or grounds for removal. New Comm Board Manager Gary Kidwell has told his board that after the budget, such procedure is the next project. It will be a heady one.

The institutional liaison has been given the power to remove a media head. Hopefully, any such removal will be done for very grave causes, but there is no guarantee against arbitrary decisions. And there is no indication that there is any appeal from such a decision, except possibly to the Regents. One presumes that the regents did not mean to abrogate certain sections of the Statement of Student Rights, but that's what happened.

The first step in the battle to regain student control of KUOI was publicity. The second step will be to clean up our own house, which hopefully will be soon underway. The Regents will meet again in April. It would be a very positive step if the ASUI could present the Regents with strong, convincing arguments that it is ready and capable to handle its own media affairs.

Letters

Survey plug

Editor,
The University Curriculum Committee (UCC) has asked us for our opinion on a number of proposed changes for the class drop date system (See *Argonaut* Friday, March 10, 1978; Page 2). This action taken by the UCC shows a lot of consideration and effort, and should be commended.
Now it's our part! Show that you do care about what this student-faculty committee is doing. Be objective and consider each proposal in the survey carefully. The survey is on Page 2 of last Friday's *Argonaut* issue. It is self-explanatory, straightforward, and takes little time to complete.

If you have more on this issue to express, or questions, contact a member of the UCC or an ASUI Senator that represents you.
Rick Howard

To arms!

Editor,
It is time the students of this University got off their butts to fight for what is theirs. In the past we have let what has been ours be taken away. This includes student control of the Swim Center, the Kibbie-Dome, Kiwi, and now the KUOI radio station. Believe me this is a condensed list. The "administration" is getting bolder and bolder when it comes to taking away what is the students'. The SUB is surely on its way and will be the next to go.

Now is the time for students to let themselves be heard. A petition is being circulated to complain to the Board of Regents and restore the control of KUOI-FM back to the students.

The students of the U of I are considered to be those of little backbone. It is no wonder that A.L. Alford (a member of the Board of

Regents) would say, "I can't help feel wolf is being cried a little bit," when Tom LaPointe resigned as KUOI-FM Program Director and the *Argonaut* ran an article against the change in policy.

I myself am not calling "Wolf." I am outraged at this degrading move by the Board of Regents. I am terrified by the fact that we the students, can be overrun so easily. **YOU SHOULD BE TOO!!!!**

So let's get on the ball! It only takes ten minutes of your time to write to the Board of Regents and it takes even less time to sign the above mentioned petition. It's up to you now! Either we become puppets of the "Administration" or we stand up for what is ours!
Darrell G. Coleman

Help library

Editor,
Students who received the Library opinion survey are urged to cooperate by completing the questionnaire and returning it by the March 16 deadline. As this is a random sampling, a good percentage of returns is necessary to accurately reflect student opinion about library services, resources, and facilities.

Although this survey was initiated by the ASUI, not the Library, we are glad to cooperate as the ASUI has been very helpful in recent years by providing for student use of such things as

free typewriters and hand calculators which the Library itself has been unable to provide.

In order that the results of the library opinion survey be meaningful, a greater response than we understand has so far been received is necessary. Please take a few minutes of your time for this purpose. Completed surveys may be returned through an ASUI Senator, to the ASUI offices in the SUB, or placed in the box provided in the Library lobby.
Richard Beck
Associate Director of Libraries

Cheerleader tryouts will be after spring break

The 1977-78 U of I cheerleaders are announcing tryouts for the next academic year. Any interested women and men currently enrolled at the University are welcome to try out for the squad.

A clinic will be held April 3-6 at the Women's Health Education Building from 4-6 p.m., with actual judging April 7. For more information contact Kelli Boatman at 885-6512 or Mike Miller at 885-7213.

Sports

Seventh inning play sees Idaho's Terry Hiller vainly trying to beat a Whitworth Pirate to the bag in Saturday afternoon's game. The

Vandals won the home season opener at Guy Wicks Field 9-2. Photo by Steve Davis.

Win goes to Idaho

Cold weather didn't cool Vandal bats as they rapped out 12 hits including two home runs, to down Whitworth 9-2 Saturday afternoon in Idaho's first home baseball game.

Ken Druffel and Kelly Davidson each slammed home runs over the left centerfield fence in the fourth inning. Druffel drove in Rick Britt who had reached first base on a walk and Davidson brought Dennis Phillips in who had also reached first on a walk.

Vandal mentor, John Smith, is looking forward to this week's action in the Banana Belt Tournament in Lewiston.

"It's going to be a real tough one. We play six games in three days," he said. "Our pitching will be our biggest problem. This early in the season they're not ready to go the full nine innings. Our biggest problem is pitching depth."

Pitcher Tim Martin picked up the win against the Pirates Saturday allowing only two hits while facing 14 batters. Mike Hamilton came in the top of the fifth inning and Brian Stokes relieved Hamilton in the top of the eighth. Whitworth tallied nine hits against the Idaho hurlers.

Nationals prove awesome

Hard-core national competition greeted Vandal swimmers last weekend, as portions of the men's and women's teams competed at opposite ends of the country.

Gainesville, Ga., was the site of the 1978 Small College Women's Nationals, where freestyler Linda DeMeyer, diver Teri Bell and the 200 medley squad made up of DeMeyer, Kris Ablin, K.C. Knight and Lisa Hazel participated.

For the men, it was to Seattle where the Region 12

AAU Short Course Championships was in progress. Coach Chet Hall's club was comprised of freestylers Mark Nordquist and Jeff Vitamanti, and Steve Cobb, who entered in five events, including the 100 and 200 meter backstroke.

Neither team came up with any outstanding times or team finishes. In fact, neither club earned a single point, or saw a swimmer get in the finals, but that didn't bother Hall and women's Coach John DeMeyer.

"Teri missed finals by nine or ten points, while Linda was hit with the flu, which hurt her times," continued DeMeyer. "Lisa did her best in the relays by going 27.9 in the 50 back and 26.7 in the 50 free."

In the 45-team field at Seattle, Idaho "tied about ten other teams for 45th", said Hall.

"It was a marathon over there," said Hall. "In the 100 frees, there were 19 heats for the men, 16 for the women."

KUOI—89.3—Dexter Wansel, "Voyager," 10:05 p.m.

Heart concert attracts juveniles

What's big, round and filled with screaming teenyboppers?

You guessed it, last weekend's Heart concert. Joined by the Jay Ferguson band, Heart performed for a mixed crowd of university students and pint-sized fans.

Even if you couldn't tell the youngsters from the rest of the crowd by their size, there was another clue: the grade schoolers were the ones smoking cigarettes.

The concert was fun for all, and provided the biggest showcase of freaks since the circus last spring.
