Rain may halt registration

Registration could be halted today if a major rain storm hits the dome and vicinity.

A memo released yesterday by Matt Telin, University of Idaho registrar, said that in event of a "heavy" rain, the registration process would be halted, to resume after the shower subsided or quit.

Telin said the registration process could go on into the night if necessary if the shower delays things long enough. Telin said the memo outlined basic contingency plans in case it does rain.

He said that he doesn't plan that the plan will go into effect since there is approximately only a 10 percent chance of rain. He added that the initial concern for the registration process halting was because of a weather report stating there was a thirty percent chance of rain.

He said that if registration is halted, the doors will be closed and the process will pick up where it left off and continue on until the last student is registered.

Telin stressed that the process would be halted only if the shower was a heavy rain.

Argonaut photo/Deb Gilbertson

As the season changes so do the faces of Moscow and the university, with new and returning students in a city in the midst of revitalization.

The Argonaut is published twice weekly during the academic year by the Communications Board of the Associated Students of the University of Idaho. Offices are located in the basement of the Student Union Building, 620 Deakin Avenue, Moscow, Idaho, 83843. Editorial opinions expressed are those of the Argonaut or the writer, and do not necessarily represent the ASUI, the U of I or the Board of Regents. The Argonaut is distributed free of charge to students on campus. Mail subscriptions are \$6 per semester or \$9 per academic year. Second class postage is paid at Moscow, Idaho. (USPS 255-680)

FY 1983

Board of Education promises faculty salary equity

A change in attitude this summer by faculty at all four Idaho institutions of higher education led to another change in attitude by the State Board of Education. Simply—faculty are unhappy with their present rate of pay, there is increased faculty turnover and the board is promising to support them.

Convinced at their August board meeting by university and college officials that all the fat has been trimmed and the bones are showing, the board unanimously voted to ask the legislature for \$2.4 million to boost salaries at the University of Idaho, Lewis-Clark State College, Boise State University and Idaho State University.

The UI share of the \$2.4 million for fiscal year 1983 is \$1.3 million. Presently, salaries at the four institutions range from 6 to 11 percent below salaries at similar western institutions. UI President Richard Gibb has speculated there will be a 1 or 2 percent increase in disparity this year.

University and college officials told the board that faculty turnover at Idaho's institutions began on a large scale this summer and that they had warned the board of faculty salaries seriously below salaries at comparable institutions.

As stated in the UI budget request submitted to the board, an on-going salary survey conducted by Oklahoma State University indicates that the university's salary structure is becoming even less competitive. This study, done annually for land grant universities, shows that the overall salaries at University of Idaho dropped another four percentage points below other land-grant universities in the western region—where it is already 7.6 percent behind.

Governor John Evan's directive to state agencies asked for salary raises averaging 14 percent with an extra 14 percent for merit pay.

Faculty salary equity is one of six categories in a new budget format developed by Idaho education institutions.

The other categories in the new format are: maintaining program standards, accreditation for special programs, maintaining quality libraries and new programs and services.

The institutions and board members hope with this new format to avoid former squabbling when it comes to each getting its fair share. With this system, all the institutions are lumped together as one higher education system. The lump sum the board sets goes to the governor, then to the legislature, then will come back to the board for divying up.

The total lump sum approved by the board in August for maintaining current operations at all institutions was \$83,115,900. This is a 30 percent increase over the total fiscal year 1982 operating budgets.

The amount the University of Idaho requested to maintain current operations was \$32,953,300, a 19.9 percent increase over last year.

Also approved by the board was the UI request above maintaining current operations — approximately \$4 million.

Here are excerpts from the text of the UI budget request of the four specified areas:

Maintain Programs

A large proportion of the operating and maintenance expenses is used to support instructional programs and general office activities. The University of Idaho's programs are very laboratory-oriented. Costs for laboratory supplies have increased disproportionately due to both inflationary factors and regulatory requirements. An example is our purchase of helium which is used in chemical analysis instruments. In just 18 months the cost has gone up 140 percent with much of the increase due to freight costs on the cylinders.

The recent additions of computer facilities and the data-processing activities have been a major contributing factor in our being able to maintain a high investment in the academic programs in the face of growing needs in administrative functions and staff work. To continue these developments, however, does require additional investments in computer services. Over the past several years we have actually reduced the computer services staff by five positions.

Other areas that need additional staff positions are the registrar's and admissions offices, student counseling center, controller's office, and library. No new positions have been added to the registrar's office for over 10 years and yet the enrollment has grown 14.1 percent during the past decade.

Accreditation

In the College of Engineering and the College of Mines and Earth Resources, all the current programs except computer science are accredited; even so, large enrollment increases (they have doubled over the past five years) have outstripped our ability to put new funding into these programs in the amount needed to ensure quality is maintained. In many cases, class sizes have doubled, laboratory work has been curtailed, and homework assignments have been reduced and a number of other such actions taken in order to appropriately teach the students with the resources available. Accreditation of these programs is due for review in the fall of 1983, and without additional resources in terms of faculty, graduate assistants, operating expenses, and equipment the accreditation status of these programs will be in jeopardy.

In the College of Law, we are not in compliance with the last accreditation commitments because a professional librarian position in the law library was eliminated during the FY 1980 budget cut. A request is being made to restore this position in order to bring the staffing of the law library back to the level committed by the state in obtaining the 1978 accreditation.

The journalism program in the School of Communication is an area that is eligible for accreditation but is not now accredited. A new faculty member is requested for the School of Communication with additional funding for conversion of several part-time positions to full-time positions which will provide the resources necessary to meet the needs of the university in this area in a way that will also satisfy the accreditation standards.

Facilities/Inventories

The average building is 39 years old and our oldest building was occupied in 1901.

Laboratory facilities designed to teach the sciences 30 years ago may be totally inadequate today.

For the University of Idaho alone, it is estimated that there is a need for \$3-5 million to renovate or remove some of the facilities on the Moscow campus.

Currently, nearly 75 percent of the equipment in the university's inventory is of an age equal to or exceeding the expected life cycle.

Libraries

The library has had no new positions, except for those created by transfer of IH funds, for a decade, so it is operating today with essentially the same full time employed staff as in 1970.

Library use increase (1970-1980): regular loans, 61 percent; reserve book room loans, 79 percent; interlibrary borrowing and lending, 200 percent; photocopies made at the loan desk, 152 percent. Collection growth: books, 56 percent; microforms, 63 percent; U.S. documents, 39 percent; periodical subscriptions, 34 percent; maps, 30 percent.

The UI budget request concludes the following:

—In the event that the full budget request is received, the university will be in a position to fund both its remedial and its most pressing expansion needs. These include keeping faculty, preserving quality programs and enhancing research and service activities.

—In the event that resource levels appropriated for fiscal year 1983 are below those required to maintain current operations, the university will be faced with decisions on eliminating programs, limiting enrollment, staff reductions, and research and service.

—In the event that the fiscal year budget equals the maintenance of current operations, some adjustments will still be required.

Pay Plan

By Lori White
of the Argonaut

The employees facing the most problems in the change-over are people paid by the ASUI, the yearbook staff and Argonaut employees. In the case of the ASUI and the yearbook employees, the money for salaries was budgeted for monthly payments. In the case of the Argonaut, employees do not always receive a set amount every month. These people must have their pay periods and the amounts they are paid switched to units that are related to the two-week plan.

Some financial juggling is now being done to insure that these employees aren't underpaid or overpaid. Scott Biggs, ASUI vice president, is in charge of making the change-over for the ASUI. Biggs says it is just a matter of dividing the amount to be paid by the number of pay periods.

Biggs likens the conversion to the switch from English units to metric units. "If we just buckle down and get the damn thing done it should work well," said Biggs. He added he agrees with the principle of a paycheck every two weeks. "It's almost ridiculous to think we would have to go a whole month with one paycheck.

Char Martin, senior account clerk at the Student Union Building, said she agrees with Biggs. "In the long run, it's a much better plan...especially for irregular help." "Two weeks is a great idea...but they haven't worked out the kinks yet," she added and pointed to some employees who didn't get paid for the period between July 24 and July 31 to make the change-over easier. "We still have to find a way to make up that deficit in a fair and equitable manner," Martin said.

Also said Martin, although it's too early to tell, people don't seem to be getting used to the new pay plan. "If we could get people thinking in units, instead of months, we would be all right," she said.

The final version of the two-week pay plan was ready to implement August 1, said a memorandum issued to University of Idaho faculty and staff by David McKinney, UI financial vice president.

In this version of the pay plan, which took several months to prepare, academic year appointees will not receive their paychecks two weeks late. Instead, the plan calls for 10 month employees to be paid for four weeks of work on August 28, instead of only two weeks of work. According to the memo this was done so that faculty and staff could maintain retirement accruals. Also, this prevents problems with employees not reporting for work August 17 but getting paid anyway.

Twelve month employees receive their paychecks on time from Aug. 1.

However, irregular help and students on work-study will still receive their paychecks two weeks late, said Jama Sebald, financial aid advisor, at a meeting of work-study supervisors Thursday.

Still, said Sebald, irregular help and work-study recipients will receive their first paychecks earlier than last year.

The new pay plan will affect "about 4,000 employees, both full time and part-time," said G.R. Reynolds, UI controller. The plan was mandated by the state to insure payroll uniformity and alleviate problems in getting such information as the number of state employees and amount of sick leave.

"It's too early to assess the total impact," on the various departments as yet, said Reynolds. But, he added, "I'm fairly well pleased with it." Reynolds said that area banks are being very cooperative in adjusting to the two-week pay plan and rearrangement of check-depositing and payments should pose no problems.

Gerard accepts staff position in Washington D.C.

Jack Gerard, former political science student at the University of Idaho and ASUI lobbyist, has been accepted at Georgetown University and has secured a full-time staff position at the Capitol Building in Washington, D.C., according to Eric Stoddard, ASUI president.

During this special summer legislative session in Boise, Gerard was very active in pursuing the needs and desires of UI students, Stoddard said.

His accomplishments include being instrumental in defeating the proposal to charge in-state tuition to Idaho residents; helping defeat the bill redefining tuition; and drafting and submitting a bill to place a student on the State Board of Education/Board of Regents Stoddard said.

Gerard was elected to the ASUI senate in May.

"We'll sure hate to see him go, but this was an excellent opportunity that he felt he couldn't pass up," Stoddard said.

Observe the hazard zones

Students registering in the University of Idaho Kibbie Dome today may be facing a hazard, according to Ken Hall, physical plant director.

Hall said conditions within the construction area will be "extremely hazardous," and the area will be clearly marked off. Also, persons are urged not to attempt to cross the construction area or enter through the lower doors that lead directly to the registration area, he said.

For safety reasons, Hall said, entrance to the dome this registration day will be limited to the southeast doors.

6. ROOMMATES

Fall Semester: Non-smoker share 1/2 newer home; own room, shag carpet, W/D, Showtime. Quiet area edge town; \$120 month total. 882-6662, 885-6171 mornings, ask Bill.

7. JOBS

Help wanted - Receptionist to assist yearbook portrait photographer. Temporary position. 8 hours daily. Aug. 25 - Sept. 11. Pays minimum wage. Call 885-6371 or 882-3373.

The City of Moscow is currently accepting applications for the part-time position of Youth Center Coordinator with the Parks and Recreation Department.

Applicants for this position will work approximately 30 hours per week and will be responsible for developing, coordinating and administering a program for teenagers at the Eggen Youth Center. This position will entail afternoon, evening and weekend work.

Past experience in working with youth and a desire to promote and develop youth programs is required. Pay for this position will be \$4.00 per hour.

Applications will be accepted at the Eggen Youth Center, 1515 East D Street or City Hall, 122 E. 4th Street, until 5:00 p.m. on Wednesday, September 2.

The City of Moscow is an Equal Opportunity Employer.

One Way Or Another

Two one-way streets form a couplet as part of downtown's renovation project. Jackson St. will run south while Washington St. runs north.

As work on the streets progresses, Moscow inhabitants of all types just try to get by as best they can.

Moscow motorists don't know where to turn

By Perrie McMillen
of the Argonaut

Students—welcome back to the University of Idaho and to beautiful downtown Moscow. While ambling down the streets of Moscow you may have noticed that a few changes have been made since you left last spring. Here is what happened.

Much of the construction work that has been in full swing all summer and is just now entering its final stages was begun last spring, as early as February. The state highway department's contract on the interim couplet, the new system of one-way streets, was completed July 10, said Bill Smith, city supervisor.

This couplet diverts the through traffic off of Main Street onto Washington and Jackson streets. "The one way grid allows for a greater volume of traffic to move through the community without all the delays," said Smith.

After the traffic was diverted, Main Street was blocked off and the revitalization of downtown Moscow began in earnest. Smith said it was decided years ago that Main Street should be a "pedestrian oriented environment." A fountain was erected downtown across from Friendship Square and there are plans to install benches and lamp posts, a children's play area and to plant trees before the project is completed.

Smith also said there will be an increased number of parking spaces on Main Street and there will be three-hour parking instead of two.

United Paving Inc. is the company that contracted the construction work for the couplet and the downtown revitalization. The contract for the couplet was with the state and the contract for downtown was with the city. Roy Dvorak, area manager for United Paving, said he "had to put on extra crews to get Main Street open before school." According to Dvorak, Main Street is scheduled to open Monday, August 24 by 4 p.m.

Despite some controversy that the construction work is behind schedule Dvorak feels the work has progressed on schedule if not better. "I feel we have 85 percent of the work done now and 25 percent of the time left on the contract so I feel we are ahead of the schedule not behind." He added, "On October 26 we will be done." October 26 is the contract termination date.

Dvorak said they are still in the process of laying concrete for cross walks. He also said the bike path from Jackson Street to Deakin Avenue will be completed sometime this week.

City Supervisor Bill Smith cited cost approximations in round numbers for the projects. According to Smith the last phase of the interim couplet cost about \$600,000 and the downtown revitalization project will cost about \$1,750,000.

Argonaut photo/Mike Borden

Workers braved hot summer sun to revitalize downtown Moscow and reroute traffic.

commentary

Drip, drip, drip

Rain, rain, go away. Drench the Dome some other day.

University of Idaho officials announced yesterday that if showers made an appearance over Moscow, and subsequently the Kibbie Dome, the still-unprotected Dome roof would leak.

Now, since all that water splashing around wouldn't really add to the gaiety of Registration Day activities down on the floor, officials have decided that the first signs of precipitation would cancel registration. Registration would only resume when the nasty old showers had high-tailed it to other, more leak-less areas of the country.

But, while the administration has said registration would continue until everyone is registered (even after 5 p.m.), we can only imagine the soggy mess the showers could leave behind: soggy students with soggy time schedules, soggy checkbooks, and a soggy frame of mind.

When it pours, it rains. What about this, folks? Let's board up the doors to the building and work up proposals for ... the ASUI-Kibbie Marine World ... the ASUI-Kibbie Swimming Hole ... the ASUI-Kibbie Trout Haven ... the ASUI-Kibbie SCUBA Training Center ... the ASUI-Kibbie Headquarters for Underwater Basket-Weaving.

Mary Kirk

Just lip service

Tomorrow is Women's Equality Day. It marks the anniversary of women's suffrage—61 years since the passage of the 19th Amendment to the Constitution. But not until 1922, when the amendment was ratified, were women, who now make up more than half the population of the United States, finally guaranteed their right to vote.

Unfortunately, despite the hopes of that era's suffragists, other advancements to render women fully equal in our society have yet to be realized.

Today women earn only 59 cents for every dollar their male counterparts earn. They are in the workforce in numbers greater than ever before and could constitute an economic and political force of such strength and vigor that this country would be stood upon its ear.

Is it any wonder the prevailing political forces, almost to a man, merely give lip service to women's equality and when it counts vote against the Equal Rights Amendment? Who'd want to lose even a little bit of the power those big daddy legislators possess?

Women's Equality Day ought to be a national day of mourning.

Donna Holt

Letters Policy

The *Argonaut* will accept letters to the editor until noon on days prior to publication. They must be typed, double spaced, signed in ink and include the name and address of the author. Letters will be edited for spelling and clarity. Letters should be limited to 250 words. The *Argonaut* reserves the right to refuse letters that are libelous or in bad taste.

On the road again

Donna Holt

"Be cool," I told myself as I tootled along in Julius, my orange VW spudmobile. "Second generation Los Angelenos never forget their upbringing. You won't make a fool of yourself." More easily muttered than realized, I feared, as I made my first pilgrimage back to my Southern California roots in more than three years. Living in the bucolic splendor of places like Moscow, sheltered and oblivious to the stranger aberrations of urban sprawl, I felt I had lost any adeptness at being a city kid and was very likely to behave as if I had just fallen off the potato truck.

As I chugged through the Mojave Desert at two in the morning in order to avoid inhuman temperatures, my courage was renewed as my nose was struck with desert smells I thought were long forgotten: sage brush and grasses and a hint of skunk. But who could have been prepared to lose sight of the stars with civilization still so many miles away? The lights of the city and its now far-reaching suburbs were so bright that the constellations could not compete.

I hit the freeway north of L.A. at 3 a.m. There was more traffic than Muscovites see on the day the dorms open. And instead of that sage smell, pungent, acrid smog—oh vapors of my youth—took over. "I want to make the San Fernando Valley my home." Oh yeah?

Sherman Oaks, bosom of my girlhood, famed in song and novel as the wife-swappingest neighborhood on earth, home to movie stars and, now, great big multi-story buildings. Whatever happened to the 14 story limit? Ventura Boulevard is aspiring to be Madison Avenue.

And supermarkets. Oh my heavenly days, I just about lost my composure and gave my Idahoan self away when first I ventured into the grocery store. Mouth aqape I stood transfixed in the vegetable department. Tomatillos, four kinds of cucumbers, strawberries as big as plums, lettuce for 25 cents a head, mangoes, jicama. Fruits and vegetables in such abundance and variety that we in Moscow can only dream and weep upon awakening.

In the aisles were folks who'd spent hours preparing their hairdoes and clothes for the outing. Apricot hair, Gucci loafers, calculated sloppiness, all shared the floor. And each drove a shopping cart adorned

with a little advertising sign—like those you see on city buses—Nine Lives and Lysol and Yuban jockeyed for position at the checkout stand.

Once done with their marketing, the Valley's residents pile their purchases into their Caddies and Mercedes' and Lancias and Rolls Royces (really). Each vehicle is identified by its personalized plate. Not satisfied with messages in English, L.A. car owners resort to foreign tongues, principally Yiddish. LaChaim is spelled in all its possible permutations. My favorite, though, owned by a psychologist and a welcome sight on crowded freeways, is, "OH RELAX."

Poor Julius, with his modest Latah County plates, was no match for the big boys. But he still wears his "Church Wins for Idaho" sticker and that got us into trouble twice. Both times some friends who hadn't been seen in a mighty long while took one look at the sticker, and, knowing nothing but nothing about Idaho politics, decided I'd gone over to the born again folks and was likely to proselytize them. I learned fast to reassure them when I recognized that look from people I'd been through the '60s with.

On the whole I expect I managed pretty well to meld back into the haunts of my youth. I did Beverly Hills and Malibu without blinking, and never did feel like a tourist. Folks down there have adopted John Deere hats of their own so my Burpee Seed chapeau didn't faze 'em a bit.

Finally, some five weeks after I'd left the cool and quiet of the Gem State, I began the long ride home. I was proud that I hadn't embarrassed my family with my hayseed behavior. I'd driven the Hollywood, the Harbor, the Santa Monica and the Ventura Freeways with such abandon that veteran commuters gestured at me.

And so, fully confident that I could fit into any place, crossing time and consciousness barriers at will, I returned to Moscow. And on my first day home, first trip into downtown, turned the wrong way on a one-way street.

Pardon me while I clamber back on the potato truck.

Donna Holt is a third year law student and editorial page editor of the *Argonaut*.

Presidents' welcome

... Richard Gibb

I'm pleased to have this opportunity to welcome you to the campus and to relate some of what has emerged during the summer vacation.

We continue to have a number of concerns, most of them related to money—maintenance of some of our older buildings, the status of KUID (which had its state funding pulled out from under it), skyrocketing equipment costs, and most of all, inadequate faculty and staff salaries. Earlier this month, the Board of Regents, recognizing our continuing budget problems which resulted in higher costs to you this fall, approved a significant increase in our budget request for next year, but it remains to be seen to what extent the legislature will fund the request.

On the brighter side, some new and unique opportunities exist for UI students this semester.

—The University of Idaho has a new college. In June, the Board of Regents made Art and Architecture a separate professional college. Formerly a department in the College of Letters and Science, Art and Architecture had grown over the years until it became larger than some of our existing colleges, and college status was justified.

—A new campus-wide cable television system will be in place this fall. Via an audiovisual control center, it will enable UI students to review lectures or demonstrations from certain classes on TV monitors, whether students are in laboratories, dorms or at other locations on campus—more than 100 locations in 28 buildings in all.

—We hope to receive state funds for the final phase of a new Agricultural Engineering Building and to start on the much needed remodeling and addition to the Life Sciences Building.

—The language lab, with the help of a federal grant, has doubled in size and capacity and will be able to accommodate up to 1,400 students a week.

—A new microwave interconnection with Washington State University via KUID and KWSU will enable students here or at WSU, for the first time, to take a class without traveling when the professor is eight miles away. It will be used for some special engineering courses this fall.

—A new computer science department in Engineering now exists. This program has gone from zero in 1977 to an estimated 400 majors this fall. A key part of this and other academic programs is our new computer. Accessibility to computer terminals is greater for UI students than for students on most other campuses, thanks to some far-sightedness on the part of some people on our campus.

Ultimately the reputation of the university depends upon the abilities, talents and success of its students who become its alumni. This is a great place to be right now, and I hope you will take advantage of some special programs such as the Recital Hall Idaho series in music, the addresses of the Borah Symposium or Almquist lecture, the fine plays, ASUI's sponsored activities, various clubs and organizations on campus, as well as intramural sports and intercollegiate athletics.

We're going to be working hard to see that what is here for you is of fine and lasting quality, and I hope to meet many of you during the coming year.

Have a good year.

Richard Gibb is president of the University of Idaho.

"In the Argonaut of February 1, 1904 appeared an editorial calling the attention of the students to the proposed organization of the Student Body of the University of Idaho, a constitution for which was then in preparation by a committee representing the different departments of college activity.

A mass meeting was called to get an expression from the students as to organization. The assembly strongly voted for the Associated Students University of Idaho constitution and a committee was appointed to confer with the faculty...." (First recorded excerpt from Secretary's Book for the Associated Students of the University of Idaho.)

Over 75 years ago the Associated Students University of Idaho was created. Then as today, students felt that it was important to participate in the university decision-making process and to provide services to the students that were deemed appropriate. The preamble to the ASUI constitution of April 4, 1975 sums up the goals of the association quite well: "We, the students of the University of Idaho, as members of the Associated Students University of Idaho (ASUI), in order to promote and maintain those endeavors germane to student control, do establish an ASUI government, the purpose of which shall be to provide for the organized conduct of student affairs and to promote the educational, cultural, social, and recreational activities of the members of the association, to act as the official voice of the student body, to further cooperation among them, and to combine their interests toward the development of a better University of Idaho, and to assume such powers and perform such duties as may arise in acting as the official representative of the student body."

Today the ASUI is a sizeable organization composed of over 200 students managing nearly 20 departments and operating on a budget well over one-half million dollars. It

is no question that the ASUI is in the business of serving you, the student, though political representation; offering services like the Argonaut, ASUI golf course and legal aid; and developing new programs as your needs and wants dictate.

Upon reflection of last year, the University of Idaho and the State of Idaho endured the worst financial crisis in our generation. It is no wonder why the Board of Regents requested another \$50 in resident fees last April. But at least we as students can be assured that this recent fee increase will be dedicated to the University of Idaho.

ASUI and the statewide association of students, ASI, defeated two pieces of tuition legislation last spring that if passed would have made the recent fee increase of \$50 look like a picnic. One only need to look across the border at WSU and examine the massive tuition increase the students of that institution were subjected to. Tuition nearly doubled in the state of Washington, and if that wasn't bad enough, out of the 90 million additional students dollars raised, 37 million didn't go to higher education, but rather was unequivocally and unfairly used to balance the state budget! The issue of resident tuition is not over, as certain groups will still look toward this change in Idaho's constitution as a financial escape for the 91 years of tuition-free education. I can assure you that in this next legislative session ASUI will once again defend you, the student, and your right to continue receiving an affordable education.

This fall ASUI will focus intensively on tangible campus needs. In the works this semester, and anticipated to be implemented the 1982 academic year, is an ASUI Lecture Notes Program. This program will provide supplemental notes for large introductory classes where individual attention is difficult to obtain from the instructor. Lecture notes

offer a service to both students and faculty where vital concepts and lecture content as a whole can be focused upon rather than verbatim remarks by the instructor. We feel the Lecture Notes Program will be particularly well-received by the off-campus students.

ASUI is boldly entering the concert and entertainment field this year. We anticipate large concerts at the ASUI-Kibbie Dome, with groups the caliber of Jefferson Starship and Charlie Daniels, as well as many small mini-concerts reflecting a wide variety of musical tastes.

Other areas of pursuit by the ASUI will include a plus/minus grading system similar to WSU's that accurately reflects a student's academic standing in a particular course and cumulative grade-point average.

ASUI is investigating the feasibility of implementing a student credit union. We hope the College of Business can offer its expertise in its creation and operation. Student checking accounts that pay 6 percent interest, require no minimum balance, levy no per check charge and provide the first set of checks free are some of the benefits a student credit union would offer. We hope you'll hear more about this exciting area of student service in the near future.

In summary, ASUI has the ability, the money, and the students to initiate these programs. I urge you to come down to the ASUI office and apply for some of the openings available in our student association. You dedicate over \$40 a year into ASUI operations. You should not only expect quality programs and service from ASUI, but you should demand them.

I sincerely wish you good luck this academic year at the University of Idaho. If I can ever be of any assistance to you or your organization please drop on by the SUB and see me...my door is always open.

Eric Stoddard is ASUI President.

Book Return Policy

If you drop or change a course, the texts may be returned under the conditions stated below:

1. Returns MUST be accompanied by the CASH REGISTER RECEIPT.
2. Books must be in absolutely new condition free of all markings with pencil or ink, other than our price mark.
3. Returns will be accepted within TWO WEEKS from date of purchase. (Only exception to this will be towards the end of the semester, when returns of Overstock are made; then there will be NO RETURNS ALLOWED ON TEXTBOOKS purchased. The date for this period will be posted and it is the responsibility of the individual customer to note this period.)
4. We are the sole judge in determining whether books returned are in new or used condition.
5. Tradebooks and special orders are NOT RETURNABLE.

For information call: Textbooks, 885-7038; General Books & Supplies, 885-8469.

Community shocked by summer tragedy

Kristin David

Kristin David of Clarkston was a 22 year-old University of Idaho student. A senior majoring in communication-broadcast journalism and political science, blond-haired Kristin was both the homebody and the feminist of her family. She was the quiet one, yet friendly once people got to know her. And she never had a fear of being alone.

June 26th—Kristin set off from Moscow on her dark blue, 10-speed bicycle, bound for Lewiston and her summer job. She never got there.

July 2nd—the first lead in Kristin's disappearance and the start of the Kristin David saga came when a Genesee man reported (under hypnosis) that he'd seen a man in a brown van stop to help a woman cyclist matching Kristin's description. He saw the van and woman just south of the Genesee junction with U.S. 95 on June 26th. The witness described the van's driver as 5 feet 10 inches tall, bearded and weighing 180 pounds.

He described the van's license plates as being from Oregon with the last two numbers 37. After this apparent sighting came the law officials' checks on vehicles matching the description and a search through printouts of all Oregon plates ending with 37.

Headlines in the local *Idahonian* and the *Lewiston Morning Tribune* in following days pretty much outlined the continuing saga.

July 5th—"Human leg, torso found on river edge." Found by a boater on the shore of the Snake River, just west of Chief Timothy State Park, was a headless human torso with various stab sounds and a leg. The torso was apparently female with no clothing on or near it. It appeared to have been in the

river for four or five days. There was no sign of the blue bike.

July 6th—"More Body Parts Found." A dismembered head and two arms were found within 300 yards of the first body parts, six miles west of the Red Wolf Crossing Bridge at Clarkston. Police also found a leg part three miles west of

the bridge and apparent blood stains on the bridge's railing.

Law enforcement officers were now "operating under the assumption" that the dismembered body was that of Kristin. After the second discovery of remains, the body was sent to a forensics laboratory in Wenatchee, Wash., where the pathologist started checking dental records and x-rays. At this point the Federal Bureau of Investigation joined Whitman, Latah, Asotin and Nez Perce county sheriff's offices in handling the homicide.

July 9th—"Body Identified." Following an FBI announcement that the dismembered remains pulled from the Snake River were those of Kristin David, Moscow's Sunset Sports reported an unusual number of handgun sales and that some women were buying up canisters of tear gas.

An unusual but still unrelated twist happened shortly before the identification of Kristin. A Moscow woman in her early 20's was allegedly kidnapped that same afternoon as she left Idaho First National Bank on Main Street in Moscow. The woman told police she was leaving the bank and entered her car which had been parked in the covered lot underneath the bank. But, before she could drive away, a man jumped in the passenger side of the vehicle and she was forced to drive east of the city and to take various roads for about two hours. When they finally stopped just east of the Elk's golf course and got out,

the woman kicked her abductor, and fled back to Moscow alone in the car. She was uninjured.

The description of the abductor in this case was of a 6 foot to 6 feet 2 inches tall man weighing about 170 pounds with black hair and in his early 20's. He was wearing at least one gold post-type earring; maybe two. Roadblocks were soon set up and officers went door-to-door searching for a man fitting the given description. While Police Chief Clark Hudson didn't believe the kidnap attempt was connected to Kristin's case, the FBI was notified. The assailant is believed to be a local man.

Following identification of Kristin's body and a memorial Mass, there were several shows of support from the shocked university and community. Organized one night was a candlelight rally in Friendship Square where more than 200 people passed a flame from candle to candle. Men, women and children called upon each other to "take back the night" that has been taken away from the people by muggers, rapists and murderers.

Next, the Kristin David Reward Fund (about \$500) was set up by University of Idaho students. It got some help from a benefit skate at Moscow's Rollin Derby skating rink. The fund's purpose is to bring forward witnesses or information

"Take Back the Night" was the theme for Airin Wheeler and 200 other people in a Friendship Square candlelight rally following the David murder.

SUSPECT:

5'10" to 6'; 175-180 lbs. Brown hair & beard, beard neatly trimmed, full around chin. Unknown if mustache as witness only had a side view of suspect. Stocky build; Wearing Khaki pants and 1" brown and white checked shirt and sunglasses. Approximate age — 30 years.

VEHICLE INVOLVED:

Dark Brown Van (similar to color of UPS trucks) Possibly with Oregon plate ending in 37.

INCIDENT:

Victim disappeared while bicycling south on HWY 95 from Moscow to Lewiston, ID. Incident occurred at approximately 11 a.m. on 6-26-81. Suspect probably picked up victim in above mentioned van.

Art and Architecture gains college status

After a six-year battle, the Department of Art and Architecture has been granted college status.

Approved by the Board of Education in June, the new college is the first since 1925 when the College of

Business and Economics was formed and now brings the total college count at the university to nine.

Argonaut Photo/Rodney Waller

Art and Architecture was formerly the largest department under the College of Letters and Science, with 22 faculty and close to 600 students. Architecture, interior design, landscape architecture and art are now official departments with former department head Paul Blanton named as Dean.

In an interview with the *Idahonian*, Blanton said the change puts the program on a different level, but won't require much more work than in the past.

Basically, said Blanton, the change to college status is nothing more than a change in name although there are some things the faculty staff will begin doing that they haven't done before. He said the plan to change the department's standing has been around for about five years, so it wasn't really a surprise.

The A & A college has always handled its own advising and most record keeping as well, but will have to pick up the monitoring of student progress to make sure they're finishing required courses.

College status is important as a recognition of the quality of the program, Blanton said. "It will make it more visible, professionally and academically, and will make us able to participate as a full partner" at budget time and when applying for grants.

"It gives students the prestige of graduating from a professional College of Art and Architecture" as well, Blanton added. Accreditation was a big boost, for another reason he said, because students can't write licensing exams without an accredited degree.

Blanton told the *Idahonian* that the future looks good for the college while current statewide money problems have a good side, as well.

"To do the job as efficiently as possible requires constant self-analysis," and money shortages

force that, he said.

Blanton added that the college's top priority, a common one across campus, is increasing faculty salaries. He said faculty members in most larger cities can supplement their teaching incomes with money from their private practices but Moscow is somewhat smaller, making it very difficult to supplement teaching income. Faculty must be encouraged to do research, he said.

According to Blanton, while the art faculty will be part of the A&A college, students in the bachelor of arts program, like all bachelor of arts students, will continue to graduate from L&S. Candidates for bachelor of fine arts degrees, who take more professional courses and few liberal arts classes, will have degrees through A&A.

College status is a culmination of the growth in the program over the last 10 years, Blanton said, and as the only architectural program in the state, the college's duties and responsibilities will undoubtedly continue to grow.

UI law students will defend groups opposed to highway widening

Under fire, the third year law students staffing the University of Idaho Law School's law clinic finally have a case they can sink their teeth into.

The law students have been asked to represent the Idaho Bowhunters Association and the Idaho Wildlife Federation in a suit against the Idaho Department of Transportation. The suit arises be-

cause the hunting and wildlife people are against a proposed widening of an 87 mile section of Highway 12 along the Lochsa River.

The law clinic's preparation of the suit has drawn fire from Darrell Manning, Idaho Transportation Department Director, and Helen Chenoweth, a Boise lobbyist. Both individuals contend that it is not proper for one state agency, the

university, to oppose another state agency the department of transportation.

Other criticisms voiced by Chenoweth, stems from an apparent fear of propagating strictly environmental lawyers in the years to come.

This concern has been refuted by Cliff Thompson, dean of the UI College of Law, because he says the

university is definitely on the side of service to agricultural businesses, industry, and smaller businessmen and is not on the side of environmental entities.

Thompson went on to say, "The law clinic doesn't have a point of view about various issues. It has a responsibility once it has a client, to represent as well as possible the views of that client."

He added that any advocacy in the suit does not extend beyond the confines of representing the client's interests.

The groups opposed to the proposed highway widening say the probable increased speed of vehicles, including much grain truck traffic heading toward the port of Lewiston, would endanger the

lives of more animals on the highway.

Bill Leisi of Potlatch, district chairman of the Idaho Wildlife Federation, said the two hunter groups are even more concerned about human life in that section of road which has one of the highest accident rates in the state.

Road improvements are designed to safely increase traffic speed on Highway 12, which has scenic as well as commercial value as a grain artery from Montana and the Dakotas.

Safety improvements along the stretch of road include installation of turn lanes onto access roads and campgrounds, widening sharp curves, installation of guardrails and a request for stepped-up law enforcement patrols.

Attorneys for the plaintiffs are Scott Reed of Coeur d'Alene and Neil Franklin of Moscow. Franklin is director of the UI Legal Aid Clinic.

New L&S dean thinks college is strong despite poor finances

by Lewis Day
of the Argonaut

Galen Rowe faces numerous problems as he embarks upon his first year as Dean of the College of Letters and Sciences. Among the goals he has set are: increasing the visibility of the college, defining the role of the college, increasing concern for the quality of the "product", and increasing the competency of the graduates of the College of Letters and Science.

Rowe says the college has always been strong, and that bodes well for the future of not only the college but for the university as a whole. In terms of visibility however, Rowe points out that the very size of the college has often caused it to be obscured. The liberal arts field lends itself by its nature to a wide diversity. Extremes within the college run the range from humanities to the natural and physical sciences and the social sciences. This diversity can cause a blurring of the perception the public has of the college.

A key question Rowe asks of himself is "what will characterize the graduate of the College of Letters and Sciences in the future?" Rowe would like to see students become more aware of their college and to concentrate on the liberal arts portion of their education, as well as the specialization offered them by the department of their major. Rowe sees overspecialization as being detrimental to students; many employers are reluctant to hire L&S graduates who they see as being removed from reality (immersed in narrow fields of study). They are believed to be hard to employ. Rowe hopes the exact opposite will be true in the future for the liberal arts graduate from Idaho. He believes the L&S experience should make graduates highly desirable as employees. A degree in the liberal arts should indicate competency in areas of research, reading, and writing ability. Rowe sees this as, "The product of the college as a whole, as viewed in terms of competence."

While he welcomes the addition of the core

curriculum, Rowe sees it really as a compromise that doesn't go far enough. It will give students exposure to varied subject matter, but only on a generalized level covering only the first two years of study. Seeing the core expanded to cover the third and fourth years would suit Rowe and he wants to see continuity from the core carried on with upper division requirements.

Within the College of Letters and Sciences Rowe feels a heavier emphasis should be placed on the written word—reading, writing, and quantitative abilities. He would like a four-year writing requirement instituted in the college, especially in fields where writing is the "medium of discovery". Students are partly to blame, he says because they often take English 103-104 and that is the extent of their writing at UI. Rather than just concentrating on written exams, Rowe advocates a return to the "good old-fashioned term paper", with its emphasis on research and the development of sound argumentation with support from credible sources. He believes the UI Library is adequate enough for undergraduate research writing.

The College of Letters and Sciences is a victim of the financial crisis—along with the rest of the university, Rowe says and the college isn't being "singled out" for any special cuts. Rowe has faith in the UI Administration. They recognize the role L&S plays as a foundation of the university, he says. But Rowe does recognize the severe financial problems looming over the college, the foremost of which is inadequate salaries. He also feels that equipment and facilities are not up to par; that they're to the point of obsolescence. Requests for capital improvements (within L&S), are wholly true, Rowe says. "They're not just wish lists—they're real and realistic expressions of need." Advances in technology have outstripped the UI's ability to take advantage of them. Rowe notes with pride the fact that L&S faculty are keeping abreast of the latest in instructional aids and materials—even when they're unavailable at

continued on page 15

Argonaut photo/Deb Gilbertson

Galen Rowe and Apollo. Question: Which is a noted deity of the ancient world, and which is a noted Dean of Letters and Sciences at Idaho?

Are handicapped denied access?

A complaint contending that the University of Idaho is discriminating against handicapped individuals has been filed with the federal Department of Education regional office in Seattle.

Section 504 of the Rehabilitation Act of 1973, which prohibits discrimination on the basis of handicap by recipients of federal financial assistance, is the law allegedly violated.

The handicapped individual, who is urged to remain anonymous by signing a privacy waiver, claimed that some university services are not available to handicapped students because physical barriers to those students exist.

A report on the complaint in the *Idahonian* said the complaint calls the UI Bookstore, the Placement Center in the Faculty Office Complex, the UI Library, some residence halls and other buildings inaccessible.

Carol Franklin, UI Affirmative Action Officer, used words like "puzzled" and "frustrated" to describe her concern for the complaint.

Though Franklin said she had no particular negative feelings about the complaint, she said she wished the individual would have contacted her if there was a problem.

She called the university's addition of handicapped student accommodations a high priority item and added that if a problem is present, it is something that can be dealt with because of its priority.

The visible improvements around campus along with handicapped provisions in new married student housing buildings are things the affirmative action office on campus is proud of, Franklin said.

Larry Omo, director of the region's post-secondary education civil rights office, said a 1973 federal law requires that institutions receiving federal money be accessible to the handicapped.

Omo went on to say that it does not necessarily mean that every building needs to be accessible, rather every building that houses some university service must be accessible.

The regional office plans to have determined validity of the complaint by Nov. 16, which is just over 90 days after the university received it.

If a regional investigator upholds the complaint, he will have 90 days to meet with the university officials and the complainant to negotiate a solution.

If the university was then to disregard any request to cooperate, loss of all federal funds could result.

Franklin mentioned that a team was sent to UI from the regional civil rights office two years ago to investigate progress made in accessibility. No word has ever been received from them.

Omo mentioned that a team had been sent two years ago but blamed delay on a shortage of staff, and on higher priority being given to individual complaints than to compliance reports.

Committee tries to have sale of alcohol on UI campus approved

BOOZE

By Bobbi Humphries
of the Argonaut

A 12-member presidential ad hoc committee made up of students, faculty, staff and administrators has been formed to pursue the possibility of alcohol sales on the University of Idaho campus, ASUI President Eric Stoddard said.

The committee has drafted strategy in the form of a resolution to amend the State Board of Education/Board of Regents' policy governing the use of alcoholic beverages at the state's institutions of higher education. The resolution proposes the state give local autonomy to the separate institutions, provided that all regulations adopted by the university are authorized by the president of the institution and ap-

This resolution will be presented to the Board in December, Stoddard said.

The committee ultimately hopes to provide alcohol sale at the ASUI-Kibble Dome, the ASUI Golf Course, and the Student Union Building.

"We wanted to lend credibility to our cause and to encourage input from faculty and the administration," Stoddard said.

"We're trying to get input from students, the community and everyone," Stoddard said.

The resolution must first pass the ASUI Senate. It will then be forwarded to Faculty Council and the Alumni Association for approval in the form of a resolution, Stoddard said.

Stoddard, chairman of the committee, and Al Deskevich, student union food operations manager, presented the committee's plan to the Moscow Chamber of Commerce earlier this month when chamber president Don Bramer said he would send out a questionnaire to "hospitality" business owners to gauge opinion. Stoddard said he also plans to conduct an opinion poll at the football games to see if students want a change in the policy.

"The hardest part will be getting the Board to pass it in December. If it is instituted, we still will have a long ways to go to work out the specifics," Stoddard said. He estimated the policy could go into effect by fall semester next year.

The resolution lists 12 reasons for lifting prohibition in the state of Idaho. Among them are:

- Alcoholic beverages are currently available in 37 states under specified conditions at state institutions of higher education and those institutions report they have experienced few, if any, unfavorable repercussions;

- The average age of students attending UI is nearly 24 years of age, with 90 percent over the age of 19, and the percentage of those over the age of 19 who use alcoholic beverages socially is 90 percent;

- The absence of facilities at which alcoholic beverages can be served on campus has resulted in members of the university community seeking social activities away from campus and scheduling meetings, banquets and other gatherings at off-campus locations;

- Allowing the sale of liquor in properly regulated campus locations would make possible more adequate controls of consumption and more opportunities to foster mature drinking behavior.

Stoddard wanted to emphasize that ASUI is not advocating the consumption of alcohol. "We're merely trying to lift the prohibition to give the individual institutions a right to choose," he said.

Mayor Don Mackin expressed concern that the university alcohol policy might cause unfair competition with the Moscow establishments by charging lower prices. "Keep the competition fair and there's no problem," Mackin told the *Idahonian*.

Stoddard is convinced the prices on campus would be the same as downtown, if not higher, in order to promote fair competition and moderate behavior, he said.

"It is certainly not our intention to compete with downtown" he added.

UI asks that Ferguson case be dismissed

The University of Idaho has filed a motion for summary judgment in the \$1 million Homer Ferguson lawsuit against UI and Board of Regents officials. Ferguson is a UI zoology professor.

The motion for summary judgment, if accepted, will mean that the judge can make a decision in the case based on facts presented by both sides thus far. This would avoid the case ever going to trial.

In the motion, UI and Board of Regents officials say Ferguson was not denied due process, his privacy

was not violated, and the case is basically moot because Ferguson still works for the university.

Court papers say Ferguson "has not been deprived of his job, let alone injured sufficiently to close the door on other employment."

The motion filed for the university by attorney Don Farley asks that the case be dismissed because the grievances alleged by Ferguson do not exist.

Ferguson claimed that his rights to due process and free speech were violated, that he was libeled

and slandered by UI administrators and that his privacy was invaded during a competence review in the spring of 1980.

The university and regents denied and refuted all claims made by Ferguson.

In its competence review report of March 17, 1980, the review committee said Ferguson's research was of good quality, but that he relied too much on departmental funding. The committee said they found his attitude toward seeking outside funding "intolerable."

Ferguson has said the committee called him "mentally ill," but the court papers recently submitted by the university refute this claim by saying the committee actually suggested he consult "professional help to aid him in improving his teaching and interactions with other people."

The papers also say that UI President Richard Gibb does not intend to pursue dismissal procedures against Ferguson. Ferguson is on a sabbatical leave this fall for research.

Financial aid cutbacks cause increase in loans

More and more University of Idaho students are being forced to apply for guaranteed Student Loans because of cuts in many financial aid programs, according to Harry Davey, Director of Student Financial Aid.

The amount of money available for work-study, Supplementary Student Incentive Grants, National Direct Student Loans, and other college-based financial aid programs is down about 15 percent from last year, according to Davey. In addition, the maximum Pell grant (BEOG) award possible has been decreased from \$1750 to \$1670, while the average Pell award to a UI student has decreased by about \$70.

As a result, the number of loans has increased tremendously, said Davey. The Financial Aid Office has already processed more loans than were processed last year, he continued. "We've been processing as many as 50 loans a day through here," Davey said, adding that the Financial Aid Office expected to process four million dollars worth of loans during the 1981-82 school year.

The amounts of the loans are increasing as well, said Davey. Last year loans to students averaged \$2240, while this year loans are averaging \$2460.

But GSL loans will be more difficult to obtain after Oct. 1, warned Davey. After that date, if a student's family has an adjusted gross income of \$30,000 or more, the amount of money a student can get in a loan is based on need. The guidelines for determining need are to be set forth by Secretary of Education Terrell Bell, but according to Davey, this has yet to be done. "We haven't the foggiest clue about how need will be determined," said Davey.

Most financial awards have been sent out for the semester, said Davey, but the Financial Aid Office should be able to send a small number of awards from Sept. 21 to Oct. 1 to some of the more than 740 students on the financial aid waiting list. The awards will be made using funds received by the Financial Aid Office from loans and unclaimed financial aid awards. Davey said this should have already been done, but uncertainty surrounding proposed federal cuts in student aid programs earlier in the year prevented some awards from being sent on schedule. According to Davey, the Financial Aid Office normally sends out awards in April and July, but this year all awards were sent in mid-July. "We only had the chance for one sweep," Davey said. The outlook for next year is "somewhat confusing," he said. If current laws remain in force, Pell grants will increase slightly while other college-based programs will stay the same. However, more cuts in financial aid for students are possible, as well as more uncertainty and delays.

Who fries fries like new Kentucky Fries?

If you think french fries are good, wait until you try new Kentucky Fries. Look how they're made:

1. First, whole potatoes are sliced up into big wedges, with the natural potato skin still on.

2. We fry up the wedges golden brown. So they come out crispy outside, but stay nice and fluffy inside.

3. And we serve 'em up piping hot! We think they're so special we want to treat you to a free order. Just use the coupons below. And use them soon.

Try new Kentucky Fries for free. Find out how much better fries can be!

Computer Sciences Department formed

By Paul Dunster
of the Argonaut

This summer, a new department appeared on campus: the Department of Computer Science. This department is the product of blending programs from the departments of math, business, and electrical engineering.

The new department was formed on July 1 in response to the burgeoning number of students enrolling in computer science. Department head Joe Thomas said the number of students enrolled had increased from zero in 1977 to 168 in 80-81. This number is expected to increase by about 130-140 in the 81-82 school year.

The department currently offers both Bachelor's and Master's degree programs in computer science with options in either data processing or scientific computer use. The data processing option is aimed at students who wish to work in business and emphasizes systems analysis. The scientific option is more technical and is aimed at systems design.

Thomas said the department currently has about five faculty members and the major problem will be finding other qualified faculty. He said students graduating with a Bachelor's degree should be able to earn in industry about what the university could pay a Ph.D. to teach.

The number of students the department can handle will be limited by the number of faculty available. Thomas said if the current growth continues, they may have to limit enrollment within three years. The number of new students increased about 50 percent per year in previous years, but just about doubled this year. The department will be more concerned with quality than quantity, Thomas said.

Freshmen and sophomores enrolled in the program will use terminals connected to the main university computer on a time-sharing basis. Juniors and seniors will have access to a Hewlett-Packard 1000 as well as designing and building their own small computers. Depending on the option students pursue, they will receive training in FORTRAN, BASIC, COBOL, PL-1, and several specialized computer languages. Thomas stressed, though, that the computer scientist will go beyond programming into

the application and changes in the computer field. He said the computer is coming into all walks of life and the computer science department plans to support other colleges to prepare students for this growth.

The department's future plans include adding a minor in computer science and a program for seniors and graduate students who wish to specialize in database management. Also planned is a program for Very Large Scale Integrated Circuit Design (VLSI), that is, using a computer to design another computer.

Thomas said the advantages of computer science as an individual entity were a sense of identity, and more efficient administration and budgeting.

Controversy surrounds Institute

By Lewis B. Day
of the Argonaut

Controversy is a word that aptly describes the emotions and arguments surrounding the Institute for Resource Management at the University of Idaho and Washington State University. Much of the controversy is being generated on the Idaho side of the border, where the institute is under fire from several conservative and resource use groups. These include Boise lobbyist Helen Chenoweth, the Idaho Farm Bureau, the Idaho Cattlemen Association, and the Idaho Woolgrowers Association.

Many complaints center around the fact that actor-director Robert Redford (the "father" of the institute) is well known for his environmentalist stance. Opponents claim that the institute will adopt an advocacy role on the side of conservationist causes. Chenoweth uses two major points in her argument against the institute. The first is the entry of the UI Legal Aid Clinic into a case on the side opposed to improvements to State Highway 12 (opponents are concerned about possible detrimental environmental impact). Her second point is that the clinic is in support of the Nez Perce Tribe which opposes the Idaho Fish and Game Department. Officials from both the clinic and the institute have denied that there is

any link.

Dr. Wayne Hager, campus coordinator of the institute in Moscow, stated August 21 that the goal of the institute is to, "be an objective analyzer of development, without emotionalism entering in." Hager said 10 students have been selected at each school, and the names will be released early in September. The students will begin their course of study with the spring semester, with each seeking the Master of Science degree in Interdisciplinary Studies. Each student will concentrate on one or more of four fields in resource development: water, land, energy, and minerals. There will be some exchange between the universities, with students taking courses at both. Funding for the fellowships (which will be \$10,000 plus tuition and fees for each student) will come from an endowment fund currently being set up by Redford and executive director Hope Moore of Washington D.C. The yearly stipends will come from the interest from the \$6.5 million endowment fund. Moore has stated response among potential donors has been, "very favorable." A Los Angeles firm that specializes in fundraising has been hired to raise the endowment. Several resource-

utilizing firms (oil, timber and mining) have been contacted.

Responding to the criticism from Chenoweth and others, Hager has stated that "nobody is going to dictate to anyone what is going to be taught, or what needs to be taught." In an August 21 interview, Hager said the institute "...is totally separate from these institutions"—the UI Legal Aid Clinic, the National Wildlife Federation, the University of Oregon Natural Resources Legal Clinic, and other groups. Hager also stressed that as a non-profit educational organization the institute, "cannot be an advocacy organization." He noted that if the institute were to adopt an advocacy stance it would be in danger of losing its non-profit status.

Redford is scheduled to appear in Moscow and Pullman, Oct. 15 and Oct. 16 for receptions at both Palouse universities, a speech and two press conferences.

The schools are in charge of the guest lists which will include all regents as well as city officials. The first meeting of the institute's board of directors will also take place that week. So far, Moore, Redford and Redford associate Lois Smith are the only three board members.

ROWE

continued from page 11

Idaho. When asked about the immense funding difficulties facing the university, Rowe said those problems are, "part and parcel with those of the rest of the nation," and only when things improve nationally will they get better here. Foreseeing a growing problem with faculty morale, Rowe can envisage instructors resigning to take better paying jobs elsewhere. As other colleges and universities can pay more than the UI, the university will lose those teachers who simply can't afford to remain in Moscow at such low pay. All is not gloom however, and while there are strong negative prospects for the future, there are also positive signs too. Told he was "seeing light at the end of the tunnel", Rowe chuckled and said, "It's the only mentality to have, though pure Pollyannaism would be wrong." Speaking realistically, Rowe sees that the situation may well get worse before it gets better.

In the past 10 to 15 years the liberal arts degree has been under fire from many quarters, yet at Idaho enrollment in the College of Letters and Sciences has been constant and steady. In the future, Rowe sees the college holding its own, and perhaps even growing a bit. Despite the many problems facing him as Dean of the College of Letters and Sciences Rowe maintains that, "The University of Idaho has had a tradition of students, faculty, and alumni being very devoted to the institution. That tradition has to be a major reason for optimism."

1981 Rush drops none

Rush activities on campus have created excitement for fraternities and sororities.

Sorority rush began August 14 with 206 women, later losing 11 to residence halls.

All 195 women who wanted to join sororities were accepted by one of the nine houses on Squeal Day, August 19. This is the first time that every woman wanting to join a sorority was accepted, said Bruce Pitman, assistant dean for student advisory services.

Fraternity rush began August 19 with approximately 340 men participating in rush related events leading to acceptance in a house.

These men will be offered bids from the houses throughout the week. Fraternities expect all house rushee positions filled by the end of the week.

Pitman said nearly 100 percent of the men wanting to join a fraternity will be accepted.

The Delta Tau Delta mudslide was one of many activities Greek Rush had to offer. Argonaut photo/Deb Gilbertson

Housing Director says no more housing is available

Students looking for on-campus and off-campus housing this fall may encounter a few problems.

Ron Ball, assistant director of housing, said approximately 100 more students have requested rooms in residence halls than are available. Maximum occupancy of the halls is limited to 2050 students.

The remaining students have been put on waiting lists and will be staying in guest residence halls such as McConnell, Ball said.

But, Ball added, two to three percent of students who have reserved rooms in residence halls don't claim their rooms. After today the remaining students will be

placed in any unoccupied rooms.

There are several reasons for the large demand for rooms in residence halls Ball said. The cost of living in a hall is less expensive than an apartment. Room and board is less than \$200 a month.

There are also advantages to living on campus besides being within walking distance of university facilities. Ball said, the residence halls provide custodial services and most meals are prepared for hall residents.

Off campus housing is equally limited. All of the large apartment buildings were filled by the first of August.

Scott Hecht, manager of Russett Square Apartments, said his 40 units were filled by July.

All 112 units in Blaine Manor were filled by July 12, said Keith Livermore, manager.

Connie Fletcher of Otto Hill Apartments, said all 40 units were filled by July 15.

Hawthorne Village has also filled its 120 units, according to a

spokesman.

Gay Richins, manager of Towne House Apartments, said their 40 units filled the first week in June.

And all 16 of the new apartments

on the corner of Styner and Main streets were filled by the first of August, said Don Hingston, owner.

Many students have been placed on waiting lists if apartments should become available.

U.S. District Judge donates law books to UI law school library

More than 433 volumes summarizing the major federal court cases for the last 227 years have been donated by U.S. District Judge Ray McNichols to the University of Idaho Law School.

"We have a great feeling for the university and especially the Law School," said McNichols, who has chosen to go into semi-retirement this summer.

The law books, U.S. Reports, contain descriptions and excerpts from U.S. Supreme Court cases

dating back to 1753, and are used by law students and attorneys for research in preparing briefs. The books became a second set for the U.S. District Court in Moscow when the court moved out of its quarters in Coeur d'Alene. McNichols, a 1950 graduate of the UI Law School, said other federal courts declined the offer of the books.

Consequently, McNichols said, he decided to give them to the UI Law School where more use can be made of them. A new set of books would cost about \$4,600.

KOZE DJ - his own critic

A look at the Jay McCall behind the microphone

By Christopher Smith

With a cloud of cigarette smoke still issuing from his mouth, he clicks open the microphone switch, starts the next record and begins to introduce the song in a smooth, resonant voice that keeps pace with the quick rock and roll beat.

"It's 11:40 on a Wednesday night with Jay McCall and I've got brand-new music from the Jefferson Starship... this is called 'Find Your Way Back' on KOZE!"

The microphone is turned off and the pale red "On Air" light fades. He turns up the volume of the studio speaker hung amidst glossy posters of various record artists, and begins to imitate the singer, dancing and mouthing each word of the song along with the record.

This is "pop" radio. Or Top-40, or contemporary, or teen. There are more terms to describe the format than there are stations on the AM radio dial. And this is Terry Wright, better known to the area nighttime audience as Jay McCall, a man the public has affectionately labeled a "disc jockey." He's on Lewiston's KOZE, at 1300 on the AM dial.

"You know, when I was nine years old, there was this guy on KNEW in Spokane who called himself Charlie Brown. I listened to him a lot and one day I told my parents, 'That's what I'm going to be. A disc jockey.' And for the past four years, that's what I've been," says the small, half-shaven announcer.

Wright grew up in Spokane, then attended college at Eastern Washington University in Cheney where he majored in theater and radio broadcasting. After two years of college, he returned to Spokane and went to the Ron Bailey School of Broadcasting, a private school which trains students in radio broadcast-

"Sometimes I think for the amount of money Ron Bailey cost me it wasn't worth it, but they helped me get my first "real" job in radio at KGA," Wright says. KGA is a country-western station in Spokane where Wright worked for approximately a year, sometimes enjoying it and other times wishing he was anywhere else.

"Working at KGA made me realize one important thing: How much I didn't know about radio. Here I was, this young kid fresh out of broadcasting school with the idea in my head that I was damn good. That job opened my ears and showed me how far I really had to go before I could say to myself, 'Hey, I'm, pretty good,'" he says.

Wright says even today he is always

working to improve himself on the air, but the process is slow and sometimes discouraging.

"I'm my own critic," he says, "and when I listen to myself on tape, I know when I'm not sounding as good as I can be, or when I screw up. I feel I set pretty high standards for myself."

"But you know, one of the great things about radio is people are listening and waiting for you to make a mistake, whether it's mispronouncing a word or starting a record at the wrong speed. And I don't think there's a jock in this station who doesn't have a story about his own classic mistake on the air," Wright laughs.

Wright talks about the many changes in radio disc jockeys in the last 10 years,

from the "Boss" sound of the early '70s to the personal sound of today.

"Remember back in '71 and '72 when all the big stations were into reverb and echo? There would be a jock with a gut-level voice sounding like he was screaming from the bottom of a cavern at you," he says. "Stations were experimenting with new equipment and jocks were trying out new styles, trying to be 'hip'."

Today though Wright says, the current trend is to communicate on a one-to-one basis with the radio audience and not come across as a "showbiz" entertainer.

"If I don't sound like your friend, you're not going to listen," Wright says bluntly. "When I open that mike, Jay McCall had better be his usual crazy, laughing self or people won't really listen. It doesn't matter if Terry Wright just had his engagement broken or just got a speeding ticket. On the air I have to put on another new personality, unattached somewhat from the real me... and that personality is Jay McCall."

Wright crushes his cigarette amongst countless other butts in the restaurant ashtray, slides another Merit Extra-Long from its pack and bounces the filter end on the table a few times before lighting it.

"You see, I feel if I'm not having fun, you're not. And if you're not enjoying yourself, then you'll reach for the radio dial to find someone who can make you laugh or think," he says. "So I've got to have fun. It's my job and if I don't do it, well, then I probably won't be around long."

Wright says the job market in radio is small and highly competitive. He says he feels the pressure of the competition every day he works.

East End Addition
ASUI Kibbie Dome

Projects

A Dome roof suit, dome roof repairs and bids over estimate for East End Addition could lead to a rather "wet" financial situation

When the ASUI-Kibbie Dome and East End Addition projects first sprouted in the 1970's they quickly became a source of controversy. Now, it looks like several new controversial aspects will carry over into the 80's as the projects become one of the University of Idaho's biggest headaches—literally.

Because an infrared scan of the Dome roof last April revealed rot and leaky areas, the UI Board of Regents filed a \$2 million lawsuit in late June against the architect, contractor and the consultants involved in the Dome's construction. The University charges that all three contributed to the faulty roof. The \$2 million is to cover redesign and replacement of it.

Meanwhile, work on the temporary roof covering for this winter is behind schedule and is fast approaching its mid-September deadline. Student workers have made up most of the work force this summer and with school starting, the work force is going to be short. This could mean Vandal fans in the Dome for the first home football game Sept. 5 might have to practice puddle-jumping. If it rains that night, the roof will leak, said Sandra Haarsager, director of the UI News Bureau.

The East End addition has also stepped into the financial spot light again. Bids received by the university July 29 were \$150,000 above the estimated cost of the project. Still—construction is proceeding while officials look for ways to trim economically. In more detail ...

THE SUIT

The Dome roof suit filed by the university itemizes the problems with the roof and gives six options on which to argue for the damages requested. The three companies named in the suit are Emerick Construction, from Portland, Oregon; Cline Smull Hamill Associates, a Boise based architectural and engineering firm, and Coultrap Consulting Services, Inc. from Phoenix, Arizona.

According to the *Summer Sun* in July, a conference between two of the parties to the Dome roof law suit was called "a very good meeting with nothing conclusive decided," by Patrick Sullivan, attorney for the university. The meeting was held to see if agreement could be reached between the parties (the university and Emerick Construction) and to decide how to fix the leaking roof.

According to Sullivan, plans for the permanent fix of the Dome roof should be made by Oct. 1 and getting those repairs done by next summer will depend on a settlement,

a successful trial or the university's ability to find other funding in the interim.

Since the filing of the suit, only two different actions have been taken. At the end of July, the architecture firm of Cline, Smull and Hamill Associates requested disqualification of Moscow's Second District Judge Andrew Schwam. A new judge has not been reappointed in the case but the plaintiff or defendant in a lawsuit is entitled to disqualification of one judge without giving a reason. Either John Maynard or Ronald Schilling, Second District judges from Lewiston, will probably be appointed.

Then, on August 15, the university filed a request for all proposals, agreements and contracts between Emerick Construction Co. and its subcontractors. McGregor Triangle, Trus Joist Corp., Urethane Inc., and Western Applicators Inc. are several subcontractors involved with that request.

Types of documents included in the request are correspondence related to the design, bidding, negotiations and contracting of work for the Dome roof. Also requested by the university are any diaries, logs, calendars, personal or company notebooks connected with the project, inter-office communications, meeting notes and telephone conversation notes. Similar papers from both the other defendants are also being requested.

Sullivan and Nels Reese, UI facility planning director, both hope the lawsuit will be resolved by next spring.

THE REPAIRS

Gradual repairs to the Dome roof have been made since the first leaks were reported in 1976. Emerick construction corrected that first problem but leakage and deterioration of the Dome's structure continued. Now, Physical Plant Director Ken Hall said 189,000 square feet of plywood and foam must be replaced and covered with a precipitation-proof roof.

A Detroit consulting firm is working on a fool-proof roof that will not fail as the others did. Hall said the Dome has been subjected to the same forces causing the collapse of several other long-span buildings in the U.S.

The Trus Joists, the main supporting beams of the Dome have been rotted by moisture that seeped through the roof's polyurethane foam insulation. The joists just need repairs, Hall said, and there is no need for replacing them in the near future.

In the meantime a thick insulated plastic material will be

used to cover the plywood during the start of the Vandal football season.

EAST END

Despite bids \$150,000 over estimates, the East End Addition and Memorial Gym renovation is continuing to be ready for the 1982 school year, according to Reese, director of facility planning. But these are optimistic hopes, he has said.

The East End Addition was divided into 27 different components and total bids received were \$3,661,000. The estimated cost of the addition was \$3,246,000. So the construction bids have been \$415,000 above the estimated cost. But the construction manager, Hagadone Construction Co. of Coeur d'Alene said building racquet ball courts in the new addition instead of the Memorial Gym will reduce costs overhead from \$415,000 to \$150,000.

Reese said the \$150,000 is not too intimidating. "We're looking at other ways of cutting the budget other than cutting rooms or programs," he said.

Reese said it is always difficult to keep programs afloat when finances dwindle. "It is tricky work but we can find ways of getting around the construction costs and save the quality of the building and the programs."

"The offices and lockers won't be plush, by any means," Reese admitted, "but they will be economical and of quality material."

Hall, physical plant director, told the *Idahonian* it was possible to shave \$2,000 to \$5,000 here and there by using new construction methods without reducing the scope of the project.

An additional bit of controversy to the East End project is the fact that the designer for the East End is Glen Cline, of Cline Smull Hamill Associates which designed the Dome and is one of three defendants involved in the dome roof suit. The university's contract with Cline, Smull and Hamill was made before the suit was filed.

Reese shrugged off the issue. "It's not the first time something like this has happened," he said. "The state just can't break off contracts because of something that went wrong in the past."

"It does put some stress on the working relationship," Reese admitted, "but if we can just keep going ahead and concentrate on the job before us, we can keep the two incidents separate in our minds."

Roof workers Brian Harden and Erin Collins "pry harder" in stripping soaked foam from the Dome rooftop.

Complete text of ASUI-Kibbie Dome roof suit

Roof Composition

Comes now the plaintiff and for cause of action against the defendants alleges:

1. The Board of Regents of the University of Idaho (hereinafter called "Regents") is a constitutional corporation established under the law and constitution of the State of Idaho.

2. Emerick Construction (hereinafter called "Emerick") is an Oregon corporation, licensed to do business in the state of Idaho.

3. Cline Smull Hamill Associates (hereinafter "Cline") is a professional corporation organized and existing under the laws of the State of Idaho, with its principal offices at Boise.

4. Coultrap Consulting Services, Inc., (hereinafter "Coultrap") is believed to be and it is therefore alleged to be an Arizona corporation with its principal offices at Phoenix, Arizona.

5. In March 1970 the Regents entered into a written contract with Cline for architectural and engineering services and construction inspection related to the design and construction of a covered dome over the existing football stadium at the University of Idaho, such dome to hereinafter be referred to as the "Dome." That contract is attached hereto as Exhibit "A".

6. In connection with a part of its duties, Cline prepared the contract and the plans and specifications, including design criteria for the Dome, all of which were put out to bids in 1974.

7. Emerick was the successful bidder on the Dome Project and the Regents entered into a contract with Emerick on November 18, 1974. A copy of that contract and general provisions thereof is attached hereto as Exhibit "B".

8. The technical specifications are too voluminous to copy and are therefore incorporated herein by reference.

9. Under the contract Emerick assumed responsibility to furnish all design, labor and required materials and perform all work as required by and in strict accordance with the contract documents.

10. In connection with its responsibility under the contract, Emerick submitted a design for the dome roof and structural system utilizing a trus joist structural system manufactured by Trus Joist Corporation, Boise, Idaho.

11. The trus joist structural system and top chord of such system constitute part of the roof system of the Dome.

12. The top chord of the trus joist is 1-7/8 inches thick and made out of laminated wood.

13. Over this roof deck is an overlayment of 3/8 inch plywood which has been mechanically fastened to the trus joist roof deck, overlaid by a sprayed-in-place polyurethane foam and a final

roof surface of approximately 8 to 15 mills of a product known as Hypalon.

14. This structural system was submitted to Cline for approval and upon its approval was utilized for the actual construction of the Dome. The construction was certified as substantially complete by Cline on October 31, 1975. The Board of Regents accepted the project on May 4, 1976.

15. During the period of construction Cline performed onsite inspection of the work being performed by Emerick.

16. On November 15, 1976, the first leak in the roof occurred which resulted in corrective action by Emerick. In May 1977 Emerick and Cline were advised of continuing roof leaks which resulted in repair of approximately 20,000 square feet of roofing during October 1977.

17. Over the winter of 1977-1978, additional leaks occurred and it was discovered the roof leaks, condensation, vaporization or other numerous problems were causing the polyurethane material to soak up and cause dry rot in the plywood underlayment.

18. In February 1978 Coultrap was employed to determine the cause of the problem and to make recommendations as to corrective action.

19. Acting upon the advice of Coultrap, a new membrane for the outer surface of the roof called Diathon was applied to the entire Dome roof structure area, as well as removing and replacing all of the damaged polyurethane and plywood.

20. Based upon the representations of Coultrap and Cline that the application of a new membrane would cure the problems being encountered with the roof, the University expended some \$23,755 to purchase the Diathon material. The labor for the installation of the Diathon was provided by defendants.

21. Additionally, the University expended \$8,606 for Coultrap's fees, \$262 for other experts and test costs of \$3,651, for a total of \$35,885.

22. The roof was inspected a year later by Coultrap which issued a written report dated July 2, 1979, indicating that the roof dome was in good condition, with no evidence of serious on-top water leakage.

23. In November 1979 dry rot was discovered within the plywood sheeting by KKB&A Engineering, a firm which had been retained by the University to make certain inspections of the roof structure.

24. Over the period of 1980 through 1981, further studies were conducted to determine the extent of the dry rot and attempt to determine the cause of the leaks and moisture which was continuing to be encountered in the polyurethane foam material.

25. In April 1981 the roof was electronically scanned with an infrared scanner to determine areas of unacceptable moisture. This study was done by RUPO Technical Services, Inc., of Oak Creek, Wisconsin.

26. The results of this inspection were that approximately 50 percent of the roof area had unacceptable moisture, damaged polyurethane roof insulation, the membrane of Diathon-Hypalon was in poor to very poor condition and that there was substantial dry rot. Additionally, that the dry rot was such that the entire dome roof could soon become structurally unsound if repairs were not made immediately.

27. The RUPO report indicated improper application and thicknesses of both the original application of Hypalon and original application of polyurethane foam.

28. The Regents believe and therefore allege that the type of roof system recommended, including the use of the Hypalon and the insulation system was not fit for the purpose intended and designed.

29. The Regents also allege that defendants became aware in 1978 that there had been improper application of the roofing system during construction, that the design was improper, and that there was no way to effectively remedy or repair the defect and that the defendants concealed this fact from the Regents.

30. As a result of the above, it has been determined that it will be necessary to redesign and reconstruct the entire roofing system at a cost of approximately \$1,500,000.00 to \$2,000,000.00.

COUNT ONE

Breach of Implied Warranty of Fitness

31. The Regents reallege paragraphs 1 through 30 and incorporate the same by this reference.

32. The deficiencies in the design of the roof are such as to make the Dome unfit for its intended purpose, thereby breaching defendant Emerick's and Cline's implied warranty of fitness of the design.

COUNT TWO

Breach of Duty to Supervise

33. The Regents reallege paragraphs 1 through 30 and incorporate the same by this reference.

34. Defendants Emerick and Cline had an express and implied obligation to supervise not only the construction work, but to correct any known, suspected or apparent design error. Both Emerick and Cline failed to accomplish these duties, thereby breaching their duty to supervise the construction phase of the contract.

COUNT THREE

Negligent and Defective Design

35. The Regents reallege paragraphs 1 through 30 and incorporate the same by this reference.

36. Defendant Cline and defendant Emerick in their professional and contractual capacities owed a duty to plaintiff to exercise reasonable care in the design and construction supervision of the Dome. Both Emerick and Cline breached such duty by failing to exercise ordinary care or that degree of care exercised by members of their respective professions and industries. Further, Emerick's work was not done in a workmanlike manner. Such breach of duty has resulted in said damages and all of such damages were the proximate result or cause of plaintiff's damage.

COUNT FOUR

Breach of Contract

37. The Regents reallege paragraphs 1 through 30 and incorporate the same by this reference.

38. As a direct and proximate result of the acts, neglects and breaches of express contractual duties and the failure to perform their implied contractual obligation, and the failure to correct the

same during construction, or during the 1978 repair period, defendants Cline and Emerick are in direct breach of their written contracts with plaintiff. This breach of contract is the proximate cause of plaintiff's damages.

COUNT FIVE

Negligence and Breach of Contract

39. The Regents reallege paragraphs 1 through 30 and incorporate the same by this reference.

40. Defendant Coultrap in its professional and contractual capacities owed a duty to plaintiff to exercise reasonable care in the review and evaluation of the existing problems being encountered on the Dome roof as well as its recommendation for repair and/or replacement of the same.

41. Coultrap was negligent and breached such duty by failing to exercise ordinary care or that degree of care exercised by members of its profession and industry. Such breach of duty has resulted in plaintiff relying on the advice of Coultrap that the interim repairs of 1978 were adequate to solve its problems, when in fact they were not.

42. Plaintiff's damage in this regard will be proven at trial.

COUNT SIX

Fraudulent Concealment

43. The Regents reallege paragraphs 1 through 30 and incorporate the same by this reference.

44. Defendants Emerick, Cline and Coultrap, in their respective expert, professional or contractor capacity, knew or should have known that design deficiencies existed in the Dome roof, either during construction or during the 1978 period of defect in repair.

45. All of these parties had a legal duty to disclose the same to plaintiff under either their contractual obligation or by the nature of their fiduciary responsibilities to the plaintiff.

46. Contrary to each party's respective obligations to disclose known or suspected design deficiencies, the parties concealed the same, both as to their cause and as to the nature and extent, thereby resulting in plaintiff's failure to discover the cause of said problems until long after substantial completion, all to plaintiff's detriment, the extent of which is not known at this time. The damages for such detriment will be proven at trial.

WHEREFORE, plaintiff prays for damages against the defendants as follows:

1. Under Count One of the Complaint in the amount of \$1,500,000.00 to \$2,000,000.00, the exact amount to be proven at trial, together with plaintiff's costs and disbursements necessarily incurred herein, and plaintiff's reasonable attorney's fees.

2. Under Count Two of the Complaint in the amount of \$1,500,000.00 to \$2,000,000.00, the exact amount to be proven at trial, together with plaintiff's costs and disbursements necessarily incurred herein, and plaintiff's reasonable attorney's fees.

3. Under Count Three of the Complaint in the amount of \$1,500,000.00 to \$2,000,000.00 the exact amount to be proven at trial, together with plaintiff's costs and disbursements necessarily incurred herein, and plaintiff's reasonable attorney's fees.

4. Under Count Four of the Complaint in the amount of \$1,500,000.00 to \$2,000,000.00, the exact amount to be proven at trial, together with plaintiff's costs and disbursements necessarily incurred herein, and plaintiff's reasonable attorney's fees.

5. Under Count Five such amount as will be proven at trial, together with plaintiff's costs and disbursements necessarily incurred herein, and plaintiff's reasonable attorney's fees.

6. Under Count Six such amount as will be proven at trial, together with plaintiff's costs and disbursements necessarily incurred herein, and plaintiff's reasonable attorney's fees.

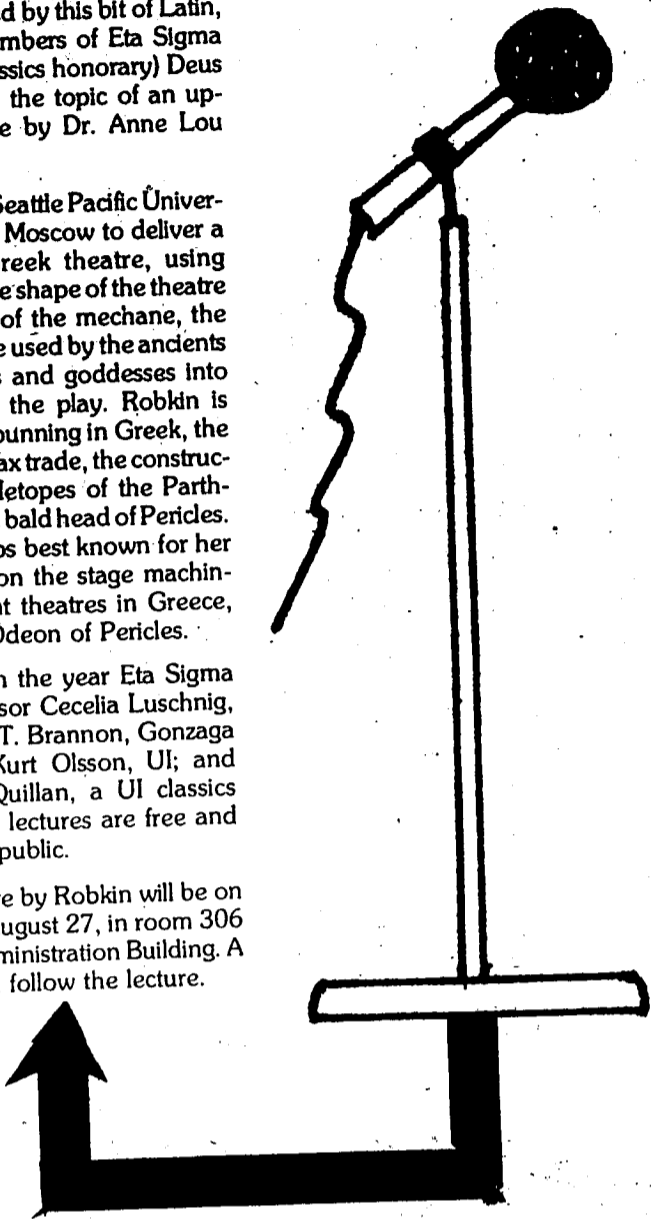

Guest speaker to give lecture for classics fans

Deus ex Machina. That phrase conjures up Well, the uninitiated may be stymied by this bit of Latin, but to the members of Eta Sigma Phi (the UI classics honorary) Deus ex Machina is the topic of an upcoming lecture by Dr. Anne Lou Robkin.

Robkin, of Seattle Pacific University, will be in Moscow to deliver a lecture on Greek theatre, using overlays on the shape of the theatre and a model of the mechane, the flying machine used by the ancients to bring gods and goddesses into the action of the play. Robkin is interested in punning in Greek, the Mycenaean flax trade, the construction of the Metopes of the Parthenon, and the bald head of Pericles. She is perhaps best known for her publications on the stage machinery of ancient theatres in Greece, and on the Odeon of Pericles.

Later on in the year Eta Sigma Phi will sponsor Cecelia Luschnig, UI; Father P.T. Brannon, Gonzaga University; Kurt Olsson, UI; and Connie McQuillan, a UI classics student. The lectures are free and open to the public.

The lecture by Robkin will be on Thursday, August 27, in room 306 of the UI Administration Building. A reception will follow the lecture.

Engineering pays most

Engineering graduates once again received the highest average salary offers this past spring, according to the College Placement salary survey, said Chuck Woolson, career planning and placement director at the University of Idaho, which participated in the national survey.

Salary offers for the 11 bachelor's level engineering disciplines increased from 10 to 14 percent since 1980, reported the survey. Sixty-five percent of all offers reported were made to engineering students, even though they comprised only seven percent of the bachelor's degree candidates in 1980-81.

At the other end of the spectrum were students majoring in the humanities and social sciences, who made up about 33 percent of the graduates at the bachelor's level. They received only four percent of the job offers reported in the survey. Salary offers were about \$10,000 less per year for these students than for engineering students.

The business disciplines represented 22 percent of the bachelor's degree offers nationally, with the highest salaries going to accounting majors.

Of the science majors, which accounted for nine percent of the bachelor's degrees, computer science had the most offers but physical and earth science majors received the highest salary offers.

The CPSS data are based on offers, not acceptances, made to college students in selected curricula and graduate programs. The survey involves 184 placement offices in 161 colleges and universities in the United States.

Cable TV to help teach

University of Idaho students in several colleges and departments will soon be able to review lectures and watch supplementary materials using a new campuswide cable system.

The system, termed an audiovisual-autotutorial system, will serve as a supplement to instruction at UI, according to Anthony Rigas, director of Engineering Continuing Education.

"We're not going to replace the classroom teacher with television," said Rigas. Instead, the cable system will allow professors to show additional material such as taped talks by experts. Professors may also tape their own lectures so students can review them later.

Students apparently learn as well or better watching the tapes as they do listening to their teacher's presentation, said Rigas. Many universities and community colleges now use systems similar to the one planned for UI, he added.

"They find it very acceptable," said Rigas.

The cable system will eventually be connected to more than 100 lo-

cations in 28 buildings on campus, with monitors for individuals and groups, according to Rigas.

The colleges and departments to be included in the system are agriculture, education, foreign languages, law, communications, home economics, business and economics, engineering, forestry, biological sciences, mines, veterinary sciences, music, and art and architecture. The library will also be included in the system.

The system should be operational by the end of December but will be limited at first, according to Jim Meyer, senior communications technician for Engineering Continuing Education. The two-way cable system will allow as many as six different programs to be sent to each location simultaneously. The system will also be capable of broadcasting live programs but only from Janssen Engineering Building and KUID since they are the only two buildings with "origination equipment," said Meyer.

About \$75,000 has been earmarked by the UI Foundation for the initial development of the system.

THE BLACKMARKET YARD SALE/ SPORTSWEAR SHOW

WHERE: SUB Vandal Lounge

WHEN: August 28 & 29

From 12 noon til 8 pm both days

Last Year's Inventory **MUST GO!**

We need room for incoming shirts

and Jerseys

All Shirts will be sold at **WHOLESALE Cost**

This will be the largest one time
Sale in the Blackmarket's History

DON'T MISS IT !

BLACKMARKET

Anything left after 8 pm Saturday
will be offered to outside distributors!

Buddy Notes

by Bobbi Humphries
of the Argonaut

A notetaking service might come into being at UI next semester, according to Eric Stoddard, ASUI President. Stoddard has been working on the idea with Andrea Reimann, a recently elected ASUI Senator and administrative assistant to the ASUI President, and Mike Borden, appointed administrator of the supplemental lecture service.

The program would consist of hiring notetakers to attend large introductory classes. Their notes would then be printed and sold by the ASUI at the Country Store at the Student Union Building, Stoddard said. The notes would serve only as a supplement to the course and in no way could be used as the sole source of material needed to

pass the class, Stoddard said.

The service would be offered only for classes with the highest enrollment where individual attention to students is rare. The instructor would have the option to utilize the service, Stoddard said. To date, eight instructors have agreed to give the service a try, he said.

The same type of program is currently in operation at Washington State University and has been for approximately 10 years, according to Borden. There is also a notetaking service offered at UCLA, he said.

Stoddard said there has been some opposition by faculty members who fear the program will "spoon feed the kids through college," Stoddard said.

"The funny thing is, I've received more negative reactions from those faculty members who wouldn't even be affected," he added.

One possible abuse of the system would be a decline in class attendance. Stoddard said this hasn't happened at WSU or UCLA where they have had full utilization of the program.

Stoddard said he and his assistants conducted a mail vote of the senate over the summer, but there weren't a sufficient number of votes submitted to pass or fail the resolution. Therefore, the program will not be enacted until next semester, he said.

"The physical layout for the service will begin this semester," Stoddard said.

UI dump to become well site

A total of 817 cubic yards of contaminated soil were removed from an old University of Idaho chemical dump to make way for a new well for the city of Moscow this summer.

The dump, operated from 1972 to 1979, was located on a hilltop behind the Palouse Empire Mall and contained "everything from motor oil to pesticides," according to Carol Grupp, UI risk management officer. The chemicals were dumped into trenches about 12 feet deep and then buried. They weren't encased in sealed containers, said Grupp, in order to "reduce volume and to hasten the breakdown of the chemicals to further reduce their toxicity."

Grupp said flammable material were often burned before the residue was buried to further reduce the possibility of dangerous chemical reactions taking place.

In addition, said Grupp, workers from Environmental Emergency Services of Portland, Ore., the firm contracted to remove the dump, wore protective clothing and masks.

The trucks used to remove the soil were lined with plastic. After being loaded, the contaminated soil was covered with another layer of plastic and a canvas sheet before being transported to a dump near Arlington, Ore., operated by a firm called Chem-Security.

Extensive tests were performed, said Grupp, to ensure that all contaminated soil was removed. "They were even picking up the cleaner used on the glassware," said Grupp.

After the completion of the project, the Idaho State Department of health approved the drilling of the new well about a quarter of a mile downhill from the old dumpsite, said Gary Presol, Moscow city engineer. Drilling has begun and the well, estimated to cost about \$450,000, should be completed in a "couple of months," said Presol.

Tests were also conducted at two other old UI dumps at the same time, said Grupp. They were a landfill used during the 1950's and a dumpsite used for radioactive waste. Both were given clean bills of health, according to Grupp. In addition, the holes drilled at the site of the radioactive waste dump can be used to continue monitoring it if deemed necessary.

The total cost to the university was about \$168,000 for testing and hauling of the soil.

Wastes are now stored on campus until a truckload has accumulated, then taken to WestConn, near Grandview, Idaho to be disposed of. In the future, said Grupp, that may change. Wastes may all be taken to the Arlington, Ore. dump instead.

Dance classes

Ballet, gymnastics, aerobics and jazz are only a sample of the classes the Palouse Dance Theatre offers.

The Dance Theatre will be registering for its fall and winter classes Wednesday and Thursday from 5-7 p.m. at St. Mary's School.

Classes to be offered include a children's program, which combines tumbling, dance and drama. This program is for children four through eight years. Ballet and gymnastics are open to children, ages 8 and up. Adult classes will feature ballet, aerobic dance, jazz, exercise and flexibility and conditioning for runners.

For more information and registration call 882-3177.

Tryout now Dance

The University of Idaho Dance Theatre will be holding auditions for anyone interested in participating in their fall concert.

Tryouts will be Thursday at 7 p.m. and Friday at 12:30 p.m. in the Dance Studio of the Physical Education Building.

The Dance Theatre's first concert will be presented October 30 - November 1 in the Hartung Theatre.

Theatre

Auditions for two University of Idaho theatre productions are open to students and other residents of the Palouse.

Tryouts for William Saroyan's *Time of Your Life* will be at 7 p.m.

tomorrow and Thursday in the Hartung Theatre. A cast of 18 men and 7 women will be needed. Director Roy Fluhrer is looking particularly for three actors who play the harmonica, the piano or tap dance.

Time of Your Life will be performed October 16 - 18, and 23 - 25 at 8 p.m. in the Hartung Theatre.

Auditions for the second production of the season, *Betrayal*, will be at 7 p.m. Friday and 1 p.m. Saturday in the Hartung Theatre. One man and woman will be needed for this play.

Betrayal will be directed by Forrest Sears and will be performed December 4 - 6 and 11 - 13 at 8 p.m. in the Hartung Theatre.

Tenured faculty may sue UI over job elimination

Two University of Idaho tenured faculty members, whose appeals for reinstatement were rejected by the State Board of Education, say they are conferring with attorneys over possible lawsuits, the *Lewiston Morning Tribune* reported.

But, the *Lewiston Morning Tribune* reported, neither Jane Derr Betts nor Lois Pace has made a firm decision to sue the university.

Formal notification of rejection of appeals by the state board had not been received by the two university extension faculty members. The regents rejected their appeals after hearings June 21.

Pace, who was extension professor and expanded food and nutrition program coordinator until July 1, said the three faculty members who appealed were told they would have notification within 30 days of the June 21 meeting.

Steve Berenter, the board's attorney, said the faculty members will receive written notification in mid-August. They will then have 30 days within which to file suit.

Last Spring, the legislature cut \$412,000 from the UI Agriculture loyees were eliminated, including ten tenured employees. Betts and college's cooperative extension and research programs and 24 employees, along with John Jacobs, an associate professor of animal sciences and associate meat specialist based in Moscow, were among those fired. Jacobs has been hired by another learning institution in California at higher pay.

Hours

SUB

This year the SUB will open one hour earlier than previous years. The snack bar will be open Monday-Thursday 7 a.m. to 10 p.m.; Friday 7 a.m. to 8 p.m.; Saturday 8:30 a.m. to 7 p.m. and Sunday 9 a.m. to 8 p.m.

The grill operates weekdays 7 a.m. to 7 p.m.; Saturday 10 a.m. to 7 p.m. and Sunday 11 a.m. to 7 p.m.

The Satellite SUB will be open weekdays 7:30 a.m. to 3:30 p.m.

U of I BOOKSTORE

The UI Bookstore will be open 8 a.m. to 5:20 p.m. weekdays and 9 a.m. to 1 p.m. on Saturday.

Library

Beginning Tuesday, August 25, the UI Library will be open 8 a.m. to 11 p.m. weekdays, 9 a.m. to 11 p.m. Saturday, and 1 p.m. to 11 p.m. Sunday. During holidays and spring recess, the hours will be only 8 a.m. to 5 p.m. weekdays.

Student Health Center

The health center will be operational 8 - 11:45 a.m. and 1 - 5 p.m. weekdays and 9 - 11 a.m. Saturday. Doctors will be on call at Gritman Memorial should students have an emergency at the center after 5 p.m. on weekdays.

Kibbie Dome

The ASUI-Kibbie Activity Center will open from 7 a.m. to 4 p.m.

weekdays while weather is good and 7 a.m. to 10 p.m. this winter and 8 a.m. to 10 p.m. weekends.

Swim Center

The UI Swim Center will be open for swimming from 7:30 to 8:20 a.m. weekdays to all students, staff and pass holders. Other hours will be posted at the building after registration.

Financial Aid Office

The Financial Aid Office will be open 8 a.m. - 12 p.m. and 1 - 4:30 p.m. weekdays.

The Underground and Physical Education Buildings will announce their hours after registration for P.E. classes in those buildings is complete.

UI entomologist performs surgery on "really neat" female mosquitos

By Marlene Fritz
UI News Bureau

That pesky mosquito may seem to be putting her life on the line recklessly for a taste of your blood, but two biological mechanisms sharply limit the number of times she takes that risk.

Dr. Marc Klowden, an entomologist who joined the University of Idaho College of Agriculture staff in June, said the female mosquito needs the protein in a blood meal to mature her eggs. Once that blood meal is taken, however, "stretch receptors" in her bloated abdomen tell her it's no longer necessary to continue feeding.

A hormone produced by her ovaries only while eggs are maturing also appears to trigger an end to blood-feeding and therefore risk-taking.

Only the female mosquito takes blood meals. Males, who have spongy rather than piercing mouth parts, sop up nectar from flowers.

"There's always a lot of danger in biting," said Klowden. "There's always the possibility of being swatted. The mosquito takes her life in her hands when she feeds on blood. So, through the millions of years that mosquitos have been around, a mechanism has evolved that controls blood-feeding—an internal switch to not seek a host even

in the presence of external stimuli."

Klowden said research on these "really neat little insects" continues because of their importance in the transmission of malaria, filariasis (which can cause elephantiasis), dog heartworm and several viruses.

Because the longer a mosquito lives, the more likely she is to acquire a transmittable parasite, Klowden's research, supported by the National Institutes of Health, is also addressing the effects of age on the mechanisms that inhibit blood-feeding. An "old" mosquito may feed about seven times in her three weeks of life, Klowden said.

In addition, Klowden will try to identify the substance and site of production of the hormone which tells the egg-carrying mosquito to stop seeking a host. "There is a possibility of controlling blood-feeding behavior, and transmission of disease, by manipulating the insect's hormonal system," he said.

Klowden's research uses microsurgical techniques to operate on the female mosquito. When he cut the nerves that communicate "that bloated feeling" to the mosquito's brain, she kept on feeding, not realizing she was full and eventually even bursting. Performing other experiments which involved the

removal and transplantation of ovaries, and the transfusion of one mosquito's blood into another, he found that the "stop feeding" message originating in her ovaries traveled via hormones, not nerves.

He uses an olfactometer to measure the response of mosquitos to host stimuli. Into this clear plastic apparatus, Klowden places his arm, protected by a screen. Then he breathes through an opening in one end. This gives the mosquitos all the tempting host stimuli they need. He watches to see if they respond, after getting a whiff, by approaching his arm.

Klowden plans to use these techniques with agricultural insects where similar systems may be operating. He said the ovaries of some of these insects may produce a hormone which initiates egg-laying in response to stimuli from host plants.

Klowden will be teaching insect physiology and insect morphogenesis at UI this fall. He received a Ph.D. in entomology from the University of Illinois in 1976 and spent five years studying mosquitos at the University of Georgia, first as a postdoctoral fellow and later as a research scientist on National Institutes of Health funding.

Pitman new dean

Bruce Pitman is now dean for student advisory services, after moving up from the assistant dean's spot. Pitman is filling a position that has been vacant for the past year since the resignation of Jean Hill.

As the new dean, Pitman will oversee such programs as minority student advisory services, special student services, the student judicial system, international student and student exchange programs, veterans programs, and the women's center. Dean Pitman will report to Terry Armstrong, executive assistant to the president and coordinator for student and administrative services.

Pitman came to the University of Idaho from Purdue University, where he received his undergraduate degree in guidance and counseling. He received his master's from the UI.

In 1973, Pitman began work as assistant Greek living groups advisor. He became assistant dean in 1977.

Library restricts circulation

The University of Idaho Library has discontinued the circulation of periodicals, journals and magazines, on an experimental basis.

In the *University Register*, Richard J. Beck, Associate Director of Libraries, pointed out that the library staff spends a great deal of time checking stacks of periodicals trying to locate materials.

The inability to find periodicals quickly from the stacks has brought complaints from students, faculty, and staff.

Beck noted that the library has a limited staff who cannot get the periodicals checked in and reshelfed immediately during busy

times.

He said most of the articles are short enough to be read in the library anyway.

Another problem is that users often don't distinguish between the loan period for regular books and the more limited (three-day) loan period for periodicals. Periodicals are often overdue before notices can be sent out and the penalty structure has caused the library some ill will.

Beck added that there are now four photocopy machines in the library and it is expected that a fifth will be added at the beginning of the fall semester.

Big Brothers, Sisters needed

Friends, Unlimited of Moscow, with help from United Way, is again sponsoring the Big Brother/Big Sister program this year.

Each big brother or big sister has their own "little brother" or "little sister" with whom they spend a few hours a week.

Requirements to be a volunteer include being more than 18 years old, liking children and being able to commit to one year in the program.

According to Karen Huls, director of Friends, Unlimited, the year's

commitment can be negotiated for college students. Huls interviews each volunteer and requests reference letters. Utilizing interests and hobbies, volunteers are matched with a child.

There are about 80 children now in the program. There are, however, a number of children waiting for a big brother or big sister.

Huls can be located at the Friends, Unlimited office at the Latah County Courthouse, room 201. The phone number is 882-7562.

Gem staff at work

A returning editor and a semi-experienced staff will tackle the job of publishing the *Gem of the Mountains* yearbook this year.

According to Gary Lundgren, yearbook editor, the staff will take orders for the 1982 edition at registration. The underclass portrait session will also be in the dome on registration day. There will be no charge for the yearbook portrait.

Lundgren said senior and graduate students should make appointments for the senior portrait session at the Gem table during registration. Senior portraits also are free and will be taken at the SUB starting August 27.

This year's book will feature 264 pages, with 16 in full color. Last year's book had 256 pages with only 8 in color. The book will sell for \$14 again this year.

Lundgren said he was pleased

the *Gem* will contain more color, and was even more jubilant the price would remain the same.

The basic format will be the same as last year. The *Gem* will continue to be hardbound and delivered in the spring.

The only major change in the book, according to Lundgren, will be the writing style. The editor plans to use more feature material. "I want the writing to be lively and interesting," he added.

Lundgren said this year for the first time photos will be captioned, so individuals in the photos can be identified.

Lundgren, who was the assistant editor last year, is the first *Gem* editor since 1977 with prior experience working on the staff.

Most of Lundgren's assistants have had some *Gem* experience.

"Drunk bus" to begin inter-city bus service

The Washington State University student government-subsidized Pullman to Moscow bus run will begin today.

The bus run, intended to minimize the number of intoxicated student drivers on the road between the university cities, begins despite light use last semester.

Rick Norris, the WSU student coordinating the fall bus run, said he hopes the name "booze bus" or "drunk bus" does not haunt the service as it did last semester.

Norris felt that the name hurt business.

In an *Idahonian* report, Norris said the biggest change in the busing program will be a switch to Friday from Saturday nights. He said he also hopes an aggressive fall promotional campaign will boost ridership.

Inadequate promotion last spring was blamed for the poor ridership then.

The idea to form the bus service was initiated by the WSU student government, because of the obvious numbers of WSU students on the road to Idaho to take advantage of the lower drinking age here.

Norris said the Associated Students of Washington State University has budgeted a \$2,400 subsidy to operate the bus.

Norris was quoted by the *Idahonian* as saying, "The subsidy should see us through the first seven runs and if the bus catches on, we may run longer."

Norris also said it appears Empire Lines of Spokane will provide the bus.

A round trip ticket will cost \$1.50. Norris added that Moscow students will be able to ride the bus as well.

He said further, "I'm hoping we'll have something different this fall and that we can improve on last spring."

MWAC- Looking to the future

Eight Western schools are looking into forming a new women's athletics conference consisting of schools of similar size and type for the chance to compete on a regional basis.

Plans for that conference which would involve the University of Idaho and seven other schools were announced by Kathy Clark, UI assistant athletic director and head of women's athletics.

"We have about reached the final stages of forming the conference that will involve eight schools," said Clark. "When we reach the final form, the conference proposal will be thoroughly evaluated on each campus by athletics and university administrators with a view toward possible implementation in 1982-83. A tentative date for commitment to conference membership has been set for November 1, 1981."

The new conference would be known as the Mountain West Athletic Conference which, Clark said, depicts the geographic orientation of all potential member institutions.

It would also include Portland State, Boise State, Eastern Washington, Weber State, Montana State, Montana and Idaho State. The teams will compete in conference play in basketball, volleyball, tennis, indoor and outdoor track and field, cross country, gym-

nastics and softball. A championship will be offered in each sport with each institution sponsoring a minimum of six sports.

"Right now, many of our women's teams are competing in different leagues, and the NCAA impact and eventual national governance structure has competition in turmoil. No one knows who's doing what," Clark said, explaining that forming a new conference is a move toward the future.

Loess lost

The co-ed residence hall policy of Grey Loess has been disbanded for the academic year because of lack of interest in a co-ed hall.

Ron Ball, assistant director of housing, said there are only 30 returning hall members. Of the 1,000 students reserving rooms there were no requests for a co-ed hall.

The hall has been divided so that third floor will join with Oleson and fourth will be connected to Whitman.

The future of a co-ed hall will depend upon the needs and requests of students during the year.

Risks of pill linger

A study has shown that women who took birth control pills for several years suffer two to three times the normal number of heart attacks.

The study said the effects linger for as long as nine years in those women tested who were in their 40s.

"The impact on the country as a whole will be small, because the prevalence of oral contraceptive use for five or more years is modest," Dr. Dennis Slone, who directed the study, said in an interview.

Physicians have known for several years that women are more likely to suffer heart attacks while using the pill. But until now, they believed that the increased risk disappeared after the women gave up this birth control method.

The new study shows that the heightened risk lasts for nearly a decade and perhaps longer.

The latest study was conducted at Boston University Medical School, the Harvard School of Public Health, and the Department of Research Medicine, University of Pennsylvania School of Medicine. It was published in last week's issue of the *New England Journal of Medicine*.

An estimated 25 million women around the world take birth control pills.

SIXTH & MAIN - NEXT TO THE FIRESTATION

Don't eat tonight.

Save yourself for **Pizza Haven's \$3.95 Wednesday Night Smorgasbord.**

If you were thinking about eating dinner or a little snack tonight, here's a word of advice from Pizza Haven: Don't.

You'll need all the room in your stomach you can get for the Pizza Haven Smorgasbord, Wednesday night from 4 to 9.

You get all the salad you can eat. Then we'll serve up all the pizza you can put away. You can even try some of those toppings you've never had the nerve to order.

All this is just \$3.95 for adults, and only 30¢ per year of age for kids 12 and under.

So don't eat tonight. Come to Pizza Haven tomorrow. And get the best deal on pizza going around today.

Pullman E 420 Main 334-2535

DJ

continued from page 16.

"There are very few stations that you can feel comfortable at," he says. "I think I can say that at least 70 percent of all disc jockeys will get fired from their first gig. I wish I could tell you why, but I really don't know what causes it."

Wright says all his co-workers at the station have been fired at one time or another in their careers.

"I guess it's part of the business, but let me tell you, when it happens, it hurts for a long time," he says.

He takes a long drag on the cigarette, leans back in his chair and says, "It's always intrigued me that an actor has someone write all his lines, coach him on how to speak them, tell him where to stand, and if he doesn't get it right they can shoot it again. I do the same thing, six days a week, five hours a day, live. And maybe I'm paid a fiftieth of what the actor gets."

Wright says radio is a unique medium because the listener can talk back to the box, whereas in

other mediums the communication is harder than just dialing up the request line.

"When you see something you don't like on TV, chances are you won't call up ABC and complain. But by God, if I'm not doing something right or if someone doesn't like the song I'm playing, they'll let me know," he laughs.

Wright says, "You know who calls me most of all, though? People who need a friend. Kids whose parents aren't paying attention to them. Jay McCall has to be a friend, sometimes I think even a father, to some of these kids who are mixed up. It's sad.

"But I guess that's why I stay in this business because I feel maybe this Jay McCall character is doing more than just collecting a paycheck every few weeks. Maybe I'm really helping people out because let me tell you, Jay McCall has a lot of friends," Wright says.

Wright lights up another cigarette and says he believes most disc jockeys have trouble dealing with the conflict between their real selves and their air personalities.

"I remember reading in a trade magazine that a survey concluded in 1978 said 78 percent of major-market disc jockeys are schizophrenic. I believe that's true. Sometimes I have a problem remembering who I am when I'm not on the air. That may sound funny, but when you work to develop an image or personality for radio, it's hard not to take that personality home with you," he says.

Wright says this conflict can hurt other people, too. He says, "Of all the disc jockeys I've known, there wasn't one who wasn't either divorced or insecure in relationships. It can get you down.

"Why am I suicidal?" he asks as he pulls up the sleeves on his jacket to reveal scars on his wrist.

"I know my limits, though. I don't think I'd ever get so discouraged with my job and life to do it... to kill myself. But sometimes the pressure comes in waves and it's easy to lose sleep over problems at the station. But that's part of it," he says.

Wright says he wants to stay in radio, come what may, because of the contact with people. He says there will always be a need for a live person in the broadcasting marketplace.

"People talk about automation and prerecorded voices being the future of radio. In some stations that might be appropriate, but I still feel people want someone to talk to them, to joke with them and maybe even to make them laugh a little. I can't see a computer ever taking Jay McCall's personality, no matter how much you pay for it," he laughs.

continued from page 9

said chairman Lynn Strom. (Kristin David Reward Fund, P.O. Box 3021, Moscow).

A scholarship fund in Kristin's memory was also started. Contributions are to be sent to the Kristin Noel David Memorial Scholarship Fund, care of the UI Business Office in Moscow.

Although law enforcement agencies are keeping up their efforts to find Kristin David's killer, they haven't released any new information. Officers have toyed with throwing bicycles over the Red Wolf Crossing Bridge and are examining an August 12 discovery of rusted 10-speed style bicycle handlebars. These were discovered a mile east of the bridge from which Kristin's body was believed to have

David graduated from Lewiston High School and attended Lewis-Clark State College. She had an apartment in Moscow and attended St. James Catholic Church.

She is survived by her mother and stepfather, Sally J. and Ned Munger of Bend, Ore.; her father and step-mother, John W. and Beverly Ann David of Longview; seven brothers: J. Lane David, Redmond, Ore.; J. Lynn David, Lewiston; Stuart S. David, Kenneth (Ked) David, and Donald (Nick) David, all of Bend; two sisters: Anne Mackey, and Colleen Thorson, both Lewiston; a paternal grandmother, Agnes J. David, Pierre; and maternal grandparents, Eugene and Gwen Schliessmann, Pierre.

been thrown into the river.

In the minds of many, death isn't supposed to be violent. Somehow, everyone figures the process, when the time comes, will be painless. Kristin David's murder has been described by law officials as "heinous." But the hurt of her death and the nightmares in the minds of many women her age have explained to the Palouse community more clearly than national statistics that violent, brutal acts are happening everywhere.

Kristin David was born Dec. 23, 1958, in Pierre, S.D. to John W. and Sally J. David. She lived in Pierre until 1969 when the family moved to Longview, Wash. In 1974 the family moved to Lewiston, where she lived until her death.

Extra time?

People Notes

...Craig MacPhee, professor of fishery resources, who has served the University of Idaho and the state 24 years will be honored at a retirement brunch at University Inn Saturday, Aug. 29 at 11 a.m.

A social hour at the home of Professor C. Michael Falter 736 Homestead Place, will precede the brunch, beginning at 10 a.m.

...James H. Milligan has been appointed chairman of the UI Department of Civil Engineering.

Fred J. Watts, former chairman of Department of Civil Engineering has returned to full-time teaching and research.

...James H. Peterson has been appointed chairman of the UI Department of Electrical Engineering.

Joe E. Thomas, former chairman of the Department of Electrical Engineering is now chairman of the new Department of Computer Science.

...Susan Burcaw, director of UI Continuing Education has resigned to accept an administrative post with the University of California at Santa Cruz.

...Dr. Marc Klowden, who received a Ph.D. in Entomology from the University of Illinois in 1976, has joined the UI College of Agriculture staff and will be teaching insect physiology and insect morphogenesis this fall.

...Tom Richardson, director of the UI School of Music will take over Glen Lockery's position as director of the Vandaleers Concert Choir.

Lockery led the choir for the past 35 years and will now help with the Vandaleers Endowment Fund, a new songbook of Idaho songs and the Vandaleers Christmas Concert on a part-time basis.

...Floyd Peterson, a UI music professor who was on sabbatical leave last year will return to the classroom this fall to teach music theory and history and coordinate the School of Music graduate program.

...Nick Thorpe, UI graduate assistant will take over John Harbaugh's (assistant professor of music) trumpet studio while Harbaugh is on leave studying for his doctoral degree.

Tom Lyons, music lecturer will fill Harbaugh's position as director of the new varsity pep band and the jazz band Harbaugh normally handles. Lyons holds a bachelor of music degree from UI and a master of arts degree in piano from the University of Iowa.

...Robert Probasco, UI associate professor of music, was invited to discuss his work with classical holographs at the 10th annual International Double Reed Society conference in Lubbock, Texas.

events

Tuesday, Aug. 25

... An all-student dance will be held outside Wallace Complex this evening. The dance is sponsored by the residence halls.

Wednesday, Aug. 26

... A College Work Study meeting will be held at 7 p.m. in Room 113 of the UCC.

Thursday, Aug. 27

... Flying Machines and Other State Conventions of the Ancient Greek Theatre will be the topic of a lecture by Dr. A.L.H. Robkin. The lecture will be presented at 7:30 p.m. in Room 306 of the Administration Building. Sponsored by Eta Sigma Phi, the talk is free and open to the public.

... A College Work Study meeting will be held at 4 p.m. in Room 113 of the UCC.

A particularly helpful advertisement from Stereocraft

Selecting a stereo.

Selecting a stereo system is more than just a matter of taste. It is the process of finding the most (quantifiable) performance for your dollar. How much sound will a system produce and how cleanly? How much of the full musical range does it reproduce?

Because we at Stereocraft spend a great deal of time listening to, and evaluating, all kinds of audio equipment, we can supply a helpful summary of what performance characteristics can be had at what price; what you will gain if you spend more; and what you will lose if it is necessary to spend less.

SYSTEM 259

Our new \$259 stereo system is really a spectacular bargain designed to blow your mind but not your budget. It is an integrated three-piece system from Advent.

The small convenient receiver/center section has an FM stereo tuner (with a unique double-arrow tuning system) and a powerful amplifier whose frequency response is exactly tailored to match Advent's excellent two-way, acoustic suspension loudspeakers. The result is a sound much larger than the speaker size. It is capable of handling inputs from turntable and tape decks.

What your dollar buys.

With a limited budget (\$200-\$450), you can get a system of reasonable accuracy, but it is necessary to sacrifice response at both ends of the musical range to get a satisfactory acoustic output (loudness). A system in this price range is most appropriate in a small listening area.

With a moderate budget (\$450-\$650), you can get a system which provides accurate musical reproduction in every respect, with sufficient output for a medium-sized room. If you like music very loud and have a very large room, you can select a different kind of system that gives up some musical accuracy (bass response, usually) in order to get higher sound output level.

With somewhat more to spend (\$650-\$1000), you will be able to get a system that combines completely satisfying accuracy with ample output for the largest of listening rooms. A system in this price range will include features that add to the ease of operation and which help to preserve your records.

SYSTEM 429

Our \$429 system with an Hitachi receiver and turntable, loudspeakers by Advent, and Shure cartridge is a true component system at a price you'd usually pay for a "component-type" system (the ones that sound like appliances instead of music).

Examples.

We have selected a system from each category that will offer the best possible value for your particular number of dollars. When you come in to talk to us we are confident that we can convince you of one thing: we can probably furnish you with a better music system for less money and with better service than you are likely to get elsewhere.

SYSTEM 649

Our \$649 system is built around a really remarkable pair of loudspeakers from Boston Acoustics. The A-70's go as far up the frequency scale as any speaker at any price and their bass equals that of far more expensive ones.

To power them properly we've chosen the Yamaha R-300 stereo receiver with clean low-distortion performance and the ability to get all the FM and AM stations along the dial.

For getting all the music off your records and treating them gently in the process we chose the Yamaha P-350 semi-automatic turntable with Signet's fine TK1E cartridge.

Come in and see for yourself how true our headline really is.

The toughest job you'll ever love

We admit it. It takes a different kind of person to be a Peace Corps Volunteer. We won't mislead you with glowing pictures of exotic lands. The hours as a volunteer are long. The pay is modest. And the frustrations sometimes seem overwhelming. But the satisfactions and rewards are immense. You'll be immersed in a new culture, become fluent in a new language, and learn far more about yourself than you ever expected.

You'll also discover that progress in the Peace Corps is measured in small accomplishments. Such as rural health clinics established in Kenya. Irrigation systems built in Upper Volta. Fresh-water fish ponds started in the Philippines.

The progress may seem modest, but to people in developing nations who have never before had clean drinking water, basic health care, or enough to eat, the Peace Corps brings a message of hope and change.

We invite you to look into the volunteer opportunities beginning this year in 65 developing nations. See our representatives for details.

Academic honorary picks athlete

MOSCOW, Idaho—It has been said that a college athlete can't be successful on the playing field and in the classroom, too. Each activity takes too much time away from the other.

But Robin McMicken, a 1979 graduate of Lewiston High School, is the exception to that rule.

In her second season of competition for the University of Idaho women's track and field team, she also runs for the Vandals' nationally-ranked cross country squad in the fall.

Complementing McMicken's athletic talents is a 3.8 GPA in a secondary education and social science major and a double minor in psychology and coaching.

She was selected for membership in the freshman academic honorary, Alpha Lambda Delta. Her academic success is all the more significant since she is in-

involved in athletics from early September through late May, with potentially less time to study than most athletes who compete in only one sport.

According to Idaho women's track and cross country coach, Roger Norris, McMicken doesn't let track dominate her college career.

"I tell all of my athletes to keep sports in the right perspective," said Norris, "and Robin's a prime example. She's not at Idaho just to run."

But run she does, from the start of cross country in the fall to the end of track in the spring.

In her first season on the cross country squad, McMicken was one of the Vandals' top seven runners whose team placed ninth at nationals. As a sophomore, she again ran in the top seven for UI and helped her squad to a fifth place finish at nationals.

"Robin has been a very steady, solid performer for us," said Norris. "She's been among our top seven consistently in every race."

During the track and field season, McMicken competes in the 3000m (2 miles) and the 1500m (1 mile) races.

Besides participating in two sports and maintaining a high GPA, McMicken has been active as a member of the Kappa Alpha Theta sorority. She is serving as the chapter chaplain and as the rush recommendation chairman.

McMicken, of Scottish ancestry, is hoping to attend the University of Edinburgh next year in Edinburgh, Scotland. She would stay in Scotland for one year.

But until plans are finalized, McMicken will remain at Idaho along with her younger brother, Doug, who runs for the men's cross country and track and field teams.

New class credits bowlers

It's still too early to tell the exact composition of Idaho's bowling team this year, but coach Leo Stephens is confident it will once again be strong.

"Mike Fischer will be back to lead the men and we've only lost one member of last year's women's squad, so overall it's getting bigger and better."

Last season's program resulted

in the team competing at the first level of nationals for schools affiliated with the Association of College Unions International.

Something new which should spark more interest on campus is the addition of Club Sports, P.E. 107-Sec. 10. Enrollment in this class will give bowling participants as well as rugby and soccer players college credit for their effort, just as

varsity athletes.

"Participation is the key here, we try to involve as many people as we can and we're always looking for bowlers," Stephens said.

People interested in bowling competitively should contact Stephens at the game room office in the SUB basement.

Benefit race scheduled

The First Annual Sundae Social Fun Run to benefit the North Idaho Children's Home will be held Sunday, September 20, with entries due September 7.

The 5.05 mile course begins 1:00 p.m. at the Lewiston side of the Confluence (at mile marker by statue) and follows the levee path

south to Hellsgate State Park Group Shelter.

A \$6.50 entry fee will pay for an original design sundae shirt and one ice cream sundae at the end of the race.

Entry blanks with further information are available at the SUB information booth.

GEM

★ Contemporary

The 1982 **GEM OF THE MOUNTAINS** yearbook covers the year like it's never been covered before. With creative approaches. Eye-catching headlines. And informative features which explore all aspects of college life. This year's GEM will also contain more color pages.

★ Traditional

The GEM will be hardbound and delivered in May before you go home for the summer. The yearbook will continue to feature student portraits and group photos of the organizations and living groups on campus.

★ Your Portrait

Your portrait will be included in the yearbook **FREE**. Underclass portraits will be taken on registration day in the Kibbie Dome, or the following day at the SUB. **Seniors** should make an appointment at the GEM table during registration, for the senior portrait session Aug. 27-Sept. 11 at the SUB.

★ Order Your Copy

Be sure to order your copy of this outstanding yearbook at registration. You'll be pleased to know the price is still \$14, and the book will feature more pages and color than last year's. We'll simply mark your registration packet and you can pay for the GEM along with your other fees. All you have to do is say "yes" to the GEM on registration day!

Jerry Davitch: Success doesn't go to his head

By Kevin Warnock
of the Argonaut

Entering his fourth year as head football coach, Jerry Davitch has accomplished perhaps more than any other UI coach of recent history, building the foundation for a winning program. But if you ask him about it, he won't take credit.

"We owe everything to a supportive administration, student body and booster club. I'm not taking any of the credit except for the fact that we haven't screwed it up on our end," Davitch said.

The change over the last four years from when Idaho was 2-9 to last year's 6-5 mark has involved a commitment not so much on the part of the coaches, but rather administrators and other powers-that-be to establish a program and make it successful or not bother at all and have a losing proposition.

"An athletic program is like a house in that it needs to be maintained. You can't build it one year and walk away," Davitch said. "It's an expensive proposition, I don't deny it."

Student, alumni and Vandal Booster support for the total intercollegiate sports effort has increased dramatically and enthusiastically. In Davitch's first year the Vandal Booster budget totaled \$62,000. This year \$250,000 is expected to come in and will be used expressly for scholarship aid to athletes.

It won't pay the total bill, which is around \$300,000, but it's a noticeable increase.

Another benefit of the new-found revenue has been the expansion of the Memorial Gym weight room into a Nautilus center open to all students, staff and faculty.

"When we first came to the university the equipment room was a mess. Not only did the uniforms look bad but the equipment was unsafe," Davitch said. "Through individuals stepping up and making contributions we were able to throw that junk in the garbage where it belonged."

In 1981 Davitch points to the completion of the ASUI Kibbie Dome with the addition of the east end as required "maintenance" of the athletic programs at UI.

"I don't call the east end an addition because it's not a luxury. If someone added a bathroom to their home they wouldn't call it an addition," Davitch said.

For \$25, anyone can become an official Vandal Booster. In essence, every student going through registration becomes one twice over, contributing \$50.00 to intercollegiate athletics.

"We realize that," Davitch said. "We point out to our players 10 times a year every student makes a heckuva contribution. It's not something I or my players are unaware of."

Just as important as getting the revenue is getting the support of the fans and students. "When I first came to Moscow, I went to a varsity men's basketball game where there

Back in black

Idaho returns 8 of 11 defensive starters

Vandal radio network expands

When the University of Idaho football team kicks off its 1981 season schedule on Sept. 5th against Simon Fraser in Kibbie ASU-Dome, 13 radio stations throughout the state and one station in Eastern Washington will be carrying the live action, making it the biggest football network in the state.

The 14-station network will cover all of Idaho's game this sea-

son which will be originated by flagship station KRPL-Moscow (1400 khz). Bob Curtis, the "Voice of the Vandals" the past 21 years, will handle the play-by-play and Jerry Geidt will sit in for the second consecutive season commentator.

Dennis Deccio, station manager for the flagship station, said many of the stations have been on the network the past several years. The newcomers this season include

both the Spokane and the Boise stations.

"We are pleased to have a fine station like KSPO. Many Vandal boosters in the Spokane area join the network as well as KFXD in Nampa which will allow Vandal boosters in the entire Boise-valley to listen to Vandal games. We are pleased to add these two fine stations to an already strong quality network."

Gold Rush 81

Vandals return 15 starters

By Kevin Warnock
of the Argonaut

The consensus for Vandal football fortunes among the experts is that the Silver and Gold will finish the Big Sky Conference season in second place. That's nice, but with a little luck or at least good fortune, Idaho coach Jerry Davitch says "this team could be very good."

"We're excited—we lost very few people off last year's team and we still only have nine seniors on our two-deep roster right now," he said.

For the first time in Davitch's Idaho career, the depth is where a coach would like it to be, with all 44 on the two-deep roster scholarshiped. "They will be a winning team and we've never said that before this year," Davitch said. "I surely didn't say it last year."

OFFENSE

Idaho's veer offense became the number two rushing attack in Division I-AA football during 1980 and that backfield returns entirely intact.

"We don't see a Herschel Walker but we've got solid runners in returning starters Russell Davis and Wally Jones; John Buren will be a tremendous addition," Davitch said.

Davis, a 5-11, 181-pound senior from Renton, Wash., was second team all-conference last fall but has been plagued by a cracked tibia in his left leg which occurred during the 1979 season.

Terry Ilder, who rushed for 678 yards last season is out of action but may be able to rejoin the team in about a month, according to trainer Ken Kladnik. The 1978 Big Sky Conference Newcomer of the Year who redshirted the 1979 season, Ilder has undergone knee operations on both legs.

Jones, a junior from Boise, has had a good week of practice along with Buren, who rushed for 1300 yards last year at Olympic Junior College.

The toughest decision on offense is at the quarterback position where Mark Vigil is pushing the "Kamiah Kid" Ken Hobart to the wall for the starting berth.

Both are back 100 percent after suffering knee injuries during practice last spring. "I've never been associated with two quarterbacks of their caliber before," Davitch said.

After just one season, Hobart became the number three all-time touchdown passer in Idaho history, tossing for 13 while leading the team in rushing with 820 yards.

"While I was at the Air Force Academy, we tied UCLA the year they won the Rose Bowl and we came within a minute of beating Notre Dame, plus we barely lost to undefeated Penn State. We never had an athlete at any position as good as Kenny or Mark," Davitch said.

Davitch also contends either one would start for the veer offense of the Houston Cougars, a team expected to battle Texas for a berth in the Cotton Bowl. "They really are that good," he said.

The coaching staff will be forced into making a decision of red-shirting one or moving one to another position.

Up front, Bruce Fery and Steve Seman, a 6-2, 256-pound junior, return to form what Davitch calls the best blocking tandem in the conference.

"Maybe somebody has a better right guard or even tackle, but nobody has a pair as good as those two," he said.

Fery, a senior, is being pushed for All-American honors at 6-4, 264 pounds. "He's got the tools, all he needs is to go out and play like an All-American," Davitch said. "Hopefully he'll win all of his battles. We've come to expect that of him."

For the other spots on the offensive line there is tremendous competition, and also at tight end where Tom Coombs enjoyed a big season in 1980.

DEFENSE

Eight of eleven starters return on defense for the Vandals and Davitch believes strong replacements have been found for those who did graduate.

"We were concerned with the loss of Carlton McBride at cornerback, but Howard Wilcox is as fine a player right now, we believe," Davitch said.

Lloyd Williamson, 6-4, 225 pounds, is expected to replace Larry Barker at right end. Williamson, who started as a sophomore, runs a 4.7 40 yards and is every bit as good an athlete as Barker, according to Davitch. "He's tremendously quick—we don't feel we've lost anything there."

Anchoring the left end position is Jay Hayes, a definite pro prospect at 6-6, 230 pounds, Davitch says. Frank Moreno will be backing him up after starting two games last season.

Dave Frohnen, a 6-3, 230-pound junior, returns at left tackle and also runs a 4.7 40-yards.

John Fortner, 6-3, 230 pounds, will also take a starting job with 4.7 40-yards quickness.

Also back at tackle with Frohnen is Kevin Auxler, a 6-4, 227-pound junior. "Our tackles are going to be as fast as our linebackers," Davitch says.

And those linebackers will be the best in the conference, according to Davitch.

Tennis squad expected to be stronger

The Idaho men's tennis fortunes promise to be better this year than last with two top recruits and proven line-up of veterans returning.

The Vandals are the defending Big Sky Conference Northern Division champions.

According to asst. coach Scott Moreland, Suresh Menon will be returning to the team after a one year absence and should be one of the squad's top competitors. Ranked number one in Malaysia, Menon has competed in the Junior Wimbledon Championships.

Closer to home, Bjorn Morfin will play high on the roster as a freshman. Morfin, from Portland, Oregon, was the Oregon state high school boys singles champion and

has been ranked as high as number two in the Northwest for juniors.

Seven athletes will return for Head Coach Jim Sevall including seniors Doug Belcher, Mike Maffey, Tim Hoffnagle, and John French.

Belcher, a three-time Idaho high school state champion from Boise's Capital High School is expected to rank high on the squad and has been ranked number one in the state before for men's singles.

Maffey, also from Capital High, was the only Vandal to win a Big Sky championship last year doing it from the number six singles position.

Meng Kai Fong compiled one of the squad's highest win percentages last season playing out of the number four position. Competing

as a junior this year, Fong has been ranked as high as third in his native Malaysia.

Mike Daily, formerly a New Mexico high school champion, will return second semester from Albuquerque. He played number one last year for Idaho.

John French, a senior from Moscow, is the final returnee. "We're expecting high things from him," Moreland said.

Fall activities for the team will be centered around getting in shape and practicing hard. "We'll play in Portland, October 17, and at Provo, Utah over Labor Day in the NCAA Indoor Nationals for our only competitions," Moreland said.

Women netters return under Sevall

With the loss of only one player off last year's women's tennis team, the new job of coaching both men's and women's squads should be a little easier for Sevall and Moreland.

"As far as coaching both men's and women's tennis goes, Jim (Sevall) thinks it is a good way of going and so do I," Moreland said. "It might be tough at first, but it will work out best in the long run for the quality of the program and

economically."

Four seniors return this fall to lead the team including Ellen Cantrell, from Bakersfield, Cal., Kristi Pfeiffer, from Colorado Springs, Colo., Karin Sobotta, from Hermiston, Ore., and Joy Yasumishi, a JC transfer from Treasure Valley Community College in Ontario, Ore.

With such a strong line-up of veterans, recruiting was much easier

for 1981-82.

One newcomer who should have a good season is Karine Wagner, a freshman from Portland, Ore. Wagner, who was an Oregon state high school doubles champion will be joined in the freshman ranks by walk-ons Rhonda Correll and Trish Smith, Idaho's state girl's singles champion.

Tryouts for both the men's and women's team are welcome with the women practicing on the varsity tennis courts behind the P.E.B. from 2 p.m. to 4:30 p.m., Monday, Wednesday and Friday. The men's team will practice the same days from 4:30 p.m. until dark.

The lady is
a winner

Patsy Sharples,
National Cross Country
Champion

Harrier veterans return

Patsy Sharples and Sonia Blackstock lead a strong, experienced group of UI women cross country runners as they prepare to open the season at the Old Faithful Invitational at Yellowstone, Mont. Sept. 1.

Idaho Coach Roger Norris' squad of harriers placed ninth in Division II last year and he is very interested in finding out how good his team is this year.

Sharples, a sophomore from Fish Hoek, South Africa, who won first place in Division II and captured second in Division I nationals last year, is expected to be a standout on the team.

Close behind her is Blackstock, a junior from Caldwell, ID who finished ninth in the Division II nationals.

Two veterans from Toronto, Ontario were also members of the six runners that competed in nationals last year. They are Jenny Ord and Caroline Crabtree along with LeeAnn Roloff, a senior from Boise, and Kelly Warren, a senior from Everett, WA.

Norris also enjoyed a good recruiting year, bringing Sherrie Crang from Vancouver, Wash. Crang was heavily recruited by some of the PAC-10 colleges because she was ranked as one of the top five high school runners in the nation.

Junior Sandy Kristjanson from Bellevue, Wash. was ranked number two in the 1500 meters while she ran at Bellevue Community College. Although she lacks in experience, Norris said she is in top condition.

Three walk-ons who enjoyed a lot of home state success include Brooklyn, NY native Regina Corrigan. She joins recruits Randa Allen, from Granville, and Julie Fudge of Missoula, Mont.

The women's cross country team also has a little more competition this year. The team travels as far as Cedar Falls, Iowa in March, plus meets in Los Angeles, Calif., Stanford, Calif. and Portland, Ore.

While competition last season was primarily restricted to the Pacific Northwest versus regional opponents, 1981 promises to be much tougher.

"We usually placed five of our runners in the top eight of the meets we ran last year. Very rarely did our kids have anyone to run against except themselves until nationals," Norris said. "I don't anticipate taking five of eight positions in our first four meets against Division I opponents."

Men's cross country rebuilding

A new name will carry Idaho cross country fortunes in 1981, but according to Coach Mike Keller, the Vandals may still have one of the Northwest's premier individuals.

The graduation of Kole Tonemaker and Gary Gonser left two big holes in the men's program, but a freshman from Kennewick, Wash. looks more and more like an adequate replacement.

"Brad Webber will be our long distance man in cross country and the 10,000 meters during track season," Keller reports. "Comparing Brad and Kole at this stage of their careers, Brad is ahead."

Webber ran a 2:33 marathon as a high school junior and was the first high school boy to break into the top 40 of the 15,000 competitors in the Bloomsday Run in

Spokane.

"High school cross country competition really didn't help him realize his full potential. The two miles they run is just too short for him," Keller said.

Keller's biggest problem is making up a cross country team with runners who are half-milers by trade.

"I've only got 11 scholarships to award between indoor and outdoor track and men's cross country, so something has to give," he said.

The tentative line-up will have three out of five half-milers running the cross country races because of it. LeRoy Robinson will be back along with John Trott, who became the Big Sky conference champion in the 800 meters in 1980 with a personal best of 1:49.2.

Also returning are Steve Lauri, who clocked a 1:53 800 meters last year as a freshman, and Andy Harvey, who retains freshman eligibility after being redshirted due to an injury last year. Harvey runs 1500 and 5000 meters in addition to cross country.

"It will really be tough to compete. From our position, I see Nevada-Reno, Montana, Northern Arizona and Idaho State ahead of us, but it's really too early to tell," Keller said.

Fall workouts will begin with more track work and less mileage for a new training change. "We're looking forward to the indoor and outdoor track seasons," Keller said.

Monson trust fund ended

Plans for a trust fund designed to keep Idaho basketball coach Don Monson from being lured away to a better job were scrapped over the summer because of the possibility NCAA rules would be violated.

The fund was started shortly after the conclusion of last year's basketball season in which the Vandals won the Big Sky Conference

Championship.

Designed to be a reward for Monson staying at the school at least five more years, the fund would have been payable in 1987. Organizers originally hoped to raise between \$20,000 and \$50,000 for the pot, but have returned all money collected thus far to the original contributors.

Some of our classrooms
aren't classrooms.

River rafting. Rappelling. Orienteering. Back packing. Cross country skiing. Water survival. Mountaineering. First aid.

Army ROTC is an excellent course in leadership development. But, it's also adventure training, where you learn to lead in an environment that challenges both your physical and mental skills.

Unlike strictly academic subjects, Army ROTC will teach you to think on your feet. To make important decisions quickly. And it will help you develop your confidence and stamina in the classroom or out.

Add Army ROTC to your program, and you automatically add a new dimension of excitement to your campus life.

Tracksters claimed victory while students were away

MOSCOW, Idaho—The final score in the Big Sky Conference Track and Field Championship May 18-19 placed Idaho at the top with 138½ points. The closest team to the Vandals was Nevada-Reno, 39 points back, with 99½. But there is more to the story than the score.

Paul Ramsdell, a sportswriter from the *Lewiston Morning Tribune*, put the meet in perspective when he wrote: "They all came together. From Garfield, Wash., to Fish Hoek, South Africa, and almost everywhere in between, the Idaho Vandals came together Tuesday night for a celebration.

"The celebration was ignited by an almost perfect meet by the Vandals as they ran away with their

first-ever Big Sky Conference track championship."

For Idaho head track coach Mike Keller winning the title after seven years was a highlight neither he nor his team will soon forget. Going into the meet, held May 18-19 at UI's track, Keller and everyone else figured it would be a three-team race between the Vandals, Northern Arizona and Nevada-Reno.

Let the record show that the "coming together" by Idaho left the other teams jockeying for positions other than first. Following Reno, Northern Arizona tallied 95 points for third, Montana State placed fourth with 74½, followed by Weber State with 69, Montana with 60, Idaho State with 46½ and

Boise State with 37.

The Vandals scored their points by taking six first places, six seconds, four third place finishes, one fourth and three sixth places. The highlights were numerous.

Perhaps the biggest was in the triple jump with Idaho taking the top three places. Francis Dodoo, a freshman from Ghana, won the event by setting a Big Sky record with a jump of 53-6½. Dodoo was voted the Most Outstanding Performer of the meet by the coaches for his record jump. Neil Crichlow captured second with a jump of 52-0¾ and Marvin Wadlow third place with a jump of 51-4½.

Joining Dodoo as Big Sky champs were Mitch Crouser in the discus (188-0), Jim Sokolowski in the decathlon (6,947 points) and the high jump (7-0), Ray Prentice in the 1,500 meters (3:49.19) and John Trott in the 800 (1:50.17).

Equally impressive as the first place finishers was the performance of Robert Hanson, a walk-on from Garfield, Wash. Hanson came into the meet with a personal best of 201-3 in the javelin. He captured third place in the championship meet with a throw of 212-3.

Hanson's performance typified the showing of most every Vandal who competed. Consider the following:

—Gary Gonser, a senior from Castle Rock, Wash., placed fourth in the 3,000-meter steeplechase with a time of 9:01.30. It marked the fourth year he has placed fourth in the steeple.

—Mark Rabdau, a junior from Fayetteville, N.C., had a personal best in the pole vault with a leap of 15-2¾ to earn sixth place.

—Dodoo's mark in the triple was a personal best, an Idaho school record and a conference record.

—Wadlow, a senior from San Jose, Calif., exceeded his personal best in the triple jump by two feet when he captured third place at 51-4½.

—Prentice, a senior from Burien, Wash., became the first UI athlete to win the 1,500 meter title with a time of 3:49.19.

800 meters champion John Trott

Neil Crichlow placed second in Idaho's 1-2-3 triple jump sweep

Women netters place 14th nationally

MOSCOW, Idaho—With 14th place and 14 points in hand, the University of Idaho women's tennis team ended the 1980-81 season at the AIAW Division II National Championships held at Charleston, S.C.

Idaho was nosed out of 13th by the University of Denver with 14 1/2 points.

Coach Amanda Burk ended her three-year career at the helm of the UI team at the meet after leading the women's tennis team to national competition all three years, taking the NCWSA Regional crown all three years and coaching her teams to a 54-8 regular season mark.

Burk will become the administrative aide to Kathy Clark, assistant athletic director and head of women's athletics, and continue as volleyball coach at Idaho. The women's team will be coached next year by Jim Sevall who took the helm of the UI men's team this year.

The national tennis tournament, hosted by College of Charleston,

was held in 101 degree heat with the humidity in the 90 percent area. "We came from cold Idaho to this and we just weren't prepared for the weather," Burk said.

After the first day's action, the Vandals found themselves in the consolation round in all slots.

"It proved to be a team effort at that point," Burk said. "We had to play for half points. Last year we took 14th mainly by the points of our number two doubles team that took fourth in their position. This

year everyone earned points for the team, the hard way."

Cal Poly Pomona won the tourney with 75 182 points followed by the University of Richmond with 54 1/2. Cal State - Northridge took third with 52 1/2, William and Mary fourth with 47 and host College of Charleston fifth with 42 1/2.

Other NCWSA teams at the national tournament were Eastern Washington University, a 19th place finisher with seven points and the University of Puget Sound.

Netters to hold auditions

The UI women's volleyball team will hold tryouts for the 1981-82 season Aug. 26 at 3 p.m. in the large gym in the Physical Education Building, according to team manager Deanna Barr.

Idaho Coach Amanda Burk's squad finished ninth in the AIAW Championships last year.

Women interested should contact Burk at the PEB, Room 204, or call 885-6384.

Ticket sales increasing

Ticket sales for all six home Vandal football games are going "great guns," according to Inez Flisher, ticket manager.

Season ticket sales are running approximately 300 over last year, with tickets still available for all home dates.

Conference games against Montana, Nevada-Reno, Idaho State and Boise State are priced at \$7 and \$8 for the general public with non-conference games priced at \$6 and \$7.

"\$7 for a reserve seat with a back

on it isn't bad at all," Flisher contends.

Staff and faculty tickets are available for pick-up at a reduced rate in Room 138 of Memorial Gym from 8 a.m. to 5 p.m., Monday through Friday.

Given a choice, this Vandal football player would probably choose to be in an air-conditioned room with an ice-cold beverage, rather than be on the practice field five hours a day in 98-degree heat.

Last Saturday's light scrimmage in Coeur d'Alene and subsequent buffet dinner boat cruise was something of a reward for the team which "did everything we asked of them during two-a-days," according to coach Jerry Davitch.

A lot of mental errors were committed by both the offense and defense, but the best thing that happened was that nobody was injured. Vandal coaches rated the defense as more impressive than the offense, although quarterback Mark Vigil threw two touchdown passes to wide receiver Vic Wallace. Pete O'Brien had the only other score with a 45-yard field goal.

TOUCH FOOTBALL

(Men) IM managers must attend the managers meeting on Tuesday, Sept. 1st at 7 p.m. room 400 in the Memorial Gym in order to sign up a team. All off-campus teams must also have a representative at this meeting to sign up a team.

FLAG FOOTBALL

(Women) Entries open Wed., Aug. 26 and are due Tues., Sept. 1. Any off-campus teams must come into the IM office and pick up an entry form before Sept. 1.

IM MANAGERS MEETING

Women's meeting on Tuesday, Sept. 1st at 7 p.m. in room 201 of the PEB. It is important to have a representative from each living group present at the meeting so please be sure and be there. Men's meeting on Tues., Sept. 1st at 7 p.m. in room 400 of the Memorial Gym.

MEN'S TENNIS

Entries open Tues., Aug. 25th and are due on Tues., Sept. 1st.

WOMEN'S TENNIS

Entries open Tues., Sept. 1st and are due on Tues., Sept. 8th.

CO-REC SOFTBALL

Entries open on Tues., Sept. 1st and are due on Tues., Sept. 8th. If you have an off-campus team, come into the IM office and pick up an entry form.

FOOTBALL OFFICIALS

Men's and Women's IM Football officials are needed. If interested come into the IM office immediately and pick up the rules and take home examination. You must attend the 3-day clinic before you can officiate. Clinic begins on Tuesday, Sept. 1, 4:30 p.m. Memorial Gym.

BUILDING HOURS

Memorial Gym, P.E.B. and the Swim Center will be on an irregular time schedule for the first week of school. Open recreation hours will be posted on a daily basis in each facility until a permanent schedule is completed.

INTRAMURAL BOOTH

We invite people to stop by the intramural booth at registration and ask questions and find out what we have to offer through the Intramural and Campus Recreation Dept.

EARLY BIRD

The Swim Center will be offering an early bird lap swim Monday through Friday from 7:30 a.m.-8:20 a.m.

was only 150 in the crowd. Now they've drawn 9,000 so it gives you an idea," Davitch said. "I anticipate three sellouts this year in football for our home dates with Idaho State, Nevada-Reno and Boise State."

Just two years ago, the Vandals drew but 5,000 for a home game at season's end with South Dakota State.

"We'll have a winning season again this year and we should have a winning season in 1982 and that's never happened in the school's history before—three winners in a row," he said.

Davitch said the administration support is not biased toward football, but treats it the same as any other phase of what's going on in the university, and for that reason his athletes have a graduation percentage comparable to any other campus organization.

"Our players are working towards graduating, not just using up their eligibility," he said. "And with the exception of our first year here, when we had 12 players who refused to come to practice, we have never cut anyone."

Because the support for his program has been so positive, Davitch will never refuse to speak to any group in the state on behalf of the

university. "I've spoken to groups ranging in size from three or four people up to 1,000 and no one has ever been unkind to me," he said.

It is a way of "getting the word out," Davitch said. "A university is a business and must promote itself—we've got a product to sell."

Davitch, a strong personal believer in public television, said doing away with it will hurt his program.

"It would be different if we were the University of Wyoming, but we're not, we're not the only game in town. Having three real-for-real schools in the state (BSU, ISU and UI) is a problem," he said. "It's becoming more and more our responsibility to get the word out."

Four years later Jerry Davitch is doing his job—hired to win football games and fill up the ASUI Kibbie Dome, and "they would like it done without any violations," he says.

"Tenure for me is a Saturday to Saturday thing. Every one of my coaches has a masters degree and they are betting their existence on these 18, 19 and 20 year-old kids," he said. "I wonder...would another instructor do the same?"

Not only is he testing his class against others, but is doing it in front of 16,000 people.

Because he's passing the test, more and more people are standing up and saying, "oh yea, I graduated from the University of Idaho."

"I see more and more kids wearing shirts that look like an Idaho football jersey and they're proud to wear it home," Davitch said. "Now their favorite team is the Idaho Vandals and not just Notre Dame or USC."

At many schools, the football coach is more famous than the school's president. And in some states, the football coach is more famous than the governor, but Davitch has kept his thinking in perspective.

"We're doing things here educationally that make what I'm doing horribly small by comparison. We aren't going to find a cure for cancer on the football field," Davitch said. "But the school wants to see and read about football."

This school doesn't belong to the football team, according to Davitch, but to the State of Idaho and the alumni. "With strong support from the administration, the students and the boosters, I think you'd have to go far and wide to find a coach that could not be successful."

Defense

continued from page 37

Sam Merriman, 6-4, 210 pounds, will return as the only junior in the linebacking corps after being named second team All-Big Sky as a team-leading tackler freshman and sophomore.

He's joined inside by Arizona State transfer Darby Lewis, who won't become eligible to play until

the third game of the year against Northern Iowa.

Shawn Jackson, a 6-2, 220-pound sophomore, returns along with Dan Sasso who is expected to challenge for a position.

Steve Nelson, 6-3, 212 pounds at nose guard, will be one of three

seniors on defense.

In the secondary, Greg Jennings, 6-0, 180 pounds, returns at left corner along with Kelly Miller, 6-1, 190 pounds, at strong safety.

Boyce Bailey, who sports a 4.0 GPA, will take over the free safety position vacated by Ray McCanna.
