Arboretum

Plan details beautification program

by Mary Kirk
of the Argonaut

Until the jogging path proposal became a campus issue, not many students or faculty had heard of an arboretum "master plan." Well, it's not quite on the same order as something in a James Bond special but it has a certain uniqueness.

The Shattuck Arboretum and Botanical Garden is the formal title and the 86 page master plan report details every possible facet of the current 35 acres and a planned 63 acre addition.

An estimated \$7,550,000 needed in donations over an unestimated number of years covers a variety of projects and fixtures. Some of these are: elevated walkways reaching up into the trees, a multi-level conservatory, wetland development, wildlife observation structures, terraces,

gazebos and garden displays. Most of these are to be included in the 63 acre addition—the "garden."

Also detailed in the report is the history of the project, the climate, soils, hydrology, design, present flora and fauna and future acquisitions.

Seven phases of development for the master plan are outlined in the report. Listed in order of priority they are: (1) research and analysis of plant collections, (2) shelterbelt planting and wetland development, (3) major utilities and access for cars and people, (4) display garden area, (5) regional plant displays, (6) buildings for administration, research and maintenance and (7) the conservatory.

A listing of existing flora in the present arboretum totals 1,150 types of trees and berries. Proposed for the garden area in various displays are 505 additional plant materials. These

Campus Plan

Core ringed by road is main idea

by Dan Eakin
of the Argonaut

The 51-page preliminary long range planning guide for the University of Idaho may not look like much at first glance.

The rough sketches, campus maps and empty photo spaces do not say much by themselves. But, the text whispers that the physical fate of this university has been revealed and put into Bible form.

The guide, still in early draft form, has revisions and modifications to undergo before becoming gospel. Photos, facts and figures are still left out in places, but there can be no mistaking the document's significance.

Its nine sections mold the campus around two campus creation concepts, one known as the ring road and the other as the academic core.

Within these two concepts lies the makings of a campus.

The document goes on to discuss the ring road and campus core concepts in light of the following areas: circulation, parking, building facilities, and open spaces and landscaping.

In each of the four sections, goals are listed along with supporting policies.

"...the stated goals and policies, while sufficiently broad, will be readily applicable to any new proposals," the guide states.

In its introduction the plan says the primary goal of the document is to insure that campus planning decisions can be made in a "rational, consistent and creative" manner in order to maintain long-standing campus beauty and lead to more pleasing and functional surroundings.

The plan is designed to be a com-

The Argonaut is published twice weekly during the academic year by the Communications Board of the Associated Students of the University of Idaho. Offices are located in the basement of the Student Union Building, 620 Deakin Avenue, Moscow, Idaho, 83843. Editorial opinions expressed are those of the Argonaut or the writer, and do not necessarily represent the ASU, the U of I or the Board of Regents. The Argonaut is distributed free of charge to students on campus. Mail subscriptions are \$6 per semester or \$9 per academic year. Second class postage is paid at Moscow, Idaho. (USPS 255-680).

Resource institute delayed one year

The opening of Robert Redford's Institute for Resource Management was delayed at least a year, the *Idahonian* reported yesterday.

Hope Moore, executive director of the institute said a "funding strategy" would be announced later this week when she and Redford come to Moscow and Pullman.

The Institute was previously scheduled to open this fall but was delayed once until the spring semester because fund raising seed money had not been raised. It is now scheduled to open in the fall of 1982.

In an earlier phone conversation, Moore said she expected that nearly 20 percent of the individuals now signed up for the institute would drop out because of the delay.

UI institute director, Wayne Hager, is reported as saying that the students involved in the institute were told all along that

getting the program started was dependent entirely on the seed money being raised.

Both UI and WSU campus institute directors said that their own work associated with getting the institute off the ground is pretty much completed.

William Funk the WSU director is reported to have said "I've worked on other projects where it took four years to bring them to fruition. My enthusiasm isn't dampened" by the delay. He termed the delay disappointing however.

Redford and Moore will be

on campus this week. Redford is scheduled to speak at the WSU President's Convocation in the Performing Arts Coliseum and there are 11,000 free tickets available. They can be picked up at the coliseum, the WSU Alumni Office, or the UI Student Union Building information booth. There is a limit of four tickets per person.

Redford's convocation topic will be "Looking Toward a Balanced Future." The convocation begins at 10:15 a.m. Friday, and will be broadcast live on KWSU-AM.

With Varian, You Have A Choice

Whether you are about to graduate, or are considering a co-op assignment, **Varian Associates** can offer you the choice of a stimulating career experience in **Medical Electronics**. Our **Medical Division** in Palo Alto, California, is one of the foremost manufacturers of linear accelerators, the most widely accepted radiation therapy and research instruments in the medical profession. If your ambition is a career in Medical Electronics, **Varian's** representatives will be on campus to interview EE and ME majors for co-op and career positions.

On-Campus Interviews

CO-OP ASSIGNMENTS Tuesday, October 20 **GRADUATING ENGINEERS Wednesday, October 21**

Your career choices at **Varian** will be aided by the leading scientists and engineers working with you. And by the availability of the resources at some of the country's leading schools, like our neighbor, Stanford University. Make an appointment today with your Career Planning and Placement Center. Or find out about other career choices with **Varian** by writing to **Employment, Varian Associates, 611-DH Hansen Way, Palo Alto, California 94303**. We are an equal opportunity employer.

Arboretum

continued from page 1

include trees representative of the United States, Europe and Asia, flower types (annuals, biennials, perennials), hedges, groundcovers, herbs, shrubs, vines, bulbs, fruits and vegetables.

Cost estimates for the project are as follows:

Wetland development.....	\$250,000
Utilities.....	\$1,200,000
Parking, paths, roads.....	\$600,000
Buildings.....	\$4,000,000
Planting.....	\$9,000,000
Site improvements.....	\$500,000

According to the master plan report, a compilation of charts, figures and narrative, an awareness developed in 1974 for policies on campus grounds and plantings. These included the Administration Lawn, the Presidential Grove and the Shattuck Arboretum, originally planted by Charles Houston Shattuck in 1910.

Ernest Hartung, then UI President, appointed faculty, staff and student representatives to an ad hoc Campus Beautification Committee.

This committee's major concern and ultimate target was the Shattuck Arboretum. The committee recommended that another committee look into expanding and upgrading the existing 35 acres. They also suggested that the entire campus be designated as an arboretum.

The Arboretum Project was first conceived in 1975 by the Campus

Beautification Committee and was supported by the UI Foundation. One year after the beautification committee agreed to work on the project, an additional 63 acres of university land was approved and outlined in a proposal. The Foundation then started hunting for professional planners and designers.

In February of 1977, Hartung, now executive director of the Foundation, announced that Richard Carothers Associates of Boise had been selected as a consultant to the master plan for a new arboretum and botanical garden. This firm was selected from several planning, architectural and landscape architectural firms in Idaho, Washington and California.

Marlene Johnston is the current president of the Arboretum Associates, a volunteer organization which helps supervise the master plan. According to Johnston, at about the same time the additional land was set aside and the consultant was chosen, workshops involving the community were held to determine the "total concept of the arboretum."

Then, with input from faculty, businesses and students, plus discussion on things like tennis courts and bike trails, it was agreed to use the arboretum for passive recreation. Then, Johnston said, "letters sailed back and forth" between the work-

shops and the beautification committee and finally the physical master plan was drafted.

Johnston said in the master plan for the arboretum, "there will be a place for anyone to volunteer or make a contribution." By the same token, no one is being forced, she said.

Students and civic groups could help in planning the conservatory, she said. While it will take a major fund drive in years to come, there's no reason why people with designs and ideas can't start work now, she added. "The students would have the experience, is what I'm saying," and it would be a project for the university family as well as the community. One of the goals for the master plan is that it be for all of Idaho, Johnston stated.

Johnston emphasized that the Arboretum Associates receives no support from the university except for the use of meeting rooms. There are membership dues, she said (from \$7.50 for students to \$1,000 for life associates) and if the UI Foundation gets a gift restricted just for the arboretum, that can be used, Johnston said her group is hoping UI expertise and willing students in classes will cut down on costs a great deal.

She said one idea her group has is for a committee on volunteers. People who could supply tools, lumber, time, labor or expertise could be

listed. If that could happen, \$1,000 could be scratched off the cost estimates, she said.

Another item on the agenda of the Arboretum Associates is arboretum-related classes for next fall. Such topics as photographing flowers in home gardens, pruning trees and shrubs, and planning for color in different seasons are among those listed. A "grown-up arboretum" continually has things to interest the public, Johnston said. If people are willing to donate their time, as we are, it (the arboretum) would be a valuable service to the university.

Johnston said one reason the jogging path proposal went as far as it did without her group commenting was because they don't have a public relations committee. But, she commented, "I have no doubt at all that people who enjoy jogging would walk through the Arboretum."

Cooperation for the master plan, according to the report, came from several areas. These were the colleges of Agriculture, Education, Forestry and Letters and Sciences. Other people having a part were Foundation members, faculty from Forest Resources, Plant and Soils Sciences, Botany and Landscape Architecture, the UI Physical Plant, community members, industry representatives and university students.

Campus Plan

continued from page 1

prehensive plan, much like comprehensive plans adopted by counties and cities. It should aid in decisions relating to campus development by making those who plan campus development aware of the guidelines set forth.

It also enables "decision-makers to act on specific development proposals on the basis of a unified and clearly stated set of policies."

As for fulfilling goals and policies, the guide states, "Within the University community there are many persons who can provide the expertise and assistance needed to work towards the implementation of a number of the plan's goals. This reservoir of inhouse talent should be utilized as fully as possible before outside help is sought."

All this inhouse talent won't know what to do if they don't first know something about the two basic design concepts mentioned earlier, the ring road and the academic core.

The academic core is where most services and facilities are located and where students spend a good portion of their time attending classes.

The university has a basic academic core and this core is sur-

rounded by an even more basic ring road which carries traffic around the campus while allowing limited access to certain areas and buildings lying within the area bordered by the road.

The ring road concept is important to the campus plan because accessibility to the campus core is planned to be quite limited. Emphasis will be placed on hoofing it within the core.

The plan is blunt. Cars, trucks and vans will not find a warm spot in the university's heart. Provisions will be made for the handicapped and pedestrian activity will be encouraged. Mopeds and motorcycles are much more welcome in the academic core than large vehicles. Parking for those larger vehicles will be on the periphery of the campus near the ring road.

The guide points primarily to creating "a more tranquil atmosphere in the academic core more conducive to the scholarly purpose of the university," in explaining why the ring road and academic core concepts are so vital.

Circulation refers to how traffic flows through or around campus. The document states, "Streets lying between the ring road and the academic

core should serve primarily as access routes to student housing units and to other buildings and parking lots found in this area. They should not be used as a means of traversing the campus."

The plan goes on to say that streets within the academic core should serve mainly handicapped, service, and emergency vehicles. Pedestrians receive the highest priority. Bicycles within the academic core will be encouraged.

Guess where parking is going to be discouraged—the academic core. Handicapped and visitor parking should be provided according to the plan. Parking considerations in the future will curl around the need to use university land for more than parking by minimizing the amount of university land actually used for that purpose. User needs are a high priority on this topic of discussion.

In the building facilities category the guide states a hope to "strike a balance between function and aesthetics," when deciding what kind of building can be built somewhere and for what purpose.

Main features of the comprehensive facilities plan are protecting open spaces that exist on campus and locat-

ing new buildings in the academic core. Flexibility in the use of a building is a major concern because the needs of students and faculty tend to shift or be cyclical, the guide says.

"Consequently, consideration should be given to the flexibility and to the adaptability of new facilities to uses other than those for which they were originally intended."

Despite small enrollment increases, the guide says some facilities, the library for instance, will require more space to serve properly while on-campus housing demands will add pressure as well.

All in all, the primary goal of the guide in building facilities appears to be to preserve the present physical campus, old buildings, open spaces and all.

From the landscape point of view, lighting, pedestrian circulation features, signage, outdoor furniture, and art pieces play "an integral role in establishing a sense of unity and identity for the entire campus."

With that piece of wisdom the Bible ends as quickly as it began. So with ring road and academic core in hand campus development can march on with a sense of purpose.

commentary

Baseball junkies

When the now-infamous baseball strike of 1981 first went into effect in late June, many of us baseball addicts went cold turkey.

Some of us didn't recover until play started back up again in early August.

Some of us didn't recover fully at all. One month in the hot, dry summer without baseball was just too long a withdrawal for life-long fans to handle.

And to make matters worse when they did start back up, they implemented some crazy split-season schedule that was as ineffective as it was confusing.

That may explain the previous state of sluggishness, remorse, and just plain apathy toward life in general exhibited by those still strung out.

Some of us still haven't forgiven the players and owners for their collective greed that turned our national pastime into a money-grabbing farce.

But with pennant passion heading into full swing, we just got a life-giving fix. Baseball is surging through our veins once more.

Nothing beats the high of baseball in the fall; there's Fernando Fever in L.A., Billy Ball running wild in Oakland, Mr. October pounding away in the Big Apple, and some new kids on the block in Milwaukee and Montreal.

Well, okay, so there are a few major faults in the split-season playoff concept, such as the Cincinnati Reds having the best record in baseball and not making the playoffs, and the St. Louis Cardinals' National League Eastern Division best being not good enough.

But this is one hit most of us won't be coming down from for at least another three weeks. To hell with studying, working, and other pseudo-important aspects of life. Baseball is back.

Yet, every once in a while, when baseball isn't inundating the air waves, there is the question of what will happen next season if the players and owners decide to do it again. It's enough to send frigid shivers up and down the spine of even the most loyal baseball fan.

Some of us are still not sure if we'll forgive major league baseball for the cruel and unusual punishment it inflicted on us this summer, but, at least until the World Series is over, we'll give it the benefit of the doubt.

Brian Beesley

Firsthand drips

"Did you spit on me?," asked one Vandal fan.

"No, it just dripped," answered another.

While the wet, dreary picture painted by the media of Saturday's football game in the Dome didn't quite come true, a firsthand glimpse of the leaky situation finally became available.

The first order of business for most fans before sitting down on bleachers was folding up coats to soak up excess moisture. Both bleachers and the cement walks were damp.

Drips were marginal and best highlighted by the overhead floodlights. Most plopped down when least expected. Occasionally, umbrellas in the stands popped into action.

As far as water-logged turf went, nothing seemed amiss until players tumbled across the surface and a misty spray arched through the air.

Up above, acoustic tiles above the gridiron were missing. The ones still there looked slightly warped and water-stained. And there was a humid, greenhouse feeling.

It must be stated that workers *did* do their best to remedy the soggy affair and the Physical Plant promises the Dome will soon be snug for the winter with three layers of polyethylene plastic. But safety for people using the facility should continually be emphasized.

While totally unexpected and freak accidents can and have happened with large crowds in buildings, the Dome is especially vulnerable because its construction, already labeled faulty by the university, is now being exposed to the elements.

Be safe, not sorry. Let's hope the university sticks to that policy, if only for the sake of student fans who helped foot the bill.

Taking a stand

Donna Holt

I credit Congressman Henry Hyde for my decision to address the subject of abortion in print. A couple of weeks ago, *60 Minutes* featured Hyde and his so-called "pro-life" dogma. In that segment, after a sensational interview with a 12-year-old who had conceived as a result of sexual abuse by her stepfather, Hyde persisted in his conviction that abortion should not be available to *anyone*, regardless of the circumstances that resulted in pregnancy. Such sanctimony nearly caused me to do violence to my television set.

Let us begin, then, with some observations. First, I have yet to meet anyone, woman or man, who is pro-abortion. The term is a misnomer. Individuals who agree with the Supreme Court's decision on the availability of an abortion in the early stages of pregnancy are pro-choice. They believe only a woman and her doctor have the right to decide whether to terminate a pregnancy.

Along with this difficulty in defining terms is the ongoing presumption of those who oppose choice that women who do choose to abort have not exercised "informed choice." In my capacities as a peer counselor and in 1978-79 as Director of the UI Women's Center, I have counseled perhaps fifty women who asked for information—pro and con—about abortion. Every one of them, whether she ultimately decided to carry her pregnancy to term or to have an abortion, came into counseling with plenty of forethought. All had deliberated about their situations long and hard. Each had weighed her alternatives and ultimately arrived at a solution that suited her circumstances.

Those who characterize themselves as pro-life presume that anyone with opinions contrary to their's is anti-life. This has hardly been the case in my experience. Women who deliberate about abortion are probably infinitely more aware of life and its value than the men who would have women's choice forbidden. Those of us who are pro-choice recognize that every child should be a wanted child. We know that always there are mitigating factors, individual to each woman, which make her the only person capable of making the choice of whether to bear a child.

That choice is what the whole issue boils down to. Women, unique in their capacity to bear the children of this world, must be allowed to have control over their bodies. Even with the vast advancements of science in the mechanics of birth control, there is no absolutely foolproof method of contraception. If one were to argue that abstinence is sure-fire, I would respond that many women are victims of rapes that result in pregnancy.

The willingness of Congress even to consider

any Human Life Amendment (HLA) is contrary to the wishes of a majority of American people. A recent NBC poll revealed that while nearly half of those questioned felt abortion was wrong, 75 percent agreed that it was not the role of the government to decide whether a woman could choose abortion. If our legislators truly want to reflect the thinking of their constituents, they should listen to them.

What's worse, the constitutional amendments being considered these days go even further than just prohibiting abortion. Instead, they seek to define the moment when fertilization occurs as the beginning of a person—a person entitled to protection by the government—a person whose right to life is paramount even to the life of the woman who carries it.

An HLA would establish a legislative precedent that would allow interference in any number of private areas. If the fertilized egg is to be governmentally protected, the government might administer such an amendment by requiring miscarriages to be investigated, or it might make aiding clean, safe abortions a criminal offense for women, their doctors, and their friends. Such precedent would encroach upon many closely-guarded liberties and set the scene for similar legislation aimed at other groups.

Finally, women are the only ones who are capable of making choices about their bodies. No more than the Prohibition amendment prevented people from acquiring alcohol will an anti-abortion amendment prevent women who choose abortions from finding a way to terminate their pregnancies. Women and men who care will help those who do choose abortion to secure the procedure safely. They will risk criminal charges to make women safe from the kind of illegal, backroom abortions that still haunt women who secured them before the Supreme Court's decision.

I consider myself lucky never to have had to make a decision about abortion. The only time I ever came close, I was taking birth control pills religiously. But like three in every hundred women on the pill, I conceived anyway. I miscarried before I even knew I was pregnant. I don't know what decision I would have made, but because I was unmarried, a graduate student, and not making much money, having a child would have constituted a drastic change in my future. For me, the choice didn't have to be made. But having the choice—knowing I was responsible for the way my life would go—is something I had then, have now, and intend to hold on to as long as I am able.

Donna Holt is a third-year law student and editorial page editor of the *Argonaut*.

Argonaut Photo/Mary Kirk

Friends Unlimited's Big Brother program provides a big thrill for Trev McFadden and Danny Snow, pictured next to their big brothers: Sam Merriman, at left, and Bruce Fery.

Vandal gridders involved in community service

by Sandra White
of the Argonaut

Saturday night the Idaho Vandals fell victim to the paws of the Montana Grizzlies. With hair standing in sweaty spikes, some players stalked off the field. Others glumly plopped down on the sideline benches.

But for two dejected looking players there was a happy reception. As Sam Merriman and Bruce Fery trudged off the field, they were consoled by two smiling faces: their "little brothers," Trev McFadden and Danny Snow.

Bruce and Sam first got together with their little brothers through Friends Unlimited, a program which provides attention on a continuing basis for children aged 5-15. The two Vandals aren't alone in the program. Other team members taking part as big brothers include Ken Hobart, Jack Klein, Mike Bird, John Alwine and Dave Thorsen.

"People from all walks of life are volunteers," said Karen Huls, director of the program. A volunteer can be anyone over 18 who has the time to spend, she said. These include other UI students, the elderly, and working people.

Sam, the left-side linebacker for the Vandals, has been a big brother for six months. He first heard of Friends Unlimited from Vandal Coach Jerry Davitch. A junior in advertising, Sam spends at least three or four hours a week with twelve-year-old Trev.

"You don't have to spend a lot of money, just spend some time with your little brother," said

Sam. Trev, a seventh grader at Moscow Junior High School, enjoys working with model cars and playing soccer and football. He has a sidelines pass for the Vandal games and occasionally watches the team practice. Sam and Trev also go to the movies and play miniature golf.

Sam has one older brother and three older sisters and according to him, being an older brother has helped him realize what it's like to be responsible for someone younger. "You have to say no sometimes," he said.

"The relationship between a big brother or sister and the child is one of role-modeling, guidance and companionship," said Huls. The relationship serves as a personal basis for growth of both the volunteer and the child.

"It's a good feeling to be working with younger kids. I would recommend this program to anyone who has spare time," Sam said.

Bruce Fery, the right offensive tackle for the Vandals and a senior in business, has been with Friends Unlimited for three years.

Danny, a twelve-year-old sixth grader at St. Mary's Elementary School has been Bruce's little brother for five months. Danny's favorite subject is reading, and his hobbies include playing and watching football. Danny also has a sidelines pass to watch the Vandals.

Bruce said he and Danny take turns deciding what to do with their time together. "This week it's Danny's turn to decide what to do," explained Bruce.

Some of their activities include "playing the video games out at the Palouse Empire Mall and going out for pizza," according to Danny.

Like Sam, Bruce heard about Friends Unlimited from Coach Davitch. Bruce is a member of Delta Tau Delta fraternity, but lives off campus now. Several years ago he observed a member of his house develop a close relationship with a little brother. This was another factor in his decision to become a big brother, he said.

Danny has a twin sister while Bruce has a younger and an older brother. Through Friends Unlimited, Danny has the opportunity to have an older brother and Bruce has another friend.

"I really enjoy being with little kids—their views on life are so interesting," Bruce said. "It's a great program. I wish more people would get involved."

Friends Unlimited is always looking for volunteers, according to Huls. Big brothers are especially in demand, she said.

Funded entirely by United Way, Friends Unlimited is a Moscow organization that incorporates all types of people into a child's life, Karen explained. While all Latah County children are eligible, most of them come from single parent families.

Students interested in becoming big brothers or sisters should contact her between 8:30 a.m. and 5 p.m., Monday through Friday by calling 882-7562 or visiting the program headquarters in room 201 of the Latah County Courthouse.

SIDELINES

Turnovers costly in 16-14 loss

Grizzlies steal the motherlode

by Kevin Warnock
of the Argonaut

When Kenny Hobart's pass to Tom Coombs with 24 seconds remaining went astray last Saturday night, a tip off the hand of Montana linebacker Brent Oakland, it was like a knife slowly penetrating into the Idaho Vandal football team.

The pigskin was airborne for what seemed like an eternity, and when it finally returned to ground, more than enough time had elapsed for Grizzly free safety Scott Ellig to settle under it. The knife had seemingly dashed Vandal title hopes for 1981.

"I believed with all my heart," Idaho coach Jerry Davitch said afterwards, "that we were going to go down and kick the game-winning field goal."

The interception was a tough break for the Vandals to absorb and an ungentle reminder to how your own mistakes can beat you. The 16-14 Grizzly conference win resigned Davitch to concede for practical purposes; Idaho was out of the running for the Big Sky crown and post-season play.

The Vandals are now 0-2 in league action and 3-3 overall, but are not eliminated from conference contention mathematically. Should the Vandals win the remaining games on their schedule, and Idaho State lose to Idaho, or one of their other remaining conference oppo-

Ken Hobart

nents, a several-way tie for first place would exist.

Even though the Vandals continued to pile up yardage offensively, gaining 471 yards on the night, the Idaho offense had trouble near the goal line and trouble with penalties.

Of what went wrong, Davitch

said it was a group effort and the defense actually played more than well enough for Idaho to be victorious.

"We had some missed opportunities and made some mistakes," Davitch said. "The turnovers hurt us because they turned into a field goal and touchdown for Montana."

Idaho lost two fumbles and gave up two interceptions, while Montana lost two interceptions but recovered both of their own fumbles.

Idaho quarterback Hobart enjoyed his finest game ever passing, despite being hampered by an ankle sprain which kept him out of practice all week prior to the game.

The junior from Kamiah completed 16 of 33 for 317 yards and two touchdowns, throwing more from the pocket—his mobility noticeably affected when he was caught from behind on rollouts by opposing linebackers.

"Hobart turned in a memorable performance. He played exceptionally well," Davitch said. Despite his not having taken a single snap in

continued on page 6

Greg Jennings

Argonaut photo/Sol Pickett

Montana's passing game tested Idaho cornerback Greg Jennings one-on-one in the fourth quarter deep in Idaho territory. Jennings passed the test and broke this play up, finishing the game with three pass deflections and seven unassisted tackles.

Blue Mountain scrum-half Rett Landers (1) begins the second phase from a maul set-up by (left to right) Dave Lefkowitz, Joe McGurkin and Cobbler Ogle.

Snakes clobber ruggers

Blue Mountain knew all along they would face the Pacific Northwest's finest when the fast, physical Snakes of the Snake River Rugby Club came to town. The Moscow team expected their Southern Idaho opponents to score quite a few points.

In the end last Saturday afternoon, on a muddy Bill Ogle Memorial Pitch, there were no surprises; Snake River 23—Blue Mountain 7.

Despite the team's setback, Blue Mountain spokesman Dave Lefkowitz said his club

welcomes the opportunity to play high calibre opponents.

"We were definitely beaten, but we learned a lot from them," Lefkowitz said. "We applied what we learned from playing them last year and we didn't make as many mistakes as the game went on. We started playing more of our game as the contest wore on, getting stronger towards the end and making less errors."

Next Saturday, Blue Mountain will be in Boise competing in the Motherlode Tournament.

Lentils leave Portland 1-2

Dusty Lentils women's rugby club raised their season record to 4-2 over the weekend in Martha's Tournament held in Portland, Oregon.

Dusty Lentils lost their opening match to Corvallis 8-6, but came back to destroy the Reed College Club of Portland 52-0.

In their final matchup, the Tacoma Drifters stopped the Moscow team 12-7.

Earlier this year, Dusty Lentils defeated the Boise Bullets twice and the Seattle Seabirds once. They close out the fall season this weekend in Boise.

Harriers place ninth at prestigious Stanford

The Idaho women's cross-country team placed fourth last Saturday at the Stanford Invitational with 91 points. The overall winner was Stanford with 19 points.

Patsy Sharples was the first Vandal finisher, placing sixth overall. She was followed by teammates Sherri Crang-11th place, Sandy Kristjanson-17th

place, Caroline Crabtree-28th place, and Lee Ann Roloff-29th place.

"I thought they ran good. It wasn't as spectacular as the previous week, but it was a good solid performance. Our goal was to beat UCLA who was ranked 20th in the nation and we accomplished that," Norris said of his team.

Vandals

continued from page 5

practice, Davitch said when you have a money football player, you play your money football player if he's able. "Our problems on offense were not his fault."

Montana coach Larry Donovan said the Grizzlies didn't change anything in preparation, or during the game, other than going to a double-tight end formation at the close of the first half. Montana, expected to be pass-oriented on offense, gained only 85 yards through the air and added 143 yards from the ground.

"We know we beat a very good football team here tonight," Donovan said in the winners' locker room. "This is a big one to us, considering all the things Idaho has in facilities and in recruiting. They are already established, whereas we're trying to get our program there right now."

Of the ending, Donovan admitted his side was "scared to death," and said there's no way you can prepare for an outcome like that.

A far cry from the 42-0 thrashing Idaho handed Montana last year in Missoula, last Saturday's game saw a different Grizzly team enter the Kibbie Dome. "They seemed to be more settled this year than last, under their new coach," said Idaho tailback Russell Davis. "They keyed on our mistakes on offense and adjusted well during the game. We didn't capitalize on our drives."

Davis gained 77 yards on 21 carries, while Tim Payne picked up 69 yards on nine carries, in place of the injured Wally Jones.

"We were one pass away from a field goal," said Idaho tight end Tom Coombs, who said he just wished he could have had a chance to get his hands on the ball intended for him but deflected with 24 seconds left. "But that's what happens when you wait," he commented on Idaho's inability to get moving in the earlier parts of the game.

The situation remaining for Idaho is an important one as far as Davitch is concerned. "In my mind I would think we're definitely out of the conference race, but it's very important to get that second winning season in a row—it hasn't happened here since 1938," he said. "The rest of the season is going to be a measure of our reaction to adversity."

"We have to bounce back and play with a lot of pride and intensity," Davis said in an empty Vandal locker room. Coombs added, "The mental mistakes and turnovers have to be cancelled if we're going to win against Montana State."

Idaho travels to Bozeman next Saturday to meet the Bobcats who are also 0-2 in conference play and 2-3 overall. Earlier in the year, Montana State was ranked seventh in the nation, Div. I-AA.

The "Kamiah Kid" Ken Hobart enjoyed the finest day passing of his career against the Grizzlies. Above he hits split end Curtis Johnson, who finished with 51 yards on two catches.

Spikers travel west for Cougar showdown

The Idaho women's volleyball team opens a busy week by traveling to Pullman this evening to play rival Washington State in a non-league game at 7 p.m.

The Vandals enter the match with a 13-6 record and 2-0 league mark. One of the Vandal's losses came at the hands of WSU in the Montana Invitational three weeks ago; however, Vandal coach Amanda Burk said that Idaho will be ready to play WSU.

"We scouted them all last week and I think we can beat them," she said. "Everyone is in good health finally, and it should be a real good match."

Idaho takes on Gonzaga tomorrow night at 7 p.m. in Memorial Gym. The Bulldogs were beaten by the Vandals rather handily in their first match.

"They have had some trouble this year," said Burk. "They have a new coach and she didn't get much recruiting done this year."

Burk feels that Gonzaga could upset the Vandals, however, so she is wary of them.

"We have to make as few errors as possible. Gonzaga is the type of team that could force those errors. We have to make sure we don't play their style of game."

The Vandals open tournament play with a match against Simon Fraser at 8:30 p.m. Then Idaho goes up against Oregon State, a team which the Vandals have not played in a couple of years. The Vandals play OSU at 9:30 a.m. Saturday and then have a rematch with Utah, a team which beat Idaho in a long, five-set match three weeks ago.

On Friday, Idaho travels to Portland, Ore. to play in the Portland Invitational. The tournament will feature teams like Oregon State, Simon Fraser, Utah, Portland State, Eastern Washington, University of Victoria (B.C.), Lewis-Clark State, and Idaho.

"We are bound to see a bunch of good teams, like Oregon State," said Burk. "There are a few teams that are in our league there, so we should be getting some good

No contract—no play: not true for hockey playing club

by Beth Rasgorshek for the Argonaut

When the Idaho field hockey team was suddenly dropped at the end of spring semester last year, it surprised many field hockey enthusiasts. Because other regional schools had dropped their programs, the traveling expenses would have been too costly for the Vandal team to compete.

Many of the players had to make quick choices and some ended up taking scholarships at other schools. Those that stayed have formed a field hockey club.

Headed by Pami Singh, a graduate engineering student from India, the club is slowly getting underway. There are five club members that played on the field hockey team. They

include last year's captain, Kristi Pfeiffer, Holli Glidden, Laura Grannis and Kelly Murphy. Singh started the club with help of past hockey coach Jodean Moore.

The "love of the game" is what keeps the club together. It gets no funds from ASUI, so the money has to come from elsewhere. "If I can do it without going through the university red tape, I will, for right now," Singh said.

The group has tentative plans

to attend tournaments in Seattle. In order to go the club will have to rely on fund-raising.

Singh describes the club as an "open club."

"We want participation, and people that know how to play are as welcome as those who are just interested."

The team has been fortunate to be able to scrimmage against Washington State University's field hockey team every Saturday morning.

Interest is Singh's main con-

cern right now. "Our plans will only materialize if people are interested and if they are willing to be committed."

Singh feels the club is competitive and that, if there is enough commitment to go to the tournaments, they should play well against the Seattle clubs.

"Washington State is very organized and very competitive, and we feel fortunate that they will scrimmage with us," Singh said.

For \$499 an amazing music system that isn't a 'starter' or a compromise for a limited budget, but a total delight to own.

Thanks to a pair of really amazing new speakers from Boston Acoustics, we are able to offer the best low-cost stereo system we have ever heard, a system with truly wide-range, absolutely convincing sound.

The new A-60 speakers are the latest product of a company which specializes in (and has an unmatched reputation for) lowering the cost of excellence in sound. The A-60's go as far up the frequency scale as anything you can find, and their bass equals that of far more expensive speakers. (It's within an ace, in fact, of the

absolute best to be had at any price.) In between top and bottom is the musically balanced octave-to-octave response that gives all Boston loudspeakers the sound people keep calling "right."

To power the Bostons, we've chosen the Hitachi SR2000 receiver, an outstanding unit with clean low-distortion sound at all listening levels. The Hitachi SR2000 will also bring in an amazing number of AM and FM stations without fuss or fuzz.

For a record player, we've

picked the Hitachi HT20S semi-automatic turntable with a Signet TK1E cartridge (and diamond stylus), which will get all the sound from your records, and treat them with respect.

If you drop in (with your favorite and/or most demanding record, if you wish), we'll be happy to explain how the new Bostons sound the way they do for the price. Once you hear our Boston system, the only thing you may want to know is how quickly we can bring one out of the stock-room.

City-wide elections

Two UI students in race for council seats

by Dan Eakin
of the Argonaut

Tod Elliott is a 22-year-old University of Idaho student with an eye on a city council position, but he says he doesn't consider himself a politician; just a citizen with the city's best interests in mind.

Elliott said issues that really concern the citizens of Moscow are the downtown revitalization, city budgeting and city growth.

Originally from Los Angeles, he is the owner of a Moscow apartment building and his general studies background at

the university has included several classes on real estate and business.

Elliott attended Wednesday evening's open forum for city candidates and said that one topic discussed in some depth was the city growth issue.

He considers planning an important aspect of city functions and agrees with the notion that the council should be able to tell individuals where they can and cannot build.

He said that being in Los Angeles has shown him what a mess things can become when planning is not present, and he said that Moscow's growth can't be controlled.

"The growth can't be stopped; it's going to happen," he said, adding that Los Angeles is the perfect example of what can happen when planning principles are not followed.

Elliott said the main purpose of any city council is to respond to what the majority of people in the community want. He said he plans to look at each issue in the light of whether it will benefit the community as a whole.

On city budgeting, Elliott said it is becoming apparent that care is going to have to be taken when deciding where city money is spent in the future because there is less money available for cities to use.

He is not critical of the downtown renovations because he said it will be good for the downtown, and also for the city as a whole.

"It's something that will help everyone. People are ticked because things are all torn up right now," he said.

In discussing the community center inhabiting the old Moscow post office he said, "It will be fine to have the community center if the activity fees cover the costs of running the building."

Elliott said he feels the campaign for city council is going well so far and he has talked to as many people as possible about his candidacy.

He said it is good for nine people to be running for city council because it gives the voters a good choice.

by Chan Davis
of the Argonaut

University of Idaho student Dominic Swayne isn't satisfied with the way the Moscow City Council is run, so he has decided to run for one of the three open positions.

Nine candidates are running for the positions but Swayne, a political science major, believes he has a good chance because he knows a lot of people downtown.

The city budget is a major issue, but Swayne thinks the city can easily live within its

budget. "It's just a matter of priorities," he said. The downtown revitalization project took a lot of money, but part of the money came from a federal grant, Swayne said, adding that what's already done can't be erased.

Concerning the proposed city park, Swayne said it is a waste of money, considering there are already two parks in the area.

Swayne also brought up university relations, noting the scheduling of business meetings during the summer and the avoidance of student input.

He also thinks the Planning and Zoning Committee has too much control over the use of private land. He said, however, that "unless people register and vote, they don't have room to complain."

Swayne, 20, is the son of Dave and Anita Swayne of Moscow. He is a UI cheerleader

and a member of Army ROTC and the National Guard. After graduation, Swayne plans to join the army and serve for about 20 years as a pilot. He will be commissioned in May, but will not go on active duty until 1986.

Oct. 23 is the voter registration deadline, and Nov. 3 is the city election in which the mayor and three city council positions will be filled.

WHAT COULD THE ARMY POSSIBLY OFFER A BRIGHT PERSON LIKE YOU?

Drop your guard for a minute. Even though you're in college right now, there are many aspects of the Army that you might find very attractive.

Maybe even irresistible. See for yourself.

MED SCHOOL ON US

You read it right.

The Army's Health Professions Scholarship Program provides necessary tuition, books, lab fees, even microscope rental during medical school.

Plus a monthly stipend that works out to about \$6,000 a year.

After you're accepted into medical school, you can be accepted into our program. Then you're commissioned and you go through school as a Second Lieutenant in the Army Reserve.

The hitch? Very simple. After you graduate, you give the Army a year as a doctor for every year the Army gave you as a med student, with a minimum obligation of three years' service.

INTERNSHIP, RESIDENCY & CASH BONUSES

Besides scholarships to medical school, the Army also offers AMA-approved first-year post-graduate and residency training programs.

Such training adds no further obligation to the scholarship participant. But any Civilian Graduate Medical Education sponsored by the Army gives you a one-year obligation for every year of sponsorship, with a minimum obligation of two years' service.

But you get a \$9,000 annual bonus every year you're paying back medical school or post-graduate training.

So you not only get your medical education paid for, you get extra pay while you're paying it back. Not a bad deal.

A GREAT PLACE TO BE A NURSE

The rich tradition of Army Nursing is one of excellence, dedication, even heroism. And it's a challenge to live up to.

Today, an Army Nurse is the epitome of professionalism, regarded as a critical member of the Army Medical Team.

A BSN degree is required. And the clinical spectrum is almost impossible to match in civilian practice.

And, since you'll be an Army Officer, you'll enjoy more respect and authority than most of your civilian counterparts. You'll also enjoy travel opportunities, officer's pay and officer's privileges.

Army Nursing offers educational opportunities that are second to none. As an Army Nurse, you could be selected for graduate degree programs at civilian universities.

ADVANCED NURSING COURSE, TUITION-FREE

You get tuition, pay and living allowances. You can also take Nurse Practitioner courses and courses in many clinical specialties. All on the Army.

While these programs do not cost you any money, most of them do incur an additional service obligation.

A CHANCE TO PRACTICE LAW

If you're about to get your law degree and be admitted to the bar, you should consider a commission in the Judge Advocate General Corps. Because in the Army you get to practice law right from the start.

While your classmates are still doing other lawyers' research and other lawyers' briefs, you could have your own cases, your own clients, in effect, your own practice.

Plus you'll have the pay, prestige and privileges of being an Officer in the United States Army. With a chance to travel and make the most of what you've worked so hard to become. A real, practicing lawyer. Be an Army Lawyer.

ROTC SCHOLARSHIPS

Though you're too late for a 4-year scholarship, there are 3-, 2-, and even 1-year scholarships available.

They include tuition, books, and lab fees. Plus \$100 a month living allowance. Naturally they're very competitive. Because besides helping you towards your degree, an ROTC scholarship helps you towards the gold bars of an Army Officer.

Stop by the ROTC office on campus and ask about details.

UP TO \$170 A MONTH

You can combine service in the Army Reserve or National Guard with Army ROTC and get between \$7,000 and \$14,000 while you're still in school.

It's called the Simultaneous Membership Program. You get \$100 a month as an Advanced Army ROTC Cadet and an additional \$70 a month (sergeant's pay) as an Army Reservist.

When you graduate, you'll be commissioned as a Second Lieutenant,

but not necessarily assigned to active duty. Find out about it.

A BONUS FOR PART-TIME WORK

You can get a \$1,500 bonus just for enlisting in some Army Reserve units. Or up to \$4,000 in educational benefits.

You also get paid for your Reserve duty. It comes out to about \$1,100 a year for one weekend a month and two weeks annual training.

And now we have a special program to help you fit the Army Reserve around your school schedule.

It's worth a look.

A SECOND CHANCE AT COLLEGE

Some may find college to be the right place at the wrong time for a variety of reasons. The Army can help them, too.

A few years in the Army can help them get money for tuition and the maturity to use it wisely.

The Army has a program in which money saved for college is matched two-for-one by the government. Then, if one qualifies, a generous bonus is added to that.

So 2 years of service can get you up to \$15,200 for college, 3 and 4 years up to \$20,100. In addition, bonuses up to \$5,000 are available for 4-year enlistments in selected skills.

Add in the experience and maturity gained, and the Army can send an individual back to college a richer person in more ways than one.

We hope these Army opportunities have intrigued you as well as surprised you. Because there is indeed a lot the Army can offer a bright person like you.
