## House Education Committee OKs printing

### In-state tuition bill jumps first hurdle: 13-3

A bill to legalize in-state tuition at the University of Idaho is gaining momentum and has moved one step closer to becoming law.

The bill was introduced Monday morning to the House Education Committee by Rep. Daniel Kelly (R-Mountain Home). It passed the committee by a vote of 13-3 and is being sent to the Printing Committee.

Rep. James Lucas (R-Moscow), told *The Idaho Argonaut* in a telephone interview Monday morning that the Printing Committee is made up of legislators who can vote to print or not print any bill that comes to them.

"The Printing Committee will consider the tuition bill this morning," Lucas said. "I believe they will print it."

"You have to understand some people favor printing everything," he said. "It's part of the democratic process."

If the bill is printed, it will go back to the House Education Committee for debate. If it passes in Committee by a two-thirds vote, it will be sent to the House floor.

The bill must then pass the House floor by a two-thirds vote before being sent to the Senate Education Committee, where it must again pass a two-thirds vote to be considered on the Senate floor.

If the tuition bill does pass the Senate floor by two-thirds vote, it will appear as a resolution on the November ballot, leaving the final decision to the voters.

Under the Idaho Constitution, tuition cannot be charged at the University of Idaho. Only statutes prohibit in-state tuition at Boise State University, Idaho State University and Lewis-Clark State College.

Lucas said there are two questions the bill will raise: "Are you going to allow the income of higher education to continue to decline, when it needs more funds? And, are you going to turn your back on the students, especially the poorer students?"

He said the group affected by in-state tuition would be students who aren't eligible for financial aid, and those who aren't able to receive funds from their family, due to unemployment or other unfortunate circumstances.

"I think this bill could be very close," Lucas said. "Now is the time for students to step up and lobby all legislators."

Lucas said a committee was appointed to study higher education last summer.

"The committee was chaired by Rep. Kelly," Lucas said.

"They recommended dropping tenure, implementing in-state tuition and also addressed enrollment limitations, but it only passed that committee by one vote."

## Bye-bye education, Hello in-state tuition

*"Now is the time for students to step in and lobby all legislators."*

— Rep. James Lucas

### Last day to register free

Today is the last day to register for spring semester without having to petition for acceptance and pay an extra \$50.

Even though a student may have had his entire schedule validated, the registration process is not complete until all fees have been paid. Students failing to complete registration before the deadline will receive a letter of cancellation from UI Registrar Matt Telin. Then, "his name will be removed from the class register," Telin said.

If that happens, the only way for a student to stay in school is to appeal to the Academic Deans Council petitions subcommittee. If the appeal is suc-

cessful, the student still has to pay the \$50 late registration fee.

"Successful is the key to the whole thing," Telin said. "It's not guaranteed that the petition will pass."

Telin said that deadline is important because "the State Board of Education requires each institution to report its enrollment after 10 days." Allocation of state funds is based, to some extent, on those enrollment figures.

Although efforts are made every year to alert students who have not completed registration, Telin estimated that 25-40 people usually miss the deadline.

## Letter and phone call campaign urged by PCC

Letter-writing campaigns and telephone lines will be the focus of the Political Concern Committee's attempt to fight the in-state tuition bill now facing the Idaho legislature.

The letter-writing campaign will begin this week, according to Douglas Jones, sophomore political science major and chairman of the committee. Committee members will go to living groups with pencils and paper to help students write letters to legislators.

"There are legislators who haven't made up their minds about tuition," Jones said. "Those people are our targets."

Telephone lines will also be open all day Tuesday for students to contact their legislators.

According to Jones, the best time to contact legislators is between 7 and 8 a.m. and 1 and 4 p.m. Students who want to contact their legislators should go to the SUB information desk.

The Grapevine, the student information number, will have current information of the status of the bill and will also have a list of the legislators that could possibly be persuaded to vote against the bill. The Grapevine number is 885-6160.

Jones said the committee will work "full steam ahead" in the next few weeks in its efforts to fight the in-state tuition bill, and is looking for anyone who wants to help in the effort.

Informative posters and pamphlets on in-state tuition will be published in the next few weeks, Jones said.

Committee meetings are Wednesdays at 7:30 p.m. in the SUB Ee-da-ho Room and are open to all students

The Argonaut is published twice weekly during the academic year by the Communications Board of the Associated Students of the University of Idaho. Offices are located in the basement of the Student Union Building, 620 Deakin Avenue, Moscow, Idaho, 83843. Editorial opinions expressed are those of the Argonaut or the writer, and do not necessarily represent the ASUI, the U of I or the Board of Regents. The Argonaut is distributed free of charge to students on campus. Mail subscriptions are \$6 per semester or \$9 per academic year. Second class postage is paid at Moscow, Idaho (USPS 255-680).

## Budget breakdown: where your money goes

by Debbie Brisboy  
Political Editor

In these days when money is a big concern, everyone wants to know where their hard earned dollars are going. And that includes students.

When an Idaho student pays \$350.50 in fees at registration, \$21.50 goes into the ASUI budget to be divided among various departments and services. A total of \$245,035 was budgeted for departments and services this year.

The budget is determined on a zero basis with a line item analysis, according to Andrea Reimann, Finance Committee chairwoman.

When a zero-base budget is used, Reimann said, the budget is prepared from scratch. No money is carried over from the prior year unless it is being saved over the long run for a specific purpose. Line item analysis means that the budget must list line for line what money will be spent on, she said.

When the Finance Committee starts to work on a budget, it requests four budgets from each department. These include a minimum working budget, a current budget taking into consideration inflation, a budget at an increased level, and a budget at a decreased level.

All the budgets vary depending on their purpose. For example, the promotions department, which includes the promotion of the ASUI golf course, Gem, photo bureau, KUOI, ASUI programs, activities and press releases, has a budget of \$5,347. Since it has

no source of income, the ASUI subsidizes the entire amount.

The outdoor program has a budget of \$18,027 and is again totally subsidized by the ASUI. Its expenses include publicity and printing, costs of evening presentations, and educational and interpretive displays, plus salaries for a director and assistant director.

The ASUI does not subsidize the outdoor rentals program budget of \$14,000 because it generates enough income to cover its expenses.

The ASUI golf course receives only \$10,159 of its \$92,159 budget from the ASUI. The rest is received through income. The golf course budget includes salaries for a golf professional, superintendent and assistant superintendent. Main expenses of the golf course include machine maintenance, fuel, fertilizer and seed.

The justice department is totally subsidized by the ASUI. Its budget is \$3,547 and includes expenditures for salaries and legal aid.

The programs department has one of the largest budgets in the ASUI. It includes expenditures for Issues and Forums, homecoming, parents' weekend, coffeehouses and blood drives. The budget also covers salaries for a programs manager, assistant manager and coffeehouse specialist. The department has no projected income, so the ASUI subsidizes the entire amount of \$28,085.

The concert committee budget is made up of \$27,483 from the entertainment fee of \$2. All costs including promotions, telephone, travel, set-up costs and help necessary to put

on a concert are included in this budget.

Another department with a large budget is *The Idaho Argonaut*.

Its total budget is \$102,038, of which \$30,038 is paid by the ASUI. *The Idaho Argonaut's* costs include salaries for editors, plus costs for travel, printing, production and miscellaneous office supplies.

*The Gem of the Mountains* subsidizes its own budget of \$22,156. Its costs include salaries for editors and staff members, and various costs related to the publishing of the yearbook.

The production bureau is subsidized \$9,051 by the ASUI while it generates \$45,000 of income for its total budget of \$54,051.

The Photo Bureau pays salaries for a director, photographers, and camera costs out of its budget of \$16,980. The ASUI subsidizes \$12,980 of this budget.

The student radio station, KUOI-FM has a budget of \$27,226. Its costs include salaries for various staff positions, miscellaneous costs and news service subscriptions. Projected income for the station is \$2,000 while the ASUI subsidizes \$25,226.

The polls and surveys bureau budget of \$1,500 is subsidized totally by the ASUI, as is the academics department budget of \$2,331. Other departments totally subsidized by the ASUI include the student bar association, \$2,780; tutoring services, \$2,899; and the credit union feasibility study, \$957.

A new program instituted this semester, the lecture notes

program, has a budget of \$19,875. Of this amount, \$3,000 is subsidized by the ASUI, while \$16,875 is income generated from the service.

The president's budget, which includes salaries for the ASUI president, vice president, lobbyist, finance manager, assistant finance manager and administrative assistant, plus various travel expenses, is \$22,017.

The Senate salaries budget which includes travel allocations, is \$10,702 and is subsidized totally by the ASUI.

The salaries of the general manager of the SUB, cashier, and conference coordinator is included in the general administration budget of \$42,475.

The general communications budget of \$13,423 includes salary for a general communications secretary.

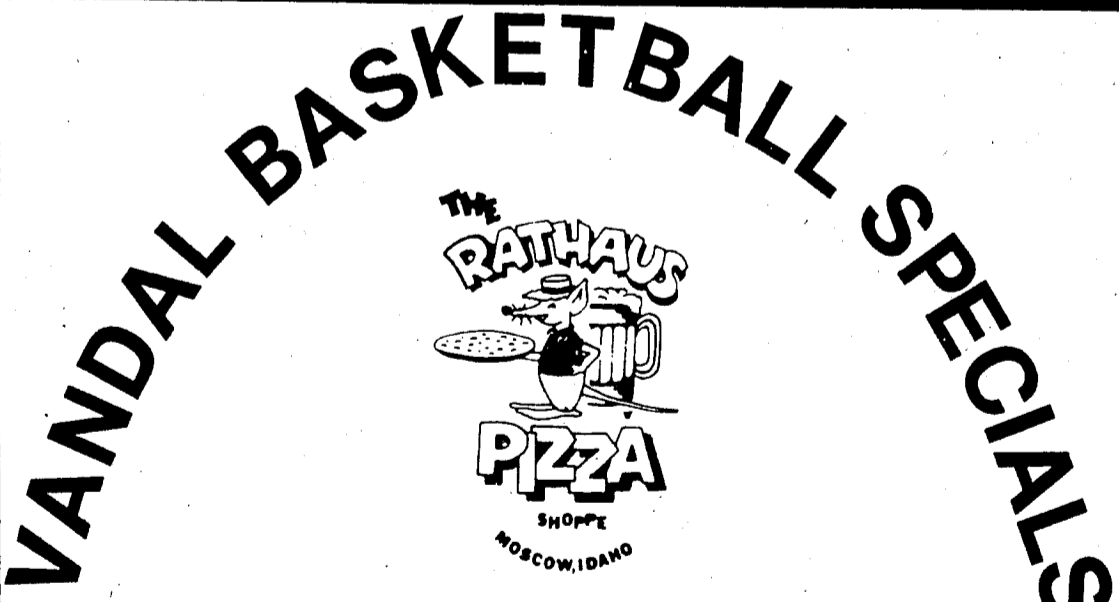

The general reserve account and repair and replacement accounts are also budgeted for, but in a different manner.

According to Tom Crossan, ASUI finance department manager, the reserve and repair account receives an automatic \$5,000 each year and is added to any funds left over from the year before.

Funds left over in the general reserve account are left there. In addition to these funds, any department that makes over its projected amount of income may keep 10 percent of that income. The other 90 percent goes into the general reserve account.

If the general reserve account goes below \$20,000, all the income departments make over their projected amount must go into the general reserve account.

*This is the second part in a three part series on the ASUI. Watch for part three on ASUI departments.*

# Administration approves new engineering building site

by Mark Croy  
Staff Writer

The site for a new Agricultural Engineering Building has been approved by University of Idaho administration officials, according to Nels Reese, director of facility planning.

The new building will be on the corner of Sixth Street and Perimeter Drive, across the street from the intramural fields, Reese said.

He said the Campus Planning Committee and the Agricultural Engineering Department made recommendations to administration officials for locations.

"An alternative site proposed was on Paradise and Line Street, but it appeared to be too small and could create parking problems," Reese said.

The building will have a \$1.8 million budget, according to Reese. The state and the university will each provide half the money, he said.

Raymond Miller, dean of the College of Agriculture, said the legislature still has to approve \$450,000 of the \$900,000 the state will provide toward construction of the building.

Miller said the State Board of Education/Board of Regents and the Permanent Building Fund Council have approved the request. He also said the legislature will likely approve it during the current legislative session.

The cost of constructing the building will be about \$1.6 million, Reese said. The rest of the money will be used for various other fees, including architect fees. He said an architecture firm from Coeur d'Alene, called

Team 8, will be working on the plans for the building.

"The architects are in the final stages of the developing program, working with the Agricultural Engineering Department and finding what their needs will be in the building," Reese said.

He said the next step for the architects will be to develop several preliminary layouts of the building.

"We hope to have preliminary plans by the end of February," Reese said. He said the final plans will probably be finished by this summer and bids will be taken from construction companies.

"Construction should start by July," Reese said. He said construction will take at least the better part of a year and hopefully the building will be ready for use in the fall of 1983.

# Council will discuss commencement, core curriculum

A proposal to allow a listing of faculty awards in the commencement program and a core curriculum will be topics of discussion at today's Faculty Council meeting.

Discussion on the proposal was delayed until this week's meeting because Charles Mc-

Quillen, dean of the College of Business and Economics, had asked to address the question, but he could not be present at last week's meeting.

The proposal grew out of a contract made between the university and A. Darius Davis, after the A. Darius Davis Free

Enterprise Award was set up. The contract states, "Recognition will be at the University's annual commencement exercise."

Faculty Council Secretary Bruce Bray said the purpose of commencement is to honor students, not faculty members and the faculty should only play the part of a sponsor.

Faculty Council President Richard Heimsch said, in talking with Financial Vice President David McKinney, there may be some possibility that the con-

tract with Davis could be renegotiated.

The council will also consider establishing a new classification of adjunct faculty. The purpose of the classification, according to a memo to the council from Academic Vice President Robert Furgason, is to make it easier for those faculty members to be recognized and promoted.

An adjunct faculty member normally does not teach, but may, at the invitation of academic departments, teach

classes, advise students, participate in research projects and serve on graduate supervisory committees.

The council may also begin the first step in narrowing down courses to be listed in the core curriculum for baccalaureate degrees.

In December 1980, the faculty approved the structure for the core curriculum. Most of the colleges and departments on campus have submitted recommendations of classes to be included in the curriculum.

# Opinion

## Time to act

It was bound to happen sooner or later. The Idaho House of Representatives has taken that all important first step towards the implementation of in-state tuition in this state. Granted, it is a tentative step, but it's there.

The ball is in our court now. Really, it has been here all along—it's just that most of us are so damnably lazy that we don't do anything but complain between classes. We don't write to the governor; we don't bury the statehouse under a mountain of paper; we don't vote those in favor of tuition out of office. Can we really expect anything new to happen now?

In one moment of fancy, let us suppose that this university *does* wake up and do something. Consider these scenarios: the legislature is besieged by angry students, parents, and faculty, and backs down; or, the measure flies through the House and Senate and appears on the November ballot, where it is defeated, and the legislature is cleansed of callous louts.

We do not see this as a students-only issue. The same people who want to impose in-state tuition for the first time in the university's history want to make a few more changes—among them the elimination of tenure, and the implementation of enrollment limitations. In the past, student leaders have not seen fit to assist faculty in their fight to preserve hard-won gains. Mirroring this, the faculty traditionally sees themselves as being above the student fight to maintain a quality education at a low price in Idaho. Perhaps it's time to send the politicians home and let the issue be met by those who have something more than acquiescence to offer.

What will be the effect of expensive low-grade education in Idaho? Quite probably, students who have the choice will flee this state like so many rats, and faculty (without tenure, and with low salaries) will avoid Idaho like the plague.

Okay folks, what's it gonna be? This university and state are at an historic crossroads, and what we do or *do not do* will determine the course of post-secondary education in Idaho for generations to come.

Lewis Day

## Worth the effort

Attention University of Idaho faculty, staff and students. It's time to get off your butts and save higher education from the grips of "percentage based in-state tuition."

Right now, a bill before the House Education Committee, if passed, will implement in-state tuition—provided the voters also agree in November.

This is not a new issue. For the past two years, the legislature has been considering tuition in some form or another in an effort to defray the cost of higher education.

In other words, because the legislature won't come up with the needed funds, they're going to push the burden over to the students.

I don't know about you, but members of this editorial staff can't afford to pay \$1,000 or more a semester to go to school. This is the situation we're facing.

Rep. James Lucas (R-Moscow) said we have a good chance to defeat the bill, if only students will tell the legislators how they feel.

In the past, only a few students have bothered.

A handful of students on the Political Concerns Committee are voluntarily spending many hours trying to organize this university community into some kind of lobbying force.

We at *The Idaho Argonaut* think it's a pretty sad situation when a student body of 8,000 leaves an issue as important as tuition to the few who give a damn.

The PCC has arranged FREE phone lines to the legislature today. All you have to do is stop by the SUB information desk and call your legislator to tell them your feelings.

The lines will be open all day today, and according to Doug Jones, PCC chairman, the best times to reach your legislator personally are between 7 a.m. and 8 a.m. or between 1 p.m. and 4 p.m.

The PCC is also taking paper and pens to living groups this week to generate letters. We fail to see why students have to be provided with writing utensils to send a letter which could help save the quality of education in Idaho.

This time we're going to get in-state tuition if the students of this state don't take a small amount of time to inform their state representatives of the students' view.

The PCC is looking for people to help out. If you're interested, go to their meeting Wednesday at 7:30 p.m. in the Ee-da-ho Room at the SUB.

If it is impossible for you to devote any time at all to the PCC, at least make the time to call or write your legislator.

Refer to the front page of this issue for correct district and address information.

The time to act is now. If we all don't, it will be too late.  
Suzanne Carr

" I SEE YOU'VE MET HIS TWIN BROTHER. "

## Let's get it done

Lewis Day

With less than six months left for the ratification process to be completed, it would seem that the Equal Rights Amendment is gasping for breath. Perhaps it is, but we aren't. Passage of the amendment, while essential, is not an end unto itself. Whatever the status of the ERA in July, those who support equality for all people will keep on striving.

The idea of an amendment is nothing new; as soon as women were guaranteed the right to vote, several Republican (that's right *Republican*) members of Congress introduced the ERA, which of course, didn't pass. The proposal of the amendment eventually became an annual event in Congress, pushed often solitarily by Alice Paul, who recently died. She spent her entire adult life persuing passage and implementation of the amendment which should bear her name. Thirty-five states have ratified the ERA since its passage in 1972 by the Ninety-second Congress. An overwhelming margin of Senators (84-8) and Representatives (354-23) approved the bill. Only three more states need to ratify the amendment in order for it to become part of the Constitution.

It should have been part of the Constitution from the very beginning, but our founding fathers obviously overlooked women. And blacks. And all minorities. An argument against the amendment swirls around already existing legislation, such as Title VII of the 1964 Civil Rights Act, and the Equal Pay Act of 1963, as well as the equal protection clause of the Fourteenth Amendment. These are well and good, and quite fine, but they lack the punch that is an integral part of the current ERA. They aren't specific enough. To those who would say that a specific amendment is unnecessary, I ask if they also believe that the Thirteenth, Fourteenth and Fifteenth Amendments were unnecessary for the guarantee of equality for blacks in the nineteenth century. Of course they were (and are) necessary, just as the Equal Rights Amendment is an imperative for today.

It seems a bit late to start explaining all the reasons why an ERA is needed, but I keep running into people who seem to need it explained to them, so I guess it's still necessary. The reason cited above is probably the most urgent for today, but there are other, long term reasons why this addition to the constitution is absolutely imperative. The ERA is a natural extension of the enlightenment age concepts embodied in the U.S. Declaration of Independence, Constitution and Bill of Rights. This amendment would guarantee equal pay for equal work performed; it would require complete parity in such areas as Social Security, property rights, custody rights,

jury duty and all areas of national responsibility and privilege.

The Equal Rights Amendment has been unfairly accused of demeaning the role of the stay-at-home wife. As U.S. Representative Florence P. Dwyer (R-NJ) said, "...the Equal Rights Amendment can only enhance the status of traditional women's occupations, for these would become positions accepted by many women as equals, not roles imposed upon them as inferiors."

Attitudes need to be changed, too. A couple of days ago, I overheard two men who were professedly "born again" talking about women they knew. One mentioned a security guard he had seen, but had had no professional dealings with. "She was a pretty small little girl, I guess she knew a lot of karate," he said, laughing. His buddy agreed, and said, "Yeah, the guy (a criminal?) must have died laughing." They both had a good chuckle about this "girl" and several others they knew. Later I heard some other men talking about the effectiveness of psychologists. They determined that women were effective in only 5 percent of the cases they handled, and that the field of counseling is obviously one in which men are better qualified, by genitalia, to work. Many men (some women say most) have assinine ideas about what being a woman is all about. I don't profess to know all the answers, or even many of them. Women can, and must, begin to forcibly educate men about what equality is. The slogan uttered in *Network* needs to be adopted by feminists (female and male) all over this country—"I'm mad as hell and I'm not going to take it anymore."

The war on the ERA has intensified in the last couple of years. The Carter administration, although ostensibly in favor of the amendment, didn't do much to help its passage. Ronald Reagan reversed forty (40!!) years of Republican platform support for the amendment by declining to support it at all. I guess Nancy has all the rights she needs, thank you. Judge Callister will be overruled—because he is wrong. I'm not surprised at the campaign against the Equal Rights Amendment; the fundamentalist, white, male supremacist lunatic fringe is intensely powerful, and they will do whatever is within their power to retain their hegemonious power-hold on the U.S. The consolation is that *the people* support the amendment. Recent surveys indicate over half the people in this nation support the amendment, despite the vicious smear war waged by the frightened few. In the words of an old spiritual and civil rights hymn, "Oh, deep in my heart, I do believe—we shall overcome someday."

## Son of snowball

Editor,  
As you may have noticed, Mother Nature dropped several inches of snow upon us this last weekend, making conditions hazardous to venture outside. This seems doubly so for women obviously in a family way (i.e. pregnant).  
In view of this condition perhaps the men (?) of Pi Kappa Alpha could pick their ice-ball victims with more discretion. Good neighbor relations are something to be worked for, we all agree. However, the Pikes should be advised that throwing ice-balls at their neighbors is not good P.R., especially when they throw them at a pregnant alumna.

## Ultimatum

Editor,  
I've just recently visited the satanic temple, the building some regard as the University Art Gallery. What I saw and learned there has germinated another cell of dissatisfaction in my broken faith of the art department's ability to handle successfully affairs directly dealing with the production and exhibition of fine art.  
Once again the gallery has excluded the graduating B.F.A. students from its scheduled list of events. I say once again, because last year the B.F.A. students were excluded, and only through my arm-twisting did a show materialize. Incidentally that show was a last-minute throw together, with the announcements arriving four days late for the already begun show. Consequently I, a graduating B.F.A. student last year, refused to show. I am dismayed to see that once again the gallery has opted to exclude the B.F.A. thesis shows.  
May I suggest that the gallery has fallen into the hands and influence of self-seeking ego interests. May I also suggest that the gallery has fallen into the hands of novelty marketeers with little or no interest in art. Another glaring example, right now for three dollars you can purchase a postcard featuring Prince Charles coddling the bare breasts of Lady Diana, from where else but the art gallery!  
Now I have this demand. The gallery, to repair some of the damage it has created, must reschedule its events to include the B.F.A. thesis shows. The gallery must also trash can its current schedules and print new ones which include in writing the B.F.A. thesis shows. And finally, the apathetic art students must get off of their dead-asses and scream.  
Tom Layne

## Satan's platters

Editor,  
Religion seems to be making the head-

lines these days; *The Lewiston Tribune* recently carried the article titled, "Valley Christian Students Break Rock'N Roll Albums". A new wave of record breaking also seems to be hitting the University of Idaho campus.  
Farmhouse Fraternity is amidst the controversy. On Thursday evening tapes could be seen outside burning in the pit.  
Personally, I have never played a record backwards to hear what Satan has to say, and I never intend to let my curiosity get the best of me. If record breaking can produce positive attitudes and give us a greater love for our omnipotent God then I can see the inspiring side that massive record breaking ceremonies might have on today's youth.

However, if records and tapes are broken for the purpose of keeping up with the in fad, the new groove, and are not related to one's own personal beliefs, then record breaking will not save you from hell. The only thing that will keep you straight with the Lord is having faith and knowing that you stand in the heart of the presence of the love of God!  
Gary A. Butts

## Priority funding

Editor,  
It's hard to believe the University of Idaho originated as a land-grant, not a sports-grant, college. It's equally hard to believe those who tell us there is a finan-

cial crisis facing Idaho's four institutions of higher learning. That is to say, difficult to accept that *all* areas of these schools have been financially stricken. Things can't be all that bad if the new UI football coach receives a \$4,000 raise (for a total of \$38,000) before he even proves his ability here. And, of course, if the University of Idaho has money to fix the Kibbie Dome roof—not to mention building the East End Addition—then the library must be virtually overflowing with new books purchased on equally large budgets. Well, if things seem so rosy in some parts of the university, why are they so bad in others? How can the Board of Education approve sizeable salary increases for the football coach when 18 people in the College of Agriculture lost their jobs (11 of them tenured)?

If the university is willing to pay competitive market prices for sought-after coaches to produce seasonal winning teams, then it must surely be willing to pay similarly competitive prices for academic faculty to educate students and stimulate their creativity to make useful, rewarding, and lasting contributions to society. So far this doesn't seem to be the case.

# The Emperor has no clothes

Daniel Junas

Everyone has heard the story of the emperor who had no clothes. Once upon a time there was an emperor who wanted to believe that he was bedecked in the finest of clothing. In fact, he was as naked as could be. But apparently everyone around him also wanted to believe that he was wearing the finest of clothing. So they all pretended he was. Until one day, much to everyone's dismay, a poor, naive child called attention to the obvious: the emperor had no clothes.

It is easy enough to understand why the emperor wanted to believe, but why was everyone else so willing to participate in this grand illusion? Some might say they feared the power of the emperor. But that only begs the question: why did they fear a naked, delusioned man? It must be that they all had a stake in this illusion. Perhaps it made them feel better to have a splendid emperor.

My purpose in recounting this tale should become apparent when I explain that last semester I took Biology 100. I needed a course to fulfill the lab science requirement for graduation. So every week I went into the lab and pretended it was a lab. It really was just busy work. I looked at film strips, listened to cassettes, copied meaningless information into my lab manual. What I did not do, with only rare and minor exceptions, was anything that remotely resembled laboratory science. Yet by showing up every week and going through the motions I tacitly acquiesced to the idea that this was a lab science course.

As far as I could tell, the other students knew it was not a lab science course. The lab assistant certainly knew it was not. I cannot say for sure about the professor. And to be perfectly honest, I cannot say whether it would be worse to find out

that she believed it was a lab science course, or to find out that she was perpetrating a sham.

But why were we all willing to pretend? I will not presume to explain other people's motivations. I can only speak for myself. I want to graduate. I value a piece of paper.

Why do I value that piece of paper? I came to school to get an education. Or so I tell myself. And I really have gotten an education; despite distractions like Biology 100 I have learned quite a bit. But I also want that piece of paper.

It will make my mother happy if I get that piece of paper. That seems like a pretty good reason to go a little bit out of my way and take Biology 100. But why does she value that piece of paper? She says it will make it easier for me to get a job or go to graduate school (if I should want more paper).

I have to admit she is right. I guess I value that piece of paper.

But why do other people value that piece of paper? Do they not know that Biology 100 is a sham? Or do they have their own reasons for pretending? I cannot answer that, because I promised not to try to explain other people's motivations.

About all I can do is tell an anecdote that seems pertinent. President Lincoln, while discussing politics with his colleagues, once asked, "Gentlemen, if we call the tail a leg, how many legs does a horse have?" "Five," they all responded. "Wrong," Lincoln said. "Calling the tail a leg does not make it a leg."

I knew all along that the tail was really a tail. So I would have to admit that you could find me just under the tail.

Daniel Junas is a Senior in Classical Studies.

## Quick passage

Editor,  
During finals week, a special session of the ASUI Senate was called by Vice President Greg Cook because of requests by a large majority of Senators to pass Senate Resolution no. 1 (introduced by Senators Mike Smith and Jeff Kunz and amended by the Senate Ways and Means Committee). The passage of this resolution, outlining a clear policy concerning tuition, is perhaps one of the most significant actions taken by the Senate in ASUI history.  
The resolution states that ASUI opposes in-state tuition and redefinition of tuition and supports other revenue enhancement measures such as hiring more income tax auditors and closing some exemptions in the sales tax.  
The main reason that it passed so quickly, it seems, is that it was crucial in the eyes of our Senators to have a clear tuition policy to present to the ASI at their Jan. 14 meeting.  
I applaud our new Senate's prompt, responsible action in the wake of a sloth-like Administration and Senate who didn't seem to feel that tuition was an important enough issue to take a stand on earlier.  
In my opinion, "stupid" no longer resides at the ASUI offices.  
Tom Le Claire

## Faculty Facts

...The veterinary science department has been busy applying small money to big research. Loren Koller, associate dean of the northwest regional veterinary education program and Pete South, UI extension veterinarian are finishing their second year of research on a study measuring selenium deficiencies in livestock.

Their study has shown that many livestock in Idaho suffer from an inadequate supply of the necessary mineral. Selenium deficiency, according to Koller and South, could have a big economic impact on the cattle industry since the study shows it can cause weight loss, increased susceptibility to disease, infertility and stillbirths. All of these affect the price and profit of Idaho stock.

Funding for their project comes from the Idaho Agricultural Experiment Station, the federal government, the Idaho Beef Council and the Idaho Cattlemen's Association.

...Two other members of the veterinary science department were recently selected for certification in the American College of Veterinary Microbiologists.

Marie S. Bulgin, assistant professor of veterinary medicine at the Caine Veterinary Teaching Center at Caldwell, and Lynn Woodward, associate professor of veterinary microbiology, were given diplomas by the organization's board of governors after successfully meeting qualifications for advanced certification.

...A UI economics professor,

Catherine Hoffmann, is the recipient of the first annual A.D. Davis Free Enterprise Award. The \$15,000 government grant will be made annually in support of projects explaining, improving or preserving the free enterprise system in America.

Hofmann, a member of the UI's faculty since 1974, will use the grant to fund a summer research project studying the effects of government regulations on the Pacific Northwest forestry industry.

"The future of this industry in the Pacific Northwest will continue to be bleak unless some changes are made in the policies and practices that are creating an unnecessary scarcity in available timber," Hofmann said.

## Students, deans meet over lunch

by Lorene Oates  
Staff Writer

Galen Rowe, dean of the College of Letters and Science, along with Associate Dean Bert McCroskey, has been holding luncheon meetings with various living groups in an attempt to open communication between the students and the administration. The purpose of the informal meetings is to learn about students' needs, Rowe said.

"We are in a situation now where students have reason to be more concerned about the kinds of employment after college. I want to find out if they (students) feel that Letters and Science is offering something they can use after graduation," he said.

Embarking upon his second semester as dean, Rowe said being new on the job has given him an "excuse" to look at things from a new point of view.

"In my opinion, we are dealing with a different kind of student in the '80s than we did in the '70s. This is due to older students coming to college after some years out of high school. This experience has given them more maturity," Rowe said.

McCroskey said he wants to expand student relations by meeting more students.

After meeting with nine living groups, including an off-campus meeting, Rowe had some lasting impressions.

"Students are serious about college education and seem to be receptive. I feel that we are dealing with one of the most mature and likeable generations of students ever," Rowe said.

## Combined student/faculty credit union is best bet

by Dan Eakin  
Managing Editor

The first part of a four-phase student credit union study has been largely completed, with student response very much in favor of such a facility.

However, Jim Thompson, president of the Idaho chapter of the Financial Management Association (FMA), said it looks like the best route is to expand the existing faculty credit union to include students.

Thompson said the University of Idaho Federal Credit Union board will be meeting at the end of February to discuss member input as to whether the union should expand to include students.

A survey asking university credit union shareholders about including students was sent out in the union's last statement.

Credit union board members will consider member input before making a decision, Thompson said.

One reason the consolidation idea is being pursued, Thompson said, is that not many new charters for lending institutions are being handed out by the National Credit Union Association. In fact, existing institutions are being urged to combine because of high interest rates.

He added that the FMA, working from a \$957 budget given by the ASUI Senate last

semester still has a lot of preliminary work to do.

Despite this, he said things look bright for the student part in a credit union because the four-phase study is right on schedule.

If all goes well, Thompson said, the implementation phase of the credit union plan will take effect in the spring of 1983.

Thompson is further encouraged by the results of a random survey the FMA distributed last semester as part of the feasibility study phase. The feasibility study was designed to determine market potential, or how many students would be interested in a student credit union, and then ferret out the legalities associated with having such a facility here.

Survey results show that most students would use the facility, which, Thompson said, would not likely be located in the SUB where it would be convenient and where security would be good because a safe is available.

Figures show further that 48.4 percent of the respondents said they would deposit \$200 or more in the credit union.

Thompson said the FMA is modelling the UI concept after the University of Connecticut student credit union. It has assets of over \$1 million, with only one loan out at this time.

Thompson said he expects that a low percentage of the students would take out loans here, because as the survey shows, few students have experience in taking out loans.

Those who said they might be interested in taking out a loan said fees and books were the main items for which the loan would be used.

Students expressed the most interest in checking, saving, and day-night teller services. The savings would be compounded at a rate of 6 percent.

Thompson said the joint student/faculty credit union would have the same "hard core" rules applying to union membership in the university facility. They won't be any more lenient, he said.

## For Students Only

...Four UI music majors represented the university with vocal flare at the second annual National Association of Teachers singing contest.

Sophomore Allen Combs, a tenor, and senior Hal Logan, a baritone, received cash awards for their performances. Joanne Parks and Ellen Byrd both reached the finals in the soprano division.

...Informal Rush, an annual

spring event on the UI campus, will officially begin Jan. 25 for all UI women interested in joining a sorority.

Interested persons can contact Dianne Milhollin, advisor for the program. This year the program will be conducted more formally than in the past. Informal rush is for women who were not able to go through the regular rush period set one

week before the fall semester or who decided to try sorority living mid-year.

Participants will attend parties, functions and dinners at any of the nine sororities. The houses must turn in their final invitations by noon Feb. 11.

Noon Feb. 12 will be the deadline for rushees to make their decisions and answer bids.

## Engineering Opportunities

Kaiser Aluminum and Chemical Corporation—a leader in the aluminum and chemical fields—extends an offer to qualified engineers for challenging opportunities. Our engineering positions carry with them:

- the latitude of working in an unstructured environment with minimal supervision
- the opportunity to be project leaders
- the chance of handling projects from concept stage to start-up
- the potential to grow with a progressive corporation where initiative is emphasized.

### On Campus Interviews February 18

Interviewing for  
the following positions:

#### Chemical Engineers

Process Engineering  
Process Control Engineering  
Quality Control Engineering

#### Electrical Engineers

Facilities Engineering  
Computer Engineering  
Maintenance Engineering

#### Mechanical Engineers

Facilities Engineering  
Design Engineering  
Maintenance Engineering

Positions available in the Pacific Northwest, Midwest and Gulf states locations. Contact Placement Center to schedule an appointment with a Kaiser Aluminum and Chemical Corporation Representative. If unable to arrange an interview, please send resume to: Craig Johnson, Recruiting Manager, Kaiser Aluminum and Chemical Corporation, P.O. Box 15108, Spokane, WA 99215.

An equal opportunity employer m/f/h.

"One Person Can Make a Difference"

**KAISER ALUMINUM  
& CHEMICAL CORPORATION**

### FOR A SUMMER JOB Take the FREE SHELTER SURVEY TECHNICIAN COURSE

Three qualifications:

1. Citizen of U.S.A.
2. Architectural or engineering student
3. Pass SST Course

Meets MW 7-9 pm

## Sherrie Crang makes Idaho's cross country squad an all around success

by Brad Webber  
Staff Writer

It wasn't very long ago that Sherrie Crang, a freshman distance runner from Vancouver, Wash., was challenging and defeating male runners in two mile races. But now, instead of racing against men athletes from dubious prep track powers like Forest Grove and Rex Putnam, Crang has used her talents to help propel the UI women's cross country and track teams from good to formidable.

No longer does Crang have to enter into the proverbial battle of the sexes with frustrated male athletes who end up experiencing a humbling experience. She now is surrounded by a host of fine runners, particularly world-ranked Patsy Sharples, to pace her instead of training with the guys as she did at Vancouver's Hudson's Bay High School.

When one thinks of women's cross country, the name Patsy Sharples immediately comes to mind. As the twenty-third best 10,000 meter runner in the world, her name is synonymous with Idaho distance success. Perhaps overshadowed, Crang has gone relatively unnoticed by the media, but not by Roger Norris, women's track and cross country coach.

"In my mind I've tried not to draw parallel comparisons between the two," Norris said. "Sherrie came through the kind of high school program that a person should—not much high mileage and intensity. I'd say when Patsy was a freshman she had already been through several years of rigorous training as the club system there (South Africa) is very difficult. She is a lot more experienced than Sherrie is."

"In terms of saying two or three years down the road that Sherrie will be doing the same thing as Patsy is now, I really can't say," he commented.

Comparing the two is no easy task. Sharples has handily defeated Crang in every head-to-head competition. Crang, on the other hand, completed the three mile Fort Casey cross country course in 16:48 to Sharples' freshman time of 17:20. Essentially, comparison of the two is likened to slicing a Snickers bar: any way you slice it, it comes up peanuts. Thus, there seems no fair way to compare the teammates.

Sharples, however, was one of the reasons why Crang elected to attend the University of Idaho, in addition to the fact that Norris' full-ride bid was the best financial package offered her.

"I knew Patsy was really good. I wanted somebody to push me in workouts," Crang said. "She pushes me and I push her."

"I picked Idaho over Washington, Oregon, Oregon State and Cal-Berkeley," she added.

Without a doubt, Crang is a boon to what was already a strong women's cross country team, which placed fourth at the AIAW nationals last fall. Crang's track times in high school, however, were modest, not spectacular. At first glance, Norris' luring of Crang to Idaho was no great recruiting coup. It wasn't until she competed for Idaho that Crang blossomed into one of the best runners in the region, let alone one of the top freshmen in the United States.

Her track times—9:47 for 3,000 meters, 4:33 for 1500 meters and 2:18 for 800 meters—all recorded last year as a high school senior, will undoubtedly fall with her improvement.

"I'm looking forward to running track. I feel that I'm a step higher in my running. For example, I haven't even run a competitive 1500 since my junior year in high school. I'm excited to see what I can do," she said. She will run the 3,000 and 5,000 meters in the upcoming track session.

She hopes to qualify for the 3,000 meter event at the AIAW National Indoor competition by meeting the stringent 9:45 qualifying standard. Presently she is preparing for Saturday's Oregon Invitational in Portland, where she will compete in the mile run against Leann Warren of Oregon, one of the best milers in the country.

Track is one of Crang's strengths, but road racing is perhaps the freshman All-American's strongest area. Her 34:39 clocking at the ten-kilometer Bagel Run in Portland last month was only 39 seconds off Mary Shea's national record of 33:59 for 18-year old women. In 1980 she placed 10th in the Diet Pepsi National Championships at Purchase, New York over the same distance. Only 17 at the time, Crang placed third in the age group and 10th overall behind 20 and under winner Karlene Erickson who, incidentally, edged Sharples for second place in last year's edition of the event. Her constantly growing expertise in track and cross country will surely complement her string of road race performances.

Still, the greatest surprise about Sherrie Crang is the extraordinary transition she made from high school distance running to the high-pressured collegiate level, a move made with flying colors. And nobody's more impressed than Norris.

"She improved more than I ever could have expected out of any incoming freshman. Usually freshmen have a down year in adjusting to a new lifestyle," he said.

Crang is currently running twice daily, averaging 70-80 miles per week, more than she has ever trained before.

"I know she trains very well," Norris said, "but I don't know if she has translated her workouts into a singularly excellent race," he added, with the feeling that the best is yet to be seen from

Penny Jerome

Sherrie Crang, center, lines up with her teammates for a practice lap.

Crang. "I don't know what her limits are, but chances are she could be one of the best distance runners in the nation. I honestly don't know. We're bringing her along gradually, not rushing things. She has a lot of potential that we're not going to try to rush out of her."

Crang's 18th place finish at the AIAW National Cross Country Championships, where she competed with the flu, is only one example of the drive and determination that exemplifies her competitive spirit. Norris calls her "one gusty little rascal", adding that she "has all of the equipment to be a darn good runner."

Sherrie Crang is undoubtedly a name that will be heard in the future. She will be in the thoughts of track enthusiasts in the days to come—except, of course, the thoughts of those boys from Forest Grove and Rex Putnam.

Idaho rated 11th AP, 10th UPI

## Valiant comeback lifts Irish to 50-48 overtime win

The Vandals' chance to further spread the news across the nation of a Cinderella success story in the State of Idaho was dealt a setback Monday night as Idaho fell in overtime 50-48 to the Fighting Irish at South Bend, Ind.

Idaho, coming off their first setback of the year—last Saturday at Montana—enjoyed as much as a 26-8 lead in the early going but couldn't overcome the tough defense Notre Dame played after intermission and dropped to 16-2 overall. In Big Sky play, Idaho still remains the conference leader with a 5-1 mark.

The Vandals did not make a free throw on the night (a new school record) and scored only

10 points in the second half, plus two in the overtime to spell the difference.

It was a far cry from Idaho's near-perfect first half performance which saw the team shoot 81 percent from the field collectively, hitting 18 of 22 shots.

A combination of fast break lay-ins and outside jumpers from each of the five starters gave Idaho its early lead, but five straight baskets by Digger Phelps' Irish brought Notre Dame back to within 10 points at intermission, down 36-26.

The Vandals went into a 2-1-2 delay game at the 16-minute mark of the second half and were confronted by a man-to-man defense from

Notre Dame. Slowly whittling away at the lead and stealing all the momentum, Notre Dame's Ron Rowan hit two free throws with 5:35 left to tie the game for the first time since tip-off.

The 6-5 freshman guard came off the bench to lead Notre Dame's offense with 18 points. Brian Kellerman, nine of 14 from the field, also had 18 points on the evening to pace the Vandals.

Idaho's Phil Hopson had a chance to put Idaho up by three with seconds remaining but missed the front end of a one-and-one situation with 17 seconds left. It was the last chance Idaho would receive.

Bill Varner grabbed the rebound for Notre Dame and

John Paxson made a jumper with 12 ticks left and the game was headed for overtime.

The Irish controlled the tip in the extra period but nearly three of the five allotted minutes elapsed before anyone scored. Rowan made the first points of the overtime and Notre Dame enjoyed its first lead of the game at 48-46.

After a traveling call on Hopson, it was Notre Dame's turn to play "keepaway" and Idaho was forced to foul. The Irish converted 10 or 14 chances from their charity stripe and finished their upset of the 8th ranked Vandals much to the delight of the 11,300 in attendance at the Athletic and Convention Center.

Following the buzzer, Phelps' led the cheers and blew kisses to the crowd which was instrumental in the game.

Disappointed in the loss, Idaho coach Don Monson said, "You don't get a chance to play in these games very often."

"I'm not trying to make excuses... I think people know me better than that... but I think the travel caught up with us and worried us, and they played better defense," he said. "We had a chance to make some one-and-ones, but we didn't seem to get any breaks."

Monson went on to say he thought his team played well enough to win and was the better ballclub.

# UI garners split from Big Sky portion of road trip

## Vandals 49, Bobcats 38

Through the snow and over Lolo Pass, Idaho's toughest road trip since the conference season began had its first stop at Montana State's jam-packed Breeden Fieldhouse.

Over 9,000 were on hand at Bozeman, in an arena listed in the Big Sky basketball media guide as having a capacity of 8,200, for a chance to see the best team in the 19-year history of the conference according to national rankings.

Hoping for a major upset, the partisan Bobcat crowd was disappointed by the then 8th-ranked Vandals, who used whatever devices necessary to escape with a 49-38 win.

Idaho employed stall tactics through much of the game, protecting a lead which was as small as a single point midway through the second half.

Plagued by 34 percent first half field goal shooting and 10 halftime turnovers, the Vandals

lead against Montana State was only 21-18 at intermission.

With the score 33-30 in favor of Idaho, center Kelvin Smith put a lay-in through off an in-bounds pass as the Vandal margin grew to five points. It was the third time the play worked for Idaho on the night.

"In the end, the defense of my kids and the patience they took on offense took over," Idaho coach Don Monson said. "Those kids are interested in only one thing—winning for the university and the Vandals."

Late in the game, MSU came as close as 38-34 before a three-point play by Smith off a pass from Ken Owens put Idaho ahead to stay. The win was Idaho's 16th straight.

An intestinal flu virus kept Gordie Herbert from starting at his usual forward position, but the senior who is second on the team in scoring average did manage to contribute some key baskets and finished with eight points.

Herbert, clad in a T-shirt under his V-neck jersey, came

off the bench for starter Pete Prigge and hit the bucket, which gave Idaho its first lead of the contest—14-12 in the first half.

He finished the Vandal scoring with two free throws with one second remaining.

"I didn't play him any more than I thought would hurt him. He had a lot taken out of him offensively," Monson said.

Game scoring leader Smith had 14 on the night, but got into foul trouble once again and was replaced by sophomore Freeman Watkins in the first half.

"Freeman did a very credible job...he understands what he's supposed to do," Monson said of Watkins' performance.

Following Smith, Phil Hopson scored 13 and led the team with seven boards. As a team, Idaho shot 50 percent (19-38) from the field and was 85 percent (11-13) from the line. Guards Brian Kellerman and Owens had six points apiece.

"They're tough mentally—somebody's going to have to play good to beat

them," Monson said of his team.

## Grizzlies 53, Vandals 51

by Don Rondeau  
Staff Writer

MISSOULA, MONT. — Montana's Doug Selvig was simply at the right place at the right time. His controversial last-second shot with no time showing on the clock, gave the Grizzlies an upset victory over 8th ranked Idaho, 53-51.

With nine seconds left, after a Phil Hopson bank shot made the score 51-51, Montana coach Mike Montgomery immediately called a time-out. After the time-out, the Grizzlies took the ball out of bounds at half court. Montana's Mark Glass fired a 20-ft. baseline desperation shot. The ball bounced off the rim and into the hands of Selvig who made a two-handed shot at the buzzer. The referees allowed the bucket, much to the amazement of the Vandals.

The shot by Selvig turned the loud and boisterous crowd of 8,782 at Dahlberg Arena to complete ecstasy at center court.

The loss was Idaho's first of the season and their sole setback in Big Sky play. The Vandals are now 16-1 overall and 5-1 in the conference, while Grizzlies are 9-8 overall and 3-2 in the Big Sky.

The Vandals were led by Hopson's 20 points, most coming from underneath the basket, and Ken Owens' 15. Montana ace Derrick Pope led all scorers with 22 points followed by Selvig's 10. Hopson and Pope led their teams in rebounds with 10 each.

Despite the loss, Vandal coach Don Monson was not bit-

ter. "I'm not disappointed. I can't say enough for my kids. It's tough to win on the road. I thought it was a great college basketball game. "We'll be back," he said.

Monson strongly disagrees with the Friday-Saturday game format in the league. "Friday-Saturday games are the most ridiculous thing. This is a traveling league," he said.

Montgomery, who received the only technical foul of the game, thought the win was an important one. "No question. The fact that they were rated eighth in the nation makes it (the victory) much sweeter. They are such a poised basketball team. I admire the job Don (Monson) has done with his team," he said.

The Vandals led most of the first half with Owens and Hopson providing most of the offense. Idaho was confronted by a tough Grizzly defense and was unable to always get off good shots. However, the Vandals led at intermission, 31-29.

In the second half, the Grizzlies started to connect more on their shots. A Craig Larson 5-ft. hook shot three minutes into the second half gave the Grizzlies a 36-31 lead, their largest advantage of the game.

Showing the poise that made them undefeated, the Vandals came back and tied the score at 47 apiece on a Hopson free throw.

With 51 seconds remaining, Montana's Pope was fouled by Gordie Herbert. He made the first shot of a one-and-one situation and missed the second, giving Montana a 51-49 edge. Idaho took the ball down court where Brian Kellerman set up Hopson's bank shot from inside. Moments later, the heroics of Selvig sealed a victory for the Grizzlies.

## Swim team split with Central

The Idaho men's and women's co-ed swim team split a weekend swim meet at Central Washington.

The women put on another strong performance by beating Central Washington 46 to 67. The men were not as fortunate, losing 79 to 56.

The women registered 11 first-place finishes, including Nancy Bechthold's AIAW national qualifying time in the 50 meter freestyle with a time of 28 seconds. Anne Kincheloe, Bonnie Flickinger, and Jennifer Norten each copped two individual first places. Kincheloe won the 50m breaststroke and 400m freestyle. Flickinger was victorious in the 100m fly and

200m freestyle while Norten copped the 100m breaststroke and 800m freestyle. She also swam a leg in Idaho's winning 200 medley and 200m freestyle relays.

The men's team gathered five firsts, with Don Moravec taking three of them. He won the 200m freestyle, 200m IM, and the 200m breaststroke. Idaho's other firsts came from Jim Zimmer in the 100m freestyle and Mark Wicklein in the 200m fly.

Both teams will be home Saturday, when they host Eastern Washington and Montana at the UI swim center, beginning at noon.

### What Are The Employment Opportunities In Your Academic Major?

## Farm Credit Banks Interviewing U of I Students February 2 & 3

The Federal Land Bank Associations, Production Credit Associations, and Bank for Cooperatives will be interviewing for agricultural loan officer trainees on February 2 and 3. The Associations are looking for students enrolled in the School of Agriculture or the School of Business with strong, practical agricultural backgrounds. Juniors enrolled in the School of Agriculture/School of Business with practical agricultural experience are eligible to interview for summer employment positions with FLBAs/PCAs. If you are interested in full-time or summer employment, sign up in the Placement Office.

On Tuesday, February 2 at 6:30 p.m., the Farm Credit Banks will host an informal gathering in the Gold Room of the SUB to discuss questions concerning the internship program and employment opportunities. Interest students are invited to attend.

# BSU drops Idaho, team bounces back

by Sandra White  
Staff Writer

The Vandal gymnasts had a busy weekend. Friday night they fell to Boise State, while Saturday they competed against Seattle Pacific, Western Oregon and Montana.

Placements for UI gymnasts on the vault against BSU included Jane Vogel, second, 8.25, and Terri Knauber, fourth, 8.2. Team scores on the vault were BSU 38.25 and Idaho 32.1.

On the uneven parallel bars, Karen Ball placed fourth, 7.4, and Glendda Allen came in fifth, 7.15. Team scores were BSU 31.85 and Idaho 27.6.

Top Vandal performers on the balance beam were: Brette Cannon, third, 7.8; Terri Knauber, fourth, 7.75; and Karen Ball, sixth, 7.45. Team scores for beam were BSU 30.85 and Idaho 30.1.

In the floor exercises, Brette Cannon was first, 8.3, and Cheri Lande was fifth, 7.75. Team scores in the floor exercises were BSU 127.65 and Idaho 120.65.

Idaho coach Wanda Rasmussen was pleased with her team's performance. "The bar routines are much better than last year and last season," she said Friday night.

"This was the first competition for Glendda Allen and she did well, placing fifth on the bars," Rasmussen said.

Rasmussen said the seven point difference was the closest Idaho had been to Boise in the past four years.

The Vandals posted their highest team score of the season against BSU, but Rasmussen was optimistic about raising the score even higher on Saturday. She said every coach she had talked to who had back-to-back meets said the second score was always higher.

Well, Rasmussen was correct. On Saturday, the Vandal team score was 122.75, a close third in the meet. Other team scores were: Seattle Pacific, 129.4; Montana, 123.65; and Western Oregon, 108.8.

Placements on the vault for Idaho were Vogel,

Julia Yost

Idaho's freshman all-arounder Barbara Dodson on the beam.

second, 8.4, and Knauber, fifth, 8.25. The team score for Idaho was 32.85, which was the highest vaulting score for the Vandals.

Knauber placed fifth on the uneven parallel bars with 7.9. The team score was 29.5.

Knauber was second on the balance beam with 7.8 and Ball placed fourth with 7.6. The team score on the beam was 29.6.

Cannon finished second in the floor exercises with 8.35, while the team score was 30.8.

In the all-around competition, Dodson scored 27.9, Cannon, 30.4, and Knauber placed sixth with 30.5.

Cannon and Knauber had their highest all-around scores of the season on Saturday.

Rasmussen said, "All in all it was a pretty good meet for us." She said some of the routines were

more consistent.

"This weekend was helpful in seeing the difference in maturity of the routines from December."

"We had a better meet Friday than Saturday as far as enthusiasm and virtuosity," Rasmussen said. She attributed the better team spirit to Saturday's weather and the fact that the meets were back-to-back. "It's great that we had a crowd even with the bad weather."

Feb. 12-13 the Vandals have back-to-back meets in Seattle. Both are evening meets, and Rasmussen is curious to see how the team will do compared to this weekend's back-to-back meets.

Idaho's next meet is the Klondike Challenge Feb. 7 in Edmonton, Alberta, Canada. The next home meet for the Vandals is Feb. 19 at 6 p.m. against Spokane Community College.

# Don't eat tonight.

Save yourself for **Pizza Haven's \$3.95 Wednesday Night Smorgasbord.**

If you were thinking about eating dinner or a little snack tonight, here's a word of advice from Pizza Haven: Don't.

You'll need all the room in your stomach you can get for the Pizza Haven Smorgasbord, Wednesday night from 4 to 9.

You get all the salad you can eat. Then we'll serve up all the pizza you can put away. You can even try some of those toppings you've never had the nerve to order.

All this is just \$3.95 for adults, and only 30¢ per year of age for kids 12 and under.

So don't eat tonight. Come to Pizza Haven tomorrow. And get the best deal on pizza going around today.

Got a pizza craving?  
**Come to Pizza Haven.**

**Posters invited**

The University of Idaho cheerleaders, in preparation for Saturday night's home game with Boise State, have organized a living group poster contest including prizes and display of winning posters at Saturday's game.

Each campus organization is invited to submit one banner which should be placed on the UCC or in the Library Mall area.

Judging will take place Thursday at noon, and the top five banners will be transferred to the ASUI-Kibbie Dome by the cheerleaders.

Boise State is the last team to have beaten the Vandals at home and will come into the game with a 3-3 conference mark.

Idaho is riding a 28-game home winning streak and the cheerleaders know part of that is due to the fact that UI students make it uncomfortable for visiting teams with their noise-making activities.

**MPD carries Vandal cards**

by Michelle Geaudreau  
Contributing Writer

Because of an effort to promote good relations between the police and area children, the Idaho Vandal basketball players can now be found on trading cards.

The cards, which resemble "bubble gum cards" but don't come with gum, each feature a black-and-white photo of one of the players on the front, along with his vital statistics. On the back, tips about the sport and tips from the police can be found.

For example, the back of Brian Kellerman's card says "TRAVELING: When a player walks or runs with the ball without dribbling. Traveling can be fun but sometimes dangerous. Walk with a friend—it's fun, and safer too."

According to patrolman

saac Parr, "The main idea behind the cards is to get the kids to come up and ask for the cards so they can relate to the officer." He feels the program lets the kids see the police as friends instead of as "boogie men."

The cards were provided by the Kiwanis Club because members were looking for a good program of crime prevention when they were initially approached with the idea.

The cards are mainly given out during Vandal games, but the patrolmen keep them on hand at all times. They want to encourage children to approach them on the street and ask for the cards.

Parr believes the program is a success and says kids do ask for cards, and even know the policer by their first names. "It feels good," he said.

**Women host Zags tonight**

After dumping Lewis-Clark State and then taking a well-deserved break, the Idaho women's basketball team takes the court again tonight, hosting Gonzaga University of Spokane in a Northwest Empire League game. Tip off is set for 7:30 in the ASUI Kibbie Dome.

The Vandals, currently 11-4 overall and 2-0 in league, won the prestigious Dial Classic in Laramie, Wyo. before knocking off Lewis-Clark Jan. 20.

Gonzaga is 5-8 overall and 0-4 in league. The Bulldogs lost

to Lewis-Clark earlier, 92-65. They are led by 5-8 senior Tami Peterson, who averages 13.6 points per game. She is helped by another 5-8 senior, Leigh Moorehouse, with 12.7 ppg and 5.7 rebounds per game.

Idaho is leading the league, but faces a tough road trip next weekend with games against Seattle University and Western Washington in Seattle and Bellingham, Wash. Western is in second place with a 4-1 league mark while Gonzaga is at the bottom.

# Public school teachers concerned about censorship

It looks like high school students will have to wait until they are in college to get an uncensored education. Censorship in public schools is on the rise due to the New Right's influence on public education.

Sue Hovey, the Idaho member of the National Educa-

tion Association board of directors, in a speech to the Unitarian Fellowship in Pullman in 1980, pointed out the Moral Majority's success in their campaign to remove questionable literature from school curricula throughout the nation.

Books such as *Go Ask Alice*,

*The Bell Jar*, *The Stepford Wives*, and *The Catcher and the Rye*, have been banned in various schools across the country in the last ten years. Even *The American Heritage Dictionary* was ordered removed from an Indiana high school after several parents charged that 70 or

80 words were obscene or otherwise inappropriate. Dictionaries were also removed from some schools in Missouri and Texas.

Other organizations, such as the Institute for Creation Research, advocate the prohibition of instruction about the

theory of evolution unless equal time is given to teaching creationist theories of how human beings came into existence.

Censorship is not a problem at the university level because college is not a compulsory education.

## Construction on street closures set for April

by Steve Nelson  
Staff Writer

Detailed plans for construction of closed campus streets are half finished and actual construction could begin in April, Nels Reese, director of facility planning, said Monday.

The university is planning to close seven campus streets, designating new one-way streets and creating additional parking spaces. Initial modifications will cost \$95,000. Final changes will take five years at a total estimated cost of \$400,000. Money to pay for the modifications will come from the Physical Plant budget and donations.

Included in the plans for the closed streets are rolled curbs with raised sidewalks, benches, trees and grass. Handicapped, service and emergency vehicles will be allowed limited access to the pedestrian zones (closed streets).

Plans for construction must be submitted to the city supervisor for approval, but Reese said he sees no problems in gaining approval for the plans.

The Moscow City Council unanimously adopted a resolution last November approving the proposed modifications for campus streets.

Reese said the work will probably be done by Physical Plant employees and should be completed by next fall. Work on busy intersections will be done during the summer, while the students are gone to minimize traffic problems.

New signs, indicating the restricted use of the closed streets, will be installed at the time of construction, Reese said. "We haven't developed signs yet, but we are sensitized to signage because the city has had some criticism of theirs," he said.

While work on the street modifications have occupied much of the department's time, facility planning is involved with many other projects, Reese said.

"There are 57 projects we are working on now. Not all are large, but they probably amount to \$250,000 worth of work," he said.

Reese said that in the past two years, the Facility Planning Department has completed work on three major projects: a new \$1.8 million Agriculture Science Building, a \$4.5 million athletic facility (the East-End Addition and the remodeling of Memorial Gym) and an \$8.6 million addition to the Life Sciences Building.
