Accreditation safe, but all not rosy

By Megan Guldo
Staff Writer

Accreditation of the University of Idaho has been reaffirmed by the Commission on Colleges of the Northwest Association of Schools and Colleges. The accreditation was announced in a final report, dated December 6, 1984, by the committee which visited the UI. The recent decision marks 67 years that UI has

about the state's failure to adequately fund higher education.

"We desperately need more funds," said Nicholas Gier, UI philosophy professor and president of the Idaho Federation of Teachers. "No one else is at fault except the legislature.

Terry Armstrong, executive assistant to President Gibb, said, "We work so hard to communicate to the state that we

" We desperately need more funds...
...no one else is at fault except the legislature."

been an accredited institution of higher education.

In the report, high campus morale and good working relationships with campus constituencies were cited as outstanding. Accreditation means that the university's goals are soundly conceived, that its purposes are being accomplished, and that the institution is sufficiently organized, staffed and supported.

The UI accreditation group, headed by William Tietz, president of Montana State University, included 14 other representatives from the Commission on Colleges of NWASC.

Most of the report gave high praise to the university, specifically in law, engineering and forestry. However, the evaluation committee that visited the UI campus in October expressed serious concern

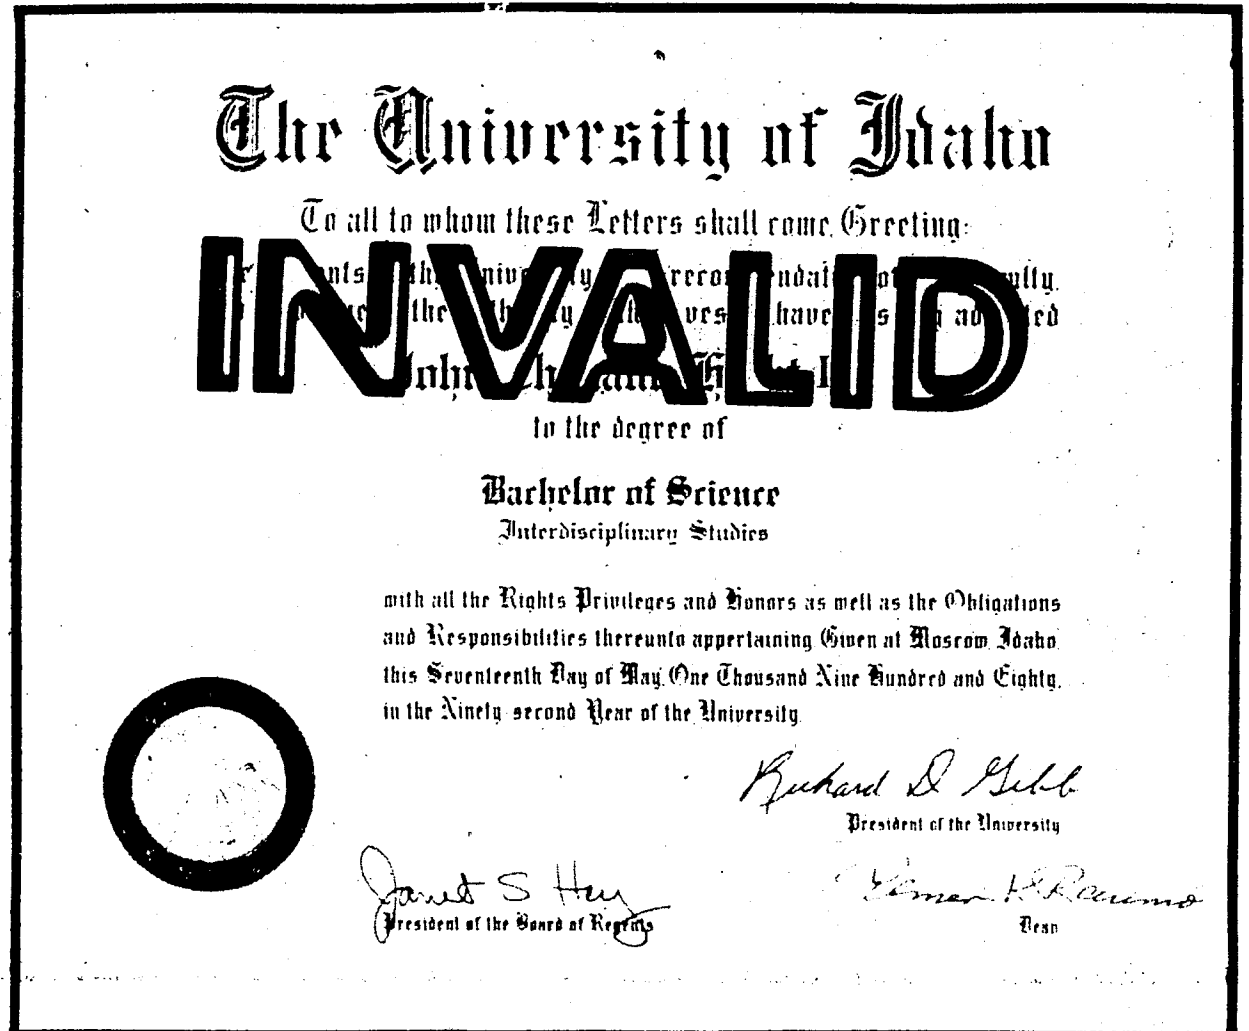

need more funds."

The letter from NWASC informs UI of its continuing accreditation but stipulated a possible future evaluation committee may visit the campus — prior to the end of the normal 10-year accreditation period — if the financial crisis continues.

Gier does not agree that morale at UI is as positive as the evaluation committee thought.

"My main problem with the accreditation report is their statement that faculty and administration relations are just rosy — it's just false."

He talked about the Blue Ribbon Committee, composed of former heads of faculty council, that surveyed UI professors' feelings about this university. The final Blue Ribbon report, released last spring, "...found

It has not become this bad yet, but continued problems with accreditation and state funding may result in the devaluation of diplomas offered by the UI. Argonaut illustration by Stephen Bray

morale on this campus at an all time low," said Gier.

Specific responses of faculty, according to Gier, were that the administration does not respect tenure rights and is too

authoritarian. A large percentage of the faculty said they were unhappy with their job and a lack of recognition for faculty achievement was cited as a concern in the report. Gier

also said the Dean of Agriculture was described as "authoritative and a dictator" in the questionnaires returned.

Gier said, "I can't believe they

Fed group provides fish grant

By Vince Markham
Staff Writer

The National Oceanic and Atmospheric Administration has provided the Idaho Department of Fish and Game a federal grant of \$416,700, according to a news release bulletin from the offices of Senator James McClure, Senator Steve Symms and Congressman Larry Craig.

The funds are to be used in the operation and repair of fishways and screens along the Columbia River in general, and the Salmon and Clearwater drainages in particular. A portion of the funds will also be used to enhance the development of steelhead trout, chinook and sockeye salmon stocks.

According to Mark Davis, Boise spokesman for Senator Symms, this grant is seeking to upgrade the quantity of salmon.

"Such funding," said David Bennett, professor of Wildlife and Range Management, "will no doubt be beneficial to the overall improvement of the indigenous salmon runs, and marks a hopeful step forward in enhancing the salmon's migration through difficult barriers they encounter on their way to their spawning grounds."

Many concerned outdoorsmen and environmen-

talists here in Idaho are incensed over the continual abuse and destruction of natural fish and other wildlife habitation.

"The entire delegation consisting of Craig, McClure, and Symms has consistently opposed the funding of wildlife improvement, and the preservation of existing natural habitats," said Dennis Baird, associate professor in Forestry, and prominent member of Idaho's Defense Wildlife Coalition. "For them to take credit for such funds is entirely hypocritical."

Baird was also quick to point out the failure of McClure's Wilderness Bill, which was also backed by both Symms and Craig. This bill would have released only 526,000 acres for wilderness, while the "lion's share" of federal and state lands, some 8.5 million acres of public lands, would be released to the industrial conglomerates in the timber and mining industries.

"These are the industries," said Baird, "that are primarily responsible for the degradation and destruction of prime anadromous fish habitation. This occurs through siltation which is brought about by road building and poor logging practices in these vital river systems

and their tributaries.

"This seems to be the case record of Idaho's delegation," continued Baird, "to give 5 percent and take 95 percent."

70 percent of the Columbia's salmon and steelhead populations depend upon Idaho's water systems for their spawning habitation. Due to pressure from concerned sportsmen, environmentalists, and citizens of Idaho, the Idaho delegations' wilderness bill was stopped in time last year, but the battle for the maintenance of Idaho's wilderness heritage is far from over.

"The key roadless areas are the last grounds for the maintenance of our native salmon and steelhead populations," argues Baird. "Such areas immediately threatened are the drainages of the Locha, Elk Summit, and White Sand Creek."

Don Crawford, professor in bacteriology and officer in the regional chapter of the Sierra Club, paints a similar picture of the voting behavior of Idaho's delegates, Symms, McClure, and Craig.

"None of these men had anything to do with this money; in fact, they have opposed the

Outdoor group prepares program

By Michele Cantrell
Staff Writer

A chance to experience winter life in Northern Idaho will be offered at the University of Idaho Clark Fork Field Campus the weekend of Jan. 26-27.

The weekend of instruction is an extension program of the College of Forestry and will cover waxing, basic ski maneuvers, telemarking, snow-shelter construction, and winter survival skills.

The instructors for the weekend will be Steve Stiles of Coeur d'Alene, Jim Tangen-Foster of Moscow, and Mike Beiser, assistant coordinator of Outdoor Programs at UI.

Tangen-Foster will teach skills in flat-tracking and waxing. He will also talk about the clothing and various equipment needed for all types of cross-country skiing.

Tangen-Foster said that flat-tracking is cross-country skiing in one track or trail, similar to touring.

"I teach the kind of skiing for groomed trails; the trails made for cross-country skiing," Tangen-Foster said.

Tangen-Foster said that he

will also teach the diagonal stride, various turns, and skills for going up and down hills.

Tangen-Foster said that it is important at first to learn how to unweight one ski and to put all weight on the other ski. This enables the skier to push off and ski forward. "It's a lot like skating," Jim said. "First, we will track in the snow around the camp and then go on an extended tour."

Along with cross-country skiing skills, Tangen-Foster will demonstrate waxing techniques.

Tangen-Foster notes that there are various types of waxing. Different kinds of cross-country skis require different kinds of wax and use it on different areas of the ski.

"It's good to understand what waxing is and what it is good for," says Tangen-Foster.

This program is one of a series of outdoor programs to be offered at the Clark Fork Field Campus. Each weekend throughout the semester a different course will be offered.

News digest

Senate meeting will discuss longer break

By Laurel Darrow
Staff Writer

In the ASUI survey conducted during registration, almost 2700 of those questionnaires returned indicated that UI students prefer a three-week Christmas break to a two-week break. In light of that response, the ASUI Senate will decide Wednesday whether to pass a resolution that the academic calendar be changed to include a three-week Christmas break every year.

If the resolution is passed, it will be forwarded to the University of Idaho Faculty Council for consideration. The council and the UI Board of Regents are in charge of the calendar.

According to the proposed

senate resolution, the current calendar is inconsistent. Some

years have a three-week break while others have a two-week break.

In addition, the proposed resolution states that a two-week break causes problems for students, faculty and administrators.

The resolution also notes that just over 90 percent of the nearly 3000 students who responded to an ASUI questionnaire at registration last week said they would prefer a three-week Christmas break.

The senate's regular Wednesday night session and Tuesday night pre-session are open to the public. Both meetings are held at 7 p.m. in the SUB Chief's Room.

Foresters study seeds

Many of the conifer seedlings planted each year in the Rocky Mountains die or fail to grow properly due to poor soil conditions. A group of UI affiliate professors of forest resources are currently working on this problem.

Russell Graham, A.E. Harvey and M.F. Jurgensen say their study shows that soil preparation practices most commonly followed for forest tree planting may not be the best.

The men studied the growth and development of conifer seedlings growing in three mediums: organic beds, minimally disturbed soil and bare mineral soil. The foresters say those in the organic beds

and the minimally disturbed soil grew and developed better. Seedlings growing in bare mineral soil had smaller root systems and tops and also poorer vigor than trees grown under the other conditions. The presence of organic matter did not seem to affect the availability of water to the trees.

This group of foresters believes that concentrating organic matter may be a viable site preparation technique to use for planting coniferous seedlings in the northern Rocky Mountains. The study was reported in a technical paper presented at a recent meeting of the American Society of Agronomy.

UI offers aerial photo workshop

Natural resource land managers and others who must use and interpret aerial photographs are being offered an opportunity to learn more about aerial photography and interpretive techniques in a University of Idaho workshop.

The session, scheduled for Feb. 11-15 at the Student Union Appaloosa Room, is being offered by the UI College of Forestry, Wildlife and Range Sciences and University Conti-

nuing Education in cooperation with the Society of American Foresters' Photogrammetry and Remote Sensing Working Group.

The workshop will emphasize the fundamentals of aerial photography and aerial photo interpretation, including practical work with aerial photos. Also planned are demonstrations of various uses for aerial photography. More advanced remote sensing systems will be discussed, citing their effectiveness and costs.

The workshop is designed to be helpful to foresters, range scientists, soil scientists, county agents, county assessors, planners, technicians and others who have not had aerial photography training or who need a refresher course.

Among the specific topics to

be discussed are: remote sensing systems, aerial photography, stereoscopy, preparing photos for viewing, measurement, satellite systems, height measurement, multistage sampling, radial line plotting, area measurement, landform analysis, slope estimation and road layout, density estimation, landform and vegetation interpretation, and transfer of detail.

Instructors will be Joseph J. Ulliman, professor of forest resources and remote sensing, who is also director of the workshop, and Robert C. Heller, emeritus professor of forest resources and remote sensing.

Loss of standing endangers program

Recent denial of Lewis-Clark State College's four-year nursing program has left some nursing students wondering about their future.

LCSC's new four-year program sought accreditation for the first time this year from the National League for Nursing and was turned down.

Phyllis Sheridan, director of the Idaho Board of Nursing, described the voluntary national accreditation as "a mark

of quality or excellence".

All Idaho nursing programs (except masters) must have approval by the Idaho Board of Nursing. LCSC's four-year program received full approval by the state in April of 1984. State approval consists of a review of curriculum requirements, faculty qualifications, policies and procedures and clinical agencies using national guidelines, similar to the national accreditation process.

Idaho nursing education programs are reviewed every two years for state approval.

According to Sheridan, a nursing program does not need national accreditation to run an educational operation but she said most graduate programs in nursing accept only graduates from nationally accredited programs.

"There are some programs that look only at the individual applicants," she said.

Course offered on tree fruit

A short course on tree fruit production will be offered Jan. 30-31 at the UI Research and Extension Center at Parma.

Taught by faculty at the UI College of Agriculture and by a horticulturist with a Washington nursery. The course will be divided into two

parts. The first day will feature tree fruit insects and orchard soil nutrition and management. The second day will be devoted to vegetation management and apple production.

Registration, which includes \$60 thereafter. UI continuing

education units are available with an additional \$5 processing fee.

For more information, contact the UI Southwest Idaho Research and Extension Center in Parma, 722-5186.

wilderness, from page 1.

Mike Beiser will give instruction in the physiological aspects of being outdoors in the winter, how to build snow-shelters, and in avalanche awareness.

Beiser plans to show the participants how to identify the symptoms of hypothermia, frostbite, and altitude sickness, how to prevent the illnesses, and how to stop them in their early phases.

Beiser says he will instruct the participants on how to build snow-shelters for emergency and conventional use.

"Some people build them for their own use and others for only emergencies," Beiser said. "It takes a little work and imagination."

Beiser also said he will talk about rescue in avalanche emergencies.

Of the weekend program, Beiser said it should offer

something to everyone involved.

"It should be a well-rounded program," Beiser said. "It should serve a broad population of skiers. From the experienced skier to the novice, each will learn something from the weekend."

The experience gained from the weekend can be used throughout a lifetime. The skills learned at Clark Fork are the basis of many winter life-time sports.

"People really need to go out on their own after this experience," according to Beiser.

The weekend of instruction is set to start at 8:00 a.m. Saturday, January 26, and conclude at 12:30 p.m. on Sunday, January 27.

There will be a charge for the weekend: \$15 per person or \$25 per couple. Ski equipment may be rented.

Argonaut Photo by Jim Rennie

Accommodations will be available at the field campus bunkhouse for \$4 per person. The bunkhouse kitchen will be open if participants want to prepare their own food. Meals are also available in Clark Fork. For more information and registration, contact Dan DeWald at the UI Clark Fork

Field Campus, Box 87, Clark Fork, Idaho, 83811 or call (208) 266-1452. Enrollment is limited to 50 people.

State board to meet this week

The State Board of Education will meet in Boise January 17-18, 1985 to discuss proposed admission/retention standards, receive the annual accreditation report for secondary schools, and hear reports from the Advisory Council on Vocational Education and State Library.

The meetings begin at 8 a.m. on Thursday and Friday in the Student Senate Chambers of the Student Union Building at Boise State University. The public is invited to attend.

On Thursday, the Board will meet as a committee of the whole at 8 a.m. Then from 8:30 a.m. to noon it will split into its three subcommittees — Person-

nel and Administrative, Finance and Academic Affairs and Program — to consider agendas and recommendations from agencies and institutions. The Board will reconvene at 1:30 p.m. to hold hearings on Vocational Education and contract indemnification rules and a tenure review policy. At 2 p.m. the Board will hold a public hearing and discuss a proposed admission/retention standards for the state college and universities.

The Advisory Council on Vocational Education will appear before the Board at 4 p.m., followed by Boardwork from 4:30 to 5:30 p.m.

Friday's meetings begin with

Board subcommittee reports and action. From 9 to 11:30 a.m. the Board will be in joint session to further discuss and take action on the issues brought before it in public hearings on Thursday as well as the 1986 Special Topics Review Proposals and a Lewis-Clark State College External Degree Program. The State Library will give its annual report to the Board at 11:30 a.m.

The public schools' agenda will be before the Board for its consideration beginning at 1 p.m. Three public hearings will be held to amend State Department of Education rules. The first rule change seeks to establish more rigorous subject

area endorsements for secondary teachers; the second postpones the effective date of the requirement for increased school bus insurance; and the third provides for parent input in special education placement. Superintendent Jerry Evans will then present the annual accreditation report for secondary schools.

During its Dec. 6 meeting the State Board of Education discussed the "C" average, and heard reports on the Southwest Idaho Task Force on Vocational Education, and on the Portland meeting with the Northwest Association of Schools and Colleges, all at Capital High School in Boise.

Lineneeds help

The Line, Latah County Nightline/Whitman County Crisis Line, begins training for volunteer telephone counselors soon. Spring training for the new year begins on Jan. 19.

This training session is for new volunteers interested in working in the field of crisis intervention and support. No previous experience is necessary — just a willingness to provide a supportive ear and a caring attitude toward others.

The training begins Saturday, Jan. 19 at 10 a.m. at the Whitman County Mental Health Center, N.E. 340 Maple, Pullman.

Opinion

Stormy weather

The temptation to pass off the bad luck of the university's sister institutions as just that — bad luck — is often irresistible. "Poor Lewis-Clark State College, they sure are having a bad year. If they can just hang on..."

The problems besetting higher education in Idaho, however, are not those attributable to bad luck. What has happened to LCSC is not analogous to poor weather and what happens to the wheat crop on the Palouse. What has happened to LCSC is directly the result of a deliberate and systematic attempt to control the school's climate. It's the work of a bad weather manipulator, to be sure.

Comments by the speaker of the Idaho House of Representatives recently could lead one to suspect that the state's system of higher education is not universally loved. Speaker Tom Stivers (R-Twin Falls) has said upon more than one occasion that LCSC is, at best, a weak link in the state's post secondary system. Stivers has advocated the dismantling of the Lewiston school on many occasions, the most recent of which preceded the opening of the legislature's 1985 session. Stivers, as a representative of the state's populous southern section, has a duty to represent his constituency in the house; he may well be more concerned, as a representative, about the future of Boise State University and the College of Southern Idaho. Such concern is laudable.

What is disconcerting is to hear the speaker of the house advocate the destruction of a school which has done its job well over the better part of this century. He offers no reason other than the fact that it offends his sensibilities to have two state-supported schools in the northern part of the state a scant 40 miles apart.

Stivers is far from the only one out to get LCSC, however. The legislature has been no friend to the little school in recent years. In fact, the mistrust of education by the legislature — and the resultant unwillingness to adequately fund education — has made Stivers' dislike for education little more than an anecdote to the already sad story of higher education support by the state.

In the recent loss of accreditation for the nursing program at LCSC, comments about the loss centered on areas of staff and faculty support which can be directly attributed both to decreases in actual funding and a failure on the part of the state to erase losses incurred over the past decade. The state's obligation to adequately fund education has not been met, and the loss of LCSC's nursing accreditation is but the first piece of bad news. If LCSC has lost accreditation because of basic funding inadequacies, can the UI be far behind?

The UI, in reality, is already too close. The accreditation team from the Northwest Association of Schools and Colleges expressed concern over the UI's funding problems when they visited last fall. The funding problems, combined with the continuing censure of the university by the American Association of University Professors and a faculty and student attrition rate in double figures, do not bode well for a university which likes to style itself as a major, comprehensive, land grant institution. If the trends in education funding are not soon reversed, the university — indeed, the entire system of higher education in the state — will soon begin an irrevocable slide into mediocrity.

So while LCSC is hurting today, we at the UI have no reason to sit complacently by, waiting for the bad weather to pass by. The afflictions that presently beset LCSC are but a portent of things to come. The UI, in the interest of good education, must defend the smaller school against the attacks of politicians with a regional axe to grind, as well as guard against more budgetary cuts. We have been lucky thus far, but cannot endure much more.

Lewis Day

I'M GETTING WORRIED ABOUT THESE SUBWAY VIGILANTES...

Little things really help

I used to brave some pretty hairy weather in my trudge across the campus fields just to hit the flowershop. Sometimes, on the way back, friends would stop me by the Post Office with a "Hey, flowers! Who's the lucky guy?" Actually, I'd say, "They're for a friend who needs a little lift right now...me" and I'd get home as fast as I could so that my petals wouldn't freeze any more than they had to. I did that several times for that friend and for a few other folks who needed the same boost. There is something about trudging through the snow with wet pants and soggy socks, knowing that those beautiful red blooms were going to make somebody's day, probably mine...possibly a friend, whomever it was who needed it more. It's the little things like that which make your day. It's the unexpected little things that count when very little else does on that occasional bad day.

You know those days. You've had them. They are the ones when you walk with your eyes on the ground, afraid to look up. When the look on your face could bring tears to someone's eyes...if you let them see. The days when you won't keep

eye contact with the person you are talking with, because you can't, and God forbid you let anyone see that you are vulnerable! Those days when you are overworked and underhugged and wondering when the hell it is going to stop. So, What are you going to do for yourself?

Walt Disney had some great ideas, but magic dust is under strict lock and key by the Food and Drug Administration and Fairy Godfolds have been retired to the Fairy Pen for some time now. Maybe we can make our own fairy tales come true. A flower to yourself or a friend is a good way to start. It's both a happy beginning and a happy ending in one shot. It's the little things that count.

There are many things that can carry the same impact: a note, a pile of hot, homemade chocolate chip cookies, by all means a hug, or a flower. What would we do without them? They say so many things. They say I am watching and I care. Call me and I will listen. Trust me, I will come. They are theraputic little things that radiate

See Little things, page 5

A simple lesson

Today is Martin Luther King's birthday. Now a federal holiday, King's birthday serves as a reminder of, and memorial to, the battle waged in the U.S. for the civil rights of millions of Americans during the turbulent early '60s. The struggle by blacks for recognition of their basic civil rights as Americans was successful because of King's — and others' — tireless and courageous leadership. The use of King's birthday as a day of remembrance for those who died that others might enjoy simple, basic American freedoms is suitable: he was the most visible leader of the civil rights movement, and his assassination proved he was the most dangerous proponent of civil rights.

King's adaptation of nonviolent civil

disobedience as a tool for gaining civil rights for American blacks has become the model for other progressive protest movements. The majority of protesters against the Vietnam fiasco utilized King's nonviolence; opponents of U.S. military spending increases have adapted nonviolent tactics of passive resistance; proponents of the rejected equal rights amendment did not blow up anti-abortion clinics.

People throughout the U.S. — and across the globe — would do well to look at the lessons embodied in the life of Martin Luther King. The message of justice and positive change through moral force and nonviolent action is one especially necessary today.

A disaster waiting...

Editor:

In Greek mythology Hephaestus, the God of Fire, was described as being a kind and peace loving god. However, over the course of time, fire, in some instances, became not only a useful product, but a destructive one. Every year, fire destroys the lives of many Americans. The threat of fire disturbs many of us who think of it, not as warming our Sunday dinner, but running rampant through our lives, destroying everything in its path. The Wallace Complex is not immune to the Wrath of Hephaestus, and thus, every precautionary measure should be taken by the UI Administration to ensure the safety of the 782 students living there.

Even though most residents and the UI Administration do not think about a potential fire-started disaster, it is evident that the existing codes are not acceptable. The Wallace Complex Living Group consists of four buildings, two of which are four stories high, and two of which are six stories high. But, despite this, no fire escapes exist. The buildings in this living area are made of non-flammable bricks and steel, however, many flammable items do exist in the rooms, halls and offices, the most prevalent of which are curtains, wooden furniture, books, paper and rugs. If a fire did occur in Wallace, the flammable items would naturally ignite. The results would be disastrous to those students who occupy

the upper levels of the buildings because their only means of exit could be filled with smoke and fire.

Not only does the responsibility for unsafe fire conditions lie with the UI Administration, but individual halls also play an important role. The fire escape plans, which are located in each hall, are not clearly stated and are not discussed thoroughly by the authoritative members within the living groups. If in fact, the escape procedure is discussed, it is usually only presented once and then forgotten as the semester proceeds. Another factor that is ignored by the members living within the Wallace Complex is the cooking that is being done illegally in the individual rooms. The UI Administration explicitly informed every member in the housing contract that cooking is prohibited for fire safety. However, the threat of a fire is blindly ig-

nored by residents and their advisors, in order to keep life in the halls running smoothly and hassle free.

Fires do provide a serious threat to all concerned. However, our campus can be safer for the individuals who live upon it. The UI Administration should install fire escapes on the outside of each building in Wallace Complex. Living groups within Wallace should promote fire safety programs to reinforce the Administration's decision about cooking in individual rooms.

Patricia Froyd

Thanks for the lot

Editor:

I probably can speak for most of the people who work in the Agricultural Science Building, as well as many students and others who use parking lot 19 (West of Rayburn Street), in expressing our appreciation for the work on the lot this fall.

The new lights in this lot have really been a help for those of us having to locate our cars after work these dark evenings. In the past, there have been innumerable scratches and bruises as well as torn clothing, resulting from groping across the sidewalk, up the slope and then stumbling on the solid black curb around the lot. It's great to see our parking fees being put to good use.

To the Parking Committee, the University Administration, the Physical Plant and any and all contractors...Thanks.

Bill Shane

No heat loss here

Editor:

Concerning the student who expressed discontent about the lack of heat in their \$85 apartments, I fail to see that they have any legitimate complaint. One student stated that when she moved in, the landlord told her that she might want to get a heater. The anonymous student said that the low rent offsets the inconveniences.

I live on the ground floor of this twelve unit apartment building. Besides paying \$185 monthly for rent, I paid \$40.06 last month for gas. This amounts to one sixth of the gas bill for the entire building. I still must wear a sweater, jacket, and stocking hat indoors just to keep warm. I'm glad to know I'm not losing much heat through the vents.

Margaret K. Gates

Time to do something — right

Douglas Jones

More than enough guilt-laden editorials have been written in the last two months, calling our attention to the famine nightmare in progress in Africa. These editorials, along with the 45 record *Do They Know It's Christmas?* by a collaboration of big name pop stars, in all likelihood have succeeded in getting Americans to give in record levels to relief organizations to help feed the starving millions in North Africa. But these editorials and the people, who yield to their emotional, if not moralistic plea, miss the point.

Mass starvation is not the problem, but a symptom of a greater collection of problems in Africa. As long as we fail to see beyond the symptom and seek only to remedy it, ignoring the underlying problems, we only make things worse.

The famine, although primarily caused by the three-year drought, cannot be entirely blamed on the rainless weather. Drought is a normal occurrence in North Africa. But the recent ramifications are getting worse because of Africa's booming population, level of poverty and abuse of the land itself. These problems, in turn, owe their existence to civil strife, corruption, mismanagement of resources, and the inability of the African culture to adjust to the ecological reality of modern day Africa.

Several of the nations that are suffering the most from the current famine (Angola, Chad, Ethiopia, Mozambique) have been engaged in civil war for the majority of this decade.

These regimes, insecure in the support of their population and the intentions of neighboring nations, have spent four times as much on defense and civil control than they have on agriculture.

The ecological mentality of the present African culture is that of yesteryears when nature, working through a high infant mortality rate, kept the population in balance with the ability of the African desert to sustain human life.

Such primitive conditions advocate frequent births to guarantee the survival of the culture. This cultural tendency is now disastrous in modern Africa, as a result of Western and Eastern medical technology that dramatically lowered the infant death rate. In some northern African nations the population has already exceeded the ability of the land to produce food for its people.

A spokesman for the United Nations Disaster Relief Organization noted that even given the

best scenario of weather and a good harvest, there will still be foodless people next year in Africa.

The food aid that we are sending over now is feeding people who are forever going to be reliant on our good nature and our ability to produce more food than what we need.

This may be fine for now, but although our good nature may never run out, we are finding that there is an increasing demand on what food aid we do produce. The starving millions in North Africa is just the tip of the iceberg; there are dozens of millions more in South Africa, Latin America, and Southeast Asia that are in risk of famine every day.

All that stands between these people and imminent death by starvation are the food surpluses of the western world. These millions are growing in numbers at a rate that is outstripping our ability to increase food production.

Given three scenarios of aid programs to save starving millions (no aid, food aid only, and a comprehensive aid program), we (and I mean you and me) are unwittingly following the most inhumane path. We are sending just food aid.

If we continue to send only food aid, without solving the underlying problems, we are going to see a famine in 10 years that will make the current one an omen of disaster.

We cannot justify sending only immediate aid to satisfy our guilt of gluttony, when that aid will only deepen, intensify and prolong human suffering.

It would be more humane to send none at all, as those whom we save in the short run now are but a fraction of those who will die in the future when we can no longer help them all.

But that's not what I'm advocating. What is needed is a comprehensive aid program that will help the African people grow their own food and gain the ability to solve their own problems. Long-term self-sufficiency and the responsibility for their own lives is what is most needed in Africa.

This solution, allowing for immediate food aid to head off imminent death, is the most responsible and humane alternative.

If it is time to do something, it is time to do it right.

Douglas Jones is UI student in Political Science and Economics.

Letters Policy

The Argonaut will accept letters to the editor until noon on the day prior to publication. They must be typed, double spaced, signed in ink and must include the name, address, phone number and university I.D. or driver's license number of the author. Letters may be edited for length, clarity and mechanical mistakes. Letters should be limited to 250 words. The Argonaut reserves the right to refuse letters that are libelous or in bad taste. Letters will be published as they are received.

Little things,

from page 4.

warmth and positiveness. They bring you hope, quietly help you strengthen yourself to pick up, to carry on. You can do it. Don't curl up and die. Come on, I'm rooting for you, I know you can do it, but do it for yourself. It will count more.

A hug from behind and a cheek pressed against yours packs one hell of a punch, right? And there is no such thing as an out-of-style hug or word, an out-of-style flower or out-of-style caring.

Blue jeans and roses go as beautifully together as bulky brown sweaters and bearhugs. Those quiet little things really count, don't they?

So when time is short and things go bad and all your pressures mount.

Count on yourself and don't give in.

Prepare yourself, get set to win.

remember that through thick and thin, it's the little things that count.

Julie Sherman is a UI student majoring in wildland recreation management.

Mitigation Act ever since it's creation. To think that these men, through the printing of this news release would appear pro-environmental, when in fact they have been nothing more than proponents of industry, amounts to nothing more than a joke, especially when you consider that these men have openly voted against the funding from the start."

"The issues at stake here are great," said Crawford, "and should be a concern to all. Greater public awareness and participation is needed, if Idaho wilderness, and wildlife, is to be preserved for future generations."

A news bulletin that originated out of the Office of Senator Steve Symms addressed the issue.

"Senator Symms has long opposed the extension of federal agencies into the affairs of the states themselves," said Trent Clark, a spokesman for Senator Symms. "This was exactly what this federal agency was doing, over-extending it's jurisdiction."

Idaho drops two, prepares for Eastern

By Greg Kilmer
Sports Editor

Despite two late game rallies, the University of Idaho basketball team came up short in both efforts to capture their first 1985 Big Sky Conference win.

Before crowds of 4,500 and 5,600, the Vandals, now 5-10, dropped Friday's conference opener 79-74 to the Bobcats of Montana State and followed it up with a 60-54 defeat to the University of Montana Grizzlies.

With almost exactly the same amount of time left on the clock in both games, the Vandals ignited for two runs at the visitors from Montana, each sparked by senior forward Frank Garza's long range three pointers.

In Friday night's opener, trailing by only one point at halftime, the Vandals showed flashbacks from the early season. This gave the Bobcats the easy opportunities to open-up a 10 point lead with only five minutes off the second half clock.

"This one's a hard one to take," opened head coach Bill Trumbo to reporters afterwards. "They took advantage of opportunities, we didn't."

"Coming out in the second half, we had a lapse," Trumbo said. "They hurt us; Johnson hurt us."

Trumbo was referring to MSU's burley 6'11" center Tryg Johnson. Johnson, the MSU leading scorer at half with nine, opened up the second half with two hoops and a free throw before Idaho center Steve Ledesma entered the second period.

Johnson only got two cripple rebound baskets the rest of the way. "This is what really encouraged me. Ledesma did a fine defensive job," recounted Trumbo.

Ledesma, playing in his first game since leaving the squad Christmas break, combined his defensive effort with an 18 point, 5 rebound second half that included a top of the key three pointer down the stretch.

"He's going to make some errors," Trumbo said. "But he knows what's going on out there."

"They were overplaying us on defense," Trumbo explained. "That's why Steve and Teddy (Noel) had such a good second half. They're the ones who can drive around that pressure."

It was all Ledesma, 21 points and Noel 15, along with Garza's two three point rainbows, that led the late Vandal run. In fact, the trio scored the last 32 Vandal counters.

But it was the Bobcat shooting from the charity line that iced the Big Sky opener for both schools. MSU shot 70 from the line on the night, including an 83 first half.

Idaho hit 60 from the line for the evening, with numerous misses on the front end of one and ones.

"We'd play good defense, get the ball, run the offense well, get fouled and then miss the free throws," a frustrated Trumbo said.

"We're young," the Idaho head man said. "I wish we would have had three, three-year players," referring to the MSU returners.

Among those returning for MSU were Johnson, with 18 points, Jeff Epperly with 18 and Kral Ferch with 21 to lead the Bobcats.

Vetrans also gave Trumbo headaches Saturday night against the visiting Grizz from Missoula.

The biggest migraine for Trumbo was 1984 Big Sky MVP Larry Krystkowiak. Montana head coach Mike Montgomery's pride and joy finished the night with 18 points and scraped the glass for 20 rebounds, a conference high this year.

"Krysto did a great job on the boards tonight," Montgomery said. "They were not getting any second shots. When you have to live by just getting one perimeter shot, its pretty tough to come back." Of Krystkowiak's 20 boards, 17 were on the defensive end.

It was Krystkowiak and center Larry McBride who gave the Vandals the most trouble on both ends in the first half.

"We just put a whole lot of attention to keeping Krystkowiak and McBride from scoring inside and that opened up their outside," Trumbo said.

Grizz guards Leroy Washington and Mike Wnek finished the night with 12 and 10 points, respectively, most on first-half open jumpers.

"We tried to take away their strength and put a little pressure on their other players," Trumbo said. "They have three new faces in there from last year."

6'10" Steve Ledesma shoots and is fouled against 6'10" Larry McBride in Saturday's 60-54 loss to the Grizzlies of Montana Argonaut Photo by Deb Gilbertson

But it was the "two" that held the Vandals off in the second half. Krystkowiak and McBride contributed 18 of 31 Montana second half points.

"McBride surprised us," Trumbo said. "He hit some turn around jumpers at some critical times."

It was once again Ledesma who tried to get the Vandals back in with a second stanza rally. Ledesma, who had 12 second half points and 6 rebounds, finished with 14 points to lead Idaho in scoring.

"He makes things happen," Trumbo said of his returnee. "He makes people guard him and that's important for us."

The second half was a rough one complete with a few altercations. Vandal guard Matt Haskins and Krystkowiak wrestled around once and Ledesma and the Montana star had a few brief pushing matches.

The Montana forward had a few words about Ledesma's rough and sometimes free lance play.

Krystkowiak told Howie Stalick of the Spokesman-Review about Ledesma, "I don't really want to say anything about him except: We'll get him next time at Montana."

Seems they're still mad in Missoula about Eric Yarber's

game winning catch over there.

"You've got to play Montana tough and we did," Trumbo said. "We sort of staggered in there, but we kept coming; the kids showed a lot of character by coming back."

The Vandals must regroup quickly as they face the Eagles of Eastern Washington University Wednesday in the ASU-Kibbie Dome. Eastern, under head coach Jerry Krause, is an independent and would like no better than to knock off the Big Sky Vandals to give more life to their plans for becoming a Big Sky member. Game time is set for 7:30.

Women remain perfect, Extend to 16-0

By Mike Long
Staff Writer

The Idaho women's basketball team vanquished their first two conference rivals of the season, Montana State and the University of Montana, this past weekend 78-55 and 85-76, respectively.

The Vandals continue on the road to Cheney, Wash. and the Eastern Washington Eagles with a perfect overall record of 15-0, which is the longest winning streak in NCAA-I play.

The women also come in with an UPI rating of 20th in the nation, which they first entered without help from Head Coach Pat Dobratz, who didn't vote for her team the first time.

"Before I hadn't voted for ourselves," Dobratz said. "Because I wasn't really sure how we'd stack up against Las Vegas, Oregon State and other people."

Although the team is "really excited" about the rating, "they're more excited about beating Montana, because most of this group hasn't beat them before," Dobratz said.

In their encounters with Montana the previous year, Idaho was downed twice, 60-56 and 69-64. Eight of the 10 players from that team returned this season for the victory. Montana, two-time defending conference champs, entered on the down side after losing to the Eagles the night before.

Leading the Vandal charge against the Montana Grizzlies on Jan. 12 before a crowd of 1,300 fans was starting 6-foot-4 center Mary Raese with 26 points, and 5-foot-6 Robin

Behrens with 25, a collegiate career high.

Behrens shot 10 for 11 from the floor, made five out of six from the charity stripe and also came away with six steals in the Vandal victory. She didn't leave the court once during regulation and played the entire 40 minutes.

"We had good team balance," Dobratz said. "Looking at our kids, you look at Mary and Mary (6-foot-4 starting forward Westerwelle) and Kris (Edmonds, 6-foot-1 starting forward) and think that's all that can score."

"I think Robin showed that she's a shooter and a scorer," she said. "It definitely took a team effort to play them. They were pretty physical inside."

Behrens, who is a junior this year, called the game one of the most intense of the season and says that the win against one of their biggest rivals feels "great."

Alongside Behrens for the full 40 minutes, Raese netted nine of her 14 floor attempts and was eight for eight in freethrows. Using her height, she knocked away six potential Grizzly baskets.

As a team, the Vandals shot 60 percent from the field and 74 percent from the foul line. Rebounding was again weak on the part of the Vandals, with Raese contributing six of the Vandal 22. The Grizzlies came up with 35.

The other strengths of the Vandals overcame this weakness as they took another victory the night before over the top rebounding club in the conference, the Montana State Bobcats. The match-up was held

Vandal center Mary Raese battles Lady Grizz Dawn Silliker and Anita Novak in Saturday's Vandal victory. Argonaut Photo by Tim Frates.

before 1,100 fans.

At point score-wise for the Vandals was Edmonds with 25 by putting in 10 of 13. Raese wasn't far behind with 19 of her own, 10 rebounds and four shot deflections.

Edmonds gave credit to the guards, Behrens, starting 5-foot-9 Paula Getty, 5-foot-7 Netra McGrew and Krista Dunn, who shook the Bobcats and

started the Vandal rhythm.

Idaho 5-foot-7 guard Lynn Nicholas is currently on the bench after undergoing an emergency appendectomy during the California roadtrip. According to Dobratz, it will be a couple of weeks before she can start practice.

"I think our people intimidated them inside," Dobratz said. Topping-off the list of upset

Bobcats was Montana State's Kathleen McLaughlin, the top scorer in the conference. McLaughlin only made three of 20 shots from the court and was two for five in give-aways for a total of eight points.

Now Dobratz has her team sights on stopping EWU's Lisa Comstock, who was a major contributor to the pain the Eagles inflicted on the Vandals last season.

The Vandals fell to the Eagles 83-69, 62-56 in season play and then were again defeated 71-82 in the MWAC play-offs to eliminate Idaho from all chances of first or second. Idaho went on to defeat Montana State and take third in the conference for a second time.

The Vandals will have a chance to mix a little tar with Eagle feathers at the Cheney eyrie this Friday at 7:30 p.m.

UI's Loveall to sign golden contract

By Greg Kilmer
Sports Editor

Cal Loveall, Idaho's senior defensive back, is ready to sign on the dotted line that will make him a member of the Denver Gold of the United States Football League.

Loveall's agent, Boise attorney Don Copple, said the Vandal defensive back is poised to sign a series of three one-year contracts with the USFL Denver Gold franchise.

Copple reported that Loveall, a 5-foot-10, 180 pounder, will sign a "contract up to NFL (National Football League) standards." He declined to comment on the actual numbers.

Loveall is out of town and unavailable for comment.

Loveall was a first-team all Big Sky selection this past year and was a four-year starter for the Vandals.

Copple did say that Loveall's speed — he's been timed at 4.5 in the 40 yard dash — had a lot to do with the Gold's interest in him. Denver drafted Loveall in the fourth round of the recent three-year old USFL draft.

Signing the contract did not guarantee the Vandal DB automatic success or cash, Copple said. He pointed out that only about three percent of all USFL contracts are guaranteed. Copple said that Loveall must make the team.

Loveall is one of 17 defensive backs the Gold will invite to try out for 10 positions on the Denver Roster. Seven players will be on the active roster, while three more will be on the developmental squad. Loveall is to report to the Gold's rookie camp at California State-Northridge this week.

"They're (Gold) most excited about getting him to come," Copple said. "And he thought it was an opportunity that he couldn't pass up."

Vandal Head Coach Dennis Erickson said that he felt his only Big Sky defensive selection has a good chance to hook up with the Denver squad.

"He was drafted high and they're keeping 10 out of 17 in camp," Erickson said. "With all the nickel and dime defenses being used in the pros now, he has a fine chance to make it with the Gold."

Idaho's Cal Loveall will be changing from the silver and gold to the Gold of the Denver USFL football team. Argonaut Photo by Tim

Vandal swimmers look to challenge

By Brad Williams
Staff Writer

state high school
championships.

UI swimmer Tracy Thomas prepares for the upcoming conference swimming and diving championships
Argonaut Photo by Tim Frates

With the return of six school record holders and good recruiting in the diving events, the Vandal swimmers look to challenge for a top spot in the Pacific West Conference swimming and diving championships.

Third year swimming coach Frank Burlison returns several lettermen from both the men's and women's teams. Combined with the improvement in the UI diving, the men and women look to improve on last year's 6th and 3rd place finishes in the Pacific West Conference Championships.

This past weekend the Vandal women encountered a minor setback as they lost to the University of Montana in a duel meet at Missoula. Both the men and women will see action this weekend, January 19th, when they host the first annual Vandal Senior Invitational.

The event will feature both high school and collegiate swimmers from throughout the Inland Empire. This meet will begin at 9 a.m. at the UI swim center.

The men's team returns eight lettermen, including UI record holder Jack Keane. Keane, a senior from Coeur d'Alene, holds UI records in the 100m and 200m backstroke. He is also a member of the 400m medley relay team and the 800m free relay team, which at the present time holds the UI record.

The men's diving team hopes to improve with the addition of Darryn Moore, a freshman from El Dorado, Kansas. Moore finished third in the Kansas

The Vandal women return eight lettermen also, including three women who currently hold UI school records. The Vandal women hope to improve on their 9th place finish at the 1984 NCAA Division II National Championships.

Jenifer Norton, a senior from Mill Valley, California returns to the UI after setting school records in the 400m individual medley last season. Norton also holds the school record in the individual medley.

Tonya Nofzinger, a sophomore from Rainer, Oregon, rewrote the Vandal record books last season in the 50m freestyle, and was an integral part of the 200m and 400m free relay and the 200m and 400m medley relay teams which also hold Vandal records. This past weekend Nofzinger continued her winning ways by posting victories in the 50m free (25.5), 100m free (55.19) and 400m free relay (3:45).

The third returning Vandal record holder is Tracy Thomas. Thomas, a junior from Federal Way, Washington, set a school record in the 100m breaststroke and teamed with Nofzinger on the 200m and 400m free relay teams. During the last U of I meet Thomas and Nofzinger teamed with Tracy Zimmer and Charlene Mitchell to capture the 400m free relay in 3:45.0. Zimmer won the individual 100m butterfly in 1:01.69.

The women's team also will improve its diving as Jennifer Hunkele, a freshmen from Minot, North Dakota, has already assaulted the Vandal record books setting school records in the 1m and 3m diving events. In Montana Hunkele won both the 1m and 3m events.

With the key returnees and improved strength in the diving events, both the men and women should have a good shot at their respective conference championships. And from there, hopefully go on to the NCAA which will take place on March 14&15 for the women and March 28-30 for the men's team.

Ski Meet — Entries open today.

Soccer Club to meet

The University of Idaho Soccer Club held their first practice Sunday in the ASUI-Kibbie Dome. Because of other activities scheduled in the Dome, practices will be somewhat erratic until the first of April. The schedule includes practices on the west end basketball courts on Jan. 27, 4 p.m., Feb. 17, 4

p.m., Feb. 24, 6 p.m. and Mar. 3, 4 p.m.

Starting January 16, the soccer club will try to get space in the women's gym, main floor court at 6 p.m.. Space is limited so availability will be on a first come, first served basis.

If weather permits, the club will try to schedule a few games

near the end of April. It is not likely that the club will be able

to make up much of a spring schedule because of early May exams.

Anyone interested should contact UI Soccer Club presi-

dent, Ron McFarland at 885-6937.

Bombs away Vandals

Greg Kilmer

I don't know if the Big Sky Commissioner's office knows it but they might have stuck in a new rule that will enable Vandal fans to have a lot more fun this season.

If this past weekend's conference opener was any indication, Coach Bill Trumbo's troops might be the biggest abusers of the new three point line rule.

The young Vandal hoopsters have proven that they can stay with people but they lack that certain ingredient that can push them over the "tough loss" bulge and into the "hard fought" victory column.

In 1982, the Atlantic Coast Conference adopted the 19'6" three point line. North Carolina State head coach Jim Valvano discovered that he could use this as a main weapon in the always tough ACC title chase.

Valvano knew that the strength of his Wolfpack squad was the play and outside shooting of his two talented guards, Sidney Lowe and Ron Wittenburg. N.C. State had a respectable front line but remember there were the Sampsons, Jordans and Perkins dominating the "paint" in the ACC that year.

The Wolfpack struggled through their early season schedule and slowly got some structure to their attack and finished near the middle of the league title chase, where most so-called experts

picked them to finish.

Along rolls the ACC post-season tournament, much like the brand new Big Sky post season tourney in Boise this year. All teams, one through eight, hook up in one spot for a couple or three days and the survivor gets a free ticket to the NCAA tournament extravaganza.

The Wolfpack rolled into the tourney and in order knocked off league champion North Carolina, Ralph Sampson led Virginia and the always tough Maryland Terrapins. With that, the pack from North Carolina not only picked up the ACC tournament trophy but the confidence that led them to their Cinderella story trip to the NCAA title.

The Vandals have shown that they have the players who can hit the three point howitzers. Frank Garza hit three in the two conference games this weekend, while Kenny Luckett, Teddy Noel and even 6'10" center Steve Ledesma pegged an extra-pointer.

Along with these long rangers, Chris Carey, Ulf Spears, Matt Haskins and even forward Steve Adams have the fire power to knock down a few long range prayers for us.

So when you Vandal fans figure it's time to beat the traffic and leave early to get that good seat at the bars, remember the immortal words of Yogi Berra, "It ain't over 'til it's over."

The MEAT BURRITO

Bueno!

Ah, The Meat Burrito... designed in Old Mexico for people on the move. A large portion of lean seasoned ground beef smothered in melted cheddar cheese... all rolled up in a flour tortilla and then deep fried to a crispy golden brown... bueno! The one handed meal for the man on the move... The "Meat Burrito".

For the busy executive.

PEACE CORPS Overseas Opportunities

Peace Corps is now accepting applications for two-year overseas assignments beginning next 3-12 months in developing nations in Africa, Asia, Latin American, and the Pacific in the following specialties:

AGRICULTURE: Degreed or non-degreed, with appropriate experience, responsibilities include crop extension, soil science, agricultural economics, vegetable gardening demonstrations, poultry and livestock production.

FORESTRY: BS/BA/AS degree in forestry or related area w/appropriate experience. Assignments include reforestation, watershed protection, erosion control, tree and soil conservation, timber and forest products development.

FISHERIES: (Fresh Water) Design/construct fish ponds, supervise stocking and harvesting, train local farmers in fishpond management, assist in marketing, BS fisheries or biological science background.

HEALTH PROFESSIONALS: (Degreed) RN's, OT's, PT's, Medical Techs, Nutritionists. Assignments range from nutrition counseling and lab work to community health care projects nurse training.

EDUCATION: BA/BS education, special education, physical or life sciences, math, health, home economics, business, French, or ANY DISCIPLINE WITH SCIENCE OR MATH MINOR. Positions may include classroom teaching, curriculum development or teacher training.

SPANISH SPEAKERS: Degree, college credits, or fluency in Spanish. Teach health, basic reading and writing skills.

Call Bob Phelps — your campus representative at 885-6757 or talk with him the Student Advisory Office, UCC 241. Office hours: Mon. thru Thurs. 1-4 pm or by appointment.

Start this semester off right and avoid Examination Jitters

Raise your GPA and enter all your exams confidently with:

THE PROBLEM SOLVERS

- Designed to save students hours of time in finding solutions to problems.
- Includes every type of problem that might be assigned or given on exams.
- Every problem worked out in step-by-step detail.
- Problems are arranged in order of complexity, from elementary to advanced.
- An essential supplement to any class text.
- Over 1,000 pages.

Features

SRO crowd for Wolf

By Stephen Lyons
Features Editor

It was standing room only as Kate Wolf brought her songs to the Palouse for the first time Friday night. Not only was the audience standing along the walls of the Moscow Community Center, but there were about 30 additional people packed into the lobby as well. And judging from the response, all were pleased.

The audience, although spanning all age groups from babies to older folks, was generally in their late twenties and early thirties. They had come to hear live folk music, a rare commodity on the Palouse.

Wolf, along with Beth Weild on stand-up bass and Tom Rigney on fiddle, played 23 songs divided into two long sets over three hours. From the opening song, *Safe at Anchor*, it was apparent that the folksinger from northern California was as comfortable with the audience as they were with her. Her easy rapport, gentle acoustic arrangements and powerfully personal lyrics quickly defused the usually tense relationship between performer and audience. There is no pretense about Kate Wolf. She exposes her life to the listener like an open book. The lyrics are personal but the feelings are universal as in the song Wolf wrote for her husband Terry, *Green Eyes*:

Every night we light the candle that stands beside our bed.

Sometimes the flame's too much to handle, that's what you said...

Wolf's songs are written from

the experiences we all have shared whether it's a love affair that went sour, a dream we put on hold or a place that holds a special meaning for us. Wolf had a song for the California exiles among us — *Pacheco*, written by Robin Williamson of The Merry String Band:

Purple clouds turn scarlet in the setting sun,

Where sage brush turns to live oak and the whitetail run.

The air is cool as music when the day is done,

And God paints the sky above Pacheco.

Many of Wolf's songs were new to the crowd. At one point Wolf asked the crowd how many had heard her music before last week's KWSU Inland Folk program. At least half the audience raised their hands. Wolf obviously enjoyed the new Palouse audience and introduced her songs with long monologues mixed with jokes she had heard while recently touring.

Fiddle player Tom Rigney also joined in the fun by interjecting one-liners but his real contribution was in his outstanding backup to Wolf. Rigney was able to keep his distance as an accompanist but at the same time show off his fast licks on the fiddle.

Bassist Beth Weild added the harmonies with help from Rigney — even the crowd joined in with gentle prodding from Wolf. She encouraged the audience to join in the choruses on several occasions by pointing out that "the babies are singing. The least we can do is join them."

Beside her easy rapport and original lyrics, Wolf's voice is also a strong attribute. And, although she had some trouble with the dry winter air, Wolf was still able to use emphasis when appropriate and stayed comfortably within her range. Wolf also makes you feel as if you are a part of the scene she creates through her words. When Wolf sings about her life, you believe it. One of her most intimate ballads is *Unfinished Life*, from her fourth album *Close to You*:

It's a journey with my soul that I am taking.

One that only goes from the cradle to the grave.

Wolf also has a message of universal community bound together by the human spirit. In the song from her double album of the same name, *Give Yourself to Love*:

Kind friends all gather round, there's something I would say, That what brings us together here, has blessed us all today.

Love has made a circle that holds us all inside, where strangers are as

family, loneliness can't hide.

Wolf and her band had driven eight hours from Seattle in a van which had lost a headlight along the way. Her son, Max, handled the driving as well as the record sales at Friday's concert. The musicians also unloaded their own instruments. Amazingly enough Wolf's performance showed none of the weariness of travel. She was energetic and the crowd responded with energy of their own.

Kate Wolf shares a light moment with the audience at Friday night's concert. Argonaut Photo by Deb Gilbertson

Idaho folk art comes to Palouse

By Scott McDonald
Staff Writer

The University of Idaho Prichard Gallery in downtown Moscow and the University Gallery on campus will host the traveling exhibition *Folk Art of Idaho* beginning Friday, Jan. 18. The joint venture should give area residents a taste of culture rarely displayed as an art form.

Folk art is art which has grown through time within a community. It includes household articles such as rugs and quilts, ranch equipment, recreational devices, and ceremonial items. According to Governor John Evans, folk art is the way we make the ordinary object extraordinary.

Before *Folk Art of Idaho* was collected and documented, Idaho had been one of four states never to organize such an undertaking. Idaho folk art was seen only at the family or community level because it was not made to be put on display.

Now, thanks to numerous organizers, a \$34,000 grant from the National Endowment for the Arts, and curator Steve Siporin of the Idaho Commission on the Arts, Idaho folk art will get public attention in Idaho, Washington, and Utah. The exhibit, which opened in Boise last August, will continue

from Moscow through Idaho and then head for Spokane and Salt Lake City, Utah. The trip will last two years.

Folk Art of Idaho contains more than 130 works from across the state of Idaho dating from the early 1900s to the present. According to Kathy Ecton, director of the two UI galleries, Moscow is one of the few locations able to house the complete exhibit.

The show is divided into four categories: Beauty in the Home, Working on the Land, Whimsy and Recreation and Ceremony and Celebration.

The Beauty in the Home section consists largely of hand-crafted quilts, table runners, table covers, and rugs. Also included are house slippers, baskets, woven bags, and a leather album cover made by Ray Holes of Grangeville. Two of the older items are a spoon and cup carved from juniper by an unknown artist that dates back to 1905.

Several other carvings in the exhibit are more akin to conventional artwork. Painted figures carved from pine and aspen include a set of bird heads made by Robert McPeak of Coeur d'Alene. Also contributed by McPeak is a chair constructed from elk antlers, buckskin, and rawhide.

A unique Beauty in the Home

entry is a humidifier that looks like a small log cabin. Crafted from scrap iron by Raymond Johnson of Ovid, it sits atop a woodburning stove and steams vapor through its chimney.

The majority of the Working on the Land section is made up of leather and rawhide horseriding equipment such as saddles, headstalls, reins, and bridles. Additional equipment from the ranch included in the exhibit are spurs, branding irons, belts and ropes.

Ray Hole's leather-crafted saddle is only one of many Grangeville contributions. Horace Henderson, Ernie Knight and Elmer Shepard lent expertly made rawhide ropes, bosals, reins, hobbles and a quirt (riding whip) to the exhibit.

Also to be seen in the Working on the Land division of the exhibit are engraved hardhats, wood sculptures and a miniature hay derrick and hay stacker.

The Whimsy and Recreation section of the exhibit contains numerous carvings, tools and games made for leisure time. Included are intricate wooden chains, a whittling sampler containing chains, swivels, fans, and balls in boxes, and a "board stretcher." Board stretchers are

See Folk art, page 15

This leather saddle by Ray Holes will be featured at the upcoming folkart show coming to Moscow later this week. Photo by Ray Holes

Cray Rocks WSU

By Carolyn Beasley
Staff Writer

Judging from the inspired dancing and entranced crowd at the WSU CUB Saturday, The Robert Cray Band was quite the opposite of the title of its latest single, *Bad Influence*.

The two and a half hour performance was a show of pure rhythm and blues talent.

Opening with *My Little Girl*, the band rocked the audience into ecstasy with such tunes as *Too Many Cooks* and *Don't Touch Me*. The performance included both slow, hard-hitting blues as well as an array of faster, jumpier beats.

The band, brought to Pullman by ASWSU, had returned from Japan earlier this summer. "They knew who we were over there," Cray said, "they even sang along on some of the songs, they knew the words."

It is obvious to see the effects one of his favorite musicians, Jimmy Hendrix, has on his music when listening to some of the more mellow, gospel pieces.

The band consists of four members: Cray; Richard Cousins, bass guitar; David Olson, drums; and Peter Boa, keyboard.

Although The Robert Cray

Band has been together for eleven years, Cray and Cousins have been performing together for fourteen years, said Cray.

Cousins, a tall wiry type, added his own comical yet appropriate touch to the performance. His strumming talents gave each piece its sometimes hard but always constant background beat.

When a drummer beats the canvas so hard as to move his set, he's got to be enjoying his job. At one point during the show, Olson had to stop and move the drum set back to its original position, getting a cheer from the audience.

Boa, the newest member of the band, provided modern accompaniment as well as vibrant solos.

Cray himself showed the audience the meaning of getting into the music. His concentration on whichever piece being played was obvious through his constant chanting away from the mike.

The Band's new album, not titled yet, should be released in middle March, said Cray.

The band members plan to head to California, currently Cray's home state, later this month. In March they will go to Europe and in the summer they will travel to Japan.

Robert Cray ran off some of his tasty lyrics Friday at WSU

folk art, from page 14

legendary tools apprenticing woodworkers were sent to collect. They don't really serve a function but are interesting to look at.

Moscow's representative in the show, Frank Werner, displays his work within *Whimsey and Recreation*. His duck decoys are extremely realistic anatomically but are decorative rather than working in nature. They don't follow the simple lines of earlier decoys that were made to be used for actual hunting. Another area resident, John Cook of Elk River, has included a picnic basket and fishing creel in the exhibit. Both are examples of his fine willow basketry.

Whittled pine fans, walking sticks, fishing flies and a whirlygig for the rooftop will also be found under *Whimsey and Recreation*.

The Ceremony and Celebration portion of the exhibit consists largely of colorfully decorated Indian clothing. The beaded moccasins, leggings, cuffs and bags are fitting examples of Idaho Indian art.

The Greek custom of creating a sacred corner is brought to the exhibit with Jim Varkas' *elkonostasion*. An *elkonostasion* can be either a shelf, walnut case with glass doors, or painted wood panels used as a center for worship. Varkas, a Boise resident, fashioned his from pictures of Greek churches and his

Cellists to perform

By Ed Ulman
 Staff Writer

Two Moscow residents will present a recital in the School of Music's recital hall on Jan. 17.

The two, a husband and wife team, include University of Idaho Cello and Bass Professor Bill Wharton and principal cellist for the Washington Idaho Symphony, Linda Wharton.

Both are coming off a one year sabbatical which saw the duo playing 30 concerts in public schools and colleges in Idaho, Montana, Ohio, Wisconsin, Arizona, Oklahoma and Louisiana. The two are looking forward to what might be con-

sidered their homecoming performance.

Having an impressive repertoire to choose from, the Wharton's will be performing works by Sammartini, Vivaldi, Faure', Popper and Cassado. Highlights of the performance should be Zoltan Kodaly's Solo Sonata, Op. 8 and Chaikovsky's Variations on a Rococo Theme, Op. 33.

Playing sporadically since 1974, the couple decided to take their sabbaticals together and perform so that young people could have the opportunity to hear a solo cellist perform. The concerts were very successful. "Most of the concerts we

played were at public schools. The music directors and administrators were glad to have us play and it was positive for the kids," Linda Wharton said.

Having his Masters degree from the University of Oklahoma and his Doctorate from the University of Arizona, Bill Wharton came to the University of Idaho in 1974 and has been working as professor of cello and bass while also giving private lessons in Moscow and Pullman.

The concert will begin at 8 pm and should be both interesting and educational.

Cellists Bill and Linda Wharton will perform a concert at 8 p.m. on Jan. 17 in the School of Music Recital Hall. Argonaut Photo by Tim Frates

COUPON

WSU duo set

Debra Richter and Deborah Dick will perform a concert of piano selections by Bach, Brahms and Rachmaninoff. Thursday, Jan. 17, on the Washington State University campus.

The program is scheduled for Kimbrough Concert Hall at 4:10 p.m. and is open to the public without charge.

While you've been planning for the future,
 Varian's been building it.

Heating plasma for fusion energy is the same process by which stars produce energy. This is a photographer's interpretation of how this process may look.

Energy from seawater? Varian's contribution to fusion energy research may make it possible to draw virtually limitless energy from seawater. This is just one example of our aggressive leadership in higher technology — a leadership position that could include you. We'd like to show you how you may help build the future in the critical areas of medicine, defense, communications and science.

Varian's Larry Chipman will be at the University of Idaho to give a brief slide presentation and discuss the opportunities available to you. Plan to attend Monday, February 11, 1985 at 6:00 pm at the University Inn and sign up now at your Placement Office for on-campus interviews to be conducted on Thursday, February 14, and Friday, February 15, 1985.

We are an equal opportunity employer.

complete dance wear, accessories and shoes . . . for jazz, tap, ballet and aerobic dance.
