ASSOCIATED STUDENTS UNIVERSITY OF IDAHO

Vol. 90, No. 2

## Southbound: McKinney off to New Mexico

BY PAUL ALLEE

Administration chimes will ring out at 12:20 p.m. today in honor of David McKinney, university vice president of finance and development. After nearly a decade of UI service, McKinney will leave Moscow this weekend to become vice president of business and finance at the University of New Mexico.

McKinney begins his new job Sept. 1 at the Albuquerque-based university. The southwestern campus has an enrollment of 25,000 students and a budget of about \$500 million.

"I'm going to miss Idaho," McKinney said. "My time here has been well spent, but this is a great opportunity for me, so I'm going to take it."

McKinney's accomplishments over the past nine years include:

- the generation of nearly \$25 million for campus construction — all monies raised from sources other than direct student fees,
- the development of a long-range university plan — until the early '80s the UI failed to have one,
- the construction of the Kibbie Dome East End Addition, the Life Science Building Addition,
- the remodeling of facilities at the Memorial Gym, and,
- the establishment of UI as the state's top research institution.

From 1980 to 1985, McKinney also helped bring UI Foundation assets from \$10 million to \$25 million. But he says that he does not

like to take credit for these accomplishments alone.

"I've had a lot of help here in my nine years," he said.

According to McKinney, primary support came from his family and UI President Gibb. Before coming to Idaho, he worked for Gibb in both Indiana and South Dakota.

Other help came from UI Controller Gerry Reynolds, who will temporarily fill in for some of McKinney's duties until a permanent replacement can be found.

Reynolds has been named acting vice president of financial affairs. Director of Alumni Relations Flip Kleffner will temporarily fill a new position, vice president of university relations and development.

Kleffner will temporarily take over the remainder of McKinney's former UI obligations.

## UI awarded \$1.1 million

BY STEPHANIE KUCK

Congratulations are definitely in order.

The University of Idaho has recently been given \$1.1 million in research funds from the Idaho Board of Education. That is about 58 percent of the \$1.9 million total that was available for distribution among all the colleges that submitted proposals for the funds.

At the final count, Idaho State University received about 22.8 percent, Boise State was allocated 14.7 percent, and Lewis-Clark State College was presented with 4.3 percent.

The money was distributed to the colleges whose proposals best subscribed to the guideline specified by the Board — that the projects be designed to produce results that would lead to economic development for the state.

Some of the projects presented to the board are the stuff Frank Herbert's dreams are made of.

Larry Branen, the Associate Dean of the College of Agriculture, said most of the projects came from his college. Among some of the theories which will be tested is the possibility of genetically developing a sort of double-muscled animal to provide leaner meat than is available today. He said his department will also be researching the converting wood product waste into more usable materials and also some newstrains of micro-organisms that protect

plants from freezing and aid in fermentation.

Richard Jacobsen, associate dean of the College of Engineering, spoke about two large groups of proposals under the headings "advanced materials research," and micro-electronics. The former category deals with thermal plasmas, or gases of extremely high temperature, which aid in the production of fine "sub-micron" powders of high value. These in turn create new materials of high quality, and, hopefully, commercial use. The micro-electronics is a better established field, and one in which the UI is excelling. Just last year Gary Maki, professor of Electrical Engineering headed the development of a micro-chip for NASA.

The College of Forestry and Wild Life gave proposals for nine projects, all in aquaculture dealing with making Rainbow Trout production more efficient with genetically improved fish. This would increase profit and allow for business expansion.

The money for the four main categories runs as follows: Biotechnology-\$320,000; Advanced Materials-\$250,000; Micro-electronics-\$384,000; and Aquaculture-\$150,000. It will go toward paying for operating bills, materials needed, equipment, consultants and technicians, faculty salaries, and possibly travel expenses for the exchange of infor-

## Welcome Back!

### For Your Convenience Our Book Rush Hours Will Be:

Aug.	24	Mon	8 a.m.-9 p.m.
	25	Tues	8 a.m.-9 p.m.
	26	Weds	8 a.m.-9 p.m.
	27	Thurs	8 a.m.-9 p.m.
	28	Fri	8 a.m.-5:20 p.m.
	29	Sat	9 a.m.-4 p.m.

### Avoid the Rush—Buy Your Textbooks Early!

#### Our Regular Semester Hours Will Be:

Mon-Fri 8 a.m.-5:20 p.m.  
Sat 9 a.m.-4 p.m.

#### Book Return Policy

If you drop or change a course, the texts may be returned under the following conditions:

1. Returns **MUST** be accompanied by the **CASH REGISTER RECEIPT**.
2. Books must be in absolutely new condition, free of all markings with pencil or ink, other than our price mark.
3. Returns will be accepted within **TWO WEEKS** from date of purchase. The only exception to this is toward the end of the semester, when returns of overstock are made; then there will be **NO RETURNS ALLOWED ON TEXTBOOKS**. The date for this period will be posted and it is the responsibility of the customer to note the date.
4. We are the sole judge in determining whether books are in returnable condition.
5. Tradebooks and special orders are **NOT RETURNABLE**.

**LIBRADO** Tadeo instructs junior Karlene Cameron and other students in his advanced class of Sho-To-Kan Karate. The class started Wednesday, and will meet three times a week in the Physical Education Building (PEB) Room 111. (ARGONAUT/Henry Moore)

## UI club brings karate to Moscow

BY ALAN SOLAN

In 1979, after practicing karate for more than 10 years, Li Tadeo learned something about his art he wants to share with the people of Moscow: "the highest skill is not to win a hundred battles, it is to subdue one opponent."

"I learned that karate is not fighting, it's a way of life," said Tadeo, instructor (Sensei) of the UI Shotokan Karate Club. Tadeo will open his non-profit school to the general public starting this semester. "In traditional karate, the greatest victory you can win is to become friends with your enemy and not fight him at all."

Karate, literally translated as "empty hand", is one of the oldest and most effective means of fighting known to man, says Tadeo. Although karate can be aggressive, it is taught and practiced by most

groups as self-defense.

Tadeo stressed there is a difference between the traditional karate he teaches and commercial or "Americanized" karate. For example, traditional karatekas (students) do not use special equipment such as headgear, gloves or shoes. The reason for this, Tadeo said, is because traditional karate emphasizes style, form and control. The art of karate is more important than the sport.

Originally from Okinawa, Shotokan karate was introduced to Japan in 1921 by Master Gichin Funakoshi. Funakoshi is known as the "Father of modern karate" because prior to 1921 the sport had been a secretive art taught by fathers to their sons.

According to Tadeo, the practice of true karate has many benefits besides learning self-

defense. In addition to increasing physical fitness and stamina, regular karate training teaches one to concentrate and calm the mind, maintain emotional balance, improve mental alertness and quicken reflexes.

Good character is an important goal of Shotokan karate. The martial arts philosophy emphasizes attributes such as kindness, honesty, respect for others, desire for perfection and competitiveness with good sportsmanship.

Tadeo said probably 75 percent of his beginning students come into the first class with the idea they are going to become Bruce Lee right away.

"They don't understand the most important part of studying karate is the development of their attitude," he said.

# Newsbreak

## Computer enrichment offered

Several non-credit courses offered through the UI Enrichment Program this fall will give students a grounding in various aspects of computer use.

An introductory course in microcomputer use will be offered. It is designed for new or potential users of a microcomputer and will cover keyboard use, floppy disc use, creating files and how to prepare the system for use.

Students will be familiarized with the IBM PC and must have the class to sign up for either "Lotus 1-2-3" or word processing.

"Lotus 1-2-3" will introduce electronic spreadsheets. Designed for those with little or no experience in using them, the course will explore the list management spreadsheet and graphics capabilities along with the command structure and menu systems of the program.

Use of the WordPerfect word processing program will be discussed at the introductory and advanced levels in two courses taught this fall. The software is capable of complicated formatting and document production.

For information about any of the computer-related courses or any others offered by the Enrichment Program, contact Conferences and Enrichment Program, 885-6486.

## UI counseling accreditation

The university's graduate programs in counseling have received full accreditation through 1992.

Previously, the master's program was provisionally accredited, while the doctoral program had full accreditation.

Master's programs are available in school counseling and in community and other agency settings. The UI doctoral program is in counselor education. Counselors are prepared to serve in all levels of schools, from kindergarten through university.

UI graduates also serve in a variety of community and state agencies, in private practice and teach counseling at the university level.

Thomas Bell, UI vice president for academic affairs and research, said the criteria for accreditation include a demanding, balanced curriculum in the program, extensive practice in real settings under supervision, self-study by the faculty, an analysis of the relative success of graduates and on-site investigation by an accreditation team, and final approval by the accreditation board.

## Women's rush up from fall 1986

This year 188 women pledged the eight social sororities represented on the UI campus during formal fall rush activities August 14-19.

That compares to a total of 187 last year.

Frances Dobernig, assistant Greek advisor, said, "Rush went better than ever. There were no problems."

The numbers of women beginning rush were higher than a year ago, Dobernig said, but more of them chose to drop out for one reason or another.

# UI water system potentially hazardous

## Plumbing could be hinderance in fire

BY KIRK LAUGHLIN

A flaw exists in the UI's plumbing system that could be a hinderance in a major fire according to Butch Fullerton, the Plumbing and Refrigeration Shop Foreman.

Fullerton, commenting on the system that left Moscow fire-fighters with low water pressure Saturday morning during the fire in the wood-chip storage silo, said "it was a design flaw to start with."

A simplified explanation of the UI water system, said Fullerton, is that it consists of two tanks. The first tank distributes water all over campus including all the buildings and the fire hydrants. The second tank, located at the golf course, is an extra holding tank. While the back up tank is filling, though, a valve between the two tanks closes, cutting off water to the main tank. The valve does not re-open until the back up tank is full. If both tanks were allowed to fill at the same time, the back up tank would over flow.

Saturday morning, the back up tank started to fill while the main tank's supply of water was being depleted by fire-fighting efforts.

"It's a crap shoot," said Fullerton. "The tank fills at a different time every day. They just happened to be fighting the fire at the time." "We knew we had a problem but we didn't know how big it was," said Fullerton.

He also said that plans for looking into the problems of the UI plumbing system have been moved "right up to the front burner."

The implementation of a computer model, which "kind of got pushed off to the side" in recent months should be in operation within a month or so, said Fullerton. This model will show flow rates and determine where money should be spent improvements.

"It's a bit more complicated

than it sounds," claimed Fullerton. "A direct link between the two tanks may not solve the problem. We're also dealing with corrosion caused by iron bacteria." Additional plumbing on campus may also be needed.

Fullerton also pointed out another order of business will be to acquaint Moscow firemen

Physical Plant

more fully with the UI water system. When water pressure dropped, the fire-fighters hooked onto two more hydrants that also drew off the same tank. The firemen then attempted to draw on the city's water supply but "they didn't know where the points of connection were," said Fullerton.

**"We knew we had a problem, but we didn't know how big it was."**

-Butch Fullerton

"They had to call (the Plumbing and Refrigeration Shop) to locate them but by the time we got there the fire was already out." Fullerton said he'd like to see Moscow firemen with maps and keys to the connection points as part of the improvements to the UI system.

Moscow Fire Chief Phillip Gatlin commented that there has been no reason to patch the two systems together since, he estimated, 1955. "It was just a unforeseeable set of

circumstances," said Gatlin.

Fullerton urged, though, that "we do have a good protection system on campus. There are lots of hydrants. There was plenty of pressure during the Pike fire (last spring)."

In regard to safety measures at the physical plant itself, Chief Gatlin said he has talked with UI officials about the possibility of additional safety devices but no decisions have yet been reached. Last April, Chief Gatlin asked UI officials if there would be fire suppression devices installed in the silo. He was told that "with the wood chips moving through quickly, there should be no danger."

Fullerton's views agree with this analysis. "I can't envision the chips sitting there that long again," he said. According to Terry Maurer, Director of Media Services, the chips had been in the silo "for four or five months" at the time of the fire due to delays in beginning the plant's operation. The chips had become damp, allowing fermentation and, finally, spontaneous combustion to occur. They were in the process of being removed when the fire started. "When the plant is fully operational, the chips will be in the silo for ten days — two weeks at most," said Maurer. The delays in getting the plant started were due to the fact that "this is brand new technology," commented Maurer. "You've got to expect problems, delays, and glitches," he continued.

"The physical structure of the silo was not harmed," said Fullerton. Electric motors that were drenched while the fire was being put out will have to be repaired. Fire suppression equipment in the silo is of "lesser concern" continued Fullerton. "A fire can't do a hell of a lot of damage, anyway."

"I don't see this impacting the time line of getting the plant operational," said Maurer. He claimed the wood burning silo would be operational by the time cool weather begins.

### REGISTRATION ROUND-UP

FALL	REGISTRATION
1983	8,420
1984	7,008
1985	6,623
1986	6,419
1987	(Est.) 6,755

In fall 1983, a record number of students registered in the Kibbie Dome. In recent years the university has experienced an enrollment decrease. However after Tuesday's registration, university officials have estimated an increase of 336 students from last year.

Source: Matt Telin, UI Registrar

Jon Erickson - Graphic

ACCORDING to Registrar Matt Telin an estimated 6,755 students registered for the 1987 fall semester in the Kibbie Dome Tuesday. The increase in students led to longer lines than usual, as registration moved throughout the day. (ARGONAUT/Randy Hays).

## An ASUI pat on the back

Student body Sen. Brian Allen deserves either a kick in the pants or a pat on the back.

That's because while serving on the ASUI Activities Board last fall, he joined the majority of board members in approving questionable funding transactions to several student groups. Even after he resigned from the board in November to become a senator, he sat on his laurels for more than a semester while the board continued to shell out student monies to everyone from cheerleaders to "preferred" campus living group members.

For example, although Activities Board guidelines say "no club will be funded for food, travel, telephone, or use of lodging and uniforms," the cheerleaders jumped for joy after pom-pomming their way to a \$1,185 Activities Board allotment.

Board guidelines also say "no club will be allocated more than 13 percent of the total annual budget, unless a special event needs additional funding." But that didn't keep the men of Phi Delta Theta from beaming last spring, as they reeled in 100 percent of the \$900 they spent on the "Phi Delt Flicks."

True, the board has helped fund the Parents Weekend-Greek Week movies in the past. But they haven't approved money for other campus living group events. Maybe that's because the ASUI shouldn't be in the living group Handibank\* business.

Finally, Activities Board rules state that equipment bought with ASUI funds becomes university property, and "must be checked in (and out) at the Outdoor Center." That came as a surprise to Jim Rennie, the ASUI Programs director in charge of the center. He says he was never told beans about more than \$100 in equipment that the board bought last year for the Juggling Club.

In short, Activities Board has been shelling out the bucks to campus groups, but failing to follow the important guidelines set by committee members in 1983. And while Allen can't be blamed for the actions of the entire board, he can be faulted for waiting so long to do anything to resolve the situation.

In all fairness, however, the senator deserves a small pat on the back.

That's because he is working to pass a bill to require Activities Board to seek Senate approval when giving out more than \$500 to any single group. The bill also includes language that will keep living groups from hogging monies that were originally meant to go to university clubs and organizations.

Let's encourage the Senate to quickly pass Allen's bill. And if they don't? Well, we'll all know where to pat them.

Paul ALee

## Holy Roller: bad gamble

DAVE BLAKELY COMMENTARY

Lately, we've been hearing a lot about the seven Democratic candidates running for president — otherwise known as the seven dwarfs. So far, however, relatively little has been said about the candidates or potential candidates on the Republican side.

One of these likely candidates is the Rev. Pat Robertson. In case you are unfamiliar with Rev. Robertson, he represents the far right wing of both the Christian religion and the Republican party. He can be seen nightly on Channel 14 at 11 p.m. on his show *The 700 Club* — the same show that gave us Jim and Tammy Bakker.

Now, on most occasions, I would be the last person in the world who would recommend you watch such mind-numbing drivel as this program. But, in the interest of political education, I believe you should tune in every once in a while, as I do, in order to find out just what the good "Rev." is thinking these days.

At present, Rev. Robertson and his fellow talk show partners are in the midst of their never ending battle against secular humanism, communism, liberalism and so forth. It's sort of like Dallas; the characters may change but the story remains much the same.

Most recently, their focus has been on trying to portray secular

humanism as an organized religion. I must ask you dear reader, how many secular humanist churches have you seen lately?

Notwithstanding, *The 700 Club* cheered when an Alabama judge ruled in favor of such a ridiculous proposition. In his ruling, Judge Hand banned all textbooks (from Alabama schools) which talked about such purported humanist doctrines as evolution. Unfortunately for Rev. Robertson, the Alabama court of Appeals, a noted bastion of liberalism, reversed this ruling and the children of Alabama are once again learning about evolution.

Even more offbeat is Rev. Robertson's opposition to communism. Most people deplore communism for its failure to guarantee free speech and dissent among its citizens. Despite protestations to the contrary, this could not be a very important consideration for the founder of *The 700 Club*. A diversity of opinion is the last thing Pat Robertson wants on his show.

In fact, perhaps only in pre-Gorbachev issues of *Pravda* is one single viewpoint presented, with nary a word of opposition or comment from others who think differently, to the degree it is in *The 700 Club*.

This is not to say that there isn't a place for Christian programming such as *The 700 Club* on television. There is. Yet one has to wonder about the Christian concept of

fairness which allows non-Christians to be publicly lambasted on TV without even being offered a chance to defend their beliefs to their accusers.

Perhaps Rev. Robertson would respond that the major networks are all controlled by secular humanists with a secular programming agenda. This may or may not be true, but it hasn't prevented these networks from providing a wide range of viewpoints. People like George Will, and shows such as CNN's *Crossfire*, insure that the conservative position is articulated and eloquently defended.

If Rev. Robertson wants us to take him seriously as a political candidate, he needs to do a few things. First, he should open his program to a variety of viewpoints to avoid conveniently distorting the opinions of those with whom he disagrees. Secondly, he should open his ministry finances for public inspection and provide an accounting of the \$8 million he has so far received in campaign contributions. Thirdly, he should provide a detailed accounting of his service during the Korean War to include whether or not he was able to avoid combat through the efforts of his father, a U.S. senator.

Failure to take these steps will do little to assuage the belief that Rev. Robertson is just another huckstering televangelist trying to increase his audience — and his revenue.

**LETTERS POLICY:** The Idaho Argonaut will accept letters to the editor until noon on the day prior to publication. They should be limited to one page in length, typed, and double-spaced. For subjects requiring greater exposition, arrangements may be made with the editor. Letters must be signed in ink, and include the name, address, and phone numbers of the writer. Proof of identity will be needed at time of submission. Letters received by mail will not be run unless confirmation of authorship is made. Names of writers will not be withheld. Letters may be edited for length, mechanical errors and spelling errors. The Idaho Argonaut reserves the right to refuse to publish any letter.

The Idaho Argonaut is published, while the university is in session, on Tuesdays and Fridays, August through May. Editorial and ASUI Advertising offices are located on the third floor of the Student Union Building, 620 S. Deakin St., Moscow, Idaho, 83843. Phone numbers: Editor (885-7845); Advertising (885-6371); Receptionist (885-7825). The publisher is the Communications Board of the Associated Students-University of Idaho. Opinions expressed herein are those of the writer. The Idaho Argonaut is distributed to 87 locations on campus. It is funded by advertising sales and a portion of ASUI student activity fees.

# OPINION

## Discount flawed

**Editor:**  
The Residence Hall Association and the housing administration came forward with the wonderful plan of offering discounts to the sophomores, juniors, and seniors living in the residence halls this school year. However, there seems to be a flaw in how this discount plan is being used by the Housing administration.

We discovered that the discounts offered to upperclassmen dormitory residents are being withheld by the Housing administration and are to be refunded at the end of the academic school year. We feel this unfair to the residents receiving these discounts. These discounts should be deducted from the schedule of payments offered to the residents. If this plan is not feasible, the discounts should be refunded at the beginning of the school year, the beginning of each semester, or in monthly installments, in accordance with the schedule of payments offered by the Housing administration for room and board payments.

Furthermore, the housing administration is gaining profit from the interest collected by investing the residents' discounts throughout the school year. If the housing administration is going to withhold the discounts and return them at the end of the school year, the following should take place. The residents qualifying for the discounts should be paid the amount of the discount plus the interest made on the investment of the rebate during the school year. The bank offers interest on our money by letting them use it for a period of time. Why can't the housing administration do the same?

We feel that action should take place immediately to remedy this unfair and unsatisfactory situation.

Thank you for your consideration in helping us solve this unfortunate misunderstanding.

Vernon A. Hansen

## Evolutionary force discovered

**Editor:**  
In his letter to the *Argonaut* of May 8 this year Francis Northam twice used the term "evolutionary force." This is amazing! Soon the world will read all about it:

### DISCOVERS EVOLUTIONARY FORCE — IDAHO MAN WINS NOBEL PRIZE

Mr. Francis E. Northam, a Ph.D. candidate in Plant Science at the University of Idaho, has been awarded a Nobel Prize for his discovery of evolutionary force. According to the Nobel Foundation this is one of the most important natural forces ever to have been discovered. It ranks Northam's discovery with Michael Faraday's discovery of electromagnetic force in the nineteenth century and Isaac Newton's discovery of gravitational force in the seventeenth century. When asked by the press how he discovered evolutionary force, the brilliant young scientist from Idaho replied...

*Editor's note: the preceding sarcasm break has been brought to you by your favorite UI Special Collections librarian.*

## Crusade for life

**Editor:**  
Howard Rutledge, a USAF pilot, was shot down over North Vietnam during the early stages of the war. He spent several miserable years in the hands of his captors before being released at the wars end. In his book, *In the Presence of Mine Enemies*, he reflects upon the resources from which he drew in those difficult days when life seemed so intolerable.

"During those longer periods of enforced reflection it became so much easier to separate the important from the trivial, the worthwhile from the waste. For example, in the past, I usually worked or played hard on Sundays

and had no time for Church. For years Phyllis (his Wife) had encouraged me to join the family at Church. She never nagged or scolded — she just kept hoping. But I was too busy, too preoccupied, to spend one or two short hours a week thinking about the really important things.

Now the sights and sounds and smells of death were all around me. My hunger for spiritual food soon outdid my hunger for a steak. Now I wanted to know about that part of me that will never die. Now I wanted to talk about God and Christ and the Church. But in Heartbreak (the name the POW's gave their prison camp) solitary confinement, there was no pastor, no Sunday school teacher, no Bible, no hymn book, no community of Believers to guide and sustain me. I had completely neglected the spiritual dimension of my life. It took prison to show me how empty life was without God."

Life at the UI has a lot to offer. In the social, physical and intellectual dimensions of life there are great opportunities for growth. Unfortunately the spiritual dimension is often ignored if not forgotten. By quoting Rutledge I'm not implying that the UI is a prison camp, far from it. Here's the point: will it take tragedy to make you realize the importance of your spiritual life. Or will you acknowledge that your relationship with God is not only a relevant concern, but, dare I say, the most important dimension of your life?

Campus Crusade for Christ is a student organization here at the UI whose purpose is to help meet the spiritual needs of students. We invite you to come and join us Thursday night at 9 p.m. at the Campus Christian Center for our weekly meeting called "Prime-time." Come and see what we have to offer.

Lets not neglect our spiritual lives. It would indeed be tragic if at the end of our lives, after climbing the ladder of success, we found that the ladder was leaning against the wrong building.

Ralph H. Cooley  
Director,  
Campus Crusade for Christ

## A freshman survival guide

BY PAUL ALLEE

Warning: the first year of college can be hazardous to your mental health. But by going to class regularly, choosing compatible roommates and avoiding questionable cafeteria foods, students can overcome the freshman blahs.

That's what five University of Idaho sophomores concluded during a panel discussion held recently in the Student Union Building.

"It was the best and worst year of my life," said panelist Sally Gilpin, an advertising major from Portland.

"Being a freshman is like a test," she said. "You have to prove to yourself that you have the confidence to do whatever you want, without your mom and dad there to hold your hand."

Other student panelists were Alan Chapman, an English major from Nampa; Beth Howard, an elementary education major from Couer d'Alene; Scott Pyrah, a metallurgical en-

gineering major from Carey; and Robert Watson, a public relations major from Post Falls.

According to Watson, the first survival tactic students learn is that they must attend their classes regularly.

"I learned it the hard way," he said. "I was always told that the professors were really cool and they you didn't have to go to class if you didn't want to. I tried that in Geology and got a 43 percent average."

Other panelists urged incoming freshman to help their grades by choosing their class schedules with care.

"Talk to people who have been here a year or more," Pyrah said. "They know what teachers to take and can help you choose the best classes."

Gilpin agreed.

"Listen to older students," she said. "And don't overload yourself with 18 or 19 credits your first semester. I've seen girls who did that and came up with 0.6 grade averages."

When choosing roommates, panelists urged freshman to exercise extreme caution. "Think

twice about sharing a room with someone you knew from high school," Howard said.

"I would advise people not to be afraid to change roommates if things don't work out," Chapman said. While living in the Wallace Complex, Chapman switched roommates three times during the first two weeks of class before finding a compatible companion.

Other panelist observations included:

"Having a girlfriend can ruin your G.P.A."

"Use your common sense. Look before you eat"

"Don't eat anything 'a la' anything."

"Don't get a TV. You'll never study again."

With so many warnings, is there anything to look forward to during your freshman year?

"You bet," Gilpin said. "I would have never guessed coming out of high school that I would change so much in just one year. Now I have the confidence and ability to make friends, be a leader, and succeed and do whatever I want to do."

## Welcome Students

The Moscow Assembly of God would like to meet you Sunday, August 30th at our regular Sunday services, followed at 1:30 by a chile feed at East City Park.

**FUNDS FROM PAGE 1**

mation.

This funding, however, is only guaranteed for one year. Jacobsen said the projects were to be "funded and proposed as one year projects with the possibility of renewal left open."

But he also said that "obviously some of these projects are more than one year projects."

Ernest Ables, Department Chairman at the College of Forestry and Wildlife, pointed out that when one is dealing with things like genetic improvements, it is "impossible to do all these great things in one year." Of course, there will be some results documented at the year's end but continuous funding is necessary to produce the most spectacular of outcomes now on the horizon. But again, any financial help is always needed, and definitely helpful to advancement of the research.

At this point, renewal of the funds is in no way guaranteed.

**KARATE FROM PAGE 2**

"Self-defense is much more than fighting with your fists," Tadeo said. "If there is a dark alley and you walk down it, you're not using self-defense. You should find a way to avoid the alley if you think you might get in a fight." The goal of karate training is to have confidence in yourself, not to see how many people you can beat up, he said.

A native of the Philippines, Tadeo began studying karate at the age of 13. After receiving his B.S. degree in architecture from the University of Santo Tomas in 1979 he took a job in Saudi Arabia where he immediately started a karate club.

In order for the club to be accepted by the Japan Karate Association, Tadeo denounced his black belt and returned to the Philippines to be trained under Sensei Sasaki. Sasaki, a third generation Sensei (he was trained by a Sensei who was trained by Master

Funakoshi), awarded Tadeo a black belt after two years of training.

By 1985, when Tadeo came to the UI to begin a master's program in architecture, the Saudi Arabian club had grown from three members to more than 150.

Since he became the Sensei of the UISKA in Sept. 1985, Tadeo said his classes have averaged about 12 students. This is because students are graduating and moving away every semester.

By opening the school to the public, Tadeo hopes to be able to train pupils who will be around long enough to obtain black belt status and become instructors themselves.

The UI Shotokan Karate Club is affiliated with the International Shotokan Karate Federation which represents the Japan Karate Association in the U.S. All testing is done by qualified J.K.A. examiners.

Anyone wishing to join the club, or with questions or comments is asked to call Li Tadeo at 882-4873.

**Financial aid to pay \$300,000?**

BY DAWN BOBBY

After three years of negotiations, the UI may still be required to pay back \$300,000 in a financial aid funding dispute with the U.S. Department of Education.

"It's an old issue," said Dan Davenport, director of student financial aid. The dispute began with a 1983 federal audit. That year, according to Davenport, what was believed to be a discrepancy was found in the formula determining the amount of federal funds allocated to the office for distribution to students.

"What it boiled down to was that we determined we needed X amount of money for distribution, and they told us we needed Y amount. Y amount was less than X amount."

"The funds were already paid to us, so they wanted us to pay them back, but we said no, we needed

X amount." The university then requested the federal government justify the "Y" amount.

The negotiations, then, are not about how much money the UI will or should pay back, but how the two institutions will work together to prove that the either the "X" or "Y" amount is correct.

"We continue to work with the U.S. Department of Education. We have not requested help from the congressional committee," said Davenport, referring to the recent Idahoan article in which U.S. Senator Steve Symms is said to have announced the dispute resolved.

According to the article, Symms helped in creating an internal task force to investigate the audit, and stated in an October 31 press release that the "money would remain at home."

Davenport stated that the dispute has not affected and will not affect the financial aid programs for students.

# One Place You Could Put The Money You'll Save With Our Free Student Checking.

Instead of spending your money on monthly checking account fees, spend it on pizza. Or, heaven forbid, books. First Security's student checking account gives you a free issue of 50 checks and lets you write ten free checks a month. Plus it gets you a First Security Cash Card of your own for free, unlimited HandiBank usage, and pays you interest if your balance goes over \$1,000. All this and no monthly fee. Because we were once students ourselves. Stop into a First Security office to open your account today.

Volunteers give youths a second chance

BY BRYAN CLARK

In the past two years, Wallace Stoolfir has learned more about rafting, golfing, engineering and living than he had thought he would in his whole life when he was a "discipline" problem in grade school.

Coming from a broken home and shuffled between his home in Troy and his foster home in Moscow, Wallace said he hasn't had the chance to get a "fair shake."

"Even after I started to be a better kid, when I would go back to Troy, they still thought I was the same as I was before. I wouldn't get treated like the other kids. I came back to live permanently in Moscow with my foster family starting this school year, so I could get a fair chance in school," he said.

Wallace's foster parents are Mr. and Mrs. John Carlson of Moscow. Carlson is a professor of Agricultural Economics at UI.

The junior high student attributes his changed attitude and demeanor to his foster parents, but said his main influence has come from his "big brother," Don Mosgrove, a graduate student in Chemical Engineering at UI.

"Wallace and I have been together for a little more than two years," Mosgrove said. "I don't do anything special to try and 'reform' Wallace, but we just do a lot of things together and spend a lot of time with each other. Basically, I'm his friend. In that way, I can show him a role model, and I think he's a better kid now. I don't know that it's all my doing, but I feel good about what I've been doing with Wallace."

The two "brothers" have experienced the range of Palouse ac-

tivities during their time together. In February, Mosgrove assisted Wallace to a first-place finish in the Troy Science Fair, something that Wallace sees as a high point in their relationship.

"It was great. We built a machine that showed how paper companies test pulp for paper," Wallace said. "We ended up having to put in a whole night the night before, though. Don said that it was a good introduction to college life."

Mosgrove has also taught Wallace about golf, white-water rafting and even learned a little himself about fishing.

"We've gone out to Spring Valley Reservoir in Troy a few times," Mosgrove said. "Wallace teaches me how to fish in the lake. So we have a give and take relationship, it's not only me teaching Wallace."

Friends, Unlimited; the organization that put Wallace and Mosgrove together, was formed in 1971 when a small group of volunteers were recruited to work with pre-delinquent boys.

Since that time, the organization has shifted its focus to that of being a support mechanism for youngsters. The volunteers are not counselors, they act as friends to the children.

According to Friends, Unlimited Director Denise Ruzicka, there are 15 volunteers participating in the program in the Latah County area. Volunteers range from UI students and faculty to members of the Moscow community. Volunteers are asked to give a year to the program, but sometimes give more, as in Mosgrove's case, Ruzicka said.

"We like the volunteers to stay with their little brother or sister for at least a year," Ruzicka said. "It

DON Mosgrove and his "little brother" Wallace Stoolfir have spent the last two years together, courtesy of the Friends Unlimited program. On Wednesday, Mosgrove left Moscow to join the Peace Corps. (ARGONAUT/Bryan Clark).

is very distressing to a youngster to finally be matched with a volunteer and then have the volunteer leave the program after a short time."

Mosgrove and Wallace had to part ways, though. Mosgrove, after two years with his little brother, received his master's degree on Wednesday and left for Kenya, to work with the Peace Corps.

"Sure, we will miss each other, but I'll write back to Wallace about what I'm doing and what's

going on, and he'll write me. When I come back to the states, I'm going to settle back on the east coast, and I would like to have Wallace come out and visit," Mosgrove, a Boston native, said.

Which is just fine with Wallace. "I've already learned a lot from Don here, so it will be great to go and see some new places with him, too," he said.

As for his plans without Mosgrove around to do things with,

Wallace is optimistic about his future.

"I've gotten better with dealing with people since I've known Don," he said. "I get along well with my foster family, too, so I don't think I'll be bored a lot. I'm going to study more. I was also going to play football this fall, but since I dislocated my elbow, I'll just be waiting for basketball."

# Entertainment In Brief

## Food for thought

UI students and their families can get in on a traditional Labor Day barbecue and picnic, before the rigors of school start to take their toll.

On Saturday, Sept. 5, the UI College of Education and Athletic Department, Pepsi Cola and KRPLZ-Fun will sponsor the Labor Day Back to School Centennial Celebration and Barbecue in the field north of the Kibbie-ASUI Activity Center. The sponsors promise an entertaining, fun-filled day for everyone to enjoy. The schedule for this family event is:

- 10 a.m. Free swimming at the UI Swim Center
- 11:30 a.m. Family games and contests begin
- 12:30 p.m. Porky's Pit Barbecue (\$3 plus tax)
- 1:00 p.m. Old Time Fiddlers
- 2:45 p.m. UI Marching Band
- 3:00 p.m. Vandal Booster Nonmarching Pep Band
- 3:00 p.m. FOOTBALL. UI vs. Mankato State in the Kibbie Dome. At halftime, the official UI centennial banner will be unveiled.

Visitors going to the game may park their recreational vehicles in the new RV parking area on the west end of the field north of the Dome. They need only a valid Vandal Booster parking permit. For more information, call Grant Smith (885-0200).

## 'Music Man' comes to town

Fullman Summer Palace's production of the musical "The Music Man" will be revived for three performances at Washington State University this semester.

Meredith Wilson's "valentine" to small town Iowans is set for a three-night run at the R.R. Jones Theater in WSU's Daggy Hall. Director Paul Wadleigh said this story of Professor Harold Hill, traveling salesman and con man, has remained one of America's favorite musicals. Songs in the production include favorites such as "Seventy-Six Trombones" and "Pick a Little, Talk a Little."

In the story, Hill comes to River City, Iowa, to sell band instruments, promising to teach them to play them and form a town band. In the process, he finds it necessary to court the town librarian and music teacher, Marian, with whom he eventually falls in love.

Emille Wadleigh, who choreographed all the Summer Palace productions, will be arranging the footwork for "Music Man" and Bill Johnson, WSU faculty member, will be handling directing duties.

Admission is \$5. Tickets can be reserved by calling the theater office starting Monday, Aug. 31, at 335-7236.

## Classicism returns to WSU

Paintings by 20 contemporary artists using classical values and storytelling traditions will comprise the fall semester's first exhibition at the Washington State University Museum of Art.

The classical artist portrayed an idealized world in which beauty, reason and harmony were the keynotes.

Museum hours are Tuesday through Friday, 10 a.m.-4 p.m.; Wednesday evenings, 7-10 p.m.; and Saturday and Sunday 1-5 p.m. All the exhibitions are free.

## 'Lost Boys' a winner

MOVIE REVIEW BY CHRISTINA LATTA

Imagine being moved from nice, normal Pheonix to a town that has a reputation for being the "Murder Capital of the World." What kind of bizarre, demented creatures would be found in that town?

### On the Screen

In the newly released movie, "The Lost Boys," the creatures were vampires.

Sam, (Corey Feldman), and his brother, Michael, (Jason Patrick), moved with their divorced mother from Pheonix to Santa Clara, California. Their first night in Santa Clara, the boys went to the local hot spot, The Boardwalk. At The Boardwalk, Michael became long he was sleeping all day,

friends with the wrong crowd of people. Before too wearing sunglasses in the house, and floating through the air. It then became Sam's job to try and kill the head vampire. But he had to do it before Michael could make his first kill and become one of the undead.

This Warner Brothers Picture was directed by Richard Donner and produced by Joel Schumacher. It featured music by INXS and Jimmy Barnes, Run DMC, Echo and the Bunnymen and Eddie and the Tides. The cast included actors Kiefer Sutherland (the son of Donald Sutherland), Jami Gertz, and Bernard Hughes. Its humor and chilling special effects would appeal to almost anyone. "The Lost Boys" is a movie worth the money.

## HI-TOPS FROM PAGE 7

the songs for this album out the way we wanted," Sofaly said.

Live performances have been the band's main avenue of visibility, their first album only having a pressing of 1000 copies. The group has been playing steadily in Boise, but doesn't get up to Moscow often.

Sofaly explained, "Around Boise, playing at the bars has been paying the bills for us and we enjoy being there, but we're looking to move into a bigger area with more opportunities soon. We'd really like to come up to Moscow more, but it's a long way to come, and it's not on the way anywhere really. The only way we were able to come up this time was being able to play at two shows, at the Deltas on Friday and at the and the all-campus dance on Saturday."

Evidently, the desire to bring live bands into the UI area is low,

except for the occasional fraternity party.

"We were on our way back from Canada last year and offered to come in and play Murdocs with no cost to them, but they didn't want to disrupt their schedule to bring us in. To come up to play fraternity parties would be too costly for only one night," Sofaly added.

Friday night, the Hi-Tops played their mix of ska and new wave for rush at the Delta Tau Delta house. Dry rush, though, and the enforcement that came with it stifled the party, Sofaly said.

"We had a pretty good time at the party, but you can definitely tell that guy's rush has changed," Browne said. "Without all the alcohol and partying that used to be associated with the UI this time of year, the tone was a little bit calmer than I expected. After a couple of hours out there, people started to get cold and things start-

ed to break up."

Additionally, the arrival of the Moscow Police late in the evening put the spotlight on the Hi-Tops and heated up the evening somewhat. Complaints of noise evidently had to put a damper on the band's amplification.

According to Delta Tau Delta rush chairman John Ney, the appearance of the group was made possible largely due to the second date of their Moscow engagement, the Saturday night all-campus dance.

The dance, held at the lawn separating the KIVA and UI Swim Center, went from 8 p.m. to midnight.

After their next vinyl effort hits local record stores, the Hi-Tops plan to tour the Northwest in its support. For the immediate future, though, the band will continue working, playing at Boise nightclubs and in September at the Southern Idaho Fair, and hoping.

## Tracksters take off

BY LAURIE DISTLEDORF

The mens' and womens' cross-country teams are already on the run at the UI as they gear up for the upcoming season.

Two runners off of the womens' team didn't return for another year with the Vandals. The team has the fresh running blood of three talented newcomers from out of state to fill their shoes though.

Kari Krebsbach from Mountain View High School in Vancouver, Wash. comes to the UI with a sixth-place finish in the 1986 Washington High School, AAA Cross Country Championship behind her.

Also from Vancouver is Diane Knudson of Klumbia River High School. Knudson snatched a ninth place position in the Washington High School AAA CCC the same year that Krebsbach placed sixth.

From Tillamook High School in Tillamook, Oregon is Ronda Groshong.

Groshong was the Cross Country AA Champion as a junior and snagged fourth place as a senior.

As a junior and senior, she was also the State AA champion in the 1500 meter run.

According to coach Scott Lorek, all three freshmen are in great shape and their success here with the UI depends on how well they adjust to running for a college team.

"Talent-wise, they can help us right away," Lorek said.

"I'm looking forward to the season because we have a lot of talent, but it will be interesting to see how it will all come together.

Though the womens' team has only nine members, the mens' team has been bolstered up to 12.

Adding to the strength of the mens' team are junior Vince Collins, who is a double transfer from WSU and Spokane Community College; Dave Davies, a freshman from Weiser; Salvador Hurtado, a freshman who redshirted here at the UI in 1987;

freshman Gary Logosz from Enterprise, Oregon, freshman Sean O'Connor of Spokane; Todd Weston, a junior from Boise; and freshman David Iverson from Virginia.

Though they have been practicing for four days and it is hard to judge how the team is doing, Keller said that the team looks better than they did last year, and they took seventh last year at the Big Sky Conference.

"They're an enthusiastic bunch—whether they are up to Big Sky level is another question though," Keller said.

"The odds of us being in the top four are slight, but we have a month of practice ahead of us and this is probably the best group we have had in a while on paper anyway with a lot of enthusiasm and a lack of injuries," he said.

"They're coming back to school with the attitude of being in shape and running well," he added.

## Director makes changes

BY LAURIE DISTLEDORF

Believe it or not, UI students can slam their instructors and get away with it.

Well, not literally, but if more UI staff members took part in the Campus Recreational programs offered by the university, more students would be able to get their "teacher frustrations" out of their systems by beating them on the field or court.

Many UI staff members are unaware that they are also eligible to take part in intramural sports, the new director of Campus Recreation, Bob Beals, said.

Beals is trying to encourage more faculty staff participation in the intramural program so students and instructors can get to know one another better in casual surroundings.

Right now faculty members participate mainly in badminton and racketball and that's it, according to Beals.

For sports like tennis, faculty members would compete with students and have their chance to get back at all those pupils who offended them by snoring through every lecture of every class.

Once a faculty member wins the championship in a sport they be-

come ineligible to participate the following year. According to Beals, this rule prevents coaches or sports instructors from dominating the program year after year because of their experience.

Faculty members can get partners through a new program called the Free Agents List that Beals started this year.

Individuals that want a partner to play against or who want to join a team sign up on the list and are matched with other people or teams looking for more players.

This is also great for those who are new to campus or live off campus and don't get the chance to meet a lot of people, Beals said.

One other thing he is trying to do is get more women involved as well.

Fewer women participate in intramurals than men and Beals wants to see those numbers come up. He also encourages women to go for officials positions.

Beals received his undergraduate degree at the University of Iowa and then moved to Seattle in 1978 to work a couple of jobs in recreation.

He came to the UI in May or 1987 after earning his masters in administration of recreation at the University of Iowa.

# Seven are out with injuries

Head Vandal Coach Keith Gilbertson is breaking into his second year at the UI.

During the previous season, he led the Vandals to an 8-3 regular-season record and into the NCAA Division I-AA playoffs for the third time in the past five years. His predecessor, Dennis Erickson, coached Idaho to the playoffs in 1982 and 1985, with Erickson as assistant coach both of those years.

Continuing the winning tradition that he does. But his track record speaks for itself.

"I have any success for your program for you to personally invest in this business, you have to win games. If you don't, you

won't be in this business for long."

Gilbertson may be tough in showing the team who is the boss, but he also has a camaraderie with his players and expects a lot in return.

"One of the things I tell myself and I tell my coaches is to not forget what it was like to be a player," Gilbertson said. "It's not against any coaching axioms to get to know your players and like them. But there have to be certain guidelines because they have to know who's running the program.

"There's a rapport between the coaches and players that has been a very positive thing at the University of Idaho. I don't know if we're

closer to our players than anybody else, I just know we like the people that are on our football team and I like to think they like the coaches. And with that relationship we get a lot done."

Now that there are seven Vandals out of practice, that camaraderie between him and his players is holding them together as the Mankato State game creeps up on them all too soon.

Five of the seven guys out of practice are starters.

Wide receiver Neosia Morris is still expected to stay off of the field for the most part until after their season opener.

The Vandals' other wide receiver, senior, Eric Jorgensen is

only seeing limited practice with a sore knee.

Runningback Todd Hoiness will be out longer than expected because of his injuries as well.

Cornerback Richard Carey, from Seattle is out from a sprained ankle after just recovering from off-season surgery to take care of his shoulder injury.

Right cornerback Virgil Paulsen is also out with foot injuries after being stepped on during practice.

And middle linebacker Mark Matthews is not participating because of a knee sprain.

The other two backups on the injured list are running back John Altenhofen, who has been having quadracep problems, and tight end

Chris Slater who sprained his ankle during practice.

So the Vandals will be a little short handed for tonight's scrimmage, which is the last one for the team before the season starts.

"We've been busted up a little bit during training camp and it's hurt us because we've had a lot of players miss valuable coaching time," Gilbertson said. "A lot of them are players we're counting on that have missed a lot of reps.

"We certainly need the practice time. We need to get healed up," he said.

"Right now we're not ready to play a game. Hopefully by the end of next week, we'll be ready to go," Gilbertson added.

## FROM PAGE 10

social affairs at the Motor Inn will kick off game weekends during the season with the exception of Sept. 11. The event starts at 5 p.m. and gives Vandals a chance to chat with coaches and other staff members for an hour and a

UI Alumni Association and Vandal Boosters are sponsoring Vandal deli and pre-game parties at the University Inn before each game this season. The functions take place two hours before each game and cost \$6.50 for those wishing to eat the deli meal.

Starting on Aug. 31, Vandal seasons will also take place at the University Inn. The seasons begin at noon every day, with the exception of Sept. 3, and end at 1 p.m. Idaho coaches and staff will meet with their teams and their progress. During September and February, the seasons will be hosted at the University Inn, Cavanaugh's in October and January and the Mark IV will host seasons in November and December. Cost is \$5 for those wishing to attend.

Don't forget that the Boise football game in Moscow was moved back from 1 p.m. to 4 p.m. this year to accommodate television schedules.

### MEN'S AND WOMEN'S INTRAMURAL SPORTS

Activity	Entries Close	Play Begins
Football	Sept. 1	Sept. 8
Tennis	Sept. 1	Sept. 20
Soccer	Sept. 14	Sept. 21
Raquetball	Sept. 15	Sept. 27
Co-Rec		
Softball	Sept. 9	Sept. 19-20
Raquetball	Sept. 29	Oct. 11

A team representative must personally sign-up their team at the Campus Recreation Office during office hours. Entries open at 8 a.m. and close at 5

p.m. on the indicated dates. Each team entered must be represented at the Captain's Meeting for that sport or the team will be ineligible for

playoffs in that sport.

Captains for football meet on Sept. 3, co-rec softball captains meet on Sept. 10, and soccer captains meet on Sept. 17 at 4:30 p.m. in UCC room 108.

If you enjoy being cursed, scowled at and spit on, the Campus Recreation office is offering clinics to teach officials how to deal with unruly sportsmen.

Those wishing to be football officials need to contact the Campus Recreation office before Sept. 2 to sign up for a two-day clinic.

### Memorial Gym Hours
