Election sees new, old results

Photo by Karin Yahr

Sunny weather did not seem to help voter turnout in Wednesday's ASUI elections. Seven new ASUI Senators and two student Faculty Council representatives were elected in addition to two referendums on the ballot which were decided.

Spring ASUI Election Results

Senate:

Zahrah Sheikh	705*
John Tesnohldek	662*
Megan Russell	657*
Kristen Bennett	603*
Jeff Chrisman	491*
Bill Gilbert	486*
Al Middleton	472*
Geoff Carey	469
Michael Horton	394
Donald Maraska	385

Faculty Council:

Melissa Chaffee	593*
Leslie Rush	532*
Eben Sutton	386

Absentee win surprises ASUI

Jill Pittmann
Staff Writer

Wednesday's election results were full of surprises for everyone involved — especially Bill Gilbert.

Gilbert is spending the semester in Washington, D.C., working for Senator Larry Craig. He is the first person ever to be elected while not attending the UI during the election process.

In an interview, Gilbert claimed to be totally surprised about the results. "I would like to thank the people who convinced me to run for election, those who ran my campaign and everyone who supported me."

Damon Darakjy, chairman of the ASUI Student Issues Board, was surprised at the voter turnout. 1,178 people voted in the election with Zahrah Sheikh, who was running for re-election, receiving the most votes at 705.

Other winners in the election were John Tesnohldek, Megan

Russell, Kristen Bennett, Jeff Chrisman, Bill Gilbert and Al Middleton.

Bennett expressed excitement because there are a lot of experienced people returning, but also some "fresh meat" which will hopefully work for the good of the ASUI.

ASUI Senator Mike Smith said although he was surprised at some of the election results, he sees this as being a good year for the Senate. "We have a diverse body, made up of people from all walks of the campus."

It is the hope of Smith and others that this will create new perspective and progress for the Senate.

Darakjy also said he felt that the overall process went smoothly. "There were people who really tried to run a clean campaign and I appreciate that because it makes my job a lot easier. I also appreciate all of the help I received from the workers and the senate in general."

Dorm door vandalized with "super glue"

Katé Lyons-Holestine
Editor-in-Chief

On April 10 the Moscow Police responded to a report of a possible weapons offense in Gault Hall.

"Basically we had a report of a person with a gun," Moscow Police Lieutenant Jake Kershnik said. "He was instructed to store the gun as required."

When Brad Selvig, Aaron

Johnson and Rob Treaux returned to their Deakin Street apartment March 20 after Spring Break they found \$1700 worth of stereos, televisions, VCRs and video games missing.

There were two incidents of vandalism on campus during the past week.

David Bayless reported that someone attempted to glue the door to his Chrisman Hall room shut. The culprit also spray

painted the door. The damage to the door was assessed at \$80. An unknown person damaged a vending machine in the Student Union Building. The damage was discovered at 11 a.m. April 11.

The Little Pawn Shop, located at 311 Veatch Street, just off the Troy Highway, was burglarized sometime between the hours of 7 p.m. Tuesday and 12:30 p.m. Wednesday.

Vernon Gregg, the owner,

discovered a window broken when he arrived to open the shop.

He notified the Moscow Police that three rifles and several diamond rings were had been taken.

Moscow Police detectives are investigating the case. Anyone who may have seen anything suspicious at this location during the times indicated is asked to contact the Moscow Police at (208) 882-5551.

News Briefs

Bacteria presentation today in Life Sciences

There will be a Biological Sciences presentation today from 12:30 to 1:20 p.m. on "Sexuality and Asexuality in Bacterial Evolution" in Life Sciences South Room 277. The presentation will be made by Conrad Istock, Ph.D., from the University of Arizona. The presentation is free and open to the public.

County Democrats to meet Tuesday night

The county caucus for the Latah County Democrats is scheduled for Tuesday at 8 p.m. at the 4-H Building at the Latah County Fairgrounds. Delegates will be selected to the state Democrat convention, which takes place in Idaho Falls June 23-26.

History course given at Clark Fork site

Northwest history is the subject of a one-day course being offered May 1 at the UI Clark Fork Field Center in Clark Fork, Idaho. "Selling the Great Northwest: Steamboats, Railroads and Tourism" will be taught by Carlos Schwantes, UI history professor and author.

The class will look at how transportation facilities shaped the Pacific Northwest and how they continue to play a role in the image of the area. The course will include discussions on how people came to the

area, the importance of mail service in breaking the isolation and the roles of the Columbia and Clark Fork Rivers.

There is a \$14 registration fee and advance registration is required. Enrollment is limited. For more information, contact the Clark Fork Field Campus at (208) 266-1452.

Copy centers to be open special weekend hours

The UI Media Center Annex Copy Center will be open the weekends of April 23 and 30 from 11 a.m. to 4 p.m. The SUB Copy Center will have regular weekend hours from 10 a.m. to 5 p.m.

Campus 2020 plans two more public workshops

There will be another session of UI Campus 2020 workshops next week. An informal open house and display Tuesday from 1:30 to 2:15 p.m. followed by a workshop from 2:15 to 4 p.m. in the SUB Vandal Lounge. A community event is also planned for Tuesday with an informal open house and display from 6:15 to 7 p.m. and a workshop from 7 to 9 p.m. at the Moscow Community Center Council Chambers.

Estrogen program given at Women's Center

The UI Women's Center will be holding "Estrogen Replacement Therapy: An Overview of Choices" Wednesday at 12:30 p.m. at the center. Dr. Homa Memon, a Moscow internist, has been researching the pros and cons

of hormone replacement therapies for a number of years. She will share her expertise and answer questions about this topic which is of vital concern to women's health today. The program is free and open to the public.

Moscow Public Library to gain from book sale

The Friends of the Moscow Public Library will hold a Giant Book Sale tomorrow from 8:30 to 11:30 a.m. in the Moscow Community Center. This semi-annual event offers books at bargain prices; fiction, non-fiction, children's books, science fiction, mystery and many other categories of books will be sold. Proceeds from this event will benefit the Moscow Public Library's Summer Reading Program for children. The Wal-Mart Company will match the proceeds from the book sale with a grant to benefit the Summer Reading Program.

Cow pile fundraiser to be Sunday afternoon

In a departure from more traditional means of selecting a raffle winner, a UI student project to raise money for Special Olympics will use a cow to make the decision.

At 2 p.m. Sunday, a crowd of tense spectators will wait in the UI Animal Pavilion as a cow saunters across a grid, selecting the perfect spot — and the winning ticket — to benefit from a deposit more commonly found in pastures. If a cow is unable to decide on a single square, all squares she designates will share in the prize of \$250

cash.

The "cow patty" raffle, as organizers delicately term the project, is expected to raise about \$2,000 for this year's Special Olympics through the sale of 2,500 \$1 tickets. Tickets are on sale now through resident advisors in UI dormitory buildings. Anyone in the Palouse can buy a ticket, right up to the time the cow begins her work.

For more information about the event or how to buy a ticket, contact Dawn Esau at 885-7867.

Convocation programs available for pick-up

Copies of the 1994 Honors Convocation program are available at the Honors Center in the Psychology Building Room 102. These are available to anyone who was unable to attend the convocation or would like additional copies.

Women's Center offers lunch program Tuesday

The UI Women's Center is sponsoring "Singing and Saying Praises for Our World" Tuesday at 12:30 p.m. at the center. This will be the last open reading of the school year. The Women's Center invites everyone to read, listen and sing with them for this springtime revival celebration. This program is free and open to the public.

Sex Health Fair to be in SUB Wednesday

The UI Human Sexuality Psychology class is sponsoring a Sex Health Fair Wednesday from 9 to 10:30 a.m. in the SUB Silver and Gold Room. This event is free and open to the public. Call Dr. Steffen at 885-6858 for more information.

Alpha Gamma Rho to accept sale donations

There will be a yard sale tomorrow for Alpha Gamma Rho from 8 a.m. to 1 p.m. at Maynard Fosberg's at 1707 E. "D" St.

Donations for this sale would be greatly appreciated. Items can be picked up by members or dropped off to Bob Mohler in Agricultural Science Building Room 112.

For more information call Bret at 882-4621.

Girl Scout Cookies on sale now for 1994

Girl Scout Cookies are on sale now. When a person buys a box of Girl Scout Cookies they help provide training for volunteers, prevention programs for girls and special assistance for those in need.

Introducing the fastest ways to get through college.

Power Macintosh™ 6100/60 8/160, Apple® Color Plus 14" Display, Apple Extended Keyboard II and mouse. Only \$1,991.00.

Power Macintosh™ 7100/66 8/250, Internal AppleCD™ 3004 Plus CD-ROM Drive, Macintosh® Color Display, Apple® Extended Keyboard II and mouse. Only \$3,315.00.

Speed. Power. And more speed. That's what the new Power Macintosh™ is all about. It's a Macintosh™ with PowerPC™ technology. Which makes it an incredibly fast personal computer. And the possibilities are endless. Because now you'll have the power you need for high-performance applications

like statistical analysis, multimedia, 3-D modeling and much more. So, what are you waiting for? Visit your Apple Campus Reseller for more information and see for yourself. Now that Power Macintosh is here, college may never be the same.

Election flaws shine through

Fall results questioned for accuracy, look to future for solutions

Jeff Kapostasy
Staff Writer

When people voted in the ASUI election on Wednesday, they all assumed the votes would be counted with complete accuracy.

Not necessarily.

There is a growing feeling of disgust in what members of the ASUI government call "a very flawed system of voting." And more so, there is a feeling these flaws are being used to the advantage of some candidates.

"I think everyone who's ever run in an election has a legitimate bitch," said Sen. Danielle Murray, who was Student Issues Board chairperson last semester and oversaw the Fall election. "Unless we computerize the election, there is room for screw-ups."

The weakness of the current system of voting shone through in last fall's election. After the votes were counted, 205 votes came through with no signature from the voter. Election rules state explicitly that student identifications must be provided and the student must sign their name.

This didn't always occur. Due to what Murray blames on uncooperative election booth workers and an internally flawed system, there is a chance a person could vote twice or more and not be detected.

In the Fall election, Murray said she was understaffed and said some poll workers simply didn't do their jobs as instructed.

"I told the workers what to do. Unfortunately, some just didn't do it," Murray said.

Students who voted but didn't sign their name had at least checked their name off the registrar's list of students. Over Thanksgiving Break, SUB Director David Mucci had workers call to confirm they had indeed voted to ensure the election results were sound.

However, there is still room for mistakes in any election. Since Amtul Sheikh lost the bid for ASUI President to John Marble by only 65 votes, the thought of mistakes in the voting doesn't make Sheikh too happy.

Not only that, Sheikh and Sen. Rob Blinzler allege mistakes were indeed made, and that John Marble used them to his advantage.

"Because of the possibility of mistakes, I think somebody should have taken a stand and called for a re-election," Sheikh said. "But I didn't want to do it because I didn't want to seem like a poor loser; I wanted to leave the Senate with my head up high."

Blinzler is equally critical of the system, and is openly disgusted with the whole Fall election.

"I think it was messed up, it was sloppily done, and I think the situation was taken advantage of," Blinzler said. "The fact that people were called to see if they honestly voted is B.S. and doesn't prove a thing. They could easily lie."

While Marble admits the ASUI elections have always been flawed, he denies that he took advantage of the situation.

"I've heard these allegations in the past," Marble said. "I certainly didn't have anything to do with it, and did not take advantage of anything. There's always a chance for mistakes to

happen, and there's always a lot of talk about how to improve them."

There have been two suggestions put forth, but so far, neither has taken off. One is to move to a completely computerized system of voting to ensure voting is perfectly accurate. Another was to have a group of retired persons from Moscow run the election, which might clear up problems of recruiting people to work. Murray, Blinzler and Sheikh would like to see the elections take this route. Marble would not.

"I oppose it for two reasons," Marble said. "First of all it's an ASUI election. Second of all, it gives a chance for students to work the election and earn some money."

Marble has asked Damon Darakjy, who is currently SIB chairperson and oversaw Wednesday's election, to look into the possibility of computerizing the election.

Darakjy said he worked very hard to make sure the election workers this year were well-briefed on the procedure.

This year, he said he had more election booth workers than he needed, which is a change. However, he did concede that he "couldn't be at all voting booths all the time."

"My goal is to have no complaints," Darakjy said.

For now, the election process remains the same and people continue to complain about it. But according to Murray, things used to be worse.

"Before 1973, we counted the votes by hand, so at least things are getting better."

Tenure granted by board

The Idaho Board of Regents has approved promotions in rank and granted tenure to eligible members of the UI faculty.

The promotions and tenure become effective July 1, except for faculty on academic year appointment, whose status changes are effective August 1.

Among those promoted in the College of Agriculture are: Charlotte V. Eberlein to professor of weed science; James B. Johnson to professor of entomology; Larry D. Makus to professor of agricultural economics; Joseph P. McCaffrey to professor of entomology; Jeffrey C. Stark to professor of agronomy; Jerry L. Zaugg to professor of veterinary medicine; Philip H. Berger to associate professor of plant pathology; Gregory A. Bohach to associate professor of bacteriology; Stephen C. Cooke to associate professor of agricultural economics; Janice W. Fletcher to associate professor of family and consumer sciences; Kathleen M. Kearney to associate professor of family and consumer sciences; Laurie Stenberg Nichols to associate professor of family and consumer sciences; and Edward J. Souza to associate professor of plant breeding and genetics.

Promoted in the Cooperative Extension Service are: Wilbur F. Cook to extension professor; S. Krishna Mohan to extension professor; Marilyn C. Shin to extension professor; Robert V. Vodraska to extension professor; Danny L. Barney to associate extension professor; Mary K. Schmidt to associate extension professor; and Sharlene Woffinden to associate extension professor.

Promotions in the College of Engineering include: Donald M. Blacketter to associate professor of mechanical engineering and John I. Finnie to associate professor of civil engineering.

Promoted in the College of Forestry, Wildlife and Range Sciences are: Alton C. Campbell to professor of forest products;

Brian C. Dennis to professor of wildlife resources and statistics; and Edwin E. Krumpke to professor of resource recreation and tourism.

Promotions in the College of Law include: Elizabeth Barker Brandt to professor of law and John A. Miller to professor of law.

Promoted in the College of Letters and Science are: Nicholas R. Natale to professor of chemistry; James E. Reid to professor of music; William D. Royalty to professor of mathematics; Katherine G. Aiken to associate professor of history; Janice Capel Anderson to associate professor of philosophy; Stephan P. Flores to associate professor of English; Sandra L. Haarsager to associate professor of communication; Paul Joyce to associate professor of mathematics; and Mark F. Yama to associate professor of psychology.

Promotions in the College of Mines and Earth Resources include: Gundars Rudzitis to professor of geography, Sarit B. Bhaduri to associate professor of metallurgy; and Dennis J. Geist to associate professor of geology.

Promoted in the University Library were: Richard C. Davis to manuscripts-archives librarian with rank of associate professor and Barbara C. Greever to principal catalog librarian with rank of associate professor.

Tenure was granted to: Katherine G. Aiken, Janice Capel Anderson, Danny L. Barney, Philip H. Berger, Sarit Bhaduri, Donald Blacketter, Gregory A. Bohach, Stephen C. Cooke, Richard C. Davis, Charlotte V. Eberlein, John I. Finnie, Janice W. Fletcher, Stephan P. Flores, Dennis J. Geist, Barbara C. Greever, Sandra L. Haarsager, Allan Jokisaari, Kathleen M. Kearney, Jack K. Nelson, Laurie Stenberg Nichols, Stephen W. Pharr, Edward J. Souza, John R. Sturgul, Sharlene Woffinden and Mark F. Yama.

Joyce's cyberspace lecture shows hypertext ins, outs

Abby Bandurraga
Staff Writer

"The book is dead," said Michael Joyce. Who better than the author of one of the most widely known hypertexts, *Afternoon*, to verbally attack the genre he is destroying.

Joyce presented a lecture on hypertexts, hypertextuality and the implications of their increasing popularity in the literary world, this Monday at the Administration Auditorium.

Hypertexts are electronic texts, often combined with audio and visual stimuli, that branch off in several directions depending on the interaction of the reader.

Discussing a topic that is incredibly intangible to those who have never experienced it was an obstacle Joyce leapt over in a single, mind-blowing bound. Utilizing a poem by Czeslaw Miosz, called "A Book in the Ruins," which was modeled after hypertexts, he verbally mapped the theories behind electronic texts. He explained "the electronic text is a strange clock that keeps track of space and not time."

Joyce proceeded to discuss the future of literature, claiming that "we live in a time when the book is in the ruins," and electronic texts are the next logical step. He said that even though people are attached to the physical essence of current books, there will be a time in the future when one can curl up in bed with a computer text that is the size of a book; still enjoying the physicality, with the bonus of a vast amount of interactive options within the text.

Because computers, theories of mathematics and physics are a large part of hypertexts, Joyce stressed the importance of individuals from these fields keeping open minds and sharing ideology with one another.

er. He said people from English studies need to become less frightened of ideas they have held onto throughout their schooling.

Creative writing is one of the few fields in which its members cling to the idea of sole authorship. Joyce attributes this to the idea among writers that collaboration equals the loss of personal voice, creating "group-peak."

To Joyce, these notions are obsolete. He cited the methods of scientific and corporate writers to back up his claim and spoke of his collaborative project called "Storyspace," which is the computer program that allows authors to write hyper-fiction.

Joyce compared reading and writing hypertexts to visual art. Explaining the limitless amount of exploration that can be done in computer texts he said, "With the electronic text we're always painting," whether it be the author who is holding the brush or the reader who is collaborating via her own keyboard.

The presentation went well over its scheduled time, due to the incredibly perceptive questions from the audience. Joyce answered everyone's questions in an in-depth, straightforward manner, that almost always produced more questions. Joyce readily admitted the virginity of this field made it difficult to provide concrete answers.

Perhaps the most important phrase Joyce uttered Monday night was the reality check given to those who fear technology: "The future won't stay still, but, instead, keeps replacing itself."

Joyce's lecture was the fifth installment of "Cyberspace: The New Frontier." The series will conclude tonight in the Administration Auditorium from 7-9:00 pm, with John Casti, of the Santa Fe Institute, speaking on Artificial Intelligences.

Staff rewarded for work

Seventeen UI staff members have earned Outstanding Employee Awards and were honored at the annual Staff Awards Reception last Tuesday.

The event was held in the Student Union Building Ballroom and also included recognition for honored staff and other retirees, staff members with at least 15 years of service and the presentation of two Staff Educational Awards.

The Staff Educational Awards are made to the children, grandchildren, step-children or legal dependents of full-time board appointed staff members or honored retirees. Funding is made possible through staff donations placed in a perpetual endowment fund.

Winners this year are Graham Curtis Driskell, son of George G. Driskell of Moscow and Jeanette Ross-Van Alton of Boise, and Shelly R. Mulberry, daughter of Pauline and Ken Wilde.

George Driskell is foreman of the UI Recycling and Solid Waste Program.

Pauline Wilde is a secretary/office coordinator in the UI Gift Receiving Office.

The annual Outstanding Employee Awards were established in 1972 and are designed to honor non-faculty staff who are believed by their co-workers and/or supervisors to be outstanding.

The goal of the awards is to encourage more support and recognition of staff for their dedication and hard work for the university. OEA recipients receive an engraved plaque and \$500.

This year's winner, and the job category in which they won, are:

- Classified Exempt— Rodney Dunn, Student Financial Aid.
- Non-Faculty Exempt— Diane Cockrell, Animal and Veterinary Science; Linda Keeney, College of Agriculture, Administrative Services; Frank Merickel, Plant, Soil and Entomological Sciences; Beverly Rhoades, Office of Budget and Planning; and Gleanne Wray, International Programs Office.
- Off-Campus— Dawn Downs, Animal and Veterinary Sciences, Caldwell; and Kenneth Kinucan, College of Forestry, Wildlife and Range Sciences, Clark Fork Field campus.
- Secretarial/Clerical— Diane Holick, Cooperative Education; Michele Nygaard, Plant, Soil and Entomological Sciences; Sherry Sweeney, College of Forestry, Wildlife and Range Sciences; and Erin Thomas, President's Office.
- Service/Maintenance— Jim Price, Facilities Management; and Dorothy Wischmeier, University Residences.
- Skilled Craft— Bruce Pancheri, Facilities Management.
- Technical Paraprofessional— Caroline Fish, College of

Agriculture Communications Center; and Wanda Womack, College of Agricultural Communications Center.

Honored staff retirees are members of the classified or exempt staff who are not faculty members and who, upon retirement, qualify for UI retirement benefits if one of the following requirements is met: completion of 30 years of service to UI; completion of 15 years of service to UI and attainment of age 64; attainment of age 55 and completion of a number of years of service to UI such that the sum of the years of age and the years of UI service is 80.

Honored staff retirees this year are: Virginia Anderson, Food Dining Services, 1971-93; Edith Dion, Library, 1970-94; Kerma Griffiths, District IV Cooperative Extension, 1973-93; Jack Hamilton, University Construction, 1966-93; Betty M. Kaufman, Health, Physical Education, Recreation and Dance, 1968-93; Dottie L. LeFors, Plant, Soil and Entomological Sciences, 1975-93; Dale McGraw, Facilities Management, 1965-94; Jose A. Pearson, University Construction, 1958-93; Joyce Pedersen, Campus Recreation, 1969-94; Martin G. Rathbun, Facilities Management, 1961-93; Dolores A. Sanchez, College of Business and Economics, 1970-93; and Donald L. Surfus, Family Housing, 1967-93.

Retired staff honored were: Max Nelson, Bookstore, 1984-1993; and Keith V. Stewart, U.S. Sheep Station, 1982-1993.

Longevity awards were presented to: George L. McCurry, Facilities Management, 35 years; Joyce E. Presby, Human Resources Services, 35 years; Paul H. Brown, Facilities Management, 30 years; and Anna M. Davis, Caldwell R&E Center, 30 years.

Honored for 25 years were: Russell Biggam, Mary Boxleitner, Edith Dion, Richard DeVoe, Everett F. Flint, Connie L. King, Corrine McKean, Daphne A. Odenborg, Judith A. Reisenauer, Rudy R. Ringe, Matt E. Telin, Homer D. Wells and Wandalene Womack.

Honored for 20 years were: Richard Bottger, Mary Jane Bauer, Joan Cleveland, Lila E. Faulks, Beverly Hawk, Barbara Rice Jordan, Donna L. Lefors, Boyce Mitchell, Feliks Pazdan, Sharon A. Pettichord, Bruce M. Pitman, Brigitte U. Purnell, Kathleen Sorenson Rathbun, James L. Rennie, Beverly Rhoades, Valerie M. Roberts, John L. Scott, Victoria A. Seever, George D. Stockton, Jerry B. Swenson, Patricia D. Tassinari and Patricia R. Wells.

Honored for 15 years were: Wilen M. Anderson, Tami Arnot, Alice Pope Barbut, Jim W. Browing, Karen L. Dempster, Richard Dorendorf, Anna Jean Flomer, Melora Foy, Gary S. Fuller, Judith Heideman, Michael G. Holthaus, Harvey L. Hught, Lola Y. Jensen, Gloria J. Luther, Lois L. Pritchett, Geneva E. Pym, Randolph Settlage, Delores L. Spaulding, Ron P. Town, Carla A. Wesson, Linda L. Williams; Juanita Winn, Judy I. Woods and Robert L. Yankey.

Five chosen for Hall of Fame

Five men join the ranks of UI Hall of Fame honorees during this year's spring commencement activities.

Ezra Taft Benson, former U.S. Secretary of Agriculture; Steve Symms, former U.S. Senator; J.R. "Bob" Stilling, owner and CEO of Stilling Consulting, Corvallis, Ore.; Gary Vest, principal assistant deputy under secretary of defense for environmental security; and Lewis D. Walker, deputy assistant secretary of the Army for Environment, Safety and Occupational Health Office and assistant secretary of the Army for Installations, Logistics and Environment; are all receiving the award recognizing their contributions to the state and the nation.

Benson was hired as Franklin County Agricultural Agent in 1929 and in 1930, moved to the UI campus as extension economist and marketing specialist with the College of Agriculture. While in Moscow, he enrolled in graduate agriculture courses.

In 1952, he was appointed Secretary of Agriculture in the cabinet of President Dwight D. Eisenhower. He served during Eisenhower's entire eight years as president.

After World War II and during the Eisenhower administration, Benson gained international attention as coordinator of supply distribution in war-torn Europe.

He has been recognized with honorary doctoral degrees from the University of Utah, Iowa State College, Michigan

State College, Brigham Young University, University of Maine, University of Hawaii, Los Angeles College of Osteopathic Physicians and Surgeons, Rutgers University, Utah State University and Fairleigh Dickinson University.

He serves as spiritual leader of the nearly 6 million members of the Church of Jesus Christ of Latter-Day Saints.

Symms, an Idaho native, served in the U.S. House of Representatives from 1972 until 1980, when he was elected to the U.S. Senate. Before retiring in January 1993, he served on the Finance and Armed Services Committees and was also a member of the Environment and Public Works Committee, the Joint Economic Committee and the Budget Committee.

A graduate of Caldwell High School, he earned a B.S. degree from UI in 1960. After three years service in the U.S. Marine Corps, he returned to Symms Fruit Ranch, Inc. in Caldwell, his family business.

During his public service, he was honored with the U.S. Marine Corps "Iron Mike" Award and the National Guard's "Minuteman of the Year" Award. He also received awards from such groups as the National Federation of Independent Business, the Freedoms Foundation, the American Security Council, the Watchdog of the Treasury, Americans for Constitutional Action and the U.S. Chamber

of Commerce.

He is a member of the American Legion, Ducks Unlimited and is a lifetime member of the National Rifle Association.

After retiring from the U.S. Senate, he formed the consulting firm, Symms, Lehn & Associates, Inc., headquartered in Alexandria, Va., and Boise.

Recently elected president of Freedom Alliance, Symms also serves on corporate boards for Albertson's, Boise Air Service and Symms Fruit Ranch. He is also a member of board of directors for the American Conservative Union, the Foundation for Economic Education, Ashland University's School of Public Service and Albertson College.

Stillinger, who earned a B.S. degree in forestry in 1944, is owner and chief executive officer for Stillinger Consulting, providing expertise for in-plant problems in the forest products industry and starting new plants in the United States and many foreign countries.

He began his forest products career in 1948 with Oregon Forest Products Research Center and worked there until 1955 when he joined Cascade Plywood Corporation. In 1962, he joined U.S. Plywood and traveled to plants in the particle board industry using his expertise to correct problems.

In 1965, he became executive vice president and general manager for Wynnewood Products in Dallas, Texas. In 1968, he was appointed president.

After early retirement in 1975, he became a representative for Bison-Werke, a German equipment company specializing in the design and manufacture of "Turnkey" particle board in Scotland named Stillinger managing director. He returned to the U.S. in 1985.

Stillinger has been honored with the College of Forestry Centennial Alumnus Award and Washington State University's Distinguished Service Award. He earned a B.S. degree in forestry from the UI in 1944.

Vest is the highest ranking career civilian in the Department of Defense for policy, oversight, advocacy and representation of all worldwide installations, construction, facility maintenance and repair, environmental, safety and occupational health matters.

He held a similar position as deputy assistant secretary of the Air Force for environment, safety and occupational health and was recognized as mainly responsible for the Air Force becoming the leader in federal environmental, safety and occupational health matters.

He also served as co-chairman of a national consortium to find a halon substitute that would mitigate ozone depletion; started the world wide radon assessment and reduction program; conceived and oversaw the joint Environmental Protection Agency and Air Force environmental

education program; and managed controversies in a variety of environment-related concerns.

Vest holds a B.A. degree in political science from UI. He is a member of the American Planning Association, American Institute of Certified Planners, Senior Executive Association, American Defense Preparedness Association, Society of American Military Engineers, Air Force Association, Air Force Historical Foundation and Defense Fire Protection Association.

His honors include Presidential and Meritorious Executive Rank Awards from the White House; the Air Force Exceptional Civilian Service and Meritorious Civilian Service Awards — the highest career civil service executive service members can receive — and listing in "Who's Who in Engineering and Technology Today," "Who's Who Environmental Registry" and "International Who's Who in Engineering."

Vest also has many publications on disaster preparedness, planning and other related subjects.

Walker, who holds the highest Army position a career civil servant executive can rise to, has been a leader in management of world wide Department of the Army programs in reducing environmental violations and achieving record low accident losses.

He earned a B.S. degree in 1960 and an M.S. in 1963, both in agricultural economics, from UI.

His responsibilities include oversight of a \$1.3 billion environmental program including base clean-up remediation and U.S. Army compliance with applicable environmental legislation, such as the Clean Air Act, Clean Water Act and the Endangered Species Act. Among special projects he has directed are the Chesapeake Bay Clean-up Initiative, resulting in full compliance for 22 Army installation in the region and Rocky Mountain Arsenal where he is managing the largest environmental clean-up in U.S. history and has succeeded in having it designated at National Urban Wildlife Refuge.

He is chairman of German-American data exchange meetings and represents the Army on the NATO Committee on Challenges for Modern Society. He is a member of the American Defense Preparedness Association, Association of the United States Army, U.S. International Committee on Irrigation and Drainage and the American Agricultural Economics Association.

Among his honors are Decoration for Exceptional Civilian Service — 1989 and 1993; Special Recognition Award from the World Safety Organization; Exceptional Army Award; and Presidential Rank Award — 1986 and 1993 — the highest award a career civilian executive can receive.

McFarland to make presentation in Idaho cities

Abby Bandurraga
Staff Writer

UI English professor and academic advisor Ron McFarland is doing what he can to bring an understanding of contemporary poetry to predominately non-academic circles in Idaho.

McFarland, a participant in the program *Poets in Person*, has been traveling to Sandpoint for the past month in order to provide some insight and encourage discussion on several modern poets.

Poets in Person was developed out of the increasing desire of small, grassroots communities to have a better understanding of contemporary literature. Under the guidance of Joseph Parisi, editor of *Poetry Magazine*, McFarland and other persons with strong literary backgrounds, met in San Diego, Calif., last November to train for the presentations they would later give to selected communities. Major funding for this project comes from *Poetry Magazine* and the National Endowment for the Humanities.

According to Professor McFarland, several communities throughout the US. underwent an application process to receive the services of *Poets in Person*. Of those who applied, two towns in Idaho were accepted — Sandpoint and

Pocatello.

There are over 20 enrolled members in the Sandpoint community whom McFarland visits every other week.

Prior to each of his visits the members meet at a Methodist church and read from an anthology of poetry by the authors they will be discussing.

Thus far, they have dealt with selected poetry of the Beat legend, Allen Ginsberg, and New England writer, Maxinne Kumin. Upcoming authors will be Adrienne Rich, Rita Dove and Gary Soto.

The anthologies come with audio tapes of the authors reading and commenting on their works, their lives and influences.

McFarland then travels to Sandpoint to discuss these readings with the members and often brings works that are supplemental to what the author discussed on the tapes. He has found that bringing in works that are not in the anthology or writings of other authors that are cited in the audio tapes has helped greatly in motivating discussion on authors that are difficult to grasp.

McFarland will be making three more trips to Sandpoint in the following months. He says he has found this experience to be enjoyable and personable.

Financial aid sessions held

Student Loan Repayment Workshops will be presented for all students, especially those who will be graduating. This presentation is designed to help take the mysteries out of loan repayment, clarify the process and remove some loan repayment stress. Plan to attend one of the scheduled sessions.

Students will need to provide the names and addresses of their expected employer if they have one as well as their next of kin. Each session will last about an hour. All workshops will begin at 2:30 p.m. in the SUB Borah Theatre on the following dates:

- Tuesday, April 26
- Wednesday, April 27
- Tuesday, May 3
- Wednesday, May 4
- Wednesday, May 11
- Thursday, May 12

IMPORTANT NOTICE: Federal regulations require all Stafford Guaranteed Student Loan or Supplemental Loan for Students borrowers to attend an exit interview. Any one of the above scheduled sessions will meet this federal requirement. If you are unable to attend, please contact Student Financial Aid Services at 885-6312 to make other arrangements.

Graduation is almost here!
Congratulations 1994 Grads!

Quit complaining and get a real job

Every week the *Argonaut* receives handfuls of letters pointing out our short comings, typographical errors, poor headlines and criticism of opinion columns. We read these, take them to heart and try to make the improvements our readers would like to see.

Sometimes improvement takes time and it always takes input.

We at the *Argonaut* are looking for more input. Not in the form of letters to the editor — although they are always welcome — we are looking for a few good men and women to staff the *Argonaut's* paste-ups and track down stories.

I sit in classes while the *Argonaut* is called a "lying rag." I hear others say the experience at the *Argonaut* isn't really valuable. Other students complain about the time they have to devote to studying.

Any professional journalist will tell a student that any experience listed on a résumé is more valuable than a listing of classes such as Comm. 445 or Comm. 121 or Comm. 325. If field experience is equal to or more important than classroom learning students need to take advantage of the opportunities on campus.

Any student, in any major is welcome to visit the *Argonaut* in the following weeks to pick up an application form and return it. It isn't hard, the office is located on the third floor of the Student Union Building and most of us are friendly. We will welcome you in, show you around and maybe hook you into working here.

You not only learn how to get along with liberal columnists, you learn the basics of newspaper production. Most employees of the *Argonaut* begin as writers and progress to an editing position. Others are photographers, copy editors, advertising representatives, advertising production members and layout and design editors. You are not only able to gain the basics at the *Argonaut*, we have upgraded equipment and offer state of the art technology for training. The *Argonaut* is using the latest software that most commercial newspapers are moving to.

Remember the *Argonaut* isn't only published during the traditional school year, we are beginning a summer publication June 1. Applications are welcome for the summer also.

There is no experience necessary, no prior connections are needed and anyone can apply.

So, what's stopping you?

Stop by the *Argonaut* office or call 885-7825 if you have questions. Ask for Chris, Katé, LaNae, Jennifer, Tim, Halo, Matt or Anne. We can answer all your questions.

—Katé Lyons-Holestine

'Establishment' controls info

Narcissistic bourgeois pimps of the establishment are prostituting information.

People cruise down the streets of the media and pick up anything that looks nice. We don't care about what the contents are as long as it reinforces our precious ideologies. There are many people who find that truth and accuracy do not fit their agenda of molding perspective. There are others who have found that people want to be entertained and therefore they dole out their hard earned cash to hear anything that will pull them from their "lives of quiet desperation."

As soon as someone mentions fighting against the establishment people automatically think that it's some liberal hippie attacking the American conservatives. This is not necessarily so. The establishment is an existing power structure in society. This power structure can be left or right wing. The tie that binds these structures together is the will to maintain their power by getting us to believe in what they believe.

The media has been the most guilty of slanting presentation of information. Consider the fact NBC is owned by General Electric. General Electric makes

Commentary Mike Cole

the timing devices for nuclear weapons. Take a second to consider what side of the fence NBC is on in relation to nuclear arms. What agenda is NBC going to have when presenting information on nuclear weapons?

NBC has economic ties to its news coverage but people like James Carville have a political motivation molding their presentations. Carville, Clinton's political advisor, is never going to release damaging information about the President or Mrs. Clinton. When Carville was a guest on *Nightline*, he couldn't even respond to simple questions without digressing into the mundane. Carville would like the media to stop covering Whitewater so Clinton can address the important issues fac-

ing our nation. Are we honestly supposed to believe that Carville is being truly altruistic, or is he doing everything he can to keep his boss off his back?

Rush Limbaugh would have America believe that the Clintons are out to destroy the world. Limbaugh represents the American right wing and therefore is not about to present any information contrary to the conservative cause. Limbaugh wants to be right, right, right and that's exactly what his listeners are tuning in for. Too easily do people follow him as he brings up a fact and then takes two steps to the right to present it. Limbaugh fans are entertained with 17.5 hours of symbolism instead of substance. Limbaugh has his place as long as

Industrial hemp will save environment, make ice-cream

The first thing that comes to mind when someone mentions "hemp" is a skinny, long-haired man wearing colorful clothes who is puckering his lips to a homegrown joint the Marlboro Man wouldn't touch without a ten-foot filter.

Hemp, marijuana, pot, weed, *Cannabis sativa*, tetra hydrocannabinol — are all words that create the connotation that equates nicely with an illegal, mildly hallucinogenic drug that dead-beat users worship. Well, hemp is more than a drug.

As an industrial product, hemp can be used to make fiberboard, clothing, canvas, food oil, lubricating oil, rope, thread, art canvas, biomass-produced fuel, paint, varnish, ice-cream, and most importantly, paper. The problem in using hemp is the difficulty getting past images of high smokers, but the "Plant a Seed and Grow a Revolution" First Annual Moscow Hemp Festival in East City Park

Coming Up For Air Chris Miller

April 23 will try to get past the negative hype.

"Our main focus is to de-stigmatize the word hemp ... the smokeable part. When we're talking hemp, we mean the fibers of the plant, usually a male plant, with strains that have almost zero THC in them," said Shayne Kimball, a UI business student who is coordinating the Moscow Hemp Festival.

Booths at the festival will sell hemp products, such as backpacks, shirts, hats, even lip-balm. Between songs of over a half-

dozen bands, speakers will take the microphone and tell the audience about the hundreds of uses for hemp — none of which will include any tips on better ways to smoke marijuana; that's not what the festival is all about.

"Hemp can grow anywhere in the world, in any climate. It thrives in the sun and has stronger fibers than in any other plant ... it's very versatile," Kimball said.

In fact, other countries already use hemp as a substitute for wood

Letters to the Editor

Must guarantee coverage for all

In weighing the costs and benefits of the Clinton Health Care Plan, a major concern is whether or not patients would be able to receive the care they need under the proposed changes.

What most people don't know is that the Clinton Plan would cut costs mainly by denying treatment to those patients who need it the most.

An important aspect of the plan is to place a cap on insurance premiums.

Such a cap would force the insurance companies to deny or limit health care, in order to cover their costs, to those considered too "expensive" to treat.

The Clinton Plan would allow for the cutting off of financial support of those patients whose "quality of life" (however that's determined) is considered poor.

The plan would even make it illegal for one to avoid rationing, by not allowing him or her to buy supplemental insurance for services already partially covered or mentioned in the basic plan.

The real question that needs to be asked is: Do we really want a health care system similar to those of the socialized countries, where treatment of the aged and vulnerable is often considered inappropriate?

Who will be the victims of the rationing imposed by the Clinton Plan? AIDS patients? Premature

babies? Down Syndrome children? It seems almost Hitlerish to put a price on human life.

Everyone needs to contact their senators and congressmen immediately and tell them the plan must be changed to guarantee treatment for all people, no matter what the cost.

—Chad Creighton

Thank God for Greek System

Here we are approaching the end of the school year, a very long and trying one for everyone in the Greek System.

After lawsuits, plea bargains, accusations, unanswered questions, open diaries, bankruptcy threats and alcohol regulation, we now have a whole summer to look forward to before we have to go through the whole thing again.

In particular the fraternity houses on campus took many hits this year, some made by more sophisticated thinkers than others.

Some have said the Greek System serves no purpose, is full of drunken idiots and should be abolished. In response to this, many houses have tightened their alcohol procedures or even eliminated alcohol altogether.

In spite of these legitimate demonstrations of responsibility, some voices still don't think that is enough.

But after all is said and done, the real important questions still have

yet to be asked, some important truths still have yet to be revealed.

The real question of Fraternity System purpose and responsibility is "If," and "If" is the only question that deserves an answer.

If a freshman who would otherwise be hiding in his dorm room is given a chance at the character building opportunity of leadership ... (Congratulations on being elected freshman class president, Bill. Be sure to get the guys into a meeting every week to discuss your class project.)

If a young man fresh out of high school on his first day on a college campus away from family and friends and is experiencing the scariest day of his life is suddenly welcomed into a group of other young men with similar interests who help him register and move in and otherwise immediately make him their friend and feel comfortable...

If a young man who would otherwise be a social recluse and never come out of his dorm room is given responsibilities to build his maturity and give him something to be proud of...(OK, Bob, I'll mow the lawn while you vacuum the first floor.)

If a young man who is new to the university way of doing classes and starts to feel overwhelmed is given enough support and help to start his semester with both feet on the ground..."(You got Gerard for Physics 100? You poor man! I'll give you all the notes and tests I took in his class, that should help you out.)"

If a shy, soft-spoken young man who would have otherwise have hid in his room is given a chance to express himself and open up to the world by involvement in freshman class activities, community projects and house projects...(Hey, Phil! Great idea for our songfest song!)"

If a young man who is somewhat morally deficient and uncaring is finally given responsibilities and held accountable for his own actions..."(You skipped hashing last night, Barry. You'll make up for it this weekend.)"

If there is indeed a place that instantly accepts newcomers as brothers, gives those in need a helping boost, gets a quiet young man to speak for himself and teaches its members the value of responsibility and in short a place where one enters a boy and leaves a man, don't condemn it.

Thank God for it.

—Barry Finnigan

I changed fonts to get it all on one page and submitted it on March 24.

My letter was not printed. On April 12, I went to the Argonaut office to ask why my letter was not printed. Chris, the Associate Editor, told me he remembered he did type my letter and that it might have been deleted in production.

I submitted my letter again and gave him my phone number in case he needed to reach me. I also reminded him to call me if the Argonaut decided not to run my letter. Last Friday, April 15, I picked up a copy of the Argonaut, expecting to see my letter printed. I was disappointed again — my letter was not printed.

I called Chris for an explanation. He said they decided not to run my letter since Lyons-Holestine's column was printed a long time ago. Most readers might have forgotten what it was about.

He also mentioned there was not enough room since they got lots of letters (I was not surprised) and the election is coming.

I was angry with the Argonaut because it was their mistake and they did not print my letter. They did not bother to call me though I asked Chris to do so.

As Ms. Tanya Madison's letter mentioned, "I am saddened to see the level the newspaper has plummeted to this semester." I hop the Argonaut staff of next semester can do a better job.

—Chi M. Choi

Editor's note: The Argonaut regrets not being able to run all letters to the editor. Currently, space allows us to print over 95 percent of letters that are received. The few that do not run are illegible or rejected due to space and timeliness considerations.

Argonaut did not print letter

If any students go through what I had gone through with the Argonaut, I strongly believe that he or she would lose faith in the Argonaut.

On Feb. 25, I submitted a letter to the Argonaut in response to the column written on Feb. 14 by Kate Lyons-Holestine.

I waited for a week to have my letter printed. But my letter was not printed. I submitted my letter again. I got the same result — my letter was not printed. Then, I figured that it might be my fault because my letter was two pages, typed and double spaced and the policy is one page, double spaced.

Letters to the Editor

Students most important in biz

Students are the most important people in our business.

Students are not dependent on us, we are dependent on them.

Students are not an interruption of our work, they are the purpose of it.

Students do us a favor when they come in, we aren't doing them a favor by waiting on them.

Students are an essential part of what we do, they are not outsiders. Students are not just money or enrollment figures, they are human beings with feelings and they deserve to be treated with respect.

Students are people who come to us with needs, wants and hurts; it's our job to help them.

Students deserve the most courteous attention that we can give them. They are the life blood of our institutions. They pay our salaries. Without them there would be no university.

—Anonymous

Editor's note: This once in lifetime exception to the "no anonymous letters" policy was submitted by a non-student staff member of this university. We, as students, are particularly interested in such attitudes and, of course, applaud it.

Forest health not published

Jeff Kapostasy's April 19 column, "Wilderness leaves America," probably reflects common impressions of western forestry. It saddens me to see so much genuine humane concern based on mythology.

There is little hope for practical forest solutions in the hyped fog of environmental metaphor that has captured the American press. Here are a few data points of real-

ity to supplement your published concerns.

Item 1: America has more, not less, forests. U.S. forest area increased from 615 million acres in 1930 to 728 million acres by 1987.

Western commercial timberland areas indeed declined 17 million acres from 1962 to 1987, but that was due to withdrawals of public forest land for environmental reserves.

Corollary 1: Most of America's timberlands (72 percent) are private.

Forest areas grew because their owners grew trees out of greed. Happily, this land use shift generates more environmental amenities than other alternatives.

Item 2: America already has more wilderness and other reserved lands.

Capital W wilderness increased from 1.4 million acres in 1944 to 35 million acres in 1992. That doesn't count other forms of forest reserves, 80 million acres reserved in the National Park system or 20 million acres of national wildlife refuges, or any state owned reservations.

Corollary 2: Wilderness use is actually declining in many capital W areas.

Outdoor recreation is indeed up, but mostly in urban accessible multiple-use forests, which are managed for complementary uses.

Item 3: Pre-European natural Rocky Mountain forests contained little pure old growth.

These were fire-evolved forests that regularly burned into huge natural clearcuts and patch cuts with considerable ignition assistance from Native Americans to keep the trees controlled. We now face what many forest scientists are calling "an epidemic of trees."

Corollary 3: The "God-intended" dark thick forests of your own recent experience were created by European humans.

Conservative harvesting below sustainable growth levels, and

extreme fire protection has increased tree density an order of magnitude (ten times) more than found a century ago. The species mix has also shifted away from pines into fire and disease prone Douglas-fir and true firs. As a result, forest ecosystem health has become the biggest and unpublicized forestry problem.

Item 4: Automation did account for 20 percent of job reductions in the forest industries over the last two decades.

Now read something current. Public timber sale reductions due to radically increased environmental constraints account for almost all of the forest industry job losses of the last three years. One of 1994 NE Oregon analysis showed 40 to 70 percent of all jobs in local mill-towns are being lost within a single year from environmentally rationalized harvest reductions.

Corollary 4: Timber commodity jobs are highly skilled and high paying.

Because recreation jobs are created in visitors' home towns rather

than their destinations, it often takes an order of magnitude of increased recreation to compensate rural commodity job loss and two orders to compensate local commodity income loss.

Western rural family lifestyles are being sacrificed in a politically elitist powergrab over forest symbolism.

You and I agree on the essence of human tendencies in "greedy timber companies" and "self-serving hippie environmentalists." We disagree that it is wise to trust your children's forest future with either extremist bias.

—Charely McKetta

Thanks, apology for election

This is a brief letter of thanks and public apology before all my fellow students concerning the election of spring 1994 held on April 20.

A special thanks to all my co-workers within ASUI; Cathy

Alonzo, our secretary, distinguished ASUI Senators Kathy, Danielle, Sean, Scott, Ian, Tom, Laura, Zahrah, Steve, Brent, Rob, Steve, Jeremy.

All the election workers deserve credit for working in the hot sun the entire day. I would like to thank Stephanie and Otis at Facilities, Karen at computer services, Latah County and Outdoor Rental. David Mucci as well.

Thank you. My sincere apologies to all students for campaign material being posted and "chalked" on the ground. In my defense, I did not have the time nor the equipment to erase the chalk near the polling booths. I also feel that the candidates, who happen to be current elected ASUI officials and wrote their names on the ground with chalk took advantage of an inexperienced chairman who has not gone through the election process and was not aware of past problems. I apologize. In all honesty I did the best I could.

—Damon Darakij

people realize where he's coming from.

Recognizing the impetus which motivates the press to run a story is often extremely difficult. What was the reasoning behind running the video tape of the Rodney King beating so many times? CNN ran the video tape repeatedly and is still running it in relation to King's recent court case. Is Ted Turner, who owns CNN, filling his own agenda by repeatedly running the tape? The intent seems to either be showing the obvious brutality of the incident or appealing to the racist cancer that feeds off an African American man being beaten by a bunch of white men. In running the tape of the beating, CNN is using overplayed shock therapy to keep the American public tuned in.

It was this same power of the press which incensed activists to try and crucify Frank Kelso for the sexual harassment that happened at Tail Hook. It was proven that Kelso had no knowledge of the actions that were going on during the convention. These people pushing

for Kelso's firing were not able to get him demoted from a four star to a two star general, but they were able to sway public opinion. Kelso recently retired due to public pressure.

However, pressure from the press is not necessarily the root of all evil. If it were not for Woodward and Bernstein, the Watergate scandal would never have been uncovered. If not for today's media, there would be no investigative Senate hearings concerning the Whitewater controversy. The media will always strive to spark public attention because that is what sells. The establishment's decision of what to run gambles with public opinion. Keep in mind the establishment is pushing their agenda.

If the sources of information are not diversified, perceptions of reality will be molded by a hidden agenda. If we don't realize that the establishment is trying to control us we will end up being reeled in by the pimps of information, have our heads slammed against the rocks, and end up a piece of meat in a rusting metal bucket.

Argonaut Letters Policy

The Argonaut welcomes reader letters. They must be one page typed, double spaced. Letters must be signed and include identification or a driver's license number and phone number for each writer. Proof of identity for each author must be shown when the letter is submitted to the SUB third floor student media office. The Argonaut reserves the right to refuse or edit letters. Multiple letters with the same position on a topic may be represented by one letter.

HEMP
•FROM PAGE 7

products. England finally realized Sherwood Forest isn't going to last forever and recently legalized industrial hemp, along with Switzerland and Holland. In the United States, hemp continually runs into the brick wall of perceived drug use.

In Harrisburg, Ore., C & S Specialty Builder's Supply, Inc. is well on its way to becoming a viable industry in the hemp market. The company has been able to produce a medium density fiberboard that uses 25 percent hemp fibers and out-performs all other boards, the most recent example of which was shown on CNN Sunday.

"Look at it this way," said Tim Pate, C & S Director of Marketing and Sales. "One acre of forest will produce 1,000 lbs of fiber per year and you have to wait 60 to 100 years to harvest it. In 120 days hemp will produce 8-15 tons of fiber per acre."

It doesn't take a Forest Service employee to realize if hemp could be used to replace wood in everything from particle-board to toilet paper, we would save millions of trees.

"Hemp is a sustained, renewable resource. You can renew oil, too, if you've got a million years or so to hang around," Pate said.

Hemp grows 12 to 20 feet tall, in nearly every climate. Bugs won't eat it, so no herbicide or pesticide is needed to grow it, nor does it need much water or fertile soil. It converts the sun's energy into biomass more efficiently than any other plant, and could compete with petroleum based fuels, if it were utilized as corn, sugarcane or kenaf-based fuels.

Despite its minimal needs for growth, it is second in nutritional value only to soybeans and, according to "The Emperor Wears No Clothes," a book detailing historical uses and future possibilities of hemp, the world's domestic animals could be fed on hemp seed-based food, not to mention humans.

Then take the fact the first draft of the Declaration of Independence was written on hemp paper, the Mona Lisa was painted on hemp canvas, early prairie schooners used hemp canvas, as well as sails on 75-90

percent of ships. In Feb. 1938, *Popular Mechanics Magazine* called hemp the "New Billion Dollar Crop" and the Feb. 1938 issue of *Mechanical Engineering Magazine* called hemp the "most profitable and desirable crop that can be grown."

Currently, C & S is not able to make hemp fiberboard at feasible production levels because there is no source of raw supply. Hemp stalks must be imported, a tactic they are pursuing, but locally produced hemp stalks would cut production costs drastically.

Even if we only used hemp for lumber and paper products, tossing all the other industrial possibilities over our shoulders, we would still have a viable, more environmentally sound industry. We would be able to keep a few of the remaining old-growth forests and we would have stronger houses to boot. It is important to note hemp would not be grown in the same strains that produce THC, the psychoactive agent.

Now is the time to get off the stigmatized notion hemp is only a nasty drug. America needs to legalize it now and get on with using it properly — as an industrial fiber that will help the environment.

'Die Fledermaus' opens April 28

Next week is the final Hartung production of the semester, *Die Fledermaus*, by Johann Strauss.

This production is a collaboration between the UI Theatre Arts Department and the School of Music.

The operetta will run April 28-30 at 8 p.m. and May 1 at 2 p.m. Tickets are \$8 for adults, \$7 for seniors and \$5 for students.

Tickets can be purchased at the

Summer theatre tickets on sale

A summer session of comedy and drama has been promised by the Idaho Repertory Theatre.

Four performances are scheduled for the summer, with opening night July 5. The season ends August 6.

Performances are Tuesday through Saturday in the Hartung Theatre.

Patrons also have an opportunity to support IRT financially. About one-fourth of the season's budget comes from patron gifts.

Season tickets are \$28 for adults, \$24 for senior citizens or \$16 for students. To order tickets contact the Theatre Arts Department.

• Class •

Self defense class taught in SUB

As part of National Sexual Assault Awareness Week the UI is holding a self defense class.

Saturday in the SUB Vandal Lounge Ryan Pratt, from The Martial Arts and Fitness Center in Pullman, will lead a class in self-defense moves.

At 1 p.m. the local police will open the class with the AWARE Program which teaches prevention of violence and what to do in case of a violent encounter.

At 2:15 p.m. the group will do a general survey of the body's natural impact.

At 3:30 p.m. they will cover how to escape from common holds.

Finally at 4:45 p.m. they will review the sessions and will cover being mentally prepared for a violent encounter.

Alliance works for acceptance

Tristan Trotter
Staff Writer

Last year on April 13, the Inland Northwest Gay People's Alliance held their first "Hate is Not a Family Value Dance." Residents might remember the occasion in particular because of the people picketing on the sidewalk outside the dance.

This year, the Alliance hopes that the warmer, more amiable season will make for a similar atmosphere for their second annual dance. It will be this Saturday at the Moscow Community Center at 8 p.m.

The concept behind the INWGPA's "Hate is Not a Family Value Dance" is inherent in its title. Open to the community at large, the event will offer people a chance to meet, listen to some music, move around and hopefully become more aware of the issues which currently face us regarding homosexuality — the need to practice tolerance and respect instead of hostility.

The INWGPA serves a similar function. According to treasurer Michelle Ward, the organization tries to "provide a social outlet for the gay and lesbian community." This

community includes residents of Moscow, Pullman and even the Lewiston/Clarkston area. Ward pointed out that in the valley, there is "no cohesive group or social opportunities ... so they often have to come up here."

The Alliance is currently working to spread education and awareness on Idaho's Anti-gay initiative, but they focus a lot of their time regularly on community service. "We recently adopted a two-mile stretch of highway just before Potlatch," Ward said. Similarly, the proceeds from this dance will go to benefit organizations like Voices for Human Rights and a similar coalition formed in Washington, also to fight the initiative.

The Alliance works in cooperation with the UI chapter of Gay, Lesbian and Bisexual Association and with Parents-Friends of Lesbians And Gays in Lewiston. They also publish and distribute a monthly newsletter, which contains information, announcements, a calendar of events and editorials on gay and lesbian issues facing our community and the country at large.

The INWGPA is always open to and in

need of support from concerned citizens. If you are interested in contributing to the newsletter, helping with fundraising or simply becoming a member, you are encouraged to contact Kim Jordan at (208) 882-8889.

It's important that Moscow be a place where hate is not given free reign. Getting involved and educating yourself will make you a factor in preventing that from happening.

Need a reason? The April newsletter, included in a list of recent disappointing quotes and phenomena, INWGPA co-chair Douglas Garvey cites this example: the January 17 earthquake in southern California was attributed by Pat Robertson on the *700 Club* to God's wrath against "gays and lesbians, pro-choice activists and perversity." With attitudes like this still so prevalent in our society, we can't stop pushing for cooperation and tolerance.

There will be non-alcoholic beverages and other refreshments served, compliments of local businesses. The center is a smoke-free environment and wheelchair accessible. Admission is \$5 non-members, \$4 members and \$2 for children 12 and under.

DON'T ACT YOUR AGE

For 21 years the first weekend in May has been filled with the activities of the Moscow Renaissance Fair. The fair is also consistently in East City Park on the corner of

Third and Monroe Streets. The free activities run from 10 a.m. to dusk on April 30 and May 1. The poster for this year's fair was created by eight-year-old Katie Scott.

Showing features professor's story

Three local groups sponsor benefit showing of 'Schindler's List' to educate communities about real WWII holocaust

Ever wanted to "fix the world?" It's a pretty tall order, to be sure. There are things, however, we can do to get ourselves moving on the right track.

In an effort to do just that, three local groups, the Jewish Community of the Palouse, the Latah County Human Rights Task Force and the Latah/Nez Perce Voices for Human Rights, in cooperation with Carmike Theatres, will be sponsoring a

benefit showing of Steven Spielberg's *Schindler's List* on Sunday at 4 p.m. at the Cordova in Pullman.

At 3 p.m. in the theatre, UI professor Alan Rose will be speaking to the audience regarding his own experience with Nazi Germany. Rose was a prisoner in a German concentration camp during WWII and still bears 41516 tattooed on his arm. He will try to tell the crowd what

this tattoo and everything it represents has meant to him and to his family throughout the years.

Previous audiences, including those who felt the film deserved so much acclaim and so many awards, have responded emotionally and painfully to the story portrayed in *Schindler's List*. They express "hope and renewed faith that the actions of one individual can make a difference."

If you missed this movie when it made its regular run of the theatres, here is your chance to become aware of how the Holocaust destroyed a piece of humanity — a piece that is still recovering.

Pullman Mayor Al Halvorson and Moscow Mayor Paul Agidius will both be present to

speak briefly.

Don't miss Rose's address at 3 p.m., and the film at 4 p.m. Tickets can be purchased before the event at Book People and the Bazaar above the Coop in Moscow, and in Pullman at the Combine. They will also be for sale from 2:30 to 3:30 p.m. on Sunday just before the event. Tickets are \$10 for adults and \$6 for students.

Fixing the world may, and probably will, take many years. But according to Steven Spielberg himself: "We just can't sit back and be inactive and simply hope things are going to turn out all right for our children and their grandchildren. We have a responsibility. We have a duty to voice our opinion and to work to fix the world."

Koppel Spring Fair Saturday

Barn raising workshops, nature walks, music and wagon rides welcome people to the Koppel farm Spring Fair tomorrow.

Workshops and walks on gardening, composting, weeds, native plants and river care will be presented at 10:30 a.m. and repeated at 11:30 to allow attending two workshops. A lunch of locally grown and volunteer prepared food will be served at 1 p.m. Also at that time the Palouse Fiddlers and folk music will play.

A memorial rose planting for farm donating family member, Selma Koppel, is scheduled for 2 p.m. Citizens are asked to bring a pie for the pie sale or a fiddle and a friend.

The Koppel farm Spring Fair is supported by community volunteers and contributions, the Palouse Conservation District, the Palouse-Clearwater Environmental Institute, the Center for sustaining Agriculture and Natural Resources-WSU, and the Greystone Foundation.

Climbers to clean Granite Point

Top area rock climbers will travel to Granite Point near Wawawai, Wash., to attend the Third Annual Snake River Rock Rodeo at 9 a.m. April 30.

The event at Granite Point is designed to help clean up the popular climbing site and promote the enjoyment of safe rock climbing.

Cleaning the site is the focus of the event. Most of the litter at Granite Point is generated by users other than climbers, however, organizers of the Rock Rodeo feel since rock climbers benefit most from the site, climbers should do the cleaning. Participants are given a large trash bag to fill when they register and must fill it before participating.

Registration fees for the event will go to the Access Fund of the American Alpine Club. The Access Fund is dedicated to acquiring and maintaining access to climbing sites for rock climbers.

Sponsors of the event have donated \$1000 in prizes which will be awarded to competitors.

Registration is \$12 with t-shirt. Those interested may pre-register at the ASU Outdoor Program. For information call 885-6810.

Take-offs optional; landings MANDATORY

Starting with radio controlled models in 1990, mechanical engineering student Sam Frasier has climbed to new heights. In 1993 Frasier began flying light aircraft.

Frasier's interest in flying was nurtured by UI math Professor Larry Bobisud, who says of Frasier, "Sam has good hand eye coordination. He was quick to learn. I don't think I ever saw him crash."

Bobisud's willingness to help Frasier has paid dividends for novice hobbyists because Frasier has since helped many aspiring model airplane enthusiasts get their wings. More to the point, he has helped them keep wings on their airplanes.

Frasier often quotes Bobisud when coaching new pilots saying, "Take-offs are optional, but landings are mandatory." It is possible, even preferable sometimes, to hand launch a model plane. Hand launching is easier than conventional take-offs and the risk of catastrophe is greatly reduced. However, landings are mandatory because snatching a plane out of the air is very difficult — even dangerous.

Care and training are important to the novice pilot, because even without expensive crashes, the radio controlled airplane hobby is expensive and demanding. It's demanding because building an airplane from a kit is not easy. Pre-built airplanes are available, but costly. Besides, as Frasier says "Building planes is satisfying, but it can also be frustrating." The first plane Frasier built took three months to complete. However, he can now finish the same kit in two days. "It gets easier after you build a few."

"Building time is shortened," Frasier says, "because after you have done an airplane you learn the steps that are really important and the ones that are superfluous. Getting the wing straight for instance, is important. However, some kits make a big deal of sanding and primping parts that don't mater. Work like that is a waist of time. I think choosing the right kit

• SEE AIRPLANES PAGE 15

Sam Frasier mans the controls of his model airplane. Frasier builds his own airplanes as well as flying them.

Story by Dave Lewis

Sam Frasier hand starts a recalcitrant airplane engine. On the second attempt, the engine started. Frasier has built and flown model airplanes, those which don't carry passengers, since 1990. Now he wants to be inside and on the ground.

Warm day inspires hedonism

Dave Lewis
Assistant Editor

Warm early spring weather makes me want to go to the lake. Just feeling the warm sun on my back is tonic to my soul. The water is usually too cold for all except the most hardy or foolhardy to swim or water-ski.

Still, there is plenty to do on the water. Fishing is a popular pastime, as is sunbathing. On a warm spring day a few years ago my family indulged in a little of both activities.

We launched our boat at Freeman Creek State Park, on the shores of Dworshak Reservoir. We planned to boat up Elk Creek to the end of the lake. I hoped the fishing would be good at the start of slack water.

A mile or so from the end of the reservoir is a "no wake" buoy. As we passed it we slowed to idle speed. I always like going slow on warm spring days because the air isn't quite warm enough to be comfortable while cruising.

The fishing must have been good, because when we rounded

the last bend we found the creek packed with other fishermen's boats. Obviously early risers, I thought. I tied the mooring line to an over-hanging limb and we began casting wedding band lures with yellow corn. After an hour of futile attempts and failing to catch even one elusive fish, we decided to surrender. With so many boats in such a small area, it is understandable we wouldn't catch a fish.

On the way back to the main lake, we revised our plans. Since the fish would not bite, we decided to spend the day sunbathing, or as Jimmy Buffett sings, "Drinking lots of carrot juice and soaking up rays."

After lunch, my wife decided to untie the strap on her bikini top to "erase" its tan mark on her back. She thought, as I did, we were alone on this part of the lake.

It was a quiet, sun-drenched afternoon. My kids were busy taking naps. I was trying to get a fishhook out of the interior carpet of the boat. Pam, lying on her stomach, was relaxed and happy. All was right in my little world.

When I finally got the fishhook loose, I was seized by an idea. Since nobody, in our boat at least, was paying attention, I decided to fake catching a fish. I calmly flipped the lure out into the water and started to retrieve it. Suddenly I yanked back hard on the pole and yelled "Fish on!" like I had seen done on TV fishing shows. I am probably one of the only people on earth who has learned anything by

watching TV fishing shows. Much to my surprise, I really did have a Kokanee on. Kokanee are only supposed to bite when you're trolling. After actually catching a fish, the kids and I started fishing again with a vengeance. However, our efforts were without effect and our excitement soon waned. Before long, we were back napping and catching rays.

My wife, who was still erasing the tan mark, wanted to turn over and do the other side. She was having trouble, however, reaching both straps and fastening her top without compromising her modesty. She was getting exasperated and was about to sit up to get the job done once and for all, when a warning stopped her.

She was spared untold embarrassment by our son, who said, "I wouldn't do that, Mom. Look behind you."

Just behind Pam, little more than ten feet away was a boat with three very attentive fishermen in it. I hadn't noticed them as they drifted silently toward us, powered only by wind and current. We had been fishing just moments before, but

somehow we didn't see them. What interested me was the look on their faces. It was a mixture of disappointment, embarrassment and a little bit of anger. For a moment I thought they might try to board us and pummel my son about the head and shoulders for his timely warning. Not a word passed between our converging boats. In rude silence they started their motor and made their way up the lake. Before long all that remained was their blue two-cycle exhaust smoke, our peels of laughter and the burning question, "Who were those guys?"

New major offered in Fall

Biological Systems Engineering is new major offered by Department of Agricultural Engineering. Department head, Jim DeShazer says, "Biological System Engineering is a marriage between biology and the physical sciences. It will deal with a broad spectrum of issues, including bio-remediation, improved water quality and food processing."

For more information call Dr. Thomas Hess at 885-6182.

Kayaks, rafts hit whitewater

The top white water enthusiasts in the northwest will challenge both each other and the Salmon River during two days of kayak and raft competition. The 10th Annual North Idaho White Water Festival, featuring a kayak slalom race, a kayak/raft down river race and a "hot dog" freestyle event.

"Last year's Festival hosted 110 participants, some from as far away as Seattle," said event organizer Mike Beiser of the UI Outdoor Program. "The white water festival is more of a rendezvous than a competition."

Other activities include prize raffles, a barbecue social and an awards ceremony.

Registration begins April 22 on Highway 95 at mile post 188 south of Riggins. The competition, also near mile post 188 is April 23 and 24.

Sixteen of Sam Frasier's model airplanes, nine of which are flyable are stored in the room he built onto his home to house his hobby.

AIRPLANES

•FROM PAGE 13

is most important."

Selecting an airplane kit is tricky for first time radio pilots. Catalogs feature beautiful planes in an ideal setting, but may not tell the new pilot enough about the difficulty of flying the plane. Since kits cost around \$100, getting advice from an experienced flyer will save time and money.

Choosing a power source for your plane is another decision for a perspective radio pilot. Electric motors are available as are two and four cycle internal combustion engines. There are pros and cons to consider when deciding on your power source. Frasier agrees that electric motors are quieter, but says, "electric motors need batteries, that makes the plane heavier so it doesn't fly as well." Another drawback to electric motors is reduced flight time. As Frasier explains, "batteries allow for just six minutes or so of flying and require 15 minutes to recharge the batteries. When you're out at the field it isn't easy to charge batteries. But, an airplane with electric power doesn't get soaked with fuel

like gas planes do. Electrics are much cleaner." Total cost for an electric motor and batteries is nonetheless comparable to gas engines.

A two cycle engine for a medium sized plane costs nearly \$100, a four cycle engine is considerably more expensive. To their credit, four cycles have a more realistic sound, but also have many more moving parts that might fail.

The radio necessary to control the speed, elevation and direction of flight is another \$100. Depending on the number of bells and whistles, costs go up accordingly.

The miscellaneous equipment needed to build the kit increases the cost another \$60. These expenses when added to the price of the kit, can total over \$350.

Anyone interesting in learning to fly radio controlled airplanes should contact the Palouse Ridge Runners model airplane club. The club's training officer is Professor of Agricultural Economics, David Walker, at 882-9180. Club membership costs \$15. There is a \$20 charge for train-

ing.

With planes so expensive, it is good Frasier seldom crashes, especially since he sometimes rides when he flies.

To qualify for a license, Frasier completed ground school at UI and the required flight time at the Moscow-Pullman airport. A student pilot must fly 20 hours accompanied by an instructor and 20 hours solo to complete the program.

Even though Bobisud wouldn't talk about Frasier's aeronautical mishaps, Frasier wasn't so easy on himself. He said, "I don't remember crashing many of my planes. I did crash one belonging to a friend though."

With a sheepish smile Frasier continued, "I was doing a great aerobatics maneuver, but I held on to it too long. It looked so cool, I yelled 'Hey Chad look at that.' Just then I scattered his plane all over the ground. I was so interested in the maneuver, I didn't realize how close it was to the deck." After the pieces stopped flying I turned to my friend and said, "I guess I'll start building another plane."

Sign up for youth baseball by May 5

Sign up now for Moscow Parks and Recreation's youth baseball and softball programs. Registration is for boys age six to 13 and girls age six to 15.

The fee for Moscow residents is \$16. To avoid being put on the waiting list, please sign up by May 5.

Registration will take place Monday through Friday at the Eggan Youth Center from 8 a.m. to 5 p.m. Call 882-0240 for more information.

• Games •

State Games to be held in Moscow

The First Security Games of Idaho have selected Moscow as a host site for the Sixth Annual 1994 State Summer Game to take place July 7-10.

Competition in all activities is open to both Idaho and Washington residents.

The events held at the Moscow facilities will be boy's and men's basketball, girl's and women's basketball, junior golf, volleyball, soccer and a duathlon. The duathlon is a 3k run and a 5k bike.

Registration packets will be available from local First Security Bank branches by April 25.

For more information call 1-800-44-GAMES.

• Triathlon •

Palouse Triathlon gets under way

Catch the Fever!

Triathlon fever is spreading. Some lucky individuals are caught in the earliest stage of the epidemic and are training, as you read these words.

The Palouse Triathlon begins its 11th annual event Sunday, April 24 at 7 a.m. at the open to students and non-students alike.

The event consists of 1.5k swim in a 25 yard pool, a 40k bike ride over relatively flat terrain and a 10k run over the rolling hills of the Palouse.

If you feel feverish as you read about the 11th Annual Palouse Triathlon you may catch the fever yourself.

Nussmeier awaits draft day

Andrew Longeteig
Staff Writer

Former Vandal quarterback Doug Nussmeier is stressed.

Is this the same competitive, collective and confident gunslinger who is arguably the best passer in UI history and led the Vandals to the Division I-AA semifinals?

The reason for his uneasiness is that the National Football League draft is April 24-25 in New York.

Nussmeier is considered to be the third best quarterback prospect in the country behind Fresno State's Trent Dilfer and Heath Shuler of Tennessee. He is projected as a second or third round draft choice.

"I really don't know what to think," says Nussmeier of the draft. "I haven't slept real well the past couple nights — probably won't until it's all over."

FOR SALE: quarterback with a strong arm, pocket mobility and the feistiness of a mother-in-law.

Who wouldn't buy into that?

Nineteen of the 28 NFL teams will have a different quarterback from last season at the helm. Nussmeier could very well make that number 20.

"Between my agent and myself, we've pretty much talked to everybody in the league. It's hard to tell who's interested because those guys, if they want to, they're not going to let anybody else know, so they're not going to try and make it a big scene because someone else might take you ahead of them."

Nussmeier added that often times organizations that don't talk to you are the teams that draft you.

John Friesz was the last Idaho quarterback to be selected in the NFL draft. At one point, he was considered the top pick out of everyone. Due to the influx of eligible, very talented juniors and Friesz' limited mobility, he ended up being drafted in the sixth round by San Diego.

Nussmeier agrees that many players expected to be drafted high are drafted in the lower rounds and some less-publicized players are drafted much higher than projected.

Nussmeier downplays his supposed second or third round selection. "The important thing to remember about all those guys who write all those things is that none of those guys are sitting in the draft room on Sunday and Monday."

With all the players from big-name schools, Division I-AA players seem to be consistently overlooked.

Says Nussmeier, "A lot of people are caught up in the idea that the best players play at the highest level."

However, he says, "It's pretty risky to take a I-AA guy — a lot of people would wonder why you'd do that."

Playing in the NFL has been a dream of Nussmeier's since he was a child. But, he never thought his dream would turn into reality until after the 1993 season.

Strangely enough, Nussmeier's best sport is baseball. He was a star first baseman/pitcher in high school.

"I wanted to play baseball but at the same point in time it was hard to turn down a full

File Photo
Doug Nussmeier will undergo the biggest nerve racking experience he has probably had to endure yet. On Sunday, the first round of the NFL draft begins. Nussmeier remembers the experience last year while waiting to see teammate Jeff Robinson, who plays for the Denver Broncos, go through the same.

(-ride) scholarship and wait for baseball season to see if I was going to get a scholarship."

The Cincinnati Reds, San Diego Padres and California Angels all offered Nussmeier a tryout.

As it turns out, Nussmeier is forever grateful to head coach John L. Smith for bringing him to Idaho.

Remarkably, Nussmeier only played quarterback in high school for one season and spent the rest of his time at defensive back.

"I didn't really know what to expect," he said of his potential at quarterback four years ago. "When coach John L. Smith recruited me and signed me, he told me they recruited me basically as an athlete and I

would start out at quarterback and would see how it went. If I couldn't compete or play there then they would move me over to the defensive side."

Idaho should thank their lucky stars that he wasn't switched over to defense. He earned the starting position as a freshman, beating out senior Steve Nolan.

Over the course of four years, Nussmeier passed for the most yards in UI history and finished with the most touchdown passes ever in the Big Sky. At the end of the 1993 season, he was given the Walter Payton Award for being the best player in I-AA football.

Lifetime experiences shared by Killebrew

Matthew D. Andrew
Sports Editor

It opened on the field of dreams. Harmon Killebrew had been playing at the Payette field since he was a young man.

In all of those years, he never saw anyone hit a ball over the 435-foot fence that stood in left field.

It was that day in front of Washington Senators' scout Ossie Bluege he would send the ball right where it had never been — on the other side of left field, right smack in the middle of the beet fields. That's where it would end up.

From there a whole world

would open. Games viewed by the president, cabinet members, senators and many other Washington, D.C., big wigs.

And where that took him he gladly shared. After an invitation extended by Beta Theta Pi Fraternity, Killebrew came to the UI campus to talk about drugs and alcohol, baseball and his family.

In his presentation, he talked about a close friend of his and baseball great himself, Mickey Mantle who recently came out to confront his ongoing battle with alcohol for 42 years when he checked into the Betty Ford Hospital. Mantle said he was dis-

appointed with his baseball career, fatherhood and marriage.

He also talked about Billy Martin, his manager with the Minnesota Twins in the 1969 season. Killebrew described him as the best manager he ever played under. In 1989, Martin died on Christmas Day in a car crash that was a result from the use of alcohol.

He continued to name other players of the sports past and present who had difficulties with one substance or another. All to add to the credibility to the fact it can affect anyone.

Without ever giving a whole opinion, he talked about changes

in the sport from the Golden Age when he played.

In 1973, the first player was signed to a contract for \$200,000. Today, people are making millions. Players are now at the forefront where illegal drugs are affordable for a daily habit.

He remembers the days when players played for the love of the sport, not the money. In his days the minimum salary was \$60,000 and now it is \$109,000. The days when playing a double header was not looked at as a pain but rather a benefit to playing baseball.

• SEE DRUGS PAGE 17

NUSS
•FROM PAGE 16

Besides all the accolades, it is Nussmeier's competitiveness that sets him apart from other players in the draft.

"That's what takes my play to the level that it's at," he adds.

Nussmeier just wants to go on an NFL team that will "give me a chance to win — in a place where I'm going to get a chance to compete for a starting job."

Nevertheless, his transition from I-AA football to the NFL won't be a cake walk.

"I've got a lot of things to work on. Every part of my game needs help."

He would obviously like to go to a team where there isn't an already chosen starter. Teams like the Los Angeles Rams, Washington Redskins and Indianapolis Colts don't have shoe-in starters.

"(If) You go to a place like Buffalo or Miami where you know there's a proven starter, you just want to keep grooming your game to get ready to step in," said Nussmeier.

As Nussmeier embarks on his professional football endeavors, he won't forget his Idaho experiences.

"The thing I'll probably remember the most is our philosophy here. We take a lot of guys and make them be overachievers, like myself. Through hard work and some great coaching, I've come a long way," said Nussmeier.

He praises former quarterback coaches Bob Petrino and Scott Linehan and Smith for helping him become a top-rated quarterback.

Most importantly, however, Nussmeier thanks "all the great players I've played with here. Those guys made me a lot better player just because they made things real easy for me."

Nussmeier is optimistic about the future of Vandal football.

"The defense coming up this year might be the best defense I've ever seen since I've been here. Overall, this could be one of the best teams ever here," said Nussmeier.

Nussmeier is due to graduate this spring with a degree in marketing but he isn't thinking about selling anything in the near future — except his magical arm to interested NFL teams. If he doesn't make an NFL team, he says he will pursue the Canadian Football League.

"If I didn't have the desire to play, to be on the field," said Nussmeier, "I wouldn't go through with this. Right now, I'm focused on the NFL."

KILLEBREW
•FROM PAGE 16

He contests that there are more greater ball players in his days than there are now. "I would pick Jim Palmer over Glavine anyday," remarked Killebrew to the great pitching staff of the Atlanta Braves. He notes that the hardest pitcher he went up against is Herb Score and the best hitter was Ted Williams. Killebrew honored friend Mickey Mantle as the man who had "more physical ability than any other person in a baseball uniform."

Through it all, Killebrew touched on the aspect that hurt him the most.

He opened with a very vivid description of his son. Blue eyes, dimples, warm, happy, and full of laughter possessing the greatest enthusiasm for life. Demonstrated great physical ability in both baseball and football, as a musician.

At the age of 16, Kenneth's life was changing rapidly showing the strains of life. What was once a spirited young man had then become a facade who had avoided and withdrew from his family.

Along with the substance abuse came a life with crime, and as the abuse escalated, so did the crimes.

Then the day came, a day that remains in Killebrew's mind when he received "the most devastating call." While in Manila, he found out that his son had been arrested for robbing a bank. "I felt like my heart was being sucked out of my chest with a straw," said Killebrew to that phone call.

For years Killebrew had been doing what he thought was helping his son. At a point in his life he acknowledged, "I did try to help him too much."

"I had to learn not to become part of the problem but rather a part of the solution," added Killebrew. To which point he was proud to say that Kenny was now a responsible husband and father and is in business for himself.

The stress that came into Kenny's life was what is related to Killebrew's time away as a player and broadcaster. "I wasn't a failure as a father, unless you can say loving someone too much is a failure," responded Killebrew to the situation that engulfed him.

Killebrew changed the subject in his lecture from the personal to the general. He spoke about peer pressure and focused that not only could it work against you but also for you.

He made reference with the dissatisfaction he maintains with the notion of peer pressure and friends working against friends and coined the phrase "Peer Power," a more descriptive notion of the way things should work.

Killebrew stressed the importance not of recognizing the drug abuse

Photo by Matthew D. Andrew
Harmon Killebrew, Baseball Hall of Famer, was on campus Tuesday at the invitation of Beta Theta Pi to speak on the growing awareness of drugs and alcohol. His daughter, Megan Patten, is a student at the school.

but rather the signs leading to drug abuse. He mentioned low self-esteem as a prime example as with withdrawals from family and friends.

Killebrew had an awesome career in the majors. His opening shot came as a favor by Senators owner Clark Griffith to Idaho U.S. Senator Herman Walker who pestered Griffith about the ball from southwestern Idaho.

At the age of 17, Killebrew was taking to the big leagues where he would get his chance. He spent the early years fumbling around in the

minor leagues until he got his actual major league ball game in 1959. It was opening day. No better way to start it off right than the way he did — batted one deep for the home run.

All in all, he led the American League in home runs for six years, currently fifth on the all-time board. He is the best American League right handed home run slugger to this date. He won the Most Valuable Player award in 1969, selected to the All-Star team 13 times and was inducted into the baseball Hall of Fame in 1984.

BECOME AWARE

Today students at the University of Idaho will wear a purple ribbon to show their support in the fight against the attitudes that advocate date and acquaintance rape.

One in four women will be attacked or sexually assaulted by the time she finishes college. Men are also victims of date and acquaintance rape, but rarely report it. Over 60% of rapes are committed by acquaintances. Nearly 57% of college females said they had been assaulted by a man they were dating.

Date and acquaintance rape is a problem we all face. It's time we break the silence and educate each other. It's time we learn to support the rape survivors and talk about it.

This week is National Sexual Assault Awareness Week. Students are learning to communicate clearly in relationships, respect each other and accept their partner's decisions.

You can make a difference. Date and acquaintance rape can be prevented when you become aware.

WEAR YOUR PURPLE RIBBON
