Budget cuts may affect service to students

Janet Birdsall
Staff

Students may experience some frustration in the upcoming months as the University of Idaho works to meet Governor Phil Batt's 2 percent budget reduction order.

As part of a temporary measure to reduce costs, a hiring freeze has been placed on all university positions currently vacant. "There will be fewer folks there to deal with the needs of the institution, particularly students," said Robert Fenning, the assistant vice-president of budget and planning.

The hiring freeze will be reviewed by the provosts and vice presidents. Priority positions will be selectively approved for refill beginning this week, Fenning said.

"Part of the assumption on the position freeze was to not have an impact on currently scheduled classes in the current fiscal year," Fenning said. "I'm sure it will be felt in different ways and in different programs."

All Idaho agencies, including universities, must develop plans for a permanent 2 percent budget reduction. UI must cut over

\$1.3 million from the general education budget and nearly half a million from special programs, according to a memo from Interim President Thomas Bell. Some special programs include Idaho Geological Survey, Forest Utilization Research, and Agriculture Research and Extension.

"This will not be easy. It is doable. We will meet the deadline for holdback implementation plans," Bell said.

In addition to freezing vacant positions, UI will reduce travel and operating expenses to meet short-term reduction requirements. Travel will be cut by 10 percent, and operating expenses and capital outlay will each be cut 5 percent. Operating expenses include supply purchases, while capital outlay includes equipment purchases and repair, Fenning said.

"The clear intent was not to have an impact on classes. The intent, obviously, is to try to improve quality and reduce costs," Fenning said. "The university is implementing measures to try to comply with reduction orders, while having the least impact on instructional programs and services to students. They may experience some frustrations, but we seek their understanding."

UI professor in direct connection with Jupiter probe

Sean Tetpon
Staff

Direct measurements of Jupiter's atmosphere will be taken by NASA's Galileo probe in December. The measurements are part of an experiment directed by University of Idaho's David Atkinson.

Atkinson is an associate professor in electrical engineering, and is the principle investigator of Galileo's Doppler Wind Experiment.

The Doppler Wind Experiment will record changes in direction of the Galileo probe as it enters Jupiter's atmosphere.

"As the probe is descending into the atmosphere, the wind is going to change its motion," Atkinson said. "Every time its motion changes, there is a Doppler shift of the signal frequency from the probe to the orbiter."

The Doppler effect is the measurement of frequencies between two objects moving relative to one another. When the frequencies change, the distance has changed. "From that frequency shift, we can say something about what the winds are in the atmosphere," said Atkinson.

The Galileo is actually two spacecraft; an orbiter and probe. The orbiter will remain in Jupiter's orbit while the probe parachutes into the atmosphere. "The probe will send its data to the orbiter, then the orbiter will send the data to Earth," Atkinson said.

The two spacecraft were connected and launched in October 1989. The probe separated from the orbiter in July 1995. "It is in a coast phase, which is a 150 day coast to the planet Jupiter."

Atkinson said the probe should enter the atmosphere Dec. 7. "We

should know about 3:04 p.m. earth-received time. The mission will actually start about 52 minutes before that. It takes 52 to 54 minutes for the signal to get back to earth."

Once the probe hits the atmosphere, it will hang on a parachute

for 75 minutes, sending data back to the orbiter. "After 75 minutes, even if it is still surviving, we will not be listening anymore. At 75 minutes, we have to turn the antenna away from the probe and fire the main engines on the orbiter to get it into orbit."

Galileo will remain in Jupiter's orbit forever. "Its primary mission is two years of sending back data, which is about ten orbits around the planet," said Atkinson. At the end of two years, NASA may have to

Jim Rennie remembered through ASUI Outdoor Program

Lisa Lannigan
Staff

He rode into Moscow on a motorcycle, proposal in hand, and began what is now the ASUI Outdoor Program.

Complete with a budget, Jim Rennie proposed a program to educate people about outdoor recreation and give opportunities to experience camping, hiking, rafting and rock climbing first hand.

Mike Beiser, Outdoor Program coordinator and close friend to Jim, said at the time Rennie came to campus in 1973 outdoor recreation was not in the main stream. "Not many people did this 10 to 15 years ago," Beiser said. "It seemed kooky, why would anyone want to climb a mountain?"

Rennie's proposal budget came to \$13,000 including funds for equipment.

The program began with 20 cross country skis, two four-man tents, 10 sleeping bags, 12 hardhats, four snow shovels, a couple of camp stoves and two rafts. Beiser says

the program now includes \$500,000 worth of equipment.

In its first years, 100 people took advantage of the opportunities offered by the Outdoor Program. Last year 10,000 people took part in cooperative trips and 7,000 people rented equipment. "We had 50 staff people last year on the payroll," Beiser said.

Rennie's nine page proposal included a list of objectives for the program. Rennie wanted to provide low cost outdoor recreation, increase environmental awareness and education and a place where people of similar interests could come together.

Beiser says the program provides education in lifetime sports. "When you're older, you don't have the same opportunities to participate in team sports," Beiser said. Many people who played football and baseball when they were younger become spectators when they are older.

"When you learn a lifetime sport, like camping, hiking, fishing and hunting, you can participate in the

rest of your life," Beiser said. "You can still receive the satisfaction you did when you first learned."

The program started in the back closet of where the rental shop is today. Gradually it grew to include the area of the basement in the Student Union Building it now occupies.

Rennie died of cancer a few weeks ago. For his funeral, Beiser put together a slide show from images Rennie took during his many trips. "These are his memories," Beiser said. "All we have left are images and memories of our experiences."

Former ASUI Vice President David Dose has been commissioned to create a sculpture in memory of Rennie and the beginnings of the Outdoor Program. A memorial fund with the University of Idaho Foundation is taking donations for the sculpture.

Beiser feels it is important to remember Rennie and what he started. "Remembering the past helps us understand where we are headed in the future."

Payette River fish get gift of water

BOISE—Water levels in the Payette River downstream from Black Canyon Dam will remain higher this fall to help fish thanks to the efforts of western Idaho irrigators and the U.S. Bureau of Reclamation.

The federal agency, two irrigation districts and three irrigation companies have donated about 6,000 acre feet of water stored in Cascade and Deadwood reservoirs for release into the Payette River, the Idaho Department of Water Resources said Friday.

Besides the Bureau of Reclamation, those involved include the Black Canyon Irrigation District, Emmett Irrigation District, Farmers Co-op Irrigation Co., Lower Payette Ditch Co. and Noble Ditch Co.

The extra water, enough to supply an additional 100 cubic feet per second of flow for a month, will be used to keep river flows below Black Canyon Dam at a minimum of 500 cfs, Water Resources said.

Historically, river flows below Black Canyon Dam at this time of year begin to drop to less than 500 cfs due to a sharply reduced need to supply water downstream for irrigation. Last year in late September the flow below the dam fell at one point to about 230 cfs.

Flows typically do not recover until later in the fall, when rain and snow boost the natural levels of the river.

The average daily flow just below Black Canyon was 675 cfs on Wednesday.

The decision to provide extra water came following informal meetings between the groups involved and the Department of Water Resources, which oversees water distribution around the state.

Engineering may not get funding

LEWISTON—Some Idaho legislators question whether the state can afford a Board of Education consultant's call for creation of a Boise State University engineering school separate from the University of Idaho.

The consultant's report also calls for establishment of a separate fund to strengthen the University of Idaho's engineering college and opens the door for expanding Idaho State University's general engineering program.

"I don't see anything wrong with their plan if they fund it," said state Rep. James Lucas, R-Moscow. "But I don't think they are going to get it funded."

Sen. Marguerite McLaughlin, D-Orofino, said she does not believe the board's consultant took into consideration the state's finances.

"We can't support what we have now," McLaughlin said. "One (university) is going to suffer one way or the other with the way finances are in the state of Idaho. We are pretty tight with revenue."

Although consultant Aimes McGuinness did not attach price tags to his recommendation, he

said it was important to avoid defining the engineering issue as a "zero sum game" because issues rarely are resolved when approached that way.

"Most states need both accessible, regionally sensitive engineering programs in their growing metropolitan areas as well as the strong graduate and undergraduate education, research and outreach capacity of the state's major research university," McGuinness wrote in his report.

The recommendation caught Sen. Jerry Thorne, R-Nampa, by surprise on Friday.

"I think we already have an engineering school," said Thorne, who led an unsuccessful charge to fund a separate Boise State engineering college on the legislative budget committee last winter.

Instead, legislators gave \$2 million to the University of Idaho and Boise State for a significant expansion of their cooperative Boise engineering program.

"It appears to me the cooperation between Boise State University and the University of Idaho has been exemplary," Thorne said. "I just am really pleased and thrilled with what I have seen and heard over there."

State Rep. Ken Robison, D-Boise, said the Board of Education should study the consultant's recommendation and perhaps revisit the Boise engineering issue.

"I think the critical thing is to have a strong engineering program in southwestern Idaho that meets the need of the electronics industry here," Robison said. "The university has done a good job of doing the expansion that they agreed to do in the last session. It has been impressive what they have done to expand the offerings."

Condemnation of gays starts recall movement

SPOKANE, Wash.—Coroner Dexter Amend stirred up a hornet's nest this summer when he used the slaying of a 9-year-old girl as an opportunity to disparage gay people.

His public rantings about "sodomites" spurred the formation of a recall movement. The governor's office has asked the state licensing board to determine whether Amend's conduct was unprofessional.

And several bereaved families have come forward with complaints about the coroner's insensitivity, suggesting Spokane County can be a lousy place to lose a loved one.

"I think the man's insane. I think he ought to be committed for psychiatric evaluation," said the Rev. Charles Wood, an Episcopal priest and a member of Parents and Friends of Lesbians and Gays.

Amend, 76, a retired urologist, declined to be interviewed.

Utah State frats, sororities adopt booze-free policy

SALT LAKE CITY—Dogged by the "Animal House" stereotype, Utah State University's fraternities and sororities have adopted a zero-tolerance policy on alcohol and drugs at all greek events.

The strict ban is part of a "Return to Greek Values" initiative, approved by the Logan university's trustees to boost greek system membership.

"We just need to be attracting more members," said Val Christensen, USU vice president for student services. "There seems to have been more emphasis on the social aspects than we should have."

In addition to the alcohol ban, the initiative calls for a chapter grade-point average above 2.80, more adult supervision and increased emphasis on values and service projects.

In the 1940s, 1950s and 1960s, USU's 1,200 students involved in the greek system emphasized service, scholarship and athletics. But a recent report presented to trustees suggested alcohol has become a major ingredient of the fraternity system.

The report said an estimated 90 percent of the greek members use alcohol, and many of them are underage.

USU officials link the rise in alcohol use with the drop in greek membership. The number of students now affiliating with fraternities and sororities has dwindled to just more than 300.

"Without a return to basic values, more adult supervision and more structure, along with a shift away from alcohol consumption as a major focal point in most chapters, it is our judgment that the entire system will not be viable enough to sustain," the report said.

Christensen said alcohol-related incidents include driving under the influence and minor-in-possession violations. The report also adds date rape and fights to the list.

French village in shock after teen's shooting spree

TOULON, France—Fresh from murdering three relatives at home, a teen-ager walked to the next village Sunday and calmly opened fire on a quiet town square, killing nine more people before turning the gun on himself.

The murder-suicide in southern France was the country's worst multiple killing since 1989.

"It was like he was hunting birds," said Guy Sintès, the owner of a cafe on the square in Cuers, a sunny village near the Mediterranean port of Toulon.

Eight other people were wounded in the half-hour morning shooting rampage, three of them seriously, police said on customary anonymity.

Television footage from the scene showed sidewalks and a car spattered with blood and a bullet hole through a shop window.

"The people are devastated, totally traumatized. The village is in shock," said Cuers Mayor Guy Gigo.

The boy was identified as Eric Borel, 16, but the impetus for the killings was unclear. His father died recently of cancer. Neighbors of his family, interviewed on French television, described him as taciturn and said his room was plastered with posters of Hitler and neo-Nazi themes.

Villagers with eyes red from crying sat on the ground, shaking their heads as they recalled traumatic scenes: An old woman shot as she walked her dog, an elderly man gunned down on his way to the cafe.

Two victims were killed while withdrawing money from a cash machine and another while playing boules, the Provençal bowling game, on the village square.

Sintès said he watched the killer retrace his steps toward a man he had wounded in the stomach to shoot him again in the head, killing him.

"He was very calm, very poised. He put the gun to his shoulder, held his gun steady, adjusted his aim and fired," Sintès said.

The killings began in the village of Sollies-Pont, about six miles north of Toulon. There, the 16-year-old boy used a hammer and baseball bat to kill his mother, stepfather and half-brother, according to police, who had initially identified two of the dead as the boy's father and brother.

The boy then walked to Cuers, about three miles north, where he began shooting at random in a parking lot, outside a bank and in the town square where villagers shopped.

"He was shooting at anything that moved. He was firing everywhere," a woman living in Cuers told France-Info radio.

Another witness from the village said the boy did not appear agitated.

"I saw him go past my shop with his rifle, at around 8 this morning. He was walking calmly, he wasn't in a hurry," said Frederic Bares, who runs a newsstand in the village.

"At first I thought he was a hunter. He was about 25 meters from my place when I saw him shoot a passerby, a shopkeeper who I think was hit in the head," Bares said on French radio.

Announcements

Career Services offers workshops

UI Career Services Center will offer the following workshops this week. A "Managing Interview Anxiety" workshop on Sept. 25, at 3:30 p.m. On Sept. 28, at 3:30 p.m. a "Marketing Yourself with a Resume and Cover Letter" workshop will be held, and on Sept. 29, at 2:30 p.m. an "Introduction to UI Career Services" workshop will be held.

All workshop are free but pre-registration is required. For more information, visit the Career Services Center in Brink Hall or call 882-6121.

Meeting features Boise internships

Students are invited to attend a meeting titled, "Do you want an internship in Boise," to be held Sept. 28, from 4:30 to 5:30 p.m. in the Brink hall Faculty Lounge. Participants will learn how to find opportunities in the Treasure Valley, and meet Dianna Gibney, the new UI/Boise Cooperative Education Coordinator. Please bring a resume. For more information contact Cooperative Education at 885-5822.

Motorcycle Club to meet

The first regular meeting of the Motorcycle Club will be held at 5 p.m. on Sept. 27, in the Student

Union Chiefs Room. Club officers will be nominated at this meeting. For more information call Ray at 885-1982.

Time to vote for royalty

It's time to vote for the 1995 Homecoming Royalty. Off campus students can fill out their ballots at the Student Advisory Services office at the UCC. Voting begins on Sept. 21 and will end Sept. 27, at 5 p.m. Go vote for your favorite candidates.

Career fair held today

Career fair, today, from 10:30-3:30 p.m. in the student Union ballroom. Don't miss this opportunity to talk with more than 45 employers. For more information contact the Cooperative Education at 885-5822 or Career Services at 885-6121.

Presentation for graduate student hopefuls

The College of Graduate Studies will hold two seminars for graduate students or students wanting to enter graduate school. The presentations will be held Sept. 27, at 3 p.m. or 7 p.m. in the silver room in the Student Union.

Topics include "Choosing the

'Right' Graduate School"; why to go, resources available to inform what schools offer which programs, how to proceed with application, GREs, and more. The second topic, "Financial Assistance for Graduate Studies," includes discussion of the kinds of support available to help students, and what individual students are likely to get.

Learn to "grow" your group

Leaders interested in learning how to make their organization "grow" should attend the "Grow and Go" presentation, sponsored by the Student Activities Leadership Resources and Residence life, Sept. 26 in the student Union silver Galena Room at 3:30 to 4:45 p.m. Call 885-2237 to reserve a place; admission is free.

Biological Honors Society holds first meeting

The Phi Sigma Biological Honors Society proudly welcomes all interested peoples to the first Fall 1995 meeting; in which, Dr. Mark DeSantis will speak about "What a Professor really does on Sabbatical." In this speech Dr. DeSantis relates his experience in Egypt and his exciting involvement in a NASA experiment. The meeting starts at 7:00 p.m. Sept. 28th in room 163 of the Life Science Building.

In-state enrollment figures up, overall numbers remain the same

Mike McNulty
Staff

More in-state freshmen than ever are coming to the University of Idaho but overall attendance figures have remained the same.

Registrar Matt Telin said 11,727 students registered this fall compared to 11,730 for the 1994 fall semester.

In-state freshman enrollment increased 7.3 percent while first year out-of-state registering students has decreased 4.8 percent said Telin.

UI officials anticipated lower

enrollment figures because the Idaho Board of Education increased the out-of-state tuition to \$7,000 per year, about \$1,000 more than last fall.

The board wanted to boost UI's tuition so it would "get up to the average of all the western schools," said Telin.

George Simmons, vice provost for academic affairs, said in the Moscow-Pullman Daily News last week, UI was working hard on recruiting in- and out-of-state students.

"The unknown factor that will

become a large factor in all of this is what the federal government decides to do with financial aid," he said. "There is the potential it will have an impact on enrollment (in 1996)."

Simmons added the UI should have an overall growth rate of 2 percent per year.

The recent tuition increases have not affected the admission of minority students to the UI. The number of Hispanic students increased 8.7 percent, and enrollment of Native American students

Greeks play hard for philanthropies

Jennifer Eng
Staff

"Thank God the sun's out."

This was Mike Peel, philanthropy chair of Kappa Sigma fraternity, commenting on Saturday as the Kappa Sigs prepared for their Powder Puff Football Tournament.

Saturday was a busy day for philanthropies on the University of Idaho campus. Kappa Sigma held their annual Power Puff Football Tournament Saturday to raise money for the Strive for Gold Women's Athletics. Also on

Saturday the men of Beta Theta Pi and Sigma Nu, along with the women of Pi Beta Phi played softball to raise money for their philanthropies.

The Kappa Sigs Powder Puff Football Tournament started at 1 p.m. with the women of Alpha Gamma Delta, Alpha Phi, Campbell Hall, Delta Delta Delta, Forney Hall, Kappa Kappa Gamma and Pi Beta Phi competing for the trophy and the first place title.

Peel said the Kappa Sigs moved their Powder Puff football game up a few hours to allow all of the

women's groups to participate in all of the events on Saturday.

The Powder Puff Football tournament even attracted spectators like Luci Durocher who for the most part don't like to watch sports. "It's interesting to watch," commented Durocher.

During the second round the women were all pumped up and for action. The Pi Phi's coach, Guy Bollock said, "We're motivated and we're ready to go."

After a full afternoon of tough football the Tri-Delts took first

Sigma Chi raises money for kids

Jennifer Eng
Staff

After 30 years the tradition of Derby Days is still going strong. This year marks the 30th anniversary of the Sigma Chi's annual Derby Days philanthropy.

The festivities began Monday for the women of the seven sororities and French Hall with the search for the Golden Derby. The Golden Derby, a new event for the University of Idaho Sigma Chi's, was found Tuesday by the women of Delta Delta Delta.

Friday night was songfest, the stupid human trick competition and the turning in of change for the loose change drive, followed by the Date-a-Sig auction. The Date-a-Sig auction lets the women on the campus place bids for a date with a Sigma Chi. Jason Grimes of Sigma Chi commented that the auction was like a real auction. "It was a lot better than last year," he said.

Saturday was a long day for the men of Sigma Chi. The day started at 10:30 a.m. when the coaches went to pick up their teams. At that time the women

from the seven sororities and French Hall turned in their banners.

The banner competition has traditionally been one of the biggest events. A banner from the Alpha Phi house from 1983 still adorns a wall in one of the Sigma Chi apartments.

After the banners are turned in the games begin! Derby Day's games entail an obstacle course, a bat spin, tug of war, pyramid races and the Sig splash. At that time, points from the day were tabulated and the winner announced. Pi Beta Phi took first place with Alpha Gamma Delta not far behind and in third place were the Alpha Phi's.

Joy Schadel of AGD's said, "It's lots of fun, we all get to work together to raise money for the Children's Miracle Network."

The Sigma Chi's ended Derby Days with a concert put on by the Bedhead's. The tickets were \$3 at the door and \$2 with two cans of food. The proceeds from Derby Days totaled almost \$1000, with all that money going towards the Children's Miracle Network and the

Aide to testify against We the People founder

Associated Press

GOLDEN, Colo.—An aide described as the “right hand man” to We the People founder Roy Schwasinger will be a key witness against him at his fraud trial this week in Jefferson County District Court.

Bruce Baird last month pleaded guilty to a charge of conspiracy to commit securities fraud in a plea agreement in which he agreed to testify against the others in the group.

He was one of 11 people, including Schwasinger, indicted in January for bilking Colorado out of at least \$385,000.

Schwasinger, national claims director Joe Mentlick and claims writers Gary Widman and Julie Willems go on trial on charges of conspiracy, securities fraud and theft. The others go on trial in November and January.

They are all part of We the People, a group that travels the country convincing people that

they have won a federal class-action lawsuit that orders the government to pay multimillion-dollar claims to all U.S. citizens.

The group charges \$300 to help individuals file claims for their share of the \$600 trillion in U.S. currency they claim a special Delta Force team collected from foreign banks.

Authorities say Schwasinger, who is serving a 15-year prison sentence for filing phony liens against public officials in Texas, launched the scheme in 1992. The scheme targeted farmers and ranchers who had lost their land to foreclosure. The group pinned its claims on a federal lawsuit that they falsely claim was won before the U.S. Supreme Court. In fact, the case was dismissed twice and never reached the nation's highest court.

Baird does not want to be connected with We the People anymore, but he still believes the group's claims are true, his attorney, Leonard

Berenato said.

“Bruce hopes that it's true,” Berenato said. “He's not sure if it is.”

Members of the group have been prosecuted in several other states. Last week 11 people were indicted by a federal jury in Iowa for alleged mail fraud, money laundering and conspiracy in connection with the claims scheme.

The indictment charges that the defendants collected more than \$2 million from nearly 7,000 people in the U.S. and Canada.

Scott Hildebrand and Mentlick, who allegedly claimed they were trustees appointed to oversee the distribution of the trillion of dollars, are named in the indictments in both Iowa and Colorado.

Schwasinger, who is representing himself in the Colorado case, is fighting the charges with constitutional arguments contending that the court has no jurisdiction over him.

Sheriff won't run again, may sue commissioners

Associated Press

GOODING, Idaho—Embattled Gooding County Sheriff Jim Jax says he will not run for re-election, and he is considering a lawsuit against county commissioners for cutting his salary by more than \$9,000.

His decision to retire when his term ends in January 1997 “has got nothing whatsoever to do with the money problems” facing his department, Jax said. But from his years of teaching and in law enforcement, “I can make more money on retirement than I can working” as sheriff for a second term.

Jax summoned his six deputies back to work Wednesday evening after laying them off Sept. 8 when his department ran out of money. The court bailiff, a jailer and a part-time civil records clerk also have returned to work.

The sheriff contends the financial crisis stemmed from a “mathematical mistake” on the part of commissioners, who did not budget enough money to cover salaries for his five jailers and the jail administrator.

A 1991 federal court order required the Gooding County sheriff's office to hire one more jailer in addition to the three already on the job.

In 1994, commissioners budgeted what they felt was enough for five jailers and a part-time administrator. But with the shift schedule, sick leave and vacation pay factored in, it wound up only being enough money to cover 4.2 staffers, Gooding County Commissioner Win Henslee said.

However, commissioners say Jax refused to talk to them about the soaring costs of his jail budget for seven months during the current

budget year. Twice they had to obtain subpoenas to ensure he would meet with commissioners about the crisis, Henslee said.

“I personally think he felt we would come in and give him more money and save the day,” Henslee said.

He said there were earlier alternatives available to Jax, such as laying off some part-time jail help, that could have prevented this month's deputy layoffs.

“He never tried to work on the problem; he never asked us for more money,” Henslee said. “You know, a little more cooperation from him and this could have been a totally different situation.”

Jax said he wants to avoid a lawsuit, but would consult with his attorney in an attempt to get commissioners to reinstate his entire salary for the coming year.

“I personally think he felt we would come in and give him more money and save the day.”
—Win Henslee
Gooding County commissioner

“I don't want the county to be charged one more penny” through a lawsuit, the sheriff said.

JUPITER • FROM PAGE 1

pull the plug on it if there is not any money.”

Atkinson's mission ends 75 minutes after it begins, however, the data analysis could go on for years.

Atkinson worked on the Galileo probe as a NASA engineer from 1980 to 1986. During this time he began working with a scientist on an experiment which would become the basis of his doctorate; which in turn would become the Doppler Wind Experiment.

Scientists from six nations are taking part in the Galileo mission. Seven to eight experiments will commence when the probe breaks

into Jupiter's atmosphere.

Atkinson said the Doppler Wind Experiment will combine the results from other Galileo experiments in order to learn more about Jupiter's atmosphere. “You can start looking at the wind profile compared to what all the other experiments are looking at,” he said. My guess is, there will be a strong correlation between the results of other experiments and the winds.”

Galileo provided the first up-close images of an asteroid in October 1991. It discovered the first confirmed asteroid moon in August

1993. In July 1994, it obtained images of 20 comet fragments crashing into Jupiter's atmosphere.

NASA's Jet Propulsion Lab provides Galileo information on the Internet. A daily Galileo status report can be found at this Internet URL: <http://www.jpl.nasa.gov:80/galileo>.

As of Sept. 22, 1995 at 12:00 p.m. EDT, Galileo is 511,194,300 miles from Earth. It is 28,265,800 miles from Jupiter and, is travelling at 15,200 mph.

Galileo has travelled 2,329,507,500 miles to date, and will reach Jupiter in 76 days.

Proposed Medicare cuts raise rural access questions

Associated Press

WASHINGTON—To Ray Stuempfle, trimming Medicare means more than forcing senior citizens to adapt their health insurance program.

Stuempfle, a retired Social Security manager in Bloomsburg, Pa., said rural hospitals could be forced to close and doctors could have to flee because so many of them depend on Medicare income.

Access to health care thus would become even more difficult for rural Pennsylvanians, some of whom already have to travel more than 50 miles to get to the nearest hospital, Stuempfle said. The trend would affect rural communities across the country.

"This affects everybody," said Stuempfle, state coordinator for health advocacy services with the American Association of Retired Persons. "No access for a senior person means no access for a younger person."

Republicans are seeking to find \$270 billion in Medicare savings over seven years. A House proposal would accomplish that through cost controls on doctors and hospitals, higher premiums for senior citizens and incentives for seniors to seek less expensive alternatives like managed-care programs.

The Medicare cuts would come on top of \$182 billion in program reductions being sought for Medicaid, the federal-state health care program for the poor, elderly and the disabled.

"The question is, 'At what point in time those cuts build to a point where it's no longer profitable to practice those services?'" said Don McCoy, director of speciality legislation and regulatory affairs with the Pennsylvania Medical Society.

On average, hospitals across the country—rural and urban alike—depend on Medicare and Medicaid reimbursements for half of their income. For a handful, the reimbursements make up 90 percent or more of revenues.

Critics of the Republican proposal say the cuts would have a more significant effect on rural communities because if one hospital had to close, the next closest one would be scores of miles away rather than a few blocks.

Rural communities also tend to have a higher share of elderly residents, who consume a large chunk of the Medicaid dollars and virtually all of Medicare spending. Pennsylvania has the nation's largest rural population and the second-highest percentage of senior citizens.

Republicans maintain rural America won't be left in the cold, although details of the proposal still haven't been announced.

Rep. William Clinger, R-Pa., who represents the most sparsely populated district in the state, said some of the pain inflicted on rural hospitals would be alleviated by GOP efforts to reduce burdensome federal regulations.

"We don't want to close a bunch of rural hospitals and have senior citizens have to travel great distances," he said. "It is a problem the speaker has recognized from the word go."

Jeff Smedsrud, executive vice president of Minnesota-based Communicating for Agriculture, a member of the conservative-leaning Coalition to Save Medicare, discounted the criticism as a scare tactic.

The Medicare debate provides an opportunity to address existing discrepancies that generally offer urban health care providers higher payments than rural

Indians open college to train people in casino management

Associated Press

BROOKS, Calif.—Steve Hunt had never played a hand of poker, never stuffed a quarter in a slot machine. But what he's into now looks like it might pay off.

These days he works at the Cache Creek Indian Bingo and Casino. He is training for a job he hopes will improve the lot of members of his tribe. He likes the odds.

Hunt is no card shark. He's here to learn the gambling business as his tribe considers whether to bet its economic future on opening a casino at its reservation on Vancouver Island, Canada.

"It's kind of funny to find myself in this situation," Hunt says. He grew up carving totem poles; now he spends his time cleaning slot machines.

"I've never gambled. I don't know how to play poker. I don't even know how to play bingo. I guess I'll learn."

He is one of a dozen Indians enrolled at Deganawidah-Quetzalcoatl University, an Indian college near Davis. They are the first class in a two-year program that offers an associate's degree with a certificate in Indian gaming studies.

A smaller program in Wisconsin has students studying on the Menominee Nation reservation.

As more tribes stake their economic future on gambling, they want Indian managers to protect their interests.

Hunt, 30, is a member of the Kwaguithl Band on Reserve Fort Rupert in Canada. A casino there could produce the millions of dollars he said his tribe needs for housing, health care, education and cultural programs.

Non-Indians make up 85 percent of the workforce at the United States' 131 Indian gaming centers and account for most of the management positions, according to the National Indian Gaming Association.

Most of the \$2.6 billion generated each year

by tribal casinos goes to large corporations that manage the enterprises.

"At some of the reservations, anywhere from 65 percent to 85 percent of the income is getting away from the Indian people and going to management companies," says DQ University's president, Francis D. Becenti.

"That needs to change. Indian people need to start controlling their own gaming. It's going to take years, because right now we don't have the expertise to manage it ourselves," he said.

From the bingo floor to the boardroom, DQ students will spend two years as interns at Cache Creek learning the ropes. They come from the Paiute, Concow, Nomalaki, Blackfoot, Kwakiutl, Tule River, Choctaw, Karuk, Shasta, Shawnee, Navajo and Hoopa tribes.

Students learn casino management from the bottom up. Hunt, for instance, started by washing windows, an experience he called "humbling."

"If you walk into a casino and see how clean it is, it's because of us," says student Nicola Larsen, 42, a tribal leader from Porterville, Calif. "We've done everything from spider webs to scraping gum."

As a gaming commissioner for the Tule River Tribe, Larsen helped develop the new Eagle Mountain Casino in Porterville.

Shawn Ray Tsosie, 19, a Navajo from New Mexico, took a break from cleaning hundreds of bingo chairs and pulled out a pen to record his experiences in a journal. All the students keep such journals.

The Cache (sounds like "cash" notes student Hunt) Creek casino, 40 miles northwest of Sacramento, draws more than 210,000 gamblers and nets \$4.5 million each year. It is operated by the small Wintun Tribe on its Rumsey Rancheria reservation.

Although the casino is remote, busloads of

Canadian concern eyes zinc mine in wild area

KETCHUM, Idaho—A Canadian-owned company is hoping to find enough zinc to establish a mine in the Boulder Mountains 15 miles north of Ketchum.

Conservationists have been pushing for years to designate that area as wilderness.

International Curator Ltd. of Vancouver, British Columbia, is concentrating on the Bear Creek drainage of the North Fork of the Big Lost River.

The mine could employ up to 500 workers, Curator Vice President Rick Bailes said.

Curator has spent \$1.5 million looking for silver, lead and zinc on its 225 claims in the area, said John Hiner, a freelance geologist working for the company.

The biggest water quality threat would be from acid mine drainage, he said. Acid is created when underground rock is brought to the surface, then exposed to oxygen and water.

The prospects of finding silver and lead are bleak, Hiner said, so the focus has narrowed

to zinc.

Curator has narrowed the focus to a steep hillside at 9,200 feet in the Bear Creek drainage. The company will continue looking until it is halted by winter weather, Hiner said.

Some residents are not so keen on a new mine, processing facilities and more truck traffic.

"We're horrified by this. It's an awful spot to put a mine," said Steve Kaiser, who lives with his wife and young son on the North Fork.

"We should be trying to protect places like this," said Lynne Stone of the Boulder-White Clouds Council, which has sought wilderness protection there since 1989. "There are so few wild places like this left anymore."

"If nothing of interest comes out of this year's program, we'll probably pull out," Bailes said. He would not rule out further exploration, but added Curator has a limited appetite for losing money.

Bravo!

Joa Harrison
Barbara Harbach takes a bow after playing Pinkham's "Concert for Harpsichord and Celestia Soli" Tuesday as part of the Tenth anniversary.

Batt takes trip with fish farmer over spring water

BOISE—A trout farm operator who has failed in attempts to build a new hatchery on the Snake River took Gov. Phil Batt on a helicopter ride while conservationists raised concerns about overturning state water standards.

Earl Hardy wants permission for a fish farm that would recirculate water from the river near Hagerman. He is suing the state Division of Environmental Quality, which denied his application to use the water in Box Canyon, the largest undeveloped spring in the Thousand Springs area.

Batt flew over the area Friday with Hardy, Republican activist William Campbell and Environmental Quality Administrator Wallace Corey.

They flew in a helicopter chartered by Hardy's Idaho Trout Processors Co. of Boise.

"It looks very bad," said Randall Morgan of Hagerman, who has been fighting Hardy's proposal for nearly 20 years. "I don't know what's

going on. I have my governor and the head of the agency that represents me in closed-doors negotiations with Hardy."

Batt said he merely accepted Campbell's invitation to fly, and he has asked to meet with conservationists to hear their side.

"This was my first involvement in it today," Batt said. "I said I would take a look at it, and I did."

The governor's four-hour trip came only one day after Environmental Quality lawyers asked for a 90-day extension in the lawsuit to negotiate a potential settlement with Hardy.

But Batt insisted he would not re-write environmental laws.

"We will not make exemptions in water quality in order to accommodate this project," he said.

Hardy plans a fish farm that would be among the largest in an area that already supports seven such farms and 80 smaller ones. He would divert 300 cubic feet per second of water from Box

Canyon Creek, run it through his farm and recirculate it into the river.

Hardy said the operation would filter out most impurities.

Nutrients from fish farms, cropland and municipal waste are strangling the middle Snake River. They promote the growth of aquatic plants and algae.

In 1993, a hearing officer recommended the state back Environmental Quality's decision to reject the fish farm.

When Hardy sued Environmental Quality, a lawsuit was brought by the Idaho Conservation League and the Hagerman Valley Citizens Alert on the agency's side.

"Why don't you want us to participate,?" league spokesman Karl Brooks asked Friday. "We've been in the case for a long time. If you want us to understand what you're doing, then involve us in the settlement negotiations. When you don't we naturally get very suspicious."

CASINO •FROM PAGE 5

gamblers find their way here to play bingo, video slot machines, poker and other games.

Since the casino opened in 1985, the Wintun people have pulled themselves off the welfare rolls and established an array of social programs.

Tribal Chairwoman Paula Lorenzo, 45, was a single mother on welfare before her tribe started the casino. But earlier this year she purchased a \$300,000 building and invested \$100,000 in its renovation as a restaurant.

All the Wintun tribal members, about 20 adults and 15 children, are self-sufficient now.

"What it gives our people at the Rumsey Rancheria is a purpose, and now we want to give

that back to the other Native Americans who want to follow in our footsteps," Lorenzo says.

Fauna Colbert, 20, of San Diego, wants to join her tribal casino on the Yavapai-Apache reservation in Arizona, or stay in California and help open one on the Wintun-Maidu reservation.

"I'm not sure a lot of Indians have the qualifications to get in really high management positions," Colbert says. "I just wanted to get my foot in the door."

National statistics show that only 12 percent of Indian adults earn more than \$7,000 a year. Unemployment averages about 55 percent among Indians, with some reservations at about

97 percent.

Indian casino revenues are just 7.5 percent of the \$34 billion generated nationwide by gaming each year, but tribal leaders say it's enough to improve the quality of life for Indians.

Yet some tribes have lost millions to consultants who bilked them out of profits. Others pay large sums to casino management companies.

"I don't know any culture that doesn't want to control their own destiny," says Glenn Siemons, who heads Cache Creek's internship program. "The best way to control it is to know your source of revenue, whatever it is, and to know that business."

Board approves trade with Utah manufacturer

Associated Press

POCATELLO, Idaho—The state Board of Education has approved a land swap involving Idaho State University and a Utah manufacturer that officials say could bring up to 400 new jobs to Pocatello in the next three years.

The board approved a deal for the school to swap 20 acres in its Research Park to Ballard Medical Products, Draper. Ballard manufactures soap, sanitary products, dispensers, tubing, syringes and other plastic items used by medical and health care professionals.

In exchange, ISU will get about 32 acres adjacent to the research park, near a school it acquired in another trade.

Ballard plans to build a manufac-

turing complex of 80,000 to 100,000 square feet with groundbreaking planned Oct. 1. Hiring will begin in June. The board was advised the company plans 150 jobs at first.

Idaho State has no immediate plans to develop the land.

"It'll be just as it has been," university spokesman Kent Tingey said. "The property's for further development and expansion."

Because the parcel that Ballard is getting is more valuable than the land the university will obtain, the school will get more land later.

Ballard reported an estimated \$85 million in sales last year and is listed on the New York Stock Exchange. It employs about 800 people at its Utah plant.

canned food going to the Moscow Food Bank.

Hilary Gruehl of Alpha Phi commented, "I was happy to participate in this event because Sigma Chi's are giving the money to such a good cause."

The first Derby Days was held on Feb. 27, 1965 as part of the Sigma Chi's Sweetheart Contest. The events of Derby Days 1965 included dressing Sigma Chi pledges up

for points. In that year Alpha Chi Omega won Derby Days.

One of the Sigma Chi coaches, Michael Van Leuven said of this year's Derby Days, "It has been a really good year so far, we raised a lot of money for a good cause. We're happy with support that all the sororities have given. Derby Days is a unique event that allows all the sororities to do something together."

Crapo opposes BPA proposal

Associated Press

IDAHO FALLS, Idaho—A U.S. congressman from Idaho didn't have to see all of the language in a proposed bill to cap the Bonneville Power Administration's costs of restoring salmon to know how he felt about it.

"I have expressed my strong opposition to the language I received," Rep. Michael Crapo, R-Idaho said Saturday as he opened a hearing on the issue.

Sens. Larry Craig and Dirk Kempthorne, R-Idaho, who like Crapo previously expressed support for the bill, also said they oppose its current version.

Sen. Mark Hatfield, R-Ore., has written the fish cap amendment and said he would attach it to the 1996 energy appropriations bill, which is scheduled to go to conference committee Wednesday.

The bill would limit the spending of Bonneville Power Administration, the federal agency that markets electricity from hydroelectric dams on the Snake and Columbia rivers, to

\$435 million annually for fish and wildlife programs.

It also included language that would have required any water taken from the Upper Snake River Valley to be purchased from willing sellers under authority of state water law.

Crapo said he opposed Hatfield's proposal because it did nothing to prevent eastern Idaho farmers from facing a 32 percent increase in electric rates for pumping.

Also at issue was Hatfield's efforts to exempt BPA from federal environmental laws.

The impetus for the cap is growing competitiveness in electric markets that is allowing private utilities to undercut BPA's historic advantage in electricity prices. BPA has cut 1,000 jobs and \$500 million from its \$2 billion budget in an effort to compete in the deregulated marketplace.

But it is saddled with an annual debt load of more than \$500 billion from nuclear reactors that were halted before completion in

the early 1980s.

The salmon recovery plan unveiled earlier this year by the National Marine Fisheries Service would have increased the cost of that program to \$565 million.

Complicating matters, several of BPA's largest customers, aluminum companies, told BPA Wednesday they would buy a third of their power supply or load from private utilities. Randy Hardy, BPA administrator, testified BPA could lose \$20 million in revenues if it signs the new contracts with aluminum companies.

But if BPA does not sign, it would lose \$120 million in revenue. It might be able to recoup some.

But it risks alienating its other customers, raising power rates throughout the region or missing a payment of its debt to the federal treasury.

Hardy will meet Wednesday with Department of Energy deputy secretary Charles Curtis to decide which course to take.

STUDENTS • FROM PAGE 3

is up 18.9 percent.

On Thursday, UI Interim President Thomas Bell and ASUI President Sean Wilson attended the state Board of Education meeting in Pocatello. Both were unavailable for comment on the meeting.

One of the topics covered at the meeting was the out-of-state tuition increases at UI said Telin. He added students should let the state know what their complaints are about school fees and tuition.

"The board is a revolving door," said Telin. "Students need to let the board know how they feel."

He said the ASUI president goes

to the meetings to represent the students' opinions, needs and demands. Telin does not anticipate tuition going down from the current rate but said if students let the board know their opinions the price may level off.

"I've never seen them reduce it," he said. "You just aren't going to hear the board say—'Tuition is just too high, we had better cut back.'"

For the second year straight, more than 10,000 people are enrolled at the Moscow campus with the remaining students registered at the university's resident instructional centers in Coeur d'

Aiense, Boise, Idaho Falls, Twin Falls and through the video outreach program.

Entering freshman at UI have an average grade point average of 3.38 and an average ACT score of 23.2, two points higher than the national average. 548 of the 1,259 freshman entering the UI from high school this fall came with a 3.5 or better GPA, and 46.7 percent of them ranked in the top 25 percent of their graduating class.

The UI class of 1995 graduated 2,020 students, compared to 1,980 degrees awarded in 1994.

Justice official: FBI's Ruby Ridge order 'clearly in error'

Associated Press
WASHINGTON—The Justice Department's former No. 2 official testified Friday that the FBI was "clearly in error" when it issued a directive that snipers should fire at armed adults at the Idaho home of white separatist Randy Weaver.
 At the same Senate hearing, the author of a Justice Department task force report on the August 1992 Ruby Ridge siege stood by the report's conclusion in June 1994 that the FBI shooting directive was unconstitutional. The Justice Department recently disputed that finding, saying it remains an open question that is part of a pending criminal investigation.
 The report's author, Barbara Berman, then assistant counsel in the department's Office of Professional Responsibility, also said she hadn't seen notes described by suspended

former FBI Deputy Director Larry Potts, which Potts said demonstrate he did not approve the improper shooting rules.
 Former Deputy Attorney General George Terwilliger said, "I do not believe" the order that preceded the FBI's killing of Weaver's wife, Vicki, "was meant to be an unlawful license to kill."
 That shooting by an FBI sniper during the 11-day Ruby Ridge siege came as Mrs. Weaver stood behind the door of the family's mountainside cabin holding her infant daughter on Aug. 22, 1992. A day earlier, the Weavers' 14-year-old son, Sam, and Deputy U.S. Marshal William Degan died in a gunfight that occurred as federal agents checked out Weaver's property in anticipation of arresting him on a weapons charge.
 Terwilliger told the Senate Judiciary subcommittee on terrorism, technology and gov-

ernment information that the language using the word "should," while not unconstitutional, was "clearly in error."
 Terwilliger said he was on vacation during the siege and that his top deputy, Jeffrey Howard, handled the Justice Department's liaison with the FBI in the operation's first days.
 Howard told The Associated Press on Thursday that he was told by Potts, who was the assistant FBI director in charge of its criminal investigative division in 1992, or Potts' top aide, Daniel Coulson, early in the siege that Sam Weaver had been shot. That conflicts with the Justice Department task force report, which found that the teen-ager's shooting wasn't known until the third day of the standoff, when his body was found.
 The subcommittee planned to call Howard to testify Tuesday about his statements to the

AP. Also expected to appear was Kevin Harris, a Weaver family friend who was wounded at Ruby Ridge and, along with Weaver, acquitted of Degan's murder in 1993.
 Sen. Dianne Feinstein, D-Calif., saying she detected a "syndrome of plausible deniability" in the testimony by Terwilliger and other former officials, told him, "What Washington seems to be saying is, 'We had no part in it.'"
 Terwilliger conceded that he bears some responsibility for what happened, but said, "This was an operational situation, and the FBI is in charge of operations."
 Berman testified she had been unable to determine who approved the unique FBI rule saying snipers "could and should" shoot at armed adult males at Ruby Ridge. There was insufficient documentation to decide whether

GREEKS • FROM PAGE 3

place with the AGD's in a close second.
 On Friday, the 48 hour softball game started with the Beta's teamed up with the Pi Phi's against the Sigma Nu's teamed up with the Delta Gamma's. Play started at 5 p.m. on Friday and ended on Sunday at 5 p.m. with 48 hours straight of softball action.
 The money raised from local businesses was split up among the teams and donated to philanthropies of their choice. The Sigma Nu's and the Delta Gamma's planned to send money to Habitat for Humanity while the Beta's and the Pi Phi's planned to send the money to the Children's Burn Awareness Fund.
 Brian Graves said, "It was neat that it's co-ed, it's not as competitive." Graves added there isn't much fighting over calls when the game is co-ed.
 Dennis Greely, from Beta Theta Pi commented, "Sometimes you win, sometimes you lose and sometimes it rains. We just want to take it one batter at a time."

There were around 250 innings over the 48 hours with a over 1000 points earned between the two teams. In the end the Sigma Nu's and Delta Gamma's beat the Beta's and the Pi Phi's 691 to 597.
 In the words of Andrew Longeteig of the Beta's, "It was 48 hours of grueling competitive softball action. A bunch of smelly women and men who gave their heart and soul for charity purposes and now my hamstrings are dysfunctional." Longeteig was one of the players that spent a lot of time on the playing field this weekend, 15 hours to be exact.

Board backs hike for higher education

Associated Press
POCATELLO, Idaho—The state Board of Education will request legislative approval of an 11.9 percent hike in funding for the universities and state college for fiscal year 1997.
 The increase represents a total higher education request of \$284.6 million from the general account.
 The state board made its move Thursday following a financial committee meeting.
 The University of Idaho's total increase in general account funds would amount to \$6.2 million, with about \$4 million going to maintenance and operations, and about \$2 million to program enhancements, including salary equity.
 It is an overall increase of 9.5 percent, not including capital projects or technology.
 The university also is asking for \$1 million to partially fund the Agricultural Biotechnology project on campus.
 Lewis-Clark State College's request amounted to a 7.69 percent increase, \$903,200 more than last year. That would boost its budget to \$13.6 million.
 The new University of Idaho president will be paid a salary of \$120,000, the board also decided. The first presidential search committee meeting is set for Monday to fill the vacancy left by Elisabeth Zinser.
 Several board members said they wanted assurance the salary would not rise above the allotted \$120,000.
 "We need to be sure the alumni association or anybody else is going to dump a bunch of money in as part of the compensation package," said state Superintendent Anne Fox.
 Board member Thomas Dillon said he would like to see some debate about the president's house in Moscow, adding the building was in poor shape.
 But the discussion ceased after Interim President Thomas Bell said he thought it was fine.
 "There are some shortcomings. There's much that could be done with it," Bell said. "It could be expanded. Certainly it could be upgraded considerably. But my honest response is, from our perspective, I'm quite comfortable with it."

Researchers say nature of e-mail invites abuse

Associated Press
SEATTLE—Why are people so prone to committing stupidity on electronic mail?
 The medium encourages it, researchers say.
 There are fewer cues for proper behavior in e-mail than in face-to-face encounters, which give people a rich social context in which to frame their comments, says Sara Kiesler, a professor of social and decision sciences at Carnegie-Mellon University in Pittsburgh.
 A company picnic, for example, will elicit different discussion than a business meeting with suits and ties.
 "All these cues about how to behave aren't present in the interface," Kiesler says. "This absence of information tends to deregulate things."
 Electronic mail has been praised as a way to even the corporate playing field. Status differences fade, inhibitions drop and creativity rises when everyone is reduced to words on a computer monitor.
 But insults and angry language also increase. Known among computer users as "flaming," the phenomenon appears related to the sense of anonymity that turns some usually polite people into epithet-hurling jerks when they drive down

the highway.
 E-mail also seems to many users like a private, fleeting form of communication, though in reality it is neither.
 Finally, the most avid computer users often are male, young and socially inexperienced.
 "The very guys who are most inclined to say stupid things are the most technically proficient," attorney Michael Patrick says. "They love to get on the computer. It's a 'let's go to the secret clubhouse' mentality."

ones, Smedsrud said.
 "Rural communities may come out better in the long run than they are right now," he said. "In the short range, I don't anticipate any catastrophic impact."
 Nevertheless, the Hospital Association of Pennsylvania has placed 54 of the state's 238 hospitals on the critical list based on their reliance on Medicare and Medicaid and past financial troubles. Together, 40,160 jobs and 348,000 patients were at stake, the group said.
 Paula Bussard, the group's vice president of policy development, said it was too early to assess the specific impact of the proposed cuts on individual hospitals. But she said the cuts could compound existing financial problems at hospitals and force a few into ruin.
 "I would expect to see some closures,"

she said. "But it doesn't happen overnight."
 Daniel Wolfberg, administrator of the Bucktail Medical Center in rural Renovo, Pa., said many hospitals may have to merge or consolidate services, forcing patients to travel greater distances for certain specialized care.
 The nearest hospital to Bucktail is 28 miles in one direction and 45 miles in the other, he said.
 In Meadville, family practitioner Robert Moyers said doctors, nurses and other medical assistants already are reluctant to come to practice in rural areas because of the economic difficulties.
 "There will be a further deterioration in the availability of health care in the rural areas if there were significant cuts," he said.

FBI •FROM PAGE 9

someone in Washington or FBI agents on the scene approved the order, Berman said.
 "We could not explain why there were no records available for us to look at," said Berman, who is now first assistant U.S. attorney in Milwaukee.
 Sen. Herbert Kohl of Wisconsin, the subcommittee's senior Democrat, asked Berman, "Is this a lawyerlike way of saying that documents were removed or updated?"
 Berman said she was unable to reach such a conclusion. She said she did not believe there was a cover-up, only a "disagreement" within the Justice Department.
 Appearing briefly, former FBI Director William Sessions told the panel he was vacationing at the time of Ruby Ridge and let top FBI aides handle the matter, while he stayed in touch by telephone.
 Potts, who is among five top FBI officials now under suspension amid a federal criminal

investigation of the destruction of some Ruby Ridge documents at FBI headquarters, testified Thursday that the Justice Department is withholding evidence that would exonerate him.
 Potts said his contemporaneous notes, showing that he gave FBI snipers permission to shoot at armed adults but never told them that they "should" do so, "are in the possession of the Department of Justice, which has refused to make them available to me or my attorney."
 "I am confident these notes will fully corroborate my testimony," Potts asserted.
 On Friday, however, Berman said she hadn't even seen the notes Potts was describing. She told the AP that she knew such notes existed, but did not know their content. She said she never received them.
 A Justice Department official said away from the hearing that release of the documents Potts wants "could endanger an ongoing investigation."

Puzzled by Banned Books?

Test your knowledge (or research skills). Work this puzzle about banned books, drop it in our entry box at the U of I Bookstore and you could win:

1st Prize Your choice of any 2 banned books in stock or a \$15 gift certificate for book purchases

Two 2nd Prizes Your choice of any banned book in stock or a \$5 gift certificate for book purchases

Winners will be chosen by random drawing from correctly completed puzzles.

Higher speed limits a mistake

Highway deaths have declined since Congress reduced the speed limit to 55 mph on American highways back in 1974, according to a story written by Arlene Levinson of the Associated Press.

Now Congress wants to change all of that progress by repealing the federal speed limit law. Both the House and the Senate hope to do that by the end of this week.

Today's annual toll of highway deaths is about 40,000—down from 54,052 in 1973, the article says. Over 14,000 lives have been saved since the speed limit was set to 55 mph. It's been proven in study after study that the lower speed limit law saves lives.

Susan Baker, a professor at Johns Hopkins University, said in the story, "When the states had to have 55 mph speed limits, the number of deaths went down. As the rural interstates raised their limits to 65, we've seen...lives being lost." Baker has studied road safety since the mid-1960s.

I don't agree with the idea of letting the states set their own speed limits. I am perfectly happy with driving 55 mph, and I am sure there other people out there who are like me. If we leave our houses earlier then we can get to our destinations on time. Hasn't that always been the case anyway? I'm sure that won't change any if the speed limits on our highways are increased.

Besides, most people do not even drive the speed limit anyway. Researchers have found that people who travel on roads with 65 mph limits usually travel between 50 mph to 75 mph. When the limit was 55 mph, people drove at speeds between 55 mph to 65 mph. According to the old adage, if it ain't broken, don't fix it. I don't think we need to fix anything.

OK, Montana and Nevada used to never have speed limits. The idea of people driving 100 mph scares the hell out of me.

I have driven speeds over 100 mph and that was frightening. I hardly had any control of my car, and I even almost side-swiped a Jaguar when I was driving that fast. This comes from a person who has never had a speeding ticket or been in a car accident before. I vow never to drive that fast when other cars are on the street again. Driving that fast almost caused me to break my perfect driving record and possibly kill myself, the friends who were in the car, and the two people in the convertible Jaguar.

One thing I'm curious about is what car insurance companies are thinking? Are they going to have to raise car insurance rates if this law is repealed? I don't want to pay higher insurance rates just because of a bunch of speed freaks want to raise speed limits.

I believe if we raise the speed limits on American highways we are going to see more accident-related deaths. It's a proven fact.

—Shelby Dopp

THE MORAL DILEMMA: WHO'S REWARD? Richard Smith, R.I.P.

The world has lost a great man. He was not a famous man, nor would he have wanted to have been. He did not aspire to be a great man; yet, he was. He was someone who inspired. He was someone anyone could look up to—and many did—and not feel ashamed to emulate.

He was a logger for most of his life, taking time out from this dangerous profession only to serve his country in the Marine Corps during the Vietnam War. But his service to his country and to his ideals did not end after his honorable discharge. He joined the American Legion and went on to become a commander for the veteran's group leading his post to numerous awards for recruiting new veterans. He fought to make sure the country did not forget the sacrifices millions of veterans have made for it.

In addition to his volunteer work for the American Legion and working in the woods 60 to 80 hours a week, Dick Smith also ran and was elected to the school board in his district in Stevensville, Mont. He cared deeply about the future of education, and he worked hard to make sure the four children he had with his wife, Becky, went to school in a district improved by his efforts.

The best thing about Dick was

his infectious enthusiasm, but it was by no means the only thing which was admirable about him. He was an indefatigable, honorable man who possessed an abundance of integrity. He embodied all that was right with tradition. He routinely paid my membership fees in the American Legion as "birthday gifts," and one time, while visiting his home in May, he asked me to participate in the American Legion's march in the Memorial Day parade in Corvallis, Mont. Here I was, a 27-year-old marching around in a yellow Legion vest with a contingent of WW II veterans who were nearly three times my age. But I was not embarrassed; I was proud: Dick Smith inspired me.

He went to baseball games to cheer on the team his Legion post sponsored. He went to football games to cheer on the team playing for the high school he helped to run.

He pushed his children to excel academically, and they did. Every single one of them went to college, and Dick Smith worked even

harder to help them all through school.

The work ethic he held, sadly, seems to be in short supply these days, but he made sure his children did not lack in it—they worked in the woods throughout their teenage years putting in as many hours as he did during the summer and working side by side with him each weekend during the school year.

I believe that perhaps Dick Smith, in spite of his untimely death, still has within him the power to inspire us all to accomplish more, to strive harder, to work longer, and to grasp on to life with both hands and not let go.

All of us have something to learn from Dick Smith—something about our world; something about passion; something about ideals; and something about giving. What is it we should learn about these things? He would have said we need to start thinking harder about what they mean to us. Dick Smith would have told us to start caring more about society and less about ourselves.

May God rest your soul, Richard Smith. You will be sorely missed.

Any man's death diminishes me, because I am involved in mankind; and therefore never send to know for whom the bell tolls; it tolls for thee. —John Donne

Russ Wright

Senators wise to resign positions in light of time conflicts

Usually, the only time politicians see their names in the paper is when their names are connected with bad news. I'll admit that when it comes to politics, most of us would rather read about some Packwood-esque scandal than hear Warm Fuzzy Stories about any elected official, including such important positions as dog catcher, mortician, and ASUI senator.

This past month, three ASUI senators have had their names in the paper; each one of them for the same reason. Scott Wimer, Clint Cook, and most recently Allison Touchstone have resigned their positions in the senate due to academic and business pursuits that were eating up their free time.

Personally, I don't blame them, and really no one can. If I had a job offer from a professional newspaper, or more promising pursuits in the wings, I'd drop the Argonaut like a hot rock and never look back. These three senators,

Brian Davidson

with their academic schedules and future business opportunities were completely justified in resigning their posts, and frankly, I'm glad they did.

This does not mean, by any means, I think them incompetent or worthless as politicians. To the contrary, I feel they wisely judged their priorities, weighed their futures against the present and made decisions which are best for all involved. Since—the last time I looked—being an ASUI Senator is neither a life-long pursuit nor a financially advantageous one, these three senators have made decisions which will further their educations and their future prospects.

In addition, they realized, rightly, the limits they were being forced to put on their time to dedicate to the ASUI meaning us, the student body—was causing, or would soon cause, a situation wherein the dwindling amounts of time they could allocate to senatorial duties would act more as a detriment than a benefit to the living groups they were representing. Some may say they chose what was best for them, but in reality they chose what is best for us all.

A choosing of a different sort is taking place as you read this column. Three vacancies in the senate mean three new senators must be chosen. There are also other positions which need to be filled. They will be chosen, as the case usually is during non-election season, by appointment through ASUI President Sean Wilson. He and his panel should choose wisely and perhaps take into consideration some of the following points:

- Off-campus living groups

seem to be poorly represented in the senate as the recent tailgate party proved.

As noted by Dennis Sasse in the Argonaut of Sept. 19, prizes were offered to the living group with the most bodies in attendance at the party. Off-campus students were shut out of the competition either through lack of organization on their part, or through lack of recognition on the part of those in charge of the party, namely the ASUI.

• Three senators have resigned this year due to time restraints, so it would appear logical to select those students most willing to dedicate all the time necessary, and even more, to their senatorial duties. Those who wish to become senators ought to realize the scope of the responsibility before they jump into it.

• Those chosen to fill the empty senate seats should display a willingness to actually speak to their constituents about those issues being debated in session. The key

to decreasing student apathy in regards to student politics lies in better informing students of the issues and debates occurring in the senate and how their outcomes will affect them.

• The majority of students here are full-time students and should thusly be represented in the senate. Working as a senator should in no way interfere with the real purpose of a higher education: graduating, receiving a diploma and moving on into the world. As nice as it is, the ASUI senate is not the best and ultimate source for a full-time job.

It is the responsibility of the senate to wisely represent the student body in both decision making and expenditures.

Fighting student apathy is not easy, but could be aided through more efficient communication through the student media of upcoming debates and decisions facing the senate.

President Wilson, choose those who are ready to represent.

Letters to the Editor

Fetus a part of the woman's tissue

I am responding to Anna Geidl's Sept. 15 critique of my article which briefly states that those who love women will not make female bodies, in part or whole, a public property.

First, a fetus is in a placenta in a uterus in a woman.

Saying a fetus is not in a placenta is analogous to saying a ball wrapped twice is in the outer wrapper instead of the inner one.

Second, a batch of cellular matter can and is referenced as tissue(s). Humans are comprised of various tissues. Skin is one of them.

Next Geidl notes that a child has a heart beat. So since every healthy human's thumbs have a heart beat, thumbs must be independent living creatures? Not this century.

Irrelevant of the appearance at any point in time of a fetus, so long as that fetus is tissue-wise connected to another, it is a part of that other which just so happens to be a woman.

Also, Geidl made the analogy that a fetus in a woman is like a person in a room. Bad analogy, the better one would be a wart on a woman: The DNA of the wart differs from that of the woman while that wart remains tissue-wise connected to the woman. Think about it.

Women have the right to remove warts and reconstruct their bodies with cosmetic surgery; why restrict their right to lop off excessive tissues in their uterus? Would you ever want someone dictating what you can do with your most valuable possession—yourself?

—Jesse Grune

Proposition One self-contradictory

On Sept. 15, Damon Darakjy promoted Proposition One, a self-contradicting writ. According to Darakjy, Proposition One states the following:

1. The state will not act in ways biased towards any given sexual orientation.

2. Homosexual marriages will never be sanctioned.
3. Tax dollars will not be spent on promoting homosexual behavior.
4. Homosexual behavior will not be promoted in public schools.

Because of (1), unwritten laws become observable by the state as a result of the existence of (2), (3), and (4). For example, due to (1), (2) implies that the state will not sanction marriages between any two people. Similarly due to (1), (3) and (4) imply that tax dollars will not be spent to promote any sexual orientation. That is impossible since then the state would be promoting asexuality which then goes against (1).

It seems that those who want Proposition One want the following:
A. No new marriages to take place in Idaho
B. An unbiased sex-ed program—a program which accounts for each sexual orientation.

For those of you who plan on getting married in Idaho, Proposition One will disallow you to do so. As such, it is in your best interest to vote against Proposition One.

Also, for conservatives who don't want your children learning about all sexual orientations in their sex-ed program implicitly mandated by Proposition One, please vote against Proposition One.

—Jesse Grune

Thanks for the improvements

If you are one of the nearly 4,000 students or 9,000-plus other individuals who attended and enjoyed the home football opener in the Kibbie ASUI Activity Center, I trust you enjoyed the improvements made to the dome. The differences in lighting levels and sound quality is fantastic, and the new graphic display scoreboard is a tremendous addition to the dome and the events it hosts.

Completing installation of these improvements in time for the game was a huge task, and it was accomplished by in-house, university personnel. University Events, under the direction of Dan Schoenberg and Terry

Evans, worked with the Facilities Management Electric Shop, led by Mark Labolle, to complete these improvements.

The job was large in both complexity and scope. Professional consultants worked with the university to design these systems were extremely pessimistic that university personnel could complete the installation in the time available, but crews put in long hours under a restrictive schedule. They responded admirably.

So, if you enjoyed all of the improvements, please help me in saying, "Thanks" to Dan, Terry, Mark and their crews. If you know someone who works in University Events or in the Electric Shop, let them know that you appreciated the results of their effort.

—Raymond Pankopf

Architectural & Engineering Services

Campus not the place for bikes

The other day, while driving my truck around on campus, I witnessed a horrible accident. I saw a student riding his bike down the big hill on campus heading past the Delta Gamma sorority house going home. Although I feel cyclists should not be allowed to ride on campus, that's beside the point.

Anyway, a fellow car driver pulled out of the alley behind the ATO house, completely unaware of the cyclist. The next thing you know, the bicyclist ran right over her! Thank God, she was okay, but I can't say the same for her car. The entire side was dented and smashed from where the bicyclist's head and arms had hit it.

To make sure that justice was done, Officer James Fry of the Moscow Police Department showed up. Officer Fry took statements from other bike-fearing people such as myself, and although he wasn't there to witness the acci-

dent, Officer Fry came to the conclusion that the cyclist was "going too fast for the conditions present (the condition was a HILL), so he cited him for failure to use "due care." The cyclist was cited even though the oncoming car has the burden of yielding to oncoming traffic; the campus needs to be a safe place for people—such as myself—to drive our cars and trucks.

I just want to take this moment to thank Officer Fry for not citing the driver of the car for "due care," for that would send a very ignorant message to the student body. The campus needs to be safe for us to drive our cars while looking for a parking place or just cruising and listening to loud music. My only hope is that this incident will warn other bicyclists, skateboarders, rollerbladers—or even pedestrians—that campus is not the place for these alternative forms of both exercise and transportation.

—Nors Davidson

Moscow Mountain not a safe place for guns

As hunting season approaches, sport shooters are thinking about sighting in their rifles and guns. Moscow Mountain may seem like a logical place to go; however, it is busier than it may seem.

We've encountered and heard about several parties shooting across or along intersections, roads and trails. All roads and many trails on the mountain are used regularly by hikers, mountain bikers, climbers, horse riders, runners, motorcyclists and others and should be considered off limits for shooting.

Moscow Mountain is a great outdoor resource for our community; let's keep it safe for all users. To risk a cliché, be aware... shoot with care! Don't shoot on a road or a trail.

—Anne Black

Argonaut Letters Policy

The Argonaut welcomes reader letters. They must be one page or less typed, double spaced. Letters must be signed and include the phone number and address of each writer. Letters may also be submitted by e-mail to argonaut@uidaho.edu or by fax to (208) 885-2222. The Argonaut reserves the right to refuse or edit letters. Multiple letters with the same position on a topic may be represented by one letter.

CAREER FAIR TODAY SEPTEMBER

Here are excerpts of editorials from publications in various countries:

The Financial Times, London, on U.S.-Russian relations:

Immediate damage to U.S.-Russian relations as a result of NATO's air attacks on Bosnian Serb targets appears to be less serious than the initial, angry outbursts from President Boris Yeltsin suggested. The businesslike atmosphere at (the Sept. 15) meeting in Geneva of the "contact group" would suggest that for all its sound and fury, Moscow remains willing to cooperate with the West in the search for a settlement in former Yugoslavia.

Whatever happens on this front, it is a safe bet that difficulties lie ahead. From arms control to NATO expansion to oil and gas flows, the relationship between Moscow and Washington is strained.

The reasons for this gloomy prognosis have as much to do with psychology as with any clash of interests. A feeling of resentment toward the West has informed Russia's furious response to the NATO bombing, and prompted its bizarre use of the word "genocidal" to describe a military action which has been far more careful of civilian life than Moscow's onslaught in Chechnya.

Frankfurter Allgemeine Zeitung, Frankfurt, Germany, on Bosnia:

The contact group plan—developed in Geneva when the foreign ministers of Bosnia-Herzegovina, Croatia and the

"Yugoslavian Republic" (Serbia and Montenegro) met for the first time in almost one and a half years—was based on an intention to preserve the state of Bosnia-Herzegovina, as well as its territorial divisions.

When the leaders paradoxically came to an understanding of principles, they annexed the Muslim areas in east Bosnia to the Croatian-Bosnian federation, but annexed the Serb territories in west Bosnia to the Serbs.

But now there is hardly a Serb in all of west Bosnia—and in east Bosnia, except for the enclave in Gorazde, there is not a Bosnian.

The peace efforts of the government community now stand to begin anew. The formula of 51 to 49 percent, as well as the contact group plan's map, have tried to calculate ethnic conditions and military strength since the summer of 1994. These methods will not withstand the developments of today.

The plan is yesterday's solution to the question of legitimate peace for Bosnia, which, as of today, has not been answered.

Aftonbladet, Stockholm, Sweden, on Bosnia:

The U.N. mission in Bosnia is drawing to an end. The secretary-general has suggested to the Security Council that it's time for "regional organizations" to take over the peace process.

The U.N. gives up at the same time as Croatian and Bosnian troops advance in former Serb villages and cities in Bosnia, creating a new map.

NATO's air strikes have facilitated the offensive and among the Serbs a new myth about being a persecuted people is developing. That picture, true or not, does not facilitate future coexistence.

The difficult question about how the Croats and Muslims should divide the power between them in their Bosnian federation after they've forced the Serbs to retreat has not yet been dealt with.

NATO, in reality (the United States), took over the leading role when the U.N. proved unable to accomplish its mission. But why has the U.N. been so powerless? Because (the United States) has insisted on going its own way. In Somalia, the U.N. was left in the lurch, in Haiti the U.N. abided by (the United

States') initiatives. In Bosnia, (the United States) refused to deploy ground troops under the U.N. command.

The Oregonian, Portland, Oregon, on Colin Powell:

When retired Gen. Colin Powell starts expressing his views on issues, he may be giving the active Republican presidential candidates something to think about.

Could the popular former chairman of the Joint Chiefs of Staff rally the Republican Party's moderate wing, as another military man, Dwight Eisenhower, did against conservative Sen. Robert Taft in 1952?

Powell, who's enjoyed popularity without ever committing himself on issues, advanced the question with an ABC News "20/20" program interview (recently).

On abortion, he believes the decision is up to the woman. On gun control, he believes in the right to bear arms but doesn't oppose restrictions to ensure that guns are owned by responsible citizens. He favors the death penalty, see benefits in affirmative action but not quotas, and opposes mandatory school prayer but not a voluntary moment of silence.

Such views reflect a general mainstream position, one at odds with the GOP's conservative wing but likely to resonate with the political center. Indeed, conservative Republicans might well wonder if Powell doesn't belong in the Democratic Party.

Whether Powell could rally the Republicans' moderate wing depends in part on whether there is a moderate wing of any significant size left, and on more samples of his thinking. A serious candidate needs to go much deeper into the nation's controversies than Powell has had to do.

The Australian, Sydney, Australia, on the U.N. women's conference:

The United Nations' Fourth World Conference on Women was a qualified success. The major achievement was to craft, for the first time in a U.N. document, a consensual definition of women's sexual rights.

Delegates from more than 180 nations accepted that "the human rights of women include the right to have control over and decide freely and responsibly on matters related to their sexuality, including sexual

and reproductive health, free of coercion, discrimination and violence."

This is a blueprint for activists setting out to win over constituents and national governments to universal ideas for the advancement of women. That is where the real value of the Beijing conference will be determined.

The conference was never going to be a harbinger of sweeping reforms to lift the status of women—especially women outside the liberal industrialized nations. The U.N.'s role is to attempt a convergence of understanding about the different social, cultural and religious values that shape the world's societies.

Dernieres Nouvelles d'Alsace, Sarrebourg, France, on Yugoslavia:

Most extreme caution is called for in ex-Yugoslavia, as it should be also when considering the enlargement of NATO in central and eastern Europe, on the eve of Russian elections, at a time when nationalism and archaic habits surface.

This is not backpedaling, but realism. One does not dunk the head of an enemy about to drown himself if one knows one must carry on living with him.

That is why what applies to the Balkans should also be applied to unpredictable Russia. Europe's interest does not lie in the construction of a new "wall," which would surely trip up NATO expansion. Nor does it lie in a Serbian state in Bosnia being reduced to the smallest share, in light of new tensions.

Already in 1920, after Versailles, a British diplomat wrote, "we have succeeded in balkanizing Europe when we wanted to europeanize the Balkans."

We risk making the same mistake again—on the scale of ex-Yugoslavia and on that of the entire continent.

OUTDOOR TIP OF THE WEEK:

When buying a pair of hiking boots you need to take into consideration what you will be using them for. If you plan on just kicking around campus in them, Merrell or Hi-Tec boots with nylon uppers will do fine. If you are a serious hiker, you need to look into a boot that is more substantial and can take a beating. Look for all leather uppers and a good sole that will provide shock absorption. When carrying a loaded pack you feet take a real beating. Gore-Tex looks good on a tag attached to the side of the boot but you might want to consider getting a pair of separate Gore-Tex socks instead, as the material works best when able to breathe, not when laminated to leather. Check to be sure they are rated as water resistant but you will have to use NikWax or another waterproofer to ensure minimal leakage. Above all, the boots need to be comfortable and when trying them on bring a pair of wool socks to be sure they will fit with the socks you normally hike in. Check the boot's rating to see how many days it is recommended for, such as a 3-4 day trip or an extended trip. ASOLO, One Sport, and Vasque are reliable brands to look for.

BASIC ROCKCLIMBING II

A one day trip, plus one class session, Basic Rock II course is being offered by the University of Idaho Outdoor Program. The class session will be this Thursday at 7 p.m. at the UI Outdoor Program office in the basement of the Student Union. The day trip will be this Saturday and participants will go to a local climbing area to practice belay techniques and maneuvers. The fee is \$20 and sign-up are currently under way at the UI Outdoor Program office.

MUSHROOMING CLASS

For \$14 you too can learn all about Northwest mushrooms in the Fall Mushrooms class Sept. 30, offered by the University of Idaho College of Forestry, Wildlife and Range Sciences' Clark Fork Field Campus. Explore the woods with Edmund Tylutki, UI professor emeritus, an expert in mushroom classification and ecology. Participants should wear hiking clothes, a sack lunch, waxed paper and a basket or several paper bags for collecting mushrooms. A hand magnifying glass, a compass and rain gear might be useful also. Registration deadline is Sept. 27 and class size is limited. For more information call the Clark Fork Field Campus at (208) 266-1452.

WILDERNESS ISSUES COLLOQUIUM

This Thursday Greg Smith, a Bozeman area educator, naturalist and Glacier National Park ranger, will present "The Wolf: a biological look at a political species." This is a 60 minute multi-media slide show focusing on the Rocky Mountain grey wolf. The program begins at 7 p.m. and will be held in room 10 of the college of forestry, Wildlife, and Range Sciences here at UI.

Survival kit can save a life

Jerri Lake

Staff

This time of year it is very difficult for me to keep my mind on school work. My thoughts drift from class assignments to getting ready for hunting season. The general deer and elk season in Idaho opens Oct. 10. This triggers my thoughts to reviewing hunting maps, locating and checking my equipment, and planning where I will be hunting.

The excitement of preparing for the hunt can sometimes be as exciting as the trip itself. Dreaming of the chance to get a large antlered deer or elk gets my adrenalin running. Even getting a doe or cow is exciting. While studying area maps, I learn about the area I intend to hunt. The more I understand the area, the better the chance of harvesting an animal.

Before you venture into an area, get a forest service map and a topographic map. Shown on the forest service map will be private property, national forest land and campgrounds. Topographic maps will show you how steep the mountains are. When you combine the information of the two maps, your knowledge of an area increases your chances of a good time.

The most obvious item to get ready is your rifle. Some hunters do not take the time to check their sights from one year to the next. They believe it's OK now because it was OK last year. Take the time to shoot it to verify the sights are accurate.

As stupid as it sounds, make sure you have a hunting knife and sharpening stone. Occasionally, I encounter another hunter who has forgotten his knife. It is very difficult to clean a rabbit, much less a deer or elk without a knife. Make sure the knife is sharp and is easy to resharpen in the field. A dull knife is a weapon against you rather than a tool for you. A sharp knife cuts easily through hide and muscle instead of having to be pushed or pulled through, thus increasing the chance of an accident from a slip.

While jeans may be in style at school, they are not good under fall or winter hunting conditions. The cotton, when wet, will wick heat from your body. This can increase your chance of hypothermia—which is the lowering of your body temperature. If you can afford it, wool is best because it can keep you warm even when completely soaked.

The wide variety of gloves available gives you lots of styles to choose from. Ski gloves are bulky and have to be removed before shooting. Wool gloves are less bulky and can help keep your hands warm, even when wet. Mittens will keep your hands warmer than gloves because they do not separate your fingers. Several varieties of gloves and mittens are lined with an

Jerri Lake

A basic survival and first aid kit can be small, light and save your life.

insulator to help keep you warm. This lining, when it gets wet, takes a long time to dry. I prefer an unlined wool fingerless glove with a removable mitten top. This glove keeps my hands warm and allows me to remove the mitten top quickly when I want to shoot.

Many hunters go to the field in tennis shoes. For some areas they may be all right, but for hunting in rugged areas around here, consider getting a boot which will give you some ankle support. Also, wear a good cushioned sock to help prevent blisters.

A fanny pack or day pack, like you carry your books in, is good to have. You can carry the extra gear you might want, lunch or a place to stash the clothes you shed on a warm afternoon.

I recommend carrying two kinds of hats. A knit one for the early and late cold times, and a billed type for after the sun shines into your eyes.

Make sure your sleeping bag or blankets will

keep you warm enough for this area's weather. During the fall and winter, night temperature can drop to 30 below zero in some canyons. I have been in some areas where it was 20 below at 11 a.m.

Another item to take is a first aid/survival kit. It only needs a few basic items in it, and can be small and lightweight. The basic kit should contain: band-aids, medicated ointment, adhesive tape, tweezers, aspirin or non-aspirin substitute, needle/thread, safety pins, small pocket knife, waterproof matches, an alternate fire starting source, compass, small mirror, space blanket, any personal medication, at least 25 feet of nylon cord or string and 10 feet of cotton string or six inches of hemp rope. All of this can be kept in a waterproof container the size of a sandwich keeper except the space blanket and nylon cord. I put the space blanket outside the container, then wrap cord around both.

HyperSpud grows from hobby

John Crock shows off some climbing gear.

Jared Smith

Erik Marone

Staff

It was a winter not too long ago that found John Crock wanting a job. So, he decided to forget about scanning the classifieds and filling out job applications and started his own climbing and mountaineering supply business. Six years later, the biochemistry grad student still operates HyperSpud Sports out of his home just outside Moscow.

"I had a couple of ropes, a few pairs of rock climbing shoes, a couple of harnesses, and it's just snowballed from there." Crock says of HyperSpud's beginnings. Today he carries a full line of climbing gear as well as backpacks, sleeping bags and tents.

Crock maintains a pretty tight inventory in order to keep his prices low. "I try to be pretty efficient about what I'm buying," says Crock. "I'm a pretty active climber myself, so I usually know what equipment is good and what's not so good, so I don't get stuck with things. That way I can sell things for a pretty good price." He says someone can usually get

set up with basic climbing gear like a harness, shoes and safety equipment for around \$150. "It's sort of expensive, but on the other hand, it's one of the cheaper out-

“
If you look at other sports like biking or skiing, there's hundreds of dollars in equipment.
”

—John Crock
HyperSpud owner

door sports." Crock says. "If you look at other sports like biking or skiing, there's hundreds of dollars in equipment. Climbing is actually one of the cheaper sports, you can get away with a couple hundred dollars invested."

Sea kayaking on the Baja Peninsula

In preparation for the Baja Sea Kayak trip this Christmas Break, the University of Idaho Outdoor Program is offering some instructional classes.

Introduction to Kayak is being offered this Wednesday at the UI Swim Center at 7 p.m. Participants will learn how to Eskimo roll, proper safety procedures and basic maneuvers. The cost is \$15 and includes equipment, instruction and the pool fee. Sign-up at the Outdoor Program office.

A Sea Kayak Instructional Trip is being offered Oct. 6-8 at Pot Holes. Participants will travel to Central Washington and learn beginning techniques including how to plan for an extended trip, pack a kayak safely and navigate in open water. This is a good starting point for sea adventures. The cost is \$25 which includes transportation and instruction. Kayaks can be rented from the Outdoor Rental Center in the basement of the Student Union. Sign-up with the UI Outdoor Program, down the hall from the Rental Center.

Huff'n Puff'n Fun Run

The 12th Annual Huff'n Puff'n Fun Run is getting closer. Oct. 7 is race day with a starting time of 10 a.m. but registration begins at 9 a.m. There will be a km and 10km run and walk. If you wait and register the day of the race the cost is \$14 but if you pre-register before Sept. 29, the cost is only \$12. A t-shirt is included in the cost of registration. If you don't want the t-shirt, the cost to participate is \$4. The race will start and finish at Eggan Youth Center at 1515 East D St. in Moscow. You can register at Moscow Parks and Recreation, 883-7085 or Campus Recreation, 885-6381.

Mountain Bike Trails Clean-up Day

The Moscow Area Mountain Bike Association is sponsoring a trail clean-up day this Saturday on Moscow Mountain. Participants will help do general trail maintenance such as building water bars and cleaning brush. If you decide to help, meet at Mountain View Park at 9 a.m. and bring a daypack,

lunch, water and your bike in case you decide to do some riding. This is a good opportunity to give back to the mountain what you may have taken this summer and fall, plus it is a great way to get information on trails you might not know about. For more information, call Jim LaFortune at 882-9366.

Brown Bag Adventure Slide Shows

Washington State University is hosting two brown bag adventure slide shows in the next two weeks. The first presentation will be by Ravi Miro Fry and is titled "Weight loss through fasting and dysentery ...or, a bicycle tour of India and Bangladesh" at the CUB Gridiron Room at 12:10 p.m. on Sept. 27. Jim States, M. D., is presenting "The Climb...Lessons Learned From Our Neighbors In a Developing Country," on Oct. 6 at 12:10 p.m. in the CUB Gridiron Room. Dr. States is from Spokane and will be showing slides of his 1992 Makalu expedition. Bring a lunch and enjoy slides and stories from these two adventurers.

Mountaineering Medicine Clinic

Jim States, M. D., is teaching a Mountaineering Medicine Clinic at Washington State University on Oct. 6 following the Brown Bag Adventure Slide Show at 12:10 p.m. in the Washington State University CUB Gridiron Room. Admission is free and Dr. States will be giving practical suggestions for the prevention of cold injury, high altitude illness and exhaustion. He has been on some of the world's highest peaks, including Everest, and is an expert in the field of cold weather medicine.

HUNTING •FROM PAGE 14

total package weighs very little, and can save a life.

During my 39 years of outdoor living, I have used my first aid/survival kit at least once per year, usually using tweezers to remove splinters or the medicated ointment and band-aids for small cuts or scratches.

While trapped in fog or a snow blizzard, I have built a fire using matches and cotton cord or hemp rope for tinder. This allowed me to warm up and dry out.

The nylon cord or twine and knife can be used to build emergency shelters. Adhesive tape can be used to close larger cuts from an accidental fall.

All of the basic items in your kit will not do you much good if you do not know how to use them. Practice using the items, especially the fire building materials. When you are cold and shaking is not the time to learn.

If you have a scope on your rifle, please do not use it for a spotting scope. Use a pair of binoculars instead. It makes me very nervous to look through my binoculars to see someone pointing their rifle at me.

Knowing your equipment is complete, in good working condition, and knowing how to use it will help make your trip more enjoyable.

HYPERSPUD •FROM PAGE 14

With rock climbing season winding down, some people may be interested in ice climbing during the winter. "There's not a lot of people who do that, I read somewhere that only 10,000 people in the United States climb frozen waterfalls." Crock says. "It's kind of a fringe sport, I guess. It's actually kind of miserable. But it's pretty fun to be on a beautiful blue waterfall."

Ice climbing is also fairly gear intensive. A climber can expect to spend several hundred dollars in ice gear like crampons, ice axes, ice screws and rubber climbing shoes. There are very few places in the area that offer a chance for ice climbing as well. There is a 30-40 foot waterfall by Palouse, but the most available climb is rather surprising. "The very best place is actually Finch's Grocery Store in Pullman. They don't seem to care, they haven't come out and told me not to do it." Crock reveals. "They have a big rock wall in the back of the parking lot that leaks water and the entire thing freezes. It's about 150 feet long and 20 feet high with fenceposts at the top to anchor your rope to. You just have to watch for cars, nobody wants a big chunk of ice falling down on their hood; but it's pretty big, it's usually not problem."

Someday John may move out of his house, but for now, he's happy where he is. "Then if sort of turns into a real job, and I'm not sure I want it to be a real job yet. It works pretty good right now."

HyperSpud Sports can be found just off of East Palouse River Drive and is open Tuesday evenings from six to midnight, but you may find John at home other evenings. "You can call me. If I'm here, you're welcome to come over." You can contact HyperSpud Sports at 883-1150.

PRINCIPLES of SOUND RETIREMENT INVESTING

**RECENTLY,
MORNINGSTAR CALLED
US CHEAP.
IT'S NOT EVERY DAY
YOU GET A COMPLIMENT
LIKE THAT.**

All financial companies charge operating fees and expenses — some more than others. Of course, the lower the expenses you pay, the better. That way more of your money goes where it should — towards building a comfortable future.

We make low expenses a high priority.

Because of our size and our exclusive focus on serving the needs of educational and research communities, TIAA-CREF's costs are among the lowest in the insurance and mutual funds industries.¹

In fact, Morningstar, Inc. — one of the nation's leading sources of variable annuity and mutual fund information — says, "Size isn't a constraint; it... enables CREF to realize a remarkable economy of scale."² According to Morningstar's data, CREF's "minuscule" 0.31% average fund expense charge was less than half that charged by comparable funds.³

TIAA's traditional annuity also charges no fees

aside from a very modest operating expense of 1/4 of 1% of annuity assets. Interest and dividends are reported after all operating costs have been deducted. Standard & Poor's calls TIAA's costs "exceptionally low."⁴

Of course, expenses are only one factor to consider when you make an investment decision. While we're committed to keeping our expenses down, we spare nothing in trying to provide top-quality investment choices, financial expertise, and personal service. Because that can make a difference in the long run, too.

TIAA-CREF seeks performance, not profit.

At TIAA-CREF, we believe people would like to spend more on retirement, not on their retirement company. If you'd like to see how our approach can help keep more of your money working for you, call us at 1 800 842-2776 (8 a.m. to 11 p.m. ET, weekdays). We'd consider it a compliment.

Ensuring the future for those who shape it.SM

1. Standard & Poor's Insurance Rating Analysis, 1995; Lipper Analytical Services, Inc., Lipper-Director's Analytical Data, 1995 (Quarterly). 2. Source: Morningstar, Variable Annuities/Life/12/95. 3. Of the 2,358 variable annuity funds tracked by Morningstar, the average fund has annual expenses of 0.78% plus an insurance expense of 1.24%. Source: Morningstar, Inc., for periods ending July 31, 1995. 4. Standard & Poor's Insurance Rating Analysis, 1995.

TIAA-CREF expenses are subject to change and are not guaranteed for the future. CREF is a variable annuity and its returns are not guaranteed. The value of your investment can go up or down, no matter what expense levels are. CREF certificates are distributed by TIAA-CREF Individual and Institutional Services. For more complete information, including charges and expenses, call 1 800 842-2773, extension 5509, for a prospectus. Read the prospectus carefully before you invest or send money. Date of first use: 7/95.

Vandals open Big Sky action in style

Jared Smith

Idaho's Beth Craig (5) and Jessica Moore (10) go up for a block Friday night against Idaho State. The Vandals swept the Bengals in the Big Sky opener for both teams.

Dan Eckles
Sports Editor

The Idaho Vandals took their brooms out of the closet over the weekend, but it wasn't to go for a ride. Idaho wanted to do some sweeping and that's just what it did shutting out in-state rivals Idaho State and Boise State over the weekend.

Idaho opponents probably think there's something supernatural casting spells over their volleyball skills when they walk into the Vandals Memorial Gym home dubbed the House of Death during UI's current 38-match home winning streak. Both the Bengals and Broncos came to Moscow after solid non-conference performances, but left beaten and battered.

• Idaho def. Idaho State 15-7, 15-9, 15-9

The Bengals looked to challenge early, taking a 5-2 lead in game one, but watched the Vandals retaliate with a 9-0 run to grab an 11-5 lead and coast to the first game win. Idaho had 20 kills and just three errors in the first set.

In game two, Idaho State kept pace for a while, knotting the score 7-7 apiece, but Idaho again turned the jets, outscoring the Pocatello 8-2 the rest of the way. ISU helped the Vandal cause in the second game by committing 13 hitting errors and hitting just .026 in the tie.

Idaho punished its cross-state counterpart throughout the match, hitting the ISU crew .359 to .118 the three games. No ISU player collected more than nine kills and top ISU hitter, percentage wise, setter Courtney Davis with only

nine attempts.

In addition to their hitting woes, the Bengals dug only 23 balls compared to Idaho's 43 and got out-blocked 13-2.

Kathy Goods came into the weekend playing well throughout the pre-season for the Bengals, but was virtually shut down Friday night. The ISU senior totaled only seven kills and two digs while making six hitting errors.

"We did a good job with our intensity, but we expect that. If we are going to be a contender in this league, that's the way we have to play," Idaho coach Tom Hilbert said. "We also did a good job on Kathy Goods, which technically was what we wanted to do."

Idaho was led by the play of senior outside hitter Lina Yanchulova, who contributed a team-high 17 kills. Freshman Beth Craig chipped in 14 kills to the victorious effort.

• Idaho def. Boise State 15-7, 15-5, 15-4

The Vandals started slow once again, falling behind 4-0 to the Broncos in the initial set, but went on a 14-2 run and cruised to the win.

Boise State was never in the match after that as they watched the Vandals jump out to a 10-2 edge in the second game a 10-0 advantage in game three.

"We didn't let these guys string points together," Hilbert said. "We're hitting good shots and playing good defense along with siding out well. I was happy with the pace we scored points."

The freshman Craig came up big again Saturday for the UI squad, posting a team-high 15 kills against only two errors. Red-shirt freshman Jessica Moore continued her solid play in the middle, pounding 11 kills, committing only two errors and collecting three blocks. Yanchulova also had 14 kills and 18 digs Saturday.

The Broncos managed just a .080 hitting performance against the Vandals as Idaho dug more than half of the BSU hit attempts with 63. BSU also made 20 hitting errors to assist UI's winning ways.

• Idaho's 38-match home win streak is the sixth longest in history among Division-1 schools and is the longest current streak in the nation.

Next on the list is Penn State, which won 42 straight matches at home from 1989 to 1991. If Idaho continues its current pace it could move into fifth place with a win over Northern Arizona on Nov. 3.

"I can tell you this. I wouldn't want to play us at home," Hilbert said. "If I had to line my team up against us with the crowd against us we'd be in trouble."

• Idaho is 17th in the country in home attendance with an average of 815 fans in seven matches. Fans helped that number after 1,113 UI faithful showed up Friday and 1,359 cheered the Vandals on to victory Saturday.

Big Sky Conference Standings

	W	L	Team Pct.	Overall	
				W	L
Idaho	2	0	1.000	12	2
Northern Arizona	2	0	1.000	6	4
Montana State	1	1	.500	12	2
Weber State	1	1	.500	10	3
Boise State	1	1	.500	10	4
Idaho State	1	1	.500	8	4
Montana	0	2	.000	6	8
Eastern Washington	0	2	.000	3	10

Jared Smith

The Idaho defense was relentless against the Bengals, outdigging ISU 43-23 in the triumphant effort.

Craig steps into starting role for Idaho

Damon Barkdull

Staff

Around college campuses, freshmen are often referred to as pukers, newcomers, followers and low-lives. Negativity usually surrounds these naive wanderers with no real purpose but to get drunk and hope to fit in with somebody.

Not so, if you're inquiring about starting University of Idaho volleyball player Beth Craig.

This shy middle-blocker out of Milpitas, Calif., is the first freshmen to start for Vandal coach Tom Hilbert since the 1991 season.

Craig comes from a strong high school conference in Northern California and was named the Most Valuable Player for Milpitas High School as well as being named All-League first team.

"I had a good coach. We played in a really good conference, so I played against a lot of girls who are at Stanford and Long Beach State," Craig said.

After finishing up at MHS, Craig knew she was college bound, but where to? According to Craig, UI is the best kept secret.

"I didn't really know about Idaho. I grew up near Stanford so that's all I knew about volleyball was Stanford and UCLA," Craig said. "And then I realized how good they (UI) were and I was like wow, people don't know about this."

It only took a visit by Hilbert and a visit to the Idaho campus and Craig was well on her way to super-frosh stardom.

"The whole atmosphere of the school and the coaching staff impressed me. And the team, I really liked the team as a whole," Craig said with freshmen enthusiasm. "The smaller town had to do with it. The smaller town is basically the school."

So far, Craig's decision to come to Idaho is paying off.

Not only is the 6-foot 1-inch middle-blocker starting but she's making a name for herself in the Big Sky Conference.

In Memorial Gym on Friday against

Idaho State, Craig displayed her talent, recording 14 kills and four of Idaho's 13 blocks, second only to Vandal all-American candidate Lina Yanchulova. On Saturday, Craig led the team with 15 kills and a hitting percentage of .419 en route to a Boise State thrashing. Craig's weekend dominance led the way for her nomination to Big Sky player of the week.

Again, coach Hilbert's recruiting talents landed him an excellent high school recruit who could produce almost immediately.

"Beth is a very athletic player. Her high school is in a very, very good conference in northern California, so she is playing at a high level," Hilbert said.

Since coming to Idaho, Craig says that the hardest part about going to school isn't trying to start or even be a great player. The hardest part is going to school and being an athlete.

"The studying part is hard because we don't have a lot of free time and in your free time you kind of want to go out and stuff," Craig said. "You can't go out because you have to study. I never had to manage my time in high school."

Craig, a sports medicine major, plans on staying in the field of athletics when college is said and done with.

"I know I want to do something like rehabilitation of athletes who've had surgery. But I don't know how I'll go about that yet," Craig said.

Craig knows she is young and things may change but one thing she's certain about - she'll continue working hard until she's the best she can be.

"I just want to keep contributing to the team, like I don't want to let the team down. I don't want to let myself down," Craig said with an intensity burning in her eyes.

Pressure is a common monkey on the back for many college athletes, especially amongst programs with a winning tradition. So far, Craig's been handling freshmen stardom with a calm and collected attitude.

"I'm kind of nervous. I don't mind the pressure because I figure down the road it'll be worse," Craig said.

Beth Craig (far side of net) skies for the ball during practice Monday afternoon.

Somebody make a decision on O.J.

California has just added a new deduction to its W-4 tax form that allows you to estimate the amount of money you have spent on the O.J. Simpson trial, this deduction could set a precedent for future trials of this nature in the process.

The deduction allows you to estimate the amount of money you spent on the trial and divide it by the number of hours you spent watching the case on *COURT T.V.*, the total is then the amount that you are able to write off on your taxes.

In reality, the truth of the matter is the only thing you can write off of your taxes from the O.J. Simpson trial is a letter to Pete Wilson saying something to the effect that the trial was a waste of money, blah, blah, blah, and that you don't think you as a taxpayer should have to pay for it.

The man that supposedly is suffering in jail, has a color t.v., a Lazy-Boy recliner, and a padded cell complete with a wet bar. O.J. has now put a patent on his name so that people can't use it to gain personal fame and glory like he has.

All this has happened after Minnesota lottery officials quit producing a pull-tab game that featured O.J., a bloody glove, a barking dog, a white Ford Bronco, a knife, and Judge Lance Ito himself.

I still feel that O.J. was framed and after hearing Mark Furman's testimony, I don't rule out the fact that he was somehow involved in the murders himself. O.J. is probably making more money by taking a year off to stand trial than he would have broadcasting, and at the same time costing California taxpayers just as much.

With the decision coming hopefully sometime in the next few weeks, O.J. may be finally free to do all the things he hasn't been able to do in the last year. People have been feeding off of this man's hardship for long enough and it is about time that the record is set straight and one way or another this will all be over.

The jurors from this trial are getting paid a whole five dollars a day or \$1,825 a year depending on how you look at it. They have given up their lives as well to make sure justice will be served, or will it?

If he is found guilty, their will be people like myself that will think he got the shaft. If he is found guilty, it will hurt me as much as jumping onto a bike with no seat. If he is found innocent, 98 percent of America will be in shock and O.J. will have to live the rest of his life being labeled as a murderer regard-

Mark Vanderwall

less. If a decision can't be reached O.J. will rank up their with *Revenge of the Nerds* and *Caddyshack* as things that should have never had a sequel.

Come next winter O.J. will be back in Buffalo broadcasting for NBC as the Bills will be beating the 1995-96 Superbowl Champion Miami Dolphins under snowy conditions in New York. O.J. will be wearing those same gloves and everyone in America will be talking about the trial.

O.J. will be living in Rockingham II with 380 barking dogs, (One for each day the trial lasted), as well as becoming the new spokesman for Ford Motor Company selling the 1996 Simpson model Bronco. He will be replacing Dan Marino as the *Isotoner* Glove spokesman and the new commercial will have him handing out a pair to each of the jurors for Christmas instead of his past lineman. Plans are already being made by *Ginsu* knife company to have O.J. endorse a new line of cutlery that will be sure to be an instant success at a barbecue near you.

As far as movie deals, if he is innocent their isn't a movie to be made unless the real killer is found, but if he is guilty, you may see Sinbad as O.J. and Brett Butler as Nicole, with Jim Carey finishing the cast as Ron Goldman.

This trial has been going on long enough and it is about time the world starts to see the aftershock of the decision no matter what the decision is. I think the world is tired of waking up every morning and drinking their orange juice with the thought of bloody gloves and white Ford Broncos on their mind. Justice needs to be served one way or another and if things turn out as planned the Mark Furman trial should start sometime after Christmas. Just remember that no matter what happens you can still get the memorabilia of the greatest public event in the United States since the mysterious death of Marilyn Monroe. Was it suicide or was it murder? The answer to that question is almost as compelling as whether or not O.J. is capable of murder.

The boys of fall?

Jared Smith

The Idaho Baseball Club opened up its fall season Saturday against Eastern Washington University on Guy Wicks Field. The two clubs split a doubleheader with the Vandals, taking a 9-5 win in the opener and the Eagles fighting back for an 11-10 triumph in game two.

UI Soccer Club downs North Idaho

The University of Idaho Soccer Club opened the home season with a 4-1 win over North Idaho College, a Junior College based in Couer d' Alene.

Idaho was led by the scoring of Mike Smiley who had two of Idaho's goals on the day, and James Hall who had a goal and an assist respectively for the Vandals. Idaho's scoring was rounded out by a second half goal from Adam Lewis.

The Vandals even their record after two games at 1-1 due to strong defensive pressure through-

out the game.

Idaho dominated midfield play strongly in part due to the play of

O.J. Royster. NIC's only score came late in the game to avoid an Idaho shutout.

'Fütbol' anyone?

Carey Powell

The 1995 University of Idaho fall intramural soccer season got underway last week. Games are played on Wednesday and Thursday nights in the Kibbie Dome.

Idaho student athletes not behaving off field

POCATELLO, Idaho (AP)—Athletes at Idaho State University, who make up only 2 percent of the students, were involved in 14 percent of the violations of the school's conduct code, President Richard Bowen told the state Board of Education on Thursday.

"Something precious has gotten out of control," Bowen said.

Bowen, Boise State University President Charles Ruch and University of Idaho interim President Thomas Bell reported to the board on problems with student-athletes at the three universities. In reports requested by the board, the schools listed the number of criminal charges against athletes.

ISU's report said in 1993-94, student athletes were involved in 40 percent of arrests and 25 percent of student infractions.

Board member Thomas Dillon, Caldwell, called for policy requiring student athletes to disclose all criminal convictions and pending criminal charges before being allowed to participate in sports.

Among other things, Dillon's proposal also would bar anyone with a felony conviction from participating in Idaho college athletics.

"I think the board must step forward on this issue," Dillon said.

State Superintendent of Public Instruction Anne Fox agreed and urged formation of a special student athletics watchdog committee. But the board defeated a motion to create the committee.

Bowen said he liked Dillon's idea. "I think it is a healthy package," he said.

The board later appointed a com-

mittee to look into Dillon's ideas, which included requiring each university to have a written policy for dealing with athletes who get into trouble.

He also proposed that no one convicted of a felony be recruited for collegiate sports. Likewise, athletes would be removed from a team if convicted of a felony. Financial aid would also be canceled.

An annual team meeting to review rules would be required at the beginning of each season, according to Dillon's plan.

In addition, he said institutions should have a drug education and drug testing programs. Dillon said clear and concise direction is what the board needs to provide to institutions.

Board member Roy Mosman agreed.

"I think the theme of this whole thing should be actions have consequences," he said. The charge of the committee, he said, should be spelling out those consequences.

The board will discuss the issue again at its Oct. 19-20 meeting in Twin Falls.

Bell said after working with law enforcement agencies, Idaho officials found 10 criminal cases involving current athletes in the UI football program from 1989 to present. He said the school still is completing reports for other sports.

"We regret these 10 incidents by football players," he said. "None of them are of an extreme nature. Some are known to the athletic department and some were not and are currently being assessed."

Sometimes ... Students have **too many** things to remember.

Making memories easier in 1995-96. Don't forget to pick up your 1994-95 GEM! Yearbooks may be picked up at the Student Union Information Desk or on the Student Union 3rd floor.

Similar alcohol policy problem faces SDSU

BROOKINGS, S.D. (AP)—A state regent who has suggested beer and wine sales at public universities has a lot of work to do before state policymakers will agree to the idea, officials said.

Jason Glott, a student member of the Board of Regents and a senior at Black Hills State University, has suggested alcohol sales at athletic events and in student unions as a way to slow increases in student fees.

The proposal has some support from the state Student Federation.

Mike Reger, South Dakota State University's vice president for administration, said reversing the alcohol ban won't be an easy task.

Alcohol was embargoed in part because regents felt universities should not be in the business of providing it to students, said Reger.

"There is no doubt there is a lot of revenue potential in sales of alcohol, but without a lot of study I'm not convinced that is a direction we want to go in right now," he said.

Attorney General Mark Barnett said Tuesday that bringing alcohol back to the state's campuses was "not a point of relevant discussion" until after the Board of Regents took action on Glott's proposal.

Brookings City Commissioner Barb Murra said she was surprised by Glott's suggestion.

"It's been a long time since we've had anything in front of us like that," Murra said. "I'd be surprised if the Board of Regents would go along with it."

When alcohol was allowed at SDSU students had few other places to go to drink, she said. But today, bars are common in Brookings: "There's plenty of access downtown."

SDSU Dean of Student Affairs Bob Tomlinson, a longtime sports official, said he would be concerned with alcohol sales at sporting events. If a person's judgment is impaired and he or she disagrees with an official, it could lead to problems, he said.

Louganis upset with Notre Dame

SOUTH BEND, Ind. (AP) — Former Olympic diver Greg Louganis has criticized Notre Dame for the university's refusal to recognize a campus gay and lesbian group.

"I'm not political, but (Notre Dame's policy) is a very narrow-minded view," said Louganis, a double-gold medalist in the 1984 and 1988 Olympics who announced in February he has AIDS. "It's as if they're saying we don't exist. They may not agree or understand, but

we exist."

Notre Dame officials could not be reached Wednesday night.

Officials at the Catholic school have repeatedly refused to recognize the group. In January, the university barred a gay and lesbian student group from meeting on campus.

A Notre Dame spokesman said at the time that if the university worked with the group, it would appear it was sanctioning a lifestyle the church opposes.

Martin fills in for injured Agassi at Davis Cup

LAS VEGAS Nev. (AP)—Todd Martin replaced an injured Andre Agassi and beat Sweden's Thomas Enqvist in straight sets Sunday to win the Davis Cup semifinal for the United States.

With a shirtless, bandaged Agassi watching from courtside, Martin clinched the berth against Russia in the Davis Cup finals for the U.S. team with a 7-5, 7-5, 7-6 (7-2) win before a cheering, flag-waving crowd at the outdoor court at Caesars Palace.

"It's the best feeling I've had in the game of tennis," Martin said after becoming the unlikely hero on a team stacked with the top two players in the world.

The win put the United States in the finals beginning Dec. 1 in Moscow against Russia, which came back from a 2-0 deficit to win the final three matches and stun Germany in the other semifinal.

It is the first Davis Cup final for the United States since 1992, when Agassi, Pete Sampras and John McEnroe teamed to beat Switzerland in the final.

Agassi, who had hoped to provide the deciding win before his hometown fans, had to be content instead with a court-side seat and tender hugs from girlfriend Brooke Shields as Martin gave the U.S. team an insurmountable 3-1 lead.

Agassi, who pulled a chest muscle in Friday's win over Mats Wilander, woke up Sunday to find the injury worse and decided he could not play.

"It's disappointing because you want to go out there and play," Agassi said. "We all felt confident in Todd. He's a great backup singles player."

Martin, who was on the losing side in Saturday's doubles match, was told after the match by U.S. captain Tom Gullikson that he might have to play. But he went to bed Saturday night still not sure about Agassi's status.

"I was in limbo," said Martin, who didn't find out he was needed until 90 minutes before the match. "After I took a fair beating at the casino tables I figured I'd better get prepared for it in case I played. Of course, I didn't have any money left."

Martin, the world's 19th-ranked player, took

advantage of some crucial mistakes by Enqvist late in the first and second sets to turn the day's second match between Sampras and Wilander into nothing more than an exhibition.

A relaxed Sampras won that match, rallying past Wilander 2-6, 7-6 (7-4), 6-3. U.S. players won all four singles matches in the semifinal, losing only Saturday's doubles match.

Down 5-4 in the first set, Martin fought off two set points, one on a disputed call, to pull even. He broke Enqvist in the second game, then captured the set when the Swede netted a return of serve.

The scenario nearly repeated itself in the second set as Martin took advantage of a double-fault by Enqvist with the games 5-5 before delivering a backhand winner to break his serve.

"A lot of good things happened at the right time early," Martin said. "I think that got him a little dejected."

With the sun-baked crowd of 11,503 going wild between points, Martin avoided another set point against an increasingly tentative Enqvist to tie the third set 6-6. He quickly opened a 3-1 lead in the tiebreaker, finally capturing the match with a backhand that nestled just inside the line.

"He served very well and I had a lot of chances, but I didn't take them," Enqvist said.

Martin, who had lost the deciding match to Sweden in last year's semifinal, tossed his racket high and hugged Gullikson and Agassi. He then buried his face in a towel, crying tears of joy.

"I guess I got my second chance," Martin said. "It was certainly my highest moment in tennis."

Agassi, who will take a couple weeks off to mend his pulled muscle, said both he and Sampras planned to play in the finals.

"I am kind of in a sense glad we are playing Russia because we never played them before and Germany has been around a long time and I think it is going to be an exciting final," Agassi said.
