

MOTION: Barb Petura

It was moved that the committee accept the assumption that women's salaries have consistently been lower than men's during the period under consideration (1972-1973) and that the committee use this assumption in applying back pay adjustments based on Category S and Merit raises. The committee also assumed that it was likely that Category S and Merit raises were used in many cases to bring the salary of women up to par.

SECONDED: Dick Schermerhorn

PASSED: Unanimous committee approval
