MINES AND WORKS AT WARDNER, IDAHO.

Weekly Letter,  
Oct. 28/99

POSTOFFICE ADDRESS, KELLOGG, IDAHO,

Oct. 30/99

J W Bradley Esq. Pres. B & S M & C Co.  
San Francisco. Calif.

Dear Sir,

Enclosed find the usual reports  
for W.E. 28<sup>th</sup> inst.

There is almost nothing to report  
as to work at the mine and mill - every-  
thing progressing satisfactorily, without any  
change of importance.

At the Kellogg Tunnel we have  
had some very bad ground - very much  
as it was last February. It has been  
very wet - more so than at any time  
heretofore. and the ground has run in  
to the tunnel from far above the timber.  
It has been necessary to bulkhead the  
face most of the time, and progress has  
been necessarily very slow. The face looks  
a little better today, although the East  
side is still very wet, and gives a great  
deal of trouble.

yours truly  
Fred. Burbidge
