

Bunker Hill & Sullivan Mining & Concentrating Company.

MINES AND WORKS AT WARDNER, IDAHO.

POSTOFFICE ADDRESS, KELLOGG, IDAHO,

Oct. 24/99

Alex. Grainger Esq.
San Francisco.

Dear Sir,

Please have Mr. Delafield place \$3000 fire insurance on our new sawmill buildings and the machinery contained therein. These buildings are two in number, situated about 500 yds. west of the mill. There are no exposures, except each building to the other, & there is water at a nearby hydrant, under 180 ft. head. In the main building which is 80' x 30' is the sawmill proper - with 40 H.P. Engine - rip saw, cut off saws, frames and wedge saw. In the other building which is 16' x 24' is the boiler - & 40 H.P. tubular of the locomotive type. The distance between the two buildings is about 50 ft. We are not yet operating the new mill - in fact it is not quite complete but it ought to be covered for protection.

Yours truly
Fredk. Burbidge
