

REED TUNNEL WATER.

## Bunker Hill & Sullivan Mining & Concentrating Company.

MINES AND WORKS AT WARDNER, IDAHO.

POSTOFFICE ADDRESS, KELLOGG, IDAHO, Nov. 29th, 1899.

F. W. Bradley, Esq., President,  
Bunker Hill & Sullivan Mining & Concentrating Co.  
Crocker Building, San Francisco, California.

Dear Sir,-

On the above subject, McBride writes as follows:

"The reasons assigned by Heyburn for dropping the matter at present was that they had wired him that owing to the rains and present abundance of water, they had concluded not to proceed at present. He also said that Miller said that he and the Bunker Hill Company had had an agreement about the matter that was satisfactory at present. The latter statement I do not credit. I think they fear that we are ready for them and he concluded to let it go. He said the rains and snows had rendered it unnecessary to do anything now".

It appears as if Heyburn appears less certain of his position in this matter, and is afraid to go on with it.

Yours truly,

*Frederick Burbidge*
