

# Bunker Hill & Sullivan Mining & Concentrating Company.

MINES AND WORKS AT WARDNER, IDAHO.

POSTOFFICE ADDRESS, KELLOGG, IDAHO,

WEEKLY LETTER DEC.14th,1899.

Dec.17th,1899.

F. W. Bradley, Esq., President,  
Bunker Hill & Sullivan Mining & Concentrating Co.  
Crocker Building, San Francisco, California.

Dear Sir,-

Enclosed I hand you the usual weekly reports for the 14th inst. At the mine the Switchback, Johnson and Hanna stopes are not looking so well as a week ago. The other stopes show pretty much the same as they did, or perhaps, on the whole, are a little improved.

The Tyler Winze made eight feet in the week. It shows a little ore throughout, but it is too lean to save. The Tyler Foot Wall Drift advanced 19 ft.

The Kellogg Tunnel advanced 72 feet, making the total 5765 ft. The ground is hard quartzite, rather massive and quite tight. It stands well without timbers, and if it remains as it is, we shall make pretty good progress.

The work of erecting the new compressor is moving rather slowly. Nordberg's man does not appear to be very expeditious, but after the heavy parts are in place, the progress may be faster.

Yours truly,

*Frederick Burbidge*
