Dear Sir,

We wish to get a fire proof box, or safe, to keep our maps in at the office at the mine. What seems to us most suitable is a box say 6ft. long by 18" wide, and 18" deep, inside measurements. The box to be of steel lined with suitable non-combustible material, provided with a lid similarly constructed, & with a good lock. Will you please see the safe dealers in your city, and see if anything of this sort can be obtained - price, and time of delivery.

Yours truly
Fredr. Burbidge
