235, 236, 237 Roll 14B

Job training on the job. Stanley Johnson, left, Minor Assistant to the Technician, instructing Enrollees Clyde T. Tuttle and Russell Wright in the proper method of cleaning the oil filters on RO-7 Caterpillar Tractor. Instructions such as these go on continuously in a CCC camp. The value of such instruction as defense training is obvious.

238, 239, 240 Roll 14B

A stream gaging station constructed by CCC enrollees from Camp SCS-I-1, Moscow. This work is done in conjunction with the Bureau of Hydrological Surveys and is used to determine the effectiveness of erosion control practices on small drainage areas.

241, 242, 243 Roll 14B

Rock masonry dam completely silted full and the gully protected by vegetation. This is a roadside protective measure and has saved the relocation of a section of the North and South Highway near Moscow, Idaho. This is work of the Moscow SCS-I-1 CCC Camp.

244, 245, 246 Roll 14B

Panoramic view of Palouse farming country looking southeast toward Moscow, Idaho, from Paradise Bridge. The farming pattern of this entire area has been greatly changed by the Soil Conservation practices. This work has been greatly accelerated by the use of CCC labor.

247, 248, 249 Roll 14B

CCC tree planting in the right center on the Virgil Phillips place seven miles north of Moscow, Idaho. The yellow hilltop in the background is sweet clover which is being plowed under for green manure. W. C. Renfrew's
