

grass mixture. Enrollee Wm. Gray of West Manticke, Pa. on the left and Enrollee Mike Sylvanovich from Exeter, Pa. on the right.

329, 330, 332 Roll 19

Enrollees of Moscow, Idaho Camp SCS-I-1, going to work in the morning. Note the ladder by which the boys mount the trucks. Trucks are in a straight line. There is no traffic through the group of enrollees waiting to be loaded. Company Commander Arvin on the left, and talking to him is Camp Superintendent Rabdau. Enrollee leaders are calling the names of their crews as the boys enter the trucks. Each foreman stands near his truck and supervises the loading.

333, 334, 335, 336 Roll 19

General view of the Palouse farming area northwest of Moscow, Idaho. Enrollees from Moscow CCC Camp SCS-I-1 work in this area. This is the famous wheat and pea raising country of Washington and Idaho. CCC enrollees, through the work of the Moscow Camp, have done much to stimulate conservation farming in this area.

337 to 342 Roll 19

Enrollees from Camp SCS-I-1, Moscow, Idaho working on the SCS Nursery at Pullman, Washington. CCC enrollees do the greater share of the work necessary to maintain this grass nursery. These boys are handling bitter bush seed. This is an important western browse shrub in the semi-arid areas. The seed has been collected perhaps by one of the CCC camps and has been spread out to dry. The SCS nursery has developed a method of direct field seeding of properly treated seed of the bitter bush. This is much faster and cheaper than endeavoring to transplant individual bushes. The enrollees handle this seed from the time it arrives through the treatment and in most cases will actually plant the seed. The two bundles of plants left near the entrance to the seed house
