Lake Highway To Be Completed

NEW CCC BOYS ARRIVE—WILL WORK ON LAKE CIRCLE ROAD THIS WINTER

A troop train carrying sixty-one new CCC enrollees arrived in McCall last Thursday evening. The boys were brought here from Pocatello. Thirty-nine remained in the McCall camp and twenty-two were taken to French creek. Over half of them had been enrolled in the three C's before. They replaced several who were discharged to attend school and others whose terms had expired. The McCall boys have been given easy work for the first week until they become reconditioned to the work and acclimated. This winter they will be detailed to complete the road around Payette lake which was started last year.

Completion of this road will make one of the finest scenic highways in this section. It will competely circle the lake and permit an auto drive rather out of the ordinary, as it takes in every point of interest on the lake. It is being built on federal specifications as to width and grade and will, no doubt, be graveled in course of time. Only one fly can be found in the ointment and that is the narrow stretch of road north of Sylval beech. This will, perhaps, be widened later on.

A new garage is being built at the state forest office by the CCC workers.
