Ross Receives \$405,500 For Idaho Relief

Governor Ross announced late Thursday night that a reclassification of some 27,000 cases on the Idaho emergency relief administration rolls has resulted in a reduction of from "20 to 30 per cent in the number of cases," and that he Thursday received \$405,500 for Idaho relief purposes in February.

The Governor said checks to the counties were being mailed out Thursday night.

He credited the citizens' committees he recently ordered appointed with the responsibility for removal of many persons not in dire need from IERA rolls.

A recheck that is now being made by the committees may show, he said, that some of the cases removed may have to be returned.

"We will be able to provide adequately for the needy of this state," he stated.

Of the funds received Thursday from Washington, D. C., \$116,500 was for direct relief; \$250,000 was for drouth relief project workers and \$38,000 was for transient relief, he said.

Some work relief project, other than drouth, will be started during the coming week, he announced. A number of drouth projects will resume work tomorrow.

The work of reorganization is going on slowly, he noted, expressing the hope that he soon would be able to present a practicable plan that could be carried out without interruption.—Statesman.
