## NEWS OF THE WEEK

---

---

WASHINGTON (AP)— Congress had under consideration this week a \$36,000,000 reclamation construction program, approved by the house appropriations committee. Of the total, \$31,000,000 would be used to continue construction of the Grand Coulee Dam in central Washington.

Another \$9,000,000 would finance construction during the 1939 fiscal year of California's central Valley project.

Other recommended expenditures included:

Boise project, Idaho, Payette division, \$500,000; Minidoka project, Idaho, \$400,000; Owyhee project Oregon, \$310,000; Upper Snake river project, Idaho, \$250,000.

Idahoans were unsuccessful in attempt to win approval of a \$1,000,000 appropriation for the Twin springs supplement water supply project in the Boise river valley of Southwestern Idaho. They said they would attempt to amend the bill on the floor.
