Over \$50,000 Yearly For Idaho Wildlife Restoration

Idaho will receive each year federal funds in excess of fifty thousand dollars for wildlife restoration, according to the provisions of the act signed by President Roosevelt on September 2. The act becomes effective July 1, 1938, W. R. McIntyre, State Fish and Game Warden said. The state's portion of the first project expenditure will be \$52,195.25, and to this the state will add \$17,368.41, which is to be expended in the improvement of the state's wildlife conditions in accordance with a carefully planned program.

The new law authorizes appropriations equal to a revenue derived from Federal taxes on firearms shells, and cartridges for a Federal-State wildlife program. Previous receipts from this tax may total \$3,000,000 yearly. This is the first time these funds have been available for this purpose. The projects will include the selection, acquisition, and development of areas for wildlife and also research on wildlife management problems.

Idaho will receive \$38,247.83 on its area, which represents about 46 cents for each square mile, and \$13,857.42, which is 23 cents for each hunting license sold. These figures are based on the 1935 reports. The total from the government will be \$52,195.25 to which will be added \$17,368.41, representing the state's contribution to wildlife restoration.

States sharing in the fund will provide funds equal to one-third of the Federal allotment. Idaho's participation will follow its assent to the provisions of the act and enactment of wildlife conservation laws, "which shall include a prohibition against the diversion of license fees paid by hunters," for any other purpose than the administration of the state fish and game department.

The enlarged Federal wildlife program has been laid out in a manner similar to that provided by the Federal-State Highway act, and the process of administering the new act will be similar.

With the added funds, which will be effective next year, Idaho will be able to carry on the extensive fish and game program which has been planned by Game Warden McIntyre. This will put more fish in the streams and more birds throughout the state which is the policy of Governor Barzilla W. Clark.

CARD OF THANKS

CHARLES AUGUSTUS STINSON

Charles Augustus Stinson, age 49, former resident of Cascade and for the past few years a farmer in the Lone Star community near Nampa, was killed last Saturday afternoon when he was crushed by a truck in front of his home.

Mr. Stinson was well known here and his many friends were grieved and shocked at news of his death.

He is survived by his 15 year old son, Charles Nash Stinson, who was living with him; his parents, Mr. and Mrs. J. A. Stinson, Sr., of El Reno, Oklahoma; four sisters, Mrs. B. U. Rector of El Reno, Mrs. O. E. Hopkins of Oklahoma City, Mrs. Nash Setzer of Oklahoma City, and Mrs. B. W. McGillberry of Rimbey, Alta., Canada; two brothers, J. Alex Stinson and F. L. Stinson of Nampa.

Funeral services were held from the Cascade Community Church Tuesday afternoon at 2:30. Interment in Margaret Cemetery.

THINGS YOU DON'T KNOW ABOUT OUR STATE GOVERNMENT

(By J. W. Taylor, Attorney General)

Continued from last week

In conformity with the requirements of the Idaho constitution the statutes provide for a bureau of immigration, labor and statistics. The statute recites that it shall be the duty of the governor, by and with the consent of the senate, to appoint a competent person as commissioner of immigration, labor and statistics, who shall have charge of the department and who shall receive a salary of \$3600 per year.

The duties of the commissioner are varied and important. He is charged with the collection and compilation of all reliable data and information concerning the climate, soil, and various resources of the state; its agriculture, horticulture, mineral, timber and grazing lands, and industries, and the development thereof; the water courses and lakes of the state in reference to irrigation, manufacturing, mechanical and other uses; the various crop products, and the adaptability of different soils and localities for the production of different crops; the number of schools, educational institu-
