Valley County Is Included in Food Stamp Plan

Valley county is one of nine others in which the federal food stamp plan will be extended as rapidly as possible as a prelude to state operation of the plan.

Donald A. Fareed of Portland, Oregon, district supervisor of the surplus marketing administration, will be in Boise March 25 or 26 to negotiate for installing the surplus commodity disposal system in Adams, Washington, Payette, Valley, Boise, Gem, Canyon, Elmore and Owyhee counties:

At present the system, under which a purchaser is given \$1 of free blue stamps for each \$2 of orange stamps purchased, is operating in Ada county and is six north Idaho counties.

The 1941 legislature provided a \$100,000 revolving fund to permit statewide use. Lee explained the money was necessary for financing purchases of stamps from the SMA and for distributing them to clients. No actual depletion of the fund is contemplated.

Idahoans will know after Fareed arrives in Boise about how long it will be before the plan will be extended over the state.

Southwestern Idaho will probably be under the program in "perhaps 60 days" and extension of the system probably will have to be done in groups of counties.

Before any area can institute the plan, regulations under which clients may purchase stamps must be formulated, food industry committees organized and arrangements made for stamp sales.

The orange stamps are good for any food item not ordinarily consumed on the premises. The blue stamps are good for any commodities designated as in surplus by the secretary of agriculture.

CIVIC CLUB MEETS

LIQUOR PRICES UP TO COMPLY WITH LAW

Idaho's recently enacted law, levying a tax of 20 per cent on the wholesale price of liquor, became effective in Valley county state liquor stores recently. Instructions regarding collection of the tax were received recently by the store managers at Cascade, McCall and Donnelly. The markup means an increased cost to the retail purchaser of from 5c to 20c per bottle, depending upon the price. Instructions place the tax in even cents the additions being 5c, 10c, 15c and 20c on each container, according to code prices.

Death Takes Daughter Of Mr. and Mrs. Stohr Following Operation

People of this community were shocked this week upon learning of the death of Barbara Clare, seven-year-old daughter of Mr. and Mrs. Penn Stohr.

The child had apparently been in good health and had attended school on Tuesday. Wednesday she was rushed to Boise and was operated on at 8 o'clock that evening for appendicitis. Pneumonia complications with the operation caused her death at 6:30 o'clock Thursday evening.

Her body will be taken to Spokane for cremation.

Besides her parents she is survived by her twin sister, Bettina, and a brother, Daniel.

Mr. and Mrs. Stohr have the sincere sympathy of the entire community.

Smart Draftees Leave Firewater At Their Homes

If you are drafted tomorrow and are wondering if you should take your tuxedo and your bass viol along to the induction center, the
