15-Wood 2-Camp Detail

A. PERSONNEL - Strength and Condition:

1. Company Strength 164 No. of Men SICK 7 No. on OVERHEAD 24
 2. No. of Men CHARGED TO TECHNICAL SERVICE 116
 3. No. of OFFICERS ASSIGNED 2 No. of OFFICERS PRESENT AT INSP. 1
 4. GENERAL EFFICIENCY -- Commanding Officer Capt. Hufford
 Subordinate Officers Lieut. Melchan, D.S FGW

Supply Officer Capt. Hufford Educational Adviser Mr. Woods
 Camp Surgeon Capt. Thomas Welfare Officer _____

5. SPIKE CAMPS -- How Many One No. of Men 49
 6. How far from MAIN CAMP 26
 7. How often does Commanding Officer visit SPIKE CAMP 1 per week
 8. How often does Camp Surgeon visit SPIKE CAMP 1 per week
 9. DISCIPLINE OF PERSONNEL Excellent MORALE Excellent
 10. RELATIONS and COORDINATION with FOREST SERVICE Excellent
 11. SIGNS Excellent

B. PHYSICAL EQUIPMENT and SANITATION:

	Remarks
1. Latrines (Type) <u>Dump</u>	<u>Seats need repairing</u>
2. Bath Houses	<u>Floor could be cleaner. Need duck boards</u>
3. Laundry Facilities	<u>Floor dirty. Room could be neater</u>
4. Sleeping Quarters	<u>Excellent except lockers</u>
5. Mess Hall	<u>Excellent. Floor bleach needed to improve floor. Recommend purchase of "Vascolite" for same</u>
6. Kitchen	<u>Excellent plus</u>
7. Cooler (Meat, etc.)	<u>Excellent</u>
8. Root Cellar	<u>Excellent</u>
9. Garbage Disposal	<u>Hauled to pit. Cans Excellent</u>
10. Recreational Building	<u>Excellent plus</u>
11. Educational Building	<u>Excellent</u>
12. Camp Exchange	<u>Condition Excellent. Display Excellent</u>
13. Equipment Storeroom	<u>Excellent. Suggestion made on sheets & equip.</u>
14. Surplus Equip. Storeroom	<u>Satisfactory</u>
15. Infirmary & Medical Equipment & Personnel	<u>Drawers and shelves to be neater</u>
16. Administration Building	<u>Excellent</u>
17. Officers Quarters	<u>Excellent</u>
18. Guest Quarters	<u>Satisfactory</u>
19. Forestry Quarters	<u>Excellent</u>
20. Fire Precautions and Preventitives	<u>Covers needed for fire buckets</u>
21. All Heating Equipment	<u>Dampers needed for some stoves</u>
22. Generator House & Equip.	<u>Satisfactory. Storage barrel to be changed</u>
23. Fuel Problem	<u>Satisfactory</u>
24. Water Problem	<u>Satisfactory</u>
25. Fly Screens & Traps	<u>Satisfactory for season</u>
26. Construction Completed	<u>Yes</u>
27. General Camp Sanitation	<u>Excellent</u>

C. MESS and SUNDRY ITEMS:

1. Food Excellent Quality Excellent
 Variety Excellent Quantity Satisfactory
2. Kitchen Personnel (Qualifications & Presentability) Satisfactory for young cooks
3. Food Provision Storeroom Spices to be neater
4. Tableware Excellent
5. Cooking Equipment Excellent
6. Cleaning Facilities Satisfactory
7. Are Mess Stores Properly Accounted for Yes
8. Complaints or Suggestions Concerning Mess _____

D. TRANSPORTATION:

1. Condition Satisfactory
2. Are Requirements of Memo. #13, July 6, 1937, Fully and Properly Complied with Yes
3. Repair Service Satisfactory
4. Drivers Satisfactory

E. EDUCATIONAL & WELFARE ACTIVITIES:

1. Educational Adviser Mr. Woods
 Asst. Educational Adviser Enrollee Holders
2. No. of Courses _____ No. Enrolled _____ No. of Instructors See attached
3. Magazines & Papers Receiving same (sheet)
4. Circulation System of Library Card
5. Camp Paper Excellent
6. Recreational Equipment & Use thereof Usual equipment

F. RECORDS and REPORTS:

	Remarks
1. System of Filing.....	<u>Decimal</u>
2. Company Fund Records.....	
3. Camp Exchange Records.....	<u>11-11-37</u>
4. Date of Last Inspection of Accts. by Dist. Hq.	<u>11-17-37</u>
5. Correspondence Book.....	<u>Excellent</u>
6. Morning Report.....	<u>Excellent</u>
7. Sick Report.....	<u>Excellent</u>
8. Duty Roster.....	<u>Excellent</u>
9. Transportation Requests.....	<u>Looked up</u>
10. Daily Work Report.....	<u>Excellent</u>
11. Daily Sanitary Report.....	<u>Satisfactory</u>
12. Daily Diary (Log of Events).....	<u>Excellent</u>
13. File of Company Special Orders..	<u>Satisfactory</u>
14. Minutes of Last Safety Committee Meeting.....	<u>Last one 11-16-37</u>
15. File of All Orders, Memos., etc. District and Corps.....	<u>Satisfactory</u>
16. Record of Telephone Calls and Telegrams.....	<u>Satisfactory</u>
17. Form #86 (or QMC 469).....	
18. Form #12.....	<u>Satisfactory</u>
19. Roster of Men Checked on Last Sanitary Inspection.....	<u>Satisfactory</u>
20. Weekly Roster of Kitchen Personnel, Sanitary Inspection..	<u>Satisfactory</u>
21. Meal Record Report, Officers & Foresters.....	<u>Satisfactory</u>
22. Individual Clothing and Equipment Records.....	<u>Being completed</u>
23. All Records, C & E.....	<u>Satisfactory</u>
24. Supply of All Forms Required....	<u>Yes</u>
25. File of Menus.....	<u>Satisfactory</u>
26. Food Storeroom Stock Record.....	<u>Satisfactory</u>
27. Registered Mail Record.....	<u>Satisfactory</u>
28. Officers Register.....	<u>Satisfactory</u>
29. Leave Register (Enrollees).....	<u>Satisfactory</u>
30. GENERAL EFFICIENCY OF PAPER WORK	<u>Satisfactory plus</u>

G. SUPPLY FACILITIES:

1. Are Supplies Being Received Regularly Yes
In Satisfactory Condition Yes
2. Are Requisitions Filled Promptly Yes
With Materials as Ordered Yes

H. FIRES or OTHER EMERGENCIES:

1. Fires, when None
2. No. of Men on Fires None
3. Method of Rationing None
4. Method of Clothing and Equipping None
5. Officers (NAME) on Fire None
6. Other Emergencies None

COMPLAINTS or SUGGESTIONS by COMMANDING OFFICER:

REMARKS:

NOTE: The same system of ratings as used on Efficiency Reports will be used where required, i.e.,

Superior,	95% to 100%	Unsatisfactory,	65% to 75%
Excellent,	85% to 95%	Inferior, Below,	65%
Satisfactory,	75% to 85%		

Total Efficiency; Rating for Camp Excellent

Date of Report

GENERAL INSPECTION REPORT

(To be prepared IN INK by Inspector and mailed to R.O. promptly for typing or photostating. Technical inspections of projects to be treated in separate or supplemental report)

Superintendent L. Morris Commander Captain Hufford
Title Name

Inspector W. G. Guernsey Accompanied by Ranger Flint

Date of Inspection Oct. 20 Period Spent in Inspection Oct. 20 to Oct. 22.
From To

Date of Last General R.O. Inspection 7-23-37 By Whom Frank Akridge
Suprv. Office 9-4-37 George Haynes

Activities or Projects Inspected:

Insect Control
Road 208
Spike Camp, Steamboat

FINDINGS

(If space provided is insufficient, use additional sheets, referencing to topic by key number, as "A-1", etc.)

A. QUALITY OF ORGANIZATION:

1. Has the Supt. an adequate work program for the season? Yes
2. Does it define priorities of jobs?
Are the priorities observed?

Yes - Very Good

3. Does the Supt. have well-developed "plans ahead" for each job? Yes
4. Do these plans "work out"? Yes
5. Has the Supt. a thorough grasp of all phases of his job? Yes
6. What success has the Supt. in his dealings with Army officers? Very Good
7. What is the Supt's attitude toward the job? Excellent
8. What % of the Supt's time is spent "on the job" away from camp? 70 percent

9. Are foremen and facilitating personnel thoroughly competent to direct or accomplish the jobs to which assigned? Very Good
 If misfits exist who are they and upon what jobs? None
10. Are foremen, leaders and asst. leaders adequate in numbers to get reasonable production from unskilled, untrained workers? Yes
11. Are they distributed properly over the working forces?
 If not, what adjustments are recommended?

Satisfactory. No change at present.

12. Are foremen on the job and assertive in directing work? Good
13. Is clerical work well organized and handled effectively? Good
14. How many inspections of field work have Supervisor or staff made since opening of camp?(List dates, length of visit and names of officers) Nelson, Flint, Haynes, Simpson.
15. How many purely "camp visits" have been made by Supervisor and staff?(List dates and names of officers) Flint
16. Do Supervisor and staff men make it a practice to leave with the Supt, definite written memoranda covering instructions or suggestions made as a result of inspections? Yes. Memo's on file.

B. QUALITY OF WORK ACCOMPLISHED:

1. Do Supt., foremen, leaders and skilled workers fully understand the specifications and standards applicable to the work upon which engaged?
 List any exceptions: No exceptions. Foreman are being instructed in Insect Control work by Bedard and Ranger Flint.
2. Are these standards and specifications adhered to? Yes
3. If deviations from standards or specifications are found, what are they and upon what jobs?
No major deviations noted, few minor points talked over on the ground.
4. Are written specifications lacking for any of the jobs under way? NO.
5. What changes in plans, locations or specifications, if any, do you believe advisable and upon what jobs? Suggested working Downey Creek Insect Control area while good weather prevailed. It is some distance to walk.

6. Are foremen active in teaching CCC men how to improve their skill? Very active schedule
7. Is the force of skilled workers, including skilled CCC men, adequate to insure proper accomplishment of the work planned for? Yes. Need one later.
8. If not, how many men and of what skills are lacking?

For what jobs are they needed?

9. Has the Supt. recognized the need for more skilled workers, what action has been taken to secure them and with what results?

None needed at present.

10. Which foremen have made noticeable progress in improving the skillfulness of their crew men?

Good, Maryott

11. What steps has the Supervisor taken to impress Supt. and foremen with their responsibility for the training of workers?

Instructions written and verbal on the ground.

C. QUANTITY OF WORK AS COMPARED TO MAN-POWER AVAILABLE:

1. Average turnout for work past 30 days 120 (Since arrival new men).
2. Into how many working groups was this turnout divided? Six
3. Which crews, if any, seem overly large for economical accomplishment of the job at hand? Satisfactory
4. Upon what jobs does output for past 30 days impress you as being too low?

Satisfactory

5. In your judgment what are the reasons for low output?

None

6. What jobs require more than 2 hours per day travel time?

None

7. How many men are engaged upon these jobs?

8. What might be done to reduce travel time on these jobs? No change

9. Are trucks operated on a double-shift basis? Yes
10. If double-shifting of trucks is not practiced, is it feasible and what reduction in numbers of trucks could be effected through its practice? Yes

Present practice

11. Is maximum service efficiency being obtained from trucks?
- (a) Capacity loads 25 per load
 - (b) Staggering crew hauling trips in and out to work Yes
 - (c) Is use of trucks for recreational purposes interfering with use for material and laborer hauling? If so, cite instances:
No
 - (d) Any instances of avoidable duplication of truck use by traveling Forest officers?
No
 - (e) Any instances of trips on petty errands that could have been attended to in some other fashion:
None

12. Are bulldozers triple-shifted? Double shifted
If not, why?

13. Are jackhammers triple-shifted? Double shifted
If not, why?

14. Are grading outfits double-shifted? No
If not, why?

15. What additional machines, if any, could be used to advantage and where?
None

16. What machines, if any, are out of commission, for how long, and for what cause?
None

How much of this time loss was preventable and how might it have been prevented?
None

17. Are these idle machines on the job?
List number, type and cause of idleness:

None

18. Do foremen have "plans ahead" for each day's work?

Very good

19. Are foremen active in keeping crews balanced and fully equipped with necessary tools? Yes

20. Are tools properly conditioned for use? Excellent

21. Do foremen see to it that necessary materials and equipment are at hand for workers use? Yes

22. If material or equipment delays have occurred, what caused them?

Superintendent feels this point satisfactory.

23. How many spike camps are out? None
How many of the working force are in such camps? --

24. Could the number of spike camps be increased to advantage?

On what jobs?

Steamboat spike of 49 men on November 1.

D. USE AND CARE OF EQUIPMENT:

1. Are blasting machines in use on all jobs requiring explosives? Yes

2. Are shop facilities adequate for sharpening, fitting and repair of all tools?
If not, what is lacking?

Very good line up.

3. How many power-operated machines on the job?

(a) Trucks 5 $1\frac{1}{2}$ -ton; 1 Pick-up;

2 Dump; (b) Bulldozers 1;

(c) Tractors 1; (d) Compressors 1;

(e) Jackhammers 1; (f) Shovels 1;

(g) Graders 1.

4. Are the mechanic services assigned to the camp adequate to keep in condition the number of machines working?

If not, how many additional days of mechanic

service per month are required? Satisfactory, feels that Leiske is a very good man.

- 5. (a) Do all drivers have permits? Yes
- (b) Are speed and driving rules pasted in truck cabs? Yes
- (c) Any evidence of violation of speed and driving rules? No
- (d) Any evidence of overloading? No

6. Are trucks properly maintained?
List exceptions (Give truck No.)
- (a) Lubrication Satisfactory
 - (b) Brakes Satisfactory
 - (c) Lights Satisfactory
 - (d) Tires Will change several worn front tires.
 - (e) General Satisfactory

7. Are servicing facilities adequate?
- (a) Is camp equipped with grease rack? Yes
 - (b) Is check on gasoline and oil issues adequate? Yes
 - (c) What provision is made for current servicing of trucks?

Weekly check

- (d) Are all trucks equipped with service cards and are they used? Yes
- (e) Are Drivers Report-Accident (Form 26) provided in all trucks? Yes

E. FIRE CONTROL PREPAREDNESS:

- 1. What is the standard of preparedness set-up for the camp? (See ECW Handbook): 100 men
- 2. Is equipment to this standard at hand?
Is it in proper condition? Yes
- 3. Is the prescribed flying squadron selected, overhauled and trained for its job? Yes
- 4. Do the selected smokechasers understand their job? Yes
- 5. Are the overhead men assigned to the flying squadron the most competent fire bosses available in the camps? Yes
- 6. What preparedness measures have been lined up in addition to the prescribed standard? Satisfactory
- 7. Are adequate arrangements agreed upon with the Commander for holding men in camp in cases of impending need? Yes
- 8. Are available transport facilities adequate for quick movement of 75 men? Yes
- 9. What additional measures other than increasing size of squadron might be taken to improve adequacy of firefighting preparedness?

Not needed at present.

10. What general instructions have been promulgated by the Camp Commander relative to smoking and use of fire in the Forest by CCC men?

Satisfactory

11. Is the camp itself adequately fire-proofed? If not, what needs to be done?

Very good

F. CO-ORDINATION WITH ARMY:

1. Is camp construction completed? Garbage pits
2. If not, what remains to be done?

3. When is it expected to finish this? November 1

4. How many men are engaged in camp construction work? Fifteen

5. Is camp construction over-refined? Cite instances:

No

6. If Army overhead, aside from construction forces, consists of more than 23 men, list the uses to which the surplus is being put:

Satisfactory

7. Are Forest employees and Army co-operating effectively? Very good
8. Do Army officers understand the needs of the work being done by Forest Service? Yes
9. Does Commander switch men without consulting Supt.? No
10. Is mess satisfactory? Satisfactory
11. Are arrangements for lunches and "extra shift" meals satisfactory? Satisfactory
12. Is camp discipline such as to strengthen the disciplinary measures required on the job by the work agency? Satisfactory
13. Are men interested in their work? Yes
14. Is selection and use of leader and asst. leader positions satisfactory to both agencies?

Yes, need assistant leaders which will be arranged as soon as present camp reorganization is worked out.

15. Are housing facilities for work agency employees commensurate with those occupied by Army men of similar rank? If not, what is needed?

Satisfactory

16. Educational activities, (a) What is being carried on?
Complete schedule. Educational Adviser new man, just getting underway.

(b) Are work agency employees co-operating?

Very good

- G. GENERAL: (Comments on any pertinent features not covered in the regular report)

F-154 INSECT CONTROL

October 20, 1937

Crew No. 1. Section 15, Township 51 N., Range 3 E.

Glen Good's crew, Assistant Skilled Worker Weidman and one leader was split into three 8-man units. These men treated 23 trees per day with an average D.B.H. of 17 inches or about one tree per man day. The first day this crew treated 17 trees.

During the examinations of trees peeled by this crew, Dr. Bedard mentioned the loss of time in peeling the dry side of trees. Superintendent Morris talked this over with Good. The dry side, or side that no growth is taking place, is where *Armillaria mellea*, honey fungus, has spread up the tree from the roots.

It was suggested that several of the stumps could be peeled lower. Tops should not be peeled unless beetles and work seen. The average top diameter was about six inches on end of peeled sections.

Mr. Bruce Cardin inspected the area and mentioned he would pay about two dollars per thousand for the timber in log lengths.

It was estimated that the bug trees will average about 100 M feet in that area along the river face in Section 15. It was figured that on that area covered by the spotting crew in Section 15, it would average about 700 board feet per acre.

It is believed that these logs can be sold to local jobbers. When the work is done that will be required on skid trails, etc., we should keep them cleaned out for future salvage jobs. Then each year a clean-up job can be done by marking the bug trees and have the operator cut and take out.

The spotting crews are as follows;

1. W. Rantanen	C. Spotter
L. Hartman	Compassman
R. Beaudreau	Spotter
R. Goodson	"
W. Harris	"
E. Plank	"

2. H. Kellner	C. Spotter
R. Goodson	Compassman
E. Baslington	Spotter
H. Scarborough	"

The rest of the men to be used as spotters are being sent in within the next several days. In addition, three foremen will be sent in to assist in the treating work.

Total allotment for the camp amounted to \$2700 S & E - Insect Control.

J. A. Kedzior (checker) worked three days in checking the spotting crews and found three missed trees of a total of 212 trees spotted. This check covered about 210 acres and averaged about a one percent figure as missed trees.

In regard to insect control work, it is felt that a careful study should be carried on to combine insect control with a method to insure a salvage program. The south facing slopes appear to be the main points of attack by the white pine beetle on the Armillaria infested trees. It is noted that a great deal of control work has been done in these same areas in the past. In fact, about 50 percent of the trees have been cut in previous control jobs or will be cut in this control job on these areas. The age of this stand runs between 86 and 103 for a number of stump ring counts.

It is suggested that a cruise be made to determine the actual amount of timber in Section 15, Township 51 N., Range 3 E. and that this cruise be compared with the timber cut on insect control. It will be necessary to make a further study at the same time of the number of trees that are attacked by honey fungus and will be later attacked by the white pine beetle. It appears from Bedard's studies that the white pine beetle will attack these weakened trees. This study seems essential in that we need definite information on the amount of timber present, the loss that has occurred, and that loss that can be expected by Armillaria and insects. We should have a more definite idea of the values at stake and the amount being written off through funds allotted for insect control and a depreciated timber supply.

GENERAL INSPECTION REPORT OUTLINE
(Revised June 1935)

Forest Coeur d'Alene Camp Name Devils Elbow Camp No. F-154

Date of report September 4, 1937

Period of Inspection, From 9 am 8-31-37 to 6 pm 9-3-37
am 3:30 PM 8-31-37
(date) (date)

Inspector G. S. Haynes Accompanied by A. A. Flint

Supt. L. J. Morris Camp Com. Captain F. N. Hufford
Title Name

List below the activities or projects inspected:

Road Construction #208, Flat Creek-Rock City Section
Telephone Construction Independence Hill
Hazard Reduction Bishop Springs

Findings

(Except where very brief answers placed on this sheet will fully answer all phases of the questions, discuss in detail on blank sheets, using key letter and number, as "A-3," etc.)

A. QUALITY OF ORGANIZATION

- | | |
|---|--|
| 1. Has Supt. a detailed work program? | <u>Yes</u> |
| 2. Does it define priorities of jobs? | <u>Yes</u> |
| 3. Does Supt. have well-developed "plans ahead" for each job? | <u>Yes</u> |
| 4. What success has he in making these plans materialize? | <u>Yes, See remarks</u> |
| 5. Does Supt. keep an adequate record or chart showing accomplishment based on plan of work? | <u>Yes</u> |
| 6. If not, did you suggest how to keep such a record? | <u>Yes</u> |
| 7. Has Supt. a thorough grasp of his job? | <u>Very good</u> |
| 8. What is his attitude towards the job? | |
| 9. Basing your reply on analysis of Supt's diary, if available, or on other information, how many hours per day does he average away from camp on the work projects? | <u>7 Hours</u> |
| 10. How many hours per day do the enrollees average on work projects? | <u>6 Hrs. 15 Min.</u> |
| 11. Are foremen and facilitating personnel thoroughly competent to direct or accomplish jobs to which assigned? (Dig into this and discuss <u>thoroughly</u> .) Are there any misfits? If so, on what jobs? How many replacements has this camp had because of inefficiency or other unfitness? (Do not include releases due to no further need of certain overhead.) | <u>Yes. See Remarks</u>

<u>None</u> |
| 12. Are foremen, leaders and asst. leaders adequate in numbers to get reasonable production from unskilled, untrained workers?
If not, what do you suggest? | <u>Yes</u> |
| 13. Are they distributed over the working forces to the best advantage?
If not, what do you suggest? | <u>Yes</u> |

- | | |
|--|--|
| 14. What are the minimum and maximum numbers of workers under any foreman?
What is the average for all foremen? | <u>6 and 23</u>
<u>16</u> |
| 15. Are the foremen alive to their jobs in directing the work? How do they size up? | Yes, average or better. Rader, George, Springer |
| 16. Where you find men loafing on the job, give foreman's name and the number loafing in each case. Discuss such instances with Supt. and state what comments he offers. | very good.
All crews working. |
| 17. Check clerical work and state whether it is well organized and effectively handled. Does Supt. know where all men are assigned each day?
Does he keep necessary records on time by projects?
Does he submit his reports on time?
Has he sufficient clerical help to meet the needs? | See remarks
Very good
Yes
Yes
Yes
Yes |
| 18. How many inspections of field work have Supervisor or staff made during this enrollment period? | <u>Eight last six months</u>
<u>Six</u> |
| 19. How many purely "camp visits" by Supervisor or Staff? | |
| 20. How many weeks since full company arrived, or since start of period in case company arrived during a previous period? | <u>April 20, 1937</u> |
| 21. Do Supervisor and staff men make it a practice to leave with the Supt. definite written memoranda covering instructions or suggestions made as a result of their inspections? | <u>Yes</u> |

B. QUALITY OF WORK ACCOMPLISHED

- | | |
|---|--|
| 1. Do Supt., foremen, leaders and skilled workers fully understand the standards and specifications applicable to the work on which engaged?
Do the Supt. and foremen carry the specifications with them out on the jobs?
Discuss any exceptions. | <u>Yes. See note</u>
<u>Yes. See note</u> |
| 2. Are standards and specifications adhered to?
If there are any deviations, what are they and upon what jobs? | Yes
None |
| 3. Are written specifications lacking for any of the jobs under way?
If so, list such jobs? | <u>No. See note</u> |
| 4. What changes in plans, locations or specifications, if any, do you believe advisable and upon what jobs? | None needed
at this time. |
| 5. Based on your own observations, which foremen are active in teaching enrollees how to improve their skill? Cite examples. | All. See remarks |
| 6. Are there enough skilled workers, including skilled enrollees, to insure proper accomplishment of the planned work? | <u>Yes</u> |
| 7. If not, how many men and of what skills are lacking? For what jobs are they needed. | Enough at present. |
| 8. Has the Supt. recognized this need, What action has he taken to secure them? What were the results? | See remarks |
| 9. Do the Supt's various handbooks and sets of instructions show evidence of study?
Are they kept in a place readily available?
Do they have "dog ears"?
Do the foremen study any of them? | <u>Yes</u>
<u>Yes</u>
<u>Yes</u>
<u>All study</u> |

10. What steps has the Supervisor taken to impress the Supt. and foremen with their responsibility for the training of workers? (Go into this in detail with each Supt., and with Supervisor or staff men, if contacted.) **Held meetings and given instructions to carry on training on all work.**
11. Do foremen have "plans ahead" and their work lined up on the jobs so that all phases of the work are handled in an efficient manner? **Yes**
12. Are foremen active in keeping crews balanced on the job? **Yes**

C. QUANTITY OF WORK AS COMPARED TO MAN-POWER AVAILABLE

1. Average enrollment during past 30 days **135**
2. Average number released to Supt. **99**
3. Into how many working groups was this turnout divided? **6**
4. List any crews which seem overly large for economical accomplishment of the work. **None**
5. List any jobs on which the output for the past 30 days impresses you as being too low. In your judgment, what are the reasons for low output? **None**
6. List any jobs on which the enrollees do not put in a full 6 hours on the job, exclusive of travel time. Give number of men involved and specific reasons why a full 6 hours is not spent. If less than 6 hours is not fully justified due to exceptional circumstances, what action has been taken to correct this? **None**
7. How many spike camps are out? **Two**
8. How many enrollees in such camps? **Bishop Sp. 19; Magee 11.**
9. Could the number of spike camps be increased to advantage? **No**
On what jobs?

D. USE AND CARE OF TOOLS AND EQUIPMENT

1. How many of the following machines on the job:
Trucks, 1½ ton **5**; Pick-up **1**; Dump **2**.
Bulldozers **1**; Tractors **1**; Compressors **1**;
Jackhammers **3**; Shovels **1**; Graders **1**.
2. What additional trucks and machines, if any, could be used to advantage and where? **None**
3. Has Superintendent tried to get more trucks or machinery, and with what result? **No**
4. What machines, if any, are out of commission, for how long, and for what cause? **All OK**
5. How much of this time loss was preventable, and how might it have been prevented? **See 5**
6. Are there any idle trucks or machines on the job? List number, type, and cause of idleness. **None**
7. Have surplus trucks or machinery, if any, been reported to Supervisor? **Yes**
8. Is full use being made of all trucks? Do they double shift where possible, haul capacity loads, stagger crew hauling, make unnecessary trips? Discuss in detail. **Where possible. Staggered when practical.**

- | | |
|--|--|
| 9. Are bulldozers double shifted?
If not, why? | <u>Yes</u> |
| 10. Are jackhammers double shifted?
If not, why? | <u>Yes</u> |
| 11. Are grading outfits double shifted?
If not, why? | <u>None in use</u> |
| 12. Are enrollees being used to fullest extent feasible
on bulldozers and tractors? | <u>Yes</u> |
| 13. Are blasting machines in use on all jobs requiring
explosives? | <u>Yes</u> |
| 14. Are there fully experienced powdermen on each job
where explosives are used? | <u>Best available</u> |
| 15. Check use of powder in loading and in execution.
Comment on it. | <u>OK Careful loading
and shooting</u> |
| 16. Is powder rationed out by Supt. to powder foremen? | <u>Yes</u> |
| 17. Are there adequate shop facilities for sharpening,
fitting and repairing all tools?
If not, what is lacking? | <u>Yes</u> |
| 18. Are tools properly conditioned for use? | <u>Yes</u> |
| 19. Do you find any tools, equipment, or materials
scattered about on the job, or are they gathered
up and properly stored? | <u>Stored</u> |
| 20. Do foremen keep their crews fully equipped with
necessary tools and materials? | <u>Yes</u> |
| 21. If material or equipment delays occurred, what
caused them? | <u>None</u> |
| 22. (a) Do all truck drivers have permits? | <u>Yes</u> |
| (b) Are speed and driving rules posted in truck cab? | <u>Yes</u> |
| (c) Any evidence of violation of these rules? | <u>No</u> |
| 23. (a) Are servicing facilities adequate? | <u>Yes</u> |
| (b) Is camp equipped with grease rack? | <u>Yes</u> |
| (c) Is adequate check kept on gasoline and oil issued? | <u>Yes</u> |
| (d) Is the handling of gas and oil and the storage
thereof done in a safe manner? | <u>Yes</u> |
| 24. Does Supt. require drivers to service and maintain
trucks in accordance with booklet, "O-ECW-ER-Equip-
ment, Truck Maintenance-Camp Supt's Responsibility"?
Check at least two trucks against the requirements of
this booklet and report your findings in detail. | <u>Yes</u> |
| 25. Does Supt. feel that the mechanic services assigned to
his camp are adequate to keep the trucks and machin-
ery in proper condition?
If not, discuss available services and additional needs. | <u>Yes</u> |

E. FIRE CONTROL PREPAREDNESS

- | | |
|---|-----------------------------|
| 1. What is the standard of preparedness set up for the camp? | <u>See notes</u> |
| 2. Is equipment to this standard at hand?
Is it in proper condition? | <u>Yes</u> |
| 3. Is the prescribed flying squadron selected, overhauled
and trained for its job? | <u>Yes</u> |
| 4. Do the selected smokechasers understand their job? | <u>Yes</u> |
| 5. Are the overhead men assigned to the flying squadron
the most competent fire bosses available in the camps? | <u>Yes</u> |
| 6. What preparedness measures have been lined up in ad-
dition to the prescribed standard? | <u>See notes under E-1.</u> |

7. Are adequate arrangements agreed upon with the Commander for holding men in camp in cases of impending need?
8. Are available transport facilities adequate for quick movement of 75 men? **trucks at main camp, 1 at**
9. What additional measures other than increasing size of squadron might be taken to improve adequacy of firefighting preparedness?
10. Check prohibition against smoking away from camp except at previously designated (posted) smoking sites, places of habitation or public camp grounds. Have enrollees been duly informed and are they complying?
11. Check fire protection in main camp. This is primarily an Army responsibility but the following should be given attention by the Supt.:
 - (a) All chimneys and stove pipes in F.S. buildings to be screened or provided with spark arresters.
 - (b) Metal floor boards under stoves.
 - (c) Blacksmith forges to be provided with screen or screened hood.
 - (d) Fire extinguishers should be available in F.S. buildings.
 - (e) Stoves should be safe distance from walls.
 - (f) Stove pipes should be riveted at joints where there is any danger of telescoping.
 - (g) Check for safe collars and roof jacks.
 - (h) Has a fire marshall been designated and is he giving proper attention to his duties? He is responsible for maintenance of fire tool caches, fire-proofing camp sites and is the fire prevention expert.

NOTE: Other fire prevention covered under G-7.

F. COORDINATION WITH ARMY

1. (a) Is camp construction completed?
 (b) If not, what remains to be done?
 (c) When is it expected to finish this?
 (d) How many enrollees are engaged in camp construction work?
2. Is camp construction over-refined?
 Cite instances.
3. (a) If Army overhead, aside from construction forces, consists of more than 23 men, list the uses to which the surplus is being put.
 (b) What action has been taken to reduce the force to 23 unless extras have been approved?
4. Are Forest employees and Army cooperating effectively?
5. Does Commander switch men without consulting Supt.?
6. Is mess satisfactory?
7. Are arrangements for lunches and "extra shift" meals satisfactory?
8. Is camp discipline such as to strengthen the disciplinary measures required on the job by the work agency?
9. Are men interested in their work?
10. Is selection and use of leader and asst. leader positions satisfactory to both agencies?

Yes
3 1-1/2 Ton stake body
each spike camp.

See notes under E-1.

No smoking except at camp. Bulletin boards posted. Regulations complied with.

Yes

Yes

Yes

Yes. All except blacksmith shop.

Yes

Yes

done.
Reconstruction being
Lockers, floor, in barrack
Sept. 15, 1937 water system

Six

No

23. Two of these are in training.

Yes

No

Yes. Average

Yes. Very good

Yes

Yes. 90 per cent

Yes

11. Are housing facilities for work agency employees commensurate with those occupied by Army men of similar rank? If not, what is needed.

Yes

12. Educational activities, (a) Does camp have an educational adviser?

Yes

(b) How many enrollees are taking courses?

132

(c) Are work agency employees cooperating?

Yes. All foremen teach classes.

G. SAFETY PROGRAM

1. Has a safety committee been established?
(See pages S-2 to S-4 ECW Handbook)

Yes

2. Does the committee have weekly meetings?

Yes

3. Have the Supervisory personnel and leaders and asst. leaders taken the first aid course?

Yes

4. Is transportation of enrollees handled in accordance with Safety Division Bulletins No. ECW-1 and ECW-19? (Pages S-7 and S-41 ECW Handbook.)

Yes

5. Have goggles where required been supplied to enrollees and do they use them? (See page S-12 ECW Handbook)

Yes

6. Check carefully and comment on the handling and use of explosives. (Pages S-21 and S-23 ECW Handbook)

7. Check for compliance with fire prevention suggestions of Safety Division Bulletin No. ECW-20 at any garages and gas and oil storage buildings. Comment.

OK

8. List any suggestions you may have which would improve safety conditions at camp or on the job.

Portable powder box is to be built

H. GENERAL

Comment on any pertinent features not covered in the regular report.

I. Statement by Forest Supervisor or State Forester:

I have read the above report, discussed it with

Inspector _____ and desire to comment

as follows: (Use extra sheets where necessary.)

(signed)

Forest Supervisor, or
State Forester

CCC

Supervision - Coeur d'Alene
Inspection, F-154

Coeur d'Alene, Idaho
September 4, 1937

A-4. Some changes have been necessary due to unforeseen circumstances. More clearing ^{was} ~~is~~ required on Road 208. Cardinal Creek hazard reduction crew ~~is being~~ ^{was} transferred to Uranus Creek Blister Rust Project in order to get this heavily infested area worked this season.

A-11. Ed Dunnigan has let up some on Blister Rust. Some areas had to be reworked by his crew.

Morris thinks that if he was transferred to a different camp he might do better.

A-16. The majority of the enrollees in this company are extra good workers and very dependable. It will be a hard blow to the work projects when some of the best boys go home because of the two year limit.

B-1. K. Maryott needs more training on Blister Rust work. He is very good on hazard reduction.

B-2. Instructions for hazard reduction and Blister Rust not usually carried on the job.

B-3. The 1937 Telephone Construction Handbook is not available. This will be furnished as soon as the Regional Office can furnish them to the Forest.

B-5. George and Maryott on hazard reduction, Rader on road work, Springer on public camp grounds, Heyn on telephone construction, Dunnigan on blister rust. All of these foremen and Superintendent Morris are very active in teaching, training and developing the enrollees.

B-8. Superintendent has trained dozer operators, jackhammer men, truck drivers, warehouse man, mechanic, powderman, and clerk. The results have been very good as these men are very efficient.

E-1. One hundred trained men equipped with calked boots, shirts, tobacco, sox, jackets. Transportation for 125 men, 25 loose tool outfit, 45 man pack outfit, 4 smokechaser packs. Arrangements have been made with Commanding Officer for clothes, medicine and other necessities.

H - General

The hazard reduction crew at Bishop Springs has fallen the snags on a strip 200 feet wide and a mile long in Sections 12 and 14, Township 53 N., Range 1 E. Foreman George, with part of the crew and a team, are decking the logs and piling the brush on a strip 30 feet wide through the center of the 200 foot strip. They are doing a good work both in falling and piling.

The telephone line to McPherson has been completed except for a few minor items. The crew of eleven men is working on the Independence Hill. They have about one-half of the poles set. Some of the spans were more uneven in length than necessary. It was suggested that a 150 foot piece of No. 9 wire be used as a tape which would make the spacing more accurate than pacing. This work is showing good progress. They plan to have this line completed by September 30.

The road work on Project 208 is well under way. The 3/8 yard shovel is being used on the longest dirt hauls. It is putting in between three and four hundred yards per shift. The drilling will be completed about September 10. This job is going good. There are about 200 cords of wood in the yard and that much more in the woods that is cut and ready to be hauled. If wood is to be cut a year in advance, some of the defective green hemlock could be cut for wood.

A standard powder house has been built up Downey Creek.

Flint and Morris feel that Dunnigan knows more about blister rust eradication than they do because of their not having worked on eradication and his long and good record on blister rust work. Also, that there are other blister rust men supervising and checking. However, I believe that it would help to keep up the morale of the blister rust crews if Morris would spend more time with them. It is nearing the end of the season when there is danger of slacking off on this type of work.

This is a well organized and efficient camp. The over-head and enrollees all seem to take an active interest in learning, training and doing.

Some changes are always necessary in the plans because the proper equipment is not always available when it would be most effective, unfavorable weather conditions prolong some jobs, emergency and unforeseen work has to be taken care of, the turnout is below the number expected, the new enrollees take extra time in training and getting the work done. I think that a few man months should be set up each month for emergency and unforeseen work. This would give the ranger and superintendent the necessary man power to do these jobs without being forced to take men off of the projects set up in the master plan.

COMPLAINTS or SUGGESTIONS by COMMANDING OFFICER:

REMARKS: 1. The locker for washing machine in this room is very unsatisfactory and creates a serious fire hazard in its present condition. This inspection revealed that there were dirty clothes, a can of oil and two cans of gasoline stored along with the washing machine in this locker. In the future close inspection will be made of this room and no gasoline, oil or dirty rags will be stored in same.

2. The barracks must be neater. Bunks will be given closer supervision to the end that uniformity will be had, and all shoes and lockers under same will
(continued on reverse side)

NOTE: The same system of ratings as used on Efficiency Reports will be used where required, i.e.,

Superior, 95% to 100%	Unsatisfactory, 65% to 75%

Deficiencies as noted below will be corrected at once and a report of action taken submitted to D.H.Q. within ten (10) days of date of this inspection.

Deficiencies Noted:

- (1) Sec. B Line 3-4-5-7-6 (2) Sec. B Line 8-9-20-21 (3) Sec. B Line 22-27
- (4) Sec. C Line 3-4-5 (5) Sec. Line (6) Sec. Line

By order of the District Commander:

Ford Trimble
Ford Trimble,
Captain, F.A.-Res., 413th F.A.,
Executive Officer.

REMARKS CONTINUED

be kept in the same manner and position. Hooks or hangers will be provided for clothing over bunks and barracks. Bags will be hung by the bunks in an orderly manner.

3. Most of the table tops and all of the condiment containers at this inspection were filthy. Closer daily inspection of mess hall will be made, and in the future the officer making such inspections will be held strictly responsible for the cleanliness of this building.

4. The garbage cans and racks for same are unsatisfactory and attention has been called to this fact on previous inspections. All cans will be scoured out daily and sand or abrasive will be used on the outside. If the condition of G.I. cans as given above is found it will be recommended that disciplinary action be taken.

5. Two bags of clothing, a pitcher of gasoline and cans of oil were found in this building. As these create a serious fire hazard, the officer responsible will make closer inspection and will closely observe all fire regulations.

- 6. Other Emergencies None.

COMPLAINTS or SUGGESTIONS by COMMANDING OFFICER:

Cont. B. 2. with linoleum.

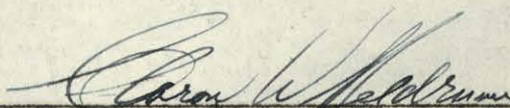

REMARKS: The mess hall floor had been cleaned just prior to time of inspection but showed mop streaks and mud. It is recommended that soap and clear water be used with frequent changes of water to avoid the muddy condition in the center of the room. Effort should be made to bleach the floor by the use of Chlorox in the water.

It is recommended that a traveling library be sent to this company as soon as possible.

NOTE: The same system of ratings as used on Efficiency Reports will be used where required, i.e.,

Superior,	95% to 100%	Unsatisfactory,	65% to 75%
Excellent,	85% to 95%	Inferior,	Below 65%
Satisfactory,	75% to 85%		

Total Efficiency; Rating for Camp EXCELLENT MINUS.

O (ECW)
Supervision - Coeur d'Alene
Inspection, F-154

Coeur d'Alene, Idaho,
February 1, 1937.

MEMORANDUM

Reference is made to my inspection of Camp F-154 and the various work projects on January 26 and 27 with Assistant H. Kottkey.

Equipment

Five 1½-ton stake trucks are used for transportation. They appeared clean and the general maintenance work is carried on each day by the drivers. Pickup C-851 is in good condition. Dump truck C-743 is being used while dump truck C-343 is in storage. Mechanic Ohland reported the mechanical condition of these trucks satisfactory.

Bulldozer No. 98 is in storage at Steamboat Spike camp ready for service about February 15.

Road 208 Reconstruction

This project work is completed for this work period.

Hazard Reduction Cardinal Creek

Snag falling on the Cardinal Creek job is progressing rapidly. The boys like this type of work and Morris is well satisfied with it as a winter project. The boys have a tent in which to eat lunch. The tent is equipped with a stove so that they may warm up or dry out. A trail has been made up two short ridges and the work centers from these.

The continuation of this project depends on slides and snow. The work should be continued as long as no snow overcast is necessary by using a bulldozer on the side of the road. It costs about forty dollars per round trip to handle snow with the plow under present conditions.

If this Cardinal Creek work is closed down for any reason snags along the 208 roadside strip 100 feet above the main road and between the road and river should be cut. This work will be centered mainly from Long Pool camp down river.

Miscellaneous Projects

This work, with ten men supervised by P. Hankins, is well under way. Six latrines have been constructed to date. The boys turn out about one building per day. Many tool boxes, lookout equipment boxes and other things are being constructed as need arises. The bench screw and miter boxes have been backordered. E. Rudd is checking on these and will see if he cannot hurry them along. The lumber and material for the rest of the latrines is being ordered by Rudd for early shipment.

Hankins and his crew are doing the maintenance necessary on the Yellow Dog Cabin. The cabin and porch floors are being replaced. New windows are being put in and new shutters adjusted to protect them. The porch has been fixed and the snow removed.

Flat Creek Road No. 400

The Flat Creek Road is cleared 132 stations, or 2½ miles, to the Flat Creek burn. The estimated needs to complete are given: Powder needs are 2 tons stumping 20%, 3 tons rock 60%. Dozer and compressor use is estimated at about two months. This appears to be a rather expensive work project to complete.

Yellow Dog roadside cleanup

Morris and Kottkey planned to shut this project down for the present. The men were spending most of their time shoveling snow. The Downey roadside job has been completed.

Lumber from the recreation hall at F-131 should be moved up to F-154 for use by Hankins' crew.

Reference is made to my conversation with Kottkey about sign display material to be fixed up by F-154. Use poster display BB-3 plate found in your Recreation Campground Improvement Guide. Perhaps it will be necessary to have the tops for the arch sawed by the mill on the Cabinet Forest.

Memo.

2-1-37

It was suggested that we could cooperate with the Army and furnish a cook for F-154 for the next three months. We should cooperate all we can to assist this camp under the present mental condition that may result from recent events. The use of a cook is approved and Cameron, a reliefer and good cook, should be arranged for with Moody, if desired, at \$125.00 per month.

Steamboat Spike Camp

The Carter camp is clean and appeared warm and dry. Bathing facilities are furnished and the boys were well pleased. C. O. Stevens is cooking, with an average meal cost of 15 cents with well-balanced, good meals.

Plans are made to move to the Steamboat camp after February 1.

Foreman Joki and Foreman Heyn are supervising the 25 CCC men and 5 ERA carpenters. The ditch for the pipe line is about one-third dug and installed. In the camp, the mess hall is practically finished as well as one of the sleeping quarters. Another bunkhouse and the wash house will be completed early next week. If present plans are followed, the men will move as soon as water is available. A 50-man equipment setup is ready in the Coeur d'Alene Warehouse when needed to furnish the camp. The present equipment should be returned to Kingston or Coeur d'Alene to be worked over this winter.

It is felt that the work from F-154 is well supervised and going in a business-like manner. Morris is doing a very satisfactory job with winter conditions as they are.

O (ECW)
Supervision - Coeur d'Alene
Inspection F-154

Coeur d'Alene, Idaho,
April 19, 1937.

MEMORANDUM FOR MR. SIMPSON

On April 13, Rangers Larsen and Flint, Superintendent Morris, Locator Lockridge and I went over the locating to be done from above Flat Creek to where the road comes down to water grade.

In order to make one large curve instead of the present "W", it will be necessary to increase the grade to five or seven percent in order to get the best alignment possible without making the fills too high. The shortest part of the curve in the main draw would have a radius of about 175 feet. The curve on the ridge above would be about the same. The grade north from the ridge will be about six percent.

Lockridge was instructed to put in as good alignment as possible for a Class 3 road with no grade over seven percent. He and Larsen were sure that most of the grade would be four or five percent with a small amount of six. Eight percent is the maximum for a Class 3 road. Lockridge is now doing the locating. The additional clearing can be done when the road is passable. This should be before the weather gets too dry so that the slash may be burned on the right of way.

At present, the road is impassable above Downey Creek because of the soft places caused by the frost going out and a few bad slides. About eight inches of surfacing were put on the Downey Flat last winter. This will be lost in the mud if the road is traveled before it has a chance to settle. If the weather stays warm, the road bed should be settled down by May 1. The snow is from 12 to 30 inches in the timber from below Rock City to Brett Creek.

Foreman Jacobson and Sub-foreman Springer, with eight enrollees, are working below camp on drainage and slides. If the slides continue to come down, a dozer will be necessary to clean them out.

Telephone Maintenance

Not much can be accomplished until the road is passable above camp. When the treating plant is set up at Magee, a skilled worker and three or four enrollees can treat the poles at Magee if no ERA men are available.

Trail Reconstruction

The old river trail above Sisson's Bridge was looked over with Superintendent Morris. There is some snow here. One slide about a hundred feet long, three-fourths of a mile above the bridge, can be rebuilt when men are available. This can be rebuilt near the old grade. It would not be worthwhile to change the location for this short distance. Some brushing out and maintenance can be done also. The section below Little Canyon Creek cannot be reconstructed until later because of the high water.

Hazard Reduction Work

This work stopped on April 9 because the road was not passable. The fires on this area will be dug up and put out soon after the snow goes off. There is from 12 to 30 inches of snow on the area where the fires are located. Most of the fires are out now but some are still following along old windfalls.

Flat Creek Road

Stumping will start on this project when the main road can be used. The latrines are completed and Mr. Hankins suggested that Mike Palshook, who has been working on these, be sent around to help the lookouts put up the ones that are knocked down. This seems to be a good idea since it would insure their being assembled according to the standard plan. The mess boxes are nearly complete. Hankins and three men are working on signs and signposts. He estimates about four weeks' work will be required to complete these. It was suggested to Barry and Morris that this work be given priority so that as much as possible be finished before Hankins goes to his summer assignment.

The turnout of the enrollees at the main camp was 13 on April 14 and 29 at the spike camp. The replacements will be in the 19th or 20th.

Spike Camp

The road job was inspected on April 15 with Superintendent Morris and Foreman Nearing. The work is progressing well considering the weather conditions. Nearing thought that by the 24th all the drilling and blasting would be done below camp. I think this will be done between the 24th and 30th. There will be some dozer work here after the first. It is too wet to accomplish much except on the rock work.

Telephone Maintenance and Construction

Herb Carlson is assigned here as a skilled worker. He and three or four enrollees will work on the lines in the vicinity of Kingston. The camp at Grizzly will be cleaned up as soon as men are available to put on this work. There is some cleanup to do at Carter when the snow is gone. Foreman Heyn, two ERA men and four enrollees were working on camp construction. The last barracks will soon be ready to be assembled. There is some work to do on the garage and oil house and the recreational hall to be built yet. There is more cleanup work to be done on the grounds when the snow is gone.

Road Maintenance

The slides should be removed from the lower end of the Grizzly Road and Browns Creek Road with the dozer from this camp. Also, the slides on the lower North Fork Road. ^{the} If the snow is plowed over Tepee Summit, it might be done with crew.

When the replacements arrive, Morris plans to fill this camp. This will be six more enrollees, making a total of thirty-five until after the last barrack is finished when the total will be brought up to fifty.

The camp construction should be finished, if possible, before the camp is moved June 1. The cleanup work should be done before it gets too dry to burn. The telephone work will be in progress for at least a month. The dozer work on maintenance will take between two and three weeks.

The work setup was discussed with Hand and Morris at Kingston. Morris plans to take Heyn to the main camp April 20. Jacobson will be brought to the spike camp to take Joki's place when he goes to Kingston May 1. Another foreman should be appointed to fill this vacancy.

Memo.

4-19-37

Nearing has two weeks' leave. Because of the amount of other work to be done here before June 1, it is recommended that the compressor be tied up the first half of June, that Nearing be given his leave at this time, and that the miscellaneous work be given preference over the road construction on Road No. 409.

Camp F-154

Coeur d'Alene, Idaho,
July 21, 1937.

MEMORANDUM FOR RANGER FLINT AND SUPERINTENDENT MORRIS

1. Bishop Springs Spike Camp

Cecil George - Foreman.

The plan to continue the North-Snow fire lane (and road) on toward Independence Creek should have first priority. Thirty foot strip to be windrowed for burning. An additional 85-foot strip on each side of cleared strip is to have the snags felled and left.

It will be necessary to check closely with Foreman George as to cleanup of the camp area, orderliness of quarters and grounds, cleanliness of kitchen, and sanitation facilities. Provision is to be made for protection of gas and lubricants both as to theft and fire danger. The spring is to be closed in. Dampers are needed in the stove pipes.

2. Magee Spike Camp

John Heyn - Foreman.

In certain respects the telephone specifications need to be changed. Poles should be squared up on bottom before treatment. Provision to finish the survey of line and relocate about ten poles by other than the crew foreman are being made by Ranger Flint. Crew foreman has enough to attend to on the actual construction. Telephone manual provides that on turns all the brackets shall be placed on outside of turn and this method should be followed on rest of job. Lightning protection on poles was not observed and should be initiated both on work done and future work. "Rake" as provided in the Telephone Manual should be provided from present work on. Placing of brackets and guy wires should be more carefully done. Guy wires should have one complete wrap around pole.

Depth of holes and tamping of holes need to be watched by Foreman. At the first opportunity or when the Tepee Telephone Line is completed the Magee CCC grounds and wreckage should be cleaned up.

3. Blister Rust

Ed Dunnegan - Foreman

Acreage is ahead of schedule--partly due to inclusion of ribes-free acreage--even though number of men assigned is below set-up. This is No. 1 project in priority and being a seasonal job, it should be assigned the full number of men set up unless impossible to do so.

4. Hazard Reduction

Kenneth Maryott - Foreman.

Cardinal Creek within fire lane nearly completed. Plan to cut snags less than two hundred feet outside of lane is OK. Also the old lane should have windfalls across it cut out and preferably piled for burning but where scattering can be thrown inside of lane. Unburned old material should be put in shape for fall burning. A foot trail and minor firebreak five feet wide should be constructed up the gulch where telephone is now, about to telephone then up onto bench and north about at lower edge of Cardinal fire area to old fire lane near Cardinal Creek. This will improve fire protection and afford access when stand improvement is undertaken.

The Brett Creek area south of Brett Creek should be undertaken next--a straight felling job.

Fire Arrangements - phone on job, truck and loose tools held out at job. Good lineup.

5. Powder House

Recent instructions call for all powder houses, permanent and portable, to be in accordance with Safety ~~First~~ Regulations. A 5000-pound, 7 x 9 double wall, sand-filled frame building was agreed on as most economical and adequate. Salvaged lumber can be secured. Twenty-six gauge galvanized sheet iron for roof and walls and steel plate for door will have to be purchased. Location to be

selected--possibly on Downey Creek.

6. Coeur d'Alene River Road

Cal Rader - Foreman -- Springer - Assistant.

Clearing of present section expected to be finished about July 28 or 29. Compressor available any time and bulldozer about August 1. Method of endhauling material discussed. Believe that truck-shovel (3/8 yards) would be valuable supplement to bulldozer for long haul and light bank widening. I will take up with Engineering.

7. Rock City CC Camp

This camp should have salvage completed and cleanup finished.

8. Campgrounds

No work being done at time of visit.

This job takes an out-of-proportion number of overhead but there is need to make more progress on this type of work than in the past. Therefore, it should be given its priority as on Work Plan. Long Pool Camp needs to be replanned to give a one-way road and exit and upper one obliterated. All signs are non-standard and should be replaced. Also, Miners Creek Camp. Grounds need policing, toilet doors fitted, garbage tops adjusted, some tables repaired and replaced or reset. New stoves are needed when new design ready. New sawn log tables are proposed and material will be available at Big Creek.

Coeur d'Alene, Idaho.

Dear Mr. Simpson:

Enclosed are copies of General Inspection Report of
Camp F-154, Devils Elbow made July 19 to 21.

You were present during this inspection and have dis-
cussed the report with Superintendent Morris and Mr. Akridge.

It is noted that of the things listed by Superintendent
Morris for correction, action was taken on a number of them at
the time of the inspection and Mr. Morris stated that prompt
action would be taken on the others.

Very sincerely yours,

EVAN W. KELLEY,
Regional Forester.

A. QUALITY OF ORGANIZATION

- | | |
|---|--|
| 1. Has Supt. a detailed work program? | <u>Yes</u> |
| 2. Does it define priorities of jobs? | <u>Yes</u> |
| 3. Does Supt. have well-developed "plans ahead" for each job? | <u>Yes</u> |
| 4. What success has he in making these plans materialize? | <u>Satisfactory</u> |
| 5. Does Supt. keep an adequate record or chart showing accomplishment based on plan of work? | <u>Yes</u> |
| 6. If not, did you suggest how to keep such a record? | <u> </u> |
| 7. Has Supt. a thorough grasp of his job? | <u>Yes</u> |
| 8. What is his attitude towards the job? | <u>good</u> |
| 9. Basing your reply on analysis of Supt's diary, if available, or on other information, how many hours per day does he average away from camp on the work projects? | <u>7 hours</u> |
| 10. How many hours per day do the enrollees average on work projects? | <u>6½</u> |
| 11. Are foremen and facilitating personnel thoroughly competent to direct or accomplish jobs to which assigned? (Dig into this and discuss <u>thoroughly</u> .) Are there any misfits? If so, on what jobs? How many replacements has this camp had because of inefficiency or other unfitness? (Do not include releases due to no further need of certain overhead.) | <u>Yes</u>
<u>No misfits</u>
<u>None</u> |
| 12. Are foremen, leaders and asst. leaders adequate in numbers to get reasonable production from unskilled, untrained workers?
If not, what do you suggest? | <u>Yes</u> |
| 13. Are they distributed over the working forces to the best advantage?
If not, what do you suggest? | <u>Yes</u> |

- | | |
|--|---|
| 14. What are the minimum and maximum numbers of workers under any foreman?
What is the average for all foremen? | 17 Maximum
5 minimum
<u>12</u> |
| 15. Are the foremen alive to their jobs in directing the work? How do they size up? Rader is outstanding. | Yes. Average |
| 16. Where you find men loafing on the job, give foreman's name and the number loafing in each case. Discuss such instances with Supt. and state what comments he offers. | No men found loafing. |
| 17. Check clerical work and state whether it is well organized and effectively handled. Does Supt. know where all men are assigned each day?
Does he keep necessary records on time by projects?
Does he submit his reports on time?
Has he sufficient clerical help to meet the needs? | Well organized & effectively handled.
<u>Yes</u>
<u>Yes</u>
<u>Yes</u>
<u>Yes</u> |
| 18. How many inspections of field work have Supervisor or staff made during this enrollment period? | <u>4 inspections from S. Staff.</u> |
| 19. How many purely "camp visits" by Supervisor or Staff? | <u>4</u> |
| 20. How many weeks since full company arrived, or since start of period in case company arrived during a previous period? | <u>14½ weeks</u> |
| 21. Do Supervisor and staff men make it a practice to leave with the Supt. definite written memoranda covering instructions or suggestions made as a result of their inspections? | <u>Yes</u> |

B. QUALITY OF WORK ACCOMPLISHED

- | | |
|---|---|
| 1. Do Supt., foremen, leaders and skilled workers fully understand the standards and specifications applicable to the work on which engaged? Line Const.,
Do the Supt. and foremen carry the specifications with them out on the jobs?
Discuss any exceptions. | Yes, except Tel. <u>see remarks.</u>
<u>Yes, where necessary</u>
<u>Yes, except tel. line</u> |
| 2. Are standards and specifications adhered to? const.
If there are any deviations, what are they and upon what jobs? See remarks. | <u>See remarks.</u> |
| 3. Are written specifications lacking for any of the jobs under way?
If so, list such jobs? | <u>No</u> |
| 4. What changes in plans, locations or specifications, if any, do you believe advisable and upon what jobs? | <u>None, except tel. line const.</u> |
| 5. Based on your own observations, which foremen are active in teaching enrollees how to improve their skill? Cite examples. active in teaching. | <u>Quality of work shows foremen are</u> |
| 6. Are there enough skilled workers, including skilled enrollees, to insure proper accomplishment of the planned work? | <u>Yes</u> |
| 7. If not, how many men and of what skills are lacking? For what jobs are they needed? | |
| 8. Has the Supt. recognized this need, What action has he taken to secure them? What were the results? | |
| 9. Do the Supt's various handbooks and sets of instructions show evidence of study?
Are they kept in a place readily available?
Do they have "dog ears"?
Do the foremen study any of them? | <u>Yes</u>
<u>Yes</u>
<u>Yes</u>
<u>All of them.</u> |

10. What steps has the Supervisor taken to impress the Supt. and foremen with their responsibility for the training of workers? (Go into this in detail with each Supt., and with Supervisor or staff men, if contacted.)
11. Do foremen have "plans ahead" and their work lined up on the jobs so that all phases of the work are handled in an efficient manner?
12. Are foremen active in keeping crews balanced on the job?

By holding meetings and stressing the importance of training.

Yes
Yes

C. QUANTITY OF WORK AS COMPARED TO MAN-POWER AVAILABLE

1. Average enrollment during past 30 days 125
2. Average number released to Supt. 93
3. Into how many working groups was this turnout divided? 5
4. List any crews which seem overly large for economical accomplishment of the work. None
5. List any jobs on which the output for the past 30 days impresses you as being too low. In your judgment, what are the reasons for low output? None
6. List any jobs on which the enrollees do not put in a full 6 hours on the job, exclusive of travel time. Give number of men involved and specific reasons why a full 6 hours is not spent. If less than 6 hours is not fully justified due to exceptional circumstances, what action has been taken to correct this? All crews put in full 6 hrs. on job.
7. How many spike camps are out? 2
8. How many enrollees in such camps? 14, Bishop Springs; 11, Magee
9. Could the number of spike camps be increased to advantage?
On what jobs? No

D. USE AND CARE OF TOOLS AND EQUIPMENT

1. How many of the following machines on the job:
Trucks, 1½ ton 5; Pick-up 1; Dump 1.
Bulldozers _____; Tractors _____; Compressors 1;
Jackhammers 4; Shovels _____; Graders _____.
2. What additional trucks and machines, if any, could be used to advantage and where? None at present, see Remarks.
3. Has Superintendent tried to get more trucks or machinery, and with what result? No.
4. What machines, if any, are out of commission, for how long, and for what cause? 1 dump truck brakes to be relined.
5. How much of this time loss was preventable, and how might it have been prevented? No lost time, see remarks.
6. Are there any idle trucks or machines on the job? List number, type, and cause of idleness. Yes, see remarks.
7. Have surplus trucks or machinery, if any, been reported to Supervisor? Yes
8. Is full use being made of all trucks? Do they double shift where possible, haul capacity loads, stagger crew hauling, make unnecessary trips? Discuss in detail. See remarks.

9. Are bulldozers double shifted? None in use
If not, why?
10. Are jackhammers double shifted? None in use
If not, why?
11. Are grading outfits double shifted? None in use
If not, why?
12. Are enrollees being used to fullest extent feasible on bulldozers and tractors? 1 bulldozer operator on Det. Service.
13. Are blasting machines in use on all jobs requiring explosives? Yes
14. Are there fully experienced powdermen on each job where explosives are used? Best available
15. Check use of powder in loading and in execution. Comment on it.
16. Is powder rationed out by Supt. to powder foremen? Yes
17. Are there adequate shop facilities for sharpening, fitting and repairing all tools? Not at present.
If not, what is lacking? Motor to power plant.
18. Are tools properly conditioned for use? Yes
19. Do you find any tools, equipment, or materials scattered about on the job, or are they gathered up and properly stored? None found
20. Do foremen keep their crews fully equipped with necessary tools and materials? Yes
21. If material or equipment delays occurred, what caused them? None found
22. (a) Do all truck drivers have permits? Yes
(b) Are speed and driving rules posted in truck cab? Yes
(c) Any evidence of violation of these rules? No
23. (a) Are servicing facilities adequate? Yes
(b) Is camp equipped with grease rack? Yes
(c) Is adequate check kept on gasoline and oil issued? Yes
(d) Is the handling of gas and oil and the storage thereof done in a safe manner? Yes, At main camp.
Hitest barrel at S. Camp not grounded.
24. Does Supt. require drivers to service and maintain trucks in accordance with booklet, "O-ECW-ER-Equipment, Truck Maintenance-Camp Supt's Responsibility"? Yes
Check at least two trucks against the requirements of this booklet and report your findings in detail.
25. Does Supt. feel that the mechanic services assigned to his camp are adequate to keep the trucks and machinery in proper condition? Yes
If not, discuss available services and additional needs.

E. FIRE CONTROL PREPAREDNESS

1. What is the standard of preparedness set up for the camp? 100 trained men.
2. Is equipment to this standard at hand? 60 man pack out. 25 man Loose T. Out.
Is it in proper condition? Yes
3. Is the prescribed flying squadron selected, overhauled and trained for its job? Yes
4. Do the selected smokechasers understand their job? Yes
5. Are the overhead men assigned to the flying squadron the most competent fire bosses available in the camps? Yes
6. What preparedness measures have been lined up in addition to the prescribed standard?

7. Are adequate arrangements agreed upon with the Commander for holding men in camp in cases of impending need?
8. Are available transport facilities adequate for quick movement of 75 men? at main camp. 1 at each
9. What additional measures other than increasing size of squadron might be taken to improve adequacy of firefighting preparedness?
10. Check prohibition against smoking away from camp except at previously designated (posted) smoking sites, places of habitation or public camp grounds. Have enrollees been duly informed and are they complying?
11. Check fire protection in main camp. This is primarily an Army responsibility but the following should be given attention by the Supt.:
 - (a) All chimneys and stove pipes in F.S. buildings to be screened or provided with spark arresters.
 - (b) Metal floor boards under stoves.
 - (c) Blacksmith forges to be provided with screen or screened hood.
 - (d) Fire extinguishers should be available in F.S. buildings.
 - (e) Stoves should be safe distance from walls.
 - (f) Stove pipes should be riveted at joints where there is any danger of telescoping.
 - (g) Check for safe collars and roof jacks.
 - (h) Has a fire marshall been designated and is he giving proper attention to his duties? He is responsible for maintenance of fire tool caches, fire-proofing camp sites and is the fire prevention expert.

NOTE: Other fire prevention covered under G-7.

F. COORDINATION WITH ARMY

1. (a) Is camp construction completed?
 (b) If not, what remains to be done?
 (c) When is it expected to finish this?
 (d) How many enrollees are engaged in camp construction work?
2. Is camp construction over-refined?
 Cite instances.
3. (a) If Army overhead, aside from construction forces, consists of more than 23 men, list the uses to which the surplus is being put.
 (b) What action has been taken to reduce the force to 23 unless extras have been approved?
4. Are Forest employees and Army cooperating effectively?
5. Does Commander switch men without consulting Supt.?
6. Is mess satisfactory?
7. Are arrangements for lunches and "extra shift" meals satisfactory?
8. Is camp discipline such as to strengthen the disciplinary measures required on the job by the work agency?
9. Are men interested in their work?
10. Is selection and use of leader and asst. leader positions satisfactory to both agencies?

Yes

3 1/2 ton Stake bodies
at each Spike camp.

See remarks

Has been announced at general Safety Meetings, posted on bulletin board. No men found smoking out of bounds.

11. Are housing facilities for work agency employees commensurate with those occupied by Army men of similar rank? If not, what is needed.

Yes

12. Educational activities, (a) Does camp have an educational adviser?

Yes

(b) How many enrollees are taking courses?

100%

(c) Are work agency employees cooperating?

Eight. Dunnigan, Two; Springer

2, Rader 1, Heyn 1, George 1, Maryott 1. Total enrollment - 111. Supt. and C.O. train leaders (16).

G. SAFETY PROGRAM

1. Has a safety committee been established? (See pages S-2 to S-4 ECW Handbook)

Yes

2. Does the committee have weekly meetings?

Yes

3. Have the Supervisory personnel and leaders and asst. leaders taken the first aid course?

Yes

4. Is transportation of enrollees handled in accordance with Safety Division Bulletins No. ECW-1 and ECW-19? (Pages S-7 and S-41 ECW Handbook.)

Yes

5. Have goggles where required been supplied to enrollees and do they use them? (See page S-12 ECW Handbook)

Yes

6. Check carefully and comment on the handling and use of explosives. (Pages S-21 and S-23 ECW Handbook)

Satisfactory. Fire extinguishers & sand barrel in each bldg. in most accessible place-well posted. See summary sheet for minor findings that need correction.

7. Check for compliance with fire prevention suggestions of Safety Division Bulletin No. ECW-20 at any garages and gas and oil storage buildings. Comment.

8. List any suggestions you may have which would improve safety conditions at camp or on the job.

H. GENERAL

Comment on any pertinent features not covered in the regular report.

I. Statement by Forest Supervisor or State Forester:

By L. J. Morris, Supt.

I have read the above report, discussed it with

Inspector Akridge and desire to comment

as follows: (Use extra sheets where necessary.)

New powder house authorized and sheet iron delivered.

Narrative report: deviation from Plan of work-Blister rust is simply inclusion of ribes free area. On 208 road survey laid out bigger job than first contemplated. Ranger Flint has taken over the location of the telephone line.

(signed) Chas. D. Simpson

Forest Supervisor, or
State Forester

REMARKS

- B-1 Apparently the advocated specifications on a double Metallic telephone line were not followed entirely. Action has been taken to correct the discrepancies found during this inspection.
- B-2 Improper rake in poles on curves; lightening protectors not installed in line; brackets not properly installed on curves; Job, Metallic telephone line construction.
- B-3 A 3/8 yard shovel could be used to advantage about August 1, on Reconstruction of road #208.
- D-5 Dump truck put in storage. Brakes relined while in storage.
- D-6 One Ingersoll Rand Compressor, 370, Shop No. 46.
Four Jackhammers. Gardener Denver.
One steel sharpener, Ingersoll Rand. Shop #2.
Due to reduction in allotment we are unable to finance above listed machines. Will be started about August 1.
- D-8 I have no regular double shifts at present. Trucks haul capacity loads and stagger crew hauling where possible to do so.
- D-15 No powder in use at present, checked stumping that had been done at a previous date. Found a few stumps in fill of old road which had not been loaded from upper side, apparently a few had been loaded a little too heavy, due to stumps being old and rotten.
- D-17 Motor to power grinder sent to shop for repairs. Due to steel strike we have been unable to secure parts. Haul tools 6 miles to Camp F-132 to be sharpened. Other facilities satisfactory.
- E-6 Enrollees have been provided with calked boots; provisions have been made to keep a unit in separate barracks. Telephone installed on Hazard reduction jobs and 25 man loose tool outfit kept in truck while on jobs. Necessary arrangements have been made with the Army for holding in stand-by crews over week ends, and evenings when it is necessary.

E-11-A

The Spike Camp Foremen will be required to make weekly inspections on sanitation, safety, and fire prevention. The foreman will be furnished with such information as is needed to follow duties.

F-1A Installing lockers in all barracks.
Repairing floors in barracks.
Building new reservoir at water supply.
The work is expected to be completed by August 1.

E-9 New enrollees are now being conditioned and will be trained and placed in fire organization at earliest possible date.

By L. J. Morris,
Camp Superintendent.

Inspection-F-154, Devil's Elbow.

Prichard, Idaho,
July 21, 1937.

MEMORANDUM OF GENERAL INSPECTION

Camp Superintendent, Leonard J. Morris.
Company Commander, Capt. Hufford.

Average enrolled strength week ending July 21, 117.
Average number assigned to road work the past 10 days, 16.

Percent of strength allocated to road work this period to date-24%.

Accompanied by Supervisor Simpson, Ranger Flint, and Supt. Morris we visited the Coeur d'Alene River Road #208, a class 3 reconstruction project, on July 19. On the morning of July 20 we inspected Longpool and Miner Creek's campgrounds and in the afternoon of July 20 the Hazard Reduction, Bishop Springs project and the Independence & Tepee Creek pole telephone line, a four line braked pole construction project.

A. QUALITY OF ORGANIZATION

The Superintendent has a detailed approved Master Plan of Work set up for Nowhere Camp, F-155. After reviewing the cost of moving, and the maintenance necessary for the Nowhere camp for occupancy and considering the accessibility of the projects from the Devil's Elbow camp it was decided that it would be cheaper to leave the camp at the present location of Devil's Elbow.

The Superintendent bases his plans on the Master Plan of Work. He states that he cannot derive any benefit from the advocated job sheets or project sheets for advance planning of work. The Supervisor's office also has arrived at the same conclusion about the use of these sheets, since they are a duplication of records or forms already in use before the job & progress records were originated.

The only deviation from the approved Master Plan of Work is the addition of about 600 Acres of Blister Rust Control Work. There is now a total of 1200 Acres of this work whereas only 650 were provided for in the original plan. The Man-days planned for priority #8, road #400, Flat Cr., Class 2 construction are being used on the Coeur d'Alene River road, a class 3 project. Apparently this project was underestimated. This is due to the low turnover of men, about 15% less than estimated.

The Cardinal Cr. hazard reduction area is being finished, a project that was carried over from the Eighth period. This project is substituted for priority #7, Brett Cr. Hazard reduction area. From this set-up the Supt. plans his work and apparently is obtaining very good results and is making all phases of the organization and job planning without any tag ends or lost motion.

The field work is inspected by Ranger Flint. The camp is under his direct supervision. The Supervisor's office makes a general or technical inspection of projects of this camp on an average of once a month.

B. QUALITY OF WORK ACCOMPLISHED

The Superintendent has not been furnished with the 1937 Construction handbook. He does have a 1936 construction handbook. The Superintendent has not been furnished with the Project Special Instruction for road construction as advocated on page 201c, Forest Truck Trail Handbook. It is believed that if a construction profile were furnished the Supt., as advocated on page 401 of the truck trail manual, it would aid the construction Supt. or foremen in planning their work and the kind of machinery to be used on excavation work, and it would be possible to tell when equipment could be used and the type to use. In other words it would give the Supt. a chance to build the road by the most practicable method. The clearing was done in compliance with 1935 specifications, not in compliance with 1937 specifications. The clearing should be widened to three feet instead of 2 ft. from cut stakes and shoulders of road.

B-3 I do not believe that the Supt. and foremen are furnished with adequate and sufficient instructions to build the four line metallic telephone line to the advocated Regional specifications. The only specifications available are those in the handbook on Const. & Mtce. issued in 1925. Some discrepancies noted on the line are: there was no rake on corners, on sharp corner brackets on inside of poles; no lightning protection installed, and guys were not installed properly. The guys were looped over the pole resting on the brackets and do not have the standard two wraps of the guy cables around the poles. I understand that most of the poles and guys were set and installed by an ERA crew last fall and that the CCC crew were finishing installing wires this spring. It might be that some of the points are not in accordance with Regional practice. I would suggest that the Forest obtain specifications from the R.O. pertaining to this type of line and also Memorandum E, Surveys Telephone lines, for telephone locators. I would also suggest that the line be located in compliance with the EnSurvey memorandum. If this practice was put in effect it would relieve the foreman of much of the responsibility since he has to locate and build the telephone line at the same time. I believe that the foreman is capable of constructing the line to specifications if he knew exactly what the advocated standards are.

B-4. I believe that if the Ranger and Superintendent would set up a monthly plan for work in the camp a month ahead and in compliance with the approved Master Plan of Work and allotment available, the Supt. would be able to finish projects without any tag ends in a allotted time. This is not to imply that the Supt. has not a thorough grasp of his job, but I believe the monthly plan would improve planning and jobs would be finished with a maximum of economy.

B-6 It is my opinion that they should have a skilled telephone line construction worker or a skilled telephone line locator.

D-USE AND CARE OF TOOLS AND EQUIPMENT

I believe that a 3/8 yard shovel would aid in ending hauling excavation material on the Coeur d'Alene road. The greatest amount of end haul material to construct road #208 is taken from the back slope of the existing road. From the way the existing material to be excavated is located and the 500 foot haul, a power shovel appears to be the most feasible way. If a dozer or rotary scraper were used the back slope material would have to be back sloped by hand and end hauled by dozer or scraper making it possible to handle the material twice and a chance of holding up traffic on this main traveled road during fire season. If a shovel was made available the excavation material could pick up from the back slope and dump trucks loaded. It was not possible to make a good estimate of the amount of yardage to be moved and the distance of haul, since there was no information such as a construction profile available.

The Supervisor states that he plans to build a powder and cap magazine in accordance with CCC specifications. The powder storage available is of single log construction in compliance with the 1935 truck trail specifications, since the magazine in use was built at that time.

I believe that they should make up primers for blasting as advocated on page 517 of the truck trail manual, instead of the practice of half hitching the lead wire around the primers.

The Superintendent plans to start equipment working on this project around August 1. The date of the availability of a dozer is dependent on the date the Big Creek camp will be finished with it. This I understand will be about August 1.

They plan on doing the rock work starting Aug. 1. It is intended, I understand, to drill all the rock and shoot it when a dozer is available. In doing this the road will not be blocked any length of time, which is especially important during fire season.

There are a few findings on the summary sheet that need correction and the Superintendent states that he will take action on them immediately. In a general summary it is my opinion that the Superintendent and foremen have everything well in hand.

/s/ Frank Akridge,
CCC Inspector.

SUMMARY OF FINDINGS

1. Aiming chart will be provided for adjusting of headlights.
2. Extra fuses and headlight bulbs will be put in each truck for emergency use.
- °3. Discrepancies found on truck inspections will be corrected.
4. Powder storage will be built to specifications when authorized to do so. (Also cap magazine.)
5. Primers should be made up in compliance with Truck Trail manual, page 517.
- °6. Swimming instructions pertaining to enrollees will be posted on spike camp bulletin board.
- °7. Duties of Fire Marshall, 0-471, will be furnished to Spike camp foremen and they will be instructed to follow outlined duties.
- °8. Adequate "No Smoking" signs will be posted in the main and spike camp areas.
9. Bishop Springs Spike Camp:
 - a. Urinals will be installed in latrines.
 - °b. Gasoline will be grounded, (see page 49a ECW Handbook.)
 - c. Gasoline will be stored in adequate storage to meet specifications.
 - d. Sand barrels will be provided at gasoline and oil storage.
 - °e. Two small holes were found around Garbage pit cover. These corrected while on inspection.
 - °f. Specification goggles will be sent to spike camps for use with hand emery wheels before emery wheel is put into use.
 - °g. Protection hood will be provided on hand emery wheel before it is put into use.
- °10. Butts of poles squared before creosote treatment.
- °11. Sand at treating plant will be put in barrels and at a more accessible place.
12. 1937 Forest Truck Trail Handbook will be requisitioned.
- °13. Discrepancies noted on telephone line construction will be corrected to meet advocated Forest standards.
14. Sign will be posted at east end of road construction preventing swimming, fishing, or other activities during rock blasting.

15. It is suggested that sufficient testing stations be located on Independence, Tepee Metallic line under construction and circuit broken to insure against possible lightening traveling to enrollees working on line.
- °16. Adequate telephone specifications will be requisitioned.

°All points so indicated means the Supt. has taken remedial action during inspection and corrected them.

/s/ Frank Akridge,
CCC Inspector.

Immediate action will be taken to correct all points herein.

/s/ Leonard Morris,
Project Supt.

MEMORANDUM OF TECHNICAL ROAD INSPECTION

Camp Superintendent, L. J. Morris.
Camp Commander, Captain Hufford.

Average enrolled strength week ending Dec. 19-159.
Average number assigned to road work past ten days-41.
Percent of strength allocated to roads this period to date-43%.

Accompanied by G. Haynes, H. Kottkey and L. J. Morris
we inspected the Flat Creek road, a class 2 project.

1. Survey.

The main object of this road is for forest utilization.
The locator, Bill Larson, located this road with this objective
in mind.

The alignment appears to meet the specifications of a
Class 2 project. The only staking is contour stakes and center
line location. The balance sections on the center line location
were made by estimating cut and fill sections as stated by
Mr. Haynes, will be balanced before any construction is done.
They will encounter rock in many sections of this road.

2. Clearing

The only work that it is planned to do this period is the
clearing. On the contour sections the clearing is done in accor-
dance with the clearing tables in the region's Truck Trail manual.
On the center line location the clearing width is estimated for
a width narrow enough to insure against the clearing being too
wide after the balance sections are made. It is planned to
widen the clearing after the fills and cut sections are balanced.

The brush is piled and burned in the right-of-way. The
white pine logs are cut in lengths so that they can be sold.
They do not plan to peel or burn the white pine logs until next
spring unless the logs are sold prior to that time.

The stumps on this road are all cut the same height in the
construction prism on the center line location. If the cut and
fill were balanced the stumps could be cut accordingly. As it is
now all stumps in the construction prism will have to be removed
or the stumps where necessary re-cut so that they will be at least
one foot below the road surface grade.

C. J. Alene
✓CDS
✓SCS
✓WGG
✓GSH
HD
WRR

Considering all factors the quality and quantity of work is good. The resultant work as to quality and quantity of work is governed by the final location when the cut and fills are balanced. This also is true on some of the contour sections where the contour grade line is from five to eight feet above the bottom land. The excavated sections on the contour location will be governed by the fill sections that will bank up on the bench ground which will in turn no doubt have some effect on the width of clearing where the regular clearing tables for contour sections are not applicable.

/s/ Frank Akridge,
Road Inspector.
