“HERE WE HAVE IDAHO”

1 Alma Mater, the hope of a pioneer race;
You're fashioned of dreams and of toil,
Your walls and your towers by stout-hearted men
Were raised from the rock and the soil.

Chorus

And here we have Idaho,
Winning her way to fame;
Silver and Gold in the sunlight blaze,
And romance lies in her name;
Singing, we're singing of you, ah, proudly too;
All our lives through we'll go singing,
Singing of you, Alma Mater, our Idaho.

2 Now ours is the heritage, rich and so full,
The gain of their toil and their tears;
And ours is the fruit, and the harvest is ours,
Oh, Idaho, gift of the years.

Chorus

And here we have Idaho,
Winning her way to fame;
Silver and Gold in the sunlight blaze,
And romance lies in her name;
Singing, we're singing of you, ah, proudly too;
All our lives through we'll go singing,
Singing of you, Alma Mater, our Idaho.

C. Scott Green took office as the 19th president of the University of Idaho on July 1, 2019. President Green joins U of I as a highly accomplished executive with a career in global finance, operations and administration. He is also a proud alumnus of the university, graduating in 1984 with a Bachelor of Science in accounting.

Born in Moscow, Green's family moved to Boise, where he graduated from Boise High School. Following his graduation from the University of Idaho, the third-generation Vandal went to work for Boise Cascade Corporation. He went on to attend Harvard Business School and received a Master of Business Administration in 1989.

Green worked for Deloitte and Touche as part of its accelerated career program from 1989-94. He then worked in banking, serving in various management roles for Goldman Sachs and ING Barings. He published two books on the Sarbanes-Oxley Act of 2002, which reformed regulations around auditing and financial reporting.

Green went on to leadership in global law firms, including service as CEO at Pepper Hamilton and as executive director at WilmerHale. He most recently served as the chief operating and financial

officer for Hogan Lovells, one of the largest law firms in the world, with annual revenues of over \$2 billion. Green led all of the firm's worldwide operations, technology, conflicts and finance functions. He has had global responsibility for more than 3,000 employees in more than 30 countries.

The first non-lawyer to run an American Lawyer 100 law firm, Green was recognized as one of the Top 50 Big Law Innovators of the Last 50 Years by The American Lawyer magazine in 2013. A certified public accountant, Green was inducted into the American Institute of Certified Public Accountants' Business and Industry Hall of Fame in 2006. He won the Institute of Internal Auditors Outstanding Contributor Award in 2004 and 2006.

Green's commitment to the University of Idaho over many years has included service on the U of I Alumni Association National Board of Directors, the College of Business and Economics Advisory Board and on the U of I Foundation Board. He is also a Vandal Scholarship Fund supporter.

Green and his wife, Gabriella, an interior design project manager, have two college-aged children: Nicholas and Christina.

GUEST SPEAKER

Ali Carr-Chellman

Ali Carr-Chellman serves as dean of the College of Education, Health and Human Sciences and a professor of Curriculum and Instruction at the University of Idaho. She is responsible for the leadership, vision, strategy, budget, personnel and all academic issues within the college, which sits at the nexus of the most important issues to Idahoans today — health and education.

Carr-Chellman comes from a family of teachers. Her grandmother, mother and sisters were all public school teachers, and her father was on the faculty at The Ohio State University Medical School.

After working as a teacher, she learned about instructional design and pursued a different educational career pathway — creating learning solutions for jet fighter pilots, business professors, pharmacists and online courses across many subjects.

Carr-Chellman brought 30 years of experience in higher education to U of I when she joined the university in 2016. She has Bachelor of Science and Master of Science degrees from Syracuse University and a Ph.D. from Indiana University, Bloomington. She is the author of more than 200 publications and six books focused on systems theory, diffusion of innovations, online learning, gaming and gender, how to change schools for the better and how to engage learners. Her TED talk on the topic of boys and educational gaming has been viewed more than 1 million times. She has won several academic awards, including the Jonassen Award for Outstanding Research this year by the Association for Educational Communications Technology.

The College of Education, Health and Human Sciences has a large portfolio of degrees including Recreation, Sport, Tourism, Dance (boasting the only Dance Bachelor of Science in Idaho), Teacher Preparation (at the elementary and secondary levels), Exercise, Sport, Health Sciences, Athletic Training, Rehabilitation, Principal and Superintendent Preparation, and Adult, Organizational Learning and Leadership. The college, which will celebrate its 100th anniversary in 2020, changes lives every day by serving education and health needs across Idaho. Carr-Chellman believes students in the College of Education, Health and Human Sciences change the world in humble, unseen, but life-altering ways and have fantastic opportunities to enrich the state of Idaho.

An honorary degree is awarded to a person deserving of honor by virtue of scholarly distinction, noteworthy public service or significant contributions to the state of Idaho. In the selection of candidates for honorary degrees, preference is given to those who are Idaho residents or University of Idaho graduates.

David E. Whitehead

David E. Whitehead is chief executive officer at Schweitzer Engineering Laboratories, where he oversees the company's global operations, including research and development, quality, sales, communications and marketing, engineering services, manufacturing and business areas.

For more than a decade, Whitehead led the SEL Research and Development Division, an 800-person multidisciplinary team responsible for the research, design, development and testing of systems that manage, monitor and control critical electric infrastructure.

A recognized leader in utility and industrial control system cybersecurity, Whitehead's inventions have led to breakthroughs in advancing cybersecurity in the energy sector. He has testified before the U.S. Senate and the Federal Energy Regulatory Commission on the importance of innovation and protecting against cyberattacks. He has presented at numerous cybersecurity conferences and authored numerous papers on the topic.

He has been instrumental in growing the company's Research and Development Division and in leading the development of the steady stream of inventions to come out of SEL. He has been awarded more than 73 patents around the world.

After joining SEL in 1994, he served in a variety of roles within the company, including hardware engineer, research engineer, chief engineer of the Government Services Division and vice president of Research and Development.

Whitehead serves on the board of directors of SEL and Veracity Industrial Networks, is a senior member of the Institute of Electrical and Electronics Engineers (IEEE) and is the past chair of the IEEE Power and Energy Society Substations C6 committee. He received a Bachelor of Science in electrical engineering from Washington State University and a Master of Science in electrical engineering from Rensselaer Polytechnic Institute. He is a registered professional engineer in Washington, New York, Michigan and North Carolina.

In recognition of Whitehead's contributions to the engineering field and his exemplary commitment to higher education, the University of Idaho is proud to bestow on him the Doctor of Engineering degree with all its rights, honors, privileges and responsibilities.

HONORARY DEGREES

An honorary degree is awarded to a person deserving of honor by virtue of scholarly distinction, noteworthy public service or significant contributions to the state of Idaho. In the selection of candidates for honorary degrees, preference is given to those who are Idaho residents or University of Idaho graduates.

Jonathan Segal

Jonathan Segal '84 is considered one of the most successful and pioneering residential architects in the United States.

His Jonathan Segal FAIA and Development Company has been responsible for the design and development of more than 1,000 medium- to high-density urban residential, mixed-use and live/work units totaling over 300,000 square feet of construction.

A graduate of the University of Idaho Architecture Program, Segal has redefined the role of the traditional architect by designing, developing, constructing and managing his own projects.

Over the past 20 years, he has created and modeled the unique practice of "Architect as Developer," a prototype in which the architect has the ability to become the owner, therefore eliminating the client and the general contractor from the design and building process. Segal teaches this concept of "Architect as Developer" in an online video course for architects.

A Fellow of the American Institute of Architects, Segal has been the recipient of numerous accolades including 40 local, state and national AIA awards for residential and urban design, and seven California American Institute of Architects Honor Awards. In 2003, he was named one of four architects in San Diego's history to make a difference in the history of the city. Residential Architect Magazine offered him both the Leadership Award and the Project of the Year Award and in 2004, named him a "Rising Star" in the nation. Recently, he was selected as one of the top 50 residential architects in the United States. He was previously awarded a University of Idaho Silver and Gold Award in 2016.

His work has been featured in the New York Times, Los Angeles Times, Builder Magazine, Dwell Magazine, the San Diego Union-Tribune and San Diego Home and Garden.

In recognition of Segal's contributions to the field of architecture and his commitment to higher education, the University of Idaho is proud to bestow on him the Doctor of Arts degree with all its rights, honors, privileges and responsibilities.

ALUMNI ASSOCIATION BOARD OF DIRECTORS

About the University of Idaho Alumni Association, Inc.

The University of Idaho Alumni Association, Inc. (UIAA, Inc.) is a non-dues-paying group, founded in 1898, that supports University of Idaho alumni to connect them with their alma mater. This network of more than 109,000 alumni worldwide is made of University of Idaho graduates and students who have completed 90 credits or more.

The University of Idaho Alumni Association, Inc. is managed by an elected board of directors that governs the UIAA, Inc. and meets formally three times a year. Duties of elected directors include managing corporate affairs, business and assets of the association. Appointed members may also serve on the board with no voting privileges.

UNIVERSITY OF IDAHO FOUNDATION 2019

About the University of Idaho Foundation, Inc.

The University of Idaho Foundation was established in 1970 to attract private financial support to aid in the achievement of institutional goals and to manage assets for the benefit of the University of Idaho. The Foundation is governed by a board of directors of up to 25 volunteer voting members.

The Foundation receives gifts in a variety of forms that include cash contributions, marketable securities and real estate, and through planned giving opportunities such as bequests, gift annuities, charitable remainder trusts and others.

More than 1,585 individual endowments have been funded through charitable contributions. The endowed funds are managed in the Consolidated Investment Trust (CIT), the Foundation's pooled endowment fund. The principal is non-expendable; distributions support scholarships, faculty development, research and other programs in accordance with our donors' wishes.

With more than \$363 million in assets, the University of Idaho Foundation is the largest public foundation in the state of Idaho.

SIGNIFICANCE OF ACADEMIC APPAREL AND SYMBOLS OF INVESTITURE

University of Idaho Academic Mace

Maces date to the Middle Ages and symbolize strength and authority. Each is unique and reflects the values and characteristics of the institution. The university's chief marshal, who leads all academic processions, carries the mace.

The University of Idaho's mace, used for the first time at the centennial commencement, is 32 inches long, made of walnut and encircled with bands of Idaho gold and silver in which Idaho garnets and opals have been inlaid. The head is embellished with silver and gold representations of camas plants and syringa flowers. The chair of the university's Faculty Senate, the marshal of the academic procession, carries the mace in the American tradition, at a 45-degree angle across the chest, while in England, the bearer carries it over the shoulder.

University of Idaho President's Medallions

The first medallion was created by Idaho artists George and Macky Roberts. The President's Medallion was first used in 1965 at the inauguration of Ernest Hartung, the University of Idaho's 12th president.

The medallion's base is a three-and-a-half-inch disc of pure Idaho silver. Mounted on the base is a disc of native jasper; a sterling silver sunburst is inlaid in the disc. Inside the sunburst is a modification of the Chinese character meaning "mountain," which features three upward-pointing prongs. Over the center prong is a gold inlay, thus symbolizing "Light on the Mountain."

The heavy medallion was worn suspended from a collar woven of Idaho wool, some of which is dyed with dahlia flowers to match the jasper and some of which is from a black sheep.

The second President's Medallion, worn during commencement by then-President Timothy P. White, was commissioned in 2004. This medallion's base is a gold-leafed university seal and is worn suspended by a chain with gold leaf charms, each representing the presidents who have served the university.

The university's second, and current, President's Medallion.

The first President's Medallion, created in 1965.

SIGNIFICANCE OF ACADEMIC APPAREL AND SYMBOLS OF INVESTITURE

University of Idaho Academic Apparel

By observing certain features of the academic apparel, it is possible to learn several things about the academic status of the scholar: the level of the degree attained, the branch of learning in which it was earned, and the college or university conferring the degree.

Gowns

The gowns differ according to the level of the degree. The sleeves are the principal indicator — gowns of bachelor's have pointed sleeves; those of master's have oblong sleeves with an arc cut away at the front; and doctors have round, bell-shaped sleeves. Bachelor's and master's gowns are untrimmed. Doctoral gowns have distinctive velvet facing down the front and three velvet bars on each sleeve.

The University of Idaho adopted a doctoral gown of its own in 1989. The silver gown has a panel and sleeve bars of black velvet outlined in antique gold. The beret-styled soft cap is patterned after the Cambridge version instead of the traditional Oxford-style mortarboard. The cap and gown were designed by Emeritus Professor Edmund Chavez in the university's centennial year and are worn today by officials and university administration.

Honor Cords

Honor Cords, worn around the neck and hanging loosely down the front, identify students who are graduating with honors: gold, summa cum laude (with highest distinction); silver, magna cum laude (with great distinction); and bronze, cum laude (with distinction). The cords are provided by the University of Idaho and are worn on this one occasion only.

Caps

The color of the tassel worn on the cap varies with the level of degree. The bachelor's tassel represents the color appropriate to the major field of study (see colors at right); the master's and specialist's tassels are black; and the doctoral tassels are old gold.

Hoods

The length of the hood also varies according to the level of degree. The bachelor's gown is worn without a hood. A master's hood is three and one-half feet long, and a doctor's hood is four feet in length and has panels at the sides. It is from the colors adorning the hood that one can learn two other facts. Lining: the hood is lined with the official color or colors of the college or university conferring the degree (silver and gold, signifying the University of Idaho). Trimming: the hood is trimmed with velvet of a color appropriate to the wearer's branch of learning. For example, the trimming for the degree of Master of Science in agriculture is maize, representing agriculture, rather than golden yellow, representing science. (In the case of the Doctor of Philosophy degree, the dark blue color is used, representing the mastery of the discipline of learning and scholarship, regardless of the branch of learning.) Colors associated with the different disciplines are listed below:

Agriculture.....	Maize
Arts, Letters, Humanities.....	White
Commerce, Accountancy, Business.....	Drab
Economics.....	Copper
Education.....	Light Blue
Engineering.....	Orange
Fine Arts, including Architecture.....	Brown
Forestry.....	Russet
Journalism.....	Crimson
Law.....	Purple
Music.....	Pink
Philosophy.....	Dark Blue
Physical Education.....	Sage Green
Public Administration.....	Peacock Blue
Science.....	Golden Yellow
