

Dear Don,

I tried to call you a few times - but no answer. Will try again.

I am leaving tomorrow for a two-week trip to Estonia (where I was born). I haven't been back there since I was 7!

Will write a longer note in Jan. I ran across couple of interesting ideas on lithic research, after talking to (and reading more about the work of) people doing research on fracture of glass and ceramics(!). I visited, in that connection, Nat'l Bureau of Stds. (!) and Prof. V.D. Tréchet @ Alfred College, Alfred, N.Y. (Cont'd on back)

MERRY CHRISTMAS

AND A

HAPPY NEW YEAR

me

6.11.1113

Remember, back in the Flintworking School
you mentioned to me Fréchet's name -
he had written a paper on fracture
markings (in 1965). He had had some
correspondence with you some years back.

Prof. Fréchet asked me to give
you his kindest regards.

ORIGINAL PORTRAIT POSTER

I will write at greater length
to you about that very
exciting visit.

With best regards,
- and the best wishes for
Christmas and the coming year,

Fre
