Tucson, Arizona 85721

Dear Ray:

Thanks so much for sending the copy of the Hohokam paper. I think, however, that Julian did not convey my message correctly. Earl would like to have the original copy and drawings and photos. This paper contains so much of the mechanics of pressure work that it is our intention to rewrite it omitting Hohokam and just describing pressure, notching, barbing etc.

I don't know if Earl plans to publish this in Tebiwa or as a separate paper, but we have many requests for something on pressure and thought this would save a lot of re-writing.

We hoped to get to Arizona this year, but were unable to make the trip due to previous commitments. We are now about to get bogged down with visitors. Francois is due the first of April and Lorenzo about that time or before. Then must do a stint at Pullman, so will have to wait until next winter to enjoy your fine state.

Thanks in advance for your reply to this request and hope to see you in Miami if time and funds allow.

Yours very truly,

Don E. Crabtree

P.S. Our very best to Molly and Emil and all the fine people in your department.
