

1608 Brockton Ave #1
West Los Angeles 90025
Feb. 9 68

Dear Don,

We had hoped to hear from you as to your likely movements towards Los Angeles. The Burfords are anxious to meet you, having missed you both on previous occasions when your paths nearly crossed. I am trying to keep free of all weekend engagements until we are sure that they will not interfere with your visit plans.

I will not be teaching in the Spring quarter so will be free of duties for the period between 15 April & 15 June or thereabouts. We are planning to leave out of Los Angeles until June & are going this weekend to Cambria near Paso Robles to inspect a house. We will be home on 12th Feb.

We believe you are having very cold weather. Spring is just around the corner here but today it is a drizzling rain & distinctly cool. We are looking forward to seeing you. Congratulations on your interesting paper in 'Science' Jan 68.

With warmest regards to you
both from Dorothy & myself

Yours sincerely
Clement Burford
